In the peace plan proposed by the President to all the nations, the composition of the international commission is left to agreement between the parties, and I am authorized to suggest for the consideration of those who are willing to enter into this agreement:

First. That the international commission be of five members, to be composed as follows: One member from each of the contracting countries, to be chosen by the Government; one member to be chosen by each of the contracting countries from some other country, and the fifth member of the commission to be agreed upon by the two Governments, the commission to be appointed as soon as convenient after the making of the treaty, vacancies to be filled according to the original appointment.

ments, the commission to be appointed as soon as convenient and the making of the treaty, vacancies to be filled according to the original appointment.

Second. The time also is to be agreed upon, and it is suggested that that time be one year. If a year is considered too long or too short, this Government will consider either a greater or a less period.

Third. This Government is prepared to consider the question of maintaining the status quo as to military and naval preparations during the period of investigation, if the contracting nation desires to include this, and this Government suggests tentatively that the parties agree that there shall be no change in the military and naval program during the period of investigation unless danger to one of the contracting parties from a third power compels a change in said program, in which case the party feeling itself menaced by a third power shall confidently communicate the matter in writing to the other contracting party, and it shall thereupon be released from the obligation not to change its military or naval program, and this release will at the same time operate as a release of the other contracting party. This protects each party from the other in ordinary cases, and yet provides freedom of action in emergencies.

All of these suggestions, however, are presented for consideration, and not with the intention of imposing any fixed conditions.

About the year 1905 the idea contained in this proposal was in substance presented at Brussels by the distinguished gentleman from Missouri [Mr. Bartholdt] whose speech the other day in favor of this resolution contained so much of interest, instruction, and inspiration to us all.

In 1906 Mr. Bryan delivered a speech presenting the same proposition at the opening of the Interparliamentary Conference in the Royal Gallery of the House of Lords in London, arguing in its favor that it gives an opportunity to investigate the facts and to separate them from the question of honor, that it gives time for the calming of passion, and that it gives time for the formation of a controlling public sentiment.

At the same conference Sir Henry Campbell-Bannerman, then Prime Minister of England, delivered his great speech known as the "Duma speech," in favor of international peace agreements, saying:

The bonds of mutual understanding and esteem are strengthening between the peoples, and the time is approaching when nothing can hold back from them the knowledge that it is they who are the victims of war and militarism; that war in its tawdry triumphs scatters the fruits of their labor, breaks down the paths of progress, and turns the fire of constructive energy into a destroying force.

Already 31 of the world's great nations have signified to the Department of State their acceptance of the principle of the President's peace proposal.

In this connection I can not refrain from calling your attention to the brave speech Mr. Bryan made a little while ago at the Mohawk arbitration conference, when he declared:

I believe that our people ought to try to get agreements with other nations to do the things that are right. But I do not believe this Nation ought to wait for any other nation to agree to do what is right. It ought itself to do what is right. If this Nation announced to the world that it would not spend its money getting ready for wars that ought never to come; that it had faith in the good intent of other people, and it expected other people to have faith in its good intent, do you think our Nation would suffer for that? The building of these great battleships, these preparations by Christian nations to fight one another, is a challenge to the Christian civilization of the world. I believe that this Nation could stand before the world to-day and tell the world that it did not believe in war; that it did not believe that it was the right way to settle disputes; that it had no disputes that it was not willing to submit to the judgment of the world. If this Nation did that it not only would not be attacked by any other nation on the earth, but it would become the supreme power in the world.

Mr. Speaker, the paramount influence to-day in favor of universal peace is the spirit of the Christian religion. At the foot of Pennsylvania Avenue, under the shadow of the Capitol in this fairy city of the heart, stands the Peace Monument. A great sculptor carved his dreams in stone, and lo, history writes on the scroll of fame the heroic deeds of those who fell, while Columbia, like another Rachel, weeps for her children and will not be comforted because they are not. It is a majestic monument of exquisite beauty, but the gentleman from Alabama [Mr. Heflin] told us to-day in his fervid oration of a nobler monument, and I will quote his eloquent words to you:

A few years ago Argentina and Chile were forever at war with each other; killing each other's people was the order of the day. There they stood, arrayed against each other in mortal combat. But what happened between these two countries? Their representatives met on the border line and struck hands about a common center for the good of both countries and swore eternal friendship. They took their guns

and battle blades and molded them into a mighty monument; and standing on that monument is a bronze figure of Christ with a scroll in His hand on which is written, "Peace on earth, good will to men." Written on the base of that monument are these words:

"Sooner shall these mountains crumble to their base than Argentina and Chile break the faith that they have this day plighted at the feet of Christ the Savior."

The historian of the Decline and Fall of the Roman Empire, in the famous fifteenth chapter, wrote:

in the famous fifteenth chapter, wrote:

A candid but rational inquiry into the progress and establishment of Christianity may be considered as a very essential part of the history of the Roman Empire. While that great body was invaded by open violence, or undermined by slow decay, a pure and humble religion gently insinuated itself into the minds of men, grew up in silence and obscurity, derived new vigor from opposition, and finally erected the triumphant banner of the Cross on the ruins of the capitol. Nor was the influence of Christianity confined to the period or to the limits of the Roman Empire. After a revolution of 13 or 14 centuries that religion is still professed by the nations of Europe, the most distinguished portion of humankind in arts and learning as well as in arms. By the industry and zeal of the Europeans it has been widely diffused to the most distant shores of Asia and Africa; and by the means of their colonies has been firmly established from Canada to Chile, in a world unknown to the ancients.

More than a hundred years have gone since the death of Gibbon and the religion which he believed to be of merely human origin has spread its benignant influence to the remotest corners of the world. Let us pause while almost with one voice proclaming "peace on earth, good will to men"—let us pause as the lawmakers of a Christian land—to pay tribute to the lowly Nazarene, the Prince of Peace, who gave that principle to the civilization of mankind, a principle more powerful for world peace than all the armies of the earth, all the navies of the seas, all the edicts of kings, all the laws of parliaments and congresses, and all the conventions of nations.

Mr. Speaker, it is an interesting inquiry to consider what wise uses might be made of the money saved the people by reducing or destroying the burdens of military establishments, but for me it is enough to know that taxes will be reduced and our Government restored to what the fathers designed it to be—a wise and frugal Government, which shall restrain men from injuring one another, which shall leave them otherwise free to regulate their own pursuits of industry, and shall not take from the mouth of labor the bread it has earned.

While this is not a proper occasion for their consideration. will state that I am deeply concerned with such great and living questions and issues as the conservation of the public domain and the preservation of our national resources from predatory monopoly, the building of levees for the reclamation of land subject to overflow, the drainage of swamp lands, the prevention of floods, the building of reservoirs for the storage of the melted snows of the mountains to irrigate the semiarid western plains, vocational education, the development of the science of dry farming, the encouragement of agriculture and of commerce as its handmaid, the building of good roads, canals, and waterways. Each of these questions has its own peculiar aspects, some of them involving the organic structure of our complex dual system of State and Federal Governments, each within its own sphere supreme. But the paramount problem to-day, not only with the American people, but the international and world-wide problem, is the social problem of plain and simple justice—to give to every man upon this earth the fruits of his own toil.

God speed the day when some John Bunyan, yet unborn, shall write a new story of the Pilgrim's Progress. I would have the Pilgrim represent the Toiler, who is the type of the countless millions of the American people who support this Government and make it what it is. I would care nothing about the Slough of Despond or the Delectable Mountains or the Crystal River or the Shining Ones of the Celestial City, but only that the burden shall fall from the back of the Pilgrim.

Mr. Speaker, I am an optimist. I look for the silver lining to every cloud, and in the darkest night I see hope's trembling World peace is not an iridescent dream. We may not see it in our day; clouds will gather, clouds are gathering, but through the riven tempest the sun will shine, and lo a miracle, the rainbow—daughter of the storm—is there.

And as the irresistible march of Christian civilization encompasses the world, more and more will be expanded the domain of universal peace, until on every spot of the whole earth the dove with the olive leaf, long a wanderer over the waste of waters, may find rest for the sole of her foot.

Mr. HARDY. Mr. Speaker, I yield the remainder of my time to the gentleman from Illinois [Mr. BUCHANAN].

The SPEAKER pro tempore. The gentleman from Illinois [Mr. BUCHANAN] is recognized.

Mr. BUCHANAN of Illinois. Mr. Speaker, I am in favor of this resolution because it is to the best interests of the masses of the people of this country and of the world.

In this discussion those who have criticized the resolution have done so under the cloak of protecting the interests of the working people and of the farmer. That is usually the case when the interests which alone profit by wars or any other means of burdening the people are the only beneficiaries of measures designed to satisfy their greed for profit and for power.

The gentleman from Pennsylvania [Mr. Moore], in his endeavor to make an argument, which I hardly think he believes in himself, went so far as to criticize the seamen's bill, and his statement and argument on that question were as erroneous as were his statement and argument against the resolution introduced by the gentleman from Missouri [Mr. Hensley].

He said, for instance, that it would be impossible for an American boy to become a seaman if this seamen's bill passed. For the information of those present and those who might read the Record, I want to read that part of the bill that does provide for apprentice seamen. Of course that is the purpose of the bill, and those who are in favor of it believe it will make a condition that will be desirable for American workmen to take positions on our merchant vessels. Section 12 of that bill provides—

That no vessel of 100 tons gross and upward, except those navigating rivers exclusively and the smaller inland lakes where the line of travel pursued is at no point more than 3½ miles from land, and except as provided in section 1 of this act, shall be permitted to depart from any port of the United States unless she has on board a crew not less than 75 per cent of which in each department thereof are able to understand any order given by the officers of such vessel, nor unless 40 per cent in the first year, 45 per cent in the second year, 50 per cent in the third year, 55 per cent in the fourth year after the passage of this act, and thereafter 65 per cent of her deck crew, exclusive of licensed officers, are of a rating not less than able scaman.

Therefore the bill does provide for a condition where the American workingman can get employment.

Mr. Speaker, I want to say that the gentleman from Missouri [Mr. Hensley], who introduced this resolution, is a gentleman with whom I have associated quite a good deal, being on the Labor Committee with him in the last Congress, as well as the Naval Affairs Committee, and both of us are now members of the Committee on Naval Affairs. To know him is to respect and admire him for his sincere and tireless efforts to secure remedial legislation for the masses of the people. His sympathies lie with the working people, and in introducing and prosecuting the passage of this resolution he has expressed the wishes, ambitions, and hopes of the great masses of the laboring people of this country, and when they know of his splendid efforts in their behalf it will endear him to their hearts. [Applause.]

I desire to read as a part of my speech an extract from the report of Mr. G. W. Perkins, fraternal delegate to the world's congress of the trade union movement held at Zurich, Switzerland, September, 1913, in which the following countries were represented—England, France, Belgium, Holland, Denmark, Sweden, Norway, Finland, Germany, Austria, Bosnia-Herzegovina, Hungary, Croatia, Switzerland, Italy, Spain, and the United States.

"The trade union movement of Europe has had a greater influence in preventing the wars between civilized nations than all other influences combined. During the Morocco squabble, and when England, France, and Germany stood ready to grapple in the death struggle, stood on the verge of war with all its horror, misery, and privation, let it be said to the everlasting credit of the trade unionists of France that they made it clearly understood and known to the Government that they were opposed to a war of conquest. The French trade unionists immediately communicated with England and Germany, and while it was deemed not advisable for a conference to be held to discuss war and its prevention, it was diplomatically decided that the delegation of French trade unionists should visit Germany and England on a study tour of social and economic questions. About 70 trade unionists went to each country. They spent several days in Germany, in which time both the German and French leaders quietly talked against war. This all culminated in a mass meeting held in Berlin and which over 30,000 people attended. Outwardly the meeting was to talk over social and economic questions, but inwardly, the working people at least, knew it was to be a protest against a war with France over the Morocco situation.

"This substantial demonstration immediately had its effect upon Germany. The French delegates immediately hurried home, where similar tactics were employed. Mass meetings of protest against war with Germany or England over the Morocco question were held all over France, and resolutions of protest against the war were unanimously adopted. The same influences were at work in England, and I assert without fear of successful contradiction that the trade union movement of these

three countries actually prevented what would have been one of the bloodiest and costliest wars, had it taken place, that has ever occurred in Europe. The trade union movement, if nothing else, has taught the workers of all countries that wars of conquest bring home to the workers who are fortunate to live through the war nothing but misery, degredation, and poverty, and after all it is the greatest agency for peace the world possesses.

"It has dispelled the hatred that formerly existed between the workingmen of different countries, and has brought about in its stead a feeling of brotherly love and kindly consideration which augurs well for a more speedy development of the inter-

national trade-union movement.

"I congratulate the American trade-union movement on having excluded from our movement partisan politics and religious differences, leaving to every member the right to pray and vote as his own conscience may dictate. Our tolerance of the rights and opinions of others in anything not mutually within the sphere of the trade-union activity, who may honestly differ from us, has brought about an element of strength which is partly responsible for the splendid condition in which we now find ourselves, and which policy, if adhered to, will, in my judgment, bring about the day when human rights and human justice shall prevail and workingmen and women of our whole country and the civilized world will come into a full realiza-

tion of their hopes and ambitions.

"Everywhere in Europe, and especially continental Europe, there is a strong protest and terrifically bitter feeling against large standing armies. The expense for the maintenance and the upkeep and overhead charges, in Germany especially, is something appalling, and constitutes the reason which actuates many of the workers in voting the social Democratic ticket, largely as a protest against the standing army. That is the only party at present in Germany which is opposed to militarism. Personally I am of the opinion that standing armies of continental Europe are maintained not so much for the purpose of repelling foreign invasion but rather to hold in subjection the workers and to repel any uprising or revolution which the intolerable conditions might inspire in them. Continental Europe as it exists to-day is standing on a volcano, glossed over with a thin veneer of flowers, song, music, art, old buildings, and traditions. Remove these and there might be an eruption that would shake the civilized world to its very Where will it all end? The answer, reflected on foundations. the banner of the advancing hosts of trade unionists, is that as the trade-union movement develops it will bring order out of chaos. It will restore, in so far as it is possible, conditions to a more equitable level, and bring into the lives of the workers of these otherwise beautiful countries some sunlight, some happiness, and the opportunity and ability to enjoy life as befits human beings and advancing civilization.'

EXTRACT ON INTERNATIONAL PEACE FROM THE REPORT OF DELEGATES FROM THE AMERICAN FEDERATION OF LABOR TO THE BRITISH TRADES-UNION CONGRESS, 1913.

"One of the strongest impressions made upon the minds of your delegates while attending the congress was the prevailing sentiment against international wars. There seemed to be a general sentiment that trade-unionists would not be pawns in the game of international war as played by political or commercial interests for financial or territorial aggrandizement, and that the trade-unionists of the world, bound together in bonds of fraternity, strengthened by the annual visitations of delegates from each country to the others, would enter their most emphatic protest against being rendered as food for cannon and other implements of war at the behest of their despoilers. To our minds the international trade-union movement has become already the greatest guaranty for international peace, and will be recognized as such in the near future by all who are interested in preserving the human race from the ravages of warfare.

"While we have not been able to bring ourselves in accord with all the methods pursued by trade-unionism in England as methods that could fittingly be adopted in America, and have felt obliged to record herein some comments and observations that might possibly be regarded as criticism, we wish it to be distinctly understood that in whatever we have said we have been actuated by a sense of duty to the constituency that honored us, while, at the same time, we acknowledge the sturdiness and sincerity of purpose of our friends across the water, who are working at their own problems in ways that seem to them best under conditions that are entirely dissimilar to those that exist in America. For all of our differences in opinions and methods, we are each and all of us a part and parcel of

the labor movement of the world, striving in all countries through the best methods available under particular conditions to advance the cause of humanity both present and future.

"C. L. BAINE,
"LOUIS KEMPER,
"Delegates."

# INTERNATIONAL PEACE. (Report of the executive council.)

"Perhaps nothing tends to remove dissensions more than do sympathetic understanding and community of interests. The workingmen of all countries understand the meaning of contest and struggle. Whatever of progress they have made, whatever of advantage they have gained, whatever of individual freedom they have won, have all been the result of hard, persistent endeavor against wrong, oppression, and powerful interests. know that the dead-weight of the world's burdens, both in industry and upon the battle field, have ever fallen upon the toilers, the burden bearers of the world. They know that too often wars have been entered upon lightly for the aggrandizement of special interests rather than for justice and humanity. It is not lack of love of country which prompts the toilers to protest against international fratricide; they love their fatherland, home, and justice, but they are unwilling to be exploited or killed for the promotion of private or selfish ends.

"Labor organizations have fostered the spirit of cooperation for mutual helpfulness by international gatherings and by sending delegates to national gatherings in foreign countries. This practice has been the means of establishing good will and harmony; it has taught the workers that they are everywhere confronted by similar problems and has facilitated the execution

of common purposes.

"The constantly growing system of the international acceptance and recognition of trade-union cards is another influence that is quietly and surely creating a fraternal spirit among the workers of all lands. The convention of 1905 gave instructions to correspond with the international and national officers of this and other countries with regard to establishing the international exchange of union cards. As a result of this correspondence a number of organizations have established this custom. The growth and extension of this practice will not only bring mutual economic benefits to the workingmen of all countries, but will promote cordial relations between the countries politically and will give substance to the concept of fraternity.

"In accord with this conviction, labor organizations the world over have committed themselves to the policy of international peace—peace with honor and justice in international politics as well as in industry. With the progress of civilization, the concentration of industry and commerce about great national centers, and the development of world markets and commerce local arbitrary boundaries no longer determine the scope or the organization of economic interests. Political customs which develop out of and reflect economic conditions have manifested the same tendency. All national, economic, and political issues are infected with world interest.

are infected with world interest.

"It is especially fitting, then, that organized labor heartily indorse the efforts of the representatives of our country in endeavoring to secure world-wide cooperation in a movement for international peace. Such a movement marks an epochal development in the world's culture, a widening of men's thoughts, and a quickening of their consciences and humanitarian instincts, with which the American Federation of Labor has ever been in most hearty accord and has done much to promote.

This history of civilization and progress is the history of the substitution of law and orderly procedure for violence and war. Modern law is national in character. The state instituted regulations and machinery by which the rights of the people are secured and safeguarded. During this period of national development the loyalty, the patriotism, and the love of the people were centered upon national institutions. When the national law and governments had reached a point which insured peace and order within the state, the thoughts and ideals of men widened to larger aspects and nobler concepts. Now humanity is placed above any nation. There has developed that which has been called the international mind, and standards of international morality are being evolved, a habit of mind for which Lord Haldane, Chancellor of England, has so aptly used the word 'sittlichkeit.' The history of the development of the institutions for securing justice and peace between nations will, like development of similar institutions within a nation, be the history of the substitution of law and orderly procedure for strife and war. How quickly and surely this evolutionary development will take place will depend upon the development of the spirit of humanity between nations

and the ascendancy of 'sittlichkeit.' As has been most truly said: 'The matters in dispute between nations are nothing, the spirit which deals with them is everything.'

"The organized labor movement has been a mighty factor in creating and stimulating the spirit of human sympathy and understanding between nations, which is the basis for mutual good will, and is now ready to indorse and aid every movement for international justice and orderly adjustment of problems and difficulties. The future seems to assure some world federation that shall realize our ideals and protect all humanity.

"Organized labor is the only medium through which the working people can express themselves, and the foregoing reports, which were approved by the American Federation of Labor in convention at Seattle, November 10 to 22, 1913, clearly demonstrate that the wageworkers of the country are no longer deceived by those who are advocating large expenditures for naval defense and other war preparations on the ground that

it will give employment to labor.

"The wageworkers of the country are interested in securing legislation that will stop the financial and commercial pirates of the country from monopolizing the necessaries of life and obstructing the freedom of business and the liberty of our citizens. What organized labor is earnestly exercising its influence to secure is a fair day's pay for a fair day's work under fair conditions, and also laws that will give liberty of opportunity and justice. The wageworkers of the country are becoming interested and will exercise their efforts to secure a democratic Government in fact, which means a Government operated for the best interests of the whole people and special privileges to none. This they are entitled to, and they should be satisfied with nothing less."

The SPEAKER. The gentleman from North Dakota [Mr.

Young] is recognized for 30 minutes.

Mr. YOUNG of North Dakota. Mr. Speaker, there has been a naval holiday for 96 years upon the Great Lakes of North America. In some remarks here last July I called attention to a forgotten page of history, or at least a generally overlooked one, known as the arrangement of 1817, sometimes called the "Bagot-Rush treaty." It was first called an "exchange of notes." So tremendous a fact as disarmament on the Great Lakes might have been expected to proceed after lengthy discussions in the United States Congress and British Parliament. Not so. Charles Bagot, British minister at Washington, wrote a letter to Richard Rush, Acting Secretary of State, suggesting a limitation of armaments on the Great Lakes. Mr. Rush replied, giving his approval to the proposal. Then it was ratified by the Governments of both countries.

The arrangement or treaty provided for a reduction of armaments to the point of practically a revenue police service, namely, one vessel on Lake Ontario of 100 tons and armed with only one 18-pound cannon; two vessels on the upper lakes of the same tonnage and armament; and one vessel on Lake Cham-

plain of like armament and tonnage.

The Great Lakes cover an area of 97,850 square miles and have over 5,000 miles of shore line. They are greater in extent than the Bering Sea, six times as large as the Baltic Sea, and almost as large as the Mediterranean Sea. Many cities have been built along their shores, among them the great cities of Chicago and Milwaukee; Duluth, that will soon outstrip Pittsburgh and may some day rival New York; Detroit, Port Huron, and Bay City, three important cities of Michigan; Toledo and Cleveland in Ohio, and the great city of Buffalo in the Empire State; and on the Canadian side Port Arthur, Sault Ste. Marie, Goderich, Sarnia, Hamilton, Kingston, and Toronto. These are the more important cities, by no means all of them.

A kind Providence has smiled upon the commerce of these Lakes, dedicated to peace by the wise men of two great nations. Thirty-seven millions of people live in the eight bordering States, according to the census of 1910, more than one-third of the entire population of the North American Continent, and one-third of the total tonnage of North America is on the Great

Lakes.

The development of the Lakes country is almost as little known as the treaty by which its commerce was permitted to grow unfettered by the frowns of guns on land or water. How many know that there is upon the Great Lakes the greatest shipping port in the world; that they possess the largest fleet of freighters on earth; and that its cities have grown more rapidly than Boston, New York, Philadelphia, or San Francisco? And still there are those who talk of the necessity of ships of war to protect commerce. The freight handled on the Great Lakes amounts to six times as much as the freight of all the nations passing through the Suez Canal. To get an idea of the immensity of the lake traffic I will say that in one year

there were added 40 bulk freighters with a total capacity of 360,000 tons. To carry the same amount would require over 300 trains of 30 cars each, or a single train 70 miles long

Dedicated to peace, the boundary Lakes have been in the past and will be in the future the greatest factor in preventing excessive railroad rates. Every farmer in the Northwest who has shipped a bushel of grain or purchased a ton of coal has been benefited in this respect; every consumer of the products of western farms, or the products of the mines of Minnesota, Michigan, and Wisconsin has also been benefited by the lake trans-portation rates. And so these Lakes, which have somehow existed without the protection of armed ships of war, have been a blessing directly or indirectly to all the people of the United States and Canada.

The life of the treaty of 1817 has been threatened more than once. One of its provisions gave the right to either of the high contracting parties to annul the treaty by giving six months' nocontracting parties to annul the treaty by giving six months notice. It is not surprising therefore that the annulment of the treaty was threatened by the Fenian raids and the Civil War. But it survived these periods. It was, however, seriously threatened by private shipbuilding interests on the Great Lakes about 20 years ago. On the 4th day of April, 1892, Senator McMillan presented a petition of the iron-ship building according to the Great Lakes was not a period of the Great Lakes about 20 years ago. building companies of the Great Lakes praying for the early and complete abrogation of the treaty with Great Britain of 1817. On April 8, 1892, Senator McMillan introduced a reso-lution requiring the Secretary of War to inform the Senate whether any bids had been received for war vessels from ship-building companies on the Great Lakes and whether any such bids were refused or rejected for any reason or reasons other

bids were refused or rejected for any reason or reasons other than such as follow from the usual rule in accepting or rejecting bids for that class of work, and if so, the reasons therefor.

On May 5, 1892, the Secretary of War reported that there had been three bids received for the construction of a first-class torpedo boat; that two of the bids were rejected upon the usual grounds; and the third, that of F. W. Wheeler & Co., of Bay City, Mich., being the lowest bid, was rejected, the reason assigned being that the dengitiment could not under existing signed being that the department could not, under existing treaty stipulations, award a contract for the construction of a

vessel of war upon the Great Lakes.
On April 8, 1892, a resolution was also passed by the Senate On April 8, 1892, a resolution was also passed by the senate asking the Secretary of State to inform the Senate whether the treaty of 1817 was still in force. Secretary of State John W. Foster replied on December 7, 1892, expressing the opinion that the treaty was still in force. No one, so far as known, has even suggested since then that the treaty should be abrogated. It has lived through almost a century, and has doubtless been a great factor in maintaining the peaceful relations between this country and Great Britain which have existed since the signing

of the treaty of Ghent, 100 years ago.

The arrangement of 1817 stands out as the great concrete example of the efficacy of agreements to limit naval armaments. It is a living refutation to the short-sighted men who say, can't be done." With this splendid example of a disarman can't be done." With this splendid example of a disarmament treaty made by prophets of a century ago we shall be unworthy sons, blind indeed, if we fail to see in the proposal of Mr. Churchill a great opportunity to help bring about the world's peace, or at least hasten that day when-

The war drum throbs no longer And the battle flag is furled In the parliament of man,

The federation of the world.

[Applause,]

I desire to insert in the RECORD the following editorials: [Editorial from the Portland (Oreg.) Daily Journal.] NO IDLE DREAM.

No IDLE DREAM.

Secretary Bryan is the target for sarcasm because of his world-peace program, and yet Congressman Young of North Dakota recently illustrated the fact that the plan is no idle dream. He called attention to the Anglo-American agreement, now nearly a century old, for disarmament on the Great Lakes.

Cities and towns have been permitted to grow up around these inland seas without the least fear of destruction by a hostile naval force. Chicago, Detroit, Toronto, and Montreal have been fearless without a single dollar invested in land defenses. Peaceful pursuits have prospered unhampered by militarism, in spite of the fact that the international agreement could be abrogated by either party on six months' notice. But the agreement has remained in force; a century has proved that two nations can live in peace without guardianship of the mailed fist. The sophistry of war is discussed by the London Nation, drawing illustration in the Balkan conflicts. History again showed how bloodshed makes a bad cement, how violence breeds mutual suspicion, rivalry, contention, and open strife. The great powers who had encouraged the "war of freedom" later viewed the spectacle with horror. They condemned the strife, but admitted their inability to intervene, while one of them, at least, urged on the fighting.

In primitive days wars were carried on to devour an enemy, to seize women, herds, lands, and later to live parasitically upon the conquered. Cattle stealing and rapine are no longer tolerated in "civilized" warfare, but we still annex territory, for the occupants can not be killed.

advantageously. Indemnities are poor compensation for the waste of war. There are no gains to replace advantages won by the primitive conqueror. Then why does war survive?

M. Novikow, the Russian pacifist, says in reality civilized people to-day conduct wars simply because their savage ancestors did so of old. From sheer spiritual laziness accustomed habits have not been abandoned. Then, because war without any motive is revolting, theories are built upon theories to justify it.

The fact is that arms manufacturers and financiers, the only beneficiaries of armaments and wars, and a barbarian sentiment classing fighting as the best of sports, are directly responsible for militarism. The profit takers appland sophists who profess to find scientific and ethical vindication of war. They say war is the school of discipline, self-sacrifice, and all the manly virtues. But as a matter of fact there is no justification of brutality, and war is little else.

War was once carried on for plain, intelligible ends—the primitive man was not a hypocrite. To-day war has the same ends in view, but the hypocrite is in command. That is why Mr. Bryan's world-peace plan may be slow in securing general approval. And yet the plan has been a success for a century on the Great Lakes.

[Editorial from Every Evening, Wilmington, Del., Aug. 13, 1913.] WHY NOT EXTEND ITS SCOPE?

WHY NOT EXTEND ITS SCOPE?

Representative George M. Young, of North Dakota, recently made a speech of only a few hundred words in the House, in the course of which he afforded material for serious consideration on the part of his fellows in Congress, presented interesting information that will prove a surprise to many of his fellow countrymen, and also made a valuable and most effective contribution to the cause of universal peace. And that is a great deal for a Member of Congress to do in the course of a few minutes.

Stimulated by reading of the centennial celebration of Commodore Perry's famous naval victory on Lake Erie, now in progress, Representative Young referred to the special treaty between the United States and Great Britain following the conclusion of the War of 1812, as a result of which disarmament of the Great Lakes, which largely constitute the boundary between this country and British territory, was mutually agreed upon. This treaty, called the Bagot-Rush treaty by reason of its negotiation by Charles Bagot, then British minister at Washington, and Richard Rush, then Acting Secretary of State under the administration of President Monroe, was at that time modestly designated "an exchange of notes." It was brief in its terms, but wonderfully potent, and it led to an international compact for peace and good feeling between neighboring foreign countries that has stood the test of almost a century and is still a potent intimation of what may be done for peace by peaceable methods instead of adhering to the dangerous and ever-irritating policy of "insuring peace by being always prepared for wat."

"Those in favor of naval disarmament by international agreement,"

done for peace by peaceable methods instead of adhering to the dangerous and ever-irritating policy of "insuring peace by being always prepared for war."

"Those in favor of naval disarmament by international agreement," said Representative Young in the course of his modest deliverance, "will find here the greatest practical illustration of the wisdom of that policy. For almost a century cities and towns have been permitted to grow up around the Great Lakes—the inland seas—without the least fear of destruction by a 'naval force.' Think of great cities, like Chicago, Detroit, Toronto, and Montreal, without the investment of a single dollar for land defenses, either in men or forts. Think of what it has meant to business and the peaceful pursuits of those two great countries. It is worthy of note that there was a section in this treaty which provided that it might be annulled by either of the high contracting parties by giving six months' notice. In spite of the simple, easy method provided for its annulment, it has remained in force for almost a century, has been a blessing to the people of the two great nations, and is a powerful argument for disarmament the world over."

In conclusion Representative Young asked that the Clerk of the House read the "exchange of notes" and the subsequent proclamation by President Monroe, "which constitute this wonderful treaty, written by men who lived a century ahead of their time." This was done, and they thereby became part of the official record. The note of the British minister was as follows:

WASHINGTON, April 18, 1817.

WASHINGTON, April 18, 1817.

minister was as follows:

Washington, April 18, 1817.

The undersigned, His Britannic Majesty's envoy extraordinary and minister plenipotentiary, has the honor to acquaint Mr. Rush that, having laid before His Majesty's Government the correspondence which passed last year between the Secretary of the Department of State and the undersigned upon the subject of a proposal to reduce the naval force of the respective countries upon the American Lakes, he has received the commands of His Royal Highness the Prince Regent to acquaint the Government of the United States that His Royal Highness is willing to accede to the proposition made to the undersigned by the Secretary of the Department of State in his note of the 2d of August last. His Royal Highness, acting in the name and on behalf of His Majesty, agreed that the naval force to be maintained upon the American Lakes by His Majesty and the Government of the United States shall henceforth be confined to the following vessels on each side; that is:

On Lake Ontario, to one vessel not exceeding 100 tons burthen and armed with one 18-pound cannon. burthen and armed with like force.

On the Upper Lakes, to two vessels not exceeding like burthen, each armed with like force.

On the waters of Lake Champlain, to one vessel not exceeding like And His Royal Highness agrees that all other armed vessels on these lakes shall be forthwith dismantled and that no other vessel of war shall be there built or armed.

His Royal Highness further agrees that if either party should hereafter be desirous of annulling this stipulation and should give notice to that effect to the other party it shall cease to be binding after the expiration of six months from the date of such notice.

The undersigned has it in command from His Royal Highness, the Prince Regent, to acquaint the American Government that His Royal Highness has issued orders to His Majesty's officers on the Lakes directing that the naval force so to be limited shall be restricted to such services as will in no respect interfer

The note of Acting Secretary of State Rush and the proclamation of President Monroe were in similar terms, and thus was established nearly a century ago the practical naval disarmament of the Great Lakes

separating the country from Canada. Think what an enormous amount of money has been saved to both countries by this practical agreement, to say nothing of the irritation and the danger of clashing interests that would have resulted had each government maintained what we would now call a "sufficient" naval force on the Great Lakes.

Suppose, for the sake of argument, this splendid agreement had not been entered into, that Great Britain and the United States had each maintained a naval force of "appropriate" size on the Great Lakes, and that a proposition should be advanced for mutual disarnament. What would be the result? In imagination we can hear the storm of protests, the strident, angry cries that "it won't do," coming from many jingo throats and the mouths of those who ever have a sneaking desire for war. From Chicago, Milwaukee, Detroit, Cleveland, and other lake cities would come despairing protests against being "exposed to the attacks of a hostile force." Yet for nearly a century these cities have been thus "exposed," and not a citizen of any one of them would now have the hardthood to ask Congress to abrogate this treaty and establish a "sufficient navy" on the Great Lakes.

And as Great Britain and the United States have maintained peaceful relations for nearly a century, with a boundary between them comprising a large river, the chain of Great Lakes with their varying width of 40 to 300 miles, and a long imaginary line over which an infant may step, extending from the western edge of the Great Lakes to the Pacific coast, with not a warsalp on the waters or a single fort on either side of the imaginary land line, is it not also possible for these two countries to maintain their peaceful relations without having great warships to sail the vast expanse of ocean separating them?

And as between Great Britain and the United States, why not between and among all the nations of the world? What need has any nation of a navy any greater than is necessary to police the sea and extend ald and encouragement to i

# [Editorial from Washington, D. C., Herald.]

[Editorial from Washington, D. C., Herald.]

A WELL-TIMED REMINDER.

But for a speech in the House by Representative Young, of North Dakota, not many would have recalled that there was a disarmament agreement entered into nearly a century ago between this country and Great Britain. While it affected only the Great Lakes, it is nevertheless of importance. This is how it reads:

"Each power may have one vessel of not more than 100 tons, armed with one 18-pound cannon, on Lake Ontario, and one such vessel on Lake Champlain. Provision is made for two vessels of the same size on the upper lakes. Such naval force shall be restricted to such service as will in no respect interfere with the proper duties of the armed vessels of the other party."

For a hundred years the border has been safe under this agreement, which in our day could hardly be consummated with our militarists insisting that it is absolutely necessary to protect our great commercial and industrial lake centers by warships and forts. Mr. Young's speech is so full of practical truths and has such significance upon militarism in general that it should be widely circulated.

Here are its salient points:

"Those who favor naval disarmament by international agreement will find here the greatest practical illustration of the wisdom of that policy. For almost a century cities and towns have been permitted to grow up around the Great Lakes—the inland seas—without the least fear of destruction by a 'naval force.' Think of great cities like Chicago, Detroit, Toronto, and Montreal, without the investment of a single dollar for land defenses, either in men or forts. Think of what it has meant to business and the peaceful pursuits of these two great countries. It is worthy of note that there was a section in this treaty which provided that it might be annulled by either of the high contracting parties by giving six months' notice. In spite of the simple, easy method provided for in this amendment it has remained in force for almost a century, has been a blessing to

# ENROLLED BILL SIGNED.

The SPEAKER announced his signature to enrolled bill of the following title:

S. 488. An act to authorize the sale and issuance of patent for certain land to H. W. O'Melveny.

#### COMMITTEE RESIGNATION.

The SPEAKER laid before the House the following communi-

House of Representatives, Washington, December 6, 1913.

Washington, December 6, 1913.

CHAMP CLARK,

Speaker of the House, Washington, D. C.

DEAR SIR: Having been assigned to the District of Columbia Committee, I hereby tender my resignation of former assignments to Committees on the Public Lands, Election of President, etc., and Expenditures in the Treasury Department.

Respectfully submitted.

H. C. CLAYPOOL. The SPEAKER. If there be no objection, the resignation of the gentleman from these committees will be accepted.

There was no objection.

#### ADJOURNMENT.

Mr. HENSLEY. Mr. Speaker, I move that the House do now

The motion was agreed to; accordingly (at 5 o'clock and 31 minutes p. m.) the House adjourned until Monday, December 8, 1913, at 12 o'clock noon,

### EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of the Treasury, transmitting the report of the Surgeon General of the Public Health Service for the fiscal year 1913 (H. Doc. No. 392); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

2. A letter from the Secretary of Agriculture, transmitting detailed report of all sums paid by the Bureau of Chemistry of that department for compensation of or payment of expenses to officers and others employed by State, county, or municipal governments during the fiscal year ended June 30, 1913 (H. Doc. No. 393); to the Committee on Expenditures in the Department of Agriculture and ordered to be printed.

3. A letter from the chief clerk of the Court of Claims, transmitting statements of all judgments rendered by said court for the year ended November 29, 1913, the amounts thereof, the parties in whose favor rendered, and a brief synopsis of the nature of the claims upon which said judgments were rendered (H. Doc. No. 394); to the Committee on Claims and ordered to be printed.

4. A letter from the Secretary of War, transmitting a report of the president of the Board of Commissioners of the United States Soldiers' Home, dated October 21, 1913, upon the financial and other affairs of the Military Prison at Fort Leavenworth, Kans., together with copies of reports from the commanding Rais, together with copies of reports from the commanding officer of that prison and the commanding officer of the Pacific Branch, United States Military Prison, all for the fiscal year ended June 30, 1913 (H. Doc. No. 391); to the Committee on Expenditures in the War Department and ordered to be printed.

5. A letter from the Secretary of the Navy, transmitting a statement of the documents received and distributed by the Navy Department during the fiscal year ended June 30, 1913 (H. Doc. No. 395); to the Committee on Expenditures in the

Navy Department and ordered to be printed.

6. A letter from the Secretary of the Treasury, transmitting a combined statement of the receipts and disbursements, balances, etc., of the Government during the fiscal year ended June 30, 1913 (H. Doc. No. 396); to the Committee on Appropriations and ordered to be printed.

#### REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. JOHNSON of Kentucky, from the Committee on the District of Columbia, to which was referred the bill (H. R. 9411) relating to expenditure of money received on account of liquor licenses, Washington Market Co., and from other sources, reported the same with amendment, accompanied by a report (No. 102), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. COVINGTON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 7206) to amend an act entitled "An act to authorize aids to navigation and for other aids to navigation and for other works in the Lighthouse Service, and for other purposes," approved March 4, 1913, reported the same with amendment, accompanied by a report (No. 105), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEVENS of Minnesota, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 24) for the purchase or construction of a launch for the customs service at and in the vicinity of Los Angeles, Cal., reported the same with amendment, accompanied by a report (No. 106), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. COVINGTON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 3328) to provide for the construction of four revenue cutters, reported the same without amendment, accompanied by a report (No. 103), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. ESCH, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 4618) to increase the limit of cost for increased quarantine facilities at the port of Portland, Me., reported the same without amendment, accompanied by a report (No. 104), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. COVINGTON, from the Committee on Interstate and For-eign Commerce, to which was referred the bill (H. R. 7212) relating to the anchorage of vessels in navigable waters of the United States, reported the same with amendment, accompanied by a report (No. 108), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. GOEKE, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 6827) to amend an act entitled "An act to change the name of the Public Health and Marine-Hospital Service to the Public Health Service, to increase the pay of officers of said service, and for other purposes," approved August 14, 1912, reported the same with amendment, accompanied by a report (No. 109), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. DOREMUS, from the Committee on Interstate and For-eign Commerce, to which was referred the bill (H. R. 6202) providing for the disposition of the effects of deceased patients of the Public Health Service and of certain deceased officers and men connected with the Army, reported the same with amendment, accompanied by a report (No. 107), which said bill and

report were referred to the House Calendar.

# CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 2330) granting a pension to Francis I. Helm, alias Francis Boyd; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

A bill (H. R. 9075) granting a pension to Mary F. Hess; Committee on Pensions discharged, and referred to the Committee

on Invalid Pensions. A bill (H. R. 8561) granting a pension to Nancy Jane Mc-Ginty; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

#### PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials

were introduced and severally referred as follows:

By Mr. SMALL: A bill (H. R. 9981) granting holidays to star-route carriers; to the Committee on the Post Office and Post Roads.

By Mr. MONDELL: A bill (H. R. 9982) making an appropriation for the importation of Corriedale sheep from New Zealand for breeding purposes; to the Committee on Appropriations.

By Mr. DALE: A bill (H. R. 9983) to pension widows and minor children of officers or enlisted men who served in the War with Spain or Philippine insurrection; to the Committee on

By Mr. HOLLAND: A bill (H. R. 9984) to authorize the Secretary of the Treasury to acquire, by condemnation or otherwise, such additional land in the city of Norfolk, Va., as may be necessary for the enlargement of the post-office building in said city, to cause said building to be enlarged, and making an appropria-tion therefor; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 9985) to provide for an examination and survey of the Norfolk-Portsmouth Harbor, and entrances thereto from the Virginia Capes, with a view to increasing the depth of the channel to 40 feet from Norfolk Navy Yard to the said capes; to the Committee on Rivers and Harbors.

By Mr. YOUNG of Texas: A bill (H. R. 9986) granting to rural mail carriers December 25 as a legal holiday; to the Com-

mittee on the Post Office and Post Roads.

By Mr. McKELLAR: A bill (H. R. 9987) to prohibit interstate shipments or transportation of certain food products; to define and to prohibit transportation and sale of adulterated or misbranded food products; to regulate traffic therein; to define and regulate cold storage; to regulate dealing in cold-storage food products; and to fix penalties for violation, and for other purposes; to the Committee on Interstate and Foreign Com-

By Mr. HULINGS: A bill (H. R. 9988) to provide for farm loans secured by a pledge of approved first mortgages on agricultural lands, for the making, management, and repayment thereof, and for other purposes; to the Committee on Banking and Currency

By Mr. DONOVAN: A bill (H. R. 9989) to provide for the purchase of a site and the erection of a public building thereon at Norwalk, in the State of Connecticut; to the Committee on Public Buildings and Grounds.

By Mr. MITCHELL: A bill (H. R. 9990) to provide for an additional judge of the district court for the district of Massachusetts; to the Committee on the Judiciary.

By Mr. McCOY; A bill (H. R. 9991) relating to procedure in

United States courts; to the Committee on the Judiciary.

By Mr. KONOP: A bill (H. R. 9992) to provide for the purchase of a site and the erection of a public building thereon at

Sturgeon Bay, Wis.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 9993) to provide for enlarging the United States building at Appleton, Wis.; to the Committee on Public Buildings and Grounds.

By Mr. CLAYTON: A bill (H. R. 9994) to amend section 24, chapter 2, of the Judicial Code of the United States; to the Com-

mittee on the Judiciary.

By Mr. CAMPBELL: A bill (H. R. 9995) in relation to the service of process by United States marshals; to the Committee

on the Judiciary.

By Mr. TREADWAY: A bill (H. R. 9996) providing for inspecting and analyzing coal and furnishing information to the purchaser thereof; to the Committee on Interstate and Foreign Commerce.

By Mr. GUERNSEY: A bill (H. R. 9997) to increase the limit of cost of the public building at Bangor, Me.; to the Committee

on Public Buildings and Grounds.

By Mr. STEENERSON: A bill (H. R. 9998) to prohibit banks and trust companies, or any person, firm, corporation, joint-stock association, or company engaged in any brokerage, investment, or insurance business, from using the words "National,"
"Federal," "United States," or the initials "U. S." in the name or title of such institution or business; to the Committee on Banking and Currency.

By Mr. JOHNSON of Washington: A bill (H. R. 9909) to regulate the immigration of aliens to and the residence of aliens in the United States; to the Committee on Immigration and

Naturalization.

By Mr. SLOAN: A bill (H. R. 10000) appropriating \$750,000 to aid in eradication of hog cholera; to the Committee on Agri-

By Mr. TRIBBLE: A bill (H. R. 10001) to provide that the United States shall in certain cases aid the States and the civil subdivisions thereof in the construction and maintenance of rural post roads; to the Committee on Roads.

By Mr. TAYLOR of Colorado: A bill (H. R. 10002) providing for second homestead and desert land entries; to the Committee

on the Public Lands.

By Mr. HAYDEN: A bill (H. R. 10003) to provide for national aid to the several States in the construction, improvement, and maintenance of post roads; to the Committee on

By Mr. SMALL: A bill (H. R. 10004) to authorize the construction of a lighthouse upon Diamond Shoals, and to provide for the purchase thereof by the United States; to the Committee on Interstate and Foreign Commerce.

# PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions

were introduced and severally referred as follows:
By Mr. ADAIR: A bill (H. R. 10005) granting a pension to John M. Ludwig; to the Committee on Pensions.

By Mr. BURGESS: A bill (H. R. 10006) for the relief of J. O. King; to the Committee on Claims.

Also, a bill (H. R. 10007) for the relief of A. J. Hodges, T. W. Hodges, and C. C. Hodges; to the Committee on Claims.

By Mr. CLINE: A bill (H. R. 10008) granting an increase of pension to Levi D. Bodley; to the Committee on Invalid Pen-

Also, a bill (H. R. 10009) granting an increase of pension to John W. Paulus; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10010) granting an increase of pension to

David Naylor; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10011) granting an increase of pension to John Hanes; to the Committee on Invalid Pensions.

John Hanes; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10012) to correct the military record of James Hennessy; to the Committee on Military Affairs.

Also, a bill (H. R. 10013) to correct the military record of Andrew K. Hite; to the Committee on Military Affairs.

By Mr. DERSHEM: A bill (H. R. 10014) granting a pension to Thompson H. Morrow; to the Committee on Pensions.

Also, a bill (H. R. 10015) granting a pension to Harry T. Hicks; to the Committee on Pensions.

Also, a bill (H. R. 10016) granting a pension to Caroline Condus Criswell: to the Committee on Invalid Pensions.

Candus Criswell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10017) granting a pension to Margaret W.

Strunk; to the Committee on Invalid Pensions.

By Mr. DOREMUS: A bill (H. R. 10018) granting a pension

to Anna McD. Smith; to the Committee on Pensions.
Also, a bill (H. R. 10019) granting an increase of pension to David Kimball; to the Committee on Invalid Pensions.

By Mr. ESTOPINAL: A bill (H. R. 10020) graating a pension to Alexander Smith; to the Committee on Pensions.

By Mr. FERRIS: A bill (H. R. 10021) to correct the military

By Mr. FOSTER: A bill (H. R. 10022) granting a pension to William Mendenhall; to the Committee on Pensions.

Also, a bill (H. R. 10023) granting an increase of pension to C. K. Elliott; to the Committee on Pensions.

Also, a bill (H. R. 10024) granting an increase of pension to

Saphrona J. Spencer; to the Committee on Pensions. By Mr. FRANCIS: A bill (H. R. 10025) for the relief of Wickliff Fry, for horse lost while hired by the United States Geological Survey; to the Committee on Claims.

By Mr. GOEKE: A bill (H. R. 10026) granting a pension to Franklin Lecklider; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10027) granting an increase of pension to George W. McClelland; to the Committee on Invalid Pensions. Also, a bill (H. R. 10028) granting an increase of pension to

Moses K. Hitchcock; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10029) to remove the charge of desertion from the record of George T. Silvers; to the Committee on Military Affairs.

Also, a bill (H. R. 10030) to remove the charge of desertion from the record of William E. Cummings; to the Committee on Military Affairs.

By Mr. GRAHAM of Pennsylvania: A bill (H. R. 10031) to place the name of Jesse B. Kimes on the unlimited retired list

of the Army; to the Committee on Military Affairs, By Mr. KEY of Ohio: A bill (H. R. 10032) granting a pension to Jacob Opp; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10033) granting an increase of pension to George D. Edgeton; to the Committee on Invalid Pensions.

By Mr. KALANIANAOLE: A bill (H. R. 10034) granting an increase of pension to Frank Godfrey; to the Committee on Pen-

By Mr. KIESS of Pennsylvania: A bill (H. R. 10035) granting a pension to Amy A. Dewey; to the Committee on Invalid Pen-

Also, a bill (H. R. 10036) to correct the military record of George O. Pratt; to the Committee on Military Affairs.

By Mr. LEWIS of Pennsylvania: A bill (H. R. 10037) grant-

ing a pension to Llewelyn Brensinger; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10038) to place the name of Joseph Matchette upon the unlimited retired list of the Army; to the Committee on Military Affairs.

By Mr. McDERMOTT: A bill (H. R. 10039) granting a pension to Ernest H. Hausmann; to the Committee on Invalid Pensions.

By Mr. MONDELL; A bill (H. R. 10040) granting an increase of pension to William W. Colby; to the Committee on Invalid Pensions.

By Mr. MOSS of West Virginia: A bill (H. R. 10041) granting an increase of pension to Lyman D. Bogue; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10042) granting an increase of pension to John S. Hall; to the Committee on Invalid Pensions,

By Mr. MORRISON: A bill (H. R. 10043) granting an increase of pension to Lewis Parker; to the Committee on Invalid

By Mr. OGLESBY: A bill (H. R. 10044) granting an increase of pension to John Lacy; to the Committee on Invalid Pensions. By Mr. PADGETT: A bill (H. R. 10045) for the relief of the

estate of John Harris; to the Committee on War Claims. By Mr. PATTON of Pennsylvania: A bill (H. R. 10046) granting a pension to Peter L. Brion; to the Committee on Pensions.

By Mr. RIORDAN: A bill (H. R. 10047) for the relief of Davis & Lawrence Co.; to the Committee on Claims.

By Mr. RUSSELL: A bill (H. R. 10048) granting a pension to John C. Koeppel; to the Committee on Invalid Pensions.

Also, a bill (II. R. 10049) granting an increase of pension to George W. Plank; to the Committee on Invalid Pensions.

By Mr. SCULLY: A bill (H. R. 10050) granting a pension to Mary Jones; to the Committee on Pensions.

Also, a bill (H. R. 10051) granting an increase of pension to Cornelia J. Ames; to the Committee on Pensions.

Also, a bill (H. R. 10052) granting an increase of pension to

George Hartzgrove; to the Committee on Invalid Pensions, Also, a bill (H. R. 10053) granting an increase of pension to

Harriet R. Bray; to the Committee on Invalid Pensions.

By Mr. SELLS: A bill (H. R. 10054) granting a pension to Carriston W. Looper; to the Committee on Pensions.

Also, a bill (H. R. 10055) granting a pension to Alexander Smith; to the Committee on Pensions.

Also, a bill (H. R. 10056) granting a pension to Mollie Mullennix; to the Committee on Pensions.

Also, a bill (H. R. 10057) granting a pension to Daniel Lynch; to the Committee on Invalid Pensions,

By Mr. SLAYDEN: A bill (H. R. 10058) for the relief of Lieut. Col. Harris L. Roberts, United States Army; to the Committee on Claims.

Also, a bill (H. R. 10059) for the relief of R. R. Russell, Irve W. Ellis, J. L. Borroum, N. H. Corder, and Wooten & Vasbinder;

to the Committee on Indian Affairs.

By Mr. SLOAN: A bill (H. R. 10060) granting a pension to Fannie Dunham; to the Committee on Invalid Pensions.

By Mr. SPARKMAN: A bill (H. R. 10061) granting a pension

to William F. Brown; to the Committee on Pensions.

By Mr. TEMPLE: A bill (H. R. 10062) granting a pension to Catherine Mackenzie; to the Committee on Invalid Pensions. By Mr. TRIBBLE: A bill (H. R. 10063) for the relief of the

heirs at law of Rosa M. Wyatt; to the Committee on War Claims.

# PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. DALE: Petition of Kohler & Campbell, of New York, favoring the amending of the seamen's bill (8, 136) to read as follows: "By exempting steamers operating in bays similar to the lower bay in New York Harbor"; to the Committee on the Merchant Marine and Fisheries.

Also, petition of Vito G. Cantasano, of New York, favoring the passage of the Bartlett bill (H. R. 3322); to the Committee on the Post Office and Post Roads.

By Mr. DOOLITTLE: Memorial of business men of Lost Springs, favoring the passage of H. R. 5308, that legislation may be enacted which will compel concerns sellings goods direct to consumers entirely by mail to contribute their portion of funds in the development of the local community, the county, and the State; to the Committee on Ways and Means.

By Mr. GRAHAM of Pennsylvania: Petition of the Oil Trade Association of Philadelphia, favoring the establishment of a regional reserve bank in Philadelphia under the new currency bill; to the Committee on Banking and Currency.

By Mr. HULINGS: Petition of citizens of Emlenton, Pa., favoring the passage of a law extending free postal delivery in towns of 1,000 population; to the Committee on the Post Office and Post Roads.

By Mr. KIESS of Pennsylvania; Evidence in support of bill (H. R. 1201) for the relief of George W. Rogers; to the Committee on Invalid Pensions.

Also, evidence in support of bill (H. R. 9625) for the relief of Jennie Fritz; to the Committee on Invalid Pensions.

Also, evidence in support of bill (H. R. 9348) for the relief

of Mary E. Fuller; to the Committee on Invalid Pensions.

By Mr. LAFFERTY: Additional evidence in support of bill (H. R. 4961) granting an increase of pension to Regina F, Palmer; to the Committee on Invalid Pensions.

By Mr. LEE of Pennsylvania: Memorial of the Philadelphia Produce Exchange, of Philadelphia, Pa., favoring the establishment of a regional reserve bank in Philadelphia; to the Com-

mittee on Banking and Currency.

By Mr. McGILLICUDDY: Petition of the Waterville (Me.)
Chamber of Commerce, favoring the passage of the 1-cent letter postage rate; to the Committee on the Post Office and Post Roads.

By Mr. MONDELL: Petitions of merchants and professional men of Torrington, Guernsey, Casper, Wheatland, Lusk, and Douglas, Wyo., favoring change in the interstate-commerce law relative to mail-order houses; to the Committee on Ways and Means

By Mr. SCULLY: Petitions of sundry citizens of Long Branch and West End, N. J., protesting against the passage of the seamen's bill; to the Committee on Merchant Marine and Fisheries.

By Mr. SELLS: Petition of citizens of first congressional district of the State of Tennessee, favoring the passage of the Lindquist pure fabric and leather bill (H. R. 4991); to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of Idaho: Petition of citizens of Boise, Idaho, favoring the enactment of legislation that will give a pensionable status to the members of the United States Military Telegraph Corps (H. R. 5892); to the Committee on Invalid Pensions.

By Mr. SUTHERLAND: Papers in support of bill (H. R. 9517) granting a pension to William S. Wilson; to the Committee on Pensions.

Also, papers to accompany bill (H. R. 9107) granting a pension to Joseph Tibbetts; to the Committee on Pensions.

By Mr. TEMPLE: Memorial of the board of trade of the city of New Castle, Pa., calling attention to the improved conditions of labor in the New Castle mills of the United States Steel Corporation; to the Committee on Labor.

# SENATE.

# Monday, December 8, 1913.

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. LUKE LEA, a Senator from the State of Tennessee, and Wil-LIAM ALDEN SMITH, a Senator from the State of Michigan, appeared in their seats to-day.

The VICE PRESIDENT. The Secretary will read the Journal of the proceedings of the last legislative day.

Mr. SMOOT. Mr. President, there are very few Senators in the Chamber; this is the beginning of a week, and I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators

answered to their names:

Smith, S. C. Ashurst Bacon Bankhead Cummins Gronna Hollis Hughes O'Gorman Owen Page Perkins Poindexter Smoot Sterling Stone Sutherland Borah Bradley Brady Brandegee James Johnson Jones Swanson Thompson Thornton Townsend Walsh Pomerene Reed Saulsbury Brandegee Bristow Bryan Burleigh Burton Chamberlain Kenyon Kern Lane Shafroth Sheppard Sherman Shields Shively Warren Weeks Lea McCumber Works Martin, Va. Martine, N. J. Nelson Norris Chilton Clapp Clark, Wyo. Clarke, Ark. Simmons Smith, Ga. Smith, Mich.

Mr. SHAFROTH. I wish to announce that my colleague [Mr. Thomas] is necessarily absent upon departmental business. He will return to the Chamber in about two hours.

Mr. SHEPPARD. I wish to announce the necessary absence of my colleague [Mr. Culberson], and to state that he is paired with the Senator from Delaware [Mr. DU PONT]. This an-

The VICE PRESIDENT. Sixty-one Senators have answered to the roll call. There is a quorum present. The Secretary

will read the Journal of the preceding session.

The Journal of Saturday's proceedings was read and approved. TRAVEL OF EMPLOYEES OF WAR DEPARTMENT (S. DOC. NO. 263). \*

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, pursuant to law, a detailed statement of all expenses incurred from June 30 to December 1, 1913, for the attendance of officers and employees at meetings of societies and associations, which, with the accompanying paper, was ordered to lie on the table and to be printed.

#### MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled bill (S. 488) to authorize the sale and issuance of patent of certain land to H. W. O'Melveny, and it was thereupon signed by the Vice President.

# PETITIONS AND MEMORIALS.

Mr. SHIVELY presented a petition of sundry members of the Bible class of the First Methodist Church of Mishawaka, Ind., praying for the passage of the so-called Kenyon red-light injunction bill, which was ordered to lie on the table.

Mr. THOMPSON presented a petition of the Wichita Association of Credit Men, of Wichita, Kans., praying for the immediate enactment of legislation reforming the banking and currency

laws, which was ordered to lie on the table.

He also presented the petition of A. E. Maxwell and sundry other citizens of Pittsburg, Kans., and the petition of Arthur J. Boynton and sundry other citizens of Lawrence, Kans., praying for the immediate passage of the so-called Owen-Glass currency bill, which were ordered to lie on the table.

Mr. WEEKS presented resolutions adopted by the Boston Marine Society, of Massachusetts, favoring an appropriation for the improvement of the Pollock Rip Channel, in that State,

which were referred to the Committee on Commerce.

He also presented a petition of the Ladies' Benevolent Society of the Congregational Church of Mittineague, Mass., praying for the passage of the so-called antipolygamy bill, which was referred to the Committee on the Judiciary.

He also presented resolutions adopted by the board of directors of the Board of Trade of Cape Cod, Mass., favoring an appropriation for the placing of aids to navigation in Buzzards Bay, in that State, which were referred to the Committee on

Mr. TOWNSEND presented the memorial of Edna Loomis Chase and sundry other citizens of Jackson, Mich., remonstrating against the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

Mr. SMITH of Michigan presented a petition of sundry citizens of Detroit, Mich., praying for the enactment of legislation for the relief of members of the United States Military Tele-graph Corps during the Civil War, which was referred to the Committee on Pensions.

He also presented a petition of Menace Club No. 213, of Nashville, Mich., praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on

He also presented a petition of the Board of Trade of Fremont, Mich., praying for the adoption of a 1-cent letter postage, which was referred to the Committee on Post Offices and Post

He also presented petitions of the Chamber of Commerce of Alpena, of the Twentieth Century Club of Detroit, and of the Credit Men's Association of Grand Rapids, all in the State of Michigan, praying for the enactment of legislation to prevent floods along the Ohio and Mississippi Rivers, which were referred to the Committee on Commerce.

He also presented memorials of members of the faculty of the University of Michigan, Ann Arbor; of the Twentieth Century Club, of Detroit; and of sundry citizens of Alpena, all in the State of Michigan, remonstrating for the enactment of legislation granting to the city of San Francisco the right to use the waters of the Hetch Hetchy Valley, which were ordered to lie on the table.

#### BILLS AND JOINT RESOLUTIONS INTRODUCED.

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GRONNA:
A bill (S. 3576) granting a pension to Emil Moellendorf (with accompanying paper); to the Committee on Pensions.

By Mr. SHIVELY:

A bill (S. 3577) granting an increase of pension to Henry C. Smith:

A bill (S. 3578) granting an increase of pension to Austin Groninger:

A bill (S. 3579) granting an increase of pension to Serena J. Washburn;

A bill (S. 3580) granting an increase of pension to David Armstrong; and A bill (S. 3581) granting an increase of pension to Henry

Snyder (with accompanying papers); to the Committee on Pensions.

By Mr. JONES:

A bill (S. 3582) providing for the homestead entry of certain lands in the State of Washington, and for other purposes; to the Committee on Public Lands.

A bill (S. 3583) to authorize the changing of the names of the steamships Buckman and Watson; to the Committee on

A bill (S. 3584) granting a pension to Augustus S. Hall; to the Committee on Pensions.

By Mr. WARREN:

A bill (S. 3585) for a grazing homestead and supplemental grazing entries; to the Committee on Public Lands.

By Mr. TOWNSEND:

A bill (S. 3586) granting an increase of pension to Walter L. Donahue; to the Committee on Pensions.

By Mr. WEEKS:

A bill (S. 3587) granting an increase of pension to Abbie E. Fairbanks (with accompanying papers); to the Committee on

By Mr. POINDEXTER:

A bill (S. 3588) releasing the Dan Creek Gold & Copper Co. of assessment work on certain claims in the Territory of Alaska during the calendar year 1913; to the Committee on Mines and

A bill (S. 3589) for the relief of E. G. Will; to the Committee on Claims.

By Mr. TILLMAN: A bill (S. 3590) to make the appointment of pay clerks in the United States Navy permanent, and to create the grade of chief pay clerk, and for other purposes; to the Committee on Naval Affairs.

By Mr. BURLEIGH: A bill (S. 3591) granting a pension to Sibai S. Andrews; to the Committee on Pensions.

By Mr. SMITH of Michigan:

3 .

A bill (S. 3592) to remove the charge of desertion from the military record of Daniel Carpenter (with accompanying paper)

A bill (S. 3593) for the relief of William H. Southwell;

A bill (S. 3594) to correct the military record of Peter Duchane; and
A bill (S. 3595) to correct the military record of Frederick

Keno; to the Committee on Military Affairs.

A bill (S. 3596) granting an increase of pension to Marion Robinson:

A bill (S. 3597) granting a pension to Theresa H. Smith; and A bill (S. 5598) granting an increase of pension to Lyman M. Peck; to the Committee on Pensions.

Mr. SMITH of South Carolina:

A bill (S. 3599) granting a pension to Katherine Ross Galilard; to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A joint resolution (S. J. Res. 86) authorizing the Secretary of War to detail two Engineer officers to cooperate with engineers of the Interior Department or the States of Oregon and Washington in investigating The Dalles (Oreg.) power project (with accompanying papers); to the Committee on Commerce.

By Mr. OWEN:

A joint resolution (S. J. Res. 87) relating to the transmission through the mails of publicity pamphlets; to the Committee on Post Offices and Post Roads.

#### RAILROADS IN ALASKA.

Mr. POINDEXTER submitted an amendment intended to be proposed to the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, which was ordered to lie on the table and to be printed.

#### IMPORTATION OF MEAT.

Mr. CUMMINS submitted the following resolution (S. Res. 232), which was read, considered by unanimous consent and agreed to:

Resolved, That the Secretary of Agriculture be, and he is hereby, directed to inform the Senate whether the rules and regulations of the Department of Agriculture permit the introduction into our markets of foreign meats without any stamp or sign upon them showing that they have been imported from foreign countries; and in that connection to inform the Senate just what stamps, marks, or signs are placed upon imported meats before they are offered for sale in the markets of the United States.

#### LIEUT, COL. DAVID DU BOSE GAILLARD.

Mr. O'GORMAN. Mr. President, as chairman of the Committee on Interoceanic Canals, which has had Col. Gaillard's work on the canal under constant observation, and is therefore en-tirely familiar with the magnitude of the services he rendered the Nation, I beg to introduce the following resolution,

The PRESIDING OFFICER (Mr. WALSH in the chair). The

resolution will be read.

The Secretary read the resolution (S. Res. 233), as follows:

Resolved, That the Senate of the United States has heard with profound sorrow of the death of Lieut. Col. David du Bose Gaillard, to whom the American people are under lasting obligations for the splendid service he rendered in overcoming some of the most perplexing difficulties in connection with the construction of the Panama Canal.

Resolved, That in further testimonial of our esteem the Secretary of the Senate be authorized to forward a copy of these resolutions to the family of Lieut. Col. Gaillard.

Mr. O'GORMAN. I ask unanimous consent for the immediate consideration of the resolution.

The PRESIDING OFFICER. Unanimous consent for the im-

mediate consideration of the resolution is asked. Is there objection?

There being no objection, the Senate proceeded to consider the resolution.

Mr. SMITH of South Carolina. Mr. President, I should like to state in this connection that Lieut. Col. Gaillard was a native of my county and lived most of his early life in my county I am not going to make any remarks upon his character, for that is well set forth in an article which appeared in one of the newspapers of my State, which I send to the desk and ask unanimous consent to have printed in the RECORD. My colleague [Mr. Tillman] is unavoidably absent on account of sickness for the remainder of the afternoon. He being the senior Senator from South Carolina would naturally have presented these testimonials. If he were present, he would be glad to make some remarks upon the character and work of this splen-

did son of South Carolina.

The PRESIDING OFFICER. Without objection, the matter presented by the Senator from South Carolina will be printed in the RECORD. The Chair hears none.

The matter referred to is as follows:

CONQUERER OF CULEBRA SON OF SOUTH CAROLINA—DEATH OF COL. GAILLARD CAUSES SORROW IN COLUMBIA AND THROUGHOUT STATE, WHERE HIS FREQUENT VISITS HAVE KEPT HIM IN TOUCH WITH HOME FOLK—EARLY PREPARATION FOR HIGH DUTIES.

In South Carolina the death of Col. Gaillard brings first of all sorrow, and in the hearts of many a sense of personal loss which overshadows the feeling of regret at the ending of a career which cast so

bright a reflection on this State, which for the moment blunts the realization of the tragedy and pathos of this quiet exit from the stage of life before the spotlight had been turned full upon his mammoth work or the applause of the Nation had reached his ears. For Col. Gaillard was not only admired, not only honored in his native State, he was widely beloved. Family and friends, of whom he had many, particularly in Clarendon and Sumter Counties, here in the city of Columbia, and in Fairfield, grieve not primarily because the eminent engineer has finished his career, not that the "conquerer of Culebra" has thus sacrificed himself in successfully circumventing nature's treasonable intent against the canal project, but that David Gaillard, the man, is dead. Those who knew him best valued him for the rare charm of his personality, for his refreshing fun and wit, for a sincerity, a simplicity, a modesty of nature which insured him through every success against a change in attitude toward people or an altered estimate of the real values in life.

# IN COLUMBIA LAST JUNE.

On each leave of absence he came to put himself in fresh touch with South Carolina and South Carolinians, and only last June he spent a few days with relatives in Columbia and visited members of his family wherever they were scattered throughout the State. On that occasion, when a meeting with him or the mention of his name brought a realization of his achievement on Panama, he was to his friends unchanged, unaffected, cordial, and entirely lacking in self-consciousness. And as success and fame had seemed unable to work in him their perhaps not unexpected changes, so time, too, appeared to have made unsuccessful onslaughts; his eye was as keen and as kindly as ever, his figure as lithe and erect, his movements as quick and energetic, and his step as short and nervous as he advanced toward the fifty-fourth milestone in his life journey, in appearance a man of certainly a dozen years younger. It was almost immediately upon his return to the Canal Zone after that visit that his fatal breakdown occurred, shocking those who had so recently seen him and whose thoughts have since been very constantly with him in his losing fight for life.

Col. Galliard's career since entering the Army is well known, there having been occasions from time to time to outline his assignments and attainments as one of Uncle Sam's most efficient engineers. Only a few know, however, that not the least of his achievements was made in early youth, when as a boy he surmounted many obstacles and by his innate ability, his pluck and perseverance reached the summit of his youthful ambition—West Point. He stepped from a small town store into the United States Military Academy, and thence out into the world of work and conspicuous accomplishment.

#### EARLY HANDICAPS OVERCOME

world of work and conspicuous accomplishment.

EARLY HANDICAPS OVERCOME.

At the age of 14 it was necessary for him to leave school, the old Mount Zion Academy in Winnsboro, and earn his living, and he became a clerk. His father, Samuel I, Gaillard, was living in the famous old social settlement in Clarendon, having invested the little he had saved from the war in a plantation adjoining that of his wife's father, David St. Pierre du Bose. There were no schools in the neighborhood and so, upon the death of the boy's mother, he was sent to Winnsboro to attend Mount Zion and to live with his grandmother, Mrs. David Gaillard. For her the war and Sherman's raid had wrecked a fortune and destroyed two plantation homes. She, as well as the boy's father, was unable to give him financial assistance, so he reluctantly left the schoolroom and went behind the counter. R. Means Davis, afterwards for many years professor of history at the University of South Carolina, was at that time principal of the old Winnsboro school. With an affectionate liking for young Gaillard, a recognition of his unusual ability and of his misfit—mentally, socially, and personally—with his surroundings. Mr. Davis kept him in mind with a constant desire to assist him. The opportunity came in a vacancy at West Point. Mr. Davis suggested to David Gaillard to stand the competitive examination, and Gaillard, eagerly selzing upon the suggestion, fell upon his long forsworn schoolbooks, Mr. Davis conching him at night. With a few weeks' study West Point was won. It was this friend's and benefactor's sister, Miss Katherine Ross Davis, of State-wide popularity, whom young Lieut. Gaillard married not long after receiving his commission in the Army.

Born at Spring Grove, the old home of his maternal grandfather in Sumter County, September 4, 1859, David du Bose Gaillard was the only son of Samuel I. Gaillard, of Winnsboro, and of his wife. Susan Richardson du Bose. He spent his boyhood in Sumter, Clarendon, and Winnsboro, and it was in 1884, he had an excee

During the War with Spain, Col. Gaillard recruited and organized the Third United States Volunteer Engineers and became brevet colonel of that regiment, remaining so until the regiment was mustered out in 1899. His regiment was sent to Cuba at the close of the war and he was placed in charge of the Department of Santa Clara, Cuba. He directed the sanitary work in Cienfuegos, Matanzas, and other cities of Cuba, effecting the same complete "clean up" in these cities as did Gen. Leonard Wood in Habana, though little was heard of the South Carolinian's achievement in this direction,

After his volunteer regiment was mustered out, Col. Gaillard was again assigned to the Washington Aqueduct, but was soon appointed assistant engineer commissioner of the District of Columbia. He was placed in entire charge of the water, sewer, and building departments. In 1901 he was ordered to Duluth and placed in charge of all river and harbor improvements on Lake Superior. Here, it is worthy of mention, he completed the largest dredging contract ever let by the United States Government up to that time, taking out over 21,000,000 cubic yards.

States Government up to that time, taking out over 21,00,000 yards.

When the General Staff of the Army was established by law, there was a study of records to determine the fitness of men for first service in its membership. Col. Gaillard was one of the engineer officers chosen, and he served almost uninterruptedly as a member of the Staff Corps until he was ordered to Panama.

Col. Gaillard was one of the closest students in the Army and one of the most scholarly. For years he devoted his attention to the study of wave action, and the results of his studies were published by the Government as one of the "professional papers of the Corps of Engineers" under the title "Wave action." This work attracted wide attention, and engineers throughout many countries of the world wrote letters to him about it. He also prepared a number of papers for various engineering societies, and even before he solved the problem of the great Culebra slides he was considered one of the foremost of authorities on certain phases of engineering.

the great Culebra slides he was considered one of the foremost of authorities on certain phases of engineering.

CULEBRA CUT.

In a book called "The Makers of the Panama Canal" it is said in regard to Col. Gaillard's work on the central division, known as the Culebra cut, which he undertook April 12, 1907: "It has been a project which the world will always regard as stupendous. He has unemotionally shoveled the clay out of the way much as the householder shovels the snow from his sidewalk, and gone about his business of cutting the backbone of Culebra." The apr expression "cutting the backbone of the Isthmus of Panama and to clear away the vertebra." This work, it is said, is the hardest digging work ever undertaken by an engineer, and while figures showing the cubic yards of all kinds of stuff which have been taken from the Culebra cut convey little to the mind, still some realization of the South Carolinian's task will be gained from the statement that up to the 1st of last January, six months before he was forced to give up his work, the amount of material excavated under his direct supervision aggregated 104, 800,873 cubic yards, or just about half the total amount of excavation (212,504,138) estimated as necessary to complete the entire canal. On this work had been expended \$64,530,184 at that date. Although the unprecedented slides did much to complicate and increase the difficulties of the work, they meant no cost to Uncle Sam above the estimated "division cost" for the completion of the canal, Col. Gaillard having succeeded in so cutting down the average cost per cubic yard as to cover the cost of all slides and still leave a considerable surplus. The average cost of excavation for the 12 months preceding Col. Gaillard's regime was \$1.50 per cubic yard. A rapid reduction in the cost ensued under his management until by the fiscal year ending June 30, 1912, the unit cost averaged but 47 cents. Col. Gaillard, like his engineer comrades of the Army, labored at Panama, moved by the spirit of obedience to or

The VICE PRESIDENT. The question is on agreeing to the resolution.

The resolution was unanimously agreed to.

LEGISLATIVE REFERENCE BUREAU (S. DOC. NO. 262).

Mr. LA FOLLETTE. Mr. President, there has been reported from the Committee on the Library and there is now on the calendar a bill, Senate bill 1240, to establish a bill-drafting bureau and a legislative reference division in the Congressional Library. The bill has been reported with an amendment. About a year ago the American Bar Association at its regular meeting appointed a committee to investigate the subject of legislative bill drafting. That committee made its report at the meeting of the American Bar Association held at Montreal, Canada, September of this year. I have the report here, and, as there seems to be some misapprehension as to the purpose and scope of the proposed legislation, and as to its importance as well, I ask unanimous consent that the report and the appendix accompanying it may be printed as a Senate document.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and the order will be entered.

#### MESSAGE FROM THE HOUSE,

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the Speaker of the House had signed the enrolled bill (H. R. 7207) granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes, and it was thereupon signed by the Vice President.

# RAILROADS IN ALASKA.

The VICE PRESIDENT. The morning business is closed, and the Chair lays before the Senate the following bill.

The Secretary. A bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Mr. CHAMBERLAIN. Mr. President, some time ago that

bill was made the order of business for to-day and for this

hour. I have talked with quite a number of my colleagues who feel that because of the pressure that is being urged in every part of the country in reference to the currency measure it might be well to have that bill proceeded with and to displace the regular order, temporarily at least. After such discussion I feel that probably it might be better to pursue that course.

I would ask unanimous consent that this regular order be postponed until the disposition of the currency measure. I did not want it to lose its place on the calendar, but I was perfectly willing to have this done in order to gratify what seemed to be the desire of most of the Senators with whom I have discussed the question.

Mr. SMOOT. Mr. President, I wish to say to the Senator that under the unanimous-consent agreement, there being also unfinished business, the only way for the bill to hold its place would be to take it up at 12 o'clock. I do not believe that there is any necessity for asking unanimous consent at this time to take this bill up at the conclusion of the consideration of the currency bill. That can be done after that bill is voted upon, whether it be by unanimous consent or by a vote of the Senate. I do not think at this time there should be a unanimous-consent agreement on this particular bill.

Mr. CHAMBERIAIN. I understood, Mr. President, when the currency bill was made the special order that there was an understanding expressed quite generally by Members of the Senate that it would not displace other matters which were set for a hearing. One of those matters was the Alaska railroad bill, and I assume that that understanding will be carried out

Mr. SMOOT. Mr. President, I do not see how it could be carried out with the currency bill made the unfinished business. If the Senator will notice the calendar, he will see that House bill 7837 is already the unfinished business. If the Alaskan bill be laid aside, then, of course, if the Senate wants to do so, it can take up the currency bill; but the proper course of procedure would be to proceed with this bill until that time, or else have it laid aside and have the currency bill now considered.

Mr. CHAMBERLAIN. I will say frankly to the Senator that only wanted to have the bill temporarily laid aside. I did

not want it to lose its place on the calendar.

Mr. SMOOT. If that is done, of course the unanimous-consent agreement is void, because the unanimous consent states positively:

It is agreed by unanimous consent that on Monday, December 8, 1913, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in Alaska, etc.

Mr. CHAMBERLAIN. I will say to the Senator that, so far as I am concerned, I am prepared to go ahead with the bill now. I simply wanted to comply with what seemed to be the wishes of nearly all Senators who have spoken to me on the subject; but if that can not be done, let us proceed with the bill.

Mr. SMOOT. I do not think the Senator from Oregon will have any trouble whatever in bringing up the bill by a vote of the Senate after the currency bill shall have been disposed of.

Mr. SHIVELY. Mr. President, the Chair has laid the bill before the Senate, and it is now before the Senate. It seems to me, if the Senator from Oregon asks unanimous consent that the bill be temporarily laid aside, that that in no sense displaces it or causes it to lose its place in the order of procedure.

Mr. BRANDEGEE. Well, Mr. President, I do not think that

the motion to temporarily lay aside the matter which is before the Senate by unanimous consent gives it any standing whatever. The Senator can ask unanimous consent to temporarily lay aside the unfinished business; that is one thing-

The VICE PRESIDENT. Would the Senator from Connecticut pardon the Chair for just one moment?

Mr. BRANDEGEE. I yield to the Chair,
The VICE PRESIDENT. The Chair is in doubt. Upon the calendar under the date of September 15, 1913, appears this entry:

It's agreed by unanimous consent that on Monday, December 8, 1913, immediately upon the conclusion of the routine morning business, the Senate will proceed to the consideration of the bill (S. 48) to authorize the Fresident of the United States to locate, construct, and operate railroads in Alaska, etc.

On looking over the CONGRESSIONAL RECORD the Chair finds this to be the record:

RAILROADS IN ALASKA.

Mr. CHAMBERLAIN. Mr. President, I ask unanimous consent that the bill (S. 48) to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes, be made the unfinished business for Monday, December 8, 1913, at 2 o'clock p. m.

The Presiding Officer. Is there objection?

Mr. Burton. Mr. President, is that the Alaska railroad bill?

Mr. CHAMBERLAIN. It is.

Mr. Burton. What is the request of the Senator from Oregon?

Mr. CHAMBERLAIN. Simply that the bill be set for a day during the next regular session.

Mr. Bueton. What day?

Mr. CHAMBERLAIN. On Monday, December 8, at 2 o'clock p. m.

Mr. Bueton. And that it be then taken up for consideration?

Mr. CHAMBERLAIN. That it be taken up for consideration. I have taked with a number of Senators about it—

Mr. Bueton. And that it be made the unfinished business for that

BURTON. And that it be made the unfinished business for that

Mr. Burton, and that it be made the unnmished business for that time?

Mr. Chamberlain. Yes.
Mr. Burton, I thought the request was for this session.

Mr. Chamberlain. No; for the next session.

The Presiding Officer. Is there objection to the request of the Senator from Oregon? The Chair hears none, and the order is made.

The Chair does not know how the unanimous-consent agreement ever got on the calendar of the Senate, but it is quite manifest that there is no unanimous-consent agreement, unless the Senator from Oregon can point out some other place in the RECORD where such unanimous-consent agreement was made.

Mr. JONES. Was it not in the unanimous-consent agreement that the bill should be made the unfinished business at 2 o'clock? Mr. BRANDEGEE. I have the floor, I believe, Mr. President.

yielded to the Chair.

The VICE PRESIDENT. Yes; the Senator from Connecticut

has the floor.

Mr. BRANDEGEE. I am perfectly willing to yield to any Senator who will address the Chair, if the Chair will ask me whether or not I yield.

Mr. JONES. Mr. President—
The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Washington?

Mr. BRANDEGEE. With pleasure.

Mr. JONES. I simply desire to suggest that the Record shows what my understanding has been all the time, that the agreement was that it should be made the unfinished business at 2 o'clock on this day. That is the unanimous-consent agree-

Mr. BRANDEGEE. I have no dispute whatever with the Senator's understanding. From what the Chair has said it is apparent that the request for unanimous consent, whatever it was and whatever the Senator from Oregon had in mind when he made it, is not the one which is stated on the calendar.

Mr. CHAMBERLAIN. May I interrupt the Senator just a

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Oregon?

Mr. BRANDEGEE. Certainly.

Mr. CHAMBERLAIN. I may say that at the time the unanimous-consent agreement was asked the matter was in a written statement, and I am not sure but that the Secretary may have it in his possession now. It was, however, in writing, and whatever may have gotten into the permanent Record of the Senate which shows a different condition of affairs, I am not responsible for. I do know that not only I but other Members of the Senate have acted on the assumption all the time that it was the unanimous-consent agreement that the bill should be taken

Mr. BRANDEGEE. Of course, Mr. President, I think it is exceedingly wise that every unanimous consent, or proposed unanimous-consent agreement, should be reduced to and reported to the Senate by the Secretary, because there are frequently misunderstandings about them. Without having had any previous knowledge that the Senator from Oregon had presented his request originally in writing, from what the Chair has read from the RECORD-which is authoritative evidence of what happened on the floor-it appears that the Senator from Oregon asked unanimous consent that this bill be made the unfinished business, which is not a parliamentary motion known in this body at all. If a motion is carried to proceed to the consideration of a bill after the expiration of two hours from the time the Senate convenes, that, ipso facto, if it prevails, makes the matter the unfinished business; but there is no such motion, as I understand it, as that to make a measure the unfinished business. The unfinished business is a parliamentary situation which results from some other motion having been made and carried.

Another feature of the transaction that is suggested by the Senator from Oregon is that in a colloquy between him and the Senator from Ohio it appears, according to the claim of the Senator from Oregon, that what he meant was to make the Alaska railroad bill a special order for 2 o'clock on this day, which is entirely inconsistent with what appears on the calendar—that the consideration of it should be proceeded with immediately upon the conclusion of the routine morning business, which has already been concluded. Those two statements conflict with each other in point of time as between half past 10, which the clock now indicates as the hour, and the hour of 2 o'clock. So that, to my mind, whatever ultimately

may be unraveled in the mind of the Chair or of the Senate as to what this unanimous consent is for-in fact there was no unanimous consent to do any particular thing—it is a jumble; and now, on the 8th day of December, in another and a regular session of Congress, it is attempted to interpret unanimously what was the unanimous understanding in the minds of the Senators present on the 15th day of September last, in the special "extra-dry" session, which we were then attempting to bring to its interminable conclusion.

Mr. CHAMBERLAIN. Mr. President-

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Oregon?

Mr. BRANDEGEE. Yes. Mr. CHAMBERLAIN. I want to say to the Senator that he has not assisted very much in clarifying what he calls a "muddled situation."

Mr. BRANDEGEE. I did not say that that was my purpose. Mr. CHAMBERLAIN. It is evident that that is not the purpose of the Senator. It seems to me, Mr. President, that the Senate has power to arrange for the discussion and the determination of this bill, if it has the disposition to do so; and if the Senate now feels that it is a matter that is pending before the Senate and it desires to go ahead with it, so far as I am concerned, I am ready to go ahead with it now; but I am simply undertaking to accommodate myself and my own views and my own constituents, if you please, to what seem to be the wishes of a great many Senators who have come to me and talked to me about the subject. As I have said, so far as I am concerned, I am perfectly willing to go ahead now.

Mr. BRANDEGEE. I am ready to go ahead with it now,

if that is what the Senate has determined; but the question is, What has been ordered by the Senate?

Mr. WARREN. Mr. President— Mr. BRANDEGEE. I yield to the Senator from Wyoming.

Mr. WARREN. I may not have heard some of the remarks that have been made, but I notice that the calendar makes the bill to establish Federal reserve banks, and so forth, the unfinished business. I assume that it is not the intention to have two measures pending as the unfinished business at the same time, and I ask how that situation is to be unraveled, as well as the matter of unanimous consent?

Mr. BRANDEGEE. Of course, if what the Chair has read from the RECORD was the action of the Senate, to wit, that the Alaska bill was at the last session made the unfinished business for to-day at 2 o'clock, that in itself would be an inconsistent situation, because at that time the Senate was meeting at 12 o'clock, and if a matter were made the unfinished business it would come up at 2 o'clock. Now the Senate is meeting at 10 o'clock, and if a matter were the unfinished business it would come up at 12 o'clock. But, however that may be, and without knowing whether the Chair will rule that what is on the calendar is the unanimous-consent agreement, or what is

agreement-The VICE PRESIDENT. The Chair will state to the Senator from Connecticut that the Chair must be governed by the

in the RECORD is to be understood as the unanimous-consent

Mr. BRANDEGEE. Very well. If that shall stand as the judgment of the Senate, then the unanimous-consent agreement, as stated on the calendar, is not what is before the Senate.

Mr. SUTHERLAND. Mr. President

The VICE PRESIDENT. Does the Senator from Connecticut yield to the Senator from Utah?

Mr. BRANDEGEE. I do. Mr. SUTHERLAND. Does not the Senator from Connecticut think that we can complete the consideration of the currency bill in ample time to take up the special order at 2 o'clock

Mr. BRANDEGEE. I observe that on the calendar there is a notice that the junior Senator from Virginia [Mr. Swanson] will this morning commence a speech on that subject. or not it can be concluded in time to vote on the bill this morning I do not know; but if the unanimous consent, as stated on the calendar, is what the Senate agreed to, it is perfectly nugatory and idle, because all it purports to have agreed to is that we would, after the routine morning business, proceed to the consideration of the Alaska bill. That has been done. The Chair has laid it before the Senate, where it now reposes, and we are considering it. Any Senator can now move to proceed to the consideration of the currency bill, and, if that motion is carried, it immediately displaces the Alaska bill and fulfills the unanimous-consent agreement, which does not provide that we shall continue the consideration of it until final disposition.

Mr. OWEN. Mr. President, when the Senator from Oregon, on the 15th of September, asked for unanimous consent that

Senate bill 48 be made the unfinished business for Monday, December 8, at 2 o'clock p. m., it is perfectly obvious that his request for unanimous consent meant to make it a special order to be taken up at that time for consideration and proceeded with. There must be some allowance made for the frailty of human language; but obviously that was the meaning; obviously that was what the Senate understood; and that unanimous-consent agreement can not be set aside by quibbling over the term "unfinished business." That was the agreement of the Senate.

Mr. CLAPP. Mr. President, will the Senator pardon me?

Mr. OWEN. I yield to the Senator from Minnesota. Mr. CLAPP. In support of the Senator's contention, I wish to suggest that after that, when it was proposed to place business upon the December calendar, it was stated time and again that it would not do, because we already had two matters which were in a position to interfere with the passage of the currency

Mr. OWEN. The RECORD shows from time to time that that was recognized as a unanimous-consent agreement of the Senate, and it should not be set aside by any mere quibbling over the meaning of words. Mr. President, I ask unanimous consent that the Alaska bill be made the order of business immediately after the currency bill is disposed of.

The VICE PRESIDENT. Is there objection to the request

of the Senator from Oklahoma?

Mr. POINDEXTER. Mr. President, I object to that. no desire to interfere with or to obstruct in any way the consideration of the currency bill, but I object to the Alaska rail-road bill losing the place it has upon the calendar of the Senate under the unanimous-consent agreement. I think it can retain that place; and if it should be the sense of the Senate that it should be temporarily laid aside for the consideration of the

currency bill, that can be done.

Mr. OWEN. I will, then, modify the request and ask that the Alaska bill be temporarily laid aside without losing its place

under the agreement.

Mr. BRISTOW. Mr. President, I am in accord with the Senator from Washington [Mr. POINDEXTER] in regard to the desire to have the Alaska railroad bill maintain its place as the unfinished business, and I should like to have the Chair indicate whether he considers, under the unanimous-consent agreement, as indicated in the RECORD, that the Alaska railroad bill will become the unfinished business at 2 o'clock?

The VICE PRESIDENT. The Chair does not believe that it

is possible to make anything unfinished business by consent. The Chair does believe that under a fair and reasonable interpretation of what took place on the 15th of September and the colloquy which occurred at that time, the request of the Senator might fairly be construed into an agreement upon the part of the Senate to make the Alaska bill the special order for 2 o'clock to-day.

Mr. POINDEXTER. Mr. President, a parliamentary inquiry. The VICE PRESIDENT. The Chair, however, is not deciding that question, but proposes to leave that to the Senate.

Mr. CHAMBERLAIN. Mr. President, may I ask whether the Chair feels disposed to rule now that at 2 o'clock the Alaska railroad bill will come up automatically as the business to be disposed of?

The VICE PRESIDENT. In view of the discrepancy between the calendar and the RECORD, and in view of the former rulings of the Chair that all unanimous-consent agreements must be construed by the Senate, the Chair feels that it is for the Senate to decide what the RECORD really does mean. In expressing

an opinion the Chair was not ruling.

Mr. POINDEXTER. Mr. President, a parliamentary inquiry. Is it not within the power of the Senate, by unanimous consent, to give a bill such a status in the proceedings of the Senate as it would have if it were the unfinished business? My recollection is that we have often done that; that it has been more or less frequent practice to agree that certain measures should be the unfinished business of the Senate.

Undoubtedly, as the Senator from Oklahoma has said, the intention of the Senate in making this unanimous-consent agreement was that the bill should be taken up and its consideration should be proceeded with. It seems to me that necessarily would give it, when its consideration was dispensed with, the

position of the unfinished business of the Senate.

I hardly see how the Senate could take up a bill for consideration at a certain date, and by a unanimous-consent agreement, at the conclusion of the routine morning business or at a certain hour, and then, if it should conclude to lay it aside, that the bill should not have the place of the unfinished business of the Senate.

The VICE PRESIDENT. The Chair will read what the rules say. The Chair assumes that unanimous consent is just as good as a two-thirds vote.

Any subject may, by a vote of two-thirds of the Senators present, be made a special order; and when the time so fixed for its consideration arrives the Presiding Officer shall lay it before the Senate, unless there be unfinished business of the preceding day, and if it is not finally disposed of on that day it shall take its place on the Calendar of Special Orders in the order of time at which it was made special, unless it shall become by adjournment the unfinished business.

When two or more special orders have been made for the same time, they shall have precedence according to the order in which they were severally assigned, and that order shall only be changed by direction of the Senate.

Mr. WARREN. Mr. President, will the Senator from Wash-

ington yield to me?

Mr. POINDEXTER. I yield to the Senator from Wyoming. Mr. WARREN. I think the rule is perfectly plain. I think the Alaskan matter is the special order for 2 o'clock, and will be so considered unless it is already under discussion at that time. Even then it will have to come up.

Mr. POINDEXTER. I agree with the Senator from Wyoming

that according to the Record, which seems to be in conflict with the notice on the calendar, this matter does not come up until I suppose the proper time to decide its status would be at that hour. I do not know what effect notices and unanimous-consent agreements printed upon the calendar of the Senate, and standing there day after day, have in the practice of the Senate.

Mr. WARREN. There are occasional errors in the calendar. and I do not consider the calendar as strong as the RECORD. So far as my remembrance goes, however, a special order has al-

ways been respected over all other business.

Mr. BRISTOW. Mr. President, knowing that the Senator from Oregon is very much interested in this bill, as a number of us are, I desire to call his attention to the fact that if this is interpreted to mean a special order for 2 o'clock it will be taken up at that time and considered and then set aside, and it will be gone. It will have lost all relation. It will not have any standing whatever, any more than any other business on the

For one, I am not content to have that kind of a disposition made of this bill. I am more interested in it than I am in currency legislation. I believe it is a more important measure. rency legislation.

The currency bill has been given importance for political pur-Very simple amendments to the present currency law would have corrected all of the existing abuses. This bill, however, is one that is constructive in its character. It is a very important bill, and will be an important one in the economic history of the United States.

Mr. CHAMBERLAIN. If I may interrupt the Senator, I think the Senator's association with me in the preparation of this bill makes him realize full well that I do not want to have any such thing happen to the bill.

Mr. BRISTOW. I know the Senator does not. That was the reason I called his attention to it.

Mr. CHAMBERLAIN. As I have stated before and as I state again, I simply wanted to accommodate what seemed to be a majority feeling of the Senate. I am unwilling to have this bill lose the place it has; but it seems to me that if we could get rid of some of our great parliamentary lawyers here and get down to a prompt disposition of business, there would not be any trouble about arranging for this and other measures which we are continually wrangling over here in the Senate, occupying the time which really belongs to the people of the

country.

Mr. POINDEXTER. Will the Senator yield to me for a moment?

Mr. BRISTOW. If the Senator will pardon me just a minute, I desire to concur fully in what the Senator from Oregon has said. I do not want the railroad bill to interfere with currency legislation, because, while I do not think the currency bill is of such very great importance, I know a majority of the Senate does. I want to have the currency bill go ahead and be enacted; but I do not want it to displace this railroad bill, so that it will lose any relation whatever, and can not be considered unless it shall hold its position upon the calendar.

Mr. SWANSON. Mr. President, I understand this matter goes over until 2 o'clock, even under the contention of those favorable to the bill. Consequently, it seems to me this discussion would be better in order at that time. I had given notice that I should address the Senate on the currency bill immediately following the routine morning business, and I suppose this discussion will come up again at 2 o'clock. It seems to me, therefore, to be a waste of time to continue it now. If it is in order for me to do so, I should like to proceed with my speech on the currency question.

Mr. SMOOT. Mr. President-

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Utah?

Mr. SWANSON. I do.

Mr. SMOOT. I simply want to call the attention of the Chair, and also of the Senator from Oregon, to the fact that if they will notice the calendar, on page 5, under "General orders," they will find the following:

S. 48. A bill to authorize the President of the United States to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes.

Then this note is made on the calendar:

September 15, 1913. Made the unfinished business for December 8, 13, at 2 p. m., by unanimous consent.

Mr. BRANDEGEE. Mr. President, may I be allowed to say a

Mr. SWANSON. I prefer that this discussion shall be resumed at 2 o'clock. I am satisfied that if it is indulged in now it will simply be gone over again at that time.

Mr. BRANDEGEE. What does the Senator propose to discuss?

Mr. SWANSON. I propose to discuss the currency bill, which understand is the unfinished business until 2 o'clock

Mr. BRANDEGEE. I disagree with the Senator about that. Mr. BACON. Mr. President, the Senator will recognize the fact that, whether it is the unfinished business or not, when a Senator has given notice that he would address the Senate on a certain bill at a certain time during the morning hour it has been the unanimous practice of the Senate to concede to him the right to do so. The Senator from Virginia gave that notice last week, and he is proceeding now upon that notice.

Mr. BRANDEGEE. Yes; but we were discussing another matter. All I wanted to say to the Senator from Utah was that the mere annotation of the clerk on the calendar as to what is unfinished business or what is not does not bind the Senate.

Mr. POINDEXTER. Mr. President——

Mr. SMOOT. I fully—
Mr. BACON. I hope Senators will recognize the propriety of allowing the Senator from Virginia to proceed.

The VICE PRESIDENT. There is no way for the Chair to

enforce that request.

Mr. POINDEXTER. Mr. President, I should like to ask that the Alaska railroad bill go over until 2 o'clock, and that it then be taken up and disposed of under whatever status it may be entitled to on the records of the Senate.

The VICE PRESIDENT. The Chair has already ruled that 2 o'clock is the time for it to come up. It will then be time for the Senate to say what the record really means.

# BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means for rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. SWANSON. Mr. President, there is no question confronting us to-day of more importance, of more vital concern to the vast and varied interests of our country, than the one relating to our currency and banking system. Our action upon this matter concerns in a marked degree our farming, manufacturing, commercial, and banking interests. There is not an facturing, commercial, and banking interests. industry in this Republic, not a citizen, from the highest to the lowest, from the richest to the poorest, who will not in some way be affected by the legislation we are considering. Wise legislation upon this question means to this Nation an era of increased prosperity, of larger and better opportunities for all classes of our citizens. Foolish and ill-advised legislation means distress, depression, and disaster. Thus a matter fraught with such great possibilities for good or evil should in its solution be approached with the utmost care, prudence, foresight, and investigation. For the last decade this has been one of the most prominent questions of discussion in America and has enlisted the thought and investigation of our wisest and ablest men, and has been viewed from every possible standpoint. The time has arrived when we can safely and prudently act upon this matter. Further delay is unnecessary and will but add to the difficulties of a wise solution and will but intensify and increase the evils of our present system and put greater barriers in the way of currency and banking reform. The Democratic Party, which is now in control of all the branches of our Government, has determined faithfully to fulfill all the pledges and promises made in order to obtain power. Congress, convened in extraordinary session by the President, but recently enacted a tariff bill which completely fulfilled the pfedge made to relieve the people from the burdens of excessive tariff exactions. Having faithfully

discharged this duty, the Democrats are now undertaking to fully perform their promises to give the country currency and banking reform. The present Democratic administration and a vast majority of the Democrats of the House and Senate, after thoroughly and conscientiously considering the matter, and as far as possible reconciling minor differences of opinion, have practically agreed upon a plan of currency and banking reform which they believe will preserve what is good and desirable in our present system, eliminate the evils which are conceded, and fornish additional legislation which will be productive of great prosperity and development. This is not presented as a partisan measure. We realize fully that no party advantage can accrue from the enactment of any legislation on this subject. except so far as it may be promotive of the best interests of all our fellow citizens. We feel that the measure supported by us should be in accordance with Democratic principles and platforms. Being given power of legislation by the people, we feel that the responsibility is with us as a party to enact legis-lation just and beneficial to all the industries and interests of this Nation. If benefits accrue from this legislation, all those who aid in its passage, to whatever party they belong, are deserving of credit and commendation.

Mr. President, the plan proposed follows the course of wise, prudent, and constructive legislation. It does not recklessly destroy our existing system. It does not foolishly jeopardize the business and fortunes of this Nation to the hazard of untried experiments and speculative theories, however plausible. We feel that it would be a folly almost criminal to put rude and destroying hands upon our entire present system, which has become so interwoven with the habits and business of our people, and which in many respects is exactly what we need, and has been most instrumental in our growth and development. Where evils have existed which are injurious to the legitimate commercial, manufacturing, agricultural, and banking interests of this country we have boldly applied the surgeon's knife and eradicated the cancerous growth. We have not sought to satisfy the extreme radical, who would destroy everything, whether good or evil, nor the predatory reactionary, who would preserve everything that benefits him, whether it is destructive to the best interests of the country or not. We have prepared what we conceive to be a just, fair, equitable, progressive measure. We have retained in our present currency and banking system what experience has taught us to be just and beneficial. Despite the suggestions of the academic theorist or the clamor of the selfish capitalist, who desires to lessen the supply of money, and hence increase its purchasing power and his own riches, we have refused to retire the \$350,000,000 of Treasury notes, but we retain them and permit them to still circulate, to invigorate business and commerce. Against the earnest opposition of these same classes we have refused to retire \$684,000,000 of silver coin and silver certificates, but we retain these, realizing fully the beneficial results which have accrued from their circulation. We have alike turned a deaf ear to those who would retire \$743,000,000 of national-bank notes, and thus produce financial stringency, with business depression and beneficial only to a few. Our gold and gold certificates, aggregating \$1,700,000,000, are preserved. Thus, under the proposed plan there can be no reduction in our money or circulating medium, This is preserved in its present quantity and quality. present circulating medium, amounting to about \$3,600,000,000, is left undisturbed.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from Kansas?

Mr. SWANSON. I would prefer not to yield now. When I get through, I will be glad to yield for any question.

Mr. BRISTOW. I merely wanted to inquire whether the Senator wishes to proceed without interruption now.

Mr. SWANSON. I prefer to proceed without interruption. Thus the claim made by some that this bill can produce a contraction is unreasonable and unfounded. The provisions of this plan are so drawn that all changes affecting currency must result in increases, not in decreases, that are made, as I shall subsequently explain, are such as are absolutely safe and occur only in response to the legitiare absolutely safe and occur only mate demands of business and commerce. The plan wisely mate demands of business and commerce. When this plan is in operation each of the 25,000 banks in this country will continue to exist and be permitted to continue safe and legitimate We have refused to create a great central banking business. bank with branches extending to all sections of the country, ultimately resulting in a monopoly of money and bank credits. We realize that such a bank, if created, would destroy all banks who dared to compete with it or would not submit to its dictation. If such a bank was created, the only banks that would be preserved would be those that would be subservient to the suggestions or submissive to the purposes of this great central institution. I believe that nothing has contributed more to the rapid development and the great prosperity and wealth of this Nation than our system of independent banks. The 25,000 banks scattered in every section of our country, from the small towns to the large cities, each containing the resources of that community and furnishing credit to its citizens, have been one of the greatest factors in our material development. It has enabled this Nation to do more than 95 per cent of its business with checks drawn upon banks, thus economizing in a most remarkable degree the use of money. In this respect we surpass every nation except Great Britain. This system is far preferable to the system existing in other countries, with a few large banks with branches extended in all sections. It gives more competition in the banking business and produces less monopoly in money and bank credits. The Bank of England, with its 11 branches, and 9 or 10 other large banks in England, with their numerous branches, practically control and dominate the banking business of England. The Bank of France, with its 188 branches, and 6 or 7 other large banks, with their numerous branches, control the banking business of that nation. Reichsbank of Germany, with its 93 head branches and 400 sub-branches, with 8 or 10 other large banks with many branches, in a less degree, but substantially, control money and bank credits in that nation. In Germany there are only 14 clearing houses, with only 160 members. The banking business of Canada is controlled by 29 banks, with their more than 2,000 branches. In Canada no bank can start with less capital than \$500,000. In Scotland we have 8 large banks with 1,200 branches. The eight banks of Scotland act in complete harmony, and there is a money trust or monopoly there. In each of these nations the number of banks each year decreases,

The branch banks are controlled entirely by the central bank. The branch banks have no directors, but only agents and officers appointed by the authorities of the central banks. How vastly different is this from our system of independent banks. All of our 25,000 banks have their directors and stockholders, who are usually men of business and enterprise in the communities in which the banks are located. These men own the stock of the bank and are particularly interested in the development and prosperity of their communities. Hence, in addition to making money for their bank, they are desirous of using the resources of the bank for the enrichment and betterment of the adjoining section. These independent banks and the communities where they are located have a mutual interest, the prosperity and success of one being measured by the success and prosperity of the other. This is vastly different in a branch bank. The main purpose of a branch bank is to make money for the central bank. It is created to obtain local deposits to be under the control of and to be used for the general purposes of the central bank. Our local country banks are created as much to help the community as to make money for the stockholders. I think it would be disastrous to us if we should destroy our system of independent banks and substitute for it the foreign system of a few large banks with numerous branches. This would but increase in a greater degree a monopoly of money and bank credits which in recent years has crept into our system and been growing and which this bill proposes, as far as possible, to eliminate. Hence I heartily approve of the plan of the bill in not interfering in the slightest degree with our system of independent banks. It leaves undisturbed to continue profitable business the 25,000 banks in this country. This bill, by its splendid provisions extending legitimate aid and accommodations to all the banks of the country who will accept it, strengthens our system of independent banks and will increase the facility of these to accommodate their customers. It has been sought to produce the impression that the Federal reserve banks created by this bill will monopolize the banking business of this country, and thus have control of money and bank credits. This is a gross and unfounded misrepresentation. Under the provisions of this bill, the capital of all the Federal reserve banks when fully paid will amount to only \$105,000,000. From the last report of the Comptroller of the Currency the aggregate capital, surplus, and undivided profits of all banks-National, State, and private-and trust companies reporting were about \$4,160,000,000. Thus the capital provided for this system will be about one-fortieth of the banking capital of this Nation. It is estimated that the resources of all the banks provided in this bill will amount to about \$636,000,000. The resources of all the banks in the United States-National, State, and privateand trust companies were \$24,986,000,000. Thus the resources of these banks created by this bill will be about one-fortieth of the banking resources of the Nation. Thus we can readily see that there can be no monopoly of money bank credits, or the beginning of monopoly, and their dissemination will mark

banking business and accommodation under the operations of this bill.

The capital and resources of the banks which will be left absolutely free and unaffected by any provisions of this bill will be forty times more than all that are brought under its provisions. Completely answered in their contention that these banks would create a monopoly and a dominating influence, the opponents of the plan then insist, with glaring inconsistency, that the capital and resources are entirely too small to accomplish the purposes sought to be achieved. But we can make complete answer to this objection and show that the capital and resources are amply sufficient. The capital and surplus of the Bank of England, as of August 12, 1908, which is recognized as a model of sta-bility and strength, is only \$87,690,685, being \$17,000,000 less than the capital stock of the banks proposed under this bill.

The resources of the Bank of England are about \$335,000,000. a little more than one-half of the resources of the proposed banks under this bill. The capital of the Bank of France, as of December 24, 1907, is \$35,222,500, about one-third of the proposed capital of the banks under this bill. The resources of the Bank of France are \$201,711,335, about one-third of the resources of the proposed banks. The capital and surplus of the Reichsbank, of Germany, as of December 31, 1907, is \$58,265,666, and its resources \$234,096,331. Thus we perceive that the capital and resources of the Federal reserve banks far exceed those of the central banks, with their various branches in each of these three great nations, and are amply sufficient for the purposes sought to be obtained. The plan is wisely drawn, givthe banks sufficient capital and resources to accomplish what is desired, and yet not large enough to produce a monopoly or a dominating influence upon the money and bank credits. In this respect the proposed bill is prudent, wise, and to be most highly commended. It happily veers between helpless weakness and tyrannic strength. It gives to the banks of this country neither a master nor a slave. It gives them a strong friend, an equal coworker to assist them in faithfully discharging their duties and responsibilities to our great and varied interests.

Mr. President, having preserved in their integrity and usefulness each of our 25,000 banks, let us examine the evils prevalent in our banking system to-day and ascertain to what extent the proposed plan corrects these. One of the chief and admitted evils of our present national banking system is the concentration of our reserves in a few cities. Under our present banking law each country bank is required to keep a reserve of 15 per cent on all its liabilities, 6 per cent of which must be kept in the vaults of the bank and 9 per cent can be kept either in the banks of a reserve city or a central reserve city. The banks located in the reserve cities are required to keep a reserve of 25 per cent, 121 per cent of which must be kept in their own vaults and 12½ per cent can be kept with banks in the central reserve cities, which consist of banks located in New York, Chicago, and St. Louis. The banks in the above three cities, known as central reserve cities, must keep a reserve of 25 per cent in their own vaults. The effect of this law has been to concentrate the reserves of the country in New York, Chicago, and St. Louis, mostly in New York. The banks of New York have adopted the policy of paying 2 per cent on balances kept in their banks by either country banks or reserve city banks. In order to obtain this 2 per cent of interest the banks in other cities have usually kept in New York all of their reserves, except such as the law requires them to keep in their own vaults. The effect of this law in creating this concentration of reserves is remarkably disclosed by the report of the banks in these three cities made to the Comptroller of the Currency on the 14th of June, 1912. This report shows that the banks in the city of New York were due other banks on account of deposits made there \$510,513,847. In Chicago on the same date was the other banks on account of deposits \$169,718,506. At St. Louis was due other banks on account of deposits made there \$40,626,616. Thus these three cities had on that date \$720,858,969 due other banks. practically the reserves of the entire Nation to be used in times of emergency or trouble were deposited in the banks of these three cities. This vast concentration of reserves has been most detrimental to the best interests of this country. The money thus concentrated has been used for the flotation of large schemes of trusts, combines, and monopolies. But for the vast funds here concentrated the many trusts that have been organized in this country would have been impossible. Here are found the money and resources that have been utilized for the organization of monopolies. Without these vast deposits made by other banks and controlled by a few capitalists and financiers of New York innumerable trusts would have never been created. The concentration of these reserves in New York marked its end. These reserves breathed into the nostrils of monopoly

the breath of life.

Mr. President, to inveigh against industrial monopoly and yet to continue the banking system which alone makes it possible is the supreme of hypocrisy. The greatest blow that industrial monopoly will receive in this Nation is when existing law is changed and the vast reserves the banks are now required to hold are controlled and placed where they will be used for the good of the entire country, and not for the enrichment of a few financiers and speculators. Another evil which has resulted from this concentration of reserves in these three central cities is that the money thus deposited has been mostly used for speculation on the stock exchanges. This speculation is a part of a system of organizing and floating combines and monopolies. The stocks of these monopolies when organized are listed on the stock exchanges, and fictitious sales and purchases are made of them to establish a value in order either to sell to the public or to constitute the basis of loans from Thus stock speculation and organization of trusts go hand in hand. The report made by the banks of these cities to the Comptroller of the Currency on June 14, 1912, discloses in a most unmistakable manner that these reserves and the resources of the banks in these cities are largely used for stock speculative purposes. The report made by the New York banks for that time show that their loans made on collateral security, which are loans made for stock speculation on the exchange, amounted to \$1,169,822,895. The loans of a similar character in Chicago amounted to \$316,096,807. The loans made in St. Louis amounted to \$140,234,284. Thus in these three cities the loans made on securities dealt in on the stock exchange \$1,700,000,000, aggregating more than double the reserves or deposits of all the banks in these cities. Thus we have unmistakable proof that these vast deposits or reserves are used to make loans for stock speculations, and not to encourage the commercial, manufacturing, and agricultural interests of this country. The law that required these reserves to be held by the banks intended that they should be used in times of emergency or distress for the benefit of the legitimate business of the country and to prevent disaster.

The banks in New York, which hold more than two-thirds of these central city reserves or deposits, have never considered that they were put there to be used in time of danger or distress for the public good, but have considered that they were

put there to be used for their own profit. Mr. O'GORMAN. Mr. President-

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from New York?

Mr. SWANSON. I would prefer to yield later. Mr. O'GORMAN. Just at this point I should like to make a single observation.

Mr. SWANSON. I will yield later.
Mr. O'GORMAN. The country banks, I think, all over the country have been sending money-

Mr. SWANSON. Mr. President, I decline to yield at this I will yield later.

Mr. O'GORMAN. If the Senator does not desire to have a palpable inaccuracy corrected, he may proceed with his speech.

Mr. SWANSON. I desire to proceed with it.

The banks in New York are dominated by the large financiers and speculators of this country, and these reserves have been used for their enrichment and not for public good. By this great concentration of reserves here the few financiers who control these banks in New York have been able to precipitate panics and produce depression and financial disturbance whenever their selfish interest dictated. The panic of 1907 has taught this Nation a lesson which it will never forget. It proved beyond dispute that the banks and financiers of New York felt no public responsibility for the bank reserves under their control. panic of 1907 was precipitated by wild stock speculations in the city of New York, engineered by the financiers there who control the great banks. This is clearly shown by an article written by Prof. Sprague for the National Monetary Commission and printed with its publications. Everything was adroitly and spectacularly arranged for a great rise and boom in stocks in order to unload and sell them to the public. Previous to this panic the dividend upon the Union Pacific stock was increased from 6 to 10 per cent. The Southern Pacific stock was placed upon a 5 per cent dividend basis. Dividend upon United States Steel common stock The national bank note circulation was increased more than \$100,000,000, and \$54,000,000 worth of gold was imported from Europe. The Government of the United States was induced to deposit in the banks \$23,000,000 of Treasury money. All of this occurred within the year preceding the panic, and everything was done to make the skies look bright and everything appear propitious and prosperous. Not a cloud appeared

to portend the coming disastrous storm. Money was readily obtained from the banks on stocks as collateral security. The prices of stocks advanced rapidly, and the public, excited and wild, made immense purchases. Thus the first act in the wellplanned drama was most successful. The intended tragedy soon fellowed.

In the autumn of 1907, when the banks outside of New York desired to withdraw the reserves and money they had deposited in these banks to be used for the purpose of moving the crops of cotton, wheat, corn, and oats, they were unable to obtain The report of the Comptroller of the Currency their money. on the 38 New York banks of August 22, 1907, just preceding the panic, shows that from the banks of New York there was due to national banks \$259,300,000; was due from national banks \$45,-500,000; was due to other banks \$206,100,000, and from other banks \$9,700,000, making an aggregate due to other banks a balance of about \$410,000,000. On October 31, 1907, the banks of New York telegraphed their correspondents that they would no longer honor their drafts for money and actually suspended payments. This suspension continued until the 1st of January. These banks in New York suspended payment with \$224,000,000 in their vaults, as shown by their statement on November 2. On November 23, nearly three weeks afterwards, their statement shows that this reserve had only been reduced \$9,000,000. What a contrast does this action of the New York banks present to the condition of the Bank of England at that time, which also practically held the reserves of all the banks of England. reserve of the Bank of England-which was only \$120,000,000in two weeks of this crisis was reduced to \$85,000,000, and yet the Bank of England did not suspend payments. The lowest reserve that the banks of New York had during the entire suspension was \$215,000,000. Thus the lowest reserve of the banks of New York was more than double that of the Bank of England, and yet they suspended payment and refused to make payments to banks outside of the city of New York. still more remarkable, in regard to these banks of the city of New York, was that while they refused to make payments to the interior banks they actually increased their loans during that time. In the three weeks preceding November 9 the New York banks increased their loans to the extent of \$110,000,000. They could not pay their depositors, but they could accommodate their favored customers. The report made to the Comptroller of the Currency on December 3, 1907, by the banks shows that between August 22, 1907, and December 3, 1907, the loans of the entire country were contracted \$85,000,000, while in New York they were increased \$63,000,000, of which \$54,000,000 was on call-collateral loans and \$4,000,000 on timecollateral loans, thus showing that while these banks would not pay the interior banks the money due them on deposits they were making loans to their customers for stock speculation.

The banks of New York have claimed credit that during the panic from time to time they would ship currency out to interior banks. This is true, but the currency they shipped to interior banks was less than the Government and other deposits made to the banks in New York. During this panic the Government deposited in the banks of New York \$36,700,000, most of it coming from outside sources, more than \$30,000,000 of it in the six leading banks, which mostly make loans for stock speculations. The New York banks assert that they improved the situation by importing \$96,000,000 in gold, for which they claim much praise. They had nothing to do with the importation of this gold except as agents through whom the importa-tion was made. The gold was imported in exchange for the commodities of the West and South which were exported to Europe, the payment for which passed through New York. The \$96,000,000 of gold imported did not belong to New York; the bills of exchange simply passed through New York, as is usually done. This \$96,000,000 belonged to the West and South. During the panic New York sent to the interior \$106,-It received in gold which belonged to the West and South \$96,000,000 and from Government deposits \$36,000,000, aggregating \$132,000,000 that it received during the panic which did not belong to it, and only sent out \$106,000,000, thus really gaining during the panic \$26,000,000. The suspension of payments in New York practically compelled the rest of the country The banks of only 53 cities in the United States were able to continue payments. Two of these cities were located in Virginia-Richmond and Norfolk. No one can estimate the disaster that was brought to this country by the action of the banks in New York during this emergency.

Business was suspended, commerce paralyzed, factories made idle, the stocks and securities unloaded on the public reduced one-half in value, and fortunes swept away. The disastrous effect of this panic is perceptibly felt to-day. All this disaster was produced because the banks of New York holding the de-

posits of and a large part of the reserves of interior banks stubbornly refused to surrender them. These funds were used by these banks and their customers to repurchase the stocks and securities, which they had previously sold at high prices, at the greatly reduced prices. This panic has convinced the country of the necessity of making some changes in our banking system. It has conclusively shown the necessity of not congesting and concentrating our reserves in banks with no public responsibility and controlled for individual purposed addition, this great concentration has had a tendency to addition, this great concentration has had a tendency to create in this country, to a large extent, a "money trust," which a few large financiers and their associates are enabled practically to dominate the money supply and the bank credits This state of affairs was disclosed in a remarkable degree by the Pujo investigation committee of last The report of this committee shows that a small group of financiers, usually acting in accord, control bank and trust companies, insurance companies, express companies, raliroads, industrial and public-utility companies aggregating resources of more than \$23,000,000,000. This group of financiers are enabled, as their interests or caprices may dictate, to produce good times or bad times. They can frequently contract credit and produce money stringency whenever their interest or caprices may dic-They largely control the construction of new lines of Large industrial and manufacturing enterprises feel

their dependency upon them. Until the Interstate Commerce Commission was created. which regulates the charges made by railroads for transportation, they completely dominated the transportation of the country, and thus made and unmade communities, cities, sections, and almost States. Heretofore their power has been so great that frequently Federal administrations were elected or overthrown as they might desire. Language can hardly overesti-mate the vast control exercised by these groups of financiers upon the industrial and financial life of this Nation. domination is so tyrannical and complete that even men of large wealth, influence, and courage are afraid to antagonize them, and become subservient and submissive. The pathways of their power are marked by wrecked fortunes and ruined enterprises. Men of independent spirit, of great business genius and activity, are their most prized victims. These are conditions which exist and menace the industrial freedom and the future welfare of Many of these evils will have to be corrected by legislation other than what is contained in this banking and currency bill. The Interstate Commerce Commission has been created to regulate the railroads, to see that all communities, sections, and individuals are treated with justice and fairness, Legislation is necessary upon the trust question to eliminate industrial monopoly and bring back again competition and free and fair opportunity. This bill reforming our currency and banking system proposes, as far as possible, to create a system of banking, and to provide for the issuance of currency which shall save the Nation from the domination of small groups of financiers and give to each individual, every business, every lawful corporation an opportunity to obtain all proper and legitimate needs for bank credit and currency. This is accomplished in the bill by providing that 6 per cent of the capital and surplus of all national banks shall be assessed to form a fund which shall be used for the creation of Federal reserve banks, the banks thus created to be not less than 8 and not more than 12, the country to be divided into as many sections, and 1 of the Federal reserve banks to be located in each. All banks that shall continue as national banks must become members of the Federal reserve bank of the section in which they are located,

The bill contains liberal provisions for State banks and trust companies, without losing their present identity and useful functions, becoming members of these Federal reserve banks. The member banks are required finally to deposit all the reserves required by law within their own vaults or in these Federal reserve banks. Each of these reserve banks is controlled by a board of directors consisting of nine members, six to be elected by the banks and three to be elected by a Federal reserve board, which has general supervision over these Federal reserve banks, the members of the Federal reserve board consisting of seven members, six appointed by the President and confirmed by the Senate, and the other being the Secretary of the Treasury. Three of the six members selected by the banks must be selected to represent the general public interests of the reserve district by the stockholding banks. The Federal reserve board, constituted as above, which shall have general supervision of all these reserve banks, is given authority to remove these three directors if they find that they do not fairly represent the general public interests. Thus without taking away the control of these banks from the member banks, who furnish the capital and money, assurance is given that

these banks will be run for the general public interest, and also the advantage and profit of the member banks. These banks will have, as previously stated, a capital of about \$105,000,000 and deposits of \$531,000,000, provided all the national banks enter the system, which I am satisfied they will do. This capital and deposits will be increased to the extent that the State banks and trust companies enter the system. There can be no question that many of these will enter the system and thus greatly add to the capital and deposits of these reserve banks. Thus there will be created banking resources of more than \$600,000,000, to be used for the general public good in developing the commercial, manufacturing, and agricultural interests of this country.

terests of this country.

There are many who oppose this system of regional banks and prefer a great central bank with branches such as exists in other countries. After careful thought and investigation I am satisfied that this system of regional banks is far preferable to a great central bank. I would prefer not less than 12 banks. and these to be increased as investigation and experience may prove beneficial. The advantages of the regional system over the one central bank are many. It prevents the danger of monopoly and concentration of money and credits in the hands of a few people. I would view with great apprehension a law which would compel the 25,000 banks of this country to contribute capital and deposits to one bank, which would become supreme in finance in this Nation. Those who should control this one central bank would control the industrial, commercial, and agricultural life of this Nation. It is too vast a power to be put in the hands of a few men. The Democratic Party has clearly and positively declared against a central bank. Such a bank when once created would be dominant alike in the financial and political history of this country. If this bank were entirely under governmental control it would offer but a large prize for the small group of financiers of this country to grasp and control government and through it this bank. This system of regional banks requires the capital and resources of a regional bank to be held in and used for the accommodation of those interests existing in that section or region. It does not take the resources and capital of one section and transfer it to These resources are continued in the section from which they are furnished. In case of emergency or business distress these regional banks are expected to use their resources primarily for the sections in which they exist. Besides, it has been wisely thought that there is such a diversity in the various industrial, agricultural, and commercial conditions of our Nation that a system of regional banks with one for each section or region could be more successfully and profitably conducted for the benefit of that section than one great central bank. The success of our various State governments has clearly proven that this diversity renders necessary separate governments to take care of peculiar local conditions.

Our wonderful banking development under our system of individual banks, each suited to do the business of its locality, has also shown the wisdom of permitting this diversity. The more one examines into the matter the more one must be convinced that the system of regional banks is far preferable to one central bank. Of course those who are benefited by monopoly, whether in industry or in banking credits, will naturally prefer the central bank. But monopoly is one of the evils against which we are contending and which the regional banks will be instrumental in destroying. There are some who contend that a central bank offers superior advantages for relief in times of emergency. There is some truth in this. The reserves of a central bank being more concentrated and mobilized can be more readily and promptly used. But this advantage is far offset by the other evils and disadvantages which would inevitably come from a central bank, however created and however controlled. This bill has a wise provision which obtains all the advantages that can accrue from a central bank without its evils and disadvantages. A Federal reserve board is created, as previously stated, which will have general supervision of these regional banks, seeing that they are honestly administered and fulfill the purposes of their creation. This Federal reserve board is also empowered to require one Federal reserve bank to rediscount the discounted paper of another Federal reserve bank. This provision practically gives all the advantages that could accrue from a central bank. It permits the entire reserves and resources of all the regional banks to be used where most needed in time of financial distress or emergency. A central bank could do no more than this. What is most remarkable is that those who most favor a central bank are most opposed to this provision which, when needed, practically unifies the resources and reserves of all the Thus by this method the only advantage which comes banks. from a central bank is obtained without its accruing evils.

The benefits which will accrue from these regional, or, as named in the bill, Federal reserve banks are great and many. The reserves of the Nation, which are needed in times of financial distress and stringency, will be held by those who have a public responsibility for their just and proper use, and not as now, by those who have no such responsibility and no purpose of public benefit in their use. The member banks, being satisfied that their reserves and deposits are held where they will always be forthcoming when needed and are held to take care of these banks and the public in times of emergencies, will be relieved of daily apprehension of trouble and distress. Federal reserve banks will become to all the banks of this country like the Bank of England is to the English banks, the Bank of France is to the French banks, and the Reichsbank of Germany is to the German banks—places of refuge and hope in time of financial trouble. The banks of this country removed from this apprehension can accommodate their customers and the legitimate demands of business without continual trepidation. These reserve banks, practically under Government control and supervision, having a broad vision of financial matters, can be used to prevent dangerous inflation or ruinous depression. They will have a steadying influence on the finances of the country and produce that stability which is the most propitious for the growth and development of the Nation. This bill provides that the rediscounts that these reserve banks shall make for their member banks shall be for paper arising out of actual com-mercial transactions and for agricultural, industrial, and commercial purposes. This prohibits the resources of these reserve banks being used for the purposes of stock speculation. vides that \$636,000,000 shall be set aside and dedicated for the development of our commerce, our agriculture, and our manufac-It gives preference to legitimate business over stock speculations. It makes impossible another panic in this country, with its distress and disaster, precipitated by Wall Street speculation with the reserves and deposits of interior banks.

When this bill becomes law the farmers of this country can sow and plant with the confidence that money will be available for the profitable marketing of their crops. The manufacturer can enlarge his operations with the assurance that from these reserve banks funds will be forthcoming to successfully finance his undertakings. The merchants can liberally buy and sell, knowing that currency and bank credits can be obtained for all prudent and legitimate purposes. Gennine business and enterprise will be stimulated and only stock speculation lessened. If this bill accomplish no other purpose than setting aside and devoting this vast sum of money to legitimate business interests, it would produce inestimable benefits and is deserving of support. This bill, by the creation of these reserve banks, will create in this country, which has long been needed, a discount market where commercial paper can be readily discounted. This will enable all the banks of this country to extend to their customers all prudent and legitimate accommodation. This will be to the alike benefit of the banks and their patrons. It removes the perils of a money trust and brings relief to all American industries.

Mr. President, the next great purpose sought to be accomplished by this bill is the creation of an elastic currency. It is universally admitted that there is a great necessity in this country for such a currency. Our present currency is rigid. It does not ebb and flow according to the needs and demands of commerce and business. At times it becomes redundant and encourages reckless speculation with the consequent reaction and depression. At other times our currency becomes so stringent that the rates of interest become exorbitant and business of all kinds is practically paralyzed. We need a currency that can increase and decrease according to the legitimate demands of business and commerce. All nations who have a modern financial system have provided for such a currency. Every year during the three autumn months there is a great demand for currency in order to move our great agricultural crops. During these three months we market and move our great cotton crop, which practically clothes the world, our great oats, corn, and wheat crops, which fill the granaries of the world, and our great crops of tobacco, which are distributed in all the markets of the world.

We must have the currency to pay cash for these during these few months of marketing and moving. The cash thus expended in the purchase of these vast crops in this short time can only be returned when these vast crops are sold and distributed the world's markets. It takes nearly a year for this to be completely accomplished. It is estimated that it takes more than \$200,000,000 each autumn to market and move these crops. Heretofore we have been enabled to accomplish this by drawing drafts and getting accommodations in London, Berlin, and Paris. When we can get these accommodations upon what is known as financial bills our crops are marketed and moved without

much financial disturbance. But if the financial conditions of Europe are such as to prevent us from getting these loan accommodations, then during these months we have acute financial stringency which brings depression and distress. For years everyone has recognized the necessity of making provision for this yearly recurring currency demand. Yet from year to year relief has been delayed and denied, resulting in immense losses to our merchants and farmers, which it is impossible to estimate. This bill provides for the creation of such a currency which will give prompt and efficient relief. It provides that the Federal reserve board may, in its discretion, issue to the Federal reserve banks on application currency in amount equal to collateral presented and indorsed by this Federal reserve bank and member banks deposited with it as security for such currency issues, the collateral thus deposited being notes, drafts. or bills of exchange arising out of actual commercial transactions or being issued or drawn for agricultural, commercial, or industrial purposes, or the proceeds of which have been used or are to be used for such purposes, having a maturity not exceeding 90 days. The currency is issued by the United States Government, is its obligation, and is redeemed by the United States Government or any Federal reserve bank to which it is presented for redemption.

The Federal reserve bank is required to keep a reserve of 35 per cent either in gold or lawful money for the redemption of these notes. Such portion of this redemption fund as is necessary may be required to be deposited in the Treasury of the United States in order to facilitate the redemption of this currency. This currency is perfectly safe. First there is deposited as collateral security for its issuance notes and bonds indorsed by a member bank with the additional indorsement of the Federal reserve bank. The Federal reserve board may require at any time it thinks necessary the deposit of additional collateral security. There is kept a reserve fund of 35 per cent to provide for prompt redemption and in addition this currency is a first lien upon all the assets of the Federal reserve bank. I can not conceive how greater security could be provided.

Mr. President, in order to form a conclusion as to the merits of this proposed method of currency issue, we will examine and compare it with the methods followed in other countries. The banks of England issue notes to the amount of \$90,000,000 against government securities. All other currency issued must be covered by gold coin and gold and sliver bullion held by the bank. Silver bullion must at no time exceed one-fourth of the gold bullion held in the issue department of the bank. This bank has not for many years exercised its privilege of holding silver bullion. The notes issued by the banks are legal tender in England and Wales above \$25, but not in Scotland.

There are 23 other provincial banks in England which are

authorized under law and can issue notes to an amount not exceeding \$6,000,000. These banks have only issued about \$1,500,000 of what they are permitted to issue. These notes are not legal tender. They are a lien on the general assets of the bank, and the stockholders incur an unlimited liability for their redemption. The banks of Scotland have an authorized circulation of about \$13,000,000 not required to be covered by gold. All other issues of Scotch banks are required to be covered either by gold or silver, the amount of silver permitted to be thus used for the issuance of notes not to exceed one-fifth in silver coin. The reserve required for the issuance of notes in Scotland must be held at the head office, the amount thus required being ascertained by averaging the notes in the hands of the public issued by the banks for every four weeks. The notes are not a legal tender. There is an unlimited liability of the stockholders for the redemption of these notes. There is a tax on all issues of notes of 11 per cent. The Government of tax on all issues of notes of 12 per cent. The Government of the Dominion of Canada issues treasury notes to the extent of \$30,000,000 for which it must hold 15 per cent in gold and 10 per cent in Government securities. In all note issues in excess of \$30,000,000 there must be on deposit an equivalent amount in gold. The notes issued by the Dominion of Canada are redeemable in gold and are legal tender. The banks in the Dominion of Canada are permitted to issue notes equal to their paid-up capital without the deposit of security or any tax. In 1909 the circulation of these bank notes amounted to \$81,400,000. In 1908 an act was passed authorizing the banks of Canada to issue during the crop-moving season, from October 1 to January 31, notes in excess of its unimpaired paid-up capital to the amount of 15 per cent of the sum of its paid-up capital and surplus. Any bank taking advantage of this provision was required to pay interest upon the excess at a rate not to exceed 5 per cent per annum, to be fixed by the governor in council.

The bank notes of Canada are not legal tender, nor does the Government bind itself to receive them in payment of dues, nor is a bank required to accept the notes of other banks. The notes circulate everywhere at par. No one has ever lost any money on account of notes issued by Canadian banks. These notes must be redeemed by each bank at its head office and such commercial centers as are designated by the treasury board. These redemption cities are at present the eight largest cities in the Dominion and are the same for all banks. The banks are required to keep on deposit with the minister of finance a sum of lawful money—gold or Dominion notes—equal to 5 per cent of their average circulation. This deposit is called the circulation redemption fund, and is a guaranty or insurance fund for use, if need be, for the redemption of the notes of failed banks. Bank notes are first lien upon the assets of a bank, and bank stockholders are liable to an assessment equal to the par value of their stock. The law of Canada makes no requirements as to reserves for bank deposits or note issues. As previously stated, these provisions have been found amply safe to secure all notes circulated in Canada, which are taken everywhere at par, and no one has sustained a loss on account of note issues. next examine the method of France. The Bank of France has the privilege of a maximum note issue of \$1,600,000,000. These notes can only be issued against cash or statutory loans and discounts. Every note issued has its counterpart either in the metallic reserve or in drafts, bills, and notes discounted. The notes, drafts, and bills thus discounted by law must not have more than three months to run and must have three good signatures, except the bank is authorized to accept paper bearing only two signatures when the third signature is replaced by a deposit of securities belonging to the class of securities admitted by law for loans or by warehouse receipts for merchandise. Two of the signatures must be of parties domiciled in France. The Government of France owes the Bank of France about \$36,000,000, upon which it appears it has the privilege of issuing notes.

We will next examine the system of Germany. The Reichs. bank, which is the central and governmental bank of Germany, can issue notes for gold bullion, and for gold, silver, copper, and nickel coin; for all Government notes held; for notes of all other banks held by it, which banks have the issue privilege, and uncovered notes to the extent of about \$118,000,000. All other notes issued by the Reichsbank in excess of this must not be greater than three times the amount of gold bullion, and gold, silver, copper, and nickel coin, and must be covered by statutory notes, drafts, and bills of exchange, and acceptances discounted and held by the bank. The notes, drafts, and so forth, thus discounted must have three months or less to run and have two good signatures. The notes are redeemable in either gold or silver. There is no limitation on silver, except that the silver coinage in Germany is limited by law to about \$5 per capita. All other issue of notes by the Reichsbank in excess of the above is taxed 5 per cent. There are four other banks of issue in Germany, with the privilege of issuing about \$35,000,000 of notes. The systems of England, Scotland, Canada, France, and Germany are considered the best existing for examination and for the adoption of their best features. I believe the system proposed in this bill offers advantages possessed by neither. To a large extent it utilizes the best features of each of these countries. England, Germany, and France to a limited extent utilize Government securities for the issuance of notes. While this note issue is rigid, yet it furnishes absolute security and is valuable to be retained, provided it is supplemented with an elastic currency. This plan, by a reter-tion for some time of our national-bank note issues and by an amendment which is proposed in the Senate giving the Federal reserve banks the privilege of issuing notes on Government securities, retains this feature, which has long existed in this country, with many advantages, and which has also, as previously stated, been utilized beneficially in England, France, and Germany. We compel a reserve of 35 per cent for all note Germany. We compel a reserve of 35 per cent for all note issues, which is somewhat larger than the requirement of the Reichsbank of Germany, and which we think is far preferable to that of France, which requires no specific reserve.

This insures prudence and safety. It is preferable to the note-issue system of Canada, which also requires no specific reserve. This reserve requirement of 35 per cent gives an elasticity in the issuance of currency to the extent of nearly three times the reserves of the Federal reserve banks. This gives an advantage over the system of the Bank of England, which is rigid, having its note issue limited to \$90,000,000, based upon Government securities and the deposit of an amount of gold coin equal to the amount of the circulation, which really makes only gold certificates. England, having no elasticity in note issues of currency, has been compelled to supply her elasticity by bank checks. This elasticity can be acquired by the use of checks in a small country like England, where checks are promptly and almost daily issued and collected, but not in a

large and extended country like this, where there are frequently many weeks before a check can be deposited and collected. Thus, I am convinced that the system is far better suited to this country than the English system. The proposed system is modeled largely after the German system, and has its conceded benefits with some additional advantages. The German system could not be utilized in time of a financial crisis or a great emergency as efficiently as the system proposed in this bill. The German system provides that there shall be a tax of 5 per cent upon all emergency currency issued. The tax or interest charge upon the currency issued under this bill is regulated by the Federal reserve board. This board can increase or decrease this tax or charge as the requirements of the situation demand. By being privileged to fix the tax or charge upon currency they can retard excessive inflation or in time of gloom and depression give needed encouragement and stimulation. This system, as previously stated, by permitting the Federal reserve board to require one Federal reserve bank to rediscount the discounted paper of another Federal reserve bank, gives the system all the benefit that can be derived from one great central bank in the time of an emergency, yet permits in normal times these Federal reserve banks scattered through the country to look specially after their regions or sections in extending to them their special aid and benefits. Then this system of currency issue has an advantage over the systems of all of these countries in that it is controlled by the Government and is a Government obligation.

It is believed that the issuance of money or currency that passes as money is a governmental function. As every business and industry of America are dependent for success or failure upon the volume and circulation of currency, it is believed its issuance should be controlled by the Government for the public good, not by large individual banks whose policy would be directed by their own profit and interests. The currency issued under this bill is controlled by the Federal reserve board. This board is appointed by the President of the United States, representing all the people of this country. is believed that the President of the United States, feeling the weight of his great office and responsibility, knowing the possibilities of weal or woe in this system of banking and currency, will faithfully, fearlessly, and patriotically discharge his obligation and appoint a splendid Federal reserve board, who will use the powers given them for the benefit of all the people and not the enrichment of a few. It is only through accredited Government officers that the people can act in this matter. What better person could be selected to discharge this great responsibility than the President of the United States? Chosen to represent all sections and all interests, he is the best suited to be given the power of the appointment of this board, to see that the purposes in this proposed plan are carried out as designed for the betterment of all the people. Is it not far preferable to intrust this great power to a direct representative of the people than to private individuals who have no public responsibility and hence no obligation to work for the public interest in preference to their own selfish interests? The President of the United States names the judges of the Supreme Court, who are supreme in the determination of life, liberty, and the rights of property. Has this trust in any way been violated? No. The President of the United States names the members of the Interstate Commerce Commission, who fix transportation rates for communities, cities, and sections and thus largely control the development of this country. Has this trust been violated? No. The members of the Federal reserve board when appointed by the President must be confirmed by the Senate. Can not the Senate be trusted to see that those selected are men of character and capacity, worthy to discharge the duties imposed upon them in this bill?

Mr. President, I am satisfied that a better system of appointment could not be devised, and I am satisfied that the Federal reserve board when constituted will wisely, faithfully, fearlessly, and patriotically discharge the duties conferred upon them to the benefit of the whole country and without favoritism to any. I believe we will have under this system the assurance that the capital and resources placed in the Federal reserve banks will be strictly used for the benefit of commerce, manufacture, and agriculture. I believe that the board will see that all sections of the country are provided when needed with ample bank credits and currency. I believe the board with the resources at its disposal and its power of supervision will distribute credit and currency like rich blood passing through all parts of the body, giving health and stimulation to all sections. I believe it will be able ultimately to prevent the financial dependence of any section of our country upon the favors of large capitalists and financiers. We will have the assurance that largely the currency and bank credits of our country

will be controlled by the Government and used for the general welfare.

Mr. President, I do not look with apprehension, but I look with hopeful expectations of a wise and patriotic exercise of the functions given Government officers under this proposed plan. Government is now divorced from big business. have come in public life. Public officials now realize that the powers given them are held in trust for all the people. witness able and patriotic men entering public life, willing to consecrate their lives for public good. This reform and betterment is but begun, and I believe that each year we will witness more patriotic and efficient Government officials. Government in the past has been mistrusted largely because some of its officials were selfish or corrupt. Government can only only be beneficial in its work and undertakings when its selected officials are capable, honest, and patriotic. I believe the present President of the United States, animated by only lofty and noble principles in all of his work, will select as members of this Federal reserve board men fully equipped, men with noble purposes and whose administration of their office will redound to the great betterment of this Nation.

Mr. President, being satisfied that these banks will be controlled in the interests of the people, let us examine and see the benefits that will come from the establishment of this sys-The issue of currency provided in this bill is particularly fortunate. It gives an opportunity for the issuance of all that could actually be needed without possibility of dangerous infla-If all the national banks join the system, which is fully expected, as previously stated, the resources of the Federal reserve banks would be about \$636,000,000. If the Federal reserve banks in accommodating their member banks for rediscounts should issue currency notes instead of using the resources at their disposal, the currency could be expanded to the extent of \$1,817,000,000 after providing for their required reserves, and the member banks accommodated for rediscounts to that extent. There are those who are apprehensive that this plan would produce an immense inflation and hence reckless speculation, to be followed by financial depression and distress. But, Mr. President, this contention can not be sustained. The Bank of France, which many contend is the greatest financial institution in the world, weathering all financial storms and political revolutions, and frequently in hours of distress furnishing relief to the Bank of England and the Reichsbank of Germany, has authority to issue notes to the extent of \$1,600,000,000. Thus the excess that all the Federal reserve banks can issue over that of the maximum issue of the Bank of France is \$217,000,000. The capital and resources of these reserve banks are three times larger than those of the Bank of France. The resources alone of these reserve banks exceed those of the Bank of France by more than the excess of currency issue permitted. Our population more than doubles that of France. Our wealth far exceeds that of any other nation. The products of our factories exceed those of Britain and continental Europe combined. Our mines furnish the world more than half its mineral products and wealth. Our western prairies are the granaries of the world. The world's comfort and clothing are dependent upon the white cotton fields of the South. We occupy to-day the foremost place in the world's commerce, our exports exceeding those of Britain.

Our internal commerce exceeds all the foreign commerce of the world. Our banking capital and resources exceed those of any other nation. The immensity of our business and commerce may be realized when we reflect that the clearances of the 252 cities in which clearing houses are located average more than \$650,000,000 daily. Every hour during the five hours of banking business more than \$100,000,000 of checks are cleared and settled in these 252 cities. The aggregate for the entire country is so vast that even a vivid imagination is powerless to form a just conception. We are a new country, throbbing with life, enterprise, and need of development. Our demands for currency are great and urgent. Mr. President, the excess of currency issue possible under this bill over the amount permitted to the Bank of France does not exceed the legitimate demands of our greater business, commerce, and manufacture. Besides, inflation under this bill can be readily prevented by the Federal reserve board increasing the tax-interest charge upon the currency issue. The Federal reserve board with its powers stands as a watchman to look out for dangers and a guardian to exercise its power to prevent either undue inflation or depression. Of course, if the State banks and trust companies enter the system the possibilities of an increase of currency would to that extent be augmented, but even then there is no chance of undue inflation. The currency notes are only issued when there is a demand for them first by the customer of a member bank who desires accommodation for commercial, manufacturing, or agri-

cultural purposes. This member bank, knowing its customer and knowing his purposes, must approve the demand and present it to the Federal reserve bank for its consideration and action. The Federal reserve bank must approve the necessity for the demand and present it to the Federal reserve board. The Federal reserve board must finally approve this demand. Thus we have every safeguard against undue and reckless inflation and speculation. The currency notes can only be issued when there is a demand for them for business purposes emanating first from business enterprises.

The undue inflation of currency is further protected by providing that they shall be promptly redeemed by each reserve bank and also by the further provision that, when received by a reserve bank other than the one who issued it, it can not be reissued but must be sent either to the reserve bank or to the Treasury of the United States for redemption. Thus when the notes have been issued and have performed their purpose they will be returned and retired. Under the bill currency will ebb and flow in every community and section as the legitimate demands of business may require. The amount of currency provided is ample for all legitimate business purposes. It provides ample currency to move all our crops of wheat, corn, oats, cotton, and tobacco during the autumn months, to take care of our daily increasing business, and to give credit and currency in the South and West, which are now going through a process of development and where large amounts are needed. Another benefit accruing to the Government on account of the method of issuing these notes is that, being Government notes, the profits derived from their issuance will go to the Government and thus to all the people. All the profits of these reserve banks which issue these currency notes, after the payment of 6 per cent interest on their capital stock, will go to the Government. In addition the Federal reserve board is given the power to fix the tax which shall be imposed upon the issue of notes, thus giving them ample authority to look after the interests of the Government in this respect. Another advantage of this system over the systems of other countries is that this is intended to be a bankers' bank. This was necessary in order not to destroy our great system of individual banks, which we believe is indispensable to the growth of our country, and which when properly regulated and the evils eliminated as proposed in this bill will save the country in the future from a monopoly of money and bank credits. A system which would have put large governmental banks in competition with the small banks scattered all over our country, we believe, would have been most disastrous to the best interests of this Nation.

These banks, owned by the citizens of the various communities, gather unto themselves the funds and resources of these communities to be utilized for their development. What is needed to aid the country in its development is not antagonism, warfare, and destruction of these local banks, but the creation of a system which can extend to them needed benefits and accommodations. This plan is devised with that idea. The Federal reserve bank, in rediscounting paper, in accepting deposits, confines its operations to business with member banks. It only rediscounts notes, drafts, bills of exchange, and acceptances indorsed by a member bank. Thus it is an assistant and not an antagonist of its member banks. This system is a great advantage to a vast majority of the farmers and business men of this country. If the Federal reserve banks had to pass upon the credits and value of individual notes, many worthy men deserving of credit and of financial responsibility would have their paper rejected. It would be impossible for the reserve banks to know the financial standing of a vast majority of the farmers and business men of the country. If a different plan was pursued, the large financial concerns like Swift, Armour, and others, who daily offer their notes for discount, would be practically the only people accommodated; but by accepting the paper indorsed by a member bank, the member bank knowing the financial standing of its customers in their community can readily indorse their notes and have them rediscounted with the Federal reserve bank, which otherwise could not be done. By adopting this plan the bill will enable the small business men and farmers of all sections to get the banking accommodation and credit extended to the large financiers and financial institutions. The plan was devised to accomplish this purpose, and its beneficent results will be readily seen in all sections of the country when it commences its operations.

Mr. President, as far-reaching in their beneficial effects as are the advantages already presented of the proposed plan, there are still others which will be derived from the adoption of this system. The system provides that all the general current assets of the Treasury of the United States shall be deposited in these Federal reserve banks, the banks being permitted to use them for loans and business purposes as other deposits are used.

The current funds in the Treasury of the United States run from \$125,000,000 to \$225,000,000, and frequently more. It is conservatively estimated that this would result in placing in these banks about \$210,000,000 of money by the Treasury of the United States. This money heretofore has either been locked up in the Treasury or deposited in national banks. When locked up in the Treasury of the United States, usually amounting to far more than \$100,000,000, this amount of money is actually withdrawn from circulation and business, and to that extent produces money stringency and depression. When de-posited in national banks, the Government has required the loan to banks to be secured by deposits of either Government bonds or other securities. The securities which the banks de-posit in order to obtain these governmental deposits usually exceed in amount the deposits given the banks by the Govern-Thus, when the Government makes deposits to the national banks under the present system, it really does not increase to a very great extent the ability of these banks to accommodate their customers. Under the proposed plan these deposits are put in the Federal reserve banks and the Government checks upon them as other depositors. Thus the funds in the Treasury are not withdrawn from circulation, but are available under this plan for the business of the country. This obviates the necessity of the banks depositing securities in order to obtain these funds. It prevents the favoritism which has heretofore existed in regard to the deposits of Government money in national banks. The benefits that will accrue from this plan are great and the stimulating effect upon legitimate business and commerce will be promptly felt. Heretofore these deposits of Government money have been mostly in large national banks in New York City and used for stock-speculation purposes. Under this proposed plan these governmental deposits will be put in Federal reserve banks and used entirely for legitimate business This is an advantage to all sections.

As the Government will receive all profits in these reserve banks after the payment of 6 per cent interest upon the capital stock to the member banks, the Government in addition will receive the profits derived from the use of its own money. The profits made by these Federal reserve banks have been variously estimated. Of course any estimate can only be conjectural. Mr. James G. Cannon, president of the Fifth National Bank of New York, an able and most conservative banker, estimates that the Federal reserve bank in New York City after paying a dividend of 6 per cent on stock to the member banks, and no interest on Government deposits, would earn more than \$4,000,000 a year clear profit. The capital of the Federal reserve bank in New York City, upon which he estimates this profit, was placed at about \$20,000,000, which is about one-fifth of the entire capital of all the Federal reserve banks. If the other Federal reserve banks should conduct their business as profitably as Mr. Cannon estimates the Federal reserve bank in New York City would, the net profits of all these banks would be about \$20,000,000. But it is doubtful if all the banks could conduct as profitable a business as the one located in New York. However, from the estimate made by Mr. Cannon it would be safely concluded that the profits of all these Federal reserve banks if properly conducted would aggregate about \$15,000,000, which would belong to the Government of the United States. This system also greatly facilitates the transference of funds from one section of the country to another, saves to the business men and bankers of this country yearly vast sums of money expended in obtaining exchange or transfer vast sums of money expended in obtaining exchange of transfer of funds. This will be of great benefit alike to bankers and their customers. The plan proposed, having provided a safe plan for the deposit of a large part of the reserves required of the banks entering the system in the Federal reserve banks and realizing that these reserves being under proper and patriotic control will be used for the general good, has safely reduced the reserve requirements of all the banks.

The reserve requirements of the country banks are reduced from 15 per cent to 12 per cent, the country banks being required to keep four-twelfths of this in their own vaults, fivetwelfths in the Federal reserve banks, and the remaining threetwelfths either in their own vaults or in the Federal reserve banks as they may determine. The reserves required of banks located in the reserve cities have been reduced from 25 to 15 per cent. Two years after the date of the passage of this act the reserves of the banks located in the reserve cities shall be held six-fifteenths in the Federal reserve banks and the balance held permanently either in the Federal reserve bank or in its own vaults or in both at the option of the bank. A bank in a central reserve city has its reserve requirements reduced from 25 per cent to 18 per cent, of which after two years these banks shall be required to hold in the Federal reserve bank six-eighteenths, or one-third of its reserves, and the remaining twelve-eighteenths

either in its own vaults or in the Federal reserve bank or both. at its option. The plan further provides that on all time deposits the requirements of the reserve shall only be 5 per cent, which heretofore has been 15 per cent in country banks and 25 per cent in other banks. The law provides that all deposits due within 30 days shall be considered as due on demand and have the reserve requirements of demand obligations. makes legal the present system in national banks of paying interest on deposits, which heretofore has been the subject of great doubt as to its legality. By thus reducing the reserve requirements on time deposits and reducing, as previously stated, the general reserve requirements of all the banks, a vast sum of money now locked up as reserves will be released and can be utilized for business purposes. It is estimated that the 7,106 country banks, on account of the reduction of the reserve requirements on demand and time deposits, will have thus released about \$140,000,000; it is estimated that the 367 reserve city banks, by the reduction of their reserve requirements, will have thus released about \$200,000,000; it is estimated that the 52 banks in the central reserve cities will have thus released, by reduction in their reserve requirements, \$110,000,000.

Thus it is estimated that by reduction of the reserve requirements in all the national banks and creation of this plan of Federal reserve banks \$450,000,000 now required to be kept in the vaults of these various banks under existing law will be released under this proposed plan and be made available for trade, commerce, and business. This should be reduced by the 5 per cent redemption fund deposited by the national banks in the United States Treasury to provide for the redemption of their notes, and which was permitted to be counted as a part of its reserve. This is not permitted under this act and is an independent required reserve. Deducting this \$35,000,000 leaves the real reserves thus released \$415,000,000. It is impossible to overestimate the advantages which will accrue to commerce and business by this great release of funds which are now locked up and are of no advantage to commerce and business. The reserve requirements reduced under this proposed plan will nearly provide all the funds needed by the national banks to furnish their capital and reserves for the Federal reserve banks. The interest that the banks will receive upon the \$105,-000,000 of the capital stock for the Federal reserve banks and the privileges of rediscount which these Federal reserve banks will at once extend to all national banks in the country will far exceed any loss sustained by the national banks on account of failure to get interest on their reserve deposited in other national banks as now permitted by law. In addition to being relieved from apprehension and fear in time of financial stress and trouble, which is a great consideration to all bankers, the banks will find their profits greatly increased by becoming members of this proposed system. As all the banks in the country will be made stronger and better and have opportunities for rediscount, they will thus be enabled to extend greater and more liberal accommodation to their customers, to the benefit of all communities and all sections. As previously stated, this proposed plan is designated to assist the banks and thus enable the banks to assist and accommodate their customers. The requirements for the payment of capital stock and for the shift of the reserves to the Federal reserve banks are so adjusted and extended over two years that it can be accomplished without any disturbance of existing conditions or the creation of any contraction of credits.

By the reduction of the reserve requirements and the extension of the time for the payment of capital stock and the deposit of reserves, the system should be enabled to be put in operation with an expansion and not a contraction of currency. The plan should result in giving immediate relief to the present stringent conditions existing in this Nation. I believe the passage of this bill will witness a brightening of the financial skies and dissipation of the clouds of trouble and doubt at present overshadowing our business skies. In order to financial troubles, panics, and currency meet our such as existed in 1907, the plan proposed authorizing the Federal reserve board to suspend for a period not exceeding 30 days, and from time to time to renew such suspension not exceeding 15 days, each and every reserve requirement contained in this act except the reserve requirements with reference to the issuance of Federal reserve currency. much-needed amendment, and if we had had this law in 1907 the panic and financial distress of that time would have been greatly moderated if not avoided. The reserve requirements are imposed for the purpose of having a fund available in time of emergency and financial crises. The banks are required to keep these reserves in their vaults or in specified places of deposit to meet such emergencies and to avoid financial troubles, and yet our existing law is so foolish as to absolutely lock these reserves up so they are available for no use at the time they are most needed. The panic of 1907 furnishes a striking illustration of the folly of the present system. During that distressing period the banks of New York, with more than double the reserve of the Bank of England, suspended specie payment and locked up these reserves, and, so far as being a benefit and relief to the country, they were perfectly useless. The Bank of England, as previously stated, during this time relieved the business conditions in Eugland by making loans and thus dissipating the feeling of apprehension existing. The reduction of our reserve requirements in this plan is not unsafe, as contended by many.

The banks of Canada have no reserve requirements fixed by

law. These are fixed by the judgment and management of the banks. The banks of England have no reserve requirements. The banks of France have no legal reserve requirements. serve of each bank is fixed by the management of the bank. But we have established legal reserve requirements in order to insure the safety and prudent management of our banks and to provide a fund available for use in times of emergency and financial troubles. Thus upon examination of the system of other countries it can not be safely contended that the reserve requirements of this bill are other than wise and all that conservative management could require. The proposed plan presents another benefit in permitting banks to discount notes and bills which are based upon foreign exportation or importation or the domestic shipment of goods. This creates a new class of paper and transactions nearly unknown in this country, but which are greatly used in Europe to great advantage of trade and commerce. It will open a new line of business, profitable alike to the banks and their numerous customers. Nearly all of our foreign business is now conducted through acceptances drawn through London or some foreign money center. This country, having no system of acceptances in vogue by banks, has been compelled to resort to the foreign system in order to conduct our foreign business. All of our transactions in exportation and importation of goods is thus conducted in foreign money centers. The bankers and their customers in this country have to pay immense sums annually for this accommodation. The reserve banks, by being permitted to rediscount the acceptances of member banks, will soon do this class of business to the great benefit of the banks and their customers, and result in the saving of many millions of dollars annually. In addition to giving the Federal reserve banks the privilege of rediscounting the acceptances of member banks, the privilege is further extended in the plan so as to permit any national bank to accept drafts or bills of exchange drawn upon it for either domestic or foreign shipments of goods not having more than six months to run and limiting the amount of such acceptances to one-half of the capital stock and surplus.

This will open up a new field of business for our national banks, much to their profit and to the benefit of their customers, and will also enable them to utilize their resources promptly and efficiently for the moving and marketing of our This enables both the national banks and the Federal reserve banks to aid in this important work. of these provisions are of special benefit to our great agricultural interests. The proposed plan extends further benefits to our farming interests. Under existing law national banks are prohibited from making loans on real estate. They are prohibited from making loans upon this, the safest and best security. This prohibition contained in the national-bank act has been most detrimental to the development of our rural sections and very injurious to our farming interests. It has prevented farmers from obtaining money to improve their farms, to raise and market their crops. It has been an unjust discrimination in favor of the industrial and manufacturing interests against the farming interest. This unfair discrimination is to a large extent eliminated in this bill, and national banks are permitted to make loans upon farm lands, within I regret that this bill did not contain a system of rural credits which would enable the agricultural sections of our country to obtain for a proper and reasonable length of time at a low rate of interest money to purchase farms, to improve and develop their farms when purchased, to raise and move their crops. There is nothing that our country needs more than such a financial system in order to result in rural betterment. I regret that this is not a part of our proposed plan, but we have an assurance that this plan will be followed by the creation of a system of rural credits which will give this needed relief to our agricultural sections. I hope that this promise will be fulfilled and that such legislation will be promptly enacted. I shall certainly do all I can to accomplish this. The rural sections of our country must be

developed if we are to attain the possible summit of our usefulness, wealth, and greatness. We must have not only rural credits but better schools, better roads, better facilities in mail

and parcel post in country districts.

The time has come when the rural sections should receive treatment in all respects equal to our great commercial centers. There is no problem confronting American life more important than a progressive development of our rural communities. I wish this bill contained more liberal provisions for the acceptance of warehouse receipts and bills of lading for farm products as security for loans and discounts. I hope the promises made that these shall be more liberally provided for in the bill for rural credits for the relief of farm communities will be fulfilled, and that there will be an extension of such accommodations to the farmers on lines of safety and prudence.

Mr. President, this plan provides a relief which economists have long contended was needed in our system of currency and banking. It has long been contended that we had no adequate means to protect our gold supply. Economists have continually frightened us by pointing out that our gold supply was completely at the mercy of other nations, and that we could be divested of it at any time, and had no means of prevention. The main reason that has been urged for the creation of a great central bank is to provide the means of protecting and preserving our supply of gold. This is the main argument that has been presented for such an institution.

Yet, Mr. President, despite all the theorists of the academic school of financiers, despite the foreboding prophecies of the selfish financiers for many years, we have to-day the largest stock and supply of gold of any nation in the world. I have no apprehension that this great supply, the greatest accumulation of gold in the world, will be depleted. The balance of trade is largely in our favor. This is a guaranty that we can obtain gold when we need or desire it.

Mr. President, as long as our exports exceed our imports, and our exports consist of the necessities of life that the world must have, whether in times of stringency or not, and our imports consist mainly of luxuries, which in times of depression we can cease purchasing and importing, there is no danger of our sup-

ply or stock of gold being impaired.

This condition creates for us an impregnable position, which enables us to obtain gold whenever needed or desired. As long as this condition exists any gold that is withdrawn from us is but temporarily withdrawn as a loan and can be called back whenever we demand it. This condition is the one which has enabled us to accumulate our great stock of gold and furnishes us the guaranty that we will retain it and add to it when we desire. It is a better guaranty than any central bank or any system of banking and currency that any central bank of any system of banking and currency that could be devised. But in order to prevent a temporary shipment of gold in time of financial trouble and distress, which might accentuate the conditions then existing, this bill provides that the Federal reserve board can control the discount rates of the Federal reserve banks. The rate of discount is the method used by the Bank of England, the Bank of France, and the Reichsbank of Germany to control the importation of gold within these countries or to prevent its exportation. This has been found effective in these countries, and the power is given the Federal reserve board in order to use this power when necessary in this country. But in order to further protect and add to our gold supply the Federal reserve banks are empowered to purchase and sell foreign and domestic bills of exchange, bankers' bills, to purchase gold and silver bullion, to borrow gold and to give as security for it United States bonds and other securities, to buy and sell bonds of the United States and its dependencies, State, county, district, or municipal bonds. These powers given to the Federal reserve board and Federal reserve banks are amply able to furnish every possible protection to our present supply of gold and to add to it whenever the best interests of this country require it. The power given in this respect is all that can be desired and will be found, when used, most effective. The bill also permits under safe and conservative conditions the creation by national banks of branch banks in foreign countries. is prohibited under the existing law.

By permitting the creation of branches in foreign countries we will enable the banks of this country largely to conduct our foreign business, with benefit and profit to the bankers and increased accommodation and the saving of many million dollars to the people of our country. In addition it will give a great stimulus to our foreign trade and give us our own banking facilities in foreign countries, so that we can successfully meet our foreign competitors. It will relieve us from dependence in this vast trade upon foreign bankers. In this great trade it will ultimately result in giving us financial independence, to the great benefit of our agricultural, manufacturing, and

commercial interests.

Mr. President, this proposed plan will give to this country an additional benefit which can not be exceeded by any heretofore enumerated. It will give us a more uniform and a lower rate of interest. The rate of interest charged by each Federal reserve bank for discounts to its member banks will be uniform. Thus in each section presided over by a Federal reserve bank there will be a uniform rate of discount. This will have a tendency to make a uniform rate of interest in that section. It will give to country sections and to new communities where there is a great demand for money a lower rate of interest, which will be most productive of their progress and develop-The Federal reserve board having to approve the rate of discount of the Federal reserve banks will exercise that power to establish as far as safety and prudence will permit a uniform rate of discount for the country. This can but have a tendency to lower the rate of interest in the West and South, where there is now a great demand for money on account of their rapid development. It is impossible to make an estimate the benefits to agriculture, manufacture, and commerce of all the sections of this country which will come by the facilities given by these Federal reserve banks for loans and discounts

and the lowering of interest rates which must come.

I believe that the greatest benefit which will first accrue from this lowering of the rate of interest will be to our rural sections. I believe that these sections will have an opportunity for development from which they have heretofore been deprived on account of the high rate of interest and the difficulty of obtaining discounts and loans. The development and prosperity of our rural sections will necessarily add to the growth, wealth, and prosperity of our cities and commercial centers. tural crops, on account of lower rates of interest and increased facilities for loans and money, will be produced more cheaply and abundantly. The profit and the prosperity of the farmer will be greatly augmented. Thus their purchasing power will be greatly increased. This will result in greater output to our manufacturers, with increased profit to the owners, with increased wages to the employees, and more constant employment. It will increase the business of our great mercantile interests. It will increase the transportation of our railroads and steamship companies. It will thus inevitably increase the deposits and business of the banks, with corresponding increase in

profits.

Mr. President, it seems to me that this proposed plan of banking and currency reform deals justly and fairly with all the varied interests of our country and has within it sources for the great benefit and betterment of each. It is not a perfect system. Such a system has not been and will never be devised. It does not contain all that any of us may desire. There are none of us who, if we had power, would not make some modifications and insert in it some additional provisions. It is constructed on wise, prudent, and conservative lines. It preserves existing conditions where they have been found to be beneficial. Its modifications are to eliminate evils which are great, and which are universally conceded. Its changes are made safely and slowly, so as not to produce a shock to business and finance, unsettlement and disturbance. It follows the pathways which experience in this and other countries has pointed out as safe and beneficial. It will be found efficient in lessening the monopoly of money and bank credits and opens the door of opportunity to every enterprising business man and every legitimate business.

I believe it is the best measure that present conditions will now permit us to obtain. Its worst opponents have been forced to confess that its benefits far exceed its defects. Banking and currency is not an exact science like mathematics. The system can only be perfected by experience. If any defects are disclosed in the future, Congress can readily remedy them. In the future as the operations of the plan shall be disclosed we will perceive what is good and promptly correct what is wrong. For more than the last decade we have been discussing banking and currency reform, and the demand for such a reform is urgent and universal. The time for prolonged debate has passed; the time for action has arrived. The time has come when the differences upon this question, as far as possible, should be reconciled, and the insistent demand of the country

for this legislation should be promptly realized.

Mr. President, to my mind the duty of the Democratic Party is plain. The country has given us power to enact the legislation promised in our platform, included in which is banking and currency reform. The responsibility for failure to enact such legislation will lie with us. When power is given, plat-form promises should be transferred into legislative enactments.

United with individual responsibility is a combined party responsibility. Hence it is the duty of the Democrats to reconcile their differences, as far as possible, and to unite on a measure which can command sufficient Democratic strength to secure its enactment. If each individual Member of Congress will only support measures that meet his entire approval, legislation becomes impossible. Concessions must be made. Differences must be reconciled. The country will refuse to continue in power a party which is unable to act on account of irreconcilable individual differences. Individual pride of opinion should be abandoned for the accomplishment of common good. In the hour of our power and responsibility the time has come for Democratic harmony, not discord; for lessening, not magnifying, differences; for reconciliation, not recrimination.

The Democratic Party should discredit those who for selfish purposes and advancement seek to continue party strife and bitterness which will render impossible that accord and concert so necessary for us in order to discharge our duty and obligations to the country. Poor, indeed, is that Democrat who in this great hour of our opportunity will not bury self and seek the good of his party, and with that the progress and prosperity of our country. The measure here proposed has the support of the judgment of a large majority of the Democratic Members of the House and the Senate. It is a result of the investigation and thought of these Members and the present Democratic administration. The measure as outlined is the common basis upon which the opinions of these upon whom the responsibility lies for legislation have united, and which they believe will fulfill their promise made to the country and will result in great betterment to all our varied interests. It has my cordial support. I shall earnestly and actively do all I can to secure the prompt enactment of this legislation. I have confidence in the wisdom of the President and the Secretary of the Treasury, who have thoroughly investigated this question and approved this measure as wise and beneficial. No one can doubt the ability and patriotism of the President. He possesses in a preeminent degree the elements of statesmanship. An eminent writer has well defined statesmanship as "not only the wisdom to discern, but also the valor to lead along the right pathway."

The President, during the months he has exercised his great office, has displayed in a preeminent degree capacity and courage, the two great elements of statesmanship. In this conflict he has without hesitation and without fear stood by the masses of the people, and determined, as far as he was able, to give the country a banking and currency system promotive of all the interests of all the people and with a view to save the country from the paralyzing influence of monopoly of money and bank credits. He has refused to either compromise or capitulate to a few strong and powerful financiers or banking interests who slowly surrender the privilege hitherto enjoyed of despolling the many for their enrichment. In this conflict he has been sustained by the Democratic Members of the House and Senate. The day of his and our triumph is fast approaching. The time for the passage of this bill may be delayed, but not defeated. Before many weeks have passed this country will have witnessed the passage of this measure with all its great reforms and benefits. The country will receive with acclaim a Democratic President and a Democratic House of Representatives and a Democratic Senate who have the courage and the constancy to fulfill their promises and to enact this measure, and thus enable the agricultural, commercial, manufacturing, and legitimate banking interests of this country to be freed from selfish and sinister domination, and thus permit this mighty Republic to advance rapidly and continuously along the pathways of progress, prosperity, and equal opportunity.

During the delivery of Mr. Swanson's speech,
Mr. WEEKS (at 11 o'clock and 7 minutes a. m.).

dent, I dislike to interrupt the Senator from Virginia, but I am going to make the point of no quorum, and I want to state to

the Senate why I am going to do it.

An order has been adopted that we shall meet at 10 in the morning and continue, with an interruption for dinner, until 11 o'clock at night, presumably for the purpose of hastening this legislation. No one is more anxious than I that the legislation shall be passed at the earliest possible moment, but there is not any use in devoting any time to its consideration unless Senators are going to give it consideration. Here is a Senator making a carefully prepared, deliberately considered speech on this subject which has in it information. If the Senate wishes in-formation it should be here to hear him, because we all know we have not the time to go over the Record and read what Senators have said the day before.

It is the business of the majority under these circumstances to maintain a quorum in this body. Ten minutes after the call

was made for a quorum on the convening of the Senate to-day there were 12 Democratic Senators on the floor and 19 Republicans. At 10.50 there were 12 Democrats on the floor and 11 Republicans. At 11 o'clock there were 10 Democrats on the floor and 11 Republicans. At no time when I have happened to count the majority

Mr. SWANSON. Mr. President, I do not yield for a speech. The Senator has a perfect right to ask for a quorum, but I do

not yield in my remarks for a speech.

Mr. WEEKS. Will the Senator pardon me half a minute? I am about through. I want to give definite reasons for this, and I am not going to do it again.

Mr. SWANSON. The Senator has a perfect right to insist on a quorum. I will yield for a minute more, though.

Mr. WEEKS. I make the point of no quorum, and later I will explain my reasons a little more in detail.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Bacon	Hugues	rage	10000
Borah	Johnson	Perkins	Stephenson
Brady	Jones	Poindexter	Sterling
Brandegee	Kern	Pomerene	Stone
Bristow	La Follette	Ransdell	Swanson
Bryan	Lane	Reed	Thomas
Burleigh	Lea	Robinson	Thompson
Chamberlain	Lewis	Root	Thornton
Chilton	McCumber	Shafroth	Tillman
Clapp	Martin, Va.	Sheppard	Townsend
Clark, Wyo.	Martine, N. J.	Sherman	Walsh
Cummins	Nelson	Shively	Warren
Dillingham	Newlands	Smith, Ga.	Weeks
Fletcher	O'Gorman	Smith, Mich.	Williams
Hallie	Owen	Smith S.C.	

Mr. HOLLIS. I desire to announce that the Senator from Kentucky [Mr. James] has been called to one of the departments suddenly on important business, and also that the junior Senator from Delaware [Mr. SAULSBURY] is absent on impor-

The VICE PRESIDENT. Fifty-nine Senators have answered to the roll call. There is a quorum present. The Senator from Virginia will proceed.

Mr. SWANSON resumed his speech. The VICE PRESIDENT (at 12 o'clock m.). The Chair lays before the Senate the unfinished business, the morning hour having expired. It will be stated.

The Secretary. A bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United

States, and for other purposes.

The VICE PRESIDENT. The Senator from Virginia will

proceed.

After the conclusion of Mr. Swanson's speech, Mr. O'GORMAN. Mr. President, may I now ask the Senator

from Virginia a question?

The PRESIDING OFFICER (Mr. Lea in the chair). the Senator from Virginia yield to the Senator from New York?

Mr. SWANSON. I shall be very glad to yield to the Senator

from New York.

Mr. O'GORMAN. Did I understand the Senator to say that during the latter part of 1907 the banks in New York held the reserves of the country banks and refused to pay them, and that

in consequence a panic was precipitated?

Mr. SWANSON. I stated specifically that the New York City banks owed the country banks, I think, over \$400,000,000 nearly \$410,000,000, to state the figures with more accuracy—by the reports of August 22 of that year.

Mr. O'GORMAN. May I ask the Senator where he obtained that information?

Mr. SWANSON. I obtained it from the report of the Comptroller of the Currency made at that time.

Mr. O'GORMAN. It is possible that the Senator has made a mistake in his statement.

Mr. SWANSON. I think not.

Mr. O'GORMAN. Well, Mr. President, if the Senator had the advantage of the testimony taken before the Senate Committee on Banking and Currency for a period of three weeks, I am sure he would not make that statement. I know of no public question about which more misinformation abounds in this country than about the banking and currency problem. Much of the inaccuracy indulged in from time to time respecting this problem is based on ignorance, and at times it is based upon a desire to aid in disseminating information that thoughtful persons know to lack real foundation.

I desire to call the attention of the Senator from Virginia to the testimony of one or two of the country bankers who testified before the Senate Committee on Banking and Currency, and country. It has not been disputed by the Senator from New

their testimony reflects the testimony given by almost every

country banker who was interrogated on the subject.

Mr. George W. Rogers, president of the Bank of Commerce. of Little Kock, Ark., whose testimony will be found on page 2254 of the hearing, made this statement. The Senator from Ohio [Mr. Pomerene] asked the question:

Did you have any trouble in 1907?

Mr. ROGERS. No, sir; in 1907 I borrowed all the money I wanted to. Fortunately, I was paying off discounts instead of borrowing at the time. But I received from the banks of New York that I did business with cash at par to an amount three times the amount of my balance at the time they put the lid on.

Mr. SWANSON. Now, Mr. President—— Mr. O'GORMAN. The Senator will pardon me until I conclude this statement.

Mr. Francis W. Foote, the vice president of the First National Bank of Hattiesburg, Miss., the second largest bank in the State, testified as follows:

Senator Weeks, Mr. Foote, do you think the New York banks did the best they could to take care of their customers during the panic of 1907?

Mr. Foote. I certainly do; and I feel that we owe them a debt of gratitude which we can never repay. I will never forget the kind treatment they accorded us. We owed one New York bank \$145,000, and our balances averaged almost that amount. I was in New York during the panie, and we had \$90,000 to our credit and owed them \$145,000—all of which was payable on demand. They told us they would loan us more money in the way of credits, but they could not give us cash; but that if we could check on them and satisfy our correspondents they would let us have \$100,000 more money.

And continuing he states:

They know more about the banking business of this country than any other class of bankers. You will go to New York and be treated with more consideration by a New York banker than any other class of city bankers we have. He knows more about your community, more about your assets and your liabilities and what you can do than any other class of men we have. They are more in touch with the situation than any other bankers in this country. I have yet, in the 25 years of my experience, to have any personal knowledge of any unkludness or lack of consideration that a deserving country banker has received at the hands of his New York correspondent.

Speaking, now, of the attitude of New York bankers in the panic of 1907, on page 1530, Mr. Foote stated:

They did not seem to care anything about that. They seemed intent upon saving the situation. I never was impressed more with anything in my life than I was with the absolute loyalty of the bankers of New York City to the country at large.

That is the testimony of a banker in the State of Mississippi. The preceding reference was the testimony of a banker in the State of Arkansas.

Now, I call your attention to the statement of Mr. Alexander Gilbert, the president of the Market and Fulton National Bank, of New York, for 50 years a banker.

This bears upon the attitude of the New York bankers with reference to the rest of the country. He was speaking of the bank balances on September 24 of that year, and he showed from the record that the entire loans made by the New York bankers on that day aggregated \$1,226,000,000, out of which only \$264,000,000 was made to New York bankers, and that almost \$1,000,000,000 were sent out by the bankers of New

York to bankers throughout the country. Much has been said by the Senator from Virginia which will provoke no controversy in this Senate. Fortunately we are approaching the day when we will enact a currency bill which will have the confidence of the country; fortunately the 12 members of the Banking and Currency Committee were practically a unit on the vital features of this legislation; they all recognize the need of improving our methods respecting the mobilization of reserves and of providing elastic currency, and where the members of the committee disagreed, they disagreed only with respect to matters of detail; but when the Senator from Virginia, prefacing his reference to this proposed legislation, indulges in what I conceive to be unwarranted, inaccurate, and unfair criticism of the city of New York, he does himself an injustice, and he does an injustice to his own constituency if he thinks he reflects their views. I very much doubt whether he reflects their views, because the people of Virginia are an intelligent electorate; they know the merits of this and other great questions; they are not going to be misled by the thoughtless vaporing of populistic doctrine, whether they hear it from the housetops, or even though it may penetrate the Senate Chamber.

Mr. SWANSON. Mr. President, I have listened to the Senator from New York [Mr. O'GORMAN]. I have before me a summary made from the report of the Comptroller of the Currency of August 22, 1907, just prior to the panic, when the banks were called on for their reports, which shows that the banks of New York owed the national banks \$213,000,000, and that they owed the State banks \$196,000,000, making \$400,000,000 of money on deposit in New York on that date due other banks in the

York that on October 31 the banks in New York telegraphed and refused to make payments to the interior banks. At that time the banks of Richmond had due them-I had an estimate made at the time-between \$2,000,000 and \$3,000,000 from New York, and they could not get any money. There were not bankers in any of the cities of this country at that time who did not have money due them in New York. The New York banks suspended payment; they did not send out any money; and it was absolutely impossible to get shipments of currency. The position I take is that they suspended the payment of currency when they had \$224,000,000 in their reserves. The Bank of England had only \$120,000,000, but the Bank of England did not suspend payment, but it continued to make payments. The banks of New York could have continued the shipment of currency to make payments to the interior banks and not have precipitated a suspension of payments. They either got scared too quickly or else their action had a sinister motive in it. I have stated in this matter nothing but facts derived from the reports made by the banks themselves.

It is impossible for me to determine how individuals may have been treated by the banks. All that I know is that the large part of the reserves of the country in 1907 were locked up; all that I know is that the interior banks of the country that had deposits in New York in 1907 for two or three months were unable to obtain currency, and that they had to suspend because they could not get the currency to which they were entitled which was on deposit in New York.

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Vir-

ginia yield to the Senator from Kansas?

Mr. SWANSON. I do.

Mr. BRISTOW. Apropos to the discussion between the Senator from New York [Mr. O'GORMAN] and the Senator from Virginia [Mr. Swanson] in regard to the banks of Virginia and New York and their relation in 1907, I should like to read a letter which I received from Mr. A. W. Wallace, of the National Bank of Fredericksburg, Va., under date of September 23, as it relates to this subject. He says:

I see you ask to hear from country bankers on currency; so I submit the following: My father, brother, and self have controlled the above bank for about 100 years. First, there is no need to bring up haste. If we are to have 12 large breakwaters to impede the free and natural circulation of money, the stock should be subscribed to voluntarily, etc., and all the people who wish to subscribe should have an opportunity.

\* \* Deposits should be induced, and the Government and depositors put on the same footing, interest paid in proportion to the amount of deposit, if interest is paid at all. My bank pays no interest for taking care of people's money. The banks should be controlled by the owners of the stock.

Money goes where it is needed, regardless of banks. If New York could lock up all the money for a month, New York would starve. This bank in the panic of 1907 sold New York currency at 105 every week.

Mr. WEEKS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from Massachusetts?

Mr. WEEKS. I will wait until the Senator concludes.

Mr. SWANSON. In reply to the Senator from New York [Mr. O'GORMAN], I will state that the figures which I have given in my address to the Senate were compiled from reports of the Comptroller of the Currency. They show a condition of affairs which has impressed this country ever since, and that is the necessity of having the bank reserves of the country put in banks where there is a public responsibility for their proper

Mr. O'GORMAN. Mr. President—
The PRESIDING OFFICER. Does the Senator from Virginia

yield to the Senator from New York?

Mr. SWANSON. I will in a moment. The figures also show beyond dispute or contravention that the deposits of the interior banks were held in New York, and that in the time of the panic the interior banks could not get their deposits. That is not

Mr. President-

The PRESIDING OFFICER. Does the Senator from Virginia yield, and to whom?

Mr. SWANSON. I yield to the Senator from New York, who first asked recognition.

Mr. O'GORMAN. I simply want to ask a question. understand the Senator from Virginia to say that the banks of the city of New York had \$400,000,000 of the reserves of the country banks and withheld those deposits?

Mr. SWANSON. On August 22, 1907, according to the report made just before the panic—another one was made in December, or some other time during the panic—the New York banks had \$410,000,000 on deposit due to national banks and State banks outside of New York,

Mr. O'GORMAN. Has the Senator the record of the loans made by the New York City banks to the country banks at the same time?

Mr. SWANSON. I have not. Mr. O'GORMAN. The Senator would find—and it is a fact, and not a matter of opinion-that the loans, accommodations, and credits made by the New York City banks at that time to the banks of the country exceeded the amount of reserves on deposit in the New York City banks by the country banks.

I am satisfied that it will show exactly the Mr. SWANSON. reverse. I should like to ask the Senator this question: What right has a reserve bank to take the money put on deposit with it by another bank, lean it out, and then suspend payment and refuse to pay the deposits of the banks in the interior, which were forced to suspension throughout the entire country? recall that at that time the banks of the city of Richmond had between two and three million dollars on deposit in the banks of New York and that the banks of New York would not furnish the Richmond banks any currency. I came here at that time to see the Comptroller of the Currency and the Secretary of the Treasury, at the suggestion of a committee of bankers of Richmond, but instead of giving us the money we ought to have, they were withdrawing the internal-revenue deposits from Richmond and sending them to New York.

Mr. O'GORMAN. Mr. President, I can only remark at this time that I very much regret that when the junior Senator from Virginia was preparing his exhaustive treatise on the subject of banking and currency, with some incidental references to the pending legislation, he did not read the testimony taken before our committee for three or four weeks, which would demonstrate that the statement contained in his initial address was without foundation in fact; that it was misleading; and that it did not correctly state the conditions that prevailed in 1907; and his statement is in part refuted by the very letter just read by the Senator from Kansas [Mr. Bristow] from one

of the constituents of the Senator from Virginia.

Mr. SWANSON. Mr. President, it is exactly the reverse of what the Senator from New York states. He endeavors to get some isolated evidence of witnesses here and there to controvert the reports made by the banks themselves. I have given no opinion of my own; I have simply taken facts that can not be disputed and shown how the reserves in 1907 were utilized. I have shown that the reserves should be taken from the great reserve centers and put in Federal reserve banks to be used entirely for the public good, as provided in the currency bill here proposed.

Mr. WEEKS.

Mr. WEEKS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Vir-

ginia yield to the Senator from Massachusetts?

Mr. SWANSON. I will yield to the Senator in a moment. should like to say, further, that a profound impression was produced in the country when the suspension originated in New York in 1907. All the Senator will have to do to get the facts will be to read the reports of the Monetary Commission, which investigated this matter. He will find the same facts and same statements therein contained. Now, I yield to the Senator from Massachusetts.

Mr. WEEKS. Mr. President, I wish to call this fact to the attention of the Senator from Virginia. When the panic of 1907 broke at the end of October, in round numbers the New York national banks had deposits of \$1,200,000,000, and of those the deposits of all banks, including savings banks, were about \$525,000,000. I am stating this from memory. It is required by the law—for which Congress is responsible and not the national banks-that the reserve city national banks shall keep 25 per cent of their deposits in their vaults in cash. Therefore it was necessary that they should have \$300,000,000 in their own vaults. The statements show that the New York national banks at that time had the reserves required by the law enacted by Congress. What happened? As soon as the panic came on the country banks and others commenced to withdraw their deposits; and the Senator is complaining because the New York banks stopped paying when they had gotten down to \$224,000,000 of reserves, which was not 25 per cent of their deposits or anything like 25 per cent of them.

Mr. SWANSON. The Senator makes-

Mr. WEEKS. Just a moment. As a matter of fact, every New York national bank was breaking the law when they suspended as they did. Now, I ask the Senator if it is fair to criticize the banks for stopping at some point when they knew that they were breaking the law which we had deliberately imposed upon them?

Mr. SWANSON. I will answer very frankly that the datement of the Senator is correct. They had \$224,000,000 in their reserves, which was somewhat less than their reserve require-

ments, but the law does not prohibit a bank from paying a depositor in order to keep up its reserves, although it can not loan money when the reserves are less than 25 per cent. The reserves are kept to make payments to depositors and not to make loans. As I understand the law, it is the duty of a bank to contract its loans, if necessary, in order to pay its depositors their money. The complaint I make of the New York banks their money. The complaint I make of the New York banks is that they did not contract their loans sufficiently to pay the

interior banks their deposits.

Mr. WEEKS. Mr. President, the Senator is wrong about that. A bank has no right to reduce its reserves below the legal requirements of the law; and if it does reduce its reserves below that requirement, the comptroller may order it to cease loaning until its reserve is made good. The reports that have been made about the New York banks have been very largely exaggerated. Let me give the Senator an instance of a statement made to me when I returned to Washington in December of that year. A representative from a large and representative southern city told me that the banks of his locality had been unable to get any currency from New York, and he went on to tell me just what had happened-how the New York banks had refused to give them currency, and had finally said that it could be purchased at a premium of 2 or 21 per cent. The next time I went to New York I went into the bank which was the correspondent of that particular southern bank, and I found that its average deposits, we will say, were \$300,000, and that during the time from the 28th day of October until the 5th day of December the New York correspondent of that southern bank had sent it more currency than its average deposits in the New York bank. The only basis for the statement that it had refused to send any more was a telegram from the southern bank asking at what premium they would be able to purchase more currency if they needed it, recognizing the fact that they had received all they were entitled to. That was the kind of statement made by the country banks everywhere. When the Comptroller of the Currency called for a bank statement in December, it was clearly demonstrated that the country banks had very much more than their required reserves, and that all the reserve city banks had very much less, which in time completely demonstrated the fact that the country banks had been calling home deposits which they did not require.

Mr. SWANSON. The bank statements showed that the coun-

try banks had contracted their loans \$83,000,000, and that during that time, when the country banks were contracting their loans, loans had been expanded in New York by \$64,000,000 and contracted in the rest of the country by \$83,000,000.

Mr. WEEKS. The Senator is very much mistaken about that; but if he were correct about it, he would be making an argument for just exactly what we want as the result of this proposed legislation. Every other nation in the world, when a panic is impending, increases its loans, while we restrict credit.

Mr. SWANSON. Loans should never be increased to the detriment of depositors. The depositors are entitled to a higher consideration from the banks than people who want to loan The banks of the entire country were embarrassed because they could not get their currency from New York. As to whether or not New York was frightened and suspended too early is a question of debate; but I know that at the time I was governor of Virginia the banks of Richmond appointed a committee, of which I was one, and we came in to see the Secretary of the Treasury and the Comptroller of the Currency. That committee made an estimate at the time they came here of the amount owed to the banks in the city of Richmond by the national banks in New York, which showed that the amount was between two and three million dollars, for which they could not get any currency.

Mr. WEEKS. What I want particularly to point out is that

this is not the time to complain of what the New York banks did or did not do at that time. Everybody admits that we ought to change the system; that we ought to make our reserves more mobile and put them where they will be available in case of necessity. I believe that the New York bankers did every-thing they could under those conditions; there may be an honest difference of opinion on that subject, but let us not do an injustice to a set of bankers simply for the sake of bolstering an excuse for legislation when that injustice is not necessary to

find reasons for it.

Mr. SWANSON. Mr. President, I have done no bankers, I have done no city, I have done no Senator an injustice, unless to point out the facts disclosed in the report of the Comptroller

of the Currency is an injustice.

The point I make, Mr. President, is this: Most of the reserves in the panic of 1907 were in New York City. Whether it was done intentionally, whether it was done unwisely, or how it was done, we know, at least, that the system broke down in 1907.

Mr. WEEKS. And always has done under such circumstances.

Mr. SWANSON. And always has done so. We know there is a concentration there, and we know that there is an imperfect responsibility on the part of the great banks of New York as to how they shall use the reserves. I use 1907 as an illustration to show that it is unwise to continue a system that will concentrate all the reserves of this country in the New York City banks. I have shown that at that time they failed to respond or to measure up to what was necessary in order for the reserves of the country to be properly utilized. I used that as an argument to show that the Federal reserve banks as designed by this measure constitute the proper remedy.

Mr. O'GORMAN. Mr. President-

The VICE PRESIDENT. Does the Senator from Virginia yield to the Senator from New York?

Mr. SWANSON. I do. Mr. O'GORMAN. I simply want to call attention to the fact, which the Senator from Virginia will recognize, that the reserves of the country banks, so called, were not confined to New York City, but that they were deposited in Chicago; they were

deposited in St. Louis.

The suggestion was made earlier to-day that in the 47 reserve cities, not to speak of the central reserve cities, all these deposits were absorbed by New York City, when the truth is that all the reserves going to New York City went voluntarily from the country banks, because they could get, either in New York City or in Chicago or in St. Louis, an interest rate on reserve money that they could not get elsewhere. The bankers in New York City to-day who were before our committee expressed their pleasure at the prospect of the passage of a bill which will relieve them from using the reserves of the country, because when they receive in New York City these reserves from country banks they have to use them on call loans, in order to get some return for what they are distributing among the country bankers throughout the country.

Mr. REED and Mr. WEEKS addressed the Chair. The PRESIDING OFFICER (Mr. Lea in the chair). Does the Senator from Virginia yield, and to whom?

Mr. SWANSON. I yield to the Senator from Missouri.

Mr. REED. I simply want to put in one fact. I have no interest in this controversy, except that accuracy may be adhered to.

The Senator made several times the statement about all the reserves of the country being in New York City. I happen to have before me the report of the comptroller for May 20, 1907. The reserves required on that day for New York City were \$216,583,244; for Chicago, \$65,376,731; for St. Louis, \$28,-445,794—a total for the central reserve cities of \$310,405,770.91.

In addition to the central reserve cities there were 47 reserve cities which held the reserves of country banks in the same manner that the central reserve cities held the reserves of country banks or the reserves of reserve cities. I find that in those 47 cities there were required reserves of \$356,349,-238.53. There were total reserve requirements in the country, counting the central reserve cities and the reserve cities, of \$666,755,009.44, of which New York was required to have \$216,583,000. I drop the odd figures.

So instead of all the reserves being kept in New York, as the Senator stated—and I presume he meant only to generalize—less than one-third of the reserves were in New York

City.

Mr. SWANSON. The Senator means of all the banks?

Mr. REED. Of all the banks of the reserve and central reserve cities. The Senator, I know, perhaps did not mean to employ more than a figure of speech, but it might very well be misconstrued.

Mr. SWANSON. Mr. President, about two-thirds of the reserves of the central reserve cities are usually in the banks of the city of New York.

Mr. REED. Mr. President, the Senator certainly-

Mr. SWANSON. My address, to which the Senator did not do me the honor to listen, I think, states how these reserves are distributed. If I said that all the reserves of the country were in New York City, if I used language so broad as that, of course it could not cover all of them. As the Senator states, about two-thirds of all the central reserves are there. A bank is required to keep 6 per cent of its reserves in its own vaults. In the case of a reserve city bank it is required to keep 121 per cent in its own vaults.

Mr. REED. The Senator is in error again. I did not say

these were all the reserves of the country; I said the reserves of the reserve cities and central reserve cities, which of course expressly excludes the 6 per cent the Senator is now talking

about, which is held by every country bank.

I did do the Senator the honor, if he calls it an honor, of listening as long as it was possible for me to remain; and I have been out of the room only about 10 or 15 minutes.

Mr. WEEKS, Mr. President— The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from Massachusetts?

Mr. SWANSON. I yield to the Senator. Mr. WEEKS. There is one other suggestion I wish to make to the Senator from Virginia on this particular subject.

Banks, ordinarily, deposit with their reserve agents not cur-ency but credits. When they are having trouble at home, as rency but credits. When they are having trouble at home, as they did in 1907, they do not ask for the return of their credits, but they ask for currency. If at that time the New York banks had been called on by their individual and bank depositors for 25 per cent of their deposits, I should like to ask the Senator from Virginia what they would have done? It would have taken every dollar they had in their own vaults, and they had at that time the legal reserve required by law. How were they going to recoup themselves? Is not that exactly what we are trying to do in this legislation—to arrange a plan which will enable banks, under such conditions, to recoup themselves, to get gold, to increase their reserve deposits?

Mr. SWANSON. Mr. President, in reply to the Senator from

Massachusetts, I will say that the contention we had with the New York banks was that they had the reserves of the interior banks on deposit, and they were entitled to have this money sent to them. The report of banks made to the Comptroller of the Currency during the panic, I think, shows that in order to get up their reserves the country banks were compelled to contract loans to the extent of \$83,000,000. Contraction went on in the case of the country banks; but during the very time when the country banks could not get money on their deposits, New York

expanded her loans to \$60,000,000 or \$64,000,000.

My contention is that New York ought to have continued to pay to the country banks out of these reserves until they were finally depleted rather than to have suspended. My under-standing of the law is that it does not require you to refuse to pay a depositor when your reserve gets down to 25 per cent; but the Comptroller of the Currency can prohibit the bank making further loans after the reserve gets down to 25 per

I do not understand the law to say that the minute your reserves have fallen to 25 per cent you can not pay out any money over your counter. It is the duty of a bank then to contract its loans and increase its reserves so that it can pay its depositors. I think that fund is there for the purpose of paying I think the country banks should have had a part of that \$224,000,000, instead of its being all locked up.

Mr. WEEKS. I think the Senator from Virginia is wrong in some of his figures. I shall take the pains to look them up, in order to indicate to him in what respect he has drawn a wrong conclusion. I have not in my mind the definite figures, so I can not repeat them at this time. I think he is also wrong about the reserves required. We do require that certain reserves shall be kept, and if failure to do so is called to the attention of the comptroller, and by him called to the attention of the banker, he forbids the banker making any more loans until his reserve is brought up to the requirement.

I ask the Senator again, What would have happened in New York if all the depositors in New York banks had gone into the banks and drawn 25 per cent of their deposits? It would have taken out of their vaults every dollar of money the New

York banks had.

Mr. SWANSON. There was no demand at that time sufficient to imperil the situation if the New York banks had paid out to depositors less than the 25 per cent reserve, which, as I understand, is limited by the law to loans. I understand that the reserve is kept there for the purpose of paying depositors. I am satisfied that the banks of New York got scared entirely too quickly.

There was a crisis in England at that time, and, as I understand, the Bank of England had about \$120,000,000 of reserves. The Bank of England continued to make payments. Its reserves were reduced to \$85,000,000 during that crisis, and still it did not suspend payment. As I understand, the reserves in the city of New York were never less than \$215,000,000 during

the entire crisis when payment was suspended.

What I desire to emphasize is the difference between the management of a bank run entirely for the public interest and banks run for private interests. The purpose of my remarks was to show that a bank governed and controlled like the Bank of England, and holding the reserves of the nation, continued payments with half the reserves possessed by the banks of the city of New York, and reduced them down to \$85,000,000, and never suspended; yet the banks in the city of New York

never had less than \$215,000,000 in their reserves during the entire panic and suspended with reserves amounting to practically \$224,000,000.

Mr. WEEKS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Vir-

ginia yield to the Senator from Massachusetts?
Mr. SWANSON. I do.
Mr. WEEKS. I should like to call the Senator's attention to the fact that the laws of England do not require that the Bank of England or any other bank in England shall keep any reserve, while our laws do require it. More than that, how-

Mr. SWANSON. That is true, Mr. President. I pointed out that it is a wise provision in this bill which allows the Federal reserve board to suspend the reserve requirement for 30 days and continue it, if needed, for 15 days more, and I stated that if that had been the condition then it might have been able to handle the emergency in New York. My impression is that New York suspended too quickly, got frightened too quickly, and held there \$224,000,000 that was of no use. It never was reduced but \$9,000,000.

Mr. WEEKS. Mr. President, the Committee on Banking and Currency had before it a large number of bankers during the hearings which we gave in the months of September and October. A great many of them were country bankers. Many of them were from the South and the West. In only a single instance did those bankers give us a syllable of testimony to any other effect than that, in their judgment, the New York banks did everything they could for the country bankers during the period of distress in 1907.

Mr. SWANSON. I think the Senator was on the National Monetary Commission headed by former Senator Aldrich, was

he not?

Mr. WEEKS. I was.

Mr. SWANSON. Most of these figures I gathered from publications emanating from that commission, which had all the facts before it. If the Senator will read the report and publications of the commission, he will find an article by an expert, whose name I forget, transmitted to the Senate by the commission with its approval, giving an account of the crisis commeacing in this country in the winter of 1907, in which all of these figures are compiled; and he will find a synopsis is made of the report of the Comptroller of the Currency giving these figures accurately, clearly, and distinctly.

Mr. WEEKS. I am quite familiar with those figures.

signed the report. The general statement that we ought to change the system is absolutely correct. There is not a Member of this body who does not recognize the fact. What I have drawn attention to, however, or intended to draw attention to, is the fact that, in my judgment, the Senator from Virginia has drawn a wrong and improper conclusion as to what the banks in central reserve cities did at that crisis. I believe they did everything they could, and that they should not be subjected to

criticism because they tried to conform to the law.

Mr. SWANSON. Mr. President, the Senator from Massachusetts can not deny that these banks had made loans until they had reduced their reserves. He can not deny that when these loans were made the banks knew full well that the interior banks of the country had on deposit with them millions of dollars as a part of their reserves. He can not deny that after these loans were made and the interior banks wanted to get currency, so as not to suspend payment all over the country, it was impossible to do so. Money was due them from their correspondents in New York and the central reserve cities. That is not denied. That can not be disputed, from the reports made by the banks themselves. They simply occupied this position: They loaned to their customers in such a way that they could not pay their depositors.

That was my contention. I contended that during the speculation and the great boom that had preceded the panic they had made loans largely in excess of what it was safe to make, and that when the panic came they could not pay their depositors when they wanted to pay them, in the autumn, for their crops of wheat, corn, oats, and other crops. That is a yearly recurring demand in the interior. It comes every autumn to move the crops of wheat, corn, cotton, and tobacco. They expected It was bound to come. It never fails to come. it to come. Yet when the time came to get this money for that purpose it

was not available.

The position I take is that this shows the wisdom of no longer permitting the reserves to be concentrated in money centers. It shows the wisdom of letting these reserves be put, as they are in the Bank of England, in the Bank of France, and as it is purposed under this bill to have them put, in banks where there will be a public responsibility for their use, in

order that they may be available for public good and not for

Mr. O'GORMAN, Mr. WEEKS, and Mr. PAGE addressed

The PRESIDING OFFICER. Does the Senator from Virginia yield, and to whom?

Mr. SWANSON. I yield to the Senator from New York. Mr. O'GORMAN. I simply want to ask one question.

Mr. O'GORMAN. I simply want to ask one question. Did the Senator from Virginia read in the report of the Monetary Commission that all the reserves of the country were located in New York in 1907?

Mr. SWANSON. No; and I have never made that statement. My speech does not show it. My speech shows, and my statements show, that every dollar and cent of reserves due banks amounted to about \$410,000,000 at the time of the August report to the Comptroller of the Currency.

Mr. O'GORMAN. The Senator, however, made no reference to the amount of the reserves of the country that were distributed not only in Chicago and in St. Louis, two of the central reserve cities, but in the 47 other cities which are known as reserve cities, all of which cities show a bank membership holding the reserves of the country amounting to about \$452,000,000.

Mr. SWANSON. And New York holds about two-thirds, Mr. O'GORMAN. One-third, according to the evidence fur-

nished by the Senator from Missouri [Mr. Reed].
Mr. SWANSON. If the Senator will examine the statements, he will find that about two-thirds of the reserves of the three central reserve cities—St. Louis, Chicago, and New York—are usually in the city of New York.

Mr. O'GORMAN. What about the 47 reserve cities?

SWANSON. They are reserve cities for the country They are not congested there. Of course they have Mr. SWANSON. some, but usually a country bank makes its deposits in a reserve city bank. That reserve city bank will keep 12½ per cent of it in its own vaults and send the other 121 per cent to the central reserve city, as the Senator states, because it gets 2 per cent interest on its daily balances there.

Mr. O'GORMAN. Then, as I understand the Senator from Virginia, if he did state in his carefully prepared written address that all the reserves of the country were in New York in 1907, he made an error, when, in fact, only one-third of the reserves were located in the city of New York?

Mr. SWANSON. I did not make that statement in my ad-My address gives a compilation, taken from the report of the Comptroller of the Currency, of statements made by the banks themselves in their reports.

Mr. WEEKS. Mr. President, just one more suggestion to the Senator. He has before him the August report of the Comptroller of the Currency. If he will look, he will find that at that time the New York banks had their legal reserves in their own vaults. Very infrequently do the New York banks vary more than 2 per cent from their legal reserves in either direction. They were as well prepared at that time as banks in central reserve cities ordinarily are to meet the ordinary requirements of the fall months.

I do not think the charge can be properly made against the New York banks that they were not within their legal requirements, and that they had not made the ordinary provision for the requirements of their correspondents during the fall months.

Mr. SWANSON. Now, I should like to ask the Senator a question. New York was the first city to suspend. On October 31, as I understand, the New York banks sent telegrams to their correspondents saying that they would no longer ship currency on the demand of their correspondents. I do not know how much the New York banks had when they suspended; that is not shown; but in August, at the time of the last report made to the Comptroller of the Currency before they suspended, they had from all banks—State, national, and outside banks—about \$410,000,000 on deposit, due the banks. Whose fault was it, if we are going to discuss that matter, that those banks were not able to pay their depositors? If it was occasioned by excessive tions to their customers, by expanded loans, producing speculation and a boom, it was the fault of these banks.

Mr. WEEKS. If they had their legal reserves, what more could you expect of them?

Mr. SWANSON. That is not a wise policy to pursue where you have the reserves of other banks. Then, if the Senator's interpretation of the law is correct, there is hardly any day when you get down to the 25 per cent that an interior bank can get its money, because the Senator construes the law to be that you can not pay a depositor when you have less than 25 per cent of your reserves. I think the law is that they shall pay their depositors whenever a demand is made, regardless of the 25 per cent. That is limited to the loans.

Mr. ROOT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from New York? Mr. SWANSON. I do.

Mr. ROOT. I desire to ask the Senator from Virginia whether the banks of Virginia and other country banks that sent their reserves to the banks in New York did not receive interest upon them?

Mr. SWANSON. They received 2 per cent interest.
Mr. ROOT. They received 2 per cent interest upon those deposits. They expected them, then, to be loaned; did they not?
Mr. SWANSON. They did.

Mr. ROOT. And they knew that when they were loaned if there came a sudden demand from all parts of the country and from all depositors upon the banks they, equally with other deposits, would be subject to the difficulties and embarrassments and limitations arising from this defective system, did they not? They knew that the deposits upon which they were receiving 2 per cent interest would be loaned, and that they could not get them again unless the loans when called They knew that, did they not? were paid.

Mr. SWANSON. They expected the money to be loaned in such a way that it would be available when their urgent demand required it in the fall. That has been the usual course.

Mr. ROOT. How? How did they expect it to be loaned? Mr. SWANSON. They expected that the banks would be sufficiently wise and conservative to make their loans in such a way that this money would be available when demanded. That is considered conservative and legitimate banking.

Mr. ROOT. Did they not know that they were sending their money to the city of New York on 2 per cent interest in the expectation that it would be loaned on call?

Mr. SWANSON. It is usually loaned in that way.

Mr. ROOT. They knew that was the course of business; and they knew, did they not, that their deposits were subject to all the infirmities that accompanied the system of gathering the money of the country in New York to be loaned on call?

Mr. SWANSON. These loans were payable on demand. All the deposits of banks, as I understand, are payable on demand. The banks accepted the loans for this 2 per cent with an understanding with the interior banks that when demanded they would get their money. It is usual to let this money accumulate there in the spring and summer, and the demand is always made for it in the fall. That is the usual course. It is a fall demand. The panic of 1907 was precipitated when the interior banks needed the money for the purposes of crop movements, which were just as certain to come as anything could be certain, and had come from year to year.

Mr. PAGE. Mr. President-

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from Vermont?

Mr. SWANSON. I do. Mr. PAGE. I think that in justice to my New York banker

friends I ought to say a word here.

I think the Senator remembers that along during that panic all the country banks were sending to their correspondent banks in New York City their checks and drafts on every city from Maine to California. Our New York correspondent bank said:

We will receive these checks from you, but we want you to know that when you draw against them you must draw in clearing-house funds. We can not accept the immense amount of checks that are being sent to us from all parts of the country when we know that we can not get cash for them, but must take clearing-house funds, unless in making your deposit you agree to accept clearing-house funds.

It is true that in December, as the Senator stated, there was a large balance to the credit of country banks, but my recollection is that the country banks, in making their deposits all through November, were compelled to say to the New York City banks: "When we draw upon these deposits we will draw in current or clearing-house funds."

If they took the deposits subject to those conditions, I do not see why the Senator has any right to say that those banks were

breaking faith.

Mr. SWANSON. The Senator is entirely correct. If they carried out the conditions under which the deposits were made, there should be and could be no complaint. Deposits that were made in that way were subject to the conditions upon which they were made, and the banks that made such deposits had no

right to demand currency.

Mr. PAGE. I should like to ask the Senator if he does not know that practically all the deposits made in the late fall of

1907 were of that character?

Mr. SWANSON. I do not know what the deposits were. I did not allude to the deposits due to banks after the panic had proceeded. The complaint I made was at the precipitation of the panic, when the reserves, from the last report in August,

amounted to \$410,000,000. The suspension there precipitated a suspension all over the United States. After you had suspended and the banks all over the country began to issue clearing-house certificates, there was nothing else to relieve the situation; but for the first three or four weeks, when it became necessary for the city to determine whether it would or would not suspend, whether it would issue currency or would not issue currency, the condition was very acute all over the

There were but 53 cities that did not suspend payment during Richmond did not suspend. Norfolk, Va., did not suspend. Richmond was about to suspend on account of the conduct of the Secretary of the Treasury. Richmond had due her between two and three million dollars from the banks in The deposits from internal revenue were taken from Richmond and sent to New York. It was only by the most persistent effort that we were enabled even to have the deposits of internal revenue allowed to remain in Richmond.

Mr. PAGE. But does not the Senator know that the deposits which were sent from Richmond to the credit of Richmond banks in New York were depositors' checks drawn on banks

all over the country?

Mr. SWANSON. Of course it is plain that after New York suspended payment and sent all of its correspondents a telegram on October 31 that it would no longer ship currency, all the deposits then were made subject to the fact that they would

not be paid by the shipment of currency.

Mr. PAGE. The fact still remains that the city of New York probably could have paid their depositors the cash at the time of suspension if the currency could have been collected on checks being sent by every country bank to their city correspondent banks in New York; but they could not, and therefore the New York banks were compelled to say to the country banks, "We can not agree that all your deposits may be withdrawn in cash, because we can not get actual cash on the checks you send us. We must therefore decline to receive and credit these checks to your account except to be paid back in current funds, or, as they were called, clearing-house funds."

Now, one word more before I sit down. I do not believe very much in relating personal experiences, but I want to say to the Senator that Vermont was not really very short of money during the panic of 1907. We would hardly have known there was a panic if the papers had not told us there was. I was president of one Vermont bank whose gain in deposits in the panic year 1907-8 was \$486,000. In other words, the deposits exceeded the withdrawals during the year by that sum. During the panic, having a surplus of money, I went down to New York to visit our correspondent bank, the City National Bank, and, walking into the office of the vice president, I said What can you do for us? to him, "I want to place \$50,000. He touched a button and the clerk brought a statement of the bank with which I was connected. He looked at our statement, and, that statement showing we were good, he said, "You can have it." I observed that he mighterpreted my suggestion and I observed that he misinterpreted my suggestion and thought we wished to borrow \$50,000, and it occurred to me that I would pursue the inquiry a little further before I informed him of his mistake. I said, "At what rate?" He replied, "Six per cent." "Six per cent." Money was then being loaned generally to everybody outside at 12, 18, and 20 per cent, and I do not know but 100 per cent. The president of the City National Bank, upon further inquiry, told me they were not loaning a dollar at more than 6 per cent. They were taking care of every one of their correspondent banks at that rate if they believed them worthy.

I simply want to say that when the Senator from Virginia says that the banks were all being run for a selfish end, or for a selfish purpose, I will confess it, because a bank is selfish in taking good care of its correspondents. The banks of New York stood squarely by their correspondent banks, so far as I know. I think I know the same was true in regard to our Boston correspondent bank. I believe if the Senator will ask his banks at Richmond if they were not always paid in current funds, or, as they are called, in clearing-house funds, on demand, they will say that they were, but New York banks would have been compelled to stop business had they taken all the checks that were sent in by the banks of the country or assumed the burden of paying the currency thereon when the checks being sent them for collection could not be collected in currency.
Mr. REED. Mr. President, if the Senator from Virginia will

pardon me, I want to ask him if he thinks that a bank is under any greater obligation to pay to a bank the deposits it has placed with it than it is to pay an ordinary depositor?

Mr. SWANSON. I will say not, except with this difference:

In New York a depositor could get a check from one of these banks to another bank in New York and use it for all purposes on debts due in New York.

Mr. REED. I am not speaking of a failure.

Mr. SWANSON. New York depositors were not embarrassed at all, because they could get checks from the banks and use The only difference was that these New York clearinghouse certificates or bank checks that were given on banks were

not available outside of New York for the purposes of currency.

Mr. REED. That is not the question I am asking. The Senator has spoken of the refusal of the banks to pay to banks the money that the banks had deposited. I take it he did not mean to say that a bank in a reserve city was under any higher obligation to pay to a bank its money than it was to pay an individual depositor his money.

Mr. SWANSON. No; none. Mr. REED. And that is true now of all the banks of the country?

Mr. SWANSON. I think so.

Mr. REED. Now, the Senator has complained that banks of the reserve cities did not pay to the banks the money they demanded, and has said that they ought always to have kept themselves in a position to have paid on demand to the banks the reserves the banks had deposited with them. What I want to ask the Senator is this: Those deposits being of no higher character than the ordinary deposits in a bank, if he were to apply the rule which he has laid down to all deposits, is there a single bank in the world that could meet its demands if everybody demanded the money at one time?

Mr. SWANSON. None could meet it.

Mr. REED. None could meet it. Now, has the Senator read the evidence taken before the committee, and if he has read it, in all fairness does he not think that it is convincing as to the fact that the trouble experienced by the banks of the reserve cities was that the country banks became alarmed and began to withdraw large sums at about the same time; in other words, that there was a bank run upon the banks very similar to the run which sometimes is made by ordinary depositors upon an ordinary bank, and that that is what caused the suspension? Is not the Senator convinced that that is true?

Mr. SWANSON. I am convinced of the fact that the country banks began to get apprehensive that they could not get their reserves when they were needed for crop-moving purposes, and when that apprehension came I have no doubt but what they demanded money more rapidly than the ordinary demands in crop-moving time. We must remember that it was October 31

when suspension came.

Mr. REED. But the shortage had been for months. The

Senator certainly will agree that that was the case.

Mr. SWANSON. My contention is, first, that the loans had been expanded too much in the city of New York, and, second, that when the time came instead of locking up the reserves to the amount of \$224,000,000, which were absolutely useless, they should have continued to ship currency to the country until the reserves were more depleted.

Mr. REED. Would you not say that rule ought to apply to

reserve banks everywhere?

Mr. SWANSON. I say every reserve bank ought to continue to pay its deposits until it gets in a real dangerous condition. Suspension of payments for the entire country is a very dangerous thing. It produced a panic. It reduced business operations. It swept fortunes away.

Mr. REED. We know that.

Mr. SWANSON. The position I take is that they suspended too quickly; that they got frightened too early. They suspended with \$224,000,000 in their vaults. It was never reduced below \$215,000,000 during the entire panic.

Mr. REED. The Senator is very illuminating, but I am trying to get him to this point: The duty of banks to preserve a reserve and to keep a surplus over their reserve was not a duty peculiar to the central reserve cities, but it was an obligation resting upon all reserve city banks to the same extent, was

it not? Now, does not the Senator know that the reserve city banks and the country banks had actually withdrawn their money from the central reserve cities to such an extent that they had a greater reserve on hand in their own vaults at the time of the suspension than they had had for a long time previous to thatmore than the normal, ordinary amount; and does he not know that that very fact is what forced this suspension; in other words, that the banks of the country made a run on the central reserve cities, just like the old lady with a shawl over her head goes down and starts a run or joins in a run against the local bank, and it came to the point that there was not enough currency available to meet these demands at one time, and it was for that reason that the suspension occurred? not the Senator think that is clearly demonstrated by the evidence? I am not defending these banks; I insist upon the

facts; but I do not think the Senator gains anything by assigning a wrong cause. We had better get at the actual cause and then we will be more certain to remedy it.

Mr. SWANSON. My contention was, and what I contend now is, that a large part of the reserves of the country were in New York City, and that suspension in New York City necessarily compelled suspension elsewhere.

Mr. O'GORMAN. Mr. President-

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from New York?

Mr. SWANSON. I refuse to be interrupted.
Mr. O'GORMAN. If the Senator will pardon me, there is a palpable inaccuracy in that last statement which I think the Senator's fairness will incline him to correct.

Mr. SWANSON. What is that? Mr. O'GORMAN. The Senator stated that a large majority of the reserves of the country were locked in the city of New York. As a matter of fact, only one-third of the reserves of the

country were there in 1907.

Mr. SWANSON. I mean that a large majority of the reserves-about two-thirds of the central cities' reserves-are there. It is usually that. My contention for currency reform is that these reserves, whether done unwisely, intentionally, or foolishly, were not available in the panic of 1907, when the crop-moving season came, and the interior banks could not get the money on deposit there. As to whether the banks ought to have paid it or ought not to have paid it is a subject of discussion. My contention is that it was impossible to get it. My contention is that this precipitated a panic all over the United States; a panic disastrous in business, in commerce, in trade, which swept away fortunes. My contention is that because these reserves were not wisely used and were not available the panic was precipitated. It was precipitated at a time most disastrous to the farmer; at a time when his cotton was for sale, when his wheat was for sale, when his corn and his tobacco were for sale. The people who were responsible for the reserves did not handle them wisely.

My contention is that we should give no further opportunity for a repetition of that. My contention is that the reserves should be removed from the centers and put in Federal reserve banks under Government control, where they can be utilized for public good and public purposes in a time of emergency. satisfied the banks of New York City did not handle the situation wisely. It is strange to me that the panic was preceded by such a tremendous boom as antedated it. It evidently had been stimulated by the banks; loans had been higher; stocks were high; every kind of boom was existing in the land. I say that produced a condition which made it impossible for the country banks to get their funds to move the crops. I say the report of the Comptroller of the Currency shows this con-

dition.

Now, as to whether they should have shipped currency longer or not is a question in dispute. My judgment is that they got frightened too quickly. My judgment is that they could have continued to make payments. My judgment is that if they had made payments three or four weeks longer we would not have had the suspension of payments in the United States.

I point to the fact that the Bank of England had \$125,000,000 and did not suspend in an emergency. This is my contention; this is my view; and it is one of the reasons why there is an

urgent need for the passage of this bill.
Mr. BRISTOW. Mr. President—

The PRESIDING OFFICER. The Senator from Kansas has the floor.

Mr. BRISTOW. I want to interrogate the Senator from Virginia, if he will permit me. The Senator says that the banks in the reserve cities should have continued to pay out longer, in his judgment. The law requires them to maintain, does it not, a reserve of 25 per cent, and if they pay out below the reserve and continue to take deposits, if the bank should fail, do not the officers of the bank hold themselves liable to a criminal prosecution?

Mr. SWANSON. My contention is different from that of the Senator from Kansas. My contention is that these reserves were put there for the purpose of paying debts, for the purpose of being utilized in an emergency, for the purpose of paying depositors. My contention is that the loans ought not to be increased when it gets to 25 per cent, and if you pay out more

money you ought to contract your loans.

Mr. BRISTOW. But did I understand the Senator aright as saying that the banks should have continued to pay out longer than they did? When they stopped paying their reserve was below the legal requirement, was it not?

Mr. SWANSON. Yes; that is true. Mr. BRISTOW. It was down to 23 per cent, and the law required 25 per cent. Does the Senator contend that they

should have continued to pay out longer than they did, when in so doing, if a bank failed, every officer held himself liable to be sent to the penitentiary?

Mr. SWANSON. He had made himself liable already, so

far as that was concerned.

Mr. BRISTOW. Does the Senator insist that he should go and make himself still more liable?

Mr. SWANSON. What I would have insisted was that these reserves were intended to meet emergencies, to prevent the suspension of payments, and pay depositors. That is the purpose There was no reason for a 25 per cent reserve requirement, if it was not intended to prevent the extension of loans, to prevent the loaning of money deposited by interior banks further than 25 per cent. When the time comes for contraction, it will come from loans, not by ceasing to pay depositors

Mr. BRISTOW. But if the Senator please I do not disagree with him as to the purpose for which the reserves are impounded, nor do I criticize the law which requires the 25 per cent in the central reserve banks to be maintained, but I understood the Senator to say most positively that these banks of the reserve cities should have continued to pay out regardless of the fact that they were laying themselves liable in so doing.

Mr. SWANSON. I do not think they were violating the

law in paying out.

Mr. BRISTOW. Do I understand the Senator from Virginia to say that he does not think when a bank continues to pay out money when its reserve is below the legal requirement it is not violating the law?

Mr. SWANSON. Not if it pays to depositors. I do not un-

derstand that that is contrary to law.

Mr. PAGE. I think the Senator from Kansas is incorrect in

Mr. BRISTOW. Just a moment.

The PRESIDING OFFICER. Senators will suspend. The Chair is under the impression that the Senator from Kansas has

the floor. Does he yield, and to whom?

Mr. BRISTOW. I am yielding to the Senator from Virginia. Suppose the national banks continued to pay depositors as the Senator suggests, would he then say that they should not receive any deposits during that time?

Mr. SWANSON. I would leave it to the judgment of the

bankers as to whether they would or not.

Mr. BRISTOW. Then, if the banks had declined to receive any deposits and continued to pay out, the conditions would have been worse than that which occurred; the bank would have failed.

Mr. SWANSON. I ask the Senator what he thinks the re-

serves are there for?

Mr. BRISTOW. We are agreed as to what they are there

There is no difference of opinion on that point

Mr. SWANSON. I understand what the Senator then contends is that these reserves are to be locked up, not to be utilized, and that it is contrary to law to use them. My contention is that when the reserve gets below 25 per cent you can not make a loan, and I do not believe the law prevents you from taking that reserve to pay depositors.

Mr. BRISTOW. Now, Mr. President-Mr. ROOT. May I ask a question?

The PRESIDING OFFICER. Does the Senator from Virginia yield to the Senator from New York?

Mr. BRISTOW. I yield to the Senator.

Mr. ROOT. I will ask the Senator from Virginia, no matter when payment should stop or how long it should be made, whether it is not clear that the reserve is for the benefit of all the depositors of the bank? That is clear, is it not? It is not for the benefit of anyone; it is for the protection of all.

Mr. SWANSON. If that is true, then the bank ought to stop payment whenever the demand is made, if it fears some trouble

may come.

Mr. ROOT. Is it not true that 25 per cent of the deposits required by law are intended for the protection of all the depositors of the bank? That is true, is it not?

Mr. SWANSON. There is nothing in the law, as I understand it, that says so.

Mr. ROOT. Does not the Senator from Virginia agree with me that it is so

Mr. SWANSON. I think all the reserves, whether in excess of or below 25 per cent, are held for the benefit of all the depositors

Mr. ROOT. For all the depositors?

Mr. SWANSON. All the resources of the bank are for the benefit of all the depositors. I have yet to find a law-I might be mistaken, I have tried to find it-which says you can not have a deposit when the reserve gets below 25 per cent.

Mr. ROOT. I am not talking about that. I am talking about the object of the reserves. The Senator agrees with me? Mr. SWANSON. I do not agree with that.

Mr. ROOT. That the object of the reserve is to protect the

depositors?

Mr. SWANSON. No; there is another purpose—that any depositor may get his money on demand. The obligation is on the bank to pay depositors on demand, and these reserves are kept there as much for the purpose of fulfilling that obligation as ultimately to provide for the safety of the bank.

Mr. ROOT. Mr. President—
The PRESIDING OFFICER. Does the Senator from Kansas yield further to the Senator from New York?

Mr. BRISTOW. I yield.

Mr. ROOT. I want to finish the subject I am on. Whatever other objects there may have been, the Senator agrees that the reserves of the bank are for the protection of all its depositors.

Mr. OWEN. Distributionally.

Mr. ROOT. Each depositor has the same right as any other to be protected by that reserve. Now, does the Senator from Virginia think that it would be right for a bank to pay out all its bank deposits, of which there were three or four times the amount of its reserves, to one-fourth of its depositors, making no reserve for the protection of the other three-fourths?

Mr. SWANSON. Will the Senator permit me? As I understand the law, when the question of the solvency of a bank arises and there is an uncertainty whether the depositors will be paid, it is the duty of the Comptroller of the Currency to take charge of the bank and distribute its assets equitably, ratably, fairly, and individually. That is the provision, as I understand the national law. But I understand these reserves are held to insure the payment in money, on the demand of the depositors, by the banks as much as for any other purpose.

Mr. ROOT. The Senator does not answer my question. Let

me restate the question.

Mr. SWANSON. I will state to what extent-

Mr. ROOT. The Senator has not answered my question. It is whether the Senator thinks it would be right for a bank to pay out all its reserves to one-fourth of its depositors, leaving the other three-fourths unprotected by any reserve?

Mr. SWANSON. Yes; if it is solvent, it is its duty to pay the money to the man who needs it as expressed by his demand.

Mr. ROOT. The Senator has answered it now.

Mr. SWANSON. The Senator makes a mistake in supposing that the reserves are maintained entirely to take care of the solvency of the bank. The reserves are required in order to have the money available to pay every depositor on demand as much as for any other purpose, and to pay him in money. That is the reason of the reserve, as I understand it.
Mr. POMERENE. Mr. President——

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Ohio?

Mr. BRISTOW. I yield to the Senator from Ohio. I should

have done so sooner.

Mr. POMERENE. Mr. President, we have been discussing here the purpose of the reserves, and it seems to me that we can best determine what that purpose is by reading the statute. Section 5191, or that portion of it which relates specifically to the subject of reserves, reads as follows:

Whenever the lawful money of any association in any of the cities

That is, the central reserve cities named above-

shall be below the amount of 25 per cent of its deposits, and whenever the lawful money of any other association shall be below 15 per cent of its deposits, such association shall not increase its liabilities by making any new loans or discounts otherwise than by discounting or purchasing bills of exchange payable at sight, nor make any dividends of its profits until the required proportion between the aggregate amount of its deposits and its lawful money of the United States has been restored. And the Comptroller of the Currency may notify any association whose lawful-money reserve shall be below the amount above required to be kept on hand to make good such reserve; and if such association shall fall for 30 days thereafter so to make good its reserve of lawful money, the comptroller may, with the concurrence of the Secretary of the Treasury, appoint a receiver to wind up the business of the association, as provided in section 5234.

It is clear that they are required to keep this reserve up to

It is clear that they are required to keep this reserve up to those limitations, and if it falls below those limitations they are prohibited from making any new loans or from paying dividends. Necessarily it must follow that there is no statutory provision, at least in this section of the statute, against the paying off of the depositors. If the reserves fall below these limits, then, I take it, under the provisions of the act the Comptroller of the Currency and the Secretary of the Treasury would have the right to suspend the bank. It is true these reserves are primarily for the benefit of the depositors, and I take it that they would only be prohibited from paying off the depositors when sound business judgment should permit it.

Mr. BRISTOW. The statute is very clear, and I have not any quarrel with it at all, but the Senator from Ohio knows that if a bank continues to pay out its money until it has not any left the Comptroller closes the bank, and the bank, to use the common term, is broken.

Now, according to the contention of the Senator from Virginia, it was the business of these reserve banks to keep on paying it. I have known cases where they receive deposits right along until the money is gone, because they are paying out more than they are receiving, and then the officers are arrested and criminally prosecuted for receiving the money when they knew the bank was in a failing condition. The Senator from Virginia would insist, from the remarks he has made here to-day, upon the reserve bank following that policy.

Mr. POMERENE. Mr. President—
The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Ohio?

Mr. BRISTOW. I do.
Mr. POMERENE. I do not think that my learned friend
from Kansas can point to any provision of the law which makes it a criminal offense for a banker to pay out money on deposit simply because the reserves have fallen below the legal requirement.

Mr. BRISTOW. No; I have not stated that.
Mr. POMERENE. On the other hand, it is not a criminal offense to receive deposits when the reserves are below the legal limit. The reserves may be below the legal limit and yet the bank be entirely solvent. If the bank were insolvent and moneys were received, then there might be a question of liability, either civil or criminal, depending upon the acts in each particular case, and it must follow that if a bank-

#### RAILROADS IN ALASKA.

The VICE PRESIDENT. If the Senator will kindly suspend for a moment, the hour of 2 o'clock having arrived, the Chair has concluded to rule upon the parliamentary question submitted this morning.

The Chair thinks it is hardly possible that a parliamentary situation can arise that is not capable of solution. After reading the Record of September 15, the Chair is of the opinion that from the Record it may fairly be construed that the Senate at that time made Senate bill 48 a special order for 2 o'clock p. m. to-day.

A special order can not interrupt the unfinished business. The Chair is clearly of the opinion that the unfinished business arises from the rules of the Senate and not from the requests of Senators to make a particular measure the unfinished busi-

ness. The Chair is therefore going to rule-

Mr. POINDEXTER. Before the Chair rules, Mr. President, if the Chair will permit me, I should like to call the attention of the Chair, unless the Chair has decided the matter beyond reconsideration, to the forms which have been followed in a multitude of cases for making unfinished business by unanimous consent.

The VICE PRESIDENT. If there is a form in the Book of Precedents it was not prepared and made by the Senate. There is no precedent which the Chair has been able to find where the presiding officer of the Senate has ever ruled that the Senate could make anything unfinished business before it had been taken up as original business.

The Chair is going to rule that Senate bill 48 was made a special order for 2 o'clock p. m. for to-day, but that it can not be taken up while there is unfinished business before the Senate.

The Chair is further going to rule that it does not lose its precedence as a special order at 2 o'clock p. m., but will come up for consideration by the Senate at 2 o'clock p. m. on the day when the present unfinished business has been concluded, unless some other unfinished business should interpose; in other words, that this bill remains a special order until taken up. If that is not to be the sense of the Senate and is not to be acquiesced in hereafter, the Chair requests that an appeal be

taken from the decision of the Chair to the Senate.

Mr. WALSH. Mr. President, I think the parliamentary situation into which we have been precipitated can be readily solved, because there apparently is no division of opinion in respect to what ought to be done in regard to the matter.

The VICE PRESIDENT. Does the Senator from Montana

appeal from the ruling of the Chair?

Mr. WALSH. I do not; I acquiesce entirely in the ruling of the Chair; but I desire, if the Chair please, to ask unanimous consent that the unanimous consent heretofore entered into be vacated, and that in lieu thereof the unanimous consent which I send to the desk, in accordance with the form, be entered into.

Mr. BRANDEGEE. Before the request is read, if the Sena-

tor from Montana will pardon me for the suggestion, I wish to

say that the request is a little different from the ruling of the Chair. It goes into other business. The Chair asked as to his ruling, whether there was an appeal therefrom. I do not wish to appeal, but I want to make an inquiry of the Chair in connection with the ruling. Personally, I think the Chair is correct in ruling that this matter goes as a special order to come up at 2 o'clock on the day when the currency bill is out of the way, but I understood the Chair to say that it would continue to come up from day to day at 2 o'clock thereafter. It was upon that point that I wanted information.

The VICE PRESIDENT. No; from now on the Alaska railroad bill will come up from day to day, but it will not take the place of the currency bill, which is the unfinished business; in other words, there is no difference between the Senator from Connecticut and the Chair, that the Alaskan bill is simply held in abeyance until the currency bill is out of the way as the unfinished business, and upon whatever day succeeding, when the currency bill is out of the way, it will then become

the special order at 2 o'clock.

Mr. BRANDEGEE. It may be of no interest to anybody, but my opinion is that the bill would not necessarily come up from day to day and be laid before the Senate as a matter of

The VICE PRESIDENT. It will not be laid before the

Senate from day to day.

Mr. SUTHERLAND. Mr. President, I do not quite understand one phase of the ruling of the Chair. I quite agree with the ruling of the Chair that the effect of this unanimous-consent agreement is to make the Alaska bill a special order for 2 As I understand the rule, when the hour arrives at which the order is to be taken up if there be unfinished business before the Senate, the special order can not be considered. Then, is it not true that that order goes to the Calendar of Special Orders, and that it will simply come up after the unfinished business has been disposed of at the conclusion of the morning hour upon any day after that time? Rule IX pro-

Immediately after the consideration of cases not objected to upon the calendar is completed, and not later than 2 o'clock—

That would mean not later than two hours after the Senate had convened-

if there shall be no special orders for that time, the Calendar of General Orders shall be taken up and proceeded with in its order.

I would understand from that that the special order would go to the Calendar of Special Orders, and that any day thereafter, after the unfinished business had been disposed of, it would come up, having precedence over any bill upon the general calendar.

Mr. SMOOT. Mr. President, my colleague [Mr. Sutherland] has stated the case just as I was going to state it. I fully agree with the ruling of the Chair, but I also believe that on the ruling of the Chair the bill goes now to the Calendar of Special Orders, and immediately upon the conclusion of the unfinished business the bill automatically on the following day comes before the Senate. I do not know in what better shape the bill could be than that, and I believe that that would be in accordance with Rule X of the Senate.

The VICE PRESIDENT. The order proposed by the Senator

from Montana [Mr. WALSH] will now be stated.

The Secretary, Mr. Walsh asks unanimous consent that on Monday, January 19, 1914, immediately upon the conclusion of the routine business, the Senate will proceed to the consideration of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the bill (S. 40) to a the later of the later of the bill (S. 40) to a the later of the tion of the bill (8, 48) to authorize the President to locate, construct, and operate railroads in the Territory of Alaska, and for other purposes; that such consideration shall continue to the exclusion of all other business, save only routine morning business, and that before adjournment on the legislative day of Saturday, January 24, 1914, the Senate will vote upon any amendment that may be pending, any amendments that may be offered, and upon the bill through the regular parliamentary stages to its final disposition.

The VICE PRESIDENT. Is there objection to the request? Mr. ASHURST. Mr. President, I think the ruling of the Chair is not only correct but is judicious and wise. I trust that so soon as the currency bill shall have passed the Senate we will immediately proceed to the consideration of the bill providing for the construction of railroads in Alaska. The bill has been favorably reported by the Committee on Territories and has for its purpose the location, construction, equipment, and operation by the United States of railroads in the Territory of Alaska.

The public domain in Alaska comprises over 350,000,000 acres, containing much mineral wealth, and whoever controls transportation in that Territory will control the coal and other coarser minerals. In continental United States such natural resources as timber, iron, and hard coal, formerly belonging to

the public, are now largely in the hands of monopolistic concerns; and the construction of railways in Alaska by the Government will tend to prevent monopolization there of these natural resources. In Alaska transportation will become the basis of control. Transportation is the key to that vast Territory of treasure, and just as the United States built, owns, and operates its railroad on the Isthmus of Panama in order to protect its own interests and the interests of shippers, the conditions in Alaska require that the Federal Government should construct, own, and operate the railroads, docks, and steamship lines in Alaska.

If Congress will pass the bill providing for the construction of this railroad by the Government, and the railroad is then constructed from tidewater to the interior, coal may be loaded into Government trains and transported to the coast without the intervention of a syndicate of wealthy men who desire to exploit that Territory. All the naval coal on lands belonging to our Government is in Alaska, and we should not delay a moment in proceeding to authorize the construction and operation of this railroad.

The Federal Government from 1850 to 1912 made extensive land grants to aid various railroad companies, and the Government also otherwise aided in the construction of 16,239 miles of railroad. Surely if the Government could and did so materially aid these railroad corporations in the construction of 16,239 miles of railroad, there is no reason in economics and justice why the Government should not proceed to construct a few railroads for itself.

The United States Government is fully authorized by the Constitution of the United States to adopt a policy of public ownership as a necessary means for carrying into effect any power conferred upon it by the Constitution.

Congress has full power to enact the legislation proposed in

the bill as reported. Section 8 of Article I of the Constitution

provides that-

The Congress shall have power \* \* \* to provide for the common defense and general welfare \* \* \*; to borrow money on the credit of the United States \* \* \*; to regulate commerce among the several States \* \* \*; to establish post offices and post roads \* \* \* \*; to raise and support armies \* \* \*; to provide and maintain a Navy \* \* \*; to exercise authority over all places purchased \* \* \*; for the erection of forts, magazines, arsenals, dockyards, and other needful buildings \* \* \*; to make all laws which shall be necessary and proper for carrying into execution the foregoing powers—

And so forth.

Section 3, Article IV, also provides that-

The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States.

Each of the foregoing clauses of the Constitution gives warrant to some feature of the bill and affords authority for the legislation proposed.

The objects of this bill are the development of the agricultural and mineral resources of Alaska, the settlement of the public lands in Alaska, to provide transportation for coal for the use of the Army and Navy, to establish post roads, and transport the mails in Alaska.

I shall now read a short excerpt from the case of Wilson against Shaw, reported in Two hundred and fourth United States Supreme Court Reports, page 33 et seq., which holds that Congress has the power to authorize the Government to build railroads. Mr. Justice Brewer, speaking for the court, said:

Again, plaintiff contends that the Government has no power to engage anywhere in the work of constructing a railroad or canal. The decisions of this court are adverse to this contention. In California v. Pacific Railroad Co., 127 U. S. 1, 39, it was said:

"It can not at the present day be doubted that Congress, under the power to regulate commerce among the several States, as well as to provide for postal accommodations and military exigencies, had authority to pass these laws. The power to construct, or to authorize individuals or corporations to construct, national highways and bridges from State to State, is essential to the complete control and regulation of interstate commerce. Without authority in Congress to establish and maintain such highways and bridges it would be without authority to regulate one of the most important adjuncts of commerce. This power in former times was exerted to a very limited extent, the Cumberland or National Road being the most notable instance. Its exertion was but little called for, as commerce was then mostly conducted by water, and many of our statesmen entertained doubts as to the existence of the power to establish ways of communication by land. But since, in consequence of the expansion of the country, the multiplication of its products, and the invention of railroads and locomotion by steam, land transportation has so vastly increased, a sounder consideration of the subject has prevailed and led to the conclusion that Congress has plenary power over the whole subject. Of course the authority of Congress over the Territories of the United States, and its power to grant franchises exercisable therein are, and ever have been, undoubted. But the wider power was very freely exercised, and much to the general satisfaction, in the creation of the vast system of railroads connecting the East with the Pacific, traversing States as well as Territories, and employing the agency of State as well as Federal corporations.

In Luxton v. North River Bridge Co. (153 U. S., 525, 529), Mr. Justice Gray, speaking for the court, said:

"Congress, therefore, may create corporations as appropriate means of executing the powers of government, as, for instance, a bank for the purpose of carrying on the fiscal operations of the United States or a railroad corporation for the purpose of promoting commerce among the States. McCulloch v. Maryland (4 Wheat., 316, 411, 422); Osborn v. Bank of United States (9 Wheat., 738, 861, 873); Pacific Railroad Removal Cases (115 U. S., 1, 18); California v. Pacific Railroad (127 U. S., 1, 39). Congress has likewise the power, exercised early in this century by successive acts in the Cumberland or national road, from the Potomac across the Alleghenies to the Ohio, to authorize the construction of a public highway connecting several States. See Indiana v. United States (148 U. S., 148)."

See also Monongahela Navigation Co. v. United States (148 U. S., 312). These authorities recognize the power of Congress to construct interstate highways. A fortiori, Congress would have like power within the Territories and outside of State lines, for there the legislative power of Congress is limited only by the provisions of the Constitution and can not conflict with the reserved power of the States. Plaintiff, recognizing the force of these decisions, seeks to obviate it by saying that the expressions were oblier dicta, but plainly they were not. They announce distinctly the opinion of this court on these decisions in many ways, and any change would disturb a vast volume of rights supposed to be fixed; but we see no reason to doubt the conclusions expressed in those opinions, and adhere to them. The court of appeals was right, and its decision is affirmed.

Mr. WALSH. Mr. President—

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from Arizona yield to the Senator from Montana?

Mr. ASHURST. I yield to the Senator from Montana. Mr. WALSH. I simply desire to say that, upon reflection and consultation, I desire to withdraw the request for unanimous consent which I presented a moment ago, and accordingly the

matter appears to be disposed of.

Mr. ASHURST. Of course, this arrangement withdrawing the request for unanimous consent was not made for the purpose of taking me off the floor?

Mr. WALSH. Oh, no.

Mr. CLARK of Wyoming. The Senator has the floor.

Mr. WALSH. Mr. President, I simply desire to say to the Senator from Arizona that I supposed he was addressing himself to the unanimous consent requested by me in the hope that the matter would be expedited and that I feared the unanimousconsent agreement requested might have a tendency to delay.

Mr. ASHURST. The ruling of the Chair was correct, and I am also in favor, of course, of the unanimous-consent agreement proposed to the Senate by the Senator from Montana IMr. WALSH]. I do not care how we proceed, provided it be in a constitutional manner, so long as we abandon periphrasis, circumlocution, and the how-not-to-do-it manner in which we have been proceeding. I shall stop speaking now, or at any other time, in order that either the currency bill or the Alaska railroad bill may be passed.

The VICE PRESIDENT. The Senator from Montana [Mr. Walsh] withdraws the request for unanimous consent.

## BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. NELSON. Mr. President, the Committee on Banking and Currency has to some extent been chided and criticized for delaying action on the pending legislation. I think that Senators who are thoroughly conversant with the subject and familiar with the work done by that committee will acquit the committee of any such charge. The truth of the matter is, Mr. President, that when the Glass bill came before the Banking and Currency Committee of the Senate we were all, in the first instance, agreed that the bill was somewhat crude and that it needed amendment in various particulars in order to become a workable banking and currency measure. With that object in view, the committee proceeded to secure witnesses and experts from all parts of the country-from the North, the South, the East, and the West. We had bankers before us; we had business men before us; we had manufacturers before us; and we had before us college professors and scientists, and others who claimed to be experts in such matters; and I think most of the members of the committee will agree with me that we obtained from these various sources much valuable information and instruction of a character that we never could have obtained from books. The result of our investigation is before the Senate.

The committee labored under some disadvantages. was, so to speak, a kind of Damocles sword hanging over us a part of the time. We were from time to time threatened in the newspapers and through other sources that if we did not work

caucus, but we paid little heed to such threats; the committee went on with its work, and I am gratified that the Democratic Members of the Senate saw fit to leave the committee undisturbed in its deliberations so that it might pursue its work, which it did until a point was reached where the committee divided into two sections, and two separate substitutes were reported for the bill. I have no criticism to make of the action of the Democratic Party in taking up what I will call, for the purposes of the discussion, the Owen bill, and going over it and revising it in the manner in which they have done. they acted fairly, justly, and wisely in not taking the bill out of the hands of the committee, but in leaving it with the committee to report the bill in the only possible manner in which we could report it.

Mr. President, before proceeding with the consideration of the merits of the proposed legislation I desire in brief outline to call your attention to the currency systems that have prevailed in this country from the earliest times, for I conceive that some lessons can be derived from our own experience.

The circulating mediums of the thirteen Colonies, after they had ceased to rely on barter as a medium of exchange, was at first specie, mostly foreign silver coins. These became so plentiful that as early as 1652 a mint was established in New England for the coinage of shillings, sixpence, and threepence In some localities, as, for instance, Virginia, the Spanish piece of eight was made a money standard. While the money of account in the Colonies was English, the money that circulated was chiefly Spanish and Portuguese.

Paper money was first issued by Massachusetts in 1600, followed by several subsequent issues. The issues were so excessive that it resulted in great depreciation of the currency.

For the purpose of defraying the expenses of an expedition against the Indians and to accommodate domestic trade the Legislature of South Carolina established a public bank in 1712 and issued £48,000 in bills of credit, called bank bills, to be loaned out at interest on landed and personal security and to be redeemed gradually at the rate of £4,000 a year. This paper currency in time became greatly depreciated.

In 1723 Pennsylvania made its first experiment in paper currency. In March it issued £15,000 of such currency. was only available for loans on land securtly or plate deposited in the loan office. The borrowers had to pay 5 per cent interest. The bills were made a legal tender for all payments on pain of confiscating the debt or forfeiting the commodity. The bills were to be gradually retired at the rate of one-eighth per year. The issue of this currency being moderate and limited, it was able to maintain itself on a parity with gold and silver, and it was regarded at the time as the best paper currency in the Colonies. Most of the other Colonies issued paper currency of one kind and another prior to the Revolutionary War. Virginia, however, issued none prior to 1755. On the whole, it may be said that the Colonies prior to the Revolutionary War suffered both from the scarcity and from the character of their currency.

In 1763 the English Parliament passed an act-

To prevent paper bills of credit hereafter to be issued in any of His Majesty's Colonies or plantations in America from being declared to be a legal tender in payment of money, and to prevent the legal tender of such bills as are now subsisting from being prolonged beyond the periods for calling in and sinking the same.

This act was not obeyed, but did nevertheless cause great embarrassment and distress in the Colonies.

Pelatiah Webster, a merchant of Philadelphia, estimated that the whole circulating cash of the Thirteen Colonies just before the Revolutionary War was only \$12,000,000, or perhaps not more than \$10,000,000. He said that not more than one-half, or at most three-fifths, of the circulating cash in Pennsylvania was paper, and I am well convinced that that proportion was not exceeded in the other States where paper money was circulated.

While the currency system to which I have thus referred was highly detrimental and restrictive upon traffic and commerce, yet it had one redeeming feature, and that was that it tended to repress to a great extent an undue expansion of credit. Considerable losses were in many instances sustained by the holders of the depreciated paper currency. This was but an incident of this irregular system.

The outbreak of the Revolutionary War led to the issuance of so-called Continental paper money, issued by authority of the Continental Congress. Of this money there were two kinds, one known as the old emission and the other as the new emission. The old emission was issued in various sums annually from 1775 down to and including 1781; in all, \$357,476,541. The new emission was issued in 1780 and 1781, and amounted to more expeditionsly or move along different lines the measure \$2,070,485. This Continental currency, as is well known, greatly would be taken out of our hands and submitted to a Democratic depreciated as the volume increased, until in May, 1781, it became so low that it took \$500 of it to purchase \$1 in specie, and at this time it entirely ceased to circulate as money, and much of it was bought up by speculators. It was a forced legal-tender currency, growing out of the exigencies and necessities of the

For the purpose of aiding the Government of the then existing Confederation—and this was before the Constitution of the United States had been adopted—the Bank of North America was incorporated, first by the State and then by Congress, and established at Philadelphia. 'The bank, however, did not open its doors or go into active operation until January 7, 1782. war having practically ceased in 1781 by the surrender of Cornwallis, the Government, in addition to the help given by the bank, was able to secure large loans in Europe, and specie became plentiful in the country, partly through the British army stationed at New York, partly through the French soldiers who were here, and partly from importations from Habana and other West India points. The charter of the bank was obtained, as I have stated, both from the State and from Congress. Two hundred and fifty-four thousand dollars of the stock was subscribed for by the Government, through Robert Morris, and this made the Government the principal stockholder of the bank. The bank issued paper currency, but it was accused of sometimes making such currency too plentiful and at other times too scarce, leading to contraction, scarcity, and ruin. The operations of the bank were far from satisfactory; in fact, they were so objectionable that it was deprived of its State charter four years after it commenced business, but it continued its opera-tions on the ground that it also had a charter from Congress; but after this it proceeded in a more moderate, prudent, and less obnoxious manner. In 1786 it sought to secure a renewal of its charter from the State of Pennsylvania, but it was unsuccessful in this effort. The bank was, however, reincorporated on the 17th of March, 1787, but with more limited powers and only for a period of 14 years.

In addition to the Bank of North America the following banks were incorporated prior to the incorporation of the first Bank of the United States, namely: Massachusetts Bank, at Boston, Mass.; Bank of New York, in the city of New York; Bank of Maryland, which, I think, was located in Baltimore; and Providence Bank, Providence, R. I.

After the Government of the United States had been established under the Constitution, one of the first and most important problems that confronted the Government was the funding of its great national debt, arising from the Revolutionary War. This debt, according to Secretary Hamilton's first report to Congress, was composed of the following items: Foreign debt, principal and interest, \$11,710,378; domestic debt, principal and interest—that is, debt to individuals—\$40,414,085; State debt ascertained, and State debt balance, estimated, in all \$25,000,000, thus making the aggregate indebtedness of the Government at that time the sum of \$77,124,463. The creditors of the Government were permitted to present their claims and to subscribe for the loan obligations of the Government in various forms—what we would call bonds now, but in those days called stocks. For the purpose of aiding the Federal Government in carrying on its operations in respect to the funding of the national debt and to maintain its credit the first Bank of the United States was created by the act of February 25, 1791. The preamble of the act clearly discloses its purpose in the following language:

Whereas it is conceived that the establishment of a bank for the United States, upon a foundation sufficiently extensive to answer the purposes intended thereby, and at the same time upon the principles which afford adequate security for an upright and prudent administration thereof, will be very conductive to the successful conducting of the national finances, will tend to give facility to the obtaining of loans for the use of the Government in sudden emergencies, and will be productive of considerable advantages to trade and industry in general: Therefore, be it enacted, etc.

The bank-this is, the first Bank of the United States-was entirely a private and not a Government bank. Its charter was given for a period of 20 years. Great objection was made to the passage of the bill, especially on the ground that it was unconstitutional to create such a bank. The capital of the bank was fixed at \$10,000,000, consisting of 2,500 shares of \$400 each. One-fourth of the subscription for the stock was to be paid in specie, the balance in the 6 per cent obligations of the United States, or what we would call Government bonds. The Federal Government was authorized to subscribe for \$2,000,000. The bank was to be controlled by a board of 25 electors, elected by the stockholders. The bank was authorized to issue its notes, which were made a legal tender for all debts due the United The notes were to be redeemable on demand in specie. The bank was authorized to commence business when \$400,000 in specie had been subscribed and paid in. There was no limi-

tation to its note issues except this, that it could not incur debts of any kind in excess of \$10,000,000.

The act of incorporation clearly contemplated-and it was undoubtedly its purpose—that the bank was to aid the Government in taking care of its funded debt and to supply it with the necessary funds in its fiscal operations. On the whole, it would appear from its history that the bank fulfilled this purpose fairly well. In addition to its note-issuing powers, the bank had the usual powers of a bank of deposit and discount. The bank did not open for business until December 12, 1791. Discounts were only to be made on two-name 60-day paper. It is estimated that the bank never received from its subscribing stockholders more than about \$675,000 in specie. No dividends were paid by the bank until 1792. The capital was, in the first instance, oversubscribed, and the subscriptions were in consequence scaled down to meet the requirements of the charter. While the Government subscribed for \$2,000,000 of the stock, it obtained at or about the same time a loan from the bank for an equal amount. The bank had branches in New York, Eston, Baltimore, Charleston, Norfolk, Savannah, New Orleans, and Washington. The Government some time after the bank was in operation, being hard pressed for funds, was compelled to sell and did finally sell all its stock in the bank, but the sale was at a profit of \$671,860 upon a stock investment of \$2,000,000. The circulation of the bank never materially exceeded \$6,000,000. The relations between the bank and the Government were, on the whole, intimate and friendly. While the charter did not make it the depository of the Government funds, yet the Government nevertheless made it a depository of the larger part of such funds, for the bank was continually aiding the Government in its foreign exchanges, as the bank was authorized to deal in such exchanges. The charter of the bank expired in March, 1811. In 1810, when the bank applied to Congress for a renewal of its charter, Gallatin, who was then Secretary of the Treasury, was strongly in favor of renewing the charter. Among other things he said:

The advantages of banks in the fiscal operations of the Government were unquestionable. The only question was whether these services could be most conveniently performed by a national bank or by a number of State banks. State banks might be used, and in case of a non-renewal of the charter must be used by the Treasury, but surely with less convenience and safety.

The charter of the bank, as is well known, was not renewed. The vote in the House on the bill to renew the charter was taken January 24, 1811, and stood 65 to 64, and in the Senate the vote was taken February 20, 1811, and stood 17 to 17. The bank having failed to secure a renewal was duly liquidated within a comparatively short period and all of its liabilities, including its liabilities to stockholders, were paid in full, with ample dividends. On the whole, it can be said that the bank had in every way been successful, helpful to the Government in its fiscal operations, and of benefit to the public. The failure to renew the charter did not arise because of any shortcomings of the bank or because of its failure to perform the functions for which it was created. The bank owed its demise largely to party and political conditions and to the prejudice which existed among many prominent men against a national or Federal bank. The financial statements of the bank for January, 1809, and January, 1811, are most interesting, and I ask that they may be incorporated in my remarks without reading.

The PRESIDING OFFICER (Mr. POINDEXTER in the chair).

Without objection, it will be so ordered.

The matter referred to is as follows:

Mr. NELSON. I have thus briefly referred to the history of this bank for the purpose of showing how useful a well-conducted central bank can be to the Government and to the people. I also refer to it for the reason that, like the Bank of England, it was based to a large extent on the funded debt of the Government, though in the case of the Bank of England that debt has never been paid and is never likely to be paid, while the obligations of the Federal Government, in the form of stock subscriptions, were fully liquidated at maturity.

The failure of Congress to renew the charter of the bank placed the Government and the public in the hands of a large number of State banks. There were 88 of such banks in the year the renewal of the charter was denied. By 1815 the number had increased to 208 and by 1816 to 246. Gallatin made the following estimate of the banking facilities of the country at the dates mentioned, which I ask to have incorporated in

my remarks without reading.

The PRESIDING OFFICER. Without objection, it is so or-

Mr. NELSON. The War of 1812 came upon the country the year following the expiration of the charter of the bank, and the Federal Government was, in consequence, compelled to rely upon the State banks for aid during that war, and their well-nigh universal suspension of specie payment in 1814 almost paralyzed the operations of the Treasury. The notes of the State banks did not pass current out of their own locality, and it became difficult to make transfer of funds, public or private, from one part of the country to another. Gallatin expressed his deliberate opinion that the suspension of specie payments might have been prevented if the Bank of the United States had still been in existence. He believed that the enormous increase of State banks, occasioned by the dissolution of that bank, would not have occurred if that bank had continued to exist. No doubt the difficulties of the situation were aggravated by the pendency of the war, but still it is likely that had the bank, in its fine condition, been allowed to exist it would have been a great help to the Government during the trying days of the war, and the suspension of specie payment might have been avoided.

The embarrassment in the money market following the suspension of the first Bank of the United States and the suspension of specie payment led to the agitation for the creation of another Federal bank. As early as January, 1814, a petition from New York was presented to Congress for the incorporafrom New York was presented to Congress for the incorpora-tion of a national bank with a capital of \$30,000,000. Several bills were introduced in Congress. Finally one of these bills passed both Houses of Congress, but it was vetoed by President Madison. Subsequently, in January, 1816, a bill chartering another bank of the United States, commonly known as the "second bank," was passed by a vote of 80 to 71 in the House and by 22 to 12 in the Senate. This bill was approved by the Presi-dent. The capital of the bank was fixed at \$35,000,000, in shares of \$100 each, one fifth of the shares to be taken by shares of \$100 each, one-fifth of the shares to be taken by the Federal Government and four-fifths by the public.

No individual, firm, or corporation was permitted to subscribe for more than \$300,000. The charter was to run for a period of 20 years. The bank was to be governed by a board of 25 directors, 5 appointed by the President and 20 by the bank, under a restrictive system of voting. Both classes of directors were to be appointed or elected annually. The bank could hold property of all kinds up to \$55,000,000, and its indebtedness, exclusive of deposits, was restricted to \$35,000,000. The bank could issue currency or notes in denominations less than \$100, but not less than \$5, payable on demand in specie, and notes for \$1,000 or more payable in 60 days. The bank was authorized to establish branches wherever needed, and all the demand notes of the bank were to be received in payment of all debts due the United States. Government funds were to be deposited in the bank unless the Secretary of the Treasury otherwise ordered. The bank was forbidden to suspend specie payment on its demand notes, and on any of such notes which were not promptly redeemed in coin it was required to pay

interest at the rate of 12 per cent per annum during the period The bank was required to pay the Government of suspension. for its charter the gross sum of \$1,500,000. The control of the Government over the bank consisted in the appointment and removal of five of the directors, the withdrawal of Government deposits, the requirement of weekly statements, and the inspection of its accounts. Subscriptions to the stock of the bank were required to be made one-fourth in specie and three-fourths in the funded debt of the United States, or what we call Government bonds. The bank was authorized to commence business as soon as \$8,400,000 in specie and in funded debt had been The bank was authorized to commence business The bank was given a monopoly of note issue, and was required to transfer the public funds from one part of the country to another without charge.

I quote from the report of the Monetary Commission the

following brief history of the bank:

I quote from the report of the Monetary Commission the following brief history of the bank:

The history of the bank, in brief, was as follows: The bank was chartered April 10, 1816, and on April 30 Congress ordered that resumption of specie payments go into effect on February 20, 1817. The bank was quickly organized under the presidency of Jones, and began operations in January, 1817. Owing to mismanagement Jones was forced to resign in 1818, and Langdon Cheves became president. He held office until 1823, when he was succeeded by Nicholas Biddle. In June, 1829, Senator Woodbury, of New Hampshire, brought complaints against Jeremiah Mason, manager of the Portsmouth branch. In the following December President Juckson, in his annual message, questioned the constitutionality of the bank and accused it of failing to establish a sound currency. On April 30, 1830, a committee of the House of Representatives reported at length on the points raised by Jackson, its conclusions being entirely favorable to the bank. A Senate report was likewise friendly. In 1831 Senator Benton supported a resolution against rechartering the bank. In January, 1832, the bank petitioned for recharter, and this was favorably acted upon by committees of the Senate and the House. A bill for recharter was passed, but vetoed by Jackson July 19, 1832. In the autumn of this year Jackson was relected President, and interpreted the vote as an indorsement of his opposition to the bank. In December, 1832, Jackson raised the question whether the funds of the Government were safe in the custody of the bank. An investigation was ordered by the House, and a majority report of the Committee on Ways and Means upheld the bank. This report was adopted March 2, 1833, by a vote of 109 to 46. Notwithstanding this the President determined to remove the deposits, and in order to accomplish his purpose on September 23 dismissed Duane, Secretary of the Treasury, who objected to removal, and appointed Taney in his place. The latter on September 26 ordered that deposit

The vast and undue expansion of paper currency through State banks, which had occurred after the discontinuance of the first Bank of the United States, had led to the suspension of specie payments in 1814; and as a consequence, while the first bank was organized chiefly for the purpose of aiding and maintaining public and private credit, one of the great purposes of the second bank was to aid the Government not only in maintaining its public credit, but also to aid in resuming specie payments and the establishment of a sound paper currency throughout the country. The burden of restoring specie payment was in consequence, in the main, left with the bank. After the act of incorporation had passed, Congress by joint resolution directed that specie payment should be resumed on February 20, 1817. Out of the duty entailed upon the bank to bring about the resumption of specie payment arose its first friction and trouble with the State banks, whose opposition and unfriendliness the bank encountered from the very beginning. The Government deposits were at this time scattered in the State banks, and such deposits were from time to time to be transferred to the Federal bank, but the State banks insisted on transferring these funds in the shape of their irredeemable currency, thus throwing the entire burden upon the bank, for the bank would be heavily penalized if it failed to redeem the deposits of the Government in specie. While the bank was not managed as well as it might have been, yet its chief troubles at the outset came from these causes. In one form or another there was considerable hostility manifested by the State banks against the resumption of specie payments, and many of them were unwilling or unable to redeem their Government deposits in specie.

I especially invoke the attention of Senators to listen to what I am about to say, as it bears on the pending legislation.

In the early part of its operations the bank established a considerable number of branch banks, 25 of such branches in all from first to last. At the outset no definite amount of capital was assigned to these branches, but afterwards, in 1819, the bank made the fatal mistake of assigning and distributing to each of the branches a definite and specific amount of capital. The following table, which I beg leave to insert in my remarks, shows the amount of capital assigned to the various branches at three different dates.

Here is a list which I ask to have incorporated in my remarks. The PRESIDING OFFICER. Without objection, it will be so ordered.

The matter referred to is as follows:

	Assigned May, 1819.	Assigned November, 1819.	Assigned December, 1822.
Portsmouth	\$118,000	\$200,000	\$200,000

Boston		500,000	1,500,000

Mr. NELSON. It thus appears from this table which I have quoted that \$47,092,000 of the resources of the bank were distributed as capital among 19 branches. The bank was greatly criticized for injustice and unfairness in this distribution. It was justly maintained that the distribution was not made conformable to the commercial and financial importance of the different localities. But the fatal mistake was in thus dissipating and scattering the resources of the bank; and I particularly refer to this matter because it ought to be a lesson to us in the present emergency and admonish us to avoid as far as possible dissipating and scattering the bank reserves of the country.

A great change took place in the character of the capital stock of the bank. At the outset a large proportion of it consisted of Government obligations, or stocks, as it was known in the terminology of those days. In April, 1817, out of the total capital and surplus of the bank, amounting to nearly \$47,000,000, one-half consisted of Government obligations; but, inasmuch as there came a favorable turn in the revenues of the Government thereafter, a large share of these Government obligations held by the bank were from time to time redeemed, and the holdings of the bank of this character were accordingly greatly reduced.

The Government revenues were kept on deposit in the bank until removed by order of Secretary Taney. In remote localities, where the bank bad no branches, the local State banks acted as temporary depositaries and as transfer agents of Government revenues, but in this respect these State banks were merely the agents of the central bank. The bank on the whole proved a safe depositary of Government funds and the Government did not lose a dollar of its deposits with the bank. The bank was required to transfer the Government funds free of charge to such places as the Government required. Such transfers in the years from 1815 to 1827, inclusive, averaged \$28,000,000 a year. Some friction arose between the Government and the bank in reference to such transfer of funds and the checking of the Government against them, as, for instance, when, in August, 1817, the Treasurer of the United States drew upon the mother bank at Philadelphia for \$11,000,000 the cashier of the bank complained that the Philadelphia bank did not have that much funds to the credit of the Government and asked that the checks be made upon the bank and such branches as held Government funds.

The Treasurer declined to comply with the wishes of the bank, and stated that he kept no account other than with the chief or mother bank for the transfer of funds. A like case occurred in November of the same year when a Treasury draft on the branch bank at Richmond came back unpaid for lack of Government funds in that bank. I cite these cases as incidents in the experiences of the Government with the bank. I ask leave to insert in my remarks the following statement showing the amount of Government deposits in the bank and its branches for the period extending from 1817 to 1836, year by year.

the period extending from 1817 to 1836, year by year.

The PRESIDING OFFICER. Without objection, it will be so ordered.

The statement is as follows:

1817	\$10, 200, 000
1818	7, 400, 000
1819	2, 900, 000
1820	3, 600, 000
1821	2, 900, 000
1822	2, 600, 000
1823	4, 300, 000
1824	10, 200, 000
1825	6, 700, 000
1826	5, 800, 000
1827	8, 900, 000
1828	8, 400, 000

1829	\$10, 700, 000
1830	9, 700, 000
1831	9, 100, 000
1832	12, 600, 000
1833	12, 800, 000
1834	4, 000, 000
1835	2, 600, 000
1836	600,000

Mr. NELSON. The bank did not fully meet the public expectations in respect to its circulating notes. This was largely owing to its failure to adopt adequate means and facilities for redemption. It failed to provide an adequate supply of specie and to distribute it at points where the notes were redeemable. The bank was also charged with delinquency in resorting to undue expansion in certain localities. I call the attention of Senators to that.

Trouble also arose from the fact that each independent branch bank issued notes of its own, which were redeemable at the place of issue, and the difficulty of supplying specie for the redemption of these notes at 19 different branches manifestly complicated the situation. It seems to me that from the experience of the bank in this respect a lesson can well be drawn in the present emergency, a lesson as to how serious it may be to provide for the issue of notes at a large number of points and for the redemption of those notes in specie at such points. This drawback should be minimized as much as possible, and this is one of the aims of the Hitchcock substitute. The following statement, which I ask leave to incorporate in my remarks, shows the note circulation of the bank from 1817 to 1836, inclusive.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The statement is as follows:

1817	\$1,900,000
1818	8, 300, 000
1819	0 000 000
1820	40 40 40 40 40 40

1833	17, 500, 000
1834	19, 200, 000
1835	17, 300, 000
1836	23, 000, 000

Mr. NELSON. On the whole, it may be said that the management of the bank in many respects was subject to just criticism, and that it had not on all occasions been as mindful as it ought to have been of its duties to the Government and to the public. It was far from being as well managed and conducted as the first Bank of the United States. It encountered the opposition of President Jackson, who was, in principle, opposed to the creation of banks of this kind, and who subsequently undoubtedly found fair grounds for criticizing some of the operations of the bank. The bank sought to secure a renewal of its charter from Congress, but failed in its attempt by reason of the veto of President Jackson.

In 1833 the deposits of the Government were, upon the order of Secretary Taney, at the instance of President Jackson, entirely withdrawn from the bank, and this led to its ultimate downfall and demise. I refer to this incident not for the pur-pose in any manner of criticizing the conduct of the statesmen of those days, but simply for the purpose of calling attention to the fact of how dangerous this power of absolute removal of Government deposits from a public bank may prove to be. No one doubts but what the removal of the Government deposits from the second Bank of the United States led to its downfall, To equip the Secretary of the Treasury with such a power under the new system that we are now about to establish would be dangerous in the extreme. Our Government deposits of surplus funds run from \$100,000,000 to \$200,000,000 per year, and under the new system would include all the revenues of the Government. The sudden withdrawal of these deposits from the reserve banks, or from any one of them, might lead to the suspension of the bank. The Glass bill, as well as the Hitchcock bill, declines to equip the Secretary of the Treasury with this absolute power. If this power is to be retained in any shape or manner or to any extent by the Secretary of the Treasury, it ought to be exercised under the supervision and with the concurrence of the Federal reserve board, that board in which is vested the regulation and welfare of our proposed new system.

As the failure to renew the charter of the first Bank of the United States in 1810 remitted the Government and the public to a varied system of State banks for paper currency and banking facilities, which brought a flood of paper currency into circulation and led to the suspension of specie payment from 1814 to 1817, so the failure to renew the charter of the second Bank of the United States left us without a national paper currency and remitted the Government and the public again to a variety of State banks, whose numbers and circulation increased at a rapid rate. The Government deposits were placed in some of these banks. Government revenues were in part paid in these State-bank notes, many of them depreciated for lack of specie redemption. The situation finally became so precarious that the Secretary of the Treasury, Mr. Woodbury, on July 11, 1836, issued a circular providing that nothing but gold and silver, and in proper cases Virginia land scrip, would be received in payment for public lands, except in the case of preemption settlers.

This circular created alarm and fear and almost a panic among the banks, and a rapid and undue contraction resulted therefrom, and it served, contrary to expectations, to banish gold and silver from circulation. The next Congress passed a bill to repeal the circular, which the President vetoed. The everincreasing flood of State-bank currency brought the panic of 1837 in its wake. Fear possessed the people who held this currency and they demanded the redemption of it in specie. Few of the banks were able to respond. Most of them suspended and closed their doors. When these banks failed and went down in 1837 some of them held Government deposits. The loss of these deposits at the time greatly crippled the Government in its fiscal operations. The Government deposits had at all events been safe in both the first and the second banks of the United States, but it now became palpably evident that they were no longer safe with the State banks. Some other place for their safe-keeping was urgently needed and must be devised, and in consequence the President, in 1837, recommended legislation for the adoption of a subtreasury system, a system by which funds of the Government were to be retained in the vaults of the Treasury at Washington and in the vaults of the various so-called subtreasuries of the country. Congress at first refused to pass the legislation asked for, but nevertheless the system was practically put into operation by the executive department. In 1840 Congress finally passed the legislation asked for, but in consequence of a change of administration Congress repealed the law in 1841 and passed a bill creating another national bank. This bill was vetoed by the President, who had been elected as Vice President, but had become Chief Executive as the result of the death of the President. In the meantime and down to 1846 the funds of the Government remained under its own control without any law for their deposit or safe-keeping. But subsequent to 1840 they were deposited in seven New York banks, each bank in turn holding all the deposits for one month at a time. Congress finally, in 1846, passed the law creating the subtreasury system, with which you are all familiar and which I need not describe in detail, and which has been in vogue ever since. This system, while it provided a safe depositary for the Government funds, has proved in some respects detrimental and injurious to the commerce and finance of the country. The vice of the system is this, that as the revenues of the Government, from time to time, greatly exceed its expenditures this excess is withdrawn from circulation in the channels of commerce and trade and locked up as a dead fund in the Treasury.

One of the merits of both the Glass and the Hitchcock bills

One of the merits of both the Glass and the Hitchcock bills is to remedy this defect by providing that the Government funds shall from time to time be deposited in the reserve banks and checked against by the Government in making its disbursements. The surplus money of the Government will in this manner be in constant and active use, and the banks and the public will derive great benefit from the system. As is well known, it has heretofore been the practice, when there has been an accumulation of Government funds in the Treasury and there has been a stringency in the money market, to deposit from time to time these funds, mainly in a limited number of favored banks, who have oftentimes used the funds not so much for commercial loans as for the purpose of maintaining the integrity of so-called call loans based upon stock collaterals. The subtreasury system has in recent years been somewhat modified in actual practice by the more liberal and fair distribution of Government funds among the banks. But however well meaning and fair our several Secretaries of the Treasury have been in making such distribution of deposits, they have, nevertheless, been subject to great criticism for undue favoritism. It will be a great relief under the present system for the Secretaries of the Treasury to deposit the funds, as provided in the Glass bill and the Hitchcock substitute, in the Federal reserve banks.

While the subtreasury system, in the absence of a national deposited in the Treasury Departmen Federal bank, afforded relief to the Government in respect to of 5 per cent deposited by the banks.

its deposits, it failed to give any relief to the public at large. They were left with no other paper currency than that issued by a variety and multitude of State banks, under various systems. In a few of the States these systems were good, in some of them indifferent, and in many of them poor and unreliable. Many of the notes, while they temporarily circulated at par in the neighborhood where they were issued, yet as soon as they got some distance from home they were invariably taken at a discount, if taken at all. On the whole, in many instances, they proved a great burden upon the trade and commerce of the country, oftentimes leading to undue inflation and at other times to undue contraction. Not only did the commerce and traffic of the country in general suffer from this currency, but in many instances depositors lost their little all and became entirely pauperized. It would be imposing upon the time of the Senate and would perhaps prove of little value to describe these various State-bank systems in detail. It is sufficient to say that such as they were-good, indifferent, and bad-they gave us the only paper currency we possessed from the time of the demise of the second Bank of the United States until the establishment of our present national-bank system.

There is no telling how long our country would have continued under this older system if the exigencies of the Civil War had not brought about a change and led to the enactment of our present national-bank system. The national-bank law was first enacted in 1863, and reenacted, modified, and enlarged by the act of 1864, which forms the basis of the Revised Statutes on that subject. To meet the expenses of the war the Government had, before the first act was passed, issued over \$300,000,000 in legal-tender notes, commonly called green-backs, and in addition it had increased its bonded indebtedness from about \$80,000,000, at the beginning of the war, to nearly \$1,500,000,000 in round numbers, and the end of the war being still apparently in the far distance it became necessary to incur a much larger indebtedness and to make provision for the same. The same reason, to a large extent, existed for the enactment of the national-bank law as for the enactment of the law providing for the charter for the first Bank of the United States, namely, to aid the Government in securing further loans and in maintaining its financial credit. It is said that when Washington asked Hamilton, "What is to be done with our terrible debt?" that Hamilton replied, "Bank on it as our only available capital and the best in the world." It must be remembered, too, that at this time the resources of the Government were greatly limited by the pending war. Out of the 35 States of the Union 11 were in open rebellion, and of the 24 who had remained 3 of them-Missouri, Kentucky, and West Virginiawere border States, where the powers of the Federal Government were not always paramount and effective. At the time the first national-bank law was enacted in 1863 gold and silver had ceased to circulate. There were at that time about 1,466 State banks in operation in the States adhering to the Union. These banks had a capital of \$405,000,000, and a note circulation of \$238,000,000 in round numbers. This circulation and our greenback circulation constituted at this time the only circulating medium of the country, aside from various temporary and lawless expedients, such as checks and other kinds of makeshifts.

The object of the national bank law was of a twofold character; first, to secure purchasers and holders of the Government bonds, and second to give the public a safe and sound paper circulating medium. The act accomplished to a great extent both of these purposes. It created a market for the bonds and maintained their integrity. It gave the people a currency that was absolutely safe and sound, and which has not from the time of the inauguration of the system entailed a single dollar of loss on a bill holder. The system thus inaugurated has grown until at this time we have a total of 7,500 national banks in round numbers, with a paid-up capital of \$1,056,000,000, a surplus of about \$725,000,000, outstanding note circulation of \$724,000,000, individual deposits amounting to \$5,760,000,000 in round numbers, and loans and discounts amounting to \$6,160,000,000 in round numbers. Prior to 1900 no national bank could be organized or established with a capital of less than \$50,000. By the act of March 14, 1900, banks were permitted to be organized with a capital of not less than \$25,000 in towns where the population did not exceed 3,000. There are over 2,000 of these small banks organized under the provisions of this act, and these small banks have been the means of extending good banking facilities to the rural communities and the smaller towns of the country. The circulating notes issued by the national banks are based upon Government bonds deposited in the Treasury Department with a redemption fund

Now I come to that system of bank reserves in which we are so much interested. In order to fortify and strengthen the system, a scheme of so-called bank reserves was established by the act. For such purpose the national banks of the country were segregated into three classes-banks in central reserve cities, banks in reserve cities, and country banks. In the original acts of 1863 and 1864 provision was made for only one central reserve city, to wit, New York. By the act of 1887 this was changed so as to allow, upon a proper showing, cities of a population of 200,000 or more to become central reserve cities. There are only two cities that have taken advantage of this law—Chicago and St. Louis. There are a number of other cities which could readily have become central reserve cities under the law of 1887, having sufficient population for that purpose. Among those of that class that I can recall at this moment are Boston, Philadelphia, Baltimore, Pittsburgh, New Orleans, Kansas City, St. Paul, Minneapolis, San Francisco, and there are other cities which I am unable to recall at this

Mr. SMITH of Michigan. Detroit?

Mr. NELSON. Yes; Detroit. Mr. POMERENE. And Cincinnati.

Mr. NELSON. Yes. There are 47 cities that have been designated as reserve cities. There are 52 national banks in the central reserve cities and 315 national banks in the reserve cities. All the other national banks of the country are known

as country banks.

The national-bank law provides that country banks must keep a reserve of at least 15 per cent of the aggregate amount of their deposits. Two-fifths of this, or 6 per cent, must be kept in their own vaults; three-fifths, or 9 per cent, must be kept in their own vaults; three-fifths, or 9 per cent, may be kept at their option in national banks in central reserve cities or in reserve cities, as the case may be. National banks in reserve cities are required to keep a reserve of 25 per cent of the aggregate amount of their deposits. One-half of this amount they are required to keep in their own vaults; the other onehalf they may deposit in the national banks in the central reserve cities. Banks in central reserve cities are required to keep in their own vaults a reserve of 25 per cent of the aggregate amount of their deposits, but in all of these cases the banks are credited on their reserves with the 5 per cent kept in the Treasury for the redemption of their circulating notes; in other words, this is deducted from the amount of the reserves required.

It is evident that the original national-bank act contemplated but one great reserve center for the entire country, the city of New York, and although this plan was afterwards modified by the act of 1887, to which I have already called your attention, fact remains that New York has always continued to be the main and chief reserve reservoir of the country, and on account of its great foreign and domestic commerce and its large amount of accumulated capital it will undoubtedly continue in the future, as in the past, to be the chief financial reservoir of the country, from which relief in great emergencies must come, notwithstanding any system of reserve banks we may establish. The reserve bank at New York will be the ultimate reservoir to which other reserve banks in case of emer-

gency must look.

While in theory the reserve system of the national-bank act seemed good, yet in actual practice, especially in times of money stringencies and panics, it has proved a great source of weakness and danger. The banks in the central reserve cities have striven to secure the reserves and other deposits of the country The banks in the central reserve cities have banks and of the banks in the reserve cities, and the banks in the reserve cities have in like manner striven to secure the reserves of the country banks, and as an inducement in both cases an interest of 2 per cent per annum has been paid on such deposits and reserves. The banks of the interior, in times when the demand for money at home has been slack, have forwarded their deposits in great volume to the banks of the central reserve cities, especially to banks in New York, and these banks, who in this manner became at certain seasons of the year so plethoric with the funds of the interior banks, could not afford. while paying 2 per cent interest, to allow the funds to remain idle, and this drove them, of necessity, to have recourse to call or demand loans secured by stock collaterals. These loans are usually made to stockbrokers, who are buying and carrying stocks for themselves or their customers. While in ordinary times such loans may be regarded as liquid, yet in times of money stringencies and panics they are anything but liquid. If under those circumstances the loans are called in, the borrower has neither money himself nor can he obtain loans from other banks to redeem the loans, and the result is that his stocks are sold at a sacrifice on the stock exchange without practically adding anything to the volume of money. In times

of panics the only loans that are really liquid, in the true sense of the term, are bills of exchange drawn against the shipment of products that may be termed the necessaries of life, such as cotton, wheat, corn, flour, and other articles, shipped abroad.

The panics of 1873, 1893, and 1907 demonstrated the truth of this proposition. One of the sources of the evil of this system has been the payment of interest by banks on bank On the one side it promotes the undue transmission of funds from the interior to these great banking centers. On the other hand, it induces the banks who thus secure these large deposits to unduly expand their credits and to carry a large quantity of call stock-exchange loans, and thus these funds are withdrawn from the channels of commerce. On the heels of the panic of 1873 a committee was appointed by the New York Clearing House to investigate the causes which led to that panic and to report upon what reforms were necessary in the operations of the banks to increase the security of their business, and so forth. On November 11, 1873, this committee presented its report. It is printed in full in volume 5 of the Report of the Monetary Commission, pages 91 to 101, inclusive, to which reference is made. At this time I can only quote the following passages from the report. Among other things, it

No institution can in the long run purchase deposits of money, payable on demand, of the owners and at the same time secure to itself a just and proper compensation for the business without violating some of the conditions indispensable to the public safety. It must either use them in ways that are illegitimate and perflous or use them in excess. This has been abundantly proved by innumerable instances in years past, and the practice of paying interest for such deposits was unanimously condemned by the bank officers in 1857 as one of the principal causes of the panic at that period, for the reasons given in a printed report, of which a copy is annexed hereto.

Speaking of call stock-exchange loans, the report states:

Speaking of call stock-exchange loans, the report states:

Legitimate commerce does not, then, demand it. It is still subject to instant call. There is consequently no resource but to loan it in Wall Street upon stocks and bonds. In doing which so much of the Nation's movable capital passes for the time into fixed and immovable forms of investment and its essential character is instantly changed. Loans are made with facility upon securities which have no strictly commercial quality, new and unnecessary enterprises are encouraged, wild speculations are stimulated, and the thoughtless and unwary are betrayed into ruinous operations. The autumnal demand finds the resources of the Nation unnaturally diverted from their legitimate channels, and they can only be turned back with difficulty and public embarrassment. Such has been our well-known experience year after year. Interest upon money has, as a consequence, fluctuated widely from 3 and 4 per cent per annum in summer to 15 and 20 per cent in the fall and winter upon commercial paper, and upon stocks at times to one-half and even 1 per cent a day. Vicissitudes like these are uterly destructive to all legitimate commerce, and institutions whose operations tend to such results are enemies to the public welfare.

Among the other recommendations for reform made by this

Among the other recommendations for reform made by this committee, the first and principal recommendation was:

That payment of interest upon deposits, either directly or indirectly, be entirely prohibited.

I may say in this connection that while a great majority of the banks of the New York Clearing House approved of it and would have adopted the plan there was a very small minority that refused to acquiesce. The result was that the rule recommended by this committee was not adopted. I commend the perusal of this report to all who are interested in the subject matter. All of us can recall the panic of 1907. It is still fresh in our memories. I do not care to go into the details of that subject at this time, but will simply state the bald fact that the banks of New York stopped the panic and run at that time by closing their doors and suspending, and that suspension continued in spite of the fact that during its pendency over \$90,000,000 of gold was imported from Europe upon bills of exchange drawn against bills of lading for agricultural products shipped to Europe, and in spite of the fact that the Government deposited with the banks of New York during that period upward of \$40,000,000, one-half of it in two of the largest banks; and it is to be noted also that during the acute period of the panic and suspension our national bank-note circulation was increased to the extent of nearly \$50.000,000. The total deposits made by the Government in the banks at that time amounted to \$58,000,000; so that \$58,000,000 of Government deposits, \$50,000,000 of additional bank-note circulation, and over \$90,000,000 in gold was added to the money supply of the country before the banks could open their doors and resume their normal business. We all know how the reserves of the interior banks of the country were tied up during this period of suspension. The tie-up in New York led to the fie-up in Chicago and St. Louis, and the tie-up at these three centers led, to a greater or less extent, to the tie-up of the banks in the 40 or more reserve cities and in the country banks, though it may be said that at that time in some of the States in the upper Mississippi Valley many of the country banks kept their doors open all the time and were at all times ready to respond to the full demand of their depositors. I refer to these matters not

so much for the purpose of criticizing anybody as for the purpose of enabling us to draw a lesson therefrom; and that lesson has been utilized in a concrete form in two of the pending currency bills by entirely changing the system of reserves and by prohibiting the payment of interest on such reserves and the payment of interest on deposits in the reserve banks.

may say in this connection that the original Glass bill prohibits the payment of interest on all deposits except on the deposit of Government funds. The Hitchcock bill is along the same lines, and prohibits the payment of interest on bank deposits in the reserve banks, while the last print of the Owen bill, if my recollection serves me right, is silent on that sub-I will ask the Senator from Missouri [Mr. REED] or the Senator from New York [Mr. O'GORMAN], whom I see before me, if I am not correct? I rather think it was unintentional.

Mr. O'GORMAN. My understanding is that interest will not be paid on deposits made by member banks, and will not be paid on deposits made by the Federal Government.

Mr. NELSON. It is not indicated in the last print of the

bill that that is so.

Mr. SHAFROTH. Mr. President, as I understand the bill, the banks are not entitled to pay to any member banks for moneys on deposit. That is plain in all the bills, I think. As to Government deposits, interest can be paid, as I understand, depending upon the condition of the bank and the desire of the Secretary of the Treasury. The banks are permitted to pay interest on Government deposits.

Mr. O'GORMAN. I desire to say, Mr. President, with reference to the last suggestion made by the Senator from Colorado, that if there is any such provision in the Owen bill it does not at this time reflect the views of the Senators who subscribed to the report on that bill, because the bill contemplates that with one or two reservations all the profits of this new banking system will go to the Government. If at an intermediate stage you require the system to pay interest to the Government on the Government's deposits, you are simply reducing the amount that will ultimately go to the Government by way of profit.

Mr. SHAFROTH. The division is not as the Senator from New York suggests. The division is made after the payment

of surplus of 40 per cent.

Mr. O'GORMAN. I say, with certain reservations. mind the surplus of 40 per cent. I had in mind the 6 per cent interest on the stock. I had in mind the part of the profits that is to be segregated for the purpose of protecting or guaranteeing or insuring the deposits of individuals in the member banks.

Mr. SHAFROTH. Yes; but in addition to that you can readily see that the very right which the Secretary of the Treasury has to put money in these banks or not to put money in these banks is something that would give the power to exact interest, if it is necessary.

Mr O'GORMAN. Do I understand the Senator from Colorado to say that there is an express provision in the Owen bill

at this time conferring that power?

Mr. SHAFROTH. I am not certain; but evidently the power which the Secretary would have of either depositing money there or not depositing money there would give him the power to prescribe the terms upon which it could be placed there. Mr. REED. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota

yield to the Senator from Missouri?

Mr. NELSON. I do. Mr. REED. The Senator from Minnesota asked whether there was a prohibition against the payment of interest upon bank reserves

Mr. NELSON. Upon deposits in reserve banks. Mr. REED. Did the Senator refer to reserves deposited by one bank in another?

Mr. NELSON. I referred to the deposits made in the reserve The member banks not only may deposit their reserves there, but they may deposit their other funds.

Mr. REED.

Mr. REED. Yes. Mr. NELSON. My contention is—and that is what is included in the Hitchcock bill-that the reserve banks should pay no interest on these bank deposits, whether they are a part of the reserves or whether they exceed the reserves.

Mr. SHAFROTH. That is true of the Owen bill also.

Mr. NELSON. I can not find it in the last print, but perhaps it was my mistake.

Mr. REED. May I ask the Senator from Colorado what section of the Owen bill provides that?

Mr. SHAFROTH. I am not certain, but I am satisfied that there is no power whatever given to these banks to pay any interest on deposits made with them.

Mr. NELSON. There is no express power to do so, but there is no inhibition against it.

Mr. REED. Mr. President, I have here the section which I think covers it, section 15-16.

Mr. SMOOT. Yes; the old section 16 and the new section 15. Mr. REED. To clear up the matter, I will state that in the Owen bill, as it appears in its last print, section 16 of the old bill becomes section 15 of the present bill. The section reads as follows .

The moneys held in the general fund of the Treasury, except the 5 per cent fund for the redemption of outstanding national-bank notes and the funds provided in this act for the redemption of Federal reserve notes may, upon the direction of the Secretary of the Treasury, be deposited in Federal reserve banks, which banks, when required by the Secretary of the Treasury, shall act as fiscal agents of the United States; and the revenues of the Government or any part thereof may be deposited in such banks, and disbursements may be made by checks drawn against such deposits.

That is a proposition very similar to the section of the Glass bill which came here from the House. It covers largely the same subject matter as the same section of the Glass bill; but the latter had at the end of the section as it appeared there these words:

Provided, That no Federal reserve bank shall pay interest upon any deposits except those of the United States.

Mr. NELSON. Yes; that is what I referred to.
Mr. REED. That language does not appear in the same place in the Owen bill, and I do not think it appears elsewhere in the bill.

Mr. NELSON. That is my understanding-that it does not

appear anywhere in the last print of the Owen bill.

Mr. ROOT. I should like to ask the Senator from Colorado whether, in his view, when the Secretary of the Treasury is authorized to deposit the funds of the United States in certain banks he has any authority of law to charge interest upon those funds?

Mr. SHAFROTH. He does charge interest now. money in various banks of the United States, and he gets 2 per cent interest upon it.

He has authority of law for that.

Mr. WARREN. I think there is no authority of law. It is true that the money deposited by the Secretary of the Treasury in national banks is now drawing the interest that is now demanded, but I have always understood-and I would like to be informed if the contrary is true-that the Secretary of the Treasury has no specific license of law to do that. understand, that while there is no law prohibiting it, there is

none specifically giving him that privilege.

Mr. NELSON. My recollection, if the Senators will allow me, is that in the so-called Aldrich-Vreeland bill there is a provision authorizing the Secretary of the Treasury to collect interest on a certain class of deposits, but it is so framed that it covers only the cases where the Government makes deposits in banks scattered over the country without using them for the purpose of checking against. It does not apply to current deposits made from day to day and checked against by the Government. I know something about it, because it was at my instance that that provision was incorporated in the act. I was in favor of having interest paid on all Government deposits in the national banks at that time.

Mr. WARREN. I recall that. Mr. NELSON. But, as a matter of fact, the committee cut my proposal down until it was limited to the class of cases I have mentioned.

Is not interest being charged on all of the Mr. WARREN. deposits now in the national banks, whether they are checking accounts or whether they are of a time or stationary nature?

Mr. NELSON. I do not know.

Mr. SHAFROTH. I understand that to be the fact.

Mr. NELSON. I am not advised as to what is the practice

Mr. WARREN. I understand so. I remember that a few months ago certain bankers were about to call a meeting of bankers to see whether they would continue to receive the deposits of the Government under the charges that were made, I think nothing came of it, because the stringency of the times or the higher rate of interest has made it desirable, I assume, for the banks to continue to pay the rate of interest which the present Secretary of the Treasury has prescribed that they shall pay

Mr. SHAFROTH. I will say that the Secretary of the Treasury told me that while there were some protests at the beginning, all of the moneys he could lend out with any degree of safety were eagerly taken by the banks, and 2 per cent interest

was being paid upon them.

Mr. WARREN. Because the demand became greater. Mr. SHAFROTH. Yes; perhaps the demand became greater at that time. I wish to say to the Senator from New York, however, that the power which is given the Secretary of the Treasury here to deposit money in these Federal reserve banks would, it seems to me, give him the right to prescribe the terms upon which the deposits should be made, just as I believe the Secretary of the Treasury now has the power to require that interest shall be paid upon the deposits which he makes in the national banks. That being the case, I believe it to be the intention of this bill-at least, it was my intention-that while there should be no payment of interest upon deposits made by the banks there should be power to charge an interest rate if it was deemed proper to do so in view of the manner in which the banks were being run.

Mr. ROOT. I think the terms of the House bill undoubtedly

imply that.

Mr. SHAFROTH. I think so. Mr. WILLIAMS. Mr. President, if the Senator from Minnesota will pardon me, I think the two parts of the bill that refer to the point are these:

Section 14 says:

Any Federal reserve bank may receive from any of its member banks, and from the United States, deposits of current funds in lawful money, national-bank notes, Federal reserve notes, or checks and drafts upon solvent banks of the Federal reserve system, payable upon presentation; or solely for exchange purposes, may receive from other Federal reserve banks deposits of current funds in lawful money, national-bank notes, or checks and drafts upon solvent member or other Federal reserve banks, payable upon presentation.

Mr. NELSON. There is no dispute about that paragraph.

Mr. NELISON. There is no dispute about that particular.

Mr. WILLIAMS. Then, on page 49 of this print—I have not the section right now, but I will get it in a minute—

Mr. O'GORMAN. Section 15.

Mr. WILLIAMS. No; that is another section. The other was

section 14. On page 49 of the comparative print this language

Nothing in this act contained shall be construed as taking away any overs heretofore vested by law in the Secretary of the Treasury which late to the supervision, management, and control of the Treasury Department-

And so forth

Mr. NELSON. I wish to say to the Senator from Mississippi that I am not so much concerned about the matter of interest on Government deposits.

Mr. WILLIAMS. No; I am simply trying to answer the ques-

tion of fact as to what the bill provides now. It goes on:

And wherever any power vested by this act in the Federal reserve board or the Federal reserve agent appears to conflict with the powers of the Secretary of the Treasury, such powers shall be exercised subject to the supervision and control of the Secretary.

From those two provisions compared with one another it would appear that they are given the power to receive the de-posits, subject to such other powers as the Secretary of the

Treasury now has,

Mr. NELSON. But the Senator overlooks the main question involved in the case, which I discussed. It was not so much the matter of interest on Government deposits, because, as I look upon that, it is to a large extent academic, for the reason that all the revenues go to the Government outside of the dividends paid to stockholders, the insurance fund, and what is retained for the purpose of accumulating a surplus fund. What I am concerned about more than anything else is the payment of interest by the reserve banks to their depositors. Unless that is prohibited we fall back into the old and dangerous rut of the present reserve system.

Mr. WILLIAMS. That would seem to fall within the powers

of the reserve board,

Mr. REED. I wish to ask the Senator from Minnesota a question. I agree with what he has said in regard to the limitation, and that there should be a limitation upon the Federal reserve banks paying interest to any of the member banks on deposits; but I wish to ask him if he did not intend to go further than that and prohibit banks from paying interest to each other, or whether he simply wanted the limitation placed upon the reserve banks?

Mr. NELSON. It would apply to all the deposits. If I re-call the language of what is called the Hitchcock bill, it prohibits a reserve bank from paying interest on any of its de-

posits. The Senator did not catch my question.

Mr. WILLIAMS. They would not get any.

Mr. REED. I understand the Senator means that; but does he intend to go further and prohibit any bank from paying interest upon deposits placed with it by any other bank?
Mr. NELSON. Oh, the Senator means the local banks?

Mr. REED. Yes.

Mr. NELSON. Oh, no. It does not affect member banks.

Mr. REED. And the Senator does not intend to affect them? Mr. NELSON. No; it does not affect them; it leaves member banks exactly as they are. This is simply to prohibit the reserve banks, which are made the holders of the reserves under the new system, from paying interest on deposits, which has been the great vice of the existing system.

I agree with the Senator on that.

Mr. WILLIAMS. The Senator means deposits made as a part of the reserve?

Mr. NELSON. Any deposits made with a reserve bank by a

member bank

Mr. WILLIAMS. The evils of the present system have grown out of the fact that interest was paid on the part of the deposits made by the country banks with the reserve banks, which by law was to constitute a part of the reserves of the country banks, only being kept there instead of in their own vaults. Suppose, however, that a bank, for its own accommodation, the accommodation of its business, keeps on hand in New York, in addition to its reserve under the law, a deposit for other purposes; of course the Senator does not want to disturb the payment of interest upon that?

Mr. NELSON. Certainly; that is the very thing I refer to ore than anything else. The reserves required to be kept more than anything else. under the law are mandatory. The bank has to deposit them whether it is willing or not; but all other deposits above that

are at the volition of the bank,

Mr. WILLIAMS. I agree with the Senator that, in so far as the bank is compelled to keep a part of its reserves at a certain place, interest ought not to be permitted to be charged it, because that reserve ought to be held for reserve purposes, subject to instant call at any time. Suppose, however, you were carrying on a bank in Minnesota and you were keeping in St. Louis more than the reserves which the law required you to keep there—that is, the proportion of them that would go to this reserve city.

Suppose you had an immense business there of various sorts and your checks were coming in and going out all the time. Suppose you needed accommodation at certain seasons of the year, and in order to secure that accommodation you kept in St. Louis, in addition to what the law compelled you to keep there, a couple of hundred thousand dollars. Now, of course, you would not want to keep that amount there at all unless you could get some interest upon it. The truth is that it works in this way: You put it in there and get a certain amount of interest, and then, when crop-moving time comes, that bank

stands behind you and lets you draw.

The viciousness of the present system consists in the fact that what ought to be the reserve of the country, held subject to instantaneous call, in order to protect the country bank or the reserve city bank, finds itself wrapped up in New York, and it can not be gotten away. Of course, as to other deposits made by banks, they stand upon no higher ground, as far as public policy is concerned, than my individual deposit or yours in a New York bank, and certainly they ought to be allowed to earn interest. If you do not let them earn interest, the deposit never

will be made, except so much as the law compels to be made.

Mr. NELSON. That is all the better; that is what makes
the system safe. There is where the Senator from Mississippi utterly fails to draw a lesson from our present reserve system. It is not only that they pay interest on the required reserves they deposit, but they pay interest on all the deposits of the country banks, and by that means draw the money to New York or other reserve centers. The country banks, instead of keeping the money at home, send it to New York or other reserve centers for the sake of getting 2 per cent interest. And then the banks in the reserve cities loan it out on stock collateral as call loans, which, in cases of great emergency, can not readily be converted into cash.

The seat of the difficulty, to my mind, is the payment of interest by the banks on bank deposits.

Mr. McCUMBER. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from North Dakota?

Mr. NELSON. Yes.

Mr. McCUMBER. I want to ask the Senator whether the Hitchcock bill, which he is supporting, either authorizes the reserve banks to pay interest on deposits made by the Government to check against or authorizes the Secretary of the Treasury to charge interest as a condition of deposit?

Mr. NELSON. No; it does not. Mr. McCUMBER. Did I understand the Senator to say that he did not consider it of any great importance whether they paid interest on the Government deposits or not?

Mr. NELSON. No; I do not to the extent I do of bank de-

posits, as outside of the dividends to the stockholders, the insurance fund, and the accumulation of a surplus everything goes to the Government.

Mr. McCUMBER. If that be true, does the Senator think that the Secretary of the Treasury, who is to receive on behalf of the Government's profit from a banking institution in which it makes no investment and without any responsibility on its own part, should, in addition to that, make a charge for the deposits as they come into that bank-

Mr. NELSON. I do not understand the Senator. I suggest that he ask a simple question and not make it so complicated

and long.

Mr. McCUMBER. I will put it in simpler form if the Senator wishes it. Suppose the Government deposits in one of the Federal reserve banks a million dollars. The Government may or may not own any stock in that bank. The Government is to get all the profits of that bank above a certain per cent which is to be paid in dividends and a small amount for surplus and a little insurance probably. All the balance is to go to the Government. Now, if the Government is to receive that without an investment in the bank and without any responsibility, does not the Senator think the Government ought not to charge for the use of the funds that it deposits in those banks?

Mr. NELSON. Certainly; I do.

Mr. McCUMBER. Should there not be a prohibition against

charging it?

Mr. NELSON. Certainly. That is what we have in the Hitchcock bill. We propose to prohibit the payment of interest on Government and all other deposits in the reserve banks.

Mr. McCUMBER. That is precisely what I wanted to know.

Mr. NELSON. Mr. President, we must look at this question from a broad standard in Lindon our present subtraction.

from a broad standpoint. Under our present subtreasury system the surplus funds of the Government are locked up in the subtreasury until the Secretary of the Treasury sees fit, in cases of money stringency or otherwise, to distribute the funds among the banks. It is all discretionary with him. He can grant such favors to some localities and withhold them from other localities. We want a system of legislation which will divest the Secretary of such discretionary power. We want the surplus funds of the Government, instead of being locked up in the vaults of the Treasury, to be kept in constant circulation, and the only way we can have them in constant circulation is to do the same as the British Government does with its funds. It deposits them in the Bank of England and checks against them, and in that way the money is constantly in use. We want to have it constantly in use for the people of the United States, for whom we are seeking to establish a helpful and

beneficial banking system.

Mr. CUMMINS. Mr. President—
The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Iowa?

Mr. NELSON. Certainly.
Mr. CUMMINS. I should like to ask a question, but I will not do it if it has a tendency to interrupt the Senator from Minnesota

Mr. NELSON. Oh, no; not at all. Questions are oftentimes

very instructive

Mr. CUMMINS. My question is not to instruct the Senator from Minneson, because that would be impossible for me to do. Neither is it to bother or budger him. I have profound confidence in his judgment with regard to this matter. I am a little bit mystified with one phase of the subject. He says that the banks in New York, for instance, ought not to pay interest upon deposits.

Mr. NELSON. Bank deposits.
Mr. CUMMINS. Upon bank deposits, because the payment of interest brings the deposits to New York, and the banks in New York in order to be able to pay the interest must in turn invest the money in such securities as are current there. I agree to that. That seems to me to be perfectly plain. I can see, too, that there may be an emergency in which the banks in New York having thus invested the money would be unable to re-

spond to the demands of their depositors.

But what bothers me is that this bill requires the same banks to deposit 5 per cent of their demand obligations and a certain per cent of their time obligations with the Federal reserve per cent of their time obligations with the rederni reserve bank. The Federal reserve bank is expected immediately to invest that money in the securities that are described in the bill, or at least all of that money with the exception of the reserve which it is compelled to hold. If it invests the reserve money in securities, why should it not pay interest to the banks

which deposit it?

Mr. NELSON. Why should it? Will the Senator explain

why it should?

Mr. CUMMINS. The vice of the present system is well described by the Senator from Minnesota, that the habit of paying interest draws money to New York which ought not to flow there; but the law compels the banks to put their money into the reserve bank and it must go there. If the vice of paying interest is that it brings about an artificial distribution of on Government deposits was academical.

money, it seems to me that the Federal reserve bank ought to be compelled to hold this reserve money without being invested at all in order to respond to its depositors whenever called upon. I can not just see why if the Federal reserve bank is told to put out the money at interest it should not pay a part of that interest anyhow to the banks which deposit it.

Mr. NELSON. The trouble with the Senator's statement is

that he assumes that both in the present system and in the system which we establish here the only deposits are what are called the reserves. As a matter of fact, the country banks in the interior have as a rule had a great deal more on deposit in the banks of New York than they are required to hold as

reserves, and so they will under this system.

Now, I want to tell you wherein this system differs from the present system. Technically, under the existing system, no bank has a right to loun out its reserves. It is required to keep a certain amount of reserves. But that is not the case under the system that we propose to establish under this bill. The reserve

banks can loan out the reserves or any of their money so long as they keep a reserve of 35 per cent.

Mr. CUMMINS. That is just what presents the difficulty, in my mind. I was not speaking, of course, about the deposits other than the reserve deposits, but the law comes to the bank and tells it to deposit 5 per cent of its demand obligations with the reserve bank. That, of course, is for safety. The reserve bank immediately loans that money out.

Mr. NELSON. It can not loan all of it, Mr. CUMMINS. It loans all of it except a certain reserve which it is required to keep. If it is required to loan the money which belongs to the depositing bank and earn interest upon it, why should it not pay to the depositing bank a certain part, at least, of the interest which it actually earns upon the deposit?

That is what it is difficult for me to understand.

Mr. SHAFROTH. If the Senator from Minnesota will excuse me, I will state the reason why we thought there should be no me, I will state the reason why we thought there should be no interest paid to a member bank. It is because it is that contribution which the member bank makes to the system in order to get the protection of having its drafts discounted. Of course this is supposed to create a discount market, by which a member bank can go and present its paper and have it discounted there. It was thought that to do a general banking business beyond the amount and to pay interest would cripple perhaps the banking system and perhaps lead to favoritism, in the way of giving too large an amount of money in the shape of interest, and that it might seriously impair the operations of the Federal reserve We thought it was nothing but fair that the member bank should contribute this money without interest for the benefits which it receives in having its reserves held and in having the security which in time of a run is of such great moment to it in preventing the bank from closing.

Mr. O'GORMAN. Will the Senator allow a suggestion in connection with the statement made by the Senator from Colorado?

Mr. NELSON. Certainly.

Mr. O'GORMAN. There was another reason why it was thought inadvisable to pay any interest to a member bank. The member banks, as has been suggested by the Senator from Colorado, are to be the beneficiaries of this system. They are to enjoy all its privileges and advantages, and its greatest privilege is that it affords an opportunity to a member bank to go to the regional bank with its collateral and get immediate accommodation. If the Federal reserve bank must, in the first instance, pay interest to the member bank, the reserve banks making the loan to the member bank must charge a correspondingly high rate for the accommodation. That suggestion, I think, had weight with those who considered this proposition in committee. In other words, by not paying the member bank any interest upon its deposit the member bank can get the accommodation of the reserve bank at a cheaper rate.

Mr. CUMMINS. All that simply means that money contributed to the bank is paid back to them through discount instead of withdrawing it in the ordinary way. I am a great believer, so far as possible, in allowing people to make their own contracts rather than have the Government make them. I have on tracts rainer than have the Government make them. I have no definite opinion about the question we are now discussing, and that is the reason why I asked the Senator from Minnesota, if the reserve bank shall loan out the money, why there would be any danger in paying interest upon the deposit.

Mr. NELSON. The danger would be akin to that in the present system, though, perhaps, not in as great degree.

Mr. NELSON. Tyield to the Senator from New York.

Mr. NELSON. I yield to the Senator from New York. Mr. ROOT. I want to turn the mind of the Senator from

Minnesota to a possible modification of the remark he made a short time ago to the effect that the question of paying interest

Mr. NELSON. Perhaps I overstated it.
Mr. ROOT. That is undoubtedly true, if it is certain that the regional reserve banks are so profitable that they make 6 per cent interest and have the money to divide with the Govper cent interest and have the money to divide with the Government in the way of profits. But, suppose the regional bank does not make its 6 per cent profit, then it is not academical, because, in that case, if it has been prevented from making 6 per cent profit on the stock to pay to the member banks by paying interest to the Government, the provision permitting the requiring such interest will just so much reduce the benefits that are to go to the member banks in return for their contributing the capital and keeping approximately half their reserves with the regional banks. It seems to me it is only prudent for us to contemplate both possibilities-the possibility of a large profit and the possibility of a small profit or none. I think the Government ought not be permitted to charge interest to these regional banks. I agree with the Senator from Minnesota in his view about the effect of paying interest. I do not believe in having banks receive interest upon their deposits.

Mr. NELSON. Especially on bank deposits,

Mr. ROOT. I think, in the business between banks, there should be no interest as from one bank to another. I think that results in a better administration of the business affairs of the community; but I think that rule ought to be applied to the Government, and that the Government, inasmuch as after reaching a certain point it is going to have all the profits in restricting the stockholders who supplied the capital to a moderate and limited profit, ought not to be permitted to make an additional profit by the way of charging interest, which will in any event prevent the member banks who have supplied the capital from getting their 6 per cent. I think it is fairer all the way around, if the member banks are to be limited in the profits that they are to receive and the Government is to take all the surplus, that the member bank should have the income up to the limit without having it interfered with by the Government charging interest,

Mr. NELSON. I concur in what the Senator from New York

has so well stated.

There is another consideration that I want to state to the Senator, and that is a consideration, I think, that has affected every member of this committee. We have felt all along that in establishing this new system of reserve banks we are not establishing them for the purpose of making money. The chief object of the system is to create these reserve banks to ald the member banks and the people of the country at large. content that these banks shall pay the dividends and provide an insurance fund and provide a surplus. We are content if the banks will do that and accomplish the other great purpose we have in view, and that is, to be an aid to the local banks throughout the country. If we were building up these reserve banks as money-making institutions for the mere sake of seeing how much money they could earn, then it would be a question whether we should exact interest on bank deposits or Government deposits. Our present system of reserves has disclosed the great danger that lies in the payment of interest on bank deposits.

Senators seem to think that all these deposits with the New York and Chicago banks are limited to the reserve requirements, In normal times the banks of the entire country generally keep a much larger amount than the reserve requirement. They keep it because for the time being they can not put it into active use at home, and they send it there for the sake of getting the 2

per cent interest.

Mr. WILLIAMS. State banks will keep it there as well as the National Government,

Mr. NELSON. State banks and trust companies, as well as national banks-

Mr. O'GORMAN. Mr. President— Mr. NELSON. If the Senator from New York will allow me, I will add one more word in this connection. I have not commented upon this system of reserves and the payment of interest for the special purpose of criticizing the New York banks. I do not mean to say that the banks there are the only delinquents. The country banks which have loaded up the big banks in the city for the sake of that 2 per cent are as much to blame-are, so to speak, particeps criminis.

Mr. O'GORMAN. I have only to suggest, perhaps, a reason why, as I understand it, the country banks keep on depositing in the central reserve cities—New York, Chicago, St. Louis—amounts in excess of the legal reserve requirement. They do it generally so that they will be in a position, when their needs require it, to get accommodation from the large central reserve city banks; and the extent of that accommodation will depend | he can get at any moment.

to a large degree upon the deposits which they keep from time

to time in excess of their reserve deposits.

Again, it has been suggested that very often the smaller banks forward money in excess of reserve requirements either to reserve cities or to the central reserve cities to minimize the risk, whatever it may be, in certain communities of loss of money by bank robberies and such causes. Those, as I say, are two reasons which at times operate with certain of the small banks throughout the country to cause them to forward their moneys to the reserve centers.
Mr. ROOT. Mr. President—

The VICE PRESIDENT. Does the Senator from Minnesota yield to the senior Senator from New York?

Mr. NELSON. I do.

Mr. ROOT. Does not the junior Senator from New York think that there will be a better condition in respect of the forwarding of money to New York from the country banks if this bill operates to create a really elastic currency? Of course, no country bank is going to send money to New York at 2 per cent merely for investment purposes if it can get 5 per cent or 6 per cent with good security at home.

Is it not also a fact that the country banks have been sending their money to New York at a period of the year when it was not needed in their own localities, relying upon getting it back

when needed?

Mr. O'GORMAN. The evidence before our committee has been to that effect.

Mr. ROOT. So this practice has been a kind of rude method of making the currency elastic for purposes of their own

Mr. O'GORMAN. I might add to what the Senator has suggested that they send the money, when they have a surplus of it at home, to the reserve cities, calling upon it when their needs at home require it; but beyond that their needs at home will very often require much more than they have available. and it is then that they seek accommodation from the banks in the reserve centers, which have had the benefit of their accounts. It is a mutual accommodation.

Mr. ROOT. So that it is a still further way of making the currency elastic as to that particular locality?
Mr. O'GORMAN. Yes.

Mr. ROOT. They reduce the currency of that locality when it is not needed by sending it to reserve cities. They increase it when it is needed by calling back the money which they have sent and getting still more by getting accommodations in the way of loans. Is it not probable if we do through this bill get a really elastic currency, that the old practice, which was a makeshift to accomplish the same result, will be largely decreased?

Mr. O'GORMAN. It will be decreased, but not entirely discontinued. The evidence of the bankers who appeared before the committee was to the effect that the institution of this new banking system will not interrupt the relations which now exist between the country banker and the banker in the reserve cities; but I can very properly see, as the Senator suggests, that the advantages of the new system will very much dimin-

ish the extent of those relations.

Mr. REED. Mr. President, I think it ought to be stated at this time that what the two Senators from New York have said upon this question is absolutely accurate; that there is a further circumstance which ought to be considered. It is true that a bank having surplus money at certain seasons of the year will send it to a reserve city because it is an actual surplus, because it can get interest on it, and because it can secure accommodations in return for it; but there is another reason, which is that a country bank, if it had nothing else to rely on except its own resources, would be required to keep probably 25 per cent of money on hand all the time in order to meet the demands which might come, not exactly from day to day, but which might be reasonably expected to come every few days

That bank will deposit frequently everything, clear down to the reserve it is required to keep in its own vaults, in some reserve bank that is near-by. It puts it there for two reasons: First, it can have it close at hand in the event it is called upon; and, then, it gets a little interest upon it. So it is not exactly accurate to say that this money is deposited only in seasons of plenty with the banks of reserve cities, and drawn out in sensons of scarcity; but it is a thing which goes on all the time, the ordinary country bank keeping scarcely more than its till money, and then carrying its real balance in some near-by city bank, because it treats that money in the near-by city bank just as the ordinary depositor treats a deposit in a bank as cash that Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Kansas?

Mr. NELSON. I de. Mr. BRISTOW. I want to ask the Senator from Minnesota if, in his opinion, this system of paying interest on deposits of other banks by the banks in the central cities has not a tendency to deprive the localities where these country banks are situated of the full value of their resources, because if they can put a considerable portion of their money, which is a surplus, in those cities, have it subject to call, and yet get interest on it, they are more likely to do it than they are at times to gratify what might be a legitimate demand in their own communities, and husbanding their funds for some expected emergency.

Mr. NELSON. The Senator is undoubtedly correct in that The more local banks keep their funds at home the better they can supply their home customers at lower rates. In addition to that the local banks ought not to run the risk of placing their deposits where, in case of money stringency, they are not available. They are the funds of their depositors, and they ought not to transmit these funds to remote points, so that

in case of emergency they can not be readily drawn upon or be promptly available for the demands of their depositors.

Mr. POMERENE, Mr. President— The PRESIDING OFFICER (Mr. Walsh in the chair). Does the Senator from Minnesota yield to the Senator from Ohio? Mr. NELSON. Yes.

Mr. POMERENE. I think the Senator will also agree with me that it also appeared before the committee that often the country banks were encouraged to keep a large part of their funds in the reserve cities, where they were drawing interest and where the funds would be available for investment upon the stock market in call loans,

Mr. NELSON. Certainly. Mr. POMERENE. I mean that that was frequently done on the initiative of the country banks themselves; and in that way this money was often invested in securities which were of variable values, and the funds in that way would be in such a condition that they would not be available for the country banks in their own localities in time of need.

Mr. NELSON. That is true. I remember one of the hearings before the committee when a prominent banker from Chicago was so anxious to retain a part of the present system that he really, as members of the committee will recall, suggested to us that, while we might establish this new reserve system, we ought to leave a part of the old system with the banks; and he went on to describe how many country banks he had on his string and how anxious he was to retain them as his customers. He feared that unless we retained a remnant of the old reserve system for the benefit of the big banks his bank and banks similarly situated would suffer.

Mr. POMERENE. Mr. President, it seems to me that the very position that some of the bankers took indicated that they were very much more interested in the amount of deposits which they had in their own banks than they had in adopting any valuable

and correct system for the country at large.

Mr. NELSON. That was probably true in some cases.

Mr. ROOT. But the Senator does not mean that was gen-

Mr. POMERENE. Oh, I do not say so. I say it with respect to some of them.

Mr. ROOT. Mr. President, I am very glad the Senator from Ohio disclaims any intention to apply to the great body of the bankers of New York any such selfishness as he has found in occasional cases. The observation I wish to make is this: That I have found among the bankers of New York a widespread and, so far as I have observed, a universal feeling that it would be for the best interests of this country that the system under which the reserves of the banks of the country were concentrated in New York City by the working of our reserve provi-sions and the payment of interest should be broken up. They prefer that the banks of New York should lose those deposits rather than that the system should be continued, and they are willing for and more than willing, and they cheerfully con-template the removal of those deposits, because they consider that it would be for the best interest of the country that that should be done.

Mr. POMERENE. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield further to the Senator from Ohio?

Mr. NELSON. Yes.

Mr. POMERENE. Mr. President, I should regret if anything I said should lead any Senator to think that I was of the opinion that what I expressed as being the view of some of the in the first instance, to help in moving the cotton crop of the

bankers was a general view among them. I have in my mind at this moment a statement made by Mr. Vanderlip, in which he said that he expected under this system, if adopted, that his bank would lose \$50,000,000 of country deposits; but he expected to make that up by the ability of his bank to invest their funds in commercial paper rather than in call loans. Lest anything that I may hereafter say on this subject may be misunderstood, I desire to add that as to many of the bankers, I feel that they are very much interested in having a proper system, and that the patriotism of the bankers is, on the average, just as great as that of any other class of our citizens.

Mr. WEEKS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Massachusetts?

Mr. NELSON. I yield to the Senator from Massachusetts. Mr. WEEKS. I want to suggest further along the line to which the Senator from Ohio [Mr. POMERENE] has just referred, that the reason the banker gave for his being able to make up the losses which he may suffer on account of the \$50,000,000 of deposits referred to being withdrawn, was that the profit made on that \$50,000,000 was comparatively small; that for five years the average interest which the bank had received from call loans was 2.98 per cent, on meney for which they paid 2 per cent, and of which 25 per cent had to be kept in reserve, which amounted to sixty-six hundredths of 1 per cent, so that there was only a net profit of thirty-two hundredths of I per cent without taking out the cost of handling the funds and the proportional part of the overhead charges. is fair to assume that the net profit made would be not over one-quarter of 1 per cent, and it is fair to assume, also, that that loss would be made up by increased rates on commercial paper which the banks might be able to secure under the changed system.

Mr. NELSON. Mr. President, I wish to add one thing to what has been said by the Senator from Massachusetts; and in saying it I express, as I always do, my own honest conviction

on the subject.

Of all the men who appeared before our committee to give us information, I found Mr. Vanderlip, of the National City Bank, the broadest, the fairest, and the most impartial. While I derived some benefit from the statements of other bankers, I really got more instruction, more practical and valuable information from what he stated than from all the rest of the hearings. will ask every Member of the Senate to read the statements of Mr. Vanderlip.

remember two of Mr. Vanderlip's expressions. While the Chicago bankers and others from the bankers' convention had come here and protested against that "horrible requirement" of compelling one reserve bank, nolens volens, to discount paper

for another, Mr. Vanderlip's reply to that was:

While it is obnoxious, it is absolutely necessary to the system, and without it the system can not live. You must have it, so that you can pipe the reserves from one reserve bank to another.

He was equally frank about the matter of deposits and interest, that we have discussed here. He entirely agreed with the view I have presented, and with the view other Senators have presented, that the present system of reserves and the payment of interest on bank deposits was a dangerous thing and ought to be eliminated. While it would entail in one way, in the first instance, some losses on his bank, he conceded that it was absolutely necessary in order to perfect a good system.

Mr. President, I shall not go into this branch of the subject further than to say that I am anxious to see this system of reserve banks made a success. I do not want these banks loaded down with too many burdens. I want them to have the deposits down with too many burdens. of their member banks, whether they be reserves or other deposits, without interest, because I believe they can better utilize them and make them available for the system. I want them to have the Government deposits free of charge, because in that way those deposits will constantly remain in circulation and can be utilized for the benefit of the trade and commerce of the country, and especially can be utilized in the moving of The benefit derived from paying no interest on Government deposits will inure to advantage of the entire country

I wish to call the attention of Senators to one fact, to which I shall refer later on. Under our new system of income tax the revenues derived from that source will pile up in our Treasury at the end and beginning of fiscal years. There will be for a considerable time a surplus over the Government disbursements, This surplus may temporarily prove to be a great blessing to the country.

The revenues from this source will pour into the Treasury the last part of June or the first part of July. If they are properly handled, the Government deposits from this source can be used, South; they can be used next to move the wheat crop of the Northwest; they can be used next to move the cattle and hog crop of the Middle West; and they can be made available to promote our manufacturing industries here in the East. So, it seems to me, when we take into account the blessings that will be conferred on the country by utilizing the Government deposits, instead of burying them in subtreasuries, as at present, it is picayunish to consider this question of interest.

So about the other matter: The reserve banks are intended to help the member banks. They can help the member banks in one of two ways, either by giving what are called book credits or by giving actual cash. The more we burden the reserve banks the more they will have to charge their customers. If we want the reserve banks to be helpful to the system, to the local banks, to the member banks, in the true sense of the term, the less burdens we impose upon them the better for the welfare of the country.

Bear in mind, Senators, what I have already said—that this is a system we are creating, not for the purpose of making money, but to help the scattered banks of the country in cases of emergency and at all other times. I shall not, however, take up the time of the Senate further upon this subject.

Another drawback of the present system has been the rigidity and lack of elasticity in its circulating notes. Tethered to Government bonds, as it has been, it has been unable to respond in emergencies to the varying and ever-changing wants of trade and commerce. It has been a question rather as to whether it would pay to invest in bonds and secure circulation thereon instead of responding to the commercial and trade wants of the country.

The pending legislation aims to cure this evil and remedy this drawback. It proposes to issue currency based upon shorttime commercial paper growing out of the transactions of legitimate business backed by an ample gold reserve. system is properly administered and worked out in its details, the volume of circulating notes of the reserve banks will necessarily ebb and flow in harmony with the wants and demands of commerce; and this is exactly the kind of paper currency that we need and the kind of paper currency that the leading countries of the Old World have had for years. The only mistake we are making in this change, in my opinion, is that instead of having a system of regional or reserve banks we ought to have a large central bank, of nonvoting stock, subscribed by the people, under the absolute control of the Federal Government. Such a bank would be a great reservoir from which all national banks as well as State banks could at all times secure help in times of stress and emergency. It would be a great reservoir for the reserves of the country and for the deposits of the Government, and it would prove safer and more helpful than a scattered system of reserve banks, however well managed. The more of such banks there are, the more the reserves and deposits are dissipated and scattered, and it will be difficult in the operation of the system to avoid more or less friction between the different reserve districts and reserve banks of the country. chief faith is in a strong central bank of the kind I have indicated, yet I have brought myself to acquiesce in a system with no more than four reserve banks, because it approximates more nearly to the advantages of a central bank and minimizes the drawbacks resulting from the lack of such a bank. A publicly owned central bank under the absolute control of the Federal Government is entirely different from that of a private bank, such as the second bank of the United States or that of the bankers' bank recommended by the Monetary Commission. The prejudice existing against these banks ought not to be transferred to such a central bank as I have suggested. It is a great pity that Senators feel themselves tethered by party platforms and party obligations to such an extent as to prevent the establishment of the best possible monetary system. me it seems as though the proposed legislation is only a halfway measure, a mere temporary palliative. I imagine that the practical operation of the system will in time demonstrate the necessity for a single Government-controlled bank, and the distant future may have such a bank in store for the people of this country.

With these preliminary observations, I will now proceed to discuss the proposed legislation in detail. I shall refer to the House bill as the Glass bill, to the substitute reported by the chairman of the Banking and Currency Committee as the Owen bill, and to the substitute reported by the Senator from Nebraska as the Hitchcock bill.

## SECTION 1.

The first section of the bill is not material, as it relates merely to the definition of terms used in the several bills.

SECTIONS 2 AND 3.

The Glass bill provides that the Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency shall constitute an organization committee to organize and establish Federal reserve districts and Federal reserve banks. The Owen bill provides that the organization shall be effected by a committee consisting of the Secretary of the Treasury and not less than two members of the Federal reserve board, while the Hitchcock bill proposes that the organization and establishment of the banks and districts shall be made by the Federal reserve board. The reason for this recommendation is that as the Federal reserve board is to have charge and control of the system it ought, in the first instance, to map out the system under which it is to operate, for it will be in better condition to know how to lay out and establish the districts.

# NUMBER OF BANKS.

In the next place, the Glass bill authorized the establishment, in the first instance, of not less than 12 Federal reserve banks, with the option to establish more if desired. The Owen bill provides for the establishment of not less than 8 nor more than 12 banks. I think the last amendment to the Owen bill provides for from 8 to 12 banks.

Mr. SHAFROTH. That is right. Mr. WILLIAMS. Not less than 8.

Mr. NELSON. Not less than 8 nor more than 12. The Hitch-cock bill proposes that only 4 Federal reserve banks shall be established in the first instance, and that after these have been in operation for two years the Federal reserve board may add 8 additional banks if deemed advisable. As I have already stated, the new Owen or caucus bill provides for not less than 8 nor more than 12 banks.

### STOCK SUBSCRIPTIONS.

The Glass bill requires a subscription on the part of all national banks to the extent of 20 per cent of their capital, one-fourth to be paid in cash, one-fourth in 60 days, and the balance to remain a liability subject to call. The Owen bill requires subscription on the part of national banks to the extent of 6 per cent of their capital and surplus, one-sixth to be subject to immediate call, one-sixth in three months, and onesixth in six months, and the balance to remain subject to future calls. The Hitchcock bill provides that an amount of stock equal to 6 per cent of the capital and surplus of the bank shall be allotted to each of the national banks for underwriting and subscription, with a provision that the allotted stock must for 60 days be offered to the public for subscription, with the requirement that the bank must subscribe for all the stock not taken by the public, and that the stock subscription must be paid in gold or gold certificates, one-third at the time of the subscription, one-third in 30 days, and one-third in 60 days. The Owen bill, in like manner, provides that stock subscriptions must be paid in gold or gold certificates. The Glass bill is silent on this point. By the Owen bill it is provided that in case the subscription by the banks is insufficient, then the public, under certain limitations, may subscribe, and that if such subscriptions prove insufficient, then the Federal Government may subscribe for the stock of the banks.

The plan of allowing the public to subscribe for the stock in the first instance, as proposed in the Hitchcock bill, is of great advantage. The public will undoubtedly subscribe for the stock, and to the extent of such subscription it will relieve the member banks from depleting their own capital to supply capital for the reserve banks, and it will also to that extent increase the banking capital of the country.

Under the Glass bill or under the Owen bill, whatever the subscription may be in the one case or in the other, it is a subscription that is mandatory, and it is that much of the capital taken out of the local banks to supply capital to the new reserve banks. It does not increase the banking capital of the country one lota. It simply transfers a part of that capital from the local banks to the reserve banks.

Under the plan of the Hitchcock bill, we provide that the same amount of stock as in the Owen bill—to wit, 6 per cent of the capital and surplus—shall be allotted to every national bank, and that that national bank must offer the stock for 60 days to the public; and if the public does not subscribe for the stock within the 60 days, whatever is left unsubscribed for the

banks must take absolutely.

There were two reasons which actuated our section of the committee in this respect. One was to popularize the system. A great deal of objection was made by many of the country banks to compulsory subscription. They said, "It is too arbitrary, too tyrannical, to force us, whether we are willing or not, to take stock in these regional banks."

That is one reason which actuated us. The other reason was that we thought by leaving to these member banks the privilege of offering that stock to the public for 60 days, they could relieve themselves of that burden, and by relieving themselves, if that stock was taken by the public, whatever the public paid would be that much added to the banking capital of the country.

In the case where it is mandatory upon the banks it amounts simply to a transfer of the capital from one bank to another; it does not increase the banking capital of the country, while in the case of popular subscription, if that should prove a -and I am inclined to think it would be in a great many localities-there would be added that much money to the banking capital of the country. That is what actuated the members of what I may be permitted to call the Hitchcock section of the

There is another provision in the Glass bill and in the Owen bill. There is double liability imposed upon stockholders. This we have not included in the Hitchcock bill. We have felt that under this system it would be imposing too much of a burden, that it would make the stock unpopular, and would prevent the public from taking the stock to impose the double liability. The double liability remains under our national banking law in respect to the stockholders in our national banks, but the stockholders in these reserve banks will be the member banks under the Glass and Owen bills. Under the Hitchcock bill it will be the public and the bank.

You must bear in mind that while our section of the committee proposes to have this stock offered to the public for 60 days we do not propose to give the stockholders as such any voting power. The only power we give to the member banks is that, on account of the reserve requirements, we give them the right to vote for and to elect four out of nine directors of the

reserve or regional banks. Under the Glass bill and the Owen bill the stock is not transferable and can not be mortgaged. I think I am correct in that statement. Under the Hitchcock bill the stock is transferable under rules to be established by the Federal re-serve board. We could see no good reason for preventing a transfer of this stock so long as the stock had no voting power. All the stockholder would secure in a transfer of the stock would be practically a certificate that would entitle him to a dividend of 5 per cent, if earned. Beyond that he would have no voice at all in the control and management of the banks. If the stock was owned by the member banks in-stead of by individuals still the member banks would have no voting power in respect to that stock as stockholders. They would have a voting power simply because their reserves were required to be in the reserve banks, and their voting power would be limited to the election of four out of the nine directors. We could see no good reason for preventing this stock from being transferred or, if you please, mortgaged. There is a radical difference between the bills in respect to

the capital required by these reserve banks. Under the Glass bill the reserve banks are required to have a capital of not less than \$5,000,000, under the Owen bill \$3,000,000, and under the Hitchcock bill \$6,000,000. When the Federal reserve districts have been established and a certificate thereof filed with the Secretary of the Treasury, the Federal reserve board, under the Hitchcock bill, is required to allot to each national bank the shares of stock which it is required to underwrite and subscribe for; and when \$6,000,000 have been subscribed for, and onethird of the subscription has been paid in, the Federal reserve board, through its governor, issues a certificate of incorporation, which must be duly acknowledged and filed; and that certificate constitutes what may be termed the charter of incor-

The Hitchcock bill differs from the Owen bill and the Glass bill in this particular: The Owen bill and the Glass bill substantially provide that the certificate of incorporation shall be signed and certified by a limited number of member banks. Really it is not material. Either course is sufficient. In either the certificate is the final act which creates the corporation.

There is one other difference to which I want to call your attention. Under the Hitchcock bill a reserve bank is not allowed to commence business until two-thirds of its capital, or \$4,000,000, has been paid in; in other words, while it may be incorporated and declared a corporation when the subscription has been made and one-third of it paid in, while it may go on and organize and prepare for business, yet it can not actually commence business until two-thirds of the capital has been paid in, or \$4,000,000 in all.

Under the Glass bill the bank can not commence business until \$5,000,000 has been subscribed for and paid in, while under the Owen bill when not less than \$3,000,000 has been

subscribed for and one-sixth, or \$500,000, has been paid in the bank may begin business.

In reference to the power of the reserve banks, I desire to call your attention to the fact that paragraphs 1 to 7, relating to the powers of reserve banks, are identical in the Owen and Hitchcock bills. The Glass bill does not seem to contain any provision equivalent to those seven paragraphs.

Paragraph 8 of the Owen bill, as to the power of these reserve banks, is not found in the Hitchcock bill, and is, in our opinion, a most dangerous provision. This paragraph, in substance, permits the new reserve banks to obtain bond-secured circulating notes in the same manner and under the same conditions as national banks obtain their notes under the existing law. This provision is wholly unjustified, for it is simply an extension of our present system of bond-secured currency. It gives these reserve banks the same right to secure currency and the same kind of currency as national banks now obtain under existing law, to wit, on Government bonds.

I have supposed, Mr. President, that one of the ultimate pur-

poses of this bill is to eliminate in time the national-bank note currency and to substitute for it currency issued through the new reserve banks, so as to give us one uniform system of currency. The authority given by paragraph 8 tends to check and retard such a change. It would simply permit the reserve banks to do what national banks now do—to file United States bonds with the Comptroller of the Currency and secure circulation on them.

Mr. BRISTOW. Mr. President—
Mr. NELSON. It gives authority to increase the volume of our nonelastic bond-secured currency, and that is what I supposed we were trying to get away from in this legislation.

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Kansas?

Mr. NELSON. Certainly.

Mr. BRISTOW. Let me inquire of the Senator if it would not open the door to a very excessive inflation in time by keeping alive all the currency that is now out on bonds and then adding to that all that may be issued on the assets which are provided in the bill?

Mr. NELSON. Certainly; it would lead to a dangerous condition; and what is more, it would perpetuate the present nonelastic bond-secured system of currency from which we are seeking to escape.

Mr. SHAFROTH. I will state, however, to the Senator from Minnesota that the number of bonds the United States Government has upon which circulation can be issued is so limited that it would be impossible to have any considerable increase in that respect.

Mr. NELSON. There is any amount of bonds.

Mr. SHAFROTH. Oh, no.

Mr. NELSON. Oh, yes; there is. Mr. SHAFROTH. I mean the bonds upon which circulation can issue now

Mr. NELSON. Circulation is issued on 4 per cent and 3

Mr. SHAFROTH. But they have not the circulating privilege, understand, now.

Mr. NELSON. Yes. You will find that a lot of the old 4 per cents are a basis of circulation.

Mr. SHAFROTH. And have been for a great many years.

Mr. NELSON. For a great many years there were 3 per cent bonds.

Mr. SHAFROTH. I do not believe you can find at the present time \$200,000,000 of bonds of the United States which would come within the provisions of the act.

Mr. WILLIAMS. That are not already the basis of circula-

tion?

Mr. SHAFROTH. That are not already the basis of circulation. Of course \$758,000,000 of those are already the basis of circulation, upon which circulation has issued and is now in The difficulty with the provision, which I think the Hitchcock bill provides, is the retirement of national-bank notes without the substitution of any permanent currency in its Does not the Hitchcock bill make that provision?

Mr. NELSON. Certainly; the retirement of the nationalbank notes under the Hitchcock bill comes through the refunding system. It provides for that.

Mr. SHAFROTH. But it provides for the retirement of the total national-bank note circulation in 20 years without the

substitution of any permanent currency in its place.

Mr. NELSON. Certainly the other currency is substituted.

Mr. SHAFROTH. The other currency is a temporary currency, based upon 30 and 90 day paper, and whether or not it

will ever amount to anything over and above a reserve bank men differed before the committee.

Mr. NELSON. I say the new currency we establish is not

merely 30 or 90 day paper.

Mr. SHAFROTH. It is based on that.

Mr. NELSON. If that is the case, we have labored in vain.

If, instead of our present national-bank circulation, we are establishing a circulation of United States currency that is only

good for 30 and 60 or 90 days, we are in a pretty bad condition.

Mr. SHAFITOTH. It is based upon 30, 60, and 90 day paper.

Whenever those drafts that mature in 60 and 90 days are paid it retires that much currency. It was a question before our committee as to whether there would be a sufficient quantity of money taken out upon these terms as would take the place of national-bank notes, because before you can issue any at all the total amount of the reserve of the bank would have to be loaned out to the bank, but whether there will be a dollar of it that will be in excess of that we do not know. quently, we think it is unwise to be providing for the retirement of the permanent currency, such as national-bank currency, without the substitution for it of a permanent currency.

Mr. NELSON. There would be some reason in your claim if you provided for a substitution by the reserve banks of this new system of currency in place of the bonds; but what you really provide in paragraph 8 is that the reserve banks can go and deposit Government bonds and get exactly the same kind of currency that we complain of now.

Mr. SHAFROTH. Oh, no. Mr. NELSON. A bond-secured currency.

Mr. SHAFROTH. That is a power vested in the Federal reserve board to permit it. It is not a right of the bank to do it

Mr. NELSON. You give them that power.

Mr. SHAFROTH. It is a power given the Federal reserve board to permit that kind of an issuance of currency, but it is

not the right of any member to go there and get it.

Mr. NELSON. What I claim in regard to it is that it is a dangerous power. If our purpose is to establish a new currency system, if our purpose is to establish an elastic system, if our purpose is to get rid of the present bond-secured currency system, it is a most vicious provision, for it is one of the powers conferred by the Owen bill upon the reserve banks.

Mr. WILLIAMS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Mississippi?

Mr. NELSON. Certainly. I always yield to my friend from

Mississippi

Mr. WILLIAMS. Of course, I do not believe that any paper currency ought to be a permanent currency. I think that all paper currency ought to be a currency that fluctuates from day to day in proportion to the demands of business.

Mr. NELSON. That is right.

Mr. WILLIAMS. This currency would do that. But the Senator is mistaken when he thinks that the bill in its ordinary working would permit the issuance of which he speaks. This is a power reserved in the discretion of the reserve board with the idea and the hope at any rate, and I think it is a wellgrounded idea, that it will not be exercised except in some great emergency when it seems to be required.

I for one do not think that emergency will ever come, because I think the power to issue reserve notes upon the deposit of collateral in the portfolio will take care of emergencies of that sort without the resort to the power to issue notes as the present national banks do upon this balance of about two hundred million of Government bonds not already serving as a basis of circula-

Mr. NELSON. I differ radically, Mr. President, from the Senator from Mississippi, if I properly understand his contention.

Mr. WILLIAMS. I am talking about what the bill provides. The Senator from Minnesota can not differ from me about what the bill provides, because that is a matter of fact to be obtained by reading the language.

Mr. NELSON. I radically differ from the Senator as to the views he has expressed, and I will apply that difference to the

proposed provision of paragraph 8.

Mr. WILLIAMS. But the point I am trying to make now is that this bill does not give this power to the regional banks. It gives to the board of control a discretion to extend it to the regional banks-

Mr. NELSON. That is a mistake.

Mr. WILLIAMS. And the belief is that it will not do so,

except in some great emergency.

Mr. NELSON. I am surprised to hear the views of the Senator from Mississippi in one respect. I had supposed that the object of the pending legislation was to create a new system of elastic currency-

Mr. WILLIAMS. I do not differ from the Senator on that. Mr. NELSON. And that we should gradually retire the existing nonelastic bond-secured currency-

Mr. WILLIAMS. In that hope I agree with the Senator.

Mr. NELSON. And that we must do it gradually so as not to produce unnecessary disturbance or friction in the commercial and financial world. Now, you put in a provision by which reserve banks can secure issue and float bond-secured currency; you put in a provision to the effect that the reserve banks can perpetuate the present system if they see fit.

Mr. WILLIAMS. Yes; but suppose

Mr. NELSON. My contention is that that power should not be given, for the reason that we should seek by every fair means, with as little friction as possible, to get away from the present nonelastic system and secure a paper-currency system that will be elastic and respond to the needs and wants of commerce-one that will ebb and flow with trade and commerce. The currency you propose to give the directors of the regional banks the power to issue is a currency contrary to the scope and ultimate purpose of this bill, as I understand.

Mr. WILLIAMS. The Senator unconsciously used the right word a moment ago when he said "a brake." That is just exactly what this provision is-it is a brake upon the wagon. Suppose, for example, that the 2 per cent bonds were to go away below par under the provisions of the Owen bill. This is a provision for carrying out the contract so far as they are concerned and permitting them to continue until they are paid as a basis of circulation, and that will maintain their value. Suppose it were discovered that their par value was being maintained without resort to this expedient, then I imagine the reserve hoard would not give this power. If, upon the contrary, they found that the par value of the 2 percents was not being maintained, then they might permit it to be exercised for

Mr. NELSON. The Senator is assuming that the reserve board will never exercise this power. But as a matter of fact the power is not with the reserve board, but with the directors

of the reserve banks.

Mr. POMERENE. Mr. President—
The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Ohio?
Mr. NELSON. Certainly.

Mr. POMERENE. I think a mistake has been made. The power to issue this currency, based upon bonds, is lodged in the regional reserve banks——
Mr. NELSON. That is my recollection.

Mr. POMERENE. Subject, however, to the supervision of

Mr. WILLIAMS. I knew the Federal reserve board had to be consulted. It can not be done without their approval.

Mr. NELSON. I was satisfied the banks could do it in the

first instance.

Mr. POMERENE. Then, another of the powers enumer-

Mr. NELSON. I wish the Senator from Ohio would be kind enough to read the paragraph so that Senators may understand what my contention is.

Mr. POMERENE. I read from page 13 of the print of the bill of December 1, 1913.

Mr. NELSON. Is that the caucus bill?

Mr. POMERENE. It is. The provision is as follows:

Upon the filing of such certificate with the Comptroller of the Currency as aforesaid, the said Federal reserve bank shall become a body corporate and as such, and in the name designated in such organization certificate, shall have power—

Then, there are eight powers enumerated, and the eighth power designated is as follows:

Eighth. Upon deposit with the Treasurer of the United States of any boads of the United States in the manner provided by existing law relating to national banks, to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, such notes to be issued under the same conditions and provisions of law which relate to the issue of circulating notes of national banks secured by bonds of the United States bearing the circulating privilege. privilege.

This power, however, is subject to the supervisory power of

the Federal reserve board.

Mr. NELSON. The directors of the Federal reserve banks, unless restrained by the reserve board, can continue to issue this bond-secured currency. My contention is that, while it is or ought to be the ultimate purpose of this legislation to get away as rapidly as can safely be done from the present system of bond-secured nonelastic currency, this paragraph retains a power in the regional banks to go on and deposit bonds and get the same kind of currency on the same conditions as national banks are getting it now.

Mr. REED. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Missouri?

Mr. NELSON. Certainly. Mr. REED. I think, in connection with the section to which the Senator's attention was called, I ought to direct his thought to section 18, which in the print I have, that of December 1, appears at page 60. I want to say to the Senator from Minnesota that I think this issue ought to be clean-cut and understood by every Senator.

The purpose of the provision I am about to read is to preserve intact the present national bank circulation. The question of whether or not it is wise to do so is a question that must be passed upon, but the purpose of the bill as now presented is to maintain that circulation. I read a part of section 18, as

follows:

Sec. 18. Any member bank desiring to retire the whole or any part of its circulating notes may file with the Treasurer of the United States an application to sell for its account, at par and interest, United States bonds securing circulation to be retired.

The Treasurer shall, at the end of each quarterly period, furnish the Federal reserve board with a list of such applications, and the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks whose applications have been filed with the Treasurer at least 10 days before the end of any quarterly period at which the Federal reserve board may direct the purchase to be made. Upon notice from the Treasurer of the amount of bonds so sold for its account, each member bank shall duly assign and transfer, in writing, such bonds to the Federal reserve bank purchasing the same, and such Federal reserve bank shall thereupon deposit lawful money with the Treasurer of the United States for the purchase price of such bonds, and the Treasurer shall pay to the member bank selling such bonds any balance due after deducting a sufficient sum to redeem its outstanding notes secured by such bonds, which notes shall be canceled and permanently retired when redeemed.

Up to that point the method is worked by which any bank

Up to that point the method is worked by which any bank desiring to retire its circulating notes can do so by depositing its bonds. Then the bonds are taken up. Then it is provided that the Federal reserve board may require the Federal reserve banks to take these bonds; and then this follows:

banks to take these bonds; and then this follows:

The Federal reserve banks purchasing such bonds shall be required to take out an amount of circulating notes equal to the amount of national-bank notes outstanding against such bonds.

Upon the deposit with the Treasurer of the United States bonds so purchased, or any bonds with the circulating privilege acquired under section 4 of this act, any Federal reserve bank making such deposit in the manner provided by existing law shall be entitled to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited. Such notes shall be the obligations of the Federal reserve bank procuring same, and shall be in form prescribed by the Secretary of the Treasury, and to the same tenor and effect as national-bank notes now provided by law. They shall be issued under the same terms and conditions as national-bank notes. United States bonds bought by a Federal reserve bank against which there are no outstanding national-bank notes may be exchanged at the Treasury for one-year gold notes bearing 3 per cent interest. In case of such exchange for one-year notes the reserve bank shall be bound to pay such notes and to receive in payment thereof new 3 per cent one-year Treasury gold notes year by year for the period of 20 years.

So that it is perfectly plain that the intention here was if the

So that it is perfectly plain that the intention here was if the national banks went out of the system to provide a means by which their bonds upon which circulation had been issued could be taken over by the Federal reserve banks, in which event the Federal reserve banks would be obligated to issue or to have

issued an equal amount of bank circulation.

Mr. WILLIAMS. Of central reserve bank notes.

Mr. REED. No; it is not the ordinary note.

Mr. WILLIAMS. It is called the Federal reserve bank note. Mr. REED. It is a Federal reserve bank note, which is exactly like the present national-bank note, so far as the bill would indicate. Then, as to any bonds against which there is not at the present time any circulation, there is a provision that they may be taken over and 12-month bonds issued against them and held by the banks, those bonds to bear 3 per cent. So that I think there is this clear distinction between the bills: The Hitchcock bill contemplates the ultimate retirement of the national-bank circulation, whereas the Owen bill provides for

the perpetuation of the national-bank circulation.

Mr. WILLIAMS. It was that provision I had in mind when I interrupted the Senator. I was thinking about a mere substitution of one for the other, which is what that is.

Mr. OWEN. Mr. President—

The VICE PRESIDENT. Does the Senator from Minnesota

yield to the Senator from Oklahoma?

Mr. NELSON. I yield to the Senator.

Mr. OWEN. Mr. President, I want to make an observation to the Senator from Minnesota in connection with this particular In so far as the Federal reserve banks buy the bonds, which now secure circulation, they are required to issue a like amount of circulation so as not to contract the currency. Mr. NELSON. A like amount, but if the Senator will allow

Mr. OWEN. The same amount.

Mr. NELSON. It is the same amount, but is it the same kind of bill? Are they national-bank notes or are they the notes of

the new reserve system?
Mr. OWEN. No; they are bank notes; not Federal reserve

notes, but Federal reserve bank notes.

Mr. NELSON. Such as we have under the present system?

Mr. OWEN. Yes. Mr. NELSON. Then, it is a perpetuation of that system.

Mr. OWEN. It is a perpetuation of that much of that system, but instead of having 7,000 different banks, each of which would have six or seven different plates, and therefore from twenty-eight to thirty thousand different particular forms of notes, there would only be these fewer forms. The purpose was not to contract the currency, but to leave the currency the same in volume in so far as the national-bank notes might be retired, and to permit the Federal reserve banks to acquire United States bonds from private persons or from banks which are not using them for purposes of circulation; and as to those bonds they will be permitted to get 3 per cent notes, against which they could easily get gold from Europe and use that form of security with which to protect our national gold reserve.

So that there were two purposes in view in section 18. was to replace the national-bank notes to the extent they were retired by the Federal reserve bank notes, and to permit the Federal reserve banks to acquire other United States bonds, and have issued to them short-time United States 3 per cent notes, which will have a constant and unfailing market in Europe, and from which there could be a draft of gold to protect our gold reserve.

There were those two points in the section, and I merely wanted to make the observation so that Senators would understand it. I suppose the Senator from Minnesota really realized

Mr. NELSON. But the Senator has not given as clear an answer as the Senator from Missouri [Mr. Reed]. The Senator from Missouri really, as I understood him—I do not want to misquote him—agrees, in substance, with the position I take in this matter.

Mr. REED. I was out for a moment, and did not hear the statement of the Senator from Minnesota, except as I gathered it from the colloquy going on, but I will state it in a word, with the Senator's permission.

Mr. NELSON. Certainly.

Mr. REED. Under the provisions of section 18, when any national bank surrenders its circulation, and its bonds thereupon come into the hands of the Government, the Federal reserve board is authorized to direct a Federal reserve bank to take over those bonds; and against those bonds there is to be issued Federal reserve bank notes equal to the bonds, so that the effect of the transaction is that if a bank had \$100,000 in Government bonds and \$100,000 of bank circulation, and it retired that circulation, the bonds would then be taken over by the Federal reserve bank and \$100,000 of Federal reserve bank notes issued. Thus, the circulation of the bank notes will at all times continue the same in amount that it is now, unless the Federal reserve board, under the first part of the provision, possesses a discretion, which I do not think was really intended

to be vested in it.

Mr. NELSON. If the Senator will allow me to interrupt him, I call his attention to paragraph 8 of the powers conferred upon reserve banks and the board of directors. Under paragraph 8 the power is expressly given; of course, it is subject to a veto by the reserve board, but the power is given, in the first instance, to the reserve board or the directors of the bank to deposit Government bonds in the Treasury and get for those bonds bond-secured currency, exactly the same as the national-bank notes.

Mr. REED. I will say to the Senator that I think the meaning of both these sections is that the present national-bank circulation shall be preserved exactly as it is now, except that the form may be slightly changed; but it is intended to make it a part of the permanent circulation of this country. I think that was what the Senator said, and with that I agree.

Mr. NELSON. Yes; I think that is the effect of the bill.

Mr. O'GORMAN. With this advantage, if I may suggest to the Senator from Minnesota, that instead of having, as we now With this advantage, if I may suggest to have, several hundred different kinds of paper money, issued by several hundred or several thousand banks, in time we shall have only money issued by the eight regional banks that will be established by this system.

Mr. SHAFROTH. And also with the provision that

Mr. NELSON. The trouble is, if the Senator will allow me to interrupt him, that taking paragraph 8 by itself it provides that they can take out just the same kind of currency in form and substance, based upon the same security, as national banks can now. Taking that paragraph by itself, I can not make any other construction of it.

Mr. SHAFROTH. But it is not compulsory. It is discretion-

ary with them.

Mr. NELSON. I know it, and that is what I object to. I object to perpetuation. I am in favor of getting rid of our present nonelastic, rigid, bond-secured currency. The Senator must not lose sight of the two objects of this legislation. One object is to gather up, concentrate, and utilize the reserves of the The other-and that is equally important-is to give us an elastic circulating medium, not based on Government bonds, but based on short-time commercial paper with an ample gold

If you believe that we ought to afford relief in both directions, why do you provide in this bill anything that goes to the perpetuation of the present rigid, bond-secured system of currency?

There is where I think, with all due respect to the section of the committee represented by its chairman, that you are playing truant to your own gospel and your own avowed system. My understanding of this system is that we are to accomplish two purposes: First, as I have already said, to gather up, concentrate, and make available the reserves of the banks, and, in the second place, to get rid of our nonelastic, bond-secured currency as rapidly as we can without producing any financial friction or difficulty, and in place of it secure an elastic currency, a new currency, that will be based upon commercial assets-first-class commercial paper fortified and sustained by an ample gold

Until I became a member of this committee, and until very recent times, I was infatuated with a bond-secured currency, and my mind never could grasp the virtue of what is called asset currency; but the more I have thought on and studied the subject, and the more I have heard from men who were wiser and who knew more about banking and currency systems than I do, the more firmly convinced I became that the only way to provide for an elastic currency that would ebb and flow with the trade and commerce of the country was, as I have stated, to get away as rapidly as possible from a bond-secured currency and go to a currency based upon commercial paper

with an ample gold reserve, Mr. OWEN. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Oklahoma?

Mr. NELSON. Certainly.

Mr. OWEN. I, of course, agree with what the Senator from Minnesota says with regard to the importance of elastic currency. Everybody agrees with that proposal. The only difference between the Senator from Minnesota and those who agree with me is that we are not willing to have the national-bank currency contracted without supplementing it with other cur-

I have shown in the report to the Senate that there is not now enough actual money—using the term in its broadest popular sense, comprising gold, gold certificates, national-bank notes, and everything else that passes current between citizens as moneyto supply the demand for reserves which we are compelled to have as a basis for a safe and conservative expansion of credits. Therefore we can not contract this currency unless we replace it with some other kind of currency. We propose here to replace it with

Mr. NELSON. Mr. President-

Mr. OWEN. I hope the Senator will kindly let me finish. If I omit anything, I shall be glad to have him remind me of it, Mr. NELSON. I wanted to disabuse the Senator's mind of one thing about myself, if he will allow me.

Mr. OWEN. Certainly. Mr. NELSON. That is, I am utterly opposed to any undue

contraction of the currency.

Mr. OWEN. Oh, yes; I know that.

Mr. NELSON. I think that would be as dangerous to the country as would be undue inflation of the currency. If there is anything in the bill known as the Hitchcock bill that tends inevitably to undue and unreasonable contraction, and it is

pointed out to me, I certainly shall be in favor of eliminating it.

Mr. OWEN. Yes; I am sure of that. I did not misunderstand the purposes of the Senator. I was only going to say
that, in so far as the feature of obtaining elastic currency is
concerned, we have provided for an abundant cushion. We
have provided that commercial bills may be used as a basis for the issuance of Federal reserve notes. If any bank desires additional currency for its patrons, its depositors, its constituency, that bank can come to the Federal reserve bank with its commercial bills, and upon those commercial bills obtain temporary accommodation in the form of Federal reserve

notes. That is all the cushion we need. It is all that commerce requires.

The cushion is necessary. The power of expanding the currency for commercial needs is obviously necessary. supply that demand the only other thing necessary with regard to our outstanding currency is that we shall not contract it and make impossible compliance with the terms of this bill, which requires and compels a certain amount of money to be held as reserve against the present existing deposits. We must not put the banks in a position where they would not have the money necessary as a basis for the credits in the form of reserves. If we do that the banks will have no other recourse than to contract their loans in order to comply with the reserve requirement, because when you contract the loans you contract the deposits. They must give up their deposits, they must give up their loans, down to the point where the money they have as reserve money will come within the rule fixed by the bill, which, though moderate in terms, does require in gross a large volume of money, the details of which I have set forth in the report already submitted to the Senate.

I say that section 18 does two things: It provides that we shall contract the currency in so far as concerns the nationalbank notes which are given up by banks that do not want to continue their circulating medium based upon bonds; but to the extent that they give it up we replace it with Federal reserve bank notes-not Federal reserve notes, but Federal reserve bank notes-which will have an advantage over the nationalbank notes of the ordinary class in that there will be only 8 or 9 or 10 of these banks, and if they have 5 or 6 or 7 plates there probably will be only 70 plates altogether used; whereas at present we have 30,000 of these plates, and every one of them must be safeguarded with extreme care, under lock and key and guard, because if they were available they could be used for counterfeiting on a wholesale plan. Therefore, the fewer of these plates we have the more economical and the better for the country.

The second purpose of section 18, as I pointed out to the Senate, was that the bonds which are now held by private persons—and there are about \$250,000,000 of them—might be acquired by the Federal reserve bank and converted into 3 per cent bonds, which would be available for getting gold from Europe in case we should want it.

I think that is about all I care to say with regard to the matter.

Mr. WILLIAMS. With the indulgence of the Senator from Minnesota, I want to read the part of the bill to which I was referring a while ago, when I interrupted.

Sec. 18. Any member bank desiring to retire the whole or any part of its circulating notes may file with the Treasurer of the United States an application to sell for its account, at par and interest, United States bonds securing circulation to be retired.

Now, I said that this was not compulsory and was not within the discretion of the bank; that it was within the discretion of the Federal reserve board. Here is the language:

The Treasurer shall, at the end of each quarterly period, furnish the Federal reserve board with a list of such applications, and the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks whose applications have been filed with the Treasurer at least 10 days before the end of any quarterly period at which the Federal reserve board may direct the purchase to be made. Upon notice from the Treasurer of the amount of bonds so sold for its account, each member bank shall duly assign and transfer. In writing, such bonds to the Federal reserve bank purchasing the same, and such Federal reserve bank shall thereupon deposit lawful money with the Treasurer of the United States for the purchase price of such bonds, and the Treasurer shall pay to the member bank selling such bonds any balance due after deducting a sufficient sum to redeem its outstanding notes secured by such bonds, which notes shall be canceled and permanently retired when redeemed.

\*So that the only possible inflation—of which the Separate from

So that the only possible inflation-of which the Senator from Minnesota seems to be afraid-over and above the present outstanding national-bank circulation would be the \$200,000,000 of Government bonds which are not now the basis of circulation, and that amount of expansion could not be very dangerous. So, as far as the expansion question is concerned, there is nothing in that.

Mr. NELSON. If the Senator will allow me to stop him right there, I will state that he misapprehends me. I am not afraid of undue expansion on account of that provision of paragraph 8.

The Senator mentioned that. Mr. WILLIAMS.

Mr. NELSON. No; I mentioned it as a general proposition. What I mean is that I am opposed to paragraph 8 because it is a perpetuation of our present system of bond-secured currency, not elastic in character. It is not because I am afraid of inflation or contraction, but because I want to get away from the old system. That is why I am opposed to it.

Mr. WILLIAMS. I am in absolute sympathy with the Senator from Minnesota in wanting to see gradually substituted for the present system a thoroughly elastic paper currency, and I am thoroughly and absolutely in sympathy with the idea that no paper currency in any country ever ought to be an inelastic, fixed amount; that it ought, upon the contrary, to correspond from day to day and from week to week with the requirements of business. A man can not get away from a thing which exists, however, except gradually.

Section 8 provides what we have already read. It does not seem to be section 8 of this bill, by the way. It is paragraph 8,

in what section?

Mr. SHAFROTH. Page 14.

Mr. OWEN. Page 14, section 4, at the bottom of the page.
Mr. WILLIAMS. These are amongst the powers—
Mr. SHAFROTH. Of the Federal reserve banks. Look on page 14.

Mr. WILLIAMS. I have it.

Mr. NELSON. Paragraph 8, line 19.
Mr. WILLIAMS. Yes; I am coming to it. These are amongst the powers granted to the Federal reserve bank. It does seem to me that paragraph 8 is broader than I thought it was. The point I had in my mind was in section 18, where the substitution occurs; but it does appear that paragraph 8-I remember now; that is something I forgot.

Mr. NELSON. The Senator will find that paragraph 8 is

inst as I stated.

Mr. REED. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Missouri?

Mr. NELSON. I do. Mr. REED. It is perfectly plain from a reading of this bill that two things are attempted to be done. One is covered by section 8, and it gives to every Federal reserve bank the absolute right to take out bank circulation just the same as a national bank now can take it out. Section 18 is a different proposition. It is intended to be a plan by which Federal reserve banks can be compelled to take out bank circulation upon such bonds as other banks may turn in; so that both phases are covered. Beyond any question the intention of this bill is to keep in circulation every dollar of national-bank circulation that is now out. Whether that is wise or not is another question.

Mr. BRISTOW. Mr. President, it seems to me that section 18 would have kept out a sufficient amount of national-bank currency to prevent the contraction which is anticipated, and that

section 8 is not necessary at all.

## RECESS.

The VICE PRESIDENT. The hour of 6 o'clock having arrived, the Senate stands in recess until 8 o'clock this evening. Thereupon, at 6 o'clock p. m., the Senate took a recess until 8 o'clock p. m.

# EVENING SESSION.

The Senate reassembled at 8 o'clock p. m.

## BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. BRISTOW. Mr. President, I suggest the absence of a

quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators an-

swered to their names:

Page Pomerene Rausdell Reed Robinson Root Saulsbury Shafroth Sheppard Sherman Shively Hollis Hughes Ashurst Bacon Bankhead Sterling James Johnson Jones Kenyon Kern Stone Swanson Thomas Borah Brady Brandegee Bristow Thompson Thornton Townsend Vardaman Lea Lewis McLean Martin, Va. Martine, N. J. Bryan Burton Walsh Chilton Chilton Clarke, Ark Cummins Fletcher Gallinger Warren Shively Simmons Smith, Ga. Smith, Md. Smith, S. C. Williams Myers O'Gorman Owen

Mr. SHIVELY. I wish to announce that the Senator from Arizona [Mr. Smith] is necessarily absent and that he is paired

Arizona [Mr. SMITH] is necessarily absent and that he is paired with the Senator from New Mexico [Mr. Fall].

The VICE PRESIDENT. Fifty-eight Senators have answered to the roll call. There is a quorum present.

Mr. WEEKS. Mr. President, during an interesting discussion in the Senate by the junior Senator from Virginia [Mr. Swanson] among other things he referred to the New York banks and to the result of the panic of 1907 as indicating a lack of a correctness of our policy in handling financial situations of that kind. I wish to call to the attention of the Senate the results which are obtained in European countries under similar conditions. At that time I suggested to the Senator from Virginia that our policy was directly the reverse of the policy followed in European countries—that they extended credits and increased loans while, under the restricted policy which we followed, it was necessary for us to call in loans and restrict credits. That has been invariably the result in this country under such conditions.

Every bank is endeavoring to strengthen its own resources without any regard to the wishes or necessities of the other 24,999 banks. Each bank attempts to care for its own immediate customers, but does not follow the policy which prevails much of the time in loaning a portion of its loanable funds to parties who are not directly connected with the bank nor depositors in the bank, selling their commercial paper through note brokers.

I want especially to call the attention of the Senate to the difference between the paper which is bought by banks through note brokers and to the paper loaned to the customers of the bank on account of the deposit which the customer keeps with the bank. I will a little later indicate more specifically the difference and why certain figures have been prepared which indicate that the banks were not loaning during the months of October, November, and December, 1907, when, as a matter of fact, generally speaking, they were not buying commercial paper from outside parties or note brokers, but they were at that time loaning to their customers as in other years.

As a specific illustration of the difference between extending credit in time of need and restricting credit, which we do in this country, I call attention to what took place in Germany on two occasions and will then compare it with what took place

in this country in 1907.

In the last week of September, 1907, the European financial centers commenced to feel the strain which was beginning to be apparent in the United States. In fact we have been a disturbing factor in the money markets of the world for years, because our needs are so large, our operations are so large, compared with those of European countries that when anything disturbs our money market or our banking affairs it is reflected at once in every European money center, not only in currency conditions but in banking matters as well. So it is all important to those people who have the same currency standard that we have that we should have correct banking principles and means of providing for our own necessities when they occur without drawing gold from abroad, which ordinarily we have been able to do so to some extent, either through financial bills or through exchange which we get as a result of selling our products abroad.

To take this instance, the last week of September, 1907, the specie held by the Reichsbank decreased in one week from \$236,000,000 to \$199,000,000. In other words, the gold trend at that time was toward the United States, and the German central bank lost \$37,000,000 in specie. As a result of losing that \$37,000,000, did they restrict credit or call in loans as we would have done? Not at all. They did just the reverse. This is the result of their action: Loans and discounts increased from \$289,000,000 to \$399,000,000, an increase of \$110,000,000 in on week. At the same time that they increased loans they increased their note issue to a corresponding degree. The note issues increased from \$329,000,000 to \$433,000,000, an increase

of \$94,000,000.

Two or three years ago they had in Europe what was known as the Morocco incident. At that time there was a large amount of French money loaned in Germany on the ordinary prime bills which prevail in Europe in the ordinary course of business. The rate of the French bank and of the French joint-stock banks is ordinarily somewhat lower than the rates of the other central banks and of the joint-stock banks of other European countries; so that almost always there is more or less German paper, English paper, and paper of smaller European countries held by the joint-stock banks of France and the French bank itself.

This Morocco incident was one in which Germany and France were involved. As soon as it appeared that there might be trouble between the two countries the French bank commenced to call home its resources, and one of the resources it could call home was its loans to German merchants, the prime German paper which it had purchased to use its loanable funds. That paper was sent back to Germany, and it necessitated the increasing of the loans not only of the German joint-stock banks, but of the Reichsbank itself, and the result was something like this: In one week the specie of the Reichsbank decreased

from \$264,000,000 to \$236,000,000, a loss of \$28,000,000.

You will recall that that is exactly what happened in Sep tember, 1907, and to almost the same degree. During this week the loans and discounts increased from \$308,000,000 to \$445,-000,000, an increase of \$137,000,000 in one week, while the note issue increased \$183,000,000; in other words, in these two periods of tension and stress, in a way, which came from entirely different sources, from different parts of the world, the German bank lost specie to an appreciable amount; but at the same time increased and extended its credits in loans, in discounts, and in note issues. In the United States, while we have not the exact figures of what happened in 1907, because there was no call of the comptroller at the time when the panic was in its severest stage, yet we can estimate something of what happened at that time by taking the comptroller's call of August 22, 1907, and the comptroller's call of February 14, 1908, and you will notice that exactly the reverse condition obtained here from that which obtained in Germany; that our deposits were reduced by \$218,-000,000 and our loans were reduced \$257,000,000, while specie increased \$88,000,000. One reason why the specie showed such an increase was because of the importation of gold and the transferral from the Treasury to the banks of some part of its funds, but there was a restriction of credit, as you will see, in that period of \$257,000,000; in other words, the business of the country was slackened to such a degree that hundreds of thousands, and almost millions, of men were thrown out of employ-The same general result has always obtained under similar conditions in European countries,

It has been the policy of the Bank of England, whenever there have been strained conditions, to immediately respond by an increase of credit to an unlimited extent whenever the strain has been severe enough; in other words, the provisions of the bank act have been three times, by permission of the Government, for the time being suspended, so that the bank could give

unlimited credit without being obliged to comply with the law.

In the Baring panic the Government offered the bank the privilege of relieving it from the provisions of the law, but the governor of the bank at that time, a very able man, saw the necessities and the limitations, and the privilege was not used; but if we followed that same course of reasoning, we would find that in all cases in every European country exactly the same policy has been followed in the past and that it is directly contrary to the course which we have followed, but is exactly the policy which we should follow if this general legislation

which we are now discussing shall be adopted.

Mr. BRISTOW. Mr. President—

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WEEKS. I do.

Mr. BRISTOW. As I understand, when the demand was made upon the German people for gold in the liquidation of the paper that was held by France the paper was met and the gold was exported from Germany to France?

Mr. WEEKS. Yes. Mr. BRISTOW. That resulted, as I understand the Senator, in an increase in the credits which the Bank of Germany extended to the German people and to the German banks?

Mr. WEEKS. Yes.
Mr. BRISTOW. Was that gold taken from the joint-stock banks of Germany?

Mr. WEEKS. I presume, to some degree; and they recouped themselves by rediscounting with the Reichsbank. The figures which I have given are the figures of the Reichsbank, not of the German joint-stock banks.

I understand now that was the credit Mr. BRISTOW. which the central bank of Germany, the Imperial Bank of Germany, extended to the joint-stock banks of Germany. That credit could only have been extended, however, upon the condi-

tion that the German Reichsbank had the gold reserves upon which it could base this additional issue of notes.

Mr. WEEKS. As provided by the German law at that time, I think on both occasions they did extend their credits to such a degree that their note issues were taxed the 5 per cent interest which is provided for in their laws when issues exceed a certain

Mr. BRISTOW. That is similar to the provisions of the Hitchcock bill. If it gets down below 40 per cent of par, there is an additional interest added for every 2½ per cent that it

ment of the law as provided in the bill, while the Germans pay a certain rate of interest on the amount of note issues beyond a

Mr. BRISTOW. It is the same principle, but applied in a different way. What I am getting at is, suppose that the gold reserve of a German bank had been down to a minimum and these additional notes could not have been issued, would Germany have faced a condition similar to the one that we faced in

Mr. WEEKS. On that occasion Germany would have had to borrow, and would have had to pay the rate of interest which would have been necessary in order to obtain the gold.

Mr. BRISTOW. That is, the German bank, if I understand the matter correctly, would have had to secure the gold?

Mr. WEEKS. It would have been obliged to secure the gold. Mr. BRISTOW. Or decline the credit. Mr. WEEKS. That is it exactly. That general condition obtained last year. The German bank was short of gold. The German nation, as a nation, owed money to the United States and elsewhere. Ordinarily we would have drawn gold home, but the condition of the gold reserve of Germany was such that they did not want to pay at that time. The result was that they borrowed considerable amounts of money in this market. I think members of the committee will recall that one New York bank president testified that he loaned to the German stock banks at one time last year at the rate of 8 per cent. That rate was paid simply to hold in Germany the American money, which we could otherwise have drawn home, until they sold us something to prevent the necessity of paying their indebtedness in gold.

Mr. SMOOT. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Utah?

Mr. WEEKS. I do.
Mr. SMOOT. In that connection, I believe it would be interesting if the Senator from Massachusetts could tell us what was the increase of the bank discounts in Germany and just how long it was before she got back to her normal condi-tion respecting the gold reserve, for in 1907 she lost from some thirty million to forty million dollars in gold. The only way, I suppose, that she got back her gold was by increasing the rate of her bank discounts. Does the Senator know what that increase was and how long it took her to get back the gold that was lost?

Mr. WEEKS. I have not the figures at hand, and I should want to give them accurately, but it did not take a very long time, as I recall.

Mr. SHAFROTH. Mr. President, if the Senator will yield to me, I will state that I saw a statement prepared by a French economist to the effect that the rate of interest in Germany established by the Reichsbank was 6 per cent on the 30th day of June, 1913. It had increased from, I think, 4 per cent two years before, on June 30, 1911.

Mr. SMOOT. Does the Senator refer to the year 1907? Mr. SHAFROTH. No; not to 1907. I do not know what it

was in that year.

Mr. SMOOT. I asked for the figures in 1907, because we know the exact amount of gold that was lost by Germany at

Mr. WEEKS. Mr. President, the Senator from Virginia [Mr. SWANSON] to-day made some criticisms of the New York banks and of the banks of other central reserve cities as well. that they were not prepared to meet the emergency which they had to meet in the fall of 1907; in other words, he charged that if they had made suitable preparation for the necessities of additional circulation for crop-moving purposes and for additional credits which are required every year in the autumn months, we would not have had as severe a panic, if, indeed, we would have had any panic at all.

It is difficult to carry figures applying to all these subjects in one's mind, but I have since that time looked up the condition of the New York banks and other banks at the time of the comptroller's call in August, 1907, and I think they will dem-onstrate pretty conclusively that if there was any extension at that time the extension was in other reserve city banks and in the country banks, rather than in the banks of the central reserve centers. For instance, the net deposits of the New York banks on the 22d of August were \$825,000,000. The reserve required against those deposits was \$206,000,000. To show that the deposits were low in August, 1907, I want to compare them with the deposits two or three years before and afterwards. At the same time in the previous year the deposits were \$2,000,000 Mr. WEEKS. There is a penalty in both cases, only in the case of the Hitchcock provision of the pending bill the penalty applies on the amount the reserve is below the ordinary require\$296,000,000 greater; and in 1909 they were \$350,000,000 greater. At each date the New York banks had more than their required For instance, on the 22d of August, 1907, instead of having the 25 per cent reserve required by law they had 26.8 per cent reserve, while the year previous at the same time they had but 24.4 per cent reserve; in other words, they were 2.4 per cent better off, so far as reserves were concerned, in 1907 than they were in 1906, and they were 1.3 per cent better off than they were at the same time in 1905. The following year their reserve was greater, because all Senators will recall that in 1908 there was a restriction of business and an accumulation of funds in reserve centers, and therefore the reserves of the New York banks, as well as of other banks, were much larger than at any other period which is recorded between 1900 and

Mr. SHIVELY. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Indiana?

Mr. WEEKS. I yield.
Mr. SHIVELY. Will the Senator permit me to inquire whether the authority from which he is reading distinguishes in any way between the amount of individual deposits and bank

deposits in those banks?

Mr. WEEKS. No; not at all. At the same time, in Chicago, the net deposits were \$262,000,000, and the required reserve was \$65,000,000. The Chicago banks had 25.3 per cent reserves or 1½ per cent less reserve than the New York banks had; in other words, the New York banks, as compared with the Chicago banks, had made as abundant provision for the strain of that fall as it seemed they should be required to do.

St. Louis makes even a worse comparison than that, for the net deposits of the St. Louis banks at that time were \$116,-000,000, which necessitated a reserve of \$29,000,000. The St. Louis banks at that time had 23.6 per cent reserves, or 1.4 per cent below the limit required by law, and 3.2 per cent below the

reserves held by the New York banks.

When we come to the other reserve cities we find that the net deposits were \$1,423,000,000. A reserve of 25 per cent in those deposits is required, and they had 25.5 per cent reserve, or 1.3 per cent less than the New York banks. The net deposits of the country banks at that time were \$2,627,000,000. They had reserves of 16.9 per cent, 1.9 per cent more than they were required to have, or one-tenth more than the New York banks. So that the general statement made by the junior Senator from Virginia that the New York banks had not made suitable preparation does not seem to be borne out by these figures, because the New York banks were better off than were the Chicago banks, materially better off than the St. Louis banks, and materially better off than the banks of all other reserve cities.

At that time the loans of the New York banks indicate that

they had, so far as possible, made preparation for the unusual period which they were approaching, though, of course, they did not anticipate the severity of the panic with which they had to deal. On August 22, 1907, the New York banks were loaning \$712,000,000. The next year at the same time they were loaning \$867,000,000, or \$155,000,000 more than they were the year before, and in fact they had not been loaning as little as \$712,000,000 since the 9th day of September, 1903.

Mr. SWANSON. Will the Senator permit me to interrupt

him? If I am wrong, I want to be corrected.

Mr. WEEKS. I yield to the Senator.
Mr. SWANSON. I understand that the New York banks,
three weeks before the statement of November 9, increased
their loans \$110,000,000 from August 22, as shown by the Will the Senator read that to see whether that is true reports. or not?

Mr. WEEKS. I have not those figures here, and that call. if made, was a special call made by the comptroller, is not quoted in the figures in the Statistical Abstract, from which

I am reading.

Mr. SWANSON. The figures which I gathered indicate that three weeks prior to November 9-and the banks suspended on October 31, as I understand-the loans in the city of New York

were expanded \$110,000,000.

Mr. WEEKS. If they had done that they would have been simply following the example of all the European countries to which I referred earlier in the evening; but the loans of the banks of the whole country fell off more than \$200,000,000 between August and February, when the regular comptroller's calls were made.

Mr. SWANSON. The figures I have on this question were gathered by Mr. Sprague, if I remember the name of the author correctly, who wrote on the financial crises, especially the one of 1907, for the National Monetary Commission. I understand from that report that the New York banks, expecting a demand for money for crop purposes in the fall, as regular as the seasons, increased their loans three weeks prior to November 9, and their loans had been increased that year \$110,000,000.

Mr. WEEKS. That is a natural, normal movement of money, and there is not any indication that those loans were not very largely made to country banks and to other country correspondents. For instance, this year—

Mr. SWANSON. But, if the Senator will remember, on August 3 or August 22, I forget which, the country banks had

on deposit there \$410,000,000. Mr. WEEKS. Yes.

Mr. SWANSON. They were not asking for loans. They were asking to get the money they had on deposit. On account of the increase of loans three weeks prior to November 9, the banks had their reserves reduced so that they were unable to pay deposits-not loans, as I understand-to the country banks.

Mr. WEEKS. There is not anything in the figures the Senator submitted to-day which indicates that the country banks were not asking for loans or that they were not borrowing of the New York banks at that time. As a matter of fact, the country banks are always borrowing of banks in reserve cities and central reserve cities. I put into the RECORD the other day some figures which were submitted to me by Chicago bankers and others. Mr. Reynolds, of the Continental-Commercial National Bank, the largest bank in the West, stated that he was loaning to his country correspondents more than \$26,000,000, or \$10,000,000 more than last year, and that those loans were distributed over the entire western section of the country, including loans to as many as 1,000 banks.

Mr. SWANSON. If the Senator will permit me, no complaint ever has been made about the refusal of a bank in New York to make loans to a country bank. That is a matter of business which the banks can either refuse or accept. The complaint made is that they had \$410,000,000 of money due all the country banks-State, national, and interior banks-and that they failed to pay the banks that had money on deposit. They had the money in their vaults in New York or on loans, and they would

not ship it.

What right has a bank to make a loan to another bank and refuse to pay one that has money on deposit with it? The complaint is that the bank that had money on deposit could not get it. If they increased their loans \$110,000,000 to other banks, even if they were interior banks, so that it was impossible for them to pay the banks that had money on deposit with them, that was not right. Whether the \$110,000,000 was loaned to banks or to other people, the contention is that such loans had been made; that the reserves were reduced so that the country or interior banks could not get their money on deposit.

Mr. WEEKS. Mr. President, this brings us back to the discussion which the Senator from Virginia was having with Senators this afternoon about the proper course for the New York banks to have taken at that time. Of course, it goes without saying that if banks are required by law to keep 25 per cent of their deposits in reserve, and they actually have 26.8 cent of their deposits in reserve, and they actually have 26.8 per cent, as the New York City banks did when the comptroller's call was made on August 22, they are in comparatively good condition. In fact, as I have stated, the figures show that, with one exception, they have not had as high reserves as those at that time of year since the year 1900. Therefore they had made reasonable preparation for any conditions which they could foresee.

The senior Senator from New York [Mr. Root] put this question very clearly to the Senator from Virginia [Mr. Swanson] to-day. He said:

What is going to happen when the New York banks owe a billion dollars, for instance, and have \$250,000,000 in their vaults, if the owners of that money deposited in the New York banks—the individuals or companies or corporations or other banks—call for 25 per cent of their deposits at the same time?

Of course, the New York banks, having no way to recoup themselves in the ordinary course of business except by some strained method which takes time, like selling finance bills abroad or foreign exchange in some form, would pay out every dollar they had in their vaults. Suppose their depositors called for one-eighth of their deposits. That would bring the reserves of the New York banks down to about 13 per cent. The question then comes to just the one that the Senator from New York asked, "What are the New York banks going to do under those circumstances? Are they going to pay out all their reserves, or are they going to hold those reserves for the benefit of all their depositors rather than pay them out to a few, who are drawing not only what they need but a great deal more?

I think it was a matter of good judgment that the New York banks at that time did stop paying out the reserve which they were required to keep under the law.

Mr. HUGHES. Mr. President

The VICE PRESIDENT. Does the Senator from Massachu-

setts yield to the Senator from New Jersey?

Mr. WEEKS. Yes; I yield to the Senator from New Jersey. Mr. HUGHES. Not being an expert in banking laws and not knowing much about finance, I should like to ask the Senator if it is his contention that a bank with money in its vaults has a right to refuse it to a depositor in its discretion? If that is so, I want to get out of the banks what little money I have in them.

Mr. WEEKS. I do not think the present conditions are such as to warrant the Senator from New Jersey in drawing out his

money.

Mr. HUGHES. It would not affect the situation much if I should withdraw it all at once; but I listened to the discussion this afternoon with a great deal of interest, and I was hardly able to believe my ears when the senior Senator from New York seemed to hold that it was a matter that rested in the discretion of the banks, and that with money in their vaults which they were compelled to hold there by law they could exercise their own discretion and refuse to pay it to depositors. I always thought that the reserve money in the vaults of the banks and the money they had in their reserve cities and central reserve cities were there for the very purpose of paying depositors, and that if the depositors of a bank came down on it in a hurry, if there was a run, the bank kept on paying out its money until it became insolvent, and then closed its doors

Mr. WEEKS. I hope the Senator from New Jersey will calm himself and not draw his deposits from the banks, because it is said by some that conditions are somewhat strained, and it

might precipitate further trouble.

Mr. HUGHES. I say it would not make very much difference if I did.

Mr. ROOT. The Senator might get hung for starting a panic.

[Laughter.

Mr. HUGHES. That seems to be the contention, however. Mr. WEEKS. Mr. President, under the provisions of the legis-

lation which we are discussing we believe banks will be able to recoup themselves as their depositors draw out gold or draw on their deposits in the banks, so that they will be able to maintain their reserve without straining themselves or precipitating any panic; that it will not be possible, or will be hardly possible, to have a currency panic.

Senators must not forget, however, that the reserves of country banks are used in a very short time; that is to say, a bank does not deposit part of its reserve in a Chicago bank and leave it there without doing business by using that reserve, but it is drawing on it every day to carry on its own functions at home.

One of the best witnesses we had before the Committee on Banking and Currency was former Representative Dawson, at present the president of the First National Bank of Davenport, Iowa. Mr. Dawson testified that he used his reserve in the Chicago banks every two days and that he kept more than the law required him to keep there, at that. He said that his business was so active in the direction of Chicago that he used all

of his reserve every two days.

Let us suppose that a central reserve bank has the deposits of some country banks; how does the country bank make those deposits? It makes them by depositing credits. When we get into a panic, as we were in 1907, the country banks do not ask to draw out what they deposited, but they ask to draw out circulation in some form, even if they do not ask for gold. The result is that the central reserve bank is getting its deposits in one form and is asked to pay them out in another, when there is not enough of the other form to pay out its depositors, or any considerable part of them.

The total deposits in all the banks in the country are about \$20,000,000,000, and the total money of all forms in the country is only three and a half billions. The amount in circulation is not more than half that. So that if, as Mr. Dawson testified, banks The amount in circulation is not were depositing credits and using those credits every few days over and over again, if they deposited credits to-day and within two days wanted to draw out circulation, it would not take very much time to draw all the circulation out of the banks of

central reserve cities.

Mr. ROOT. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from New York?

Mr. WEEKS. I yield.
Mr. ROOT. The Senator from New Jersey [Mr. Hughes]
expressed some surprise at the question I put this afternoon. The Senator is quite right, I think, if in what he says about the obligation of a bank to pay depositors he has in mind the legal obligation, the contract. The business of the country is not done with bills, however, with money. The business of the

country is not done with either national-bank notes or greenbacks or gold or silver. The great business of the country is done by transfers of credits; and banks are really clearing houses for the accomplishment of the vast multitude of transfers of credits through which the enormous commercial and industrial activity of the country proceeds.

The banks which were depositing in the central reserve cities did not deposit money. They deposited paper, checks, drafts, notes, commercial paper, which were the instruments for the transfer of credits. What they really did was to transfer credits to these banks; and in the ordinary course of business—business as it goes on from month to month and from year to business as it goes on from the debt created by that deposit is liquidated in a similar. year—the debt created by that deposit is liquidated in a similar fashion. It is liquidated in the same way in which it is created.

What makes a panic is that sudden fear arises, and there is a vast number of people who, anxious lest they lose their money, abandon the ordinary method of transacting business through transfers of credits. I have seen three such situations created in that way—in 1873, in 1893, and in 1907. In every one of those cases the banks had to face this problem: Whether to go on and strictly perform the legal obligation to pay in money on presentation until they could pay no longer, and then fall, leaving those who had been first in the race of diligence with their money in their pockets and all the other depositors, including the great body of the business establishments of the country, with nothing, leaving the most appalling ruin for all the industries of the United States; or, seeing the gulf into which the business of the country was pressing, to halt it; to say: "No; rather than go to ruin, which will turn our reserves over to a few of our depositors, leaving the others with nothing and leaving the country to ruin, we will just stop and let the community readjust itself, reorient itself, wait for a few days."

That was what was done in all three cases. In all three

cases the sound sense of the business community and the expedients to which it was possible with a few days' time to have recourse succeeded in restoring a situation in which the ruin of

American business was stopped.

I say I have seen three of those cases, and the same thing was done in each one, and I have no doubt whatever that a wise and righteous course was pursued. The consequences that would have followed from the banks pursuing any other ourse in every one of those years would have been more dreadful than we can easily conceive.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WEEKS. I yield. Mr. BRISTOW. That leads me to make an inquiry that I

have been wanting to make all day.

If provision had been made in 1907 so that the banks in the central reserve cities, the banks of New York-to take just one of them where the trouble started-could have taken their assets, their good securities, and obtained currency from the Government to pay all of their depositors who were demanding Was not that all that was needed to prevent that currency.

Mr. ROOT. Absolutely.

Mr. BRISTOW. If that was all that was needed, I have been trying for three months to find out what is the necessity for creating a tremendous, top-heavy institution, such as we are creating here, to satisfy this simple want.

Mr. WEEKS. I will say to the Senator from Kansas that there are other things than currency needs and currency deficiencies which we should correct and which we are correcting in this legislation. If it were simply a question of supplying currency for the ordinary needs of our business men, we have a law on the statute books now, passed in 1908, which, while a pretty crude piece of legislation in some respects, would enable the furnishing of sufficient circulation, in my judgment, to provide for any ordinary necessity which might arise.

There is one thing about that legislation which was, I think, wise, and certainly an innovation as far as this country was concerned. In adopting it we were following the precedents furnished by all other countries in the world in that we recognized that commercial paper was a suitable basis for circulation, and I regret that we are not following that principle to a

logical conclusion in this proposed law.

Sometime during this discussion I propose to take the time to indicate why I think it would be far wiser if we were going to issue circulation based entirely on commercial paper rather than notes of the Government secured indirectly by commercial paper. That is a long story, and I do not intend to take it up at this time; but those who have not had to deal with manufacturing communities and communities engaged in all forms of commercial business have little realization, I think, of the fear that takes possession of people in time of panic or the means that are taken in order to enable business men to carry out the interests of their business or the necessary requirements of their business. For instance, in the State of Massachusetts we have a law which requires employers to pay labor every week. That in the ordinary course is done through currency. Very seldom are checks used for that purpose. Therefore it is necessary for the employers of Massachusetts every Saturday to have their funds at hand ready to pay their employees. There were cases where corporations during the panic of 1907, instead of waiting until the day before, as they ordinarily would, and then going to the bank and getting their circulation to pay their employees, drew it out a week ahead, and, in one case, one very large corporation was carrying two weeks' pay roll in its own vaults so that there might be no possibility of any failure to meet the requirements of the law and to satisfy their employees.

Then we have another condition in Massachusetts which is somewhat different from that in many States. We have more than \$500,000,000 deposited in the Massachusetts savings banks by people of small means, because no person can have more than \$1,600, including interest, deposited in any one bank. In a population of three and a quarter million there are more than two and a quarter million of savings-bank depositors. Those banks are scattered throughout the Commonwealth, in small towns and large towns. They are all mutual-savings They carry no reserve, except a sufficient amount to meet the ordinary daily needs of the bank. They depend for circulation for their ordinary needs, or extraordinary needs, on the national bank in their own village or town, or on the Boston banks. It seemed essential at that time, when everybody was frightened, that the savings banks should not take advantage of the 30-day provision which is in our law for the delay in making payments. Therefore it was necessary to furnish circulation enough not only for the great pay rolls of Massachusetts, but circulation enough to provide for all the two and a quarter million of depositors in our savings banks. As I said, I think no one who has not lived through a panic under those conditions can comprehend the straits to which our banks are put under present conditions to meet their legal and proper requirements.

There is one other matter-

Mr. BRISTOW. Before the Senator proceeds, if he will

Mr. WEEKS. Certainly.
Mr. BRISTOW. The Senator has stated that there are other reasons than currency. Of course I know there are a good many academical and theoretical reasons. There are a great many students of finance and currency who have all kinds of notions as to what kind of a financial system a nation ought to have. But we are undertaking to accomplish two purposes, which have been stated by everybody who has discussed this subject—the mobilization of reserves and the creation of an elastic currency. The object of both these purposes is to be able to meet the demands of the banks for these pay rolls and other needs suggested. Now, could not the requirement of the State of Massachusetts have been met without this apprehension if, when it was necessary, the banks of Massachusetts, the banks of Boston, I will say, or New York, could have gone to the Government and got the currency upon their assets when they needed it?

Mr. WEEKS. Mr. President, I do not think it is necessary to go to the Government for currency. If they had had a central reservoir, a central bank in any form, a reserve bank, as is provided for in these bills, where they could have taken their assets as limited by these provisions and rediscounted them, taking whichever one of the things a borrower does take, either a credit on the books of the bank or circulation or exchange on some other point-if they could have done that they would have been able to supply their needs. I think the Aldrich-Vreeland bill which is now on the statute books and which we in this bill are extending for a year would ordinarily provide for the currency needs of such business communities as Massachusetts.

Mr. CUMMINS. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Iowa?

Mr. WEEKS. I do.

Mr. CUMMINS. There seems to be a sort of consensus of opinion that we are trying to provide against the recurrence of the conditions that came upon us in 1907. I wish the Senator from Massachusetts would explain to us a little further about the assistance that the bill before us will render the American people under such circumstances. The way it looks to me is that in 1907 the country banks, of which we have

heard so much this afternoon, were compelled under the law to hold 9 per cent-if I am wrong, I hope the Senator will correct me-of their demand obligations or their deposits in their vaults.

Mr. WEEKS. Six per cent.

Mr. CUMMINS. Nevertheless, they suffered very great inconvenience, if not disaster. Under the bill that is now before us they are required to hold only 7 per cent in their own vaults. So, they will have but 1 per cent in addition to the amount they held in 1907. They have deposited with the Federal reserve banks 5 per cent.

Mr. WEEKS. Four.

Mr. CUMMINS. Five, I think, in the Owen bill. .

Mr. WEEKS. Four in the other proposition.

Mr. CUMMINS. Five in the Owen bill, however, and it is to that I am addressing myself, because I consider every other as merely for purposes of illustration or academic. Five per cent they are required to deposit in the Federal reserve banks. The Federal reserve banks are authorized—and, indeed, the whole spirit of the law requires them-to loan out 66 per cent of the 5 per cent. Therefore, the Federal reserve banks will have but 13 per cent of the reserves in money when this condition shall again fall upon us. So the country banks will have 7 per cent and the Federal reserve banks but 13 per cent, making only 83 per cent of the amount of all the deposits in the country banks or the general banks. If any such situation confronts us again there is not a Senator here but who knows that  $8\frac{1}{2}$  per cent of the deposits of the country will not satisfy the condition. If the entire reserve were put out it would not meet the condition which confronted us then and which may confront us again.

It seems to me that unless it is intended that in such contingency the Federal reserve bank shall at once issue new notes to whatever amount may be necessary to satisfy depositors we are erecting a structure here that will have very little beneficial

I should like to know from the Senator from Massachusetts whether it is his understanding that under those circumstances we are to resort to new paper money—that is, whether those are the emergencies that new paper money is intended to meetand if they are, I should like to have it explained how the Federal reserve banks will be able to deposit the gold reserve that will be required in order to issue the new notes. It would seem to me that under those circumstances the only relief which can be given to the people would be to issue the new notes upon the basis of commercial paper.

Mr. WEEKS. Mr. President, it is a pretty comprehensive question that the Senator from Iowa has asked, and it comes pretty nearly covering the whole bill, but I want to touch on two or three other phases of it at least, I hope to the satisfaction

The necessity for maintaining reserves is dependent on the provisions which may be used for obtaining circulation. is no other country than the United States where the law requires banks to maintain a specific reserve against deposits. In no country, not even in Canada, do the banks maintain as large a reserve as do our banks, even our country banks. I think the Canadian banks the last time I looked at their statement had an average of about 10 per cent reserve on their deposits, and it must be remembered that there are but 29 banks in Canada, having more than 2,000 branches scattered from the Atlantic to the Pacific. Yet they were getting on, issuing circulation up to the capital of the bank as they needed it, turning in the circulation of other banks that came in to them, if it were profitable to issue their own, sending back to the banks which issued it the circulation which they had issued, and maintaining a condition of equilibrium under such conditions.

Every 10 years the Canadian bank law is revised by act of Parliament, and each period of 10 years demonstrates that some changes are required in the law owing to the growth in the volume of business and, quite likely, to the density of business

and the development of that great country.

Just now they have been having the 10-year revision of their banking law, and they have added a provision which enables the banks to issue more circulation than they have in the past, and that additional circulation is based on a gold supply which is kept at a central place of deposit, I think with the treasurer, at Ottawa. I am not quite sure about that, however. But the other day I noticed by the figures published that the banks of Canada had deposited about \$5,000,000 of gold in this central reservoir, and they are authorized under this law to issue circulation to that extent.

Now, the basis of the provisions of the law which we are considering, as far as circulation is concerned, must be the gold reserve which the banks hold. It would not be necessary, in my judgment, for our banks in reserve cities or our banks in country districts-and there is no reason why one should keep larger reserves than another, except that we are in the habit of imposing higher reserves in the reserve cities than in the country districts-it would not be necessary for them to maintain 15 per cent, as we are going to require, or 12 per cent, or even 10 per cent, necessarily, if we had in operation this law and we were sure that it was going to operate well in every way. Nobody knows whether it is. You may take the best bank men in the United States and ask them the specific question as to how some provision will work out and you will not get exactly the same reply from any two of them. It is an experimental piece of legislation, in a way. No other country, for instance, has a number of regional banks. They all have a central bank. There are a number of vital differences between what we are proposing and what other countries have had and proven to be effective and efficient

If we were perfectly sure that this bill was going to work as well as the chairman of the Banking and Currency Committee hopes it will, then it would not be necessary for us to require 15 per cent reserve, or 12 per cent, or 10 per cent. In fact, we could leave to the banks themselves pretty nearly the amount of reserve which they should carry, and that would be determined by the location of the bank and the peculiar necessities which surround it and its customrs. For instance, we have in both these propositions-certainly in the Hitchcock propositionprovided that a certain part of the reserve of the bank must be kept in the regional banks and that a certain part must be kept in the bank's own vault. The other one-third may be deposited wherever the bank wishes to deposit it, either with the reserve bank or kept in its own vaults.

It is easy enough to see that a country bank 50 or 100 miles from a great center or from a regional bank or from a branch of a regional bank will need to depend on its own resources to a greater extent than will the bank that is directly across the street from a reserve bank or a regional bank. Therefore that country bank will carry in its own vaults a larger percentage of reserves than will the bank in some other locality. stance, if a bank in the Wall Street district in New York-and there is a regional bank there, as I presume there will be-carried more money than it needed from day to day in its own vaults. I should be surprised. I should suppose that it would carry all that the law would permit in the regional bank, because all it has to do is to go across the street and get the gold if it needs it. For that reason, in my judgment, we will find in the regional banks a larger amount of gold than the law provides that the banks shall keep there as a matter of necessity, The big banks will keep more reserves in the regional banks than will the small banks in the country districts.

Now I come to the question of circulation. We are going to depend on the amount of circulation which will be put out, or to restrict the amount of circulation by the amount of reserves behind the circulation. There is not any difference primarily between a bank deposit and a bank note. I hope Senators will bear that clearly in mind, because it is fundamental, that there is no difference between a bank deposit and a bank note from the bank's standpoint. If one of you go to your bank to make a loan of \$5,000, you take that loan-Mr. NORRIS. Mr. President—

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Nebraska?

Mr. WEEKS. Yes; I yield. Mr. NORRIS. As to the Senator's statement, which I realize is made as a rule by experts on the proposition, that a bank note and a bank ceposit are just the same, I should like to get the Senator's idea. If that be true, why is he in favor of the additional security for a bank note and opposed to security for a bank deposit?

If we were talking about the security of re-Mr. WEEKS. serves to be maintained against a note issue and the reserves to be maintained for other purposes against deposits, I would say that I do not think there ought to be any difference. We have provided a difference in our bill, that 45 per cent shall be kept against note issues and but 35 per cent against deposits. I do not myself think there is any necessity for any difference.

Mr. NORRIS. Do not all these bills provide for other and

additional security, and is not the Senator for other security to be provided in all proposed legislation for notes that are intended to circulate as money?

Mr. WEEKS. We are providing additional security in this case; we are providing that, in addition to 45 per cent of gold behind the notes, that there shall be the face value of the notes either in commercial paper or in refunding notes, which we provide for in the bill.

Mr. NORRIS. But for your deposits, which you say are just the same, you are only providing for a reserve of 12 per cent. Mr. WEEKS. The Senator from Nebraska is talking about

member banks and I am talking about regional banks.

Mr. NORRIS. The object I had in asking the question was to get the Senator's idea on the subject of deposits. I have heard a great many times many of the witnesses appearing before the Banking and Currency Committee make the same statement. For instance, Mr. Fowler, who served in Congress a good many years and was for a long time chairman of the Committee on Banking and Currency in the House, has always advocated that, and he advocated it before the committee. He stated that a deposit was just the same as a note, and that a man who deposited should be allowed either to take credit or to take notes of the bank

Mr. WEEKS. Let me point out to the Senator from Nebraska what would happen if he went to his bank and borrowed \$5,000. When the bank puts that \$5,000 to his credit on the bank's books, it is a bank obligation; there is no question about that. The bank owes him, the depositor, \$5,000. If the bank puts one-half of it on the books to his credit and gives him exchange, what is known as a cashier's check on New York for \$2,500, they are both of them the direct obligation of the bank. cashier's check may go through two or three or four hands before it finally reaches the correspondent bank in New York on which it is drawn, where it is charged against the bank which issues it; but it is an obligation of the bank as long as it is outstanding, just as a deposit on the books of the bank is an On the other hand, the Senator may be a manufacturer in need of \$5,000 in bills to pay his employees on Saturday night. In that case he takes the \$5,000 in the bank's bills, and those bills are the obligation of the bank just as is the deposit and just as is the cashier's check which goes to New There is not any difference.

Mr. NORRIS. I concede all that; but why is one secured by more security than is the other?

Mr. WEEKS. The member bank must keep on that \$5,000 a reserve of 12 per cent if it is placed on deposit, but the member bank does not issue the circulation; the regional bank is the bank of issue.

Mr. ROOT. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from New York?

Mr. WEEKS. Yes.

Mr. ROOT. May I ask a question apropos of the question put by the Senator from Nebraska? Of course, they are both forms of bank credit.

Mr. WEEKS. Yes.

Mr. ROOT. But does there not come to be in the subsequent history of the obligation a further distinction which calls for recognition from the Government which charters the bank and gives it a certain degree of credit with the community as competent and fit to do banking business in this: That the bank credit on the book and the bank credit through the cashier's check are dealt with by persons who know the bank, who are familiar with the field in which they are operating, while the bank bills pass from hand to hand, are scattered through the community, go into the hands of laboring people, of servants for their wages; and they go all over the country into the hands of people who know nothing about the bank at all, and have no information upon which to protect themselves, upon which to judge of the value of the credit, and who do really need more protection than do those who have the bank credit in the other form?

Mr. NORRIS. If the Senator will permit me further, I concede that; but that does not meet the question that I am asking. I am trying to get information from the Senator from Massachusetts [Mr. Weeks], who, I understand, advocates that theory. It is not, so far as I know, in any of these bills. It is said, however, that when a man makes a deposit in a bank he ought to have the privilege of getting credit on the bank books, or he ought to be allowed-and if we had the right kind of a banking system he would be allowed-to take the bills of the bank that they circulate as money, and that there is no difference between the two; that each one is an obligation of the bank; and yet, as I understand, all the people who advocate that theory always provide a security for the notes which they are opposed to having for the deposits. The question that I want to ask is, If they are the same, why not have the same security for the notes as we have for the deposits?

Mr. WEEKS. Let me enlarge a little on that proposition. There really is no difference. The Senator from Nebraska has referred to Mr. Fowler. Mr. Fowler advocated the proposition that the 25,000 banks in this country should issue a credit cur-

rency based on the credit of the banks. That is exactly what the banks of Canada do. They issue a credit currency up to the capital of the banks. But the banks of Canada are few in number; they are well-known institutions all over that country. Our 25,000 banks are not well-known institutions, except in the immediate locality where they are situated. Furthermore, the Canadian system has developed a line of really first-class, dependable bank men. The best men have gone into that profession, and up to a recent time when our banks were enlarged so that the best talent could be bought, Canada did have stronger bank men than we had in the United States. I do not think that is true to-day, but it is relatively safe for 29 banks to issue circulation for a great country like Canada, when it might not be safe at all to allow 25,000 banks under the same conditions to issue circulation, because there is this difference: The individual deposits money in a bank because, presumably, he has made an examination of the bank; he has inquired into the character of the bank's officers; he has looked at the bank's statements to see whether or not the bank is prosperous. If the bank is making money, or the statements show that from year to year it adds to its surplus, he naturally assumes that the officers of that bank are conservative men and wise managers, and then he asks his friends about it, if he is a reasonably wise man, and the combination of the evidence which he gets induces him to deposit his money in the bank. But circulation, while the same thing in a way, should be issued under somewhat different conditions, until we are in the habit of issuing it, as we propose to do in this bill, and then I do not think it will be necessary at all. Now, however, we are in the habit of looking at a circulation which has behind it either gold or silver, or a portion of gold behind the greenbacks, or Government bonds behind the bank notes, and to issue a circulation with only 12 per cent gold reserve or some similar reserve and the bank's assets behind it would be unwise. It would not be in accord with the processes which obtain in Europe, where the central banks carry much larger reserves.

The Senator from Nebraska must remember that circulation is not issued by the joint-stock banks in Europe. The circulation is issued by the central banks. The average reserve of the central banks in Germany, France, and Great Britain for several years has been as much as 65 per cent, and it is on that basis that circulation is issued in those countries, not on a basis of 12 per cent or any other basis which

would be sufficient to cover a deposit.

Mr. NORRIS. Mr. President, it seems to me that the Senator has almost demonstrated the contrary of his proposition that there is a difference between a note and a deposit. He says that a reserve of 12 per cent would not be enough in a country bank for a circulating note issued by that bank, and yet he concedes and, I believe, advocates that a reserve of 12 per cent will be sufficient to secure deposits. It seems to me that would almost demonstrate that at least these two things, which are said to be the same, are treated entirely differently as to their security.

Mr. WEEKS. The Senator must not forget that in Europe there are banks of issue and commercial banks, and that the banks of issue are only relatively small dealers in commercial paper; that their first purpose is to issue the circulation and to provide for the needs of the Government which gives them corporate existence. There is that difference, in the first place; and, in the second place, what I said was that there was no difference whether a depositor took his deposit in bank notes or in a cashier's check or some other form of exchange or allowed it to remain on the books of the bank—that is, as far

as the bank is concerned, it is an obligation of the bank.

Mr. CUMMINS. Mr. President, the question propounded by the Senator from Nebraska [Mr. Norris] seems to me to be founded on a misapprehension of the bill. There is no security at all for the bank credit—that is, the reserve is not a security for the credit in the ordinary sense of that word. It may enable the bank to pay the debt at a time when it could not otherwise pay it, but the reserve against deposits is no more security to the depositor or to the creditor than the other assets of the bank are security, whereas for the notes there is first segregated 45 per cent in gold, which is set apart as security for those notes, and then, in addition to that, there are also separated from the other properties of the bank notes and bills, making up the difference between 45 per cent and 100 per cent. Therefore the bill holder is secured by an absolute pledge of property of equal value with the notes. Of course, the depositor or creditor simply depends upon the general solvency of the bank for his repayment. I think the Senator from New York—

his repayment. I think the Senator from New York—
Mr. NORRIS. Before the Senator leaves that question—
Mr. CUMMINS. I think the Senator from New York told
very clearly the difference between the bank credit and the cir-

culating note, and he might have added another distinction. The bank credit, which is transferred from hand to hand or from person to person through the medium of a check, is exhausted speedily. Not only do the parties to the transaction know the bank and know each other, but the check when issued is redeemed in a very short while, within a few days ordinarily, and therefore it is not necessary that the holder of the check shall have the same kind or quality of security that the bill holder has. The bill may be affoat for a year, two years, or five years; it is impossible to tell when it will be redeemed. So it seems to me that there is here, no matter what might be abstractly true, a very great difference between the credit created by the deposit and the note that is intended to circulate as money.

Mr. NORRIS. Before the Senator-

Mr. CUMMINS. Let me ask the Senator from Massachusetts this question: We are creating either 4 or 8 or 12 banks of issue. It is not suggested that we should give to 25,000 banks the privilege of issuing circulating notes. Why can we not give to 4, 8, or 12 banks organized under this system the right to issue notes as safely as Canada can give to her banks the right to issue notes? I can understand perfectly that we could not very well give the right to all the 25,000 banks, which include the State banks and trust companies, I believe, as well as the uational banks; but I can really see no difficulty in efficiently supervising and regulating 4, 8, or 12 banks, so that their circulating notes would always be good, although they might not always be accepted by the people. It seems to me that the reason that you have made this difference, provided for this security and required this gold reserve, is that you propose to attach the obligation of the Government of the United States to these notes and require the Government to redeem them. I am not quarreling with that policy; it has a great many things to commend it; but that is the reason you must provide this reserve in gold of 45 per cent, and that is the reason that you must make the Government of the United States safe and secure by depositing the difference between the gold and the full value of the notes and commercial paper.

Mr. ROOT. The full amount.

Mr. CUMMINS. The full amount of the notes and commercial paper. Suppose that you omitted the obligation of the Government entirely; what, then, should be the regulations respecting

the issuance of notes by the regional banks?

Mr. NORRIS. Mr. President, if the Senator from Massachusetts will permit me just a moment, the Senator from Iowa made a statement in regard to a question which I asked and then branched off to something else. I should like to finish that if I could. He said that I had asked my question under a misapprehension of the bill. I asked my question not on any apprehension of what was in the bill, but upon the statement made by the Senator from Massachusetts that there was no difference between a deposit and a bill issued by the bank.

Mr. WEEKS. Mr. President, I do not think the supposition of the Senator from Iowa is quite justified. The fact that the Government issues these notes of course does not detract anything from the value of the notes; but in framing legislation under these conditions we must necessarily take into account the methods which have been used in the past, the processes which have been followed for a hundred years in this country. We can not change suddenly to something that is entirely new,

because that in itself might produce a panic.

We are in the habit of having a circulation that is either covered entirely by gold or covered entirely by silver, or a percentage of it covered by gold, as are the greenbacks, or else secured by Government bonds. The amount of reserves in gold which we are requiring behind these notes is at least 45 per cent. I think myself it ought to be higher; but the reserve behind the greenbacks is 42 per cent or 43 per cent in gold, so that 45 per cent did not seem an unreasonable cover for us to impose in this case. I do not think, myself, that when this system has gotten into operation it will be necessary to impose all of the restrictions which we have in issuing this circulation, but I contend that we can not impose too many within reason when we are changing from one system to another. Otherwise, we might find that people were distrusting the circulation which we were issuing, and that in itself might produce a panic, which is just what we want to avoid. What we wish to do, in fact, is to change this system so gradually that no one will know that the system is being changed.

I was surprised to hear the chairman of the committee state to-day that it was not the purpose of the so-called Owen bill to do away entirely in the end with bond-secured circulation. Possibly I am a little cranky on that subject, but I think fundamentally and theoretically one of the most unwise things connected with our banking system is to base circulation on a

debt, as we do in issuing bond-secured circulation. It would not have been done if it had not been necessary to float our bonds during the Civil War and at the same time to get rid of the State-bank circulation, which was always at a varying value and almost always at a discount. Those were the two reasons for getting rid of that circulation.

If we are going now to base a circulation on strictly theoretically right principles, we shall base it on commercial paper, and we shall attempt to provide for the redemption of that circulation in such a way that it will be promptly redeemed as soon as the need for the circulation has disappeared.

The Canadian circulation, in that great country extending from the Atlantic to the Pacific, stays out only about 29 days.

Mr. WILLIAMS. Twenty-eight days.

Mr. WEEKS. Twenty-eight days, the Senator from Missis-sippi tells me. Our own circulation goes around in an endless chain. We are all the time sending out bond-secured circulation, sending it to the banks which have issued it, and they, not requiring it at most seasons of the year or many seasons of the year, send it to their reserve banks in reserve centers. The reserve banks can not use it for any purpose, and they send it in for redemption. As I stated the other day, as perhaps some Senators will recall, there are numerous instances of bundles of bills actually coming back to the Treasury which have been this roundabout course, have completed the circle, and come back to the Treasury, never having been opened. That is the kind of redemption which we have to put up with, because the banks can not find a ready market for the 2 per cent bonds, which are a basis of circulation.

If the basis for circulation were a note which had a date of maturity, and that note was so selected that it was sure to be paid at the end of 30, 60, or 90 days, whatever time it might be, the circulation would come in and be redeemed automatically. That is what I want to call to the attention of the Senator from Kansas [Mr. Bristow], who asked about the reasons for this legislation other than the reason which he stated. It will enable the banks of the country to make use of a vast amount of good commercial paper which has no value to-day in taking

care of the conditions which we meet in time of distress.

For instance, the banks of New York are loaning, we will say, a half billion dollars on commercial paper. Perhaps three or four hundred millions of that is the kind of commercial paper which would come within the restrictions of this bill. Having that paper, under present conditions, they can make no use of it to get gold or for any other purpose. You could not sell a piece of that paper in Europe, for instance, because it is not well enough known, and very much of it you can not sell out-side the limits of New York; but if they had means of turning that paper into circulation, or increasing their reserves by rediscounting the paper with somebody or something, they can recoup themselves, can add to their gold supply, and can furnish themselves with enough circulation to take care of the needs of their customers.

Mr. SHAFROTH. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Colorado?

Yes.

Mr. SHAFROTH. Mr. President, the redemption to which the Senator has referred, that of national-bank notes coming into the Treasury, exceeds \$600,000.000 a year; but is not that due to the fact that there is not sufficient reserve money to meet the demands of the banks? As I understand, the only reason they send in the national-bank notes is because they are short of the money that they can keep as reserves. Inasmuch as the national-bank note is redeemable in lawful money, and lawful money can be used as reserve money, it is sent to the United States Treasury for the purpose of getting lawful money; and then, when they get it, they use it as reserve money. Is that the fact?

Mr. WEEKS. I do not think the Senator from Colorado is correct in that statement. We are going to have in these reserve banks \$200,000,000 of Government deposits, in round numbers-that is, in gold-and we are going to have capital paid in, under the plan which I stand for, of about \$100,000,000 more. That is \$300,000,000. The reserves which will be paid in from time to time until all that is required by law are paid in will amount to at least \$400,000,000 more. That is \$700,000,000 in gold, even supposing that no trust company or State bank comes into the system. I do not think it is true that the banks have not sufficient reserve money, and that that is the reason they send in the notes, but I think they send them in because they do

ont need it at the time they receive them from the Treasury.

Mr. SHAFROTH. If they do not need national-bank notes they do not need other forms of money, because national-bank notes are at a par with any of them.

Mr. WEEKS. I am quite in agreement with the Senator in that respect. I believe there is a redundancy of currency very much of the time. I do not wish ordinarily to stand as a prophet, but I will prophesy now that we shall find that at certain seasons of the year, if all of these bank notes were changed into legitimate asset-currency notes, we would have two or three or four hundred million dollars less circulation outstanding than we have now.

Mr. SHAFROTH. That would mean a contraction of the currency, then, to the extent of three or four hundred million dollars

Mr. WEEKS. It would.

Mr. WILLIAMS. Oh, no. It would one part of the year, but

another part it would be greater than it is now.

Mr. WEEKS. One part of the year we would not require it, and it would naturally contract; and the part of the year we did need it it would be issued as the customers of the bank re-

Mr. WILLIAMS. And then it would be greater than it is

Quite likely

Mr. SHAFROTH. The difficulty of the situation is that the Senator assumes that this system is sure to work. witnesses before our committee who testified that they did not think there was sufficient discount paper of the character required by this bill to produce enough currency to take the place

of the national-bank notes now outstanding.

Mr. WEEKS. Mr. President, out of curiosity some time ago I made some investigations in a couple of banks as to the amount of paper they had which would come within the requirements of this bill. In my judgment, those two banks alone would be able to supply all the circulation needed in the very considerable city in which they are located, where the two banks have not more than one-quarter of the capital of the national banks, while there is substantially as much more capital in State banks and trust companies in the same community.

Mr. ROOT. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from New York?

Mr. WEEKS. I do. Mr. ROOT. I should like to make a suggestion regarding the

observation of the Senator from Colorado.

It is true that we have not in this country as much of the kind of paper ordinarily known in the commercial world as banking paper, in proportion to our business, as exists in other That is, we do not do our business here in the main countries. through what is known as prime commercial paper. Some of us can remember the time when the buyers of the country merchants went to New York and Boston and Philadelphia and the cities where they got their chief supplies, bought their stocks of goods, and gave their notes at 30, 60, 90, or 120 days. They gave their notes, and those notes were indorsed by the jobber or wholesale house, and were made the basis of credit in the banks upon which the money was raised to carry on the The ordinary commercial form of doing that would be, instead of by means of a note, by means of a draft on the purchaser and its acceptance, and that acceptance would constitute the ordinary commercial paper.

During the past 20 years, however, there has been a very great change in the method of transacting business. The country merchant no longer gives his paper, but he makes his purchase and it rests in open account; and the wholesale merchant or jobber makes his own paper and sells that to the banks in the form of single-name paper. It is not prime paper which is known to the greater part of the commercial world, and that fact probably would support the statement which has just been made. I apprehend, however, that if this bill gets into operation and works, and merchants want money, they will adapt their forms of doing business to the requirements of the bill. Then you will find that there will be enough commercial paper to form the basis for all the discounts that this bill permits, up to the point that the business of the country will absorb, up to the point of that credit which alone in the end is the only substantial basis for bank credits of any kind, whether on book account or upon the issue of notes-the credit which consists in actual representation of dealing with values. Up to that point credit is good. Beyond that point you have

inflation, depreciation, loss of gold, and ultimate disaster.

Mr. SHAFROTH. Mr. President, I fully agree with the declaration made by the Senator from New York, that at the present time the notes or drafts that are supposed to be of the character of paper necessary upon which to issue money under this system do not exist in the United States, I do not suppose 5 per cent of the paper in existence among the various banks is of the kind required under this bill. I do hope that the opinion expressed by the Senator from New York will prove true, and that we will be able to have the banks conform to this system. My objection to the bill as framed by the other section of the committee is that it proposes to contract the currency by the redemption of the national-bank circulation without providing a permanent currency in its place.

It is true that the Federal reserve notes, based on 90 or 180 day drafts, might answer the purpose, but we have many experiments that do not turn out to be workable. The Aldrich-Vreeland Act was thought to be an excellent law; but when we find that it has not worked and that no application for currency has been made, it seems to me we might have failures in this bill similar to the failure that has existed in the case of the Aldrich-Vreeland Act.

Mr. ROOT. Mr. President, would the Senator from Colorado think that a safety clutch on an elevator was a bad thing because the elevator had not fallen and put it into operation?

Mr. SHAFROTH. No; I do not believe that. I believe there have been necessities and causes for the action of the Aldrich-Vreeland measure; but the Aldrich-Vreeland Act was defective in the fact that it made one bank guarantee the paper of another bank, and that the banks would not do.

Another defect in that bill was that it required or permitted one bank to investigate the affairs of the other bank to see what paper it had, and no bank desired that its paper should be

looked over by a rival bank.

Mr. ROOT. But, Mr. President, I think the majority of the clearing houses in this country, certainly those in all the principal cities, have adopted a system under which that very thing is done regularly. They do not rest on the examination made by the bank examiners under the direction of the Comptroller of the Currency, but they have established examinations of their own. They have their regular officers, so that every bank is examined by all the other banks forming a part of the same clearing house.

Mr. SHAFROTH. We do know that when the Secretary of the Treasury offered to advance money among the banks in various parts of the country that wished to get it they did not want to get it under the Vreeland Act; and one of the principal reasons was that one bank had to be the guarantor of the paper of the other bank. That has always been, as I understood, the drawback and the thing that obstructed the carrying

out of the provisions of the Vreeland Act.

Mr. ROOT. The Senator bases his objection to that on the

experience of Oklahoma?

Mr. SHAFROTH. Oh, no. I do not think, so far as Oklahoma is concerned, that there has been a failure of the bankguaranty provision of the law there. There has been a bankguaranty system in the State of Kansas, and also in the State of Nebraska, and also in the State of Texas, and, so far as the depositors are concerned, I can say that no depositor has lost a single dollar in any one of those States. For that reason I can not see that the guaranty provision of the Oklahoma law was such that it worked a detriment to the people of that State.

But what I wanted to call the attention of the Senate to was the fact that the provision of the Hitchcock bill is for the retirement of a bank currency without the substitution of any other currency for it except this currency based on 30, 60, and 90 day paper, and the testimony of some of the witnesses was to the effect that that would not be sufficient to satisfy even the \$750,000,000 of national-bank notes. There were persons—such as Prof. Sprague, of Harvard—who testified that they regarded the circulating medium of the United States now, including the national-bank notes, as a necessary currency, as a fixed currency, and that this cushion of elasticity should arise from the currency which we have now; that is, that there is, of course, an expansion of trade and of the business of the United States going on, and there has to be some expansion of the currency to keep pace with the ordinary expansion of trade. Prof. Sprague regarded that this cushion which was necessary in the formation of an elastic currency should arise from the currency which we have now.

We all know what has occurred in the past when we have had a contraction of the currency. We know that it was not discovered until 1878 that there was a provision in the law which permitted the Secretary of the Treasury to retire the United States notes called greenbacks, and they did not wake up to that fact until over \$100,000,000 of that currency had been retired. Then there was a universal demand that it should be stopped, and a provision was inserted in the law that we should not retire any more, but that we should reissue every dollar

not retire any more, but that we should reissue every dollar that came into the Treasury.

I can say that, so far as the contrast between the contraction of the currency and an expansion commensurate with the

growth of the United States, there can be no doubt in my mind that one brings a disaster which is terrible in its effect. The contraction of the currency has been that which has produced most disastrous results in our nation.

Mr. WEEKS. Mr. President, the Senator from New York [Mr. Roor], I think, very aptly answered the Senator from Colorado as to the use to which the Aldrich-Vreeland bill would be put. It has not been used, because there has been no necessity for using it since it was passed in 1908. It is a panic measure. It is an anchor to windward in case everything else breaks down. The tax imposed on that circulation, amounting to 4 per cent the first month, 5 per cent the next, 6 per cent the next, and 7 per cent the next month, prevents a bank from using it unless the conditions are unusually stringent all over the United States.

Furthermore, let me call the Senator's attention to the fact that the banks of the country have not even taken the \$50,000,000 on a 2 per cent basis which the Secretary of the Treasury offered them two or three months ago; and we will seldom go through more, I will not say a more abnormal, but a more uncertain period than we have been going through in this country in the last six months. They have taken only \$34,000,000 of that circulation. Many banks have refused to take it at all, because they did not care to put up the security and at the same time pay 2 per cent for the money. That is only one-half of what would have to be paid under the Aldrich-Vreeland bill the first month, with the rate increasing, as I have said, I per cent a month.

The statement that there is not sufficient paper in this country to furnish the circulation which is provided in the Hitchcock amendment we offer here does not bear investigation at all. We propose to retire \$50,000,000 a year of the 2 per cent bonds with the circulation behind the 2 per cent bonds. That is not very much, and in many periods of the year, in my judgment, we will not know that it is retired at all. At some other period we may need \$100,000,000.

Let me point out to you that there is sufficient commercial paper for that purpose. Here is one western bank, a large bank, that discounted in the month of October, 1907, \$1,250,000 of 30-day paper, \$2,204,000 of 60-day paper, and \$4,111,000 of 90-day paper, in all \$7,000,000 discounted by that one bank of paper that the minute it was taken, met the other requirements of this law, would be available to deposit and obtain circulation against it. Then in addition to this the bank discounted \$2,000,000 of paper running from 90 to 120 days and \$6,000,000 having 120 days to run, a total in that one month of \$21,000,000.

That longer-time paper is gradually approaching maturity, so that the bank will not only have the paper discounted for less than 90 days, but it would have a considerable amount of paper that has run a considerable time and was approaching the day of maturity. So I have no doubt that bank would have as much as \$10,000,000 or \$12,000,000 of paper available to be used in the process to which the Senator from South Carolina has referred. That is only one bank, a large bank, in one of the principal western cities.

Then there is another form of paper which we are providing for in both these bills, to which I referred briefly the other day, but I should like to refer to it a little more in detail now. It is the method of issuing paper in different European countries. It carries with it not only the credit of the maker of the paper, but it carries with it the credit of the acceptor of the draft, because it is usually in the form of a draft. There are very many private concerns in England and France, and I have no doubt other European countries, which make a business of accepting the paper of merchants. They do it under differing conditions. The merchant may be required to put up some form of collateral; he may be required to give some kind of a warehouse receipt for cotton or for corn or for something else to secure the banker or the broker who accepts his paper; but the man who accepts the paper adds his credit to the credit of the merchant. If the merchant made a promissory note, he might find it necessary to pay 5 per cent for that money; but if he draws on a well-known bank or a well-known banker, he may be able to sell his paper on a 4 per cent basis. He may pay the banker one-fourth or one-eighth of 1 per cent for accepting his draft, but in any case he would be better off than he would if he sold his own note direct.

For that reason, we undoubtedly will see a lower interest rate to every man who has a broad credit as a result of this system. That is the kind of paper that will not only go in our own reserve banks and be available as a basis for circulation, but it is the kind of paper that will give our business men a world-wide credit.

There is not any reason why the paper of the best merchants, the best manufacturers, or the packers or other similar concerns in the United States should not sell in France or England or Germany as similar paper of those countries would sell in any other European country. The result would be that it will relieve our own banks so that they can give better facilities to those to whom they to-day are perhaps giving insufficient facili-ties. It will broaden the credit not only of the individual merchant or manufacturer, but it will broaden the credit of all kinds of business men throughout the whole country. For that reason, in my judgment, it is one of the wisest provisions in

Now, several Senators have referred to the fact-

Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WEEKS. Certainly. Mr. BRISTOW. Before the Senator leaves that point, there is one provision in the Hitchcock bill that I think the Senator from Colorado [Mr. Shafroth] must have overlooked when he spoke of 30, 60, and 90 day paper. The Hitchcock bill provides that 180-day or 6-months paper may be discounted. On page 40 of the bill it says:

Notes and bills admitted to discount under the terms of this paragraph must have a maturity at the time of discount of not more than 180 days: Provided, however, That not more than 50 per cent of the paper discounted for any member bank shall have a maturity exceeding 90 days, and in no case shall any member bank have more than \$200,000 of rediscounts having a maturity longer than 90 days.

So that brings into the rediscounting privilege many thousands of dollars of six-months paper, which is just as good as 90-day paper, because it covers cattle paper of the West and the paper of western farmers given for six months, and southern

Mr. SHAFROTH. I will state to the Senator from Kansas that I was aware of the provision. I was speaking of the Owen bill when I referred to 30, 60, and 90 day paper. According to the limitations of the bill as the Senator has read it. only a certain percentage of it can be of 180-day character, and even in that case we do not know whether this currency is going to be a success or not. It is a currency which may be called out, and it may not be called out. We must remember that the bankers are those who have the privilege of doing this and nobody else. That privilege is such that it ought to be guarded by the public in general. It is the member bank that goes up and discounts this paper. It is not an individual. If I wanted a circulating medium in my part of the country I could not get it; it is all in the hands of the banks. To wipe out to the extent of \$50,000,000 a year a circulating medium that has been as good as the national-bank circulation, without knowing absolutely that there will be a currency to take its place, is a hazard which I do not believe ought to be taken.

Mr. BRISTOW. But the Senator certainly will admit that if there is a demand for currency in the community which any bank serves, it is to that bank's interest to supply that demand, so that if the bank's customers want the currency and need it, if they have the security for it, the bank can get the currency to supply them. If they have not the security, then the banker would not want to loan it to them and does not need it.

Mr. SHAFROTH. As has been stated, this character of paper, which in your bill is the same as that of Senator Owen's bill, namely, commercial paper, represents the actual transaction in commerce. That is not the mode in which we do business in this country. It may take years before that system will be

adopted by our people.

Another thing is we do not know what provisions of this bill might prevent the issuance of the money which we hope will take the place of the bank circulation. But it has been conceded, or nearly so, because we heard hardly anyone protest against it, that the amount of currency which we now have is practically the amount we need with little variation, and principally a variation in crop-moving time. That being the case, it seems to me we can make this cushion of elasticity upon the currency that we have, and then if we need any more let it drop back.

But to destroy as good money as the national-bank circulation without providing surely and certainly that there shall be placed in its stead such currency as will not be retired and to depend upon the putting of 30, 60, 90, or 180 day paper in bank and demanding money upon it, it seems to me would be unwise without having a permanent currency to take its place, at least until it goes into operation and we see whether it is going to be a success.

Mr. BRISTOW. With the permission of the Senator from Massachusetts, I should like to ask the Senator from Colorado a question. It seems to be the purpose to maintain the present

national-bank currency and simply provide a cushion of elasticity, to use the Senator's term, which will not aggregate more, according to the testimony before the committee, than the limit of \$200,000,000 a year. The variation, the elasticity, of the currency will not vary more than \$200,000,000 a year. That was the maximum placed by everybody who appeared before our committee, as I remember. If that is the purpose, why is it necessary to create an enormous organization here composed of 8, 10, or 12 regional banks, with a great Government force tearing up the entire banking relations of the country, in order to provide an elasticity of a couple hundred million dollars a year for that currency? I should like to know why it is necessary to do that.

Mr. SHAFROTH. If the Senator from Massachusetts will

yield to me, I will try to answer.

Mr. WEEKS. I will yield to the Senator.

Mr. SHAFROTH. That is entirely a deviation from the question we have been discussing; but the necessity for having a number of banks is not the necessity always of issuing money, because the issuance of money will likely arise only in times of panic, only in times when there is a very tight money market. But these reserve banks are to be established for the purpose of mobilizing the reserves at a place that is convenient to the banks of the United States. I have been in favor of a larger number of banks than four. I believe there should be not less than eight. Our bill provides that there shall be not less than eight nor more than twelve. As one witness put it—and it seemed to me to be a very sensible answer—a reserve bank keeping the reserves of the various banks of the United States should be at such a distance from the banks that the president of an institution of that kind, fearing that there will be a panic, the next day can take his portfolio of notes aboard the train, go to the Federal reserve bank, and be able by the next morning when his bank opens to telegraph that he has secured sufficient money or sufficient credit, either one-sufficient money if there is a run on the bank-to pay the deposits, and then the run will not occur. It is for the purpose of utilizing these reserves. These reserves go to New York. They pay an interest rate It attracts them, and consequently takes them away from the place where they belong.

This money belongs to the various portions of the West. does not belong to New York nor to St. Louis nor to Chicago, It is for the purpose of keeping these reserves that we want eight regional banks instead of one, because the regional bank, or the Federal reserve bank, as our bill terms it, will be loyal

to the interests of that district.

That is the reason why we do not want to have one reserve bank situated in one part of the country so that an application must be made from a distant point, and when they say "we want some money," they can say, "Oh, we need money in some other portion of the United States." If you have a system of branch banks the branch bank is always subservient to the policy of the central bank. The result is that if they care to discriminate in favor of one portion of the country it can be

It is because with 8 banks or 12 banks each one will have a certain territory of its own; it will be supposed to watch out for the interest of that territory; and it will be supposed to keep the reserves of the banks in that territory. That is the reason why we believe that the provision is necessary and that one located here at Washington or at New York City could not answer the purpose,

Mr. BRISTOW. The Senator says, as I understand from his remarks, that the purpose of this great organization, then, is not so much to issue currency as it is to handle the reserves.

To demobilize them.

Mr. BRISTOW. And he wants a number of them in order to scatter them all over the country and bring them closer to the communities to which they belong. Now, let me ask the Senator a question. We have now, instead of 8 or 12 reserve centers, 47; we have 50, counting the central-reserve cities as 3. That brings your reserves closer home; that puts them in the communities which they are to serve. What are you tearing it up for, if it is for the purpose of scattering the reserves and getting them around all over the country where they can be used?

Mr. SHAFROTH. I will tell you why. It is because these reserve cities contain 315 banks, and these reserves are therefore scattered in 315 banks, and the central reserve cities, consisting of New York, Chicago, and St. Louis, contain 52 banks, and the reserves of the reserve cities are scattered among these 52 banks. The result of it is that this will be a considerable concentration; and when you cut it down to 8 banks, taking the number of 367 banks that are now scattered, and with no obligation upon any of them to furnish money in time of stress or in time of necessity, the country banker can appeal to his home Federal reserve bank and can draw upon its re-

serve to that extent. He can take his paper there and discount it. The object of this is to let him go to a conveniently located place with his portfolio of notes and drafts, there present them, and get them cashed. By reason of that he can overcome any run that can be made upon his bank.

Mr. BRISTOW. Mr. President, I challenge the Senator from Colorado to cite a single banker who appeared before the Committee on Banking and Currency who said that he had not been able to get his paper discounted when he wanted it rediscounted

by his correspondent.

Mr. SHAFROTH. But the inquiry was not made on that point particularly. There was some inquiry made as to a few, but as a matter of fact, we know the New York banks could not do it in 1907. I have no criticism of the New York banks; I feel that they were trying to overcome a situation there that was terrible, and that they were acting according to what they believed was the best interest of the country and of themselves; but I must say that where you simply permit a national bank to put its reserves into another national bank, there is no obligation upon the part of the latter bank to come to its rescue and to cash its paper. While they might do it, and no doubt would if they had plenty of money themselves, generally when there is a panic it stretches from one end of this country to the other, and for that reason the New York banker is not able to discount. There is not enough to go around in the distribution of money in panicky times. You have got, therefore, to resort to some such machinery as we have provided in this bill for that purpose.

Mr. BRISTOW. But the Senator by his argument now is con tradicting the argument he made just a few moments ago. A few moments ago he said that he wanted a larger number of reserve banks than four, so that the reserves could be close to home, so that the banks could get them quickly.

Mr. SHAFROTH. Yes, sir. Mr. BRISTOW. And now he is objecting to reserves being close to home, so that they can get them quickly.

Mr. SHAFROTH. Oh, no.
Mr. BRISTOW. He now wants them scattered in fewer places.

Mr. SHAFROTH. No; I do not. I say, of course, you could not have one in every reserve city in the United States. possibly might do, and it might be a success; but it is not likely, because the capital of the bank would not be sufficiently large, and the reserves which would be deposited there would not be sufficiently large to meet the ends and the demands which the banks might make; but when you have eight reserve banks in this country, extending from Boston to San Francisco and from Minneapolis to New Orleans, you can readily see that eight sections of this country can have powerful banks that can come to the relief of strain and stress and panicky times, especially under the provisions of this bill. I believe there are different elements and different arguments with relation to this matter. From an economical standpoint there is not any question but that you can have a bigger reserve and probably at a little less cost by having one central bank.

You must remember that when you have a central bank you have other evils that come into it. You must remember that it must be located in one section of the country, and its directors will naturally magnify the conditions and necessities of that portion of the country. Consequently the sections of country that are far from 12 will not be able to get the consider-Consequently the sections of ation which the locality near which it is located will obtain. But when you have a number of banks having a large territory with relation to each and a large amount of money in each, which would arise in the case of eight reserve banks, you can readily see that when you have them both in such touch that you can get relief within 18 hours for your failing bank, and that it will be of great assistance. Distance is one of the great elements to be taken into consideration in determining the number of banks.

Mr. BRISTOW. If the Senator will pay me the honor to listen to me to-morrow, I think I shall convince him that under the Hitchcock bill we are providing for every evil that he anticipates, and providing for it a great deal better than the

is advocating is likely to do. Mr. WEEKS. Mr. President, while this has been a most interesting debate between the Senator from Kansas [Mr. Bristow] and the Senator from Colorado [Mr. Shafroth], it has broken in somewhat into the continuity of my argument, which I shall

now again take up.

I have heard the criticism made that the banks of the country did not loan money during the trying period which included the months of October, November, and December, 1907, and there is a basis for that statement in some figures that were prepared for the Monetary Commission, which stated, as I recall them, that no loans were made at that time. If there was any reason !

for making that statement it was due to the phase of the question that bankers were not buying paper from those who were not depositors with them; in other words, they were devoting their entire resources to taking care of their own customers. But to indicate that there was loaning by the banks of the country, and at normal rates, I have obtained the figures from two representative banks-one in the West and the other in the East-which I want to include in the RECORD after I have made some comments on them. These figures are from the western bank.

In the months of October, November, and December, 1903, that bank loaned on 30-day paper \$5,179,000. In the same months in the year 1907 it loaned \$4,610,000, or within \$500,000 as much as it did the year when there were no panicky conditions existing. In the same months in the year 1908 it loaned on the same class of paper \$3,370,000, or nearly \$900,000 less than it did during the months of the panic. There were the same conditions for 30 to 60 day paper. It loaned in 1906 \$5,800,000; in 1907, \$6,654,000; in 1908, \$3,990,000; in other words, right in the midst of the panic that year it loaned \$2,600,000 more than it did the year before, and it loaned \$2,800,000 more than it did the following year.

In reference to 60 to 90 day paper the same general statement is true. It loaned in 1906 \$7,000,000; in 1907 it loaned \$9,369,000; and in 1908 it loaned \$5,531,000. Going through the list, including all the loans it made to its own customers, I find that in the year 1906 that particular bank loaned on all classes of paper in those three months \$50,536,000; in 1907, the panic year, it loaned \$52,957,000; and in the following year it loaned \$57,771,000. So that, as a matter of fact, it did loan to its own customers more than it had loaned the year before and nearly as much as it loaned the following year; or, in other words, there was no difference in the general course of business in that bank on account of the panic so far as the customers of the bank were concerned.

The rates were somewhat higher. The average rate for 1906 was 6 per cent in October, 6 per cent in November, and 6 per cent in December. In 1907 the rate was 6½ per cent in October, 7 per cent in November, and 7 per cent in December. In the following year it was 5½ and 5½ per cent in those months.

Here is where the difference came in: The bank did not buy either in 1906 or 1907 much outside paper. For instance, in 1906 it bought \$1,698,000 in those three months, and in 1907 it bought \$678,000. In 1908, when the banks were loaded with money, it bought \$10,808,000.

This is a complete answer to and a complete explanation as

well of what has been assumed as a correct statement about the policy of the banks during the period of the stress in 1907.

Mr. NEWLANDS. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Nevada?

Mr. WEEKS. I do.

Mr. NEWLANDS. The Senator has given a statement as to one bank. I should like to ask him if he can tell us whether or not the loans of all the banks, both National and State, were contracted in the last quarter of 1907 below the standard of the similar quarter in 1906; and if so, to what extent?

Mr. WEEKS. Mr. President, the loans of all national banks decreased between the comptroller's call on the 22d of August of that year and the comptroller's call in February of that

year about \$218,000,000.

Mr. NEWLANDS. Then, are we to understand that the very serious conditions of that period were due to a contraction of only about \$200,000,000 in credits, which at that time in all the banks, national and State, amounted to over \$10,000,000,000?

Mr. WEEKS. I do not think the serious conditions at that time were at all due to the contractions that took place. The contractions were normal and natural, because business came to a halt in a great many directions. As soon as the banks issued clearing-house certificates, that produced a condition which it always has done—a breaking down of domestic exchange, and the breaking down of domestic exchange stopped business, and the stopping of business prevented the necessity of borrowing; so that the falling off of \$218,000,000 in loans is very much less than we might have expected, in my opinion, as the result of the panic of November of that year.

Mr. NEWLANDS. The Senator, then, regards this diminution of \$200,000,000 in the total bank credits as the result of

these conditions and not as the cause?

Mr. WEEKS. I do, absolutely; and I will say to the Senator that has been the result in every panic this country has ever We have half a dozen times, first and last, issued clearinghouse certificates; and the issuing of clearing-house certificates has always had the same effect. It has checked business; and when business is checked the demands for money are less; so

that the contraction which takes place is more largely due to the results of the panic than being the cause of the panic; in fact, I do not think it was the cause of the panic in 1907 or at any other time with which I am familiar.

The figures which I have in my hand were prepared by an eastern bank of similar size, and they indicate almost exactly the same condition. The loans of that bank were as much as they were in the year before and the year after. The average rate for October, 1906, was 5.89 per cent; in November it was 5.7 per cent; and in December it was 6.9 per cent. In the year 1907, the panic year, the average rate in October was 5.95 per cent, or six one-hundredths of 1 per cent higher than it was the year before. In November it went up to 6.4 per cent, or seven-tenths per cent higher than the rate the year before. In December it was 6.31 per cent, or a quarter per cent higher than

it was the year before.

Mr. BURTON. Will the Senator from Massachusetts please state in what month in 1907 the rate was only six one-hundredths per cent more than in 1906?

Mr. WEEKS. In October.
Mr. BURTON. In October, 1907?
Mr. WEEKS. Yes. It was six one-hundredths of 1 per cent higher than it was in October, 1906. The total loans of this

bank in that month were about five and a half million dollars. The average rate in October, November, and December for 1907 was not over four-tenths per cent higher than it was in the same months in 1906; but the amount of loans made by that bank was higher in the year 1907 for those three months than in the year 1906 and not quite so high as in the year 1908, when money was very easy and very plentiful.

Those figures are a complete refutation of the charge, if you may call it a charge, which has been made that the banks of the country stopped loaning. They did nothing of the kind; they stopped buying outside paper, generally speaking, but they continued to supply the needs of their own customers, and they did not supply them at the high rates which are quoted—10, 15, 20, 50, or some other per cent—but they did supply the needs of their customers at an average rate during the panic of not over 6.2 per cent in the eastern bank and about the same rate in the western bank.

Mr. President, I should like to include those figures in my remarks, because I think they may be useful to the Senate at some other time and in some other way.

The VICE PRESIDENT. Is there objection? The Chair

hears none, and it is so ordered.

The figures referred to are as follows:

Mr. PAGE. Mr. President, I should like to ask the Senator what conditions existed that made money sell temporarily, say, for 40, 50, or 100 per cent on certain occasions?

Mr. WEEKS. Mr. President, those were not commercial loans. Those were loans made on demand by brokers which were payable the day they were called, and that rate was the rate per annum charged for the money. It only obtained for a day or two days or a half dozen days at most, and in very limited amounts. I am familiar with one instance where a bank called in a million dollars that was loaned at 40 per cent to brokers on collateral and loaned the money to its own customers at 6 per cent. The difference is that 40 per cent was the daily rate, while the 6 per cent was the 90-day rate. That was the only difference between the two.

Mr. WILLIAMS. That was the rate for one day?

Mr. WEEKS. For one day.

Mr. PAGE. I read on one occasion of money being quoted in Boston at 140 per cent for a single day.

Mr. WEEKS. It is just possible that there might have been \$100,000 loaned at some such rate as that, though I think it very doubtful.

Mr. CUMMINS. Mr. President, will the Senator from Mas-

sachusetts permit me one more question?

Mr. WEEKS. I yield to the Senator. Mr. CUMMINS. It is growing late, of course, and I hesitate to ask it, but it may be perhaps as well propounded now as at any other time. The general theory of the Federal reserve bank and the functions that it is to perform are that it will take money which the banks are compelled to hold anyhow as reserves and use that money to better advantage than though it were permitted to remain in the vaults of the banks themselves, or than though it were permitted to find its way to New York or

to Chicago or St. Louis or other reserve cities, as it does now. Now, I understand that. I can see that the reserves thus concentrated might be used for the welfare of the country to better advantage and more efficiently than they are now used, but it is hard for me to understand the theory upon which the banks are required to contribute to the regional or reserve banks a part of their capital. Their capital is always employed. There is not a bank in the country that has not loaned all its capital at all times. In fact, the great volume of the loans of the banks is made up of the money of depositors; but no one will question my statement when I say that the capital of the banks is always loaned out and is always performing the highest and best function that money can perform. It is doing its work as thoroughly and as continuously as money can work.

I should like to know what advantage there is in taking the capital of the banks, or a proportion of the capital of the banks, and giving it to the reserve banks, in order that they may loan it. They can not loan it so that it will do the business of this country more good than it is now doing; and hitherto I have not been able to understand why the Government should lay its hands upon part of the capital that is always at work and transfer it to the reserve banks, where, as I look at the matter, it is bound to do less efficient service than it is now performing.

Mr. WEEKS. Mr. President, the Senator from Iowa has stated very clearly a vital difference between the Owen plan and the Hitchcock plan. I think he is entirely right in his conclusions. I am in entire agreement with him that the capital engaged in banking in this country is none too large, and might well be larger. There are many instances where the deposits of banks are more than ten times the capital of the banks, and there have been many tentative propositions made to limit the ratio between the capital of a bank and the deposits which it might receive.

For the Government to come in and say to the private owners of capital, "We will take 6 per cent, 10 per cent, or 20 per cent of your capital and use it for another purpose," is not only, in my judgment, ill advised, but I think it is not necessary, and will not improve a condition which we reach in another way

In other words, in the Hitchcock plan we propose to offer this stock to the public. We believe we have assurances that the savings of people of small means will be invested in the stock of these semi-Government institutions, which will pay 5 per cent. The dividend will be cumulative, and it will not be subject to taxation of any kind. We believe the money will be readily subscribed to supply all the capital these banks will need. Therefore, instead of taking fifty or a hundred million dollars, or whatever it may be, away from the banking capital of the country and using it for this other purpose, we are adding to the banking capital the same amount of money which is now probably in savings banks and elsewhere, not being used for the benefit of the commercial community.

To my mind, one of the most important differences between

the two plans is the one to which the Senator has referred; and of the advantages which the Hitchcock plan has over the Owen plan, I think the advantage in this case of supplying the new capital for this bank is the most pronounced.

Mr. CUMMINS. Mr. President

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Iowa?.

Mr. WEEKS. I do.

Mr. CUMMINS. I not only concur with the Senator from Massachusetts in the belief that it is unwise and unnecessary to take a proportion of the banking capital and give it to the Federal reserve banks, but I go further, and am inclined to the belief that it is unconstitutional as well. At some time during this debate I shall ask the Senate to examine our authority to take from a private corporation a part of its capital and transfer it to another private corporation. Of course, national banks and the Federal reserve banks are both, in one sense, public, in just the same sense that a railroad company is a public corporation, or a gas company, or a water company. I shall not enter upon that inquiry to-night, however.

I do feel that the bill which has been proposed by the section of the committee led by the Senator from Oklahoma [Mr. Owen], and, measurably, too—for I want to be perfectly frank about it—the bill reported by the section of the committee led by the Senator from Nebraska [Mr. Hitchcock], are subject to the constitutional objection that they deprive the national banks of their property without due process of law, and that in so far as the Government itself as a sovereign derives a profit from the taking of this property they take private property for public

use without just compensation.

Mr. WILLIAMS. Mr. President—
The VICE PRESIDENT. Does the Senator from Massachu-

setts yield to the Senator from Mississippi?

Mr. WEEKS. Mr. President, I will yield the floor to the Senator from Mississippi. I have been interrupted so much tonight that I have not been able to complete my remarks.

Mr. WILLIAMS. No; I hope the Senator will go ahead.

Mr. WEEKS. I will hold the floor, then.

Mr. CUMMINS. I wish to say that I hope very much I shall be convinced before the debate is over that I am wrong in this position, because I believe that as a practical proposition the bill reported by the Senator from Oklahoma is better than the I am not saying this out of any spirit of hostility toward it, but I do want to present every safeguard possible against a situation in which it may become not only not an instrument of assistance but an instrument of destruction.

Mr. WILLIAMS. Mr. President, of course if this bill did take anybody's property, or did compel any bank to surrender a certain proportion of its capital to these regional banks, or to the United States Government, either, there might be something in what the Senator from Iowa has said; but it does nothing of the sort. The United States Government has a right to establish a system of banks as fiscal agencies for the Government. That is the ground upon which John Marshall placed the right. In determining who shall constitute a national bank, it has a right to determine the conditions upon which it shall constitute itself a national bank. The only compulsion in this case is that one of the member banks that does not put up the percentage can not remain in the national banking system. It can not enjoy the prestige and the profit of the system without obeying the laws of the national legislature establishing the system.

I hope the Senator from Massachusetts will excuse me, but I believe I am pretty nearly the last constant defender of the Constitution left, and the constitutional argument of the Senator from Iowa interested me even after it had ceased to amuse me. To say that a man has had his property taken away from him because the national legislature says: "Unless you comply with certain conditions of a national banking act you shall not be a national bank," is amusing. The present national banking law also took property away from people, because it said that they could not be a national bank unless they put up a certain condition. tain amount of money; so I suppose that under the theory of the Senator's reasoning they had their money taken away from them.

No man is forced by this bill to stay in this system. He can get out of it the day after the system is put upon the statute books if he pleases, and he can put every bit of his money in his pocket and go on about his business; but he can not be a national bank or a regional bank; he can not participate in the profits and benefits and special privileges conferred by law upon national banks, unless he does that which the National Legislature thinks is right and proper to make these corporate creatures of the United States good and effective public servants for the benefit of the people of the United States.

How could the Senator get the idea that there was any taking

away by force of any man's property?

Mr. CUMMINS. Mr. President, there may be an answer to

Mr. CUMMINS. Mr. Fresident, there may be an answer to my suggestion, but it has not yet been discovered by the Senator from Mississippl. [Laughter.]

Mr. WILLIAMS. I will ask the Senator from Iowa another question. Where does he find, in either of these bills, anything taking away from any national bank a part of its capital?

Mr. CUMMINS. I will enter upon an argument on that point at some other time; but I will gratify the Senator from Mis-

sissippi now by a very brief response.

We have a general law under which the national banks have been organized. I will admit-although is it not entirely clear. but I think it can be fairly said with respect to each of those acts-that Congress has reserved the right to alter, amend, or repeal, and I have no doubt whatever that Congress to-night could repeal the national banking act, and thus compel the dissolution of every national banking association.

Mr. WILLIAMS. Which Congress would not do.

Mr. CUMMINS. Which Congress, of course, would not do; and that is the protection which the banks have against the exercise of that power. The banks have organized themselves under this general law. They have acquired certain property. They have now and will have, when the act goes into effect, certain property. It is private property, subject only to the regulation which the public character of the business will permit.

It is true that the act may be amended; and all that can be claimed for the proposed act is that in some respects it constitutes an amendment of the national banking law, and anything that is an amendment of that law, in its legal sense, may be lawfully enacted by Congress. The right to amend a law, however, under which corporations have been organized and have acquired property is, of course, subject to the fifth amendment of the Constitution, and, in the case of the States, is subject to the fourteenth amendment to the Constitution.

Mr. WILLIAMS. The Senator will take all of my time.

Mr. CUMMINS. I beg the Senator's pardon. I could not answer the question briefly. I only say that the answer that if the national banks do not desire to allow their property to be taken away they can allow themselves to be dissolved is no

answer at all to the proposition.

Mr. WILLIAMS. Mr. President, if the argument of the Senator from Iowa has any soundness whatever in it, then the Congress of the United States can not amend the national banking act in such a way as to make it more onerous to the banks or to the bankers without violating the fifth amendment. They not only reserved the right to amend, but they have a right to make those banks the useful creatures of the public. To say that you have taken a man's property away from him when you leave him perfectly free either to stay in the system or to step out of the system, and when you do not take away from him a dollar of the money he has accumulated in his capacity as a national banker, except with his own consent, is absurd.

If it pays the member banks to go into this system, they will go into it. If it does not pay them, they will step out of it. Many people have argued that the thing would be a failure, because they would not come into it. They will not stay in it

unless they believe it is profitable for them to do so.

I dwell upon this because letter after letter has been received by me and by other people founded upon the idea that Congress was compelling these people to stay in this system. Congress is merely saying: "Here is the system. What do you want to do; stay in it or get out of it?"

I do not suppose that in all the history of the United States it ever was said that giving a man his free choice between remaining a privileged creature of the Federal law or not remaining one was taking his property without due process of

Mr. WEEKS. Mr. President, the hour of 11 o'clock having arrived, I assume that under the rule the Senate will adjourn.

The VICE PRESIDENT. The hour of 11 o'clock having ar-

rived, the Senate stands adjourned until to-morrow at 10

Thereupon (at 11 o'clock p. m.) the Senate adjourned until to-morrow, Tuesday, December 9, 1913, at 10 o'clock a. m.

# HOUSE OF REPRESENTATIVES.

Monday, December 8, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

Our Father in heaven, let Thy kingdom come and Thy will be done in our hearts, that our days may be days of usefulness and our years bear the full fruition of a well-developed character; that we may feel the thrill of an approving conscience and hear the music in our souls, "Well done, good and faithful servant." Thus may we live, thus may we achieve faithful servant." Thus may we live, thus may we achieve and pass on unperturbed to the reward of the faithful. In the spirit of the world's great Redeemer. Amen.

The Journal of the proceedings of Saturday was read and

approved.

#### MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Tulley, one of its clerks announced that the Senate had passed without amendment bill of the following title:

H. R. 7207. An act granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes.

#### ENROLLED BILL SIGNED.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title; when the Speaker signed the same:

H. R. 7207. An act granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, and Stanislaus National Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes.

#### IMMIGRATION.

Mr. GARDNER. Mr. Speaker, I move to discharge the Committee on Immigration and Naturalization from the consideration of the following resolution, which I send to the Clerk's desk, and move that the same be now considered by the House.

The SPEAKER. The gentleman from Massachusetts moves

that the Committee on Immigration and Naturalization be discharged from further consideration of House resolution No. 324, and that the same be put upon its passage.

Mr. HAMLIN. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. HAMLIN. Under the unanimous-consent agreement made on Saturday last, or Friday afternoon, are we not to vote on the resolution No. 298, the Hensley resolution, immediately after

the approval of the Journal to-day?

Mr. MANN. The previous question was ordered on it.

The SPEAKER. The gentleman from Massachusetts will

Mr. MANN. The House merely ordered the previous question on the Hensley resolution, and under the rules of the House this resolution is in order immediately after the approval

Mr. HAMLIN. My recollection is that the proposition was to vote immediately on the Hensley resolution after the approval of the Journal.

The SPEAKER. All these things are governed by the rules

of the House.

Mr. MANN. I think that was not in the unanimous-consent agreement, but it would not make any difference if it was.

The SPEAKER. The previous question was ordered on the

Hensley resolution in the usual way, and the Chair recognizes the gentleman from Massachusetts.

Mr. SHERLEY. Mr. Speaker, let us have the resolution read. The SPEAKER. That is what the Chair was going to have done. The Clerk will read the resolution.

The Clerk read as follows:

## House resolution 324.

Resolved, That the Secretary of the Department of Labor be directed, if not incompatible with the public interest, to send to the House of Representatives a statement showing the number of allens arriving at ports or places in the United States during the month of October, 1913, who were certified by the surgeons of the Public Health Service as being physically or mentally defective; also a statement showing the nature of the defects so certified; also a statement of the final disposition of the cases as to admission or exclusion.

Mr. SHERLEY. Mr. Speaker, in the absence of any member of the Committee on Immigration and Naturalization, realizing that these resolutions of inquiry often require tremendous labor and frequently without any reason for it, I would like some statement from the gentleman from Massachusetts as to the importance of it, or I shall move to lay it on the table.

Mr. GARDNER. I make the point of order that the gentle-man can not move to lay it on the table. The motion is a double motion, and under the rules of the House is not debatable.

Mr. SHERLEY. Well, Mr. Speaker, I make the motion to lay the motion of the gentleman from Massachusetts on the table.

Mr. GARDNER. I raise the point of order that the motion to lay the resolution on the table is not in order. The resolution is now in committee.

Mr, SHERLEY. I am not moving to lay the resolution on the

table, but the gentleman's motion.

Mr. GARDNER. That is impossible; you may not lay a motion of that kind on the table.

Mr. FITZGERALD. The gentleman does not mean that,

Mr. GARDNER. It is a privileged motion. Mr. HAMILL. Will the gentleman from Massachusetts yield for a question?

Mr. GARDNER. Yes.
Mr. HAMILL. Will the gentleman inform the House just what the purpose of this resolution which he presents is, and what purpose it is to serve?

Mr. GARDNER. Mr. Speaker, I ask unanimous consent to

be permitted to explain the purpose of the resolution.

Mr. SHERLEY. Mr. Speaker, as long as the gentleman from Massachusetts makes the point of order that my motion to table is not in order, when I wanted to give him an opportunity to make a statement, I shall insist on my motion, which is not debatable.

The SPEAKER. The Chair will hear the gentleman from Massachusetts on the point of order.

Mr. GARDNER. Mr. Speaker, I withdraw the point of order. Mr. MANN. Mr. Speaker, I ask unanimous consent that the gentleman from Massachusetts have five minutes to explain the proposition.

The SPEAKER. The gentleman from Illinois asks unanimous consent that the gentleman from Massachusetts have five minutes in which to explain his resolution. Is there objection?

[After a pause.] The Chair hears none.

Mr. GARDNER. Mr. Speaker, this resolution has the consent of the chairman of the Committee on Immigration and Naturalization, Mr. Burnett. It has not been considered in the Committee on Immigration for the reason that that committee is at the present moment engaged in a hair-pulling match on other matters. [Laughter.] This resolution is for the purpose of getting certain information as to the immigration figures for the month of October. The information is not available as to the number of rejections by the surgeons at the immigration stations in this country and as to the final disposition of such cases. It is information which we ought to have in the preparation of the bill which we are now at work on in the committee.

Mr. BURNETT. Mr. Speaker, I ask for two minutes. The SPEAKER. The gentleman from Alabama, chairman of the Committee on Immigration, asks unanimous consent to address the House for two minutes. Is there objection?

There was no objection.

Mr. BURNETT. Mr. Speaker, I do not think there is any reflection on any department. This is a matter that the committee has not had opportunity to consider, because they could not get a quorum during the last session, and have not had an opportunity of doing it this session on account of the fact that we have been busy on another question more important ever since the session Legan. As far as I am concerned, I think it is proper and that it ought to pass.

Mr. HAMILL. Mr. Speaker, I ask unanimous consent for three minutes in which to address the House on this subject.

The SPEAKER. The gentleman from New Jersey asks unanimous consent to address the House for three minutes. Is there objection?

There was no objection.

Mr. HAMILL. Mr. Speaker, I think it is singularly unnecessary on the part of the gentleman from Massachusetts [Mr. GARDNER] or his cooperator in this movement, the gentleman from Alabama [Mr. Burnett], to present this resolution to the House and ask for its adoption. The purpose of it is, I presume, to obtain information for the preparation of an immigration bill, which will be presented at this session. I think that whole project ought to be presented to the House at one time. The gentleman says that he can not get his committee together. That is a very drastic reflection upon the bill that he is going to present to this House, when the very committee charged under the organization of the House with the consideration of this project cares so little about its present consideration that the chairman can not whip together a quorum of the committee in order that they may agree upon a resolution which he considers important. I do not believe this resolution, at this time, if indeed at any time, ought to be adopted by this House.

Mr. BURNETT. Mr. Speaker, I ask unanimous consent for one minute in which to make a correction contained in the state-

ment of the gentleman from New Jersey. The SPEAKER. The gentleman from Alabama asks unanimous consent to proceed for one minute, to make a correction. Is there objection?

There was no objection.

Mr. BURNETT. Mr. Speaker, I did not say that I could not get the committee together at this session. The committee has been together for three days, but we have been at work on another proposition, which we did not want to set aside for any-I said that during the extra session of Congress it was impossible to get together a quorum of the committee.

Mr. HAMILL. Then, does the gentleman want this House by special rule to help him do something which his committee is well organized and able to do under its regular course of pro-

Mr. BURNETT. I do not think this would help me in the

Mr. HAMILL. Then why does the gentleman want the resolution if it would not?

Mr. MOORE. Mr. Steaker, I ask unanimous consent to proceed for two minutes.

The SPEAKER. The gentleman from Pennsylvania asks unanimous consent to address the House for two minutes. Is there objection?

There was no objection.

Mr. MOORE. Mr. Speaker, I want to use the two minutes to enter a mild protest against the method of bringing in resolutions as indicated in this particular instance. The gentleman from Massachusetts [Mr. GARDNER], baving consulted, as he says, with the chairman of the Committee on Immigration, brings in this resolution, which he does not explain. He states that certain information is desired to pass a bill. The chairman of the committee states that he is in favor of the resolu-We are still without information, however, as to the purpose of the resolution. The Committee on Immigration has no information as to the purpose of the resolution, and as between the gentleman from Massachusetts [Mr. GARDNER] and the gentleman from Alabama [Mr. BURNETT], both of whom are of the same opinion with regard to the immigration bill, we are expected to pass this resolution. It seems to me the committee ought to have some information in a matter of this kind before it comes to the House, particularly when the committee has under discussion at the time a bill to which the resolution may have reference. The committee knows nothing about this resolution, except as stated here in a very brief and unsatisfactory way by the gentleman from Massachuseits [Mr. Gardner], indorsed by the chairman of the committee [Mr. Burnert]. The other members of the committee are in the dark as to what the resolution means.

Mr. SHERLEY. Mr. Speaker, I have not waived my right to move to lay this motion on the table. I have been permitting these gentlemen by unanimous consent to make various statements. I did make the motion, and to that motion the gentleman from Massachusetts made a point of order.

Mr. MANN. He withdrew the point of order.

The SPEAKER. He withdrew the point of order and the Chair understood the gentleman from Kentucky to withdraw his motion.

Mr. SHERLEY. By no means. I can not imagine a worse practice than to pass resolutions on the statement of individual Members without knowing what they are going to cost.

The SPEAKER. The question is on the motion of the gentle-

man from Kentucky, to lay the resolution on the table.

The question was taken; and on a division, demanded by Mr.

Mann, there were—ayes 80, noes 74.

Mr. GARDNER. Mr. Speaker, on that I demand the yeas and

The yeas and nays were ordered.

The question was taken; and there were—yeas 130, nays 215, follo

So the motion to lay on the table was rejected. The Clerk announced the following pairs:

On this vote:

Mr. Morrison with Mr. Humphrey of Washington.

Ending December 10:

Mr. SHERLEY with Mr. COOPER,

Until further notice

Mr. BARTLETT with Mr. PARKER,

Mr. REILLY of Connecticut with Mr. WINSLOW.

Mr. DALE with Mr. MARTIN.

Mr. ALEXANDER with Mr. DUNN.

Mr. HELM with Mr. MILLER.

Mr. WILSON of New York with Mr. VARE.
Mr. NEELY of West Virginia with Mr. Hughes of West Virginia

ginia. Mr. BRODBECK with Mr. AINEY.

Mr. Brown of West Virginia with Mr. BRITTEN,

Mr. CANTRILL with Mr. BRYAN

Mr. Connolly of Iowa with Mr. Burke of Pennsylvania.

Mr. CULLOP with Mr. CALDER.

Mr. GALLAGHER with Mr. KAHN. Mr. Garrett of Tennessee with Mr. Edmonds.

Mr. Godwin of North Carolina with Mr. Fairchild.

Mr. HARDWICK with Mr. FALCONER.

Mr. KINKEAD of New Jersey with Mr. GRAHAM of Pennsylvania.

Mr. Levy with Mr. Griest. Mr. Lieb with Mr. Guernsey.

Mr. MONTAGUE with Mr. HAWLEY,

Mr. Moss of Indiana with Mr. Keister.

Mr. PATTEN of New York with Mr. Kiess of Pennsylvania,

Mr. TUTTLE with Mr KREIDER. Mr. WEBB with Mr. LANGLEY,

Mr. WHITE with Mr. ROBERTS of Nevada.

For the session:

Mr. Scully with Mr. Browning.

Mr. SHERLEY. Mr. Speaker, I find I am paired. I voted "aye." I desire to withdraw that vote and answer "present." The name of Mr. SHERLEY was called and he answered

The result of the vote was announced as above recorded. The SPEAKER. The question now is on the motion of the gentleman from Massachusetts.

Mr. SHERLEY. Mr. Speaker, I desire to be heard on the motion.

The SPEAKER. The gentleman from Massachusetts [Mr. GARDNER] is entitled to the floor.

Mr. SHERLEY. The gentleman did not claim the floor, and the Chair was about to put the motion.

Mr. GARDNER. Mr. Speaker, the motion to discharge the

committee is not debatable. Mr. SHERLEY. That is true. I did not want to discuss the motion, but I want to be heard for a minute or two.

Mr. GARDNER. An adverse vote having been taken on the gentleman's motion, I shall claim the floor after the question is put, if the committee is discharged.

Mr. HAMILL. Mr. Speaker—

The SPEAKER. For what purpose does the gentleman rise?
Mr. HAMILL. To make a parliamentary inquiry.
The SPEAKER, The gentleman will state it.
Mr. HAMILL. Is it the opinion of the Chair that this resolution can now be voted upon without giving the Members opportunity to discuss it?

The SPEAKER. It is not the resolution; it is the motion. Mr. MANN. Mr. Speaker, the motion offered by the gentle-man from Massachusetts [Mr. Gardner] is not to pass the resolution but to discharge the committee and bring it before

The SPEAKER. Of course.

Mr. MANN. And that is not debatable. Mr. SHERLEY. I understand that. I will take the floor at the right time.

The SPEAKER. The question is on the motion of the gen-tleman from Massachusetts [Mr. GARDNER] to discharge the committee, and, if that motion prevails, then the resolution comes before the House.

Mr. MOORE. A parliamentary inquiry, Mr. Speaker. The SPEAKER. The gentleman will state it.

Mr. MOORE. Does not it require seven days in order to call up a resolution of this kind?

The SPEAKER. The Chair understands that the seven days have expired.

Mr. MOORE.

Mr. MOORE. That the seven days have expired?
The SPEAKER. Yes, sir. The question is on the motion of the gentleman from Massachusetts [Mr. Gardner] to discharge the Committee on Immigration and Naturalization and to con-

sider his resolution.

Mr. GOULDEN. Mr. Speaker, might we not have the resolution read again?

The SPEAKER. Without objection, the resolution will be

Without objection, the resolution will be again reported.

The resolution was again read.

The SPEAKER. Now, the vote that is to be taken is not on the resolution, but on the motion to discharge the Committee on Inmigration and Naturalization from further consideration of it.
Mr. MOORE. Mr. Speaker, a parliamentary inquiry.
The SPEAKER. The gentleman will state it.
Mr. MOORE. The Committee on Immigration and Naturali-

zation has never considered this resolution at all. How can the committee "further consider" it?

The SPEAKER. That is the form in which they are put, and

the only way they can get at it. Mr. DONOVAN. Mr. Speaker Mr. Speaker

The SPEAKER. For what purpose does the gentleman from Connecticut rise?

Mr. DONOVAN. To make a parliamentary inquiry.

The SPEAKER. The gentleman will state it. Mr. DONOVAN. This resolution was introduced on the 2d

of December. When does the seven days' expiration take

The SPEAKER. To-day. Mr. DONOVAN. Is to-day the 9th?

The SPEAKER. It is the custom to exclude either the first day or the day it is called up.

Mr. DONOVAN. Mr. Speaker—
The SPEAKER. There is no question about that.
Mr. HAMILL. Mr. Speaker—
The SPEAKER. Wait until we get through with the gentleman from Connecticut.

Mr. DONOVAN. As I understand it, it was introduced on the 2d day of December. Now, when does the seven days' expiration occur?

The SPEAKER. The seven days have expired. In the opin-

ion of the Chair, it is a question of arithmetic.

Mr. DONOVAN. Mr. Speaker, the 2d day of December was

on Tuesday last.

The SPEAKER. Of course.

Mr. DONOVAN. How can the seven days expire at this

Mr. GARDNER. I think the gentleman is correct and that I made a mistake.

Mr. MANN. This is not the 9th.

The SPEAKER. Let us see. The House will be in order, and all gentlemen will take their seats and refrain from conversation.

Mr. GOLDFOGLE. Mr. Speaker-

The SPEAKER. The Chair will not recognize anybody until he counts up the days. [Applause.] The seven days have not expired.

Mr. LAFFERTY. Mr. Speaker, I make the point of order that an objection can not now be raised, as the roll has already been called.

The SPEAKER. That was on the motion to table, so that it can not be considered.

#### ELECTION OF A MEMBER TO COMMITTEES.

Mr. UNDERWOOD. Mr. Speaker, I desire to move the election of Mr. MacDonald, one of the Progressive Members of the House, to the Committee on Labor and to the Committee on Pensions.

I send the following letters to the Clerk's desk and ask to have them read, to explain how the nominations took place.

The SPEAKER. The Clerk will read the letters.

The Clerk read as follows:

United States House of Representatives, Office of Republican Leader, Capitol Building, Washington, D. C., September 10, 1913.

Washington, D. C., September 10, 1913.

Hon. OSCAR W. Underwood,
House of Representatives.

Dear Mr. Underwood: Under the agreed allotment of committee assignments to the different parties there is a Republican vacancy on the Committee on Labor and on the Committee on Pensions. I believe that Mr. Murdock has no committee vacancies due to him or the Progressive Party. In order to accommodate the committee assignments of Mr. MacDonald, who has been recently given a seat from Michigan, I beg to yield to Mr. Murdock the Republican vacancy on each of the above committees, and to request you to move the election of such Member as will be suggested by Mr. Murdock.

Yours, very sincerely,

James R. Mann.

COMMITTEE ON WAYS AND MEANS,
HOUSE OF REPRESENTATIVES,
Washington, D. C., September 16, 1913.

Hon. O. W. UNDERWOOD, M. C., Washington, D. C.

MY DEAR MR. UNDERWOOD: I wish to nominate Hon. WILLIAM J. MACDONALD, of Michigan, for the vacancies on the Committee on Labor and the Committee on Pensions. These places were assigned to the Republicans, but have been transferred to the Progressives by Mr. Mann, according to a note to you by Mr. Mann, a copy of which Mr. Mann furnished me.

Yours, truly,

VICTOR MURDOCK.

Mr. UNDERWOOD. Mr. Speaker, in compliance with the request contained in those letters, I move the election of Mr. MACDONALD as indicated.

Mr. FITZGERALD. Mr. Speaker, will the gentleman from

Alabama yield?
The SPEAKER. Does the gentleman yield?
Mr. UNDERWOOD. I do.
Mr. FITZGERALD. Some time ago there was a discussion in the House regarding the selection of members of committees, and the gentleman from Kansas [Mr. Murdock] called attention to the fact that the so-called Progressive Representatives in this House had entered upon a method entirely different from that pursued by the other parties. He stated that the Progressive members of committees were selected in open public caucuses, in which every man had an opportunity to express his opinion and where the public were invited to look on without cost. I desire to inquire when the public, open, free caucus of the Progressive Members was held at which these committee selections were made?

Mr. MURDOCK. Mr. Speaker, will the gentleman allow me to answer, instead of the gentleman from Alabama?

Mr. FITZGERALD. I would be delighted if the gentleman could answer.

Mr. UNDERWOOD. I will yield to the gentleman from

Kansas, as I do not know. These designations were made in full ac-Mr. MURDOCK. cordance with our new plan. The Progressive Members in the House were consulted and these places were filled after full conference with the members of the committees

Mr. FITZGERALD. If the gentleman will permit me-Mr. MURDOCK. So that we followed the new plan precisely, and the gentleman from New York [Mr. FITZGERALD]

would have been welcome to our caucus.

Mr. FITZGERALD. That new plan to which the gentleman refers, and which he just seems to have discovered, is the old plan which has been followed by the Democrats in this House since they have had control of it. It is not the boasted plan which the gentleman from Kansas explained here at the opening of the session, when he said that all of the committee assignments of Progressive Members were selected, not after conferences with the Members, but in a public meeting where everyone was free to rise and nominate, and did nominate, the respective Members. I charged at that time that the whole proceeding was a farce.

Mr. MURDOCK. As a matter of fact-will the gentleman

yield?

Mr. FITZGERALD. Not at present; let me finish. [Laughter. I I charged at that time that it was a farce, and that while ostensibly there was this open meeting, yet it was held only after these private conversations among the Members were had, at which the arrangements were made by which the committee places were to be parceled out. I wish now to congratulate the gentleman from Kansas upon the fact that

Mr. MURDOCK. Mr. Speaker, will the gentleman yield? The SPEAKER. Does the gentleman yield?

Mr. FITZGERALD. In just a moment. I congratulate the gentleman upon the fact that he has abandoned that farcical proceeding of holding open, free, untrammeled meetings at which every member of his party would have the opportunity to rise and make these nominations, and has adopted the plan so successfully followed for three years by the Democratic Party in the House of Representatives. [Applause on the Democratic side.1

Mr. MURDOCK. Now, will the gentleman yield?

Mr. FITZGERALD. I yield to the gentleman from Kansas. Mr. MURDOCK. The Democratic Party, if it selects its men

at all, as a party, selects them secretly.

Mr. FITZGERALD. No; it does not.

Mr. MURDOCK. Yes; it does; and we select ours in the

Mr. DONOVAN. Mr. Speaker, I rise to a point of order.

The SPEAKER. The gentleman will state his point of order. Mr. DONOVAN. My point of order is that Members should address the Chair before taking the floor.

The SPEAKER. The point of order is well taken.
Mr. UNDERWOOD. Mr. Speaker, holding the floor, I yield

five minutes to the gentleman from Kansas, if he wants it.

The SPEAKER. The gentleman from Kansas [Mr. Mur-

DOCK ] is recognized for five minutes.

Mr. MURDOCK. I should like to say to the gentleman from New York [Mr. Fitzgerald] that under the system here in the House there are three ways of selecting committees. The Republicans empower the gentleman from Illinois [Mr. MANN], the minority Republican floor leader, to designate the Republican members of a committee. The Democrats empower the Ways and Means Committee to make the selections-

SEVERAL MEMBERS. Oh, no.

Mr. MURDOCK. To make the nominations. In the Progressive Party, it is true we are few in numbers, but we get together with open doors and agree on committee assignments. All the committee assignments made in the Progressive Party are made openly. All of them are voted upon. Everyone has a full chance for discussion, and there is a complete agreement in the conference before the nominations are made.

Now, so far as this manner of making nominations is concerned, there is only one way in which I can make nominations. After the members of the Progressive Party have determined whom they want upon committees, then I submit the nominations to the gentleman from Alabama [Mr. Underwood] and he comes before the House and makes his nomination.

Mr. FITZGERALD. When was this meeting? Mr. MURDOCK. In the Democratic Party the meeting is secret. In the Progressive Party it is not; and the difference is the difference between night and day.

Mr. FITZGERALD. Will the gentleman yield?

Mr. MURDOCK. If the gentleman really wants to reform the Democratic Party, let him have the Democratic caucus meet in the open and name the men on the committees by the full membership of an open caucus and not, as the system is at the present time, by a few men making the selections and then coming into the secret Democratic caucus for ratification.

Mr. FITZGERALD. Will the gentleman yield for a question?

Mr. MURDOCK. Certainly.

Mr. FITZGERALD. When was this open public meeting held at which all members of the Progressive Party had the opportunity to nominate members for these two committee

Mr. MURDOCK. We have held several.

Mr. FITZGERALD. When was one of them, and where was

it held, with the doors open?

Mr. MURDOCK. One of the meetings was held in the office of the gentleman from Pennsylvania [Mr. Kelly], in the House Office Building.

Mr. FITZGERALD. When?

Mr. MURDOCK. I think it was in May or June. Mr. FITZGERALD. I am talking about these two places.

Mr. MURDOCK. Newspaper men were present. Mr. FITZGERALD. I am talking about these two nomina-

Mr. MURDOCK. I think this meeting was some time in September.

Mr. FITZGERALD. For these two committee places?

Mr. MURDOCK. For these two places.

Mr. GARNER. At what place?
Mr. MURDOCK. I think it was held in my office.
Mr. GARNER. Was there a quorum present?
Mr. MURDOCK. I think there were newspaper men present.

Are newspaper men present in the Democratic caucus, where you make your selections?

Mr. FITZGERALD. They are when they are Members of

Congress. But how could I be present, as the gentleman sug-

gests?

Mr. MURDOCK. You would have been entirely welcome; and the next time we hold a conference for the purpose of designating a man for a committee I am going to take it upon

myself to invite the gentleman from New York.

Mr. FITZGERALD. I hope the gentleman will, and that he will be able to remember where it is to be held more accurately than he can tell where this one was held, because I was going to ask the gentleman how it would have been possible for me to have been present when he does not know whether the meeting was held in May or September and can not tell whether it was held in his office or the office of the gentleman from Pennsylvania [Mr. Kelly].
Mr. MURDOCK. The gentleman misinterprets what I said,

and I think rather willfully in that regard.

Mr. FITZGERALD. Oh, no.

Mr. MURDOCK. I thought the gentleman asked me when we had our conference, and I told him the first one was held in May and in the office of the gentleman from Pennsylvania [Mr. KELLY], in the House Office Building.

Mr. FITZGERALD. I mean for the filling of these particular

vacancies

Mr. MURDOCK. That meeting, as I remember it, was held in my office in this Capitol Building. The difference between gentleman's party and my party is that we are trying to conduct affairs in the open, even to the naming of men on committees, and I recommend to the gentleman and his party the same course. It is practical and it is sensible.

The SPEAKER. The time of the gentleman has expired.

Mr. UNDERWOOD. I yield two minutes to the gentleman

from Illinois [Mr. MANN].

Mr. MANN. Mr. Speaker, when the committees were made up the Progressive Party filled all the places which had been assigned to it by the Democratic leaders of the House. On behalf of the Republicans, with some idea of economy, I reserved a few vacancies, as the Democratic side had, on committees for contingencies. The Progressive Party having exhausted all its resources, spent all of its money, burned all of its oil, without knowing what demands were to be made upon it—although they ought to have known that Mr. MacDonald was to be seated-found themselves in the position of having a Member of the House with no committee vacancies.

Mr. MURDOCK. Mr. Speaker, that is perfectly true, and I want to take this occasion to thank the gentleman for giving

us those places.

Mr. MANN. I am glad that I have called out the facts from the gentleman from Kansas. I do not know when the Progres-Party had its meetings to select the two places for the gentleman from Michigan. If they had the meeting before I promised the places they could not have known what places would be given to them. If they held the meeting after, they played a confidence game on me [laughter], because I gave up the two places for Mr. MACDONALD and no one else. [Laughter.]

Mr. MURDOCK. Mr. Speaker, will the gentleman yield?

Mr. MANN. Yes.

Mr. MURDOCK. Mr. Speaker, the gentleman will under-stand before he goes too far along that line of argument—

Mr. MANN. If the gentleman from Kansas will let me pro-

ceed, I will exonerate the gentleman.

Mr. MURDOCK. So long as Mr. MACDONALD was not a Member of the House, we could not include him in our pro-portional requirement for committee places, because we were lacking one Member, the inclusion of whom would have given us the other committee assignments. Afterwards, when Mr. MacDonald was seated, we were entitled to committee places which we did not have, and the gentleman did give these places to us as a party, and I did not take it from his letter—and the letter will bear me out—that he gave them to us for Mr. Mac-DONALD. I think we could have made a reassignment or readjustment, and the gentleman would have acceded to it. Is not

Mr. MANN. The letter indicates that I gave the places suggested by the gentleman from Kansas, and he had previously told me that he was going to assign them to Mr. MacDonald. [Laughter.] That is perfectly proper. I have no doubt that the gentleman from Kansas had consulted the other Progressive Members of the House. The truth is, as long as the gentleman from Kansas is leader of a party that can meet in one tier of the seats without interrupting the business of the House, so long they can have a meeting and consult over every kind of a proposition; but when they rise to the dignity of having a real party, with real membership on the floor of the House, they will find that they can not make up committees in town meeting.

The SPEAKER. The question is on the nominations made by the gentleman from Alabama for Mr. MacDonald, the gentleman from Michigan, to go on the Committee on Labor and the

Committee on Pensions.

Mr. UNDERWOOD. Mr. Speaker, I yield five minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Speaker, the gentleman from Kansas

Mr. DONOVAN rose.

The SPEAKER. For what purpose does the gentleman from Connecticut rise?

Mr. DONOVAN. A parliamentary inquiry.
The SPEAKER. The gentleman can not make a parliamentary inquiry when another Member has the floor.
Mr. DONOVAN. Then a point of order, Mr. Speaker.
The SPEAKER. The gentleman will state it.

Mr. DONOVAN. If there is no business before the House, the gentleman from from Alabama has no right to farm out

The SPEAKER. The gentleman from Alabama is acting en-

tirely within his rights.

Mr. FITZGERALD. Mr. Speaker, the gentleman from Kansas asserts that there are three methods of selecting committee members in this House. The rules provide for one method, and that is an election by the House. The gentleman from Kansas calls attention to the fact that his associates have adopted an entirely new method for the selection of committee members. I wish to call the attention of the gentleman from Kansas and of the Members of the House to a very remarkable situation developed here. The gentleman from Illinois [Mr. Mann] who is selected by the Republicans as a candidate for Speaker and thus becomes their leader, without, so far as I know, having consulted anybody, turns over to the gentleman from Kansas [Mr. MURDOCK] two committee places which were assigned to the Republican Members in this House. There is no record of just how he was moved to do so, but he wrote to the gentleman from Alabama [Mr. UNDERWOOD] as follows:

I believe that Mr. Murdock has no committee vacancies due to him or to the Progressive Party.

Why Mr. Murdock should have any committee places due him I do not know. Then Mr. MURDOCK later wrote to the gentleman from Alabama [Mr. Underwood] as follows:

I wish to nominate

"I wish to nominate" [laughter and applause]-Hon. William J. MacDonald, of Michigan, for the vacancies on the Committee on Labor and the Committee on Pensions. These places were assigned to the Republicans, but have been transferred to the Progressives by Mr. Mann, according to a note to you by Mr. Mann, a copy of which Mr. Mann furnished me.

What right had Mr. Mann to enter into this deal with the gentleman from Kansas [laughter] and give away committee assignments which belong to the Republican Party in-the House; and what right has the gentleman from Kansas to take any and what right has the gentleman from Kansas to take any

discarded materials from the Republican Party in order to [Laughter.] bolster up the forlorn cause of the Progressives? I had imagined that I had been informed by the gentleman from Kansas [Mr. Murdock] that the Progressive Party Representa-tives in this House did not intend to have any of these unholy alliances with the older parties, and that they would scorn those petty favors which Members of Congress had been seeking in the past from the Speaker, but which they now have to seek from the Republican and Progressive leaders in order to enable them to be full-fledged, untrammeled Representatives; and I am surprised that Mr. MURDOCK should condescend to tell Mr. UN-DERWOOD that he proposed to nominate Mr. MacDonald. What about all of this talk that was indulged in at one time about the inalienable right of a Member of this House to stand up as a "free and untrammeled" Representative and voice the wishes of his constituents and present to the House himself, not through somebody else, the things in which his people were interested?

Mr. Speaker, I am surprised at the simplicity of the gentleman from Alabama [laughter], but I suppose it is due to the fact that he occupies-I was going to say a position similar to that occupied by the gentleman from Kansas [Mr. MURDOCK]; but I shall refrain from bringing down the leadership of the Democratic Party to a level with the leadership of the Progressive Party. He occupies a position where he appreciates that the members of his party have full confidence in him. He does not have to call a public meeting, with public witnesses, in order to take any action as leader of the Democratic Party for fear he might be repudiated if he did not. I was surprised that he should, without further substantiation, accept as the action of the Progressives in the House a letter ligned by Victor Mus-pock, in which he says "I wish to nominate." I wish to nomi-nate!—not as a representative of the Progressive Party, but Victor Murdock wishes to nominate! Oh, Mr. Speaker, how the times have changed, how the times have changed! [Laugh-ter and applicate] ter and applause.]

Mr. UNDERWOOD. Mr. Speaker, I move the previous ques-

tion on my motion.

The previous question was ordered.

The SPEAKER. The question is on the motion of Mr. UNDER-WOOD, that Mr. MACDONALD be elected to fill the vacancies on the Committee on Labor and on the Committee on Pensions.

The motion was agreed to.

## SUSPENSION OF NAVAL CONSTRUCTION.

Mr. HENSLEY. Mr. Speaker, I call up House resolution 298, which is the unfinished business

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 298.

House resolution 298.

Resolved, That in the opinion of the House of Representatives the declaration of the First Lord of the Admiralty of Great Britain, the Right Hon. Winston Churchill, that the Government of the United Kingdom is willing and ready to cooperate with other Governments to secure for one year a suspension of naval construction programs offers the means of immediately lessening the enormous burdens of the people and avoiding the waste of investment in war material.

SEC. 2. That a copy of this resolution be furnished the President with the request that, so far as he can do so, having due regard for the interests of the United States, he use his influence to consummate the agreement suggested by the Right Hon. Winston Churchill.

Mr. GRAY rose.

The SPEAKER. For what purpose does the gentleman from Indiana rise? Mr. GRAY.

I desire to offer the following amendment. The SPEAKER. The previous question has been ordered on

the resolution. Mr. HAMILL rose.

The SPEAKER. For what purpose does the gentleman from New Jersey rise?

To make a request for unanimous consent. Mr. HAMILL.

The SPEAKER. The gentleman will submit it.

Mr. HAMILL. Mr. Speaker, I send to the Clerk's desk an editorial in this morning's Washington Post, and I ask unanimous consent that the Clerk be permitted to read it.

Mr. HENSLEY. Mr. Speaker, I object.
The SPEAKER. The gentleman from Missouri objects. Mr. HAMILL. Mr. Speaker, I ask unanimous consent that I

be permitted to insert it in the RECORD.

Mr. BORLAND. Mr. Speaker, I object, The SPEAKER. The gentleman from Missouri objects. Mr. GRAY. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. GRAY. I desire to ask the previous question having been ordered, if it is not in order that I may offer an amendment at

The SPEAKER. An amendment may not be offered after the previous question has been ordered. The Chair will state, if the

Barchfeld

Stevens, Minn.

gentleman desires to get at it, that his alternative is to move to recommit with instructions.

Mr. MOORE. Mr. Speaker, I offer the following motion to

recommit, with instructions.

The SPEAKER. This is a simple House resolution, and the Clerk will report the motion of the gentleman from Pennsylvania [Mr. Moore]

The Clerk read as follows:

Mr. Moore moves to recommit, with instructions to report the following substitute for the resolution:

"Resolved, That the President be requested, so far as he can do so with due regard for the interests and dignity of the United States, to use his influence to consummate an agreement with foreign nations to secure for one year a suspension of naval construction."

The question was taken, and the Speaker announced the noes

seemed to have it.
Mr. MOORE. Division, Mr. Speaker.
The House divided; and there were—ayes 40, noes 184.

So the motion to recommit was lost.

The SPEAKER. The question is on the adoption of the Hensley resolution.

Mr. HENSLEY. Mr. Speaker, I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were-yeas 317, nays 11, answered present 6, not voting 101, as follows:

YEAS—317.

NAYS-11.

Kennedy, R. I.

So the resolution was agreed to.

Gardner

The Clerk announced the following additional pairs:

On this vote:

Mr. GOLDFOGLE with Mr. COOPER.

Mr. Levy (for Hensley resolution) with Mr. Greene of Massachusetts (against Hensley resolution)

Mr. GRIEST (for Hensley resolution) with Mr. Lewis of Pennsylvania (against Hensley resolution).

Until further notice:

Mr. Talbott of Maryland with Mr. MERRITT.

Mr. Burgess with Mr. Copley.

Mr. Glass with Mr. Hamilton of New York.

Mr. GUDGER with Mr. SINNOTT. Mr. HENRY with Mr. DANFORTH.

Mr. KINDEL with Mr. Good. Mr. LEVER with Mr. HAYES

Mr. SMITH of Maryland with Mr. VARE.

The SPEAKER. The Clerk will call my name.

The Clerk called the name of Mr. Clark of Missouri, and he answered "Yea."

Mr. REILLY of Connecticut. Mr. Speaker, I voted "nay" on this resolution, not realizing that I was paired with the gentleman from Massachusetts, Mr. Winslow. If he were here, I would vote "nay," but I desire to change my vote and vote "present."

The name of Mr. REHLY of Connecticut was called, and he answered "Present." Mr. GREENE of Massachusetts. Mr. Speaker, is the gentle-

Mr. GREENE of Massachusetts. Mr. Speaker, is the gentleman from New York, Mr. Levy, recorded?

The SPEAKER. The gentleman is not recorded.

Mr. GREENE of Massachusetts. I voted "nay," and I wish to withdraw my vote and vote "present."

The SPEAKER. Call the gentleman's name.

The name of Mr. GREENE of Massachusetts was called, and he answered "Present."

The result of the vote was announced as above recorded.

On motion of Mr. Russell, a motion to reconsider the vote by which the resolution was agreed to was laid on the table.

### PAYMENT OF EMPLOYEES FOR DECEMBER.

Mr. JOHNSON of Kentucky. Mr. Speaker-Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent for the immediate consideration of the following joint resolu-

tion, which I send to the Clerk's desk.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House joint resolution 164.

House joint resolution 164.

Resolved, etc., That the Secretary of the Senate and the Clerk of the House of Representatives be, and they are hereby, authorized and instructed to pay the officers and employees of the Senate and House of Representatives, including the Capitol police, their respective salaries for the month of December, 1913, on the 20th day of December, and the Clerk of the House is authorized to pay on said day to Members, Delegates, and Resident Commissioners their allowance for clerk hire for said month of December.

The SPEAKER. Is there objection?

Mr. JOHNSON of Kentucky. Mr. Speaker, I object. The SPEAKER. The gentleman from Kentucky objects.

If the gentleman will withhold his motion for a minute, the

Chair will recognize the gentleman from Georgia [Mr. PARK] to offer a resolution.

Mr. FITZGERALD. Mr. Speaker, I understand the gentle-man from Kentucky withdraws his objection. Mr. JOHNSON of Kentucky. Mr. Speaker, I withdraw my

objection.

The SPEAKER. The gentleman from Kentucky [Mr. Johnson] withdraws his objection, and the gentleman from New York [Mr. Fitzgerald] renews his request for unanimous consent. Is there objection? [After a pause.] The Chair hears

The question was on the engrossment and third reading of the joint resolution.

Mr. MANN (during the reading of the resolution). Mr. Speaker, the resolution must be read by title.

Mr. FITZGERALD. I move that a title be added to the

Mr. MANN. It is a joint resolution to authorize payment of the salaries for the month of December of the House and Senate employees on December 20.

The SPEAKER. The question is on the passage of the joint resolution. The Clerk will report the title.

The Clerk read the title, as follows:

House joint resolution No. 164, authorizing the Secretary of the Senate and the Clerk of the House to pay the officers and employees of the Senate and House, including the Capitol police, their respective salaries for the month of December, 1913, on the 20th day of sald month.

The SPEAKER. The question is on agreeing to the title as an amendment.

The title as an amendment was agreed to.

The joint resolution as amended was passed.

THE LATE REPRESENTATIVE S. A. RODDENBERY.

Mr. PARK. Mr. Speaker, I ask unanimous consent for the present consideration of the order which I send to the Clerk's

The SPEAKER. The Clerk will report the same.

The Clerk read as follows:

Ordered, That Sunday, the 8th day of February, 1914, at 12 o'clock noon, be set apart for addresses on the life, character, and public services of Hon. S. A. RODDENBERY, late a Representative from the State

The SPEAKER. The question is on agreeing to the order. The order was agreed to.

## RESIGNATION FROM COMMITTEE.

The SPEAKER laid before the House the following communication:

DECEMBER 5, 1913.

Hon. CHAMP CLARK, Speaker.

DEAR SIR: I beg to herewith tender my resignation as a member of the Committee on Railways and Canals. SAMUEL WALLIN. Yours, respectfully,

The SPEAKER. Without objection, the resignation will be accepted.

There was no objection.

## DISTRICT BUSINESS.

Mr. JOHNSON of Kentucky. Mr. Speaker, under the rules of the House this is District day. I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of considering District bills.

The SPEAKER. The gentleman from Kentucky [Mr. Johnson] moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the purpose of considering District bills.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union, with the gentleman

from California [Mr. RAKER] in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of District of Columbia bills.

REPAYMENT TO THE FEDERAL GOVERNMENT OF INTEREST ON THE 3.65 BONDS OF THE DISTRICT OF COLUMBIA.

Mr. JOHNSON of Kentucky. Mr. Chairman, I desire to call up House joint resolution 107.

The CHAIRMAN. The Clerk will report the resolution. The Clerk read the joint resolution, as follows:

Joint resolution (H. J. Res. 107) directing the Treasurer of the United States to transfer \$1,003,257.24 upon his books from the District of Columbia to the credit of the United States.

Whereas, acting under H. Res. 154 and H. Res. 200, adopted during the first session of the Sixty-second Congress, the chairman of the House Committee on the District of Columbia appointed a subcommittee to investigate the account between the District of Columbia and the Federal Government; and

Whereas said subcommittee, so organized, selected one T. Scott Mayes as accountant and one J. R. Mayes as his assistant to check over said

Whereas said subcommittee, so organized, selected one T. Scott Mayes as as accountant and one J. R. Mayes as his assistant to check over said account; and
Whereas the Secretary of the Treasury, at the instance and request of said subcommittee, detailed from his department one T. A. Hodgson, the person who had had charge of the accounts between the United States and the District of Columbia for more than 30 years, for the purpose of going over the account with the said T. Scott Mayes; and Whereas the said accountant, T. Scott Mayes, filed his report with the said subcommittee on the 15th day of February, 1913, showing that the District of Columbia is indebted to the United States in the sum of \$1,003,257.24 on account of advancements made by the United States to the District of Columbia for the purpose of paying interest on the 3.65 bonds of the District of Columbia, which was not reimbursed to the Treasury of the United States as provided and required by the act approved July 31, 1876, appearing in volume 19, page 106, United States Statutes at Large; and
Whereas the said T. A. Hodgson, so detailed by the Secretary of the Treasury, fully verified and confirmed the said figures; and Whereas the said subcommittee unanimously reported that there was due from the District of Columbia in said account the sum of \$1,003,257.24 which had not been refunded or reimbursed to the Federal Treasury as by law required: Therefore be it

\*Resolved, etc., That the Treasurer of the United States be instructed to transfer the said sum of \$1,003,257.24 upon his books from the District of Columbia for the use and benefit of the Treasury of the United States, and that he take such other and further steps as may be proper and necessary to collect said sum from the District of Columbia for the use and benefit of the Treasury of the United States.

With the following committee amendment:

With the following committee amendment:

With the following committee amendment:
Strike out all of lines 3, 4, 5, 6, 7, 8, and 9, on page 2, and insert in lieu thereof the following:

"That the Secretary of the Treasury of the United States through the accounting officers of the Treasury Department be, and he is now, authorized and directed to charge to the District of Columbia the sum of \$1,003,257.24 as a debt due the United States from the District of Columbia on account of money advanced by the United States to the District of Columbia with which to pay the interest on the 3.65 bonds of the District of Columbia for the fiscal years of 1877 and 1878; and, in stating the accounting officers of the Treasury Department of the United States and the accounting officers of the Treasury Department of the United States and the accounting officers of the District of Columbia shall charge the District of Columbia with said sum and with interest thereon at the rate of 3 per cent per annum from and after the date of the passage of this resolution; and the said sum of \$1,003,257.24, and interest thereon, must be paid to the United States by the District of Columbia on or before June 30, 1915, cut of the revenues of the District of Columbia derived from privileges and from taxation upon the taxable property in the District of Columbia."

Mr. JOHNSON of Kentucky. Mr. Chairman, I yield to the

Mr. JOHNSON of Kentucky. Mr. Chairman, I yield to the gentleman from Iowa [Mr. Prouty] so much of my time as he desires, and retain the remainder.

The CHAIRMAN. The gentleman from Iowa [Mr. Prouty]

is recognized for an hour.

Mr. PROUTY. Mr. Chairman, at the first session of the Sixty-second Congress this House passed two resolutions, Nos. 154 and 200, the effect of which was to put upon the Committee on the District of Columbia the responsibility of examining into the accounts and conditions between the District of Columbia and the Federal Government. (As you perhaps all know, there is more or less of a partnership relation existing between the District of Columbia and the Federal Government, and there never had been, so far as I have been able to ascertain. a complete statement of account between the District of Columbia and the Federal Government.

In pursuance to the authority and direction of this House, the Committee on the District of Columbia undertook an investigation of the accounts, and the item that is presented in the resolution now before the committee is the first of a series of matters that this committee will call to the attention of this House, probably before the close of the present session.

This investigation began with the year 1874, and the first items that we present now for the consideration of the House are the items growing out of the interest on what is known as the 3.65 bonds, authorized in 1874.)

There has been a great deal of discussion in this House and more or less consideration by the department as to what rela-tion the Federal Government sustains to the bonds known as the 3.65 bonds. It is not the purpose of this committee, nor is it in the scope of my resolution, to raise that question for reconsideration or consideration at all. This resolution of mine involves only the question as to the payment of interest for the years 1876 and 1877, about which there seems to me to be no question as to the liability of the District and no question as to the perfect right of the Government to reimbursement of the money that was paid out on that account.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield?
The CHAIRMAN. Does the gentleman yield?
Mr. PROUTY. With pleasure.

Mr. CAMPBELL. Without going into the question whether or not there ever was a legal liability on the part of the District to the Federal Government, as stated, does not the gentleman from Iowa think that another generation that has passed on should have been called on to make that payment, rather than the present generation? In other words, does he not think that if there ever was any justification for the statute of limitations at all it would be in a case of this kind, where a former generation should have been called to an account if anyone should

have been called to an account?

Mr. PROUTY. Mr. Chairman, answering that question, I will say, first, that the statute of limitations does not run against the United States. In the second place, in pure equity there is no occasion why this fund, which was clearly paid out by the Federal Government, should not be reimbursed to it by the District, because the bonds themselves have not yet been paid, and it is not a matter of generations. These bonds were issued, and the present and the past generation are both getting the benefit of these bonds and the money that accrued from their

Speaking, however, just a little bit more specifically, and coming perhaps more closely to the point, no one who has examined the affairs between the District of Columbia and the Federal Government can fail to recognize the fact that for some strange reason, with rare exceptions, there has been nobody present to stand for and protect the rights of the Federal Government.

In other words, by some method which I do not now undertake to explain, the representatives of the United States, both in Congress and in the other official positions, have been hypnotized by the District of Columbia. Before we get through with this matter you will find this strange fact, that while our accountants will show error after error that has occurred, there has never been one error that has resulted to the benefit of the United States, but every error that we have so far detected has always accrued to the use and benefit of the District of Columbia; and I do not think it stands in the right of any man to say that Congress or the United States Government is now estopped to call to the attention of this House and of the country the true condition of the account between the District of Columbia and the Federal Government.

Now I will call attention to the law. In 1874

Mr. CAMPBELL. Mr. Chairman— Mr. PROUTY. I refuse to yield further just now.

Mr. CAMPBELL. Just on the very question the gentleman is discussing.

Mr. PROUTY. I will discuss the matter later.

Mr. CAMPBELL. I want to ask a question about it. The CHAIRMAN. The gentleman declines to yield further. Mr. PROUTY. I will give the gentleman time, but I want to state my proposition first.

Mr. CAMPBELL. The gentleman has made a very serious

charge, and I want to make some inquiry about it. The CHAIRMAN. The gentleman declines to yield.

Mr. PROUTY. In 1874 there was a law passed authorizing the District Commissioners to issue what was known as 3.65 There was no specific statement in that law as to who should be responsible for the payment of them, perhaps either the principal or interest. At least, there has been a great deal of controversy over that question. I myself personally believe that it was not intended that the Federal Government should be anything more than an indorser or guarantor of these bonds so as to strengthen and help the credit of the District. But in the matter which I am now about to call to the attention of the House there is no dispute, so far as I know, and no contention of anything other than what the law specifically says.

In the first session of the Forty-fourth Congress, found in

volume 19, on page 106, is the following enactment:

That the Secretary of the Treasury shall reserve of any of the revenues of the District of Columbia not required for the actual current expenses of schools, the police, and the fire department, a sum sufficient to meet the interest accruing on the 3.65 bonds of the District during the fiscal year beginning July 1, 1876, and apply the same to that purpose: and in case there shall not be a sufficient sum of said revenues in the Treasury of the United States at such time as said interest may be due, then the Secretary of the Treasury is authorized and directed to advance, from any money in the Treasury not otherwise appropriated, a sum sufficient to pay said interest, and the same shall be reimbursed to the Treasury of the United States from time to time as said revenues may be paid into said Treasury until the full amount shall have been refunded.

Again, in the act of the second session, which you will find

in the same volume, on page 346, it is provided:

in the same volume, on page 346, it is provided:

That the Secretary of the Treasury shall reserve of any of the revenues of the District of Columbia not required for the actual current expenses of schools, the police, and fire department, a sum sufficient to meet the interest accruing on the 3.65 bonds of the District during the fiscal year beginning July 1, 1877, and apply the same to that purpose; and in case there shall not be a sufficient sum of said revenues in the Treasury of the United States at such time as said interest may be due, then the Secretary of the Treasury is authorized and directed to advance, from any money in the Treasury not otherwise appropriated, a sum sufficient to pay said interest; and the same shall be reimbursed to the Treasury of the United States from time to time as said revenues may be paid into said Treasury until the full amount shall have been refunded.

During these two years and operating under these two states.

During these two years and operating under these two statutes the Federal Government advanced for the District of Co-

lumbia the amount set out in my resolution, \$1,003,257.34. At that time the District of Columbia fully recognized its responsibility for this interest, and the District of Columbia, through its commissioners, levied a tax for the express purpose of paying it-a tax that, if my recollection serves me right, yielded sufficient revenue to pay it; but for some reason, which I hope the gentleman from Kansas [Mr. Campbell] can explain, it was never so applied, and the District of Columbia did not pay a dollar of it. The Federal Government paid all of it, and never a dollar of it has been reimbursed to the Federal Treasury.

Mr. CAMPBELL. Does the gentleman want me to answer

No; I prefer you to do it in your own time.

Mr. CAMPBELL. I have no time.
Mr. PROUTY. I will give you some.
Mr. MANN. The gentleman will have all the time he wants. Mr. PROUTY. The gentleman can have an hour if he wants it. So far as I know, the District of Columbia has never raised any question about this, other than that it is a bare possibility that it should only pay one-half of it.

I shall be pleased if any gentleman will show me any statute that made the Federal Government any more than an advancer of this money, with specific instructions of the statute requiring it should be reimbursed by the District of Columbia to the

United States.

I may say in this connection that it would be perhaps entirely fair, from one point of view, that the District of Columbia should not only refund this money, but pay interest on it from the time it should have refunded it. The committee has, however, been a little more lenient in that matter, recognizing the fact that it was probably due to misunderstanding, negligence, or fault of some official of the Treasury Department that it was not so set aside; recognizing that that must in a sense be true, we felt that we would forego the question of interest, and only require them to pay the amount clearly and specifically advanced for their benefit.

I might suggest at this point, however, in anticipation of opposition that might develop, that if we should collect one-half the interest on this amount advanced for the 3.65 per cent bonds, it would amount to more than the amount the Government is claiming in this resolution. So I think no one can truthfully say that the committee has sought to be harsh or unreasonable or exacting or doing anything that would heap an unnecessary burden on the District. Because, mark you, now that during all these years the Federal Treasury has been deprived of this money, the Federal Treasury itself has been compelled to pay interest in a corresponding amount and the District of Columbia has escaped it. Even if you took the point of view that they should only pay one-half, they have escaped the payment of interest on the one-half of it, as well as the principal, during these long years.

Now I will yield to the gentleman from Kansas if he wishes

to ask a question.

Mr. CAMPBELL. Mr. Chairman, a moment ago the gentle-man from Iowa stated broadly that some one was grievously in fault because the Federal Treasury had been charged with more than its share upon the payment of the interest of these bonds.

Mr. PROUTY. If the gentleman will pardon me, I did not say that. I said that it had been charged with all of it.

Mr. CAMPBELL. Well, all of it. Does not the gentleman

from Iowa know that the District of Columbia has no voice on the floor of this House, has no vote in any committee of this House, has no voice in the other branch of Congress; that every dollar appropriated out of the Treasury of the United States for the payment of these bonds has been voted upon the recommendations of the members of the Committees on Appropriations and by a vote of this House? When the gentleman has answered that question, I will ask him another.

Mr. PROUTY. I will answer that question with pleasure. I admit that the District of Columbia had no representative on the floor of the House when this law was passed, but Congress passed a law, in as specific terms as anybody can read it, that the Federal Government would advance the money, and that it should be reimbursed from the moneys of the District of Co-

lumbia to the Federal Treasury.

Mr. CAMPBELL. Has not Congress the power to appropriate, and does it not appropriate, the money out of the Federal Treasury belonging to the District?

Mr. PROUTY. I recognize that fact, but if you will turn to the commissioners' report in the distribution of the levy which they were required to make by law you will find this:

For interest on the District of Columbia 3.65 bonds guaranteed by the United States (act of Congress approved July 31, 1876), 52.7 mills.

Yet it is a fact that, notwithstanding that levy was made, the men in charge of the accounts between the District of Columbia and the United States never appropriated a dollar of that for the purpose of reimbursing the United States. The gentleman may think I am severe. I am not severe; I am telling the straight truth. The gentleman from Kansas can draw his own inference. Why did they not do it? There is not a line or a syllable, so far as I know, spread on the records of Congress or in the departments that explains why it was not done. That led me to make a remark—and I have not the slightest disposition to take it back—that somebody must have been hypnotized. I suppose the gentleman reads such articles as we see in the paper about this matter, the appeal to the House on the ground of common honesty. If you will read the articles you will find that there is not a word or a syllable in it to justify the District's claim, and there is not a thing that shows any dishonesty on the part of Congress. Congress has done its duty, except, perhaps, that it ought to have got after

done its duty, except, perhaps, that it ought to have got after the matter long ago and not have allowed it to sleep so long.

I might say, by way of explanation, that few Members, of course, have the privilege of going and delving into these old books. I might say, by way of further information to this House, that when this investigation was started there was appointed from the Treasury Department a Mr. Hodgson, who for 30 years had charge of the accounts between the District of Columbia and the United States, and in order to find the records they had to go away back under the steps, away back in the dusty records of the Treasury, and there dig out these old books, and after they checked up the accounts Mr. Hodgson signed by himself a statement that this amount is exactly in accordance with the statement found by Mr. Mayes, a man accordance with the statement found by Mr. Mayes, a man employed by the District of Columbia Committee.

Mr. MANN. Mr. Chairman, will the gentleman yield? Mr. PROUTY. With pleasure. Mr. MANN. I think what is bothering some of us, at least, would be this proposition. Congress passes a law which the gentleman interprets by his resolution, and it may be that there is another interpretation.

Mr. PROUTY. I think not. Mr. MANN. Of course, all advocates think that of their interpretation of anything.

Mr. PROUTY. I would like to hear the gentleman suggest

another interpretation.

Mr. MANN. Oh, no; the gentleman would not, I am quite sure. Quite the contrary. I am not going to, and I have not recently examined the law. That is construed by the Treasury Department by officials who are unbiased one way or the other, certainly not in behalf of the District of Columbia, because they are officials of the General Government and not officials of the District of Columbia. That construction continued for 30 or 40 years-I do not remember the number-and meanwhile during all of that time apparently Congress ratifies the construction by the form of these appropriation acts. The gentleman says that somebody did grievously or something of that sort, but why? How could it happen that such a construction could be why. How could be happen that such a construction could be put upon an act of that sort in the presence of the gentlemen who enacted the law, and who accepted the construction without their knowing it? I ask the question for information.

Mr. PROUTY. Mr. Chairman, I do wish that I could give to

the gentleman the information he asks. I have sought for it candidly and honestly, and have not been able to find why it was done. So far as we are able to find, there is not a single word, not one syllable.) I will read to you, however, the testimony of Mr. Hodgson, and that may throw the only light on it that we have on the subject. It is a very glimmering light. We called him before the committee, and I read from his testi-

The Chairman. Please give to the stenographer your full name and state your residence and occupation.

Mr. Hodgson. My name is Thomas A. Hodgson.
The Chairman. Where is your residence?
Mr. Hodgson. I reside at Falls Church, Va.
The Chairman. What is your occupation?
Mr. Hodgson. I am a clerk in the office of the Auditor for the State and Other Departments.
The Chairman. How long have you held that position?
Mr. Hodgson. I have held that position since 1894.

It will be understood that this was the man set apart by the Treasury Department to check with the man chosen by the District Committee.

The CHAIRMAN. How much longer than that have you been in the employment of the Government?

Mr. Hodgson. From 1881 up to that time I was a clerk in the office of the Comptroller of the Treasury.

The CHAIRMAN. How many years' service does that make for you in this employment?

Mr. Hodgson. A service of 32 years.

The CHAIRMAN. Has one of your duties been to state the account between the Federal Government and the District of Columbia?

Mr. Hodgson. Yes, sir.

The CHAIRMAN. For how long have you been doing that?
Mr. Hodgson. Since 1881; I have been on the District of Columbia
work all the time.
The CHAIRMAN. Is that the first time this account was stated after
the passage of the act of June 11, 1878?

All of you familiar with this legislation know that in 1878 we passed what is known as the half-and-half rule, and I raise no question now so far as this resolution is concerned, as to the payment of interest after that time, although it has been raised on the floor of this House, with some reasonable degree of consistency, that the Federal Government was responsible only for the guaranty of it, but I am not raising that question in this resolution.

Mr. Hodgson. The first time the account was stated was in the year

Mr. Hodgson. The first time the account was stated was in the year 1886.

The Chairman. Was that the first time it was stated by anybody? Mr. Hodgson. Yes, sir.

The Chairman. By the expression "stated" you are using a book keeper's term which the layman may not fully understand. Will you, therefore, please explain what you mean by "stating" the account? Mr. Hodgson. That is assembling all the data in connection with the financial account between the United States and the District of Columbia. I might say that the cause of stating that account was that Congress passed an act requiring the District of Columbia to reimburse the United States \$250,000 on account of advances made for the sewerage system of the District of Columbia. That was really the cause of the account being stated.

The Chairman. Under resolutions Nos. 154 and 200, passed by the House of Representatives during the first session of the Sixty-second Congress, accountants were authorized and put at the use of the Committee on the District of Columbia for the purpose of going through the accounts between the United States and the District of Columbia. Under that resolution Mr. T. Scott Mayes was appointed as accountant; and the Secretary of the Treasury was asked to detail a bookkeeper or accountant for the purpose of going through the said accounts with the two accountants just named. Were you not designated by the Secretary of the Treasury for this work?

Mr. Hodgson. Yes, sir.

The Chairman. Do you recall about what time you first commenced the work of looking through these accounts with Mr. Mayes?

Mr. Hodgson. I think it was about 20 months ago. I am not sure as to the time, but I think it was about 20 months ago. I am not sure as to the time, but I think it was about 20 months ago. I am not sure as to the time, but I think it was about 20 months ago. I am not sure as to the time, but I think it was about 20 months ago. The Chairman. Have you not been almost constantly engaged with Mr. Mayes upon that work since that time?

Mr. Hodgson. That w

The CHAIRMAN. Have you not been almost constantly engaged with Mr. Mayos upon that work since that time?

Mr. Hodgson. Yes, sir.

The CHAIRMAN. When was that account completed and a statement of it made?

Mr. Hodgson. That was completed just yesterday, I think.

The CHAIRMAN. Day after day, through these months, have you not been with Mr. Mayes through the ledgers and journals which relate to this account since June 20, 1874?

Mr. Hodgson. Yes, sir, and night, too.

The CHAIRMAN. Do you mean by that all night, of course, but you mean that you have worked far more than the Government hours, and that you have gone into very much night work in order to complete you have gone into very much night work in order to complete. The CHAIRMAN. As Mr. Mayes, in examining the books, came across item after item relating to the account between the United States and the District of Columbia, were you then and there consulted and advised with relative to just what each and every item meant?

Mr. HODGSON. Yes, sir.

The CHAIRMAN. Was each and every one of these items thoroughly analyzed by you?

Mr. HODGSON. Yes, sir, most thoroughly.

Mr. HODGSON. Yes, sir, most thoroughly.

Mr. HODGSON. Yes, sir.

The CHAIRMAN. Was not, also, each and every one of these items, in being analyzed, traced to its origin, either by check, warrant, or original entry?

Mr. HODGSON. Yes, sir.

The CHAIRMAN is there any item stated upon this account by Mr. Mayes with which you, as the bookkeeper for the Government, failed to agree the limit of the chair was an accountant?

Mr. HODGSON. Not one. I do not think there was. I do not recall any. The CHAIRMAN. Not one item?

Mr. HODGSON. Not one. I do not think there was. I do not recall any. The CHAIRMAN. Not one item?

Mr. HODGSON. Not one. I do not think there was. I do not recall any. The CHAIRMAN. How much?

Mr. HODGSON. Yes, sir; a summary of the statement of this 20 months' work?

Mr. HODGSON. Not one. I do not think there was. I do not recall any. The CHAIRMAN. How much?

Mr. HODGSON. Not one. I do n

The Chairman. Do you mean to say that that is the amount paid or the amount due the United States from the District of Columbia?

Mr. Hodgson. That is the amount paid by the United States.

The Chairman. Mr. Hodgson, read the whole of that summary statement you have before you and then say whether or not it is correct or

Then follows a very long statement, which I shall not include in the RECORD:

The CHAIRMAN (interposing). Requiring the District of Columbia to

The CHAIRMAN (interposing). Requiring the District of Columbia to reimburse?

Mr. Hodgson, Yes, sir; requiring the District of Columbia to reimburse the United States \$250,000 out of the unappropriated surplus of the District of Columbia and the unexpended balance of appropriations, and in doing so it became necessary for me to search over the records of the department in order to find out what moneys the District had paid and what moneys it had not paid, and in going over the record from 1874 to 1878 I ran across some legislation that required the District of Columbia to reimburse the United States. Among such items I found that the District of Columbia had not reimbursed the United States in accordance with the act of June 20, 1874, in connection with the issue of the 3.65 bonds of the District of Columbia; and I presented it to the comptroller, being in his office at that time, but he declined to take any steps in the matter and refused to consider any reimbursements that were required by law prior to 1878. I am glad to say that this statement in connection with the 3.65 bonds was for certain interest periods—not as many as were covered by the report of Mr. Mayes—yet in the examination made by the expert, Mr. Mayes, the amounts that I reported to the comptroller as due on these interest periods were verified. That is about all there is to say in connection with the memorandum statement.

The statement made by me, which I now hold in my hand, shows the receipts from August, 1875, to August, 1878—that is, the interest periods, not including the interest due August 1, 1878.

The CHAIRMAN. What is the net result of that statement of your own?

Mr. Hodgson, It is that the amount received in exchange for

own?

Mr. Hodgson. It is that the amount received in exchange for board of audit certificates was \$186,320.32. The act authorizing the issue of the 3.65 bonds made them exchangeable for board of audit

certificates—
The CHAIRMAN, Exchangeable for board of audit certificates?
Mr. Hodoson, Yes, sir. The first and second comptrollers were the board of audit, and there was an error in the treasurer's office of \$1.89; and the amount due from the District of Columbia—that is, the amount received on account of the District of Columbia—was \$198,622.79. The amount received from the United States was \$1,370,-757.24, making a total of \$1,755,723.23, which agrees with Mr. Mayes's statement. My own summary statement, from which I take these figures I have just given you, is as follows:

Mr. WILLIS Mr. Chaleman, will the continuous violat?

Mr. WILLIS. Mr. Chairman, will the gentleman yield?
Mr. PROUTY. With pleasure.
Mr. WILLIS. I desire to ask a question purely for informaon. I note on the second page of the gentleman's report, and also from his remarks, that this money was advanced only for the years 1877 and 1878. Does he know whether there was any sum advanced for years subsequent to that time?

Mr. PROUTY. The gentleman should say 1876 and 1877?

Mr. WILLIS. Well, 1876 and 1877, if that is correct. There

were two years.

Mr. PROUTY. I would say this in answer to that question, that in 1878 Congress passed what is known as the half-andthat in 1818 Congress passed what is known as the half-and-half law, under which we are now operating. And it is claimed, and I think with a fair degree of a chance of sustain-ing it, that the Federal Government by that act expressly agreed to pay one-half of the interest. It is not so conceded by some people, and it is not so conceded by me, but there is a chance for a disagreement there, but in my opinion there is no chance in the years prior.

Mr. WILLIS. One further question. Does the gentleman know of any special circumstances connected with the finances of the District which made it necessary or desirable for the Government to take this action in these years? Does the gen-tleman know of any special reason why the finances of the District were in such condition as to require this action? gentleman is familiar with all these things, and I am asking

purely for information.

Mr. PROUTY. No, sir; I can see no real reason for it. Mr. JOHNSON of Kentucky. If the gentleman will yield to me for one second?

Mr. PROUTY. With pleasure. Mr. JOHNSON of Kentucky. I will suggest it was not entirely absence of revenue, but in the beginning the time for collecting the taxes did not fit the time for paying the interest on

these bonds. The time for collecting the taxes was afterwards changed so that it would fit the time for payment of interest on the bonds. At the time this money was advanced I am not quite sure whether there was sufficient revenue on hand or not, but it was advanced upon the specific condition it was to be returned when collected.

Mr. WILLIS. Will the gentleman yield to me?

Mr. PROUTY. Let me further answer the same question, because I have my fingers on it:

The commissioners apportioned out of each \$1.50 to be collected on account of said levy the sum of 52 cents and 7 mills—
"For interest on the District of Columbia 3.65 bonds guaranteed by the United States, act of Congress approved July 31, 1876."
This apportionment was adhered to in every tax collection reported during the fiscal year 1877, except the one reported December 30, 1876. In this collection of December 30, 1876, the entire apportionment was slightly changed from the published apportionment, each fund, except the general fund of the District, receiving a little less than it was entitled to receive, the fund for interest on the 3.65 bonds receiving \$0.52432 instead of \$0.527 out of each \$1.50 collected. This irregular apportionment of the one collection was unquestionably due to an error in calculation.

There was collected for interest on the 3.65 bonds of the District of

in calculation.

There was collected for interest on the 3.65 bonds of the District of Columbia on account of the levy for the fiscal year 1877 and during the fiscal year 1877 the sum of \$43,286.69, and from July 1, 1877, to October 31, 1877, the further sum of \$34.988.69, and from October 31, 1877, to June 30, 1878, the further sum of \$23,349.32, and in all, the sum of \$490,504.70 to June 30, 1878.

Up to October 31, 1877, the apportionment was made of each collection reported, but after October 31, 1877, the apportionment was ignored and the collections thereafter were treated as general revenues of the District of Columbia.

Mr. WILLIS. Will the gentleman yield for one further question?

Mr. PROUTY. With pleasure.
Mr. WILLIS. Can the gentleman state whether similar action was taken in any years prior to this? What I am seeking to arrive at is whether the passage of this resolution will clean off the slate, as far as these interest payments are concerned.

Mr. PROUTY. I would say it does, because this was started in 1874 under a law of Congress, and it is these first two years that are brought out in this controversy. As to what occurred after 1878, as to what the law then meant, I will not now stop to discuss. It has been discussed upon the floor of this House pro and con several times. As to what will finally be the position of Congress upon the payment of bonds which were issued at that time for payment of debts of the District I make no prediction nor suggestion of my own course in that matter, but as to these years, so far as I have been able to find, no one suggests any excuse whatever.

Mr. SELDOMRIDGE. May I ask the gentleman a question?

Mr. PROUTY. With pleasure.

Mr. SELDOMRIDGE. I would like to know if there is any entry upon the books of the District of Columbia as to the receipt of this money from the Government?

Mr. PROUTY. The gentleman understands the way it is done.

The general revenues of the District of Columbia are paid into

the Federal Treasury.

Mr. SELDOMRIDGE. And paid out by the Federal Treasury. Mr. PROUTY. And paid out by the Federal Treasury. Under the law creating the commissioners, the law authorizing the issuance of these bonds, it was expressly provided that the Federal Government should be responsible for them and that the funds should be paid into the Federal Treasury so it might know what was being done.

Mr. SELDOMRIDGE. There is no charge against this on the

books of the Treasury?

Mr. PROUTY. Not a particle. That is what my resolution is, namely, that in restating the question they shall state this is a debt due from the District of Columbia to the United States.

Mr. BARTON. Will the gentleman yield?
Mr. PROUTY. I will.
Mr. BARTON. I would like to ask if in turning those funds in to the Government, are they turned in as one lump sum or segregated into different items supposed to be appropriated for, for instance, school funds, alleys, and so forth?

Mr. PROUTY. They are turned in in one lump, with a statement, however, as to how they are to be distributed. You are getting me into deep water now, because I am not an accountant.

Mr. CAMPBELL. While they are turned in in a lump sum, they are appropriated by Congress specifically out of the Treasury?

Mr. BARTON. But the appropriation does not take effect on these specific funds until after they are turned into the National Treasury?

Mr. CAMPBELL. Certainly not. The revenue or taxes paid by the District are paid into the Federal Treasury, just the same as revenues collected from internal revenue or any other source from which the Government collects taxes, and are paid out by appropriations specifically made by Congress.

Mr. BARTON. Right along that line I would like to ask, then, when the appropriation was made of this fund that was turned in from the District of Columbia and joined with the moneys of the United States was there any part set aside for the payment of this interest? Was that supposed to be paid for from a general fund?

Mr. CAMPBELL. That would be paid like any other obligation of the District of Columbia-by appropriations regularly

made by Congress.

Mr. PROUTY. I think the gentleman is mistaken as to the manner in which the Treasury Department treats this. The original act creating the 3.65 bonds gave the Treasurer the power to make it his duty to pay this, and, so far as I have been able to find, there is no subsequent legislation making appropriations for the payment of this interest.

Mr. BARTON. That is the point I wanted to get. Mr. PROUTY. I think I am stating it accurately.

Thank you. Mr. BARTON.

Mr. CAMPBELL. I assume that the reason it has not been paid is because there has been no appropriation made for it. The District Committee recommends legislation and brings it upon this floor. That legislation may authorize certain expenditures, but it remains for the Committee on Appropriations to bring in a bill making an appropriation to cover that ex-penditure, and, while the act of 1877 or 1878, as the case may be, may have made a liability on the part of the District, laid a foundation whereby certain funds were to be appropriated by Congress in the District appropriation bill without being subject to a point of order, the District appropriation bill has

never evidently contained an item covering that authorization.

Mr. PROUTY. No. As I say, the law that authorized the issuance of these bonds directed the Treasurer to pay them out of any funds in his possession not otherwise appropriated. And now for nearly 30 years and over this law has been on the statute books and there has been no appropriation made, as the gentleman suggests, by Congress for covering these items. has been wholly a question of bookkeeping between the District of Columbia and the United States. I am not here now to expatiate on the system of bookkeeping. I suppose before the Congress adjourns some member of the District Committee will call to the attention of the House the defective method by which these accounts are kept. It is not strange this item should be lost sight of.

Mr. Chairman, how much time have I remaining?

The CHAIRMAN. Fifteen minutes.

Mr. PROUTY. I would like to reserve the balance of my time, but also would like the gentleman from Kansas [Mr. CAMPBELL] to be recognized.

Mr. CAMPBELL. Mr. Chairman— The CHAIRMAN. The gentleman from Kansas [Mr. CAMP-

BELL] is recognized for an hour.

Mr. CAMPBELL. Mr. Speaker, I shall not take that much time. I will further state that I do not hold a brief for the people of the District of Columbia nor for any of the officers of this District. It has been two or three years since I actively participated in the affairs of the District upon the floor of this House. Eight years of service on the District Committee and in hearings in that committee gave me some familiarity with District affairs upon this floor.

This resolution brings up a claim that reminds me of a claim that an old man mentioned to me on a rainy October day in my office soon after I began practicing law. He came to me and, calling me by my first name, said, "I have a claim that will make us both rich if you can collect it." "Well," I said, "what is the nature of the claim?" He went on to say that his grandfather owned every acre of ground that the city of Des Moines, Iowa, was built upon, and that the legal title had never passed from his ancestor or his heirs. He said if I could get the title to the plot of ground upon which Des Moines stood settled in him and his several cousins there would be enough in it to make us all very rich. I asked him if he had just awakened to the idea that he had a claim of that character. I asked him what his grandfather had done to assert his rights, and he admitted that his grandfather and his father and all his great uncles and his uncles down even until his own day had let pass any notion that they had any sort of claim such as he stated.

I said to him that I thought, under the rules of law governing in such cases, the city of Des Moines would probably retain the title to the land upon which it was built, notwithstanding the fact that there was no evidence, as he claimed, that the legal title had ever passed from his ancestors to the

This claim is as hoary with age as that. The gentleman from Iowa [Mr. Prouty] says that the statute of limitations does

not run against the Government of the United States. may be literally true, but the rules of law and the principles of equity that govern between men in all their relations in life ought to have some bearing on a case when Congress takes action for the Government of the United States. The Government of the United States should not claim against a portion of its citizens what one citizen can not claim against another.

The reason for that rule of law and principle of equityand there is an element of equity in it-providing for a time within which a claim can be asserted ought to have some bearing here; and indeed it seems to me it ought to have more bearing here than it would have in an ordinary case where the

statute of limitation runs.

Here is a case in which, if there is a claim at all, that has been ours to pay in any year we had seen fit ever since 1878. The Committee on Appropriations of the House of Representatives could have included under the authorization of Congress an item in every appropriation bill since then providing an amount sufficient to have covered any claims that it might have against the District of Columbia on this account. The District of Columbia has had no voice in the matter. We have had the whole voice. There has been no one here saying that the District of Columbia should not be held to pay this amount. have gone on ratifying one year after another any dereliction of duty, if there were any, on the part of the auditors in the Treasury Department. We have gone on every year, without making a specific appropriation, placing in the Federal Treasury from the account of the District of Columbia an amount sufficient to pay this interest account.

That not being done, the people of the District of Columbia have come to believe—and they have had a right to believe that Congress had condoned the debt, if there were any; and for 40 years they have gone on making their levies and paying their taxes and placing them in the Treasury of the United States at our disposal, to be appropriated as we saw fit for their benefit, to pay their debts, to build their schools, to pay for their sidewalks, for the improvement and repair of their streets. have had no voice, I repeat, in the matter and have left this all to us. All that they have done is to pay into the Treasury of the United States the money that has been available for appropriations to be made by us whenever we saw fit to make it.

And now I say here, in all justice to the people of this District-not to the District of Columbia, but to Jones and Smith and Brown and the widows of all of these, who own property here and are taxpayers here and who have purchased property here and have become taxpayers here long since—they have had the right to believe that this account was fully paid. Long since they have had the right to believe that the statute of limitations had run on this, with our acquiescence every year, passing by the opportunity of making an appropriation of a sufficient amount to pay this debt.

But now we have come upon a time when the District of Columbia is an easy target. It is the easiest thing in the world to assail a man when his back is turned or attack a helpless man who can not defend himself. The people of the District of Columbia have no one to speak for them. Therefore it is easy to denounce and to criticize and to make charges and to make insinuations against their honesty and integrity.

Mr. PROUTY. Will the gentleman yield?

Mr. CAMPBELL. Yes; I will be more courteous to the gentleman than he was to me.

Mr. PROUTY. I did not ask him that question.

The CHAIRMAN. Does the gentleman yield?
Mr. CAMPBELL. Yes; I yield.
Mr. PROUTY. Do you think the District of Columbia, under the law, owed any part of this money at the time? If so, how much?

Mr. CAMPBELL. I do not know; and I do not know what occurred before the Committee on Appropriations the next year. I do not know what was said, and the gentleman says he has not been able to find out. I would like to know if, in all the ramifications that have been made by this committee in an endeavor to find something discreditable to the people of this District, they took up the hearings before the Committee on Appropriations in 1878, 1879, 1880, and subsequent years on the District of Columbia appropriation bill?

Mr. PROUTY. I have said to you half a dozen times that we do not raise any contention, although there is a fairly good ground for contention that can be raised about the legislation of 1878 and subsequent years. While we are at it, if you will pardon me, I will call your attention to that particular statute.

Mr. CAMPBELL. I recall the statute.

That is where the whole difficulty came in. Mr. CAMPBELL. I did not yield for the reading of the statute. I simply yielded for a question. The gentleman has had an hour in which to read the statute. It is familiar to everybody. I take it that the statute of 1878 is the one to which

the gentleman refers.

Instead of doing affirmative things for the District of Columbia that ought to be done by Congress, things that have been left undone that the people of this District have been appealing to have done, the archives have been ransacked to find some old claim against the District, and instead of taking up some matter of important legislation in the interest of people now living and entering upon a winter that does not promise to be the easiest that the people of this country have passed through in recent years, on the very first day available for the consideration of matters in which the people of this District are interested, an old outlawed claim, more than 40 years old, is given precedence, and I have no doubt will occupy the entire day, to the exclusion of all matters in which the people of this District may be interested.

I have been informed—I have not verified the statement—that the District tax last year paid into the Treasury of the United States amounted to something over \$7,000,000, and that the portion paid out of the Federal Treasury last year under the halfand half principle was in the neighborhood of \$4,500,000. That is recent history. I wonder if gentlemen on the District Committee are as familiar with matters occurring last year as they are with matters occurring 45 years ago affecting the welfare of the people of this District. I await a reply.

Mr. PROUTY. We are not going to discuss anything except

what is in this bill.

Mr. NORTON. Will the gentleman yield?

Mr. CAMPBELL. Yes. Mr. NORTON. You state that \$7,000,000 was paid in and about \$4,500,000 was paid out. From a statement of that kind one would ordinarily be led to believe that the United States was not paying its share.

Mr. CAMPBELL. That it did not pay its half last year.

Mr. NORTON. Is it a fact or is it not, that the United States paid one-half of the expenses of the District? You can not make a fair comparison by comparing the amount of taxes received in any one year, because taxes that were overdue-that were due in prior years-might have been paid in. The only fair comparison would be as to the actual expenses paid by the

United States and by the District.

Mr. CAMPBELL. I do not know. I said I had been informed, but I have not verified the information, and I am asking for information from men on the District Committee who are thoroughly conversant with the financial relations, bearing upon the half-and-half basis, running back for a period of forty-odd years. I am asking for information from them as to whether or not the amount of money paid out of the Federal Treasury last year was equal to the amount paid out of the District treasury for the maintenance of the District. I simply say again that the District, the people of the District, must stand acquitted of any dereliction of duty upon their part. The people in this District have the right to stand upon the same rules of law, and to have applied to them the same principles of equity, as the people of any other portion of our country, and there is no other people anywhere, under the circumstances under which we are now pressing this claim against the people of the District of Columbia, who would be required to pay in any court of the United States.

Mr. McKENZIE. Will the gentleman yield?

Mr. CAMPBELL. Yes.

I would like to ask the gentleman from Mr. McKENZIE. Kansas if this claim had been presented in 1879 or 1880, would

he consider it a just claim then?

Mr. CAMPBELL. That is aside from the question. If the statute of limitations run in 15 years, I would say that it ought to be paid within that time, but if the claim were made for payment 16 years after it matured I would say that it ought not

Mr. McKENZIE. Does the gentleman believe that if it was an honest debt in 1879 and 1880 and had never been paid that the mere lapse of time would justify a refusal to pay an honest

obligation?

Mr. CAMPBELL. I go on the assumption that if the Congress of the United States had thought in 1878 or 1879 or 1882 or in 1883, 1884, or 1885 that this was a just claim against the District there would have been included in the District appropriation bill an item paying it. There would not have been any person here saying that that could not be done because it was authorized in the act of 1878. The gentleman from Illinois asked me if it was an honest claim. Evidently Congress has never looked upon it as a just claim, whether it was an honest claim or not. Evidently the Comptroller of the Treasury in 1886 did not consider it a just claim; and, as I recall it, Grover

Cleveland was serving the people of this country as President of the United States in his first term, with a Comptroller of the Treasury who had come in on a platform to "put the rascals out," and they swept the floors of the Treasury looking for a dishonest penny. If there had been anything dishonest about withholding this amount in the Treasury of the United States from a specific appropriation to the United States, it seems to me that the comptroller would have directed the transfer of the money to the credit of the United States rather than leaving the amount to the credit of the District in the Treasury.

Mr. KAHN. Will the gentleman yield for a question?

Mr. CAMPBELL. Certainly.

Mr. KAHN. Did the gentleman listen to the testimony as it was read by the gentleman from Iowa [Mr. Proury], in which Mr. Hodsdon called to the attention of the District Committee that in 1886 he had brought the matter to the attention of the then comptroller, and that the comptroller said that he would not bother with it?

Mr. CAMPBELL. I heard that testimony. Evidently the comptroller did not think it was a proper claim. That was some eight years after the claim matured. It was fresh then as compared with the hoary condition of its years at this time. Now, why are we in this attitude toward the District as compared with the attitude of Congress and the comptrollers who had their attention called to the matter in other years?

There is evidence that the matter has not been overlooked; there is evidence that eight years after the basis of the claim arose it was called to the attention of the Comptroller of the Treasury, but he did not deem it worth while to give any attention to it, and did not. As I stated a moment ago, we had a strictly honest administration of the affairs of the Government at that time, because they admitted that they were honest and that they would conduct the affairs of the country upon an honest basis.

As I said, I have no brief for the people of this District, but I look upon this as an inopportune time to push what I regard as an outlawed claim. I would press this question before any court, as would the gentleman from Iowa, as would the gentleman from Kentucky, if the claim was made against a client, whether he came from Iowa, Texas, Kentucky, or Kansas.

Mr. GORMAN. Will the gentleman yield?

Mr. CAMPBELL. I will.

Mr. GORMAN. Does the gentleman believe that the lapse of time can wipe out any moral obligation?

Mr. CAMPBELL. This is not a moral obligation. If it is

anything, it is a legal obligation.

Mr. GORMAN. Does not the gentleman recognize in this claim some element of a moral obligation?

Mr. CAMPBELL. Not any more than the outlawing of claims under the statute of limitations in the gentleman's State, whether it be the settling of title in real estate, the outlawing of an account, or the outlawing of a note of hand.

Mr. GORMAN. The statute of limitations runs against a

legal obligation only.

Mr. CAMPBELL. This is a legal obligation, if it is an obligation at all, and it stands upon no higher plane than an open

Mr. GORMAN. Is it not also a moral obligation?

Mr. CAMPBELL. Not at all, any more than a grocery account, nor as much.

Mr. GORMAN. Does not the gentleman believe it ever at any time was a moral obligation?

Mr. CAMPBELL. Not at all. It always was a legal obliga-tion, if it was an obligation at all.

Mr. GORMAN. I understand the gentleman's position now. Mr. CROSSER. It may be both.

Mr. CAMPBELL. Yes; but there is no claim that there is any great moral obligation involved in this. As I understand it, this claim is presented because the statute of limitations does not run against the Government of the United States, and we are here controlling both sides of this case. We are here with all power to-day, as we have had all power for 45 years, with reference to this matter. I say that I regard it as an inopportune time to present this claim. It may have been a legal claim at one time, but certainly it is not a legal claim to-day as Members of this House understand legal claims in the jurisdictions from which they come.

Mr. Chairman, I reserve the remainder of my time.

The CHAIRMAN. The gentleman has consumed 30 minutes. Mr. JOHNSON of Kentucky Mr. Chairman, if the committee will indulge me for a few minutes, I may perhaps, although it will be a difficult task, throw a little more light on the subject than has the gentleman from Iowa [Mr. Prouty], who has just preceded me. In my judgment he has argued this matter sufficiently to any man who came to the subject with an open mind. I knew, however, in advance, that there would be some who would approach the subject whose minds would be made up in favor of the District not paying any kind of debt that

could possibly be evaded.

I take to myself the credit of having discovered this million dollar item. When I stood upon this floor two years ago and called attention to it, the idea that the District had ever gotten any kind of money from the Federal Government and had never returned it was hooted at. The press here, so quick to jump upon anybody and everybody who would have the District of Columbia pay its honest debts, said that all that might be found could be put under one's little finger nail. More than a million dollars has been found, and there is no man to-day who will dispute the fact that the District of Columbia owes

the Federal Government this money.

How did this matter grow into the condition in which we now find it? I will tell you. Under the act of June 11, 1878, it became the duty of the Commissioners of the District of Columbia to estimate and furnish that estimate to the Secretary of the Treasury, and the Secretary of the Treasury to transmit it to Congress, showing what their revenues are expected to be for the next year and also what their debts and expenses are. After the District of Columbia got this money the Commissioners of the District from that day to this have failed to estimate or to invite the attention of Congress to the fact that they owe it. And I say the fact that it has been forgotten and left asleep for these long years rests with the Commissioners of the District. Take your auditors' reports for the District of Columbia back to 1878 and I challenge any man to find in the statements of the auditors that this debt is one of the liabilities of the District of Columbia.

Mr. Chairman, that is not the only item of indebtedness on the part of the District of Columbia to the United States that has been hidden by the auditor of the District of Columbia.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.
Mr. TOWNER. I find in the report that the statement is made on page 3 of the report to the effect that-

the Commissioners of the District of Columbia in its apportionment made provision for the payment of this interest by the District of Columbia in the following words:

"For interest on the District of Columbia 3.65 bonds guaranteed by the United States (act of Congress approved July 31, 1876), 52.7 mills."

The statement is made in the report of the committee that if that amount was collected by the District of Columbia it never, at least, was credited to the United States. Does the gentleman know as a matter of fact whether that was collected by the District of Columbia?

Mr. JOHNSON of Kentucky. I know from the statements of the accountant employed by the District Committee under authority of the House, and I know from the statement of Mr. Hodgson, the expert accountant in the Treasury Department, that that money was collected for the payment of this debt; that it was never used for the payment of this debt, but after-wards was transferred to another account and expended for

another purpose.

Mr. TOWNER. Then, if it be true, that was not only an admission by the Commissioners of the District of Columbia that the District of Columbia did owe the Government this money, but they affirmatively took action for the purpose of collecting this money and did collect the money for the purpose of paying the debt, and then used it for some other purpose.

Mr. JOHNSON of Kentucky. Yes; and they went further than that and failed from that day to this to put in a single auditor's report that they ever got this money or that they ever

have had any transaction whatever with this money.

The commissioners, in making their estimates to the Congress, have from that day to this failed to invite the attention of the Congress to the fact that they had never paid this. They have set out their liabilities, they have set out their assets, but never once have they set out this as a liability. More than that, about the same time, if I recall correctly, in 1878 or 1879, an arrangement was made by which the District of Columbia should put her lunatics in the asylum owned by the Federal Government, commonly known as the St. Elizabeth Hospital, and to pay the same per capita for her patients that it costs the United States to maintain its patients. If I remember the figures correctly, the first year the District of Columbia fell short about \$28,000 in paying for her lunatics, and every year since that time the District of Columbia has fallen short in paying her debt to this asylum for the District lunatics. You can search the auditor's report from that day until this, and you can not find any charge of any of these items as a liability of the District of Columbia. What business concern would stand for a bookkeeping system like that? Yet when this resolution for an hour.

was introduced, and when it was announced upon the floor of this House that this investigation would perhaps begin with the lunatic asylum, what came? They rushed in with a statement that the District of Columbia was then indebted to the Federal Government in the sum of \$719,000, not one cent of which had ever been put in an estimate by the Commissioners of the District of Columbia to the Congress that it might find its way into an appropriation bill and be paid; and before we are through with this, their "winter of discontent," perhaps more items will be found that they owe to the Federal Government and that

they have not paid.

First, they said they did not owe it. That was the great argument. Now, it is limitation. When does limitation commence to run? It begins to run with the maturity of the debt. When is the time fixed for this debt to be paid from which limitation would begin to run? The time of payment is fixed to begin when the District of Columbia has the funds with which to pay. That time has now arrived. It has just been said that the attention of Congress has not been invited to this item, that the attention of Congress has been allowed to sleep. The gentleman from Kansas [Mr. CAMPBELL] says that two years ago he retired from the District Committee, where he had served eight years. Ten years ago the gentleman from Kansas, if he had done his duty between man and man, whether he resided in the District of Columbia or in the States, would have then invited the attention of the Congress to the matter which is now being brought up. Ten years of alleged limitation would have been eliminated there if he had done what his successors upon that committee have sought to do. He refers to some charge that the people of the District of Columbia are not honest. I challenge it; I say that the people of the District of Columbia, the masses of them, are just as good as can be found elsewhere. No charge has been made against the people of the District of Columbia. The people of the District of Columbia know nothing of this great sum of money having been hidden away. A few men in the District of Columbia who, since the passage of the territorial act of February 21, 1871, until very recently have named every officer who handled the accounts of the District, and those officers in making statements of accounts by which Congress is to be guided have kept hidden from them this \$1,003,257.24; and these same accounting officers have concealed from the Congress, to whom they have made reports, the fact that the District of Columbia owes the Federal Government \$719,000 that they had not paid on account of the lunatics of the District of Columbia.

Mr. CAMPBELL. Will the gentleman yield for a question?

Mr. JOHNSON of Kentucky. I do.

Mr. CAMPBELL. This item of alleged indebtedness was not concealed in 1886, was it, eight years after

Mr. JOHNSON of Kentucky. It has been concealed from the moment it was made until it was brought upon the floor of this House two years ago by me.

Mr. CAMPBELL. Is it not true that the Auditor for the Treasury Department had his attention called to it in 1886?

Mr. JOHNSON of Kentucky. It is true.

Mr. CAMPBELL. It was not concealed at that time.

Mr. JOHNSON of Kentucky. But the auditor of the District of Columbia could not compel the Commissioners of the District of Columbia to put this item in their estimates and say to the Congress that it should appropriate for the payment of this, their honest debt.

Mr. CAMPBELL. May I ask if the Committee on Appropriations could not have included an item in the bill without hav-

ing an estimate from the commissioners?

Mr. JOHNSON of Kentucky. The Committee on Appropriations, if they had had the knowledge, could have done it, but they did as the gentleman did on the Committee on the District

of Columbia, and that was nothing.

We return at last, gentlemen, to these facts: This money was gotten. There is no living human being to dispute that fact. It has not been repaid, and there is no man to dispute that. If you can blame past Congresses for not having had it paid, and this Congress does not have it paid, then future Congresses can say that the question was up at this time, and that this Congress did not pay it. Let us now order it to be paid. [Applause.]

The CHAIRMAN. The time of the gentleman from Kentucky [Mr. Johnson] has expired. The Clerk will read the

Mr. TOWNER. Mr. Chairman, is the bill to be read now for amendment?

The CHAIRMAN. Yes; unless the gentleman desires to be heard.

Mr. TOWNER. I should like just a little time. The CHAIRMAN. Very well. The gentleman is recognized

Mr. TOWNER. Mr. Chairman, I think perhaps the form of the discussion may convey a wrong impression to Members the House with regard to the real matter in controversy. It is not sought here to collect a debt due from the District of

Columbia to the United States.

It is not the endeavor of this resolution to put a claim in such a way as that it can be said there is a debt due, and for this reason: There has always existed, there now exist, certain accounting relations between the District of Columbia and the Congress of the United States, if I may so put it. There are always debit items on one side and credit items on the other. As the account now stands, there has been omitted from the credits which are due to the United States the sum that is put in this resolution of over a million dollars. We are now saying that the account should be corrected. We are now claiming that in the statement of the account that sum should be placed to our credit. That is all. It is an assertion on the part of the Government of the United States that this is its claim, and so should be put, and so should be stated.

That it will be paid, of course, follows. But until this present arrangement of payment of the expenses of the Dis-But until this trict of Columbia shall be ended there never will be an account stated, there never will be a debt, as between one member of the partnership and the other member of the partnership. is merely now an assertion on the part of Congress, if this joint resolution shall pass, that there ought to be credited as against the District of Columbia in the account between the District of Columbia and the United States a sum of money to which the United States is entitled for credit in the sum of a million dollars and over. Therefore the question regarding the statute of limitations has nothing whatever to do with the There can be no statute of limitation in a case of that case.

kind.

Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Iowa yield to the gentleman from South Dakota?

Mr. TOWNER. Certainly; I shall be glad to yield to my

Mr. DILLON. Does not the levy made in 1907 clearly recog-

Mr. TOWNER. Certainly; and that strengthens this claim. There was a clear recognition by the Commissioners of the District of the fact that the Government is entitled to this

Mr. DILLON. And does not that levy destroy the theory of concealment on the part of the District of Columbia?

Mr. TOWNER. Well, I think, if I may be pardoned for so saying, it makes but little difference. It ought not to make any

Mr. DILLON. Because the District of Columbia, with knowledge of the fact, made this assessment or made the levy, that shows that it is not concealing anything, so that it seems to me there is a clear recognition of this debt down to June, 1907, on

both sides, practically.

Mr. TOWNER. Well, I think the gentleman is entirely correct about that. But it make no difference, in so far as the legal aspects of the case are concerned, and in so far as the United States Government is concerned, whether affirmatively there was an endeavor to conceal or not, because concealment or an endeavor to conceal has nothing really to do with the merits of the case.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Iowa yield to

the gentleman from Kansas?

Mr. TOWNER. In a moment. The only question now, and the only question we ought to consider, is, Ought we not now to assert and claim and state that our claim in regard to this account is that the District of Columbia does owe to the United States this amount? Or, to put it otherwise and in better form, ought we not now to declare that the United States is entitled to this credit?

Now I will yield to my friend from Kansas.

Mr. CAMPBELL. We have passed by, somewhat, the matter to which I wanted to refer. I merely wanted to say that it would have spoiled the mare's nest of the gentleman from Kentucky [Mr. Johnson] to have stated the fact that this item had not been concealed in some mysterious manner by somebody in the District.

Mr. TOWNER. Even if the gentleman from Kentucky were mistaken about that, this House ought not to let the matter, either affirmatively or negatively, influence its action. If it is right to assert this credit on behalf of the United States, then we ought to do it, and it is our duty to do it. We ought, in justice to the people whom we represent, to assert the claim,

and these matters that are extraneous ought not to influence us

at all in regard to the matter.

It occurs to me that there has been—and there can be no question with regard to the rightfulness of this claim-there has been no attempt to say that it is not well founded. We have been, it is said, sleeping on our rights. There is, or ought have been, it is said, sleeping on our rights. There is, or ought to be, a statute of limitations that bars us, it is asserted, but I think I have shown that there is and that there can be, under these conditions, nothing that ought to prevent our now asserting what is our right, and what ought to have been asserted long ago, that the United States is entitled to this million of dollars and over which has never been credited to it, and that provision ought to be made for an adjustment and payment of

the account. [Applause.]

Mr. PROUTY. Mr. Chairman, I do not know, but I think I have 15 minutes in my own right.

The CHAIRMAN. No; the gentleman's time is exhausted. The gentleman from Kentucky [Mr. Johnson] took the 15 minutes that were left of the gentleman's time.

I aimed to speak in my own right.

Mr. CAMPBELL. Mr. Chairman, I will yield what time the gentleman may require. How much time does the gentleman require?

Mr. PROUTY. I would like 15 minutes.

Mr. CAMPBELL. I will yield to the gentleman 15 minutes. The CHAIRMAN. The gentleman from Iowa [Mr. Prouty] will proceed.

Mr. Chairman, the first point made by the gentleman from Kansas [Mr. CAMPBELL] was that this claim was barred by the statute of limitation, and he referred to what might be the situation if the title in the city of Des Moines rested technically in one of his ancestors when they had not asserted the title for a period of 30 years.

The gentleman is too good a lawyer to ask me that question. Let me ask him one: Suppose the title had never passed from the Federal Government and yet Des Moines had been built upon that ground. Would he go into court and say that the statute of limitations ran against the Federal Government? he would be the laughing stock of the bar and of the court.

Now, there is a good reason for the fact that in all legislation of States and nations the statute of limitations does not It is based upon a very wise principle. run against them. Officers in State and nation change. Now one set will be in One party may overlook and another party and now another. not find a situation. One may be collusive and intentionally overlook it, but it is the established policy of every government that the negligence and willful overlooking of these matters on the part of its agents shall not bar the equities that exist; but where a man owns real estate in his own right and neglects to protect his rights or overlooks them or delays, he is guilty of laches, and will therefore be prevented from re-Every lawyer who ever looked inside of a law book covering. knows that there is that clear, well-defined distinction, and there never could be a better application of it than right here.

It is true that in 1877 the commissioners made a levy. some reason it passed out of sight. This good friend of mine here, Mr. Campbell, vigilant and active, although, as he says, for eight years standing not alone as the Representative the District of Columbia, but as an accredited Representative from the sovereignty of the State of Kansas and representing its people, should have looked into this matter, but he did not. The more than 300 Members of this House never looked into it. They had no occasion to look into it, nothing to call their attention to it, and because some officials overlooked the mat-ter and neglected their duty is that any reason why the great, sovereign Republic should entirely overlook and forget it?

Mr. CAMPBELL. Will the gentleman yield for a suggestion?

Mr. PROUTY. Certainly.

Mr. CAMPBELL. Does my good friend from Iowa make the modest claim that he and a few other members of the District Committee are the first in 40 years who diligently and earnestly advocated honesty upon the part of all the people of the United States, and especially the people of the District of Columbia?

Mr. PROUTY. No; I do not.

Mr. CAMPBELL. Are they the first men in all these 40

years who have known their duty, or who have seen their duty and done it?

Mr. PROUTY. No; I would not claim that; but I would not stand here upon this floor and claim what the gentleman claimed a few minutes ago—that during the eight years that he labored upon that committee he represented the District of Columbia.

Mr. CAMPBELL. I said I worked for the District of Co-

Mr. PROUTY. I took down your words, and I repeat what I said. I stand here as a Representative of the seventh district of Iowa to do justice and fairness to my people between them and the District of Columbia. I think I have at last detected the real cause of this delay, of this apparent overlooking of the rights of the Federal Government. In fact, my friend's speech revealed to me the whole situation. He stood here and pleaded for the widows and orphans of the District of Columbia until I had tears in my eyes and was almost willing to give to the District of Columbia the whole United States if they needed it. But let me remind my friend, as I was compelled to remind myself, that there are more orphans and widows in the United States that have to pay this burden than there are in the District of Columbia to receive its benefit. [Applause.]

Now, all I want is a square deal between the District of Columbia and the United States; and as the gentleman intimated that there were some things that were not fair-though he did not reveal what they were-I will say to him now that if he will come to our committee and show that the United States have ever received a penny that fairly and justly belonged to the District of Columbia or under the laws of Congress, I will be one of the best and strongest champions of the District of Columbia. [Applause.] But/never while I am a Representative will I surrender my right to stand for the whole people of the United States, notwithstanding somebody from the District of Columbia may tickle me under the chin. [Laughter and

(applause.]

The CHAIRMAN. The Clerk will report the resolution for amendment.

The Clerk rend as follows:

Resolved, etc., That the Treasurer of the United States be instructed to transfer the said sum of \$1,003.257.24 upon his books from the District of Columbia to the credit of the United States, and that he take such other and further steps as may be proper and necessary to collect said sum from the District of Columbia for the use and benefit of the Treasury of the United States.

With the following committee amendment:

Strike out all the words just read and insert in lieu thereof the

Strike out all the words just read and insert in lieu thereof the following:

"That the Secretary of the Treasury of the United States, through the accounting officers of the Treasury Department, be, and he is now, authorized and directed to charge to the District of Columbia the sum of \$1,003,257.24 as a debt due the United States from the District of Columbia on account of money advanced by the United States to the District of Columbia with which to pay the interest on the 3.65 bonds of the District of Columbia for the fiscal years of 1877 and 1878; and, in stating the account between the United States and the District of Columbia, the accounting officers of the Treasury Department of the United States and the accounting officers of the District of Columbia shall charge the District of Columbia with said sum and with interest thereon at the rate of 3 per cent per annum from and after the date of the passage of this resolution; and the said sum of \$1,003,257.24, and interest thereon, must be paid to the United States by the District of Columbia derived from privileges and from taxation upon the taxable property in the District of Columbia."

Mr. JOHNSON of Kentucky. I move the adoption of the

Mr. JOHNSON of Kentucky. I move the adoption of the committee amendment.

The committee amendment was agreed to.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move that the resolution as amended be laid aside, to be reported to the House with a favorable recommendation.

The motion was agreed to.

EXPENDITURES OF MONEY RECEIVED ON ACCOUNT OF LIQUOR LICENSES, WASHINGTON MARKET CO., AND FROM OTHER SOURCES.

Mr. JOHNSON of Kentucky. Mr. Chairman, I call up the bill H. R. 9411, relating to expenditure of money received on account of liquor licenses, Washington Market Co., and from other sources.

The Clerk read the bill, as follows:

The Clerk read the bill, as follows:

Be it enacted, etc., That from and after the passage of this act no money collected or received by the District of Columbia on account of any license or concession to manufacture or sell spirituous, vinous, or mait liquors shall be expended in payment of any expense or in discharge of any debt or liability of the District of Columbia in the payment or discharge of which Congress has in any manner whatsoever committed the United States to participate.

Sec. 2. That no money collected or received by the District of Columbia on account of rental paid by the Washington Market Co.; or on account of tolls over the bridge across the Potomac River, which bridge is generally known as the Highway Bridge; or on account of the fish wharf or any other wharf; or on account of any rental or income whatsoever from any real estate, the legal or equitable title to which is in the United States, shall be expended in payment of any expense or in discharge of any debt or liability of the District of Columbia in the payment or discharge of which Congress has in any manner whatsoever committed the United States to participate.

Sec. 3. That no clerk or officer, either of the District of Columbia or of the United States, shall hereafter, in any statement of financial conditions or accounts, or in any estimate of revenues or of appropriations for the District of Columbia, furnished to the Secretary of the Treasury or made to Congress, treat any money collected or received by the District of Columbia in the manner set out and referred to in sections 1 or 2 of this act, as a revenue available or to be available with which to pay

any expense, debt, or liability of the District of Columbia, to the payment of which or any part thereof Congress has in any manner whatsoever committed the United States.

SEC. 4. That this act shall take effect and be in force from and after its passage.

With the following committee amendment:

Page 2, line 5, after the word "States," insert the following: "or in which the United States has an estate of tenancy or for years, or an estate in reversion or remainder."

The CHAIRMAN. The question is on the committee amend-

The committee amendment was agreed to.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move that the bill as amended be laid aside with a favorable recommenda-

The motion was agreed to.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. RAKER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration House joint resolution 107, directing the Treasurer of the United States to transfer \$1,003,257.24 upon his books from the District of Columbia to the credit of the United States, and had directed him to report the same back with an amendment, with the recommendation that the amendment be agreed to and that the resolution as amended do pass.

He further reported that the committee had had under consideration the bill H. R. 9411, relating to the expenditure of money received on account of liquor licenses, Washington Market Co., and from other sources, and had directed him to report the same back with an amendment, with the recommendation that the amendment be agreed to and that the bill as amended

do pass.

The SPEAKER. The Chairman of the Committee of the Whole House on the state of the Union reports that the committee has had under consideration House joint resolution 107, and reports the same back with an amendment, with the recommendation that the amendment be agreed to and the bill as amended do pass. Also that the Committee of the Whole House on the state of the Union has had under consideration the bill H. R. 9411 and has directed him to report the same back with ap amendment, with the recommendation that the amendment be agreed to and the bill as amended do pass. The first question is on the amendment to House joint resolution 107.

The amendment was agreed to.

The House joint resolution as amended was ordered to be engrossed and read a third time, was read the third time, and passed.

Mr. GARDNER. Mr. Speaker, I suggest to the gentleman from Kentucky that an amendment should be made to the title of the bill, made necessary by the amendment, so as to direct the Secretary of the Treasury to make the change instead of the Treasurer of the United States.

On motion of Mr. Johnson of Kentucky, a motion to reconsider the vote whereby the joint resolution was passed was laid on the table.

The SPEAKER. Without objection, the change in the title will be made and the Clerk will report the title as amended.

The Clerk read as follows:

Joint resolution directing the Secretary of the Treasury of the United States to transfer \$1,003,257.24 upon his books from the District of Columbia to the credit of the United States.

The SPEAKER. The question now is on the amendment to the bill H. R. 9411, reported favorably by the Committee of the Whole House on the state of the Union,

The question was taken, and the amendment was agreed to. The SPEAKER. The question now is on the engrossment

and third reading of the bill. The bill was ordered to be engrossed and read a third time,

was read the third time, and passed.
On motion of Mr. Johnson of Kentucky, a motion to reconsider the vote whereby the bill was passed was laid on the table.

# LEAVE OF ABSENCE,

By unanimous consent, leave of absence was granted as

To Mr. Brown of West Virginia, indefinitely, on account of

To Mr. ALEXANDER, indefinitely, because of his work on the commission of over-sea accidents, now in session in London, England. To Mr. Taggart, indefinitely, on account of illness,

INTERSTATE SHIPMENT OF COLD-STORAGE PRODUCTS.

The SPEAKER. Under a special order of the House made last Friday, the gentleman from Tennessee [Mr. McKellar] is recognized for one hour.

Mr. McKELLAR. Mr. Speaker, I will ask the Clerk to read the bill, which is short, before I undertake to discuss it.

The Clerk read as follows:

A bill (H. R. 9987) to prohibit interstate shipments or transportation of certain food products; to define and to prohibit transportation and sale of adulterated or misbranded food products; to regulate traffic therein; to define and regulate cold storage; to regulate dealing in cold-storage food products; and to fix penalties for violation, and for other purposes.

other purposes.

Be it enacted, etc., That all shipments from any point in one State or Territory to any point in another State or Territory within the United States of adulterated or misbranded food products, as defined in this act and in the regulations made under the authority of this act, are hereby declared unlawful and are prohibited.

SEC. 2. That any of the hereinafter-named articles of food which have been held in cold storage for more than the periods hereinafter designated, to wit:

Beef, or the manufactures or products thereof, seven months.
Veal, or the manufactures or products thereof, four months.
Pork, or the manufactures or products thereof, four months.
Sheep or goats, or the manufactures or products thereof, four months.
Poultry and game, or the manufactures or products thereof, three months.
Poultry and game, or the manufactures or products thereof, three months.
Fish, or the manufactures or products thereof, two months.

Sheep or goats, or the manufactures or products thereof, three months. Poultry and game, or the manufactures or products thereof, three months.

Fish, or the manufactures or products thereof, three months. Eggs, or the manufactures or products thereof, three months: Provided, however, That eggs held in cold storage not less than three months or more than seven months may not be classed as adulterated if they are upon inspection at the end of the three-month period sound and wholesome and are stamped or labeled as follows: "Second-period cold-storage eggs," such stamp or label to be on each container from which said eggs are sold, and shall be in plain view of the purchaser, or, on demand, produced for inspection by the purchaser.

Butter, or the manufactures or products thereof, three months.

Any other articles used for human food, which having been held in cold storage for any period of time and has been removed therefrom and returned again to cold storage, without reference to the time the same has been held in cold storage, without reference to the time the same has been held in cold storage, without reference to the time the same has been held in cold storage, without reference to the time the same has been held in cold storage, without reference to the time the same has been held in cold storage for the periods stated shall be deemed to be adulterated within the meaning of this act.

SEC. 3. That if any article of food which has been held in cold storage, or the package containing it, or from which it is sold, shall fail to bear a label plainly and correctly stating the date of production, killing, packing, or manufacturing, and the period of time during which the article has been held in cold storage, shall be deemed to be misbranded within the meaning of this act.

SEC. 4. That no adulterated or misbranded food products as adove designated shall be broken and the contents sold by items, then the seller shall, at the request of the purchaser, correctly state the information above required to said item be

perature is artificially kept at 40° F., or below, except when the products are actually in transit and have not previous to such transit been in cold storage.

Sec. 7. That any of the hereinbefore-named articles which may have been frozen in cold storage shall not be sold or offered for sale except in a frozen condition, and any such products which having been once frozen has thereafter been thawed, inflated, injected, or in any other way manipulated so as to alter its appearance and make it resemble an unfrozen product shall be deemed to be adulterated.

Sec. 8. That no food products coming within the provisions of this act and enumerated above shall be placed in cold storage if diseased in any way, or if in unsound condition, or if not caught, handled, or slaughtered in a sanitary manner, or if not properly cooled as provided by the regulations herein provided to be made for the sanitary preparation of such products for storage; and any product not stored in conformity to this act and the regulations made in pursuance to this act shall be deemed to be adulterated and misbranded and subject the offender to all the penalties provided therefor.

Sec. 9. That the President of the United States be, and he is hereby, empowered and authorized to make, or cause to be made, such rules and regulations in conformity with the provisions of this act for the inspection and regulation of articles of food coming within the provisions of this act and in aid of its enforcement as shall be necessary from time to time to insure the full compliance therewith.

Sec. 10. That any person, persons, association of persons, partnerships, corporations, or their agents, guilty of misbranding or adulterating any food product or of the violation of any provision of this act shall, upon conviction therefor, be subject to a fine of not less than \$500 or more than \$5,000, and may also be sentenced to imprisonment for a period of not less than six months or more than 10 years.

Sec. 11. That any agreement, express or implied, verbal or writte

products, or engaged in the cold-storage business, whether as owner of such cold-storage plants and engaged in dealing in said food products or whether as owners of said storage plants for hire, when such products are the subject of interstate commerce or are intended for interstate commerce, by which agreement or understanding any of the abovementioned and set forth articles of food kept in cold storage are to be stored for a longer or shorter period, or are to be sold or withheld from sale, in whole or in part, for the purpose of affecting the purchase price or selling price of such articles of food, is hereby prohibited and declared unlawful, and upon conviction shall subject the offender to a fine of not less than one year or more than 10 years.

Sec. 12. That any agreement or direction, express or implied, by or upon the part of any person, persons, partnerships, firms, corporations, or association of persons or corporations engaged in buying or selling said cold-storage products or engaged in the cold-storage business, whether storing his, its, or their own merchandise, or storing for hire to a committee, board of trade, organization, or association, or individual, or the so-called "cornering" of the market of such foodstuffs, when such foodstuffs are or are intended to become the subject of interstate commerce, by which agreement or direction such person, persons, or association, committee, or individual is or are given the right, expressly or impliedly, actually or inferentially, to sell such cold-storage products or withhold the same from sale, or to fix the purchasing price or the selling price of such cold-storage products, or in any other manner interfere with the ordinary rules of competition in trade as to such articles, is hereby prohibited and declared unlawful, and upon conviction therefor shall subject the offender to a fine of not less than \$1,000 or more than \$10,000 and to imprisonment for a gent's, secret or open, by and between two or more persons, partnerships, firms, corporations, or as

imprisoned for not less than three months nor more than six months.

SEC. 15. That all packers of beef, veal, pork, sheep, lamb, game, poultry, fresh fish, eggs, and butter using cold storage in comection with their business, and all cold-storage houses, whether those used for hire only or those used as an adjunct of the principal business, coming within the provisions of this act must furnish to the representatives of the United States a full, true, and accurate statement of goods on hand, receipts, and deliveries each day, and any such cold-storage houses failing or refusing to make such report shall, upon conviction, be fined not less than \$100 or more than \$1,000 for each offense, and may also be imprisoned for a term of not exceeding five years.

Mr. AUSCUN. Mr. Spocker, in view of the importance of

Mr. AUSTIN. Mr. Speaker, in view of the importance of this bill and the contemplated legislation, in which the people of this country are vitally interested, I am sure that a majority of the Members of the House would like to hear it discussed. therefore make the point of no quorum.

The SPEAKER pro tempore (Mr. Cox). The gentleman from Tennessee makes the point of order that there is no quorum

resent. The Chair will count.

Mr. McKELLAR. Mr. Speaker, I do not care to inflict anything upon the House particularly, and I do hope that the gentleman will withdraw his point of order.

Mr. AUSTIN. Mr. Speaker, I withdraw the point of order. The SPEAKER pro tempore. The gentleman from Tennessee withdraws the point of order, and his colleague will proceed.

Mr. McKELLAR. Mr. Speaker, so much has been written and so much has been said in the last few years about the high cost of living that I approach the subject with some degree of diffidence. So many elements enter into the cost of living, so widely diversified are those things upon which the American people feed, that it renders the whole subject very complex and very intricate. I do not think that any one measure will correct the evil system which now confronts us or altogether prove a panacea for the conditions that everybody realizes are bad. Therefore the remedy that I suggest, I do not claim for it that it is an absolute and certain cure, but I do believe it will more largely correct the present bad system than any other plan that has been suggested.

### METHOD OF PROCEDURE.

I might say at the outset I had an idea of asking for a special committee to be appointed by the Speaker of the House to examine into all the questions relating to cold storage, but after finding that there had already been extensive investiga-tions and hearings by a Senate committee on the same subject, and finding a large amount of printed literature and statistics on the subject, I concluded that it would probably be a great deal better to get the distinguished chairman of the Interstate and Foreign Commerce Committee to appoint a subcommittee of that committee to take this matter up. In this way there will practically be no cost attending this investigation, and it will probably get very much prompter action.

An examination of the Senate committee's report, and of the

hearings upon which that report is based, will probably be all that is needed. I want here and now to express my thanks to the distinguished chairman of the Interstate and Foreign Commerce Committee for promptly appointing the subcommittee to hear this matter. He has appointed a splendid committee, and I am sure a bill along the lines of my bill will be reported to this House without cost or expense to the American people and without unnecessary delay.

#### HISTORY OF COLD-STORAGE LEGISLATION.

Much has been said lately as to this plan. Many have spoken of it and written of it as if it was entirely an original idea. This is not correct. It will be interesting to the House to know that this question has already been thoroughly thrashed out before a special committee of the Senate. This was in 1910 and 1911. The cold-storage measure before the District Committee in this House applied only to the District, as I understand. One of the bills introduced in the Senate was introduced by Senator Lodge, of Massachusetts. His bill limited the time of cold storage to 12 months. My first bill limited the time of cold storage to 3 months. The Senate committee, of which the late Senator Heyburn was chairman, after exhaustive hearings, prepared a bill, many of the excellent features of which I have incorporated in my bill. This bill was unanimously reported to the Senate, but, strange to say, it was reported on March 3, 1911, and died a natural death the next day, since which time it seems to have been lost in the oblivion in which Senator Heyburn dropped it. It might be inferred that because of its having been filed just at the close of the session of Congress that probably it was not intended that anything should be done with the bill. In frankness, it is proper to say I can not join in this view, because of the splendid examination into the facts, with one notable exception, which was made, and Senator Heyburn most certainly made an excellent report on the bill. He has since died, which probably accounts for the inaction on the part of the Senate. Nothing has since been done along this line of any importance in Congress; though a number of bills have been introduced, none of them seems, however, to have been pushed.

In the report of the Senate committee the whole question of the effect of cold storage on public health and upon the effect on prices of food was gone into thoroughly, each item going into cold storage was considered, and the committee unanimously reported in favor of the passage of the bill.

### STATE COLD-STORAGE LAWS.

It will be interesting also for the House to know that a number of States already have cold-storage laws. In March, 1911, the State of California passed a law making it a misdemeanor for cold-storage butter or eggs to be sold as or for fresh butter or eggs. Later, on the same State enacted a law requiring all eggs and butter that had been kept in cold storage longer than three months to be labeled "Cold-storage butter or eggs.

The next State to pass a cold-storage law was the State of Delaware. This was passed in April, 1911. The Delaware act requires cold-storage products, with the exception of fruits and fish, to be branded with labels. It also provides that any kind of food can not be kept in cold storage longer than six months without the consent of the board of health. It requires reports of food in cold storage and gives the board of health jurisdiction to make rules and regulations concerning such food,

In 1907 the State of Kansas passed a law against refrigerated undrawn poultry. I am told, however, this law has been made nugatory by reason of outside concerns shipping it into Kansas as interstate commerce.

The next State to pass a cold-storage law was Indiana in March, 1911. This law required the goods to be marked and stamped. State board of health was given jurisdiction to regulate the business under the act.

In 1911 the State of New Jersey passed a cold-storage act requiring stamping and branding of food placed in cold storage, the date of placing of food in cold storage, and making it unlawful to keep any such food products in cold storage for a longer period than 10 months, but allowed the State board of health to say what should be done with this food after that time. This law also provided that food once placed in cold storage could not be taken out and then put back.

The State of New York, in June, 1911, also passed a coldstorage law requiring cold-storage food to be marked; requiring it kept in cold storage only 10 months; requiring reports from warehouses; regulating transfers from one warehouse to another; and prohibiting the sale of food kept in cold storage without representing said facts.

Since that time Massachusetts has passed a cold-storage law containing about the same provisions. Pennsylvania has lately been added to the list. The time limit in Pennsylvania is eight months.

The cold-storage people have had much to say about the Canadian act, by which the Government of Canada has undertaken to encourage cold storage by granting a subsidy to cold-storage warehouses. I do not know what the conditions are in Canada in reference to this, but I noticed in the papers recently, when the prime minister of Canada—Mr. Borden—was here, he said they were suffering in Canada from the same conditions of high prices, and seemed to think, from the newspaper reports, that cold storage might be responsible in some degree for it.

Bills regulating cold storage have been offered in the Legislatures of Colorado, Illinois, Michigan, Missouri, New Hampshire, and Virginia, but have not been passed. The District of Columbia also has a cold-storage law.

It will thus be seen that the cold-storage question is already a live issue in many of the States. However, my opinion is that up to date the cold-storage people have been able to really write the laws in the various States, as none of them are very regulating. No doubt they will soon be here, trying to modify or defeat this bill.

COLD STORAGE.

I want to say at the outset that in no possible sense am I opposed to cold storage, nor is it the purpose of this bill to hamper or interfere with any legitimate or proper use of cold storage. Any man with a thimble full of brains must know that it is one of the most important of modern discoveries. It was first brought into use about 40 years ago, or a little longer.

The discoverer or founder of it seems to have been a man by the name of Charles Tellier, who equipped the first cargo of frozen meats shipped across the ocean in vessels having coldstorage compartments. Mr. Tellier died a few days ago in poverty. Since that date the business has grown with gigantic strides, until now the value of foodstuffs going into cold storage annually amounts, probably, to the enormous sum of between \$2,500,000,000 and \$3,000,000,000, according to the testimony of Victor H. Becker, of Chicago, Ill., as shown on pages 181 and 182 of the Senate hearings of 1910 and 1911.

VALUE OF COLD STORAGE.

The value of cold storage honestly conducted and intelligently handled can hardly be overestimated. Take eggs and fruits, for example. About one-half of the year we have them in the greatest plenty; in the other half we have scarcely any at all. By means of cold storage these articles can be kept and the consumer furnished with them at all times of the season. In this way the available stock of food supply is greater. There is a natural economy in thus taking care of what would otherwise go to waste. So that the conclusion is inevitable that, if used properly and if such perishable food products are put in cold storage scientifically, under sanitary regulations, and regulated by the strong arm of the law until they come to the consumer, in this way cold storage is a great boon to mankind, not injurious to his health or victimizing to his pocketbook.

But the difficulty comes from the greed of men for more money.

Mr. TOWNER. Mr. Chairman, will the gentleman yield?

Mr. McKELLAR. Certainly.

Mr. TOWNER. It may be that the gentleman will reach the matter to which I wish to refer, and if so, of course it can be referred to in proper order in his address, but will the continuous be kind country to give us the deep or the reasons. gentleman be kind enough to give us the data or the reasons upon which he fixed these various dates, for instance, beef at

seven months, and so forth. Mr. McKELLAR. With a very great deal of pleasure. In 1910 and 1911 this special committee consisting of Senator Heyburn, as chairman, and Senator Frazier, of Tennessee, and a number of other gentlemen, had extended hearings, which are to be found in a book of 300 pages, in which proof was taken from various parts of the country. Witnesses were introduced here and sworn. Dr. Harvey W. Wiley was a noted witness in those hearings. Many experts from the Department of Agriculture were summoned as witnesses and testified—expert storage men. They tried to get the packers, but could not get them, as I will explain hereafter. The matter was painstakingly and laboriously gone into, most intelligently gone into, and upon that examination a bill was reported to the Senate, to which my bill largely conforms in the matter of time. I will come to that, as the gentleman says, a little more specifically hereafter. That bill was unanimously reported, but the session died the next day, and later on, as the gentleman knows, Senator Heyburn died, and the matter was lost in oblivion after that time.

Mr. TOWNER. Mr. Speaker, I hope the gentleman will understand that I am entirely in sympathy with his effort to secure this legislation. Before he leaves that branch of the subject, it may be said then that the provisions of the bill with regard to the times of these various products, is the result on

his part of careful investigation of these hearings.

Mr. McKELLAR. The most accurate investigation that I have been capable of giving.

Mr. TOWNER. And in the gentleman's judgment they are entirely defensible upon the ground both of justice to the consumer and of the persons who are carrying the products.

Mr. McKELLAR. They can be defended on three grounds first, justice to the producer; second, justice to the consumer; and third, a reasonable compensation to the middleman who conducts the business; but I want to say right here and now that the most drastic kind of regulations are made in so far as the speculator and the gambler in food products are con-

Mr. TOWNER. With entire justice that may be done. Then it may be said that there is now available sufficient data of facts on which to base a reasonable conclusion with regard to the time the different products may be kept, which would be

such as would do justice to all parties interested. Mr. McKELLAR. Mr. Speaker, I am glad the gentleman has brought this matter up. When I first started out with this bill, as I said before, my idea was to get a special investigating committee, but when I found not only these hearings but the hearings in these various State legislatures, all of which are printed and all of which can be secured and laid before the committee, and knowing that we had a perfectly fair Committee on Interstate Commerce, and knowing that the distinguished chairman of that great committee, my friend Mr. Adamson, would appoint a fair and disinterested subcommittee to hear the matter, and believing it could be done without cost to the American people, I came to the conclusion that there was no necessity for having a special committee, but that this whole matter could be referred to the Interstate Commerce Committee and a subcommittee to investigate practically without cost to the American people and without delay. For these reasons I have taken that course. Not only have we these hearings, but we have the hearings that were had before the various State legislatures, and anyone can read them and upon them have the expert testimony and the actual facts upon which to fix the time limits, and every other limitation or restriction in the bill which I have prepared.

Now, gentlemen, I want to say right here I am not opposed to cold storage. Why, it is one of the greatest discoveries that is known to man. That is not the idea of this bill, and it is not in opposition to cold storage. It is not in opposition to any legitimate enterprise of cold storage. It is intended to prevent the speculator and the gambler, the man or corporation who would corner the foodstuffs of this country and hold them in cold storage for the purpose of raising prices to the American consumer-it is against those it is aimed and against those who indiscriminately put these food products into cold storage at the time when they are unsound and unwholesome, because the wholesomeness and purity of foodstuffs placed in cold storage depends upon the condition at the time it is put in cold storage. even more than at the time it is taken out of cold storage, and there ought to Le regulation of the sysem.

Mr. TOWNSEND. Will the gentleman yield? Mr. McKELLAR. In one moment. So say these experts over at the Department of Agriculture, who have taken it up time and again and have tried to have regulation of putting foodstuffs in cold storage and taking it out, so that the consumer might have it pure. Now I yield to the gentleman.

In referring to the hearings, has the gen-Mr. TOWNSEND. tleman looked over the hearings before the committee of the New Jersey State Legislature in the preparation of a bill regulating cold storage?

Mr. McKELLAR. Only casually; it has not been examined with that care with which it ought to be examined. To what part of it does the gentleman refer?

Mr. TOWNSEND. I want to say, if the gentleman will permit me at this moment, that the bill of the New Jersey State Legislature, passed, I think, in 1911-

Mr. McKELLAR. 1911 is right. Mr. TOWNSEND. That bill was submitted first to Dr. Wiley, who suggested some minor changes on this very point to which the gentleman referred and the condition of food products when they are placed in it is carefully covered, and under Dr. Wiley's suggestion the length of time is regulated with great care.

Mr. McKELLAR. I want to thank the gentleman and say to him and to the House that the New Jersey regulation is the best one that has come within my observation, as I now recall. Mr. TOWNER. I beg the gentleman's pardon, but may I

make an inquiry?

Mr. McKELLAR. I will yield to the gentleman.

Mr. TOWNER. I was going to ask just how does the time limit in the bill with regard to these foods compare with that of New Jersey?

Mr. McKELLAR. The time limit in New Jersey is fixed at 10 months, but after a certain period it is put under the board of health to determine whether they are in a good condition or not, and it is virtually placed under the restrictions of the board of health.

Mr. TOWNSEND. Subject to inspection at any time; in fact, when they are entered as to condition and subject to inspection at any time and there is a varying time in regard to different classes of food products. Different food products are permitted to remain only different lengths of time, beef perhaps longer than poultry and longer than eggs, and so forth.

Mr. McKELLAR. It is along the same line as this bill. Mr. TOWNSEND. Very much so.

McKELLAR. If the gentleman will wait just a little until I get through-

Mr. PLATT. It is all a matter of health.

Mr. McKELLAR. Yes; it quite generally affects the health of the people. This bill really resolves itself into a question of public health and the effect of cold storage on prices. First, I want to submit a few views on the question of health.

TWO QUESTIONS INVOLVED IN COLD STORAGE,

The two questions involved in the cold-storage proposition are. first, its effect upon the public health, and, second, its effect upon the price of products thus put in cold storage.

INFLUENCE OF COLD STORAGE ON PUBLIC HEALTH,

Articles of perishable foodstuffs, which have been properly prepared for cold storage while in a sound and wholesome condition, can be taken out and used as wholesome and nutritious food for a certain length of time, which time varies with the different food products, as will hereafter be shown. Instead of being a menace to public health, if properly prepared and properly stored it is, indeed, a great agency for the conservation of healthful food products. It enlarges and diversifies the food supply of the people. Its value in large cities is of the utmost

The Hon. James Wilson, former Secretary of Agriculture, says

It is a great blessing to be able to put meats, vegetables, and fruits into cold storage, where they will keep. There is no doubt about that, Dr. Harvey H. Wiley, former Chief of the Bureau of Chemistry, takes a like view. So also is the view of Prof. Sedgwick. of the Massachusetts Institute of Technology, one of the greatest experts on the subject of health. Dr. Sedgwick says:

So far as I am aware, there is no evidence whatever that cold storage is in any way prejudicial to the public health. On the contrary, it is one of the greatest aids to the public health in that it makes food more accessible and more abundant, and thus enables people to keep up their strength and to avoid such diseases as scurvy, from which the human race formerly suffered so intolerably.

REAL TROUBLE ON QUESTION OF HEALTH.

The real trouble on the question of health is that greedy speculators have obtained control of the cold-storage business. Again, using the egg product as an example, large concerns in the spring of the year divide up territory in which to send their agents to buy eggs at prices that are fixed by their principals themselves. These agents go into every egg-producing center and buy all kinds and conditions of eggs. They send these to the large centers of population, principally Chicago and New York and other large cities, and there, practically without examination, they are dumped into cold storage. They are kept for such periods as meet the wishes of their owners, when they are put on the market, principally as fresh eggs, with the result that the people are furnished all kinds and conditions of eggs, some wholesome, some unwholesome. The same is probably, to a greater extent of poultry and meats, game and fish,

LACK OF PREPARATION A MENACE TO PUBLIC HEALTH.

An illustration of what I say is shown in the researches of Dr. Mary E. Pennington, an expert in the Department of Agriculture, and probably the most gifted person in this whole subject of cold storage, in the case of poultry. After exhaustive examinations and long study and the application of scientific methods in the handling of cold-storage poultry, Dr. Pennington says that-

In order to have wholesome and nutritious cold-storage poultry the following is essential; First, the bird should be killed and bled properly—and this means that the principal veins in the neck must be severed and the fowl bled completely. Second, that in removing the feathers the bird should be dry picked and not scalded. Scalding injures the skin and diminishes the keeping qualities. Third, the bird should be dry cooled; that is, the animal heat should be taken from the bird by being chilled in the open air, rather than being put in water or ice before being placed in cold storage. Fourth, the bird should be packed air tight. Fifth, when it is removed it should be dry thawed in cool air and not scaked in water.

It is needless to say none of these conditions are complied with among packers and storage men. They do not cut the head off, because they offer the bird for sale as fresh fowl, and they leave the head on, and they are afterwards prepared so that the purchaser may be fooled into believing that it is a fresh fowl. In this way the bird is not properly bled. In the next place, it is not dry picked, because it would take too much time to pick it. They are put in hot water, so that the feathers can be taken off that much faster. In the next place, they are not put in cold air to take the animal heat out, because that takes too long, but they are put in artificially cooled rooms, because this could be done faster and at less cost. They are not kept air-tight, because that would take too much trouble and expense. Lastly, they are thawed not in the air but in water, for several reasons. In the first place, it is cheaper and quicker, and, then, the water is supposed to, and probably does, cause the fowl to look better for a short time, more like the fresh fowl, and is made somewhat heavier. They are often thawed in dirty water, also, as I am reliably informed and as Dr. Pennington intimates. For all of these reasons it is absolutely essential that a national law should be passed providing for the effective regulation of the manner in which the cold-storage products should be prepared for cold storage, handled in cold storage, and taken out of cold storage.

#### DRAWN OR UNDRAWN POULTRY.

A great question has arisen as to whether it is better to store fowl and game in an undrawn condition or in a drawn condition. One of the States, the State of Kansas, has passed a law against putting undrawn poultry in cold storage. On the other hand, a large number of experts, in so far as poultry is concerned, contend it keeps better in an undrawn condition, though they nearly all admit that unless the poultry is starved for two or three days before killing the fecal matter in the intestines always gives an unpleasant flavor to the meat. I myself believe that it should only be allowed to be stored in a drawn condition. The same holds true of fish, but this is a matter that can be fixed by the regulations provided for in the bill which I have introduced.

It is proper to say that practically all the poultry and all the fish are now put in cold storage in an undrawn condition. Practically all the experts agree, however, that game should be drawn. Experiments show there is a difference between game and poultry in this regard, perhaps on account of the method of

THE TIME IN WHICH COLD-STORAGE PRODUCTS SHOULD BE KEPT.

The time in which cold-storage products can be kept in cold storage without deterioration or loss of wholesomeness is different for different articles of food. In my bill I have fixed the periods of time which, in my judgment, is in accord with the result of experiments and the opinion of experts. Dr. Wiley has made some most interesting experiments in the case of eggs. He rented a space down at Center Market for that purpose. course he got the best fresh eggs, and the storage was scientifically done. He got a jury to eat the eggs at the end of three months and also eat fresh eggs at the same time, and compared the two. At the end of three months the jury, as a whole, was unable to determine which were fresh and which were cold storage. At the end of six months a majority of the jury could always tell. At the end of nine months none of them would miss it, and Dr. Wiley was of the opinion that nine-months period was the limit. It must be remembered, though, Dr. Wiley operated under unusual conditions, and I believe from his experiments and from the testimony on the subject that six or seven months at the outside is the last limit for cold-storage eggs, and after three months should be marked "Second period cold-storage eggs," for the protection of the consumer. Dr. Pennington, as said before, had made most careful experiments of like nature with poultry, and finds about the same result.

If these are the facts, and they can not be disputed, why should we not follow the New Jersey law and the laws of other States on that subject? Why should we not follow the recommendations of the Department of Agriculture? Why should we not follow the dictates of what is right and put restrictions and regulations upon the manner in which this great food product and the other various food products are kept in cold storage for the consuming public? Do we not owe it to them? If we do not owe it to ourselves, do we not owe it to the young of our country that they have wholesome food? Ninety-five per cent of the food goes into cold storage—

Mr. MAPES. Will the gentleman yield right there?

Mr. McKELLAR I will.

Mr. MAPES. Have you figures to show how much of that is handled in interstate-commerce shipments?

Mr. McKELLAR. A great part of it.

I wish to stop right here to tell the Members of the House a published in New York City, has sent me a statement. He is thing that struck me very forcibly. It was amazing to me to opposed to this bill. He sent me a statement, however, in which find that the greater portion of this poultry was placed in cold be says that about 30 per cent of the eggs of this country are

storage in an undrawn condition. There are experts who say it is better that it should be so, but they all agree there is some slight taste that arise from that fact. The State of Kansas by law prohibits it; but the law, as I stated before, has been made nugatory.

Now, as to game, the experts all agree that it should be put in cold storage in an undrawn condition. That is because of the lack of bleeding, and because the game is shot, and because, also, the bird is usually killed when its craw is full.

Mr. SLOAN. The gentleman says there is a taste. Is it an improvement or otherwise? The gentleman said there was a taste if the game was left there in an undrawn condition.

Mr. McKELLAR. It is quite a detriment, in my view. I think it is very evident to a great many people.

Now, I want to call the attention of the House to the remarkable facts deduced by the investigation. I never dreamed that the cold-storage business was such an immense business as it appears to be. There were then, in 1910, 3,016,000,000 of food products put up annually in cold storage.

Mr. TOWNER. Pounds?

Mr. McKELLAR. No; dollars in value. Meats led all of these, with \$1,500,000,000; and eggs came next, with \$45,000,000; and then various meats and other products amounting to the enormous sum of \$3,016,000,000.

THE SENATE EXAMINATIONS.

As I have said before, there were exhaustive examinations made in this cold-storage question by a committee of the Senate to which I now wish to refer.

Mr. Becker, who was examined by Senator Heyburn, gives testimony that upholds the bill as drawn by me. He had been 36 years in the business, in all branches of refrigeration. He testified that the cold-storage interests of the country have at all times, and they do now, court the fullest investigation and the closest scrutiny by expert legislative, commercial, and scientific authorities into the methods and effects of their business. (See hearings, p. 178.)

He further announced "that foods should be safely guarded against speculative influences" (p. 179). He was opposed to the Lodge bill because it proposed a limit to the period of storage for perishable food indiscriminately and because its provisions imposed costly restrictions (pp. 178, 179, and 180).

It will be noticed that this bill has followed the suggestions

It will be noticed that this bill has followed the suggestions of Mr. Becker. He further testified that there were over one thousand million of dollars invested in refrigerating plants of all kinds (p. 182). He further testified that only about 5 per cent of the total egg production was put in cold storage. That is to say, about 3,000,000 cases of 30 dozen each (pp. 182 and 183).

The figures as to the principal products going into cold stor-

age are in detail as follows:	
Meats chilled or preserved by cold by packers	\$1,500,000,000
Brewery products refrigerated	325, 000, 000
Dairy products in cold storage	30, 000, 000
Fish frozen or in cold storage	30, 000, 000
Eggs placed in cold storage	21, 000, 000
Poultry frozen or in cold storage	45, 000, 000
Apples placed in cold storage	15, 000, 000
Other fruits and vegetables handled under refrigera-	40,000,000
Ice cream and ices	45, 000, 000
Furs and fabrics held in cold storage	60, 000, 000
Ice, natural and manufactured	60, 000, 000
Goods stored in chilled rooms of produce merchants, wholesale meat and provision dealers, etc. (esti-	250, 000, 000
mated)	230, 000, 000
refineries, powder works, chemical works, photo- graphic plate works, etc. (estimated)	250, 000, 000
m-4-T	2 016 000 000

Meats head the list, at \$1,500,000,000 yearly; poultry comes next, with \$45,000,000. (See p. 184.)

Mr. Becker further says that there was an association of warehouses comprising 301 cold-storage warehouses.

Mr. SLOAN. Mr. Chairman, may I ask the gentleman a question?

The SPEAKER pro tempore. Does the gentleman yield?

Mr. McKELLAR. Yes.

Mr. SLOAN. Has the gentleman figured out what difference it would make to the producers of this country in the matter of the probable price they would obtain for these products that they sell largely to these men and to people who enter those products in cold storage?

Mr. McKellar. Yes, I have; and while I would rather come to it in another place, yet I will come to it right now. Take eggs, for example. The editor of the Produce News, published in New York City, has sent me a statement. He is opposed to this bill. He sent me a statement, however, in which he says that about 30 per cent of the eggs of this country are

bought up by the meat packers at an average price of 63 and 10 cents a dozen. They are sold on an average from 25 cents to 30 cents a dozen. I think that this bill would have a very favorable effect upon the producers of the country. And that is not all.

Mr. CAMPBELL. Mr. Chairman, will the gentleman yield? Mr. McKELLAR. In just one moment. My understanding is that the way they manage it now is to divide up the eggproducing territory of the United States and have agents who fix the price to the producer, and the producer can sell only at Take, for instance, the east Tennessee district, that price. which is a large poultry and egg-producing district. The packer and the egg gambler-because we have them under that designation now in this country-send their agents through the country and set the price, and nobody changes the price to the producer or consumer or anybody else. The same person or combination who fixes the price to the consumer also fixes it to the producer, and that is what this bill aims to prevent.

Mr. CAMPBELL. Is there an egg zone in Tennessee where

eggs can be purchased for 6 cents a dozen?

Mr. McKELLAR. Oh, no.

Mr. CAMPBELL. Then, where do these packers get their eggs at that price?

Mr. McKELLAR. Throughout the United States.

Mr. CAMPBELL. For 6 cents a dozen?

Mr. McKELLAR. So Mr. Preston writes me, that the average price paid is from 6 to 10 cents a dozen.

Mr. CAMPBELL. He must have another guess coming. Mr. McKELLAR. I am not guessisng about it. I am using the statistics of one of the greatest produce newspapers in

this country, published at the market place that is the greatest of any, and that is in New York City.

Now, I want to say a word or two about this Senate exami-There was something peculiar about these hearings that were had before the Senate committee. By the way, there is an association of cold-storage men whose membership amounted in 1910 to 301. According to the testimony of Mr. Becker, the cold-storage men throughout the country are banded together in an association. The packers are banded together, as we all know. Now, when they had these hearings the cold-storage men all came up and testified—a great many of them, though not all of them. They testified in their own interest. But here is what happened in relation to the packers: Senator Heyburn and his committee tried in every way to get the packers to come, but they would not do it. There-upon he got the committee to authorize a subcommittee to go to Chicago and get the great meat-packing concerns to give evidence about the passage of this proposed law. I make this statement just to illustrate the situation. They did not summon them. Why, I do not know. But just to elucidate what they finally concluded to do, I want to read letters and excerpts taken from the Senate hearings:

The CHAIRMAN (Mr. Heyburn). Now, before starting this morning, I want to put into the record a copy of a letter which I addressed, as chairman of the committee, to Mr. Arthur Meeker, who is one of Armour & Co., at Chicago, requesting them to be present and give the committee the benefit of such information as they had. The letter is as follows:

MAY 20, 1910.

Mr. ARTHUR MEEKER, Care Armour & Co., Chicago, Ill.

Care Armour & Co., Chicago, III.

DEAR SIR: Senate bill 7649, introduced as a result of the inquiry that is being made by a special committee appointed by the Senate to investigate the high cost of living, has been the subject of hearings before the committee. A number of representatives of those who conduct cold-storage plants, as well as chemists, have appeared before this committee and furnished information in reference to the alleged unwholesomeness of food kept in cold storage. By reason of your familiarity with the cold-storage business you could probably furnish valuable data which would be of interest and value to the committee in determining what action should be taken on the measure. Will you kindly indicate if you are willing to appear before the committee when a date will be set for the hearing?

Very truly, yours,

I have his repuly under date of May 24, which is as follows:

I have his reply under date of May 24, which is as follows:

MAY 24, 1910.

Hon. W. B. Heyeurn.

Chairman Committee on Manufactures,
Washington, D. C.

Dear Sir: I beg to acknowledge receipt of your courteous invitation to appear before the special committee appointed to investigate the high cost of living. I would gladly appear if I thought I could furnish any information that would be of value to the committee but I have no special knowledge on the subject.

Thanking you. I am,
Very truly, yours,

I wish also to submit a copy of a letter which I wrote to Mr. T. J. Connor, general superintendent of Armour & Co., Chicago, requesting that they be present or have some representative to appear to give us any information which they have. The letter is as follows:

May 20, 1910. MAY 20, 1910.

Mr. T. J. CONNOR,

General Superintendent Armour & Co., Chicago, III.

DEAR SIR: For several weeks this committee has been considering Senate bill 7649, to prevent the sale or transportation in interstate

commerce of articles of food held in cold storage for more than one year, and for regulating traffic therein, and for other purposes, which was introduced as a result of the inquiry before the special committee investigating the high cost of living. Quite a number of representatives of those engaged in cold-storage business, as well as chemists, have testified before the committee with reference to the alleged unhealthfulness of food kept in cold storage.

Thinking that because of your familiarity with the cold-storage business you would be able to furnish the committee valuable information on the subject, I write to inquire if you are willing to appear before the committee in the near future and give the result of your observations with reference to this subject and answer such inquiries as may be propounded by the committee.

Very truly, yours,

And I have his reply, which is as follows:

And I have his reply, which is as follows:

MAY 23, 1910.

Senator W. B. Heyburn, United States Senate, Washington, D. C.

DEAR SIR: Your letter of the 20th addressed to our Mr. T. J. Connor received. Mr. Connor is out of the city at present, and expected to be absent for some time, so that it will probably not be possible for him to comply with your request.

Yours, respectfully,

A. E. GIFFEN,

A. E. GIFFEN, Private Secretary.

It is thus seen that one had no knowledge of the subject and the other gentleman was out of the city, to be absent some time. I suppose another had gone to marry him a wife and possibly another had to play golf or to be away for his health, another had a lawsuit on his hands, and there were probably other

The subcommittee was sent to Chicago on the 7th of July, 1910, as shown by page 266 of the hearings, for the purpose of making further inquiry into the methods and manner of cold storage, and there meet and confer with the representatives of a number of the large independent concerns and also with the representatives of what is known as the packers and private cold-storage men (p. 266). But no packers came. They could

not get them to testify.

The hearings further show, "after several conferences with representatives of the packing-house concerns in Chicago, Ill., it was agreed between the subcommittee and Mr. L. F. Swift, of Swift & Co., of Chicago, that the committee should submit in writing a list of the questions regarding which they desired testimony and information" (p. 268). It seems Mr. Swift had authority to act for all the packers in this delicate matter. And thereupon a list of the questions were submitted by the subcommittee, and six days thereafter answers to the questions were given, which showed absolutely nothing of what this committee wanted to know. Answers were made by Swift & Co. (p. 269), Sulzberger & Sons Co. (p. 272), and G. H. Hammond & Co. (p. 279). Armour Packing Co. did not respond at all.

It will thus be seen that the packers followed their usual

course of business—absolutely disregarded any request made by this committee. In his answers Mr. Swift, who may be taken as an illustration of the packers, said he did not object to sanitary inspection of premises; that they could get along well on the time limit of 12 months for meat and certain time limits, which he fixed, for other commodities; he was willing to concede that cold-storage products once taken out of cold storage should not be taken back; he was not willing to report daily receipts and withdrawals; he was not willing to handicap his business with labeling or branding as to the time that the goods have been in cold storage, because he felt "quite sure it would mislead the public."

In the hearings before Senator Heyburn's committee, that committee in its report paid no attention to the packers. The packers would not come; and I want to say right here to this committee, if there are any members of the committee here, that I do not think this committee ought to pay any attention to any man who has anything to say about this subject unless he is willing to come before the committee and subject himself to cross-examination. [Applause.]

We have had too much private information given, like this that Mr. L. F. Swift undertook to give to this committee. After he had gotten it all worked out in that way, he sidestepped it— to use a slang expression—and after he had done that, here is what he said. He said the reason he would not give any information was because it might mislead the public. If they put brands or labels on these goods, it would mislead the public. If they told them what time the goods went into cold storage, it might mislead the public, according to Mr. Swift. had said that, here is what he said, quoting from his letter:

Senator Heyburn seems to be a very reasonable man, of great business experience, and I think will be very fair.

Down South, where I come from, we have frequently felt very unkindly toward Senator Heyburn, because of some unkind expressions that he has used about our people. I want to say, though, that I do not believe any man south of Mason and Dixon's line has ever said as unkind a thing about Senator Heyburn as is insinuated in this letter from Mr. L. F. Swift, of Chicago. I want to say in honor of Senator Heyburn's memory that he examined into this question faithfully and well, and has made a report that I think it would be well for the Committee on Interstate and Foreign Commerce to adopt in its en-I say that in all respect to the memory of this great man; and he certainly showed that he was a great man in the management of this matter.

Now, what about the power of Congress to regulate it? There is no doubt about it. It is right along the lines of the purefood law. It is properly within the commerce clause of the

It is going to be said by these packers and cold-storage men, who are coming here before this committee, that this is a State matter; that the States ought to regulate this matter; that it is a local question. Yes; and when they go before the State legislatures they say just the opposite. They go before the State legislatures and say, "We must have a uniform law; wait and let the United States Congress pass a uniform law that we will all know about and that we will all respect and about the enforcement of which there will be no doubt.

In other words, when the bills are before the State legislatures they say it is a national question, and when they are before Congress they say it is a local question for the States. I say that this Congress ought to pass a law without regard, to the rights and interests of bona fide middlemen, but without regard to those who are gambling in the necessities

of life.

Now, the only real argument I have heard against this bill is this: They say the cold storage is a great conservator of the foodstuffs of the country. That is absolutely true, provided it is honestly and intelligently conducted, where the are scientifically stored and taken out and marketed and branded, so that the public may know how long they have been stored, and not to keep them beyond the period when they become unwholesome.

To illustrate what I am trying to drive at, I want to read to the House a letter to show what the other side claim about it.

Mr. MURDOCK: Of course, the gentleman intends to em-

phasize the necessity of uniform laws, does he not?

Mr. McKELLAR. I do.

Mr. MURDOCK. Can we have that under State regulations? Mr. McKELLAR. We can not, only under Federal regula-Now, I want to refer again to eggs, as they seem to be most in the public mind, and which will serve as an illustration to what I am trying to say. I want to read from a recent statement from the Produce News, the same publication I spoke of awhile ago, as it presents a condition I had no idea existed.

SILENT JIM IS HAPPY-WETZ THINKS HE AND MORAN ARE JOSEPH AND PHARAOH.

NEW YORK, November 21.

In a letter to the News from Chicago, under date of November 21.

James E. Wetz, that indomitable speculator in eggs, writes: "The egg game is certainly getting to be a hummer, and the price will go higher than you ever saw it in your association with the produce business. I started in the other day and sold 21 cars and could make but 8840 per car, so I concluded to wait until the trade thought better of the game and would pay more money. You remember several years ago when Joseph and Pharaoh had all the corn there was in Egypt; that when they made pligrimages to get corn of Joe and Pharaoh they soaked them. That's what the trade is going to get from us when it is necessary for them to have a few eggs for their breakfast and custards for their dinners. It has been said the other fellow should be considered, but from the treatment that the other fellow has given me when he had the best of it has so embittered me that now since the opportunity presents itself I am going to fatten the grudge I have borne him for these many years."

itself I am going to fatten the grudge I have borne him for these many years."

In another paragraph Mr. Wetz says that he is very thankful for those who prophesied disaster early in the summer, causing the weak sisters to close out as soon as they could get a margin of profit. Closing the letter he says: "We shall not sell another car of eggs until they make \$1,200 a car. When the deal is over (and there is nothing left now but the shouting) it will be the biggest deal that was ever pulled off in the United States. We have taken the chance all along to be laughed at or laugh at the other fellow, and now it looks as though he would get the laugh in great shape."

Gentlemen of the House, I want to say right here that there was a million more cases of eggs produced in 1913 than there was ever known in the history of this country before, according to the statistics furnished me from New York. That means 30,000,000 dozens of eggs more this year than ever before, and the price was and is away beyond anything that has ever been

What do we find? When every housewife in this country, when every man who has to pay the bills for his daily sustenance in this country, is complaining at these extortionate prices of eggs, we find a gambler in the market place of Chicago laughing at the other fellow and sending the price of eggs skyward. Now, he could not do it, this gambler could not send the price up in such a way, if it were not for the unjust and unfair and, I may say, the unlawful use of cold storage.

Mr. DIES. Will the gentleman yield?

Mr. McKELLAR. I will yield to the gentleman from Texas.

Mr. DIES. The gentleman will understand that eggs that have never been in cold storage reach prices beyond those that have been in cold storage.

Mr. McKELLAR. Of course.

Mr. DIES. Does the gentleman know of any instance where the price of cold-storage eggs went as high as those of fresh

eggs that have never been in cold storage?

Mr. McKELLAR. I do not know of my own knowledge, but I was told by a gentleman in the House within the last hour that there are so-called egg producers in the neighborhood of Washington who come here and buy eggs from the cold storage, label them "fresh eggs," and sell them to the people of Washington as and for fresh eggs.

Mr. HAMLIN. Will the gentleman yield?

Mr. McKELLAR. Certainly.

Mr. HAMLIN. Does not the gentleman believe that if we could control the price of cold-storage eggs, that it would control the price of eggs that are not put in cold storage?

Mr. McKELLAR. It would, in the periods of scarcity, in October, November, and December, which everybody knows is the scarce period in the production of eggs, it would equalize those prices against the outrageously low prices in April, May,

Mr. DIES. Does the gentleman mean between those who

produce eggs and those who use eggs?

Mr. McKELLAR. Quite the contrary. If the gentleman had examined the statistics he would not have asked that question. The population in the United States has increased in the last 10 years 21 per cent, and the production of eggs has increased 23 per cent. Mr. PLATT. Mr. Chairman, will the gentleman yield?

Mr. McKellar. Certainly. Mr. Platt. Is it not a fact that there are less eggs in cold

storage by a considerable number of thousands of cases now than there were last year at this time?

Mr. McKellar. In the last few days it is claimed from the New York office of the Produce News that there are several thousand cases less at this time than at the same time last year, but as a matter of fact there are more cases of eggs that have gone into cold storage this year than ever before.

Mr. PLATT. But they have been sold before this time? Mr. McKELLAR. Quite the contrary, and that is where the gentleman is wrong again. Of course the gentleman understands that this is largely informal, and interferes very greatly with the continuity of my speech, but I think we can get more good out of it this way. It is absolutely undisputed that the scarce period of eggs is October, November, and December. That applies from the 25th of November until the 8th of December. It would be absurd to single out the time between the 25th of November and the 8th day of December and say that thereupon the hens began to lay. No appreciable amount of eggs has been produced within that short period, and yet since this agitation about cold storage has started—

Mr. PLATT. The pullets have begun to lay.

Mr. McKELLAR. Yes; that is exactly what they have not This is the buncombe of the cold-storage people. price of fresh eggs has gone down 6 cents since the 25th of November, and the price of cold-storage eggs has gone down in proportion. Why? Because the supply is greater? No. It is because the people hear the hue and cry that is made by an outraged public from one end of this country to the other, and that has caused them to lessen the price that they fixed for the eggs.

Mr. SLOAN rose.

Mr. McKELLAR. In just one moment. I want to say right here that the other day when I dropped this bill into the basket I never dreamed that it would be taken up as a matter of great public concern. It never crossed my mind that the public would be so interested until the newspaper people began to ask about it.

Since that time I have received letters from women's organizations and from men and women from one end of our country to the other-stacks of letters, nearly every one, except from two or three traders in New York and Boston and Chicago-ratifying the provisions of the bill. I have received newspaper clippings from almost every newspaper of any size in the country, and, with the exception of two or three trade papers, every news item and every editorial demands the passage of a bill somewhat like this. I do not mean to say that we ought to pass a bill because there is public clamor for it, but what I do mean to say is that these newspapers, these people throughout the country, know what the conditions are, and they are simply saying what they know to be the facts, and they need a remedy. I yield now to the gentleman from Nebraska [Mr. SLOAN].

Mr. SLOAN. Mr. Speaker, in the numerous letters and telegrams that the gentleman has received in favor of this bill, has he received any from the producers of eggs who favor it?

Mr. McKELLAR. Yes. I am sorry I can not read it to you, but I have one from Savannah, Ga., which I received this morning. That man said that he was at Morristown, Tenn., which is in one of the greatest egg and poultry producing districts in the country, last spring. He said that he found there eggs selling from 6 to 8 cents a dozen, and that that price was fixed by the agents of the combination. There were a number of agents, a number of concerns represented there in Morristown, and one of the agents would state what price would be given every day, and the producer could not get any more for his eggs than this agent fixed. He could not sell them anywhere except at the price fixed by the agent. That is the kind of effect it has on the

Let me say right now that the object of this bill is, first, for the protection of the producer who produces these foodstuffsand I am merely using eggs as an illustration-and, next, for the great body of the consumers, both as to health and pocketbooks. In the next place, no bill should be passed that is not absolutely fair and just to the middle man who stores the eggs. So far as these gamblers-like this man Wetz, who it is alleged has made over \$300,000 in this corner of eggs recently in Chicago-these speculators and gamblers are concerned, Congress ought to see to it that they are put out of business for good and all, and that they be not allowed to speculate in the necessities of the life of every person in this country. [Applause.]

Mr. SLOAN. If the gentleman will permit just another ques-As yet I have not heard from the gentleman of a statement coming from any producer of eggs who has been selling eggs at thirty-odd cents a dozen throughout the United States for the last few weeks. I mean the immediate producers. They are not demanding any action.

Mr. McKELLAR. No, sir; I have not heard from any.

No; I think not. Let me ask this question-Mr. SLOAN. Mr. McKELLAR. Just one moment. I will say to the gentleman that the producer of eggs in October, November, and December is really almost a negligible quantity, for the reason, if my recollection serves me right, there is only about one-tenth of eggs produced in those months of the amount actually consumed. want to say to the gentleman right new I have no doubt that these cold-storage people and packers will get some producer who happens to have a few eggs in those months to come up here and say it is a great hardship on him; but at the same time if this bill passes, while it may lower the price of fresh eggs in the fall it will raise the price of the same kind of eggs the producer in the spring of the year. In this way matters will be evened up for the producer.

Mr. SLOAN. One further question and I will be through. I see the gentleman's point, so far as the health and preservation of food and all of that is concerned, but what is the necessity, so far as the lowering of the price is concerned? I thought we settled all that lowering of price when we cut the tariff on eggs in this country.

Mr. McKELLAR. Weil, the gentleman has undertaken to introduce politics, and I will answer right here and now. I do not claim that this bill is a panacea, and I do not think that anybody ever claimed that the tariff bill was a panacea for all of our ills. The Democrats have ever said that the tariff was the mother of trusts, and you gentlemen have kept it in operation so long in this country that the old sow has got a number of pigs nearly as strong as the old sow, and the result is that we have got to curb the pigs a little. [Applause on the Democratic side.]

Mr. WILLIS. This is an egg bill, not a pork bill.

The SPEAKER pro tempore (Mr. Cox). The time of the gentleman has expired.

Mr. TOWNSEND. Mr. Speaker, I ask unanimous consent that the gentleman may be permitted to conclude his remarks.

The SPEAKER pro tempore. The gentleman from New Jersey asks unanimous consent that the gentleman be permitted to conclude his remarks. Is there objection? [After a pause.] The Chair hears none.

Mr. PLATT. Is it not true that since cold storage has come into operation the price of eggs in the slack period, or portion when they are mostly laid—April, March, and May—has been greatly increased, and the farmers have gotten more for their eggs at that time than ever before?

Mr. McKELLAR. I think not. Mr. PLATT. I think they have.

Mr. McKELLAR. I think the record will show that I am right. I am glad the gentleman presented that matter, because of another statement I want to make right here. We find that all the statistics about eggs-here are two books of them, and I have numbers of other books in my office which give statistics of eggs and egg prices-are all about the prices of the dealer.

There is not a word said in any of these investigations I have been able to find as to the effect on prices paid to the producer and none about prices charged to the consumer. In so far as these investigations are concerned, except one carried on by Senator Heyburn, they have dealt with the project entirely from the standpoint of the dealer or the packer or the cold-stor-age man and not at all from the two great classes of people who ought to be examined about, and that is the producer and the consumer of the product.

Mr. PLATT. I would like to say to the gentleman that I represent an egg-producing district, and where the farmers in my district used to sell eggs at 10 cents a dozen they now get from 18 to 20 cents always and never get less.

Mr. SWITZER. And the same with my district. Mr. McKELLAR. I think the gentleman will find on examining into the facts that his 20 cents a dozen eggs come along only occasionally in the fall and that in the spring 20-cent eggs are few and far between.

Now they are selling eggs for 50 cents a dozen. Mr. PLATT. Mr. WILLIS. I was very much interested in what the gentleman says, and I have not been able to read his bill— Mr. McKELLAR. I will send the gentleman a copy.

Mr. WILLIS (continuing). And I would like to hear the gentleman explain what is the storage period for eggs provided for in the gentleman's bill.

Mr. McKELLAR. The storage period as provided for in my bill is this: There is an absolute period of three months, because

Dr. Harvey Wiley-

Mr. WILLIS. What does the gentleman mean by "absolute"? Mr. McKELLAR. I will explain that in a minute. As I have stated before, Dr. Harvey Wiley and his assistants went down here to Center Market and rented space. They got the very best quality of eggs and put them in cold storage scientifically. They saw that they were sound, and they put them in under the most favorable conditions, and at the end of three months they took them out. They had a jury to eat those eggs and to eat the eggs that were fresh to determine which ones were cold-storage eggs and which ones were not. The result of the first experiment was that most of the jury were unable to tell which were cold storage and which were not.

Then he let other eggs stay in cold storage for a period of six months, and he again took that jury down there. greater portion of the jury very easily determined those that were cold-storage eggs. But the doctor testified, and others testified in like manner-and, by the way, Dr. Wiley, judging from his testimony, certainly is a man who knows what he is talking about, and I commend his testimony to anyone who wants to investigate this subject—he testified then that he put them in for nine months and had a jury to pass on them, and practically no member of the jury had any doubt about which were cold-storage eggs and which were not. At the end of the six-month period, however, most of those eggs were good. They were wholesome so far as being a food product was concerned. They had deteriorated in some ways, but still, so far as the doctor could determine, they constituted wholesome food.

Now, anyone who has studied this subject knows that in the months of April, May, June, and in July to a large extent—and a great many eggs are produced in August and September, because of the various latitudes of our country, and this is a question of latitude to a very large extent-anyone who has studied this subject knows there is an overplus in the production in those months and a great scarcity, as I have said, in October, November, and December. In January comes the great bulk of southern eggs from Texas and other places, which makes it about even. Everybody knows it is a great benefit to the country to be able to keep eggs long enough that are produced in periods of plenty and carry them over through periods of scarcity. In theory it is all right. Under proper restrictions it is all right, but the result has been that eggs are improperly stored in the spring or summer time without any restrictions, as it is now, and for an unlimited period. These gentlemen are allowed to put the eggs on the market when they please, cold storage eggs for fresh ones, without any regard to the length of time they have been in cold storage, whether eight months, nine months, a year, or even two years, and that is where the abuses come in. So this bill, following to some extent Senator Heyburn's bill, but going further than his bill, provides this, that for the first three months these eggs are not to be held as adulterated. They can then be examined, and, if found sound, a second-period cold-storage egg of four months is permitted for those sound eggs. But in order that the consuming public may be protected under the provisions of this bill, every basket, or carton, or box containing these eggs, and the eggs themselves, if the Department of Agriculture so demands, shall be stamped, showing when they were put in cold storage and showing

whether they are second-period cold-storage eggs or whether

they are the first or genuine cold-storage eggs.

want to say this-and this is based not upon scientific investigation but upon actual experiment: Why should not the American people be protected? Just ask yourselves. There is not any trouble about conservation of foodstuffs under the terms of this bill, because the limit of the bill goes over the whole thing; but, as a matter of right and as a matter of justice to the consuming public, ought it to be permitted to buy what is really sold to them? Ought these dealers to be allowed to go over the country and sell the cold-storage eggs that are six months or a year old as fresh eggs? I do not believe so.

Mr. MURDOCK. I would like to ask the gentleman if there would be any way of protecting a consumer in that respect save

by marking each individual egg?

Mr. McKELLAR. Certainly; why not?

Mr. MURDOCK. By marking a case of eggs, would not that

mean a mixture of eggs?

Mr. McKELLAR. If the gentleman will read my bill, he will find whenever they are put out for sale the seller is obliged to state to the purchaser what kind of eggs they are.

Mr. MURDOCK. That would not reach the man who actually consumed them. He is the chief object of charity.

Mr. McKELLAR. I will say this to the gentleman, that I believe that is true, and if he can devise some method by which it can be carried even further, so as to go right up to the consumer, I shall be glad to accept the amendment to my bill.

Mr. MURDOCK. I hope the gentleman in this legislation will not repeat the farce we have now under the guaranty of pure food and drugs. I hope that some remedy can be found to protect the actual consumer, who does not actually buy the eggs, but buys them after they are prepared at the boarding house and similar places. [Laughter.]

Mr. McKELLAR. I will do all I can in the direction the

gentleman indicates.

Mr. TOWNSEND. Mr. Chairman, will the gentleman yield? The CHAIRMAN. Does the gentleman from Tennessee yield to the gentleman from New Jersey?

Mr. McKELLAR. With pleasure.
Mr. TOWNSEND. I have no doubt that the gentleman from Tennessee has actually a clear distinction in his own mind between public warehousemen and the owners of private refrigerating plants, but he sometimes used the terms interchangeably-public refrigerators and packers. My information is that the owners of public cold-storage warehouses, where anything from furs and rugs to eggs and fruits and beef and poultry and anything else is stored, are never to any extent-certainly not in my own community-dealers in those products. They are merely the warehousemen. The gentleman has sometimes used the terms interchangeably, and I wanted to make that observation.

Mr. McKELLAR. The gentleman has made some very interesting observations, and if he and others who have questions to ask will permit me to go on now I will yield to them later. I ask will permit me to go on now I will yield to them later. I wish now to respond to the implied question in the statement of the gentleman from New Jersey [Mr. Townsend]. I will confess that there is a great deal of difference with respect to various products. Take eggs, for instance. I will use that as an illustration, because it is the best illustration we have, applied to these matters, and my bill applies to them all.

It is claimed by some that the packers now control only about 35 per cent of the cold-storage plants in the country and that these warehousement that my friend from New Jersey speeks of

these warehousemen that my friend from New Jersey speaks of control the remainder. I am informed by the Department of Agriculture that that is not correct. I am informed that the packers control about 55 or 60 per cent and that the warehousemen control about 40 or 45 per cent.

Mr. TOWNSEND. They store that amount.
Mr. McKELLAR. The officials of the Agriculture Department say this, that they have never had any trouble about getting information as to the receipts and deliveries and prices and various things of that kind that they have asked of the warehousemen, but that they can not get such information from the packers.

Mr. TOWNSEND. And they come forward for investigation? Mr. McKELLAR. Yes. Some of the warehousemen claim that they court investigation. I do not know how that is, but we shall find out when we have hearings on this bill. On the other hand, they say that the packers are to blame for these I want to read right here a letter which I recently received from an editor who recognizes the question which the gentleman from New Jersey [Mr. Townsend] has asked inferentially in a splendid way. He says this, in a recent letter to

The latest statistics on eggs produced in the United States places the total amount at 40,000,000 cases, at 30 dozen to the case. These statistics cover 1911, and it is safe to add an increase of 1,000,000 cases for

1913, making a total of 41,000,000 cases. At 10 per cent going into storage, this would mean the storing of 4,100,000 cases.

He further stated that the Warehousemen's Association of the United States, consisting of 43 of the principal warehouses of

the United States, carried 70 per cent of all eggs held.

Now, I am informed by the Agriculture Department that this is incorrect, and that the packers probably carry 55 per cent of the eggs held, and the Warehousemen's Association of the United States carries about 45 per cent of eggs held in cold storage. Thus it will be seen that the main supply of eggs in the time of scarcity is controlled by 43 associated warehouse-

men and by the meat packers. Everybody knows that the meat packers are bound together by a tie that has not yet been broken, and if these warehousemen do not stand together, why is it they have formed an association? If they are permitting the principles of competition to go on, why is it necessary for them to organize? The answer is plain. They want to get these eggs in the spring and summer at the cheapest price possible. It is fair to assume that they have done just what every association has done—divided the territory in which eggs are produced, so as to prevent competition in buying, and then when they get the eggs in their warehouses they boost the price for their own benefit and sell when they concur the time is ripest.

There is no absolute proof about this matter, but the high price of eggs in the face of the greater production than ever before, according to the statement of Mr. Preston, is indicative that there is some understanding or agreement in reference to this prime necessity of life. But, according to Mr. Preston, who, in effect, represents the warehousemen, the warehousemen are not guilty, but the packers are. I quote again from his

One reason for the high price of eggs is the persistent buying of eggs by the meat packers, who it is believed will eventually control the egg business, as they do the meat trade. In every section of the country the greatest competition to the ordinary commission merchant are the speculators and the members of the meat combine.

This is the warehousemen's spokesman that is now talking. He says further:

Swift, Armour, Morris, Sulzberger & Sons, and all the meat packers ran the price of eggs higher than ever before, and their holding and persistence in keeping the prices up has had much to do with the present stringency in the market. Eggs which cost the meat combine from \$2 to \$3 a case are being sold by this combine from \$7.50 to \$9 a case. The meat combine is operating extensive distributing plants in nearly every city of importance and charging the consumer the present high price of eggs that cost them less than half when originally stored, Eggs, as a rule, are gathered from the farmers by hucksters who are employed by the packers for that purpose.

Now, the situation is this: That the packers are controlling the purchase price, and that they packers are controlling price of eggs. They call them gamblers, and say that they, the packers, are going to take the entire business away from them; and I have no doubt that if we are ever able by the processes of this House to get Messrs. Swift and Armour and these other packers before us here, if they testify, they will be only too glad to lay the blame on the warehousemen.

Mr. TOWNSEND. If the gentleman will permit me— Mr. McKELLAR. Yes. Mr. TOWNSEND. A little investigation will show the gentleman that the writings from which he has read refer to warehousemen who are dealers and who have warehouses. That does not refer to the owners of public storage warehouses, who have no control whatever over the food products entered for storage.

Mr. McKELLAR. The gentleman is entirely correct about

that.

Mr. TOWNSEND. I wanted to make that distinction.
Mr. McKELLAR. The gentleman is correct about that.
Mr. PLATT. Now, will the gentleman yield for a question?
The SPEAKER. Does the gentleman from Tennessee yield to the gentleman from New York?

Mr. McKELLAR. I do; and I owe the gentleman an apology for not yielding sooner, as he has been standing with a question

in his mind for some time.

Mr. PLATT. I want to know how you are going to put down the price in December, when all the best eggs are stored in April and May, and your bill provides that they must be sold within seven months of the time they are stored, and so must all be sold before December?

Mr. McKELLAR. Many eggs are stored in June and July

as well as in April.

Mr. PLATT. The best ones are stored in April.

Mr. McKELLAR. And if the best ones are required to be sold within three months you will find that there will more of them be stored in the months of August and September instead of earlier in the season.

Mr. PLATT. They will not be stored, because there are none to store them. They are consumed as fast as they are laid.

Mr. SWITZER. Will the gentleman yield for a question?

Mr. McKELLAR. Yes.

Mr. SWITZER. Does the gentleman think that eggs in any considerable quantity have been bought by dealers in eggs in the last year at 6 cents or 10 cents a dozen?

Mr. McKELLAR. I have this statement from the editor of

the Produce News in New York.

Mr. SWITZER. I should like to know the place where they

are buying them at any such price.

Mr. McKELLAR. I will give you his name. The man who makes this statement is H. L. Preston, whose address is the Produce News, New York City. I have his letter here, and I shall be glad to have the gentleman read it. While I am talking to the rest of the Members, if the gentleman will take the letter and read it I shall be very glad. I have this man's statement in black and white, and he ought to know.

Mr. SWITZER. From what point do they obtain eggs at

that price?

Mr. McKELLAR. He did not say.

Mr. SWITZER. I guess not.

Mr. McKELLAR. Here is the letter [handing Mr. SWITZER

Mr. PLATT. I venture the prediction that if you pass this bill you will make the price of eggs a dollar a dozen in Decem-

Mr. McKELLAR. I differ with the gentleman. They were never a dollar a dozen, even when there was no such thing as cold storage dreamed of. We have only had cold storage for the last 40 years, and for eggs only the past few years; and prior to that time, according to the published prices, eggs never went up that high in December, when we did not have them at all-when they could not be carried over.

Now, I think this matter of cold storage ought to be probed to the bottom. We have practically got the proof before us.

The packers say that the warehousemen are the real offenders, and the warehousemen say that the packers are the real offenders, and I think we ought to find out who the real offenders are. It must be between them, because they control prices and they control the quantities of eggs. Cold storage gives them a peculiar power, because it is very inexpensive. If they undertook to keep poultry, for instance, that they had to feed and care for, it would be an expensive matter, and they could not do it, but with cold storage they can simply freeze it and keep it there indefinitely at a practically nominal cost.

Mr. BOOHER. Is it the gentleman's opinion that eggs would be lower than they are now if there were no cold storage?

Mr. McKELLAR. I think not. Mr. BOOHER. Would they be higher?

Mr. McKELLAR. They would, at certain seasons of the year, be very much higher, and at other seasons very much lower.

Mr. BOOHER. Is it the gentleman's opinion that eggs would be lower right now if we had no such thing as cold-

Mr. McKELLAR. I believe, from my examination of this subject, that if there was no such thing as cold storage, and no speculators to influence the market, eggs would not be any

higher than 60 cents a dozen, which they are now.

Mr. BOOHER. Is it not the gentleman's opinion that if there was no cold storage there would be no eggs at all and no

market for them?

Mr. McKELLAR. Quite the contrary, because they sold eggs in the months of October, November, and December prior to 1870. As a matter of fact, until about 1900 there were no eggs held in cold storage, and yet we find prices much lower before that than they are now. They ought to be lower with cold storage than without, and would be if cold storage was honestly conducted. We find no such prices in the months of November, December, and October when there was no such thing as cold storage, when we had to depend on the supply of the hens in that time of year-no such prices as they are to-day.

Mr. BOOHER. Mr. Speaker, will the gentleman yield?

Mr. McKELLAR. Certainly.

Mr. BOOHER. Are there any eggs in the market at all to-day except cold-storage eggs?

Mr. McKELLAR. How could there be cold-storage eggs on

the market prior to the time of cold storage?

Mr. BOOHER. I ask the gentleman if there are any eggs in the market now, to-day, at this time, except cold-storage eggs?
Mr. McKELLAR. Oh, yes, a great many; a great many eggs

are produced in October and November and December. Mr. BOOHER. But not to any great extent.

Mr. McKELLAR. Yes; to a considerable extent.

Mr. BOOHER. If you take the cold-storage eggs out of the market, does the gentleman think it would not create a scarcity and make the price of eggs higher?

Mr. McKELLAR. If cold storage is regulated, it will reduce the price. If you are going to put this instrument of cold storage into the hands of the speculators and the gamblers, they are going to keep the price of eggs up, because it is for their interest; they are going to buy cheap and sell high.

Mr. BOOHER. I am not trying to put them into the hands of anybody; I am just trying to get the gentleman's idea.

Mr. McKELLAR. I understand; but I want to say that Mr. MCKELLAR. I understand; but I want to say that these egg manipulators have got the eggs in their hands, and all they are trying to do is to hold them; they are willing to drop this matter. They are like the darkey that was charged with a serious offense and the judge said, "What do you want done with this case?" And he said, "I want to drop it right where it is." [Laughter.] That is the way with these storage where it is." [Laughter.] That is the way with these storage people; they are not complaining, they have millions of dollars invested in cold storage, and they handle \$3,000,000,000,000 worth of products annually in the country and make enormous profits. They are perfectly willing to drop the matter right where it is; they do not want any national legislation, and they do not want any interference; they do not want any thing except to be let alone. I say, in all justice to my friend from Missouri, that if he will examine the statistics, he will find the price of eggs much lower in the three months of scarcity in the years when there was no cold storage than they are now with the immense supply of nearly 3,000,000 eggs in storage to-day.

Mr. PLATT. Does not the gentleman want the speculators to

sell their eggs when they are high?

sell their eggs when they are high?

Mr. McKELLAR. I am frank to say that men like this man Wetz are blots or leeches on the body politic. Here is a man that corners the price, who is enabled to corner the price of eggs and hold them in cold storage, and when he gets the market cornered—one of the principal foodstuffs of the people—he laughs at the country; he laughs at what he calls "the other than the country was a woman and shild in this country." fellow," and makes every man, woman, and child in this country pay for what? Not for any honest effort or any honest labor on his part, but he sits around in the market of Chicago and has made a deal by which he makes \$300,000 or \$400,000 out of the price of eggs.

Mr. SWITZER. Mr. Speaker, if the gentleman will yield,

I read from the letter which he handed me, this:

It is impossible to tell what price the packer instructs his huck-sters to pay for eggs.

Mr. McKELLAR. The matter I referred to is in another part of the letter.

Mr. SWITZER. In another part of this letter it says:

Were it not for the fact that this 10 per cent of the product of the hen was put in cold storage and the great volume of production during the spring months, eggs would not be worth over 5 or 6 cents during that time.

But it does not say that they were bought at that price. Mr. McKELLAR. Mr. Speaker, I will say to the gentleman what I said at the very outset, that this gentleman who wrote that letter to me is opposed to my bill, and was arguing against it, but he gave me the facts, which absolutely disproved his

Mr. SWITZER. My question is, Where did he get the 6-cent eggs?

Mr. McKELLAR. It is in that letter there. Mr. SWITZER. No; he says that they would be that if it were not for cold storage.

Mr. McKELLAR. I will read to the gentleman just what he The gentleman will have to indulge me for a few moment [taking the letter back from Mr. SWITZER].

Mr. SWITZER. I did not read the latter part of the letter.
Mr. McKELLAR. It is right in the first part. Here it is.
I do not feel that I have made a mistake in respect to the

matter. He says:

In every section of the country the greatest competitors of the ordinary commission merchant or speculator were members of the meat combine. Swift, Armour, Morris, S. & S., and all meat packers ran the price of eggs higher than ever before, and their holding and persistence in keeping the price up has had much to do with the present stringency in the market. Eggs which cost the meat combine \$2 to \$3 a case are being sold by this combination as high at \$7.50 to \$9 a case.

Is this not just what I said was in the letter?

Mr. SWITZER. Where did he get them? Mr. McKELLAR. He got them from the producer. Eggs that cost \$2 to \$3 a case, according to my arithmetic, would be 6s to 10 cents a dozen, and they are now being sold, according to my arithmetic and this letter, from 25 to 30 cents a dozen.

Mr. FORDNEY. Mr. Speaker, will the gentleman yield?

Mr. McKELLAR. Certainly.
Mr. FORDNEY. Did the gentleman ever know a time in his life when eggs sold in this country for 6 cents a dozen. If so,

he knows semething that I never head of.

Mr. McKELLAR. Mr. Speaker, I was born and reared on a farm, and I have sold eggs myself at 5 cents per dozen at home. Mr. FORDNEY. I never knew them to be sold for as low a

price.

Mr. HAMLIN. Mr. Speaker, will the gentleman yield? Mr. McKELLAR. Certainly. Mr. HAMLIN. I simply want to ask the gentleman if he does not have in mind the price to the consumer, always?

Mr. McKELLAR, Always; and the price paid to the pro-

ducer as well.

Mr. HAMLIN. What is the average difference in the price of the eggs paid to the producer and the price charged to the

consumer?

Mr. McKELLAR. Mr. Speaker, I take great pleasure in again referring to the letter of this gentleman who is opposed to my bill, Mr. Preston, who says that the difference is from 100 to 200 per cent; that is, the difference between what the producer gets and what the consumer has to pay. We ought to be fair to the middleman, but we ought not to allow him by means of cold storage to reap an unfair and unjust profit. It is too much of a tax on the American people.

Mr. HAMLIN. If the gentleman will permit a moment, on that point I would like to say that there is a certain Member of Congress here, not myself, who is energetic and industrious, who tells me that he traced \$5 worth of country produce, including eggs and butter, from a distance 25 miles out of this city, into the hands of the people who actually consumed that particular produce. The producers got \$5 for it and the con-

sumers paid eleven dollars and some cents.

Mr. McKELLAR. That is confirmatory of my statement.

Mr. AUSTIN. Mr. Speaker, will the gentleman yield?

Mr. McKELLAR. Certainly.

Mr. AUSTIN. I want to furnish my fellow standpat colleague from Michigan-

Mr. FORDNEY. A compliment, sir. [Laughter.]
Mr. AUSTIN. Some information as to the selling of eggs at
5 cents a dozen. Eggs sold for 5 cents a dozen in east Tennessee during the Cleveland administration when the Wilson tariff bill was in force.

Mr. FORDNEY. I can hardly remember back that far.

Mr. AUSTIN. In the last campaign I had present at a joint debate the largest produce dealer we had out there, and he confirmed my statement during that joint discussion that he had bought eggs at 5 cents a dozen from farmers in that county during that period.

Mr. McKELLAR. I sold them in 1883 and 1884, when Chester A. Arthur was President of the United States, at 5 cents a dozen, and afterwards bought them as a clerk in a country store at the same price-time out of mind-while Benjamin Harrison was President of the United States; so I do not see

that any party in power governs the cost at all.

Mr. BOOHER. If the gentleman will permit, while you are talking about cheapness during certain administrations, I think we can prove by the gentleman from Nebraska and the gentleman from Kansas that during the Arthur administration corn was burned in Kansas and in Nebraska because it was cheaper

Mr. McKELLAR. That is not cold storage. [Laughter.] May I say this? Trade conditions have changed very much in the last 20 to 25 years in my memory. On the cotton plantations of the South we ginned our cotton and hauled the seed out in immense piles in the fields, there to rot year by year, and no other use was made of it, except for fertilizer and scarcely even for that. To-day the product of cotton seed and the by-products that come from it are worth in the neighborhood of \$125,000,000 a year to the American people. There have been changes since

Mr. WILLIS. I do not like to interrupt the gentleman, but I want to get his opinion as one who has studied this carefully. In the gentleman's opinion, how would the enactment of this bill into law affect the price that is received by the producer? I am not looking for any politics, but I want to get at the facts.

Mr. McKELLAR. I am glad the gentleman asked that

question.

WHAT OF THE PRODUCERS?

It is said the producers get the advantage of these high prices; that the producers of eggs, the producers of cattle, the producers of fish, all get advantage of these high prices, and if we legislate on this subject we are legislating against the producers. Nothing is further from the fact. Take eggs, for in-

stance. I am told upon high authority that the average price paid the producer is about 12 cents; the middleman, under the present arrangements, gets all the profits. That this is true is shown by the wonderful profits that have been made out of the business; by the enormous increase of this cold-storage business in the last few years; by the enormous amount of capital that has been put in cold-storage products, as heretofore shown. It is a stupendous proposition, good in itself if properly carried out, but giving rise to the greatest evils when allowed to run regardless of restrictions.

All of us who have lived in the country know that the producers of eggs get, comparatively speaking, a very small price for them. Under the present arrangement the packers and the cold-storage association, or those who use the cold-storage warehouses, have their agents and representatives in every eggproducing community, and they buy up the eggs when they are cheap. They are indiscriminately thrown into cold storage, regardless of their condition, and held until the fall of the year, when they are sold at an enormous advance in prices, rarely less than 100 per cent and sometimes as much as 200 per cent.

Thus we see that cold storage which, if regulated, would produce incalculable good by conserving these food products, has been turned into an instrument of evil by permitting speculators and gamblers to fatten on one of the prime necessities of life. I have read a recent very excellent report on cold storage submitted by a committee of the Massachusetts Legis-There are some remarkable statistics in this report. lature. Wholesale prices of food products are given, but no retail prices and no purchase prices. In other words, the report has to do very largely with the case of the dealer, but has practically nothing in the world to say about the producers or the consumers. They compare wholesale prices in said report, but never have a word of comparison of the prices to the consumer or the prices to the producer. The object of my bill is to aid both the producer and the consumer, to limit the middleman to a reasonable profit, and to put the speculator and gambler out of business. I think of all the effrontery I ever heard of is the statement of Mr. Louis F. Swift, of Swift & Co., Chicago, in talking about the misleading effect of marking and tagging:

We feel quite sure it would mislead the public, because some of our meats when put away in the season of prime quality will be better even though a month or two in storage than fresh goods put away that were not quite of so good quality.

If this statement is true, there could be no objection to marking or tagging. Marking or tagging the date of cold-storage ing or tagging. Marking or tagging the date of cold-storage meats just means that the purchaser knows what he is buying. It can not hurt him, and, if the seller is honest, it can not hurt the seller. What Mr. Swift intended to say was, instead of fearing that this marking and tagging might mislead the public, that he feared the marking might let the public know what it was buying, a fact that Mr. Swift, no doubt, and the other marking tagging tagget tag

packers, desire to conceal.

In so far as the price of eggs paid the producer is concerned, I desire to quote the testimony of Mr. H. L. Preston, the editor of the Producer News, of New York, who, by the way, is opposed to my bill. In a letter to me he says:

Eggs which cost the meat combine \$2 or \$3 a case are being sold by these combines as high as from \$7 to \$9 a case.

Now, \$2 or \$3 a case would be from 6 to 10 cents a dozen, 30 dozen being in a case, the selling price of the packers being from 25 to 30 cents a dozen. Can any producer say that when trade conditions in these products are such as here described that the producer is benefited?

But, says the cold-storage man, fresh eggs are now-in October, November, and December, months of egg scarcity-selling at enormous figures. Will you not hurt these producers? Why, not at all. How can regulation of the cold-storage product hurt the genuine fresh-egg industry? It might lessen the price during periods of scarcity, but it will make the price of fresh eggs more uniform during the whole year. I have also, as you gentlemen see—which I did not read, because it would take so much time-three very stringent antitrust regulations in this bill. Now, one of those provisions is aimed at this condition of affairs. Swift & Co., Armour & Co., and maybe the warehousemen who do business for themselves, send down to Kansas for eggs. Does your producer in Kansas fix the price of his eggs—taking eggs, for instance, again? Not at all; they do not fix it. These agents of these combines fix it, and this bill absolutely prohibits, not only by a fine but by imprisonment, the men who are guilty of it. Now the price in the various cities are fixed by the combines, and I have a provision in here against that.

products. And I want to say this, if you will let me make a prediction, and I am not a prophet at all, but I believe that the man in this House who votes against a reasonable regulation of food products kept in cold storage in this country and against these trust provisions which enforce the regulations is going to have serious trouble when he goes back home; and it does not make any difference to what party he belongs, for I find from my investigation that this country is aroused on this subject, and, after all, it is the people who spur us on and make us do

Mr. WILLIS. How does it—
Mr. McKELLAR. I want to say this—
The SPEAKER. The gentleman declines to yield. PACKING BUSINESS OUGHT TO BE PROBED.

Mr. McKELLAR. Senator Heyburn no doubt, as seen in said hearings, did everything in his power to get testimony from these packers. They all treated him with contempt, treated this committee of the Senate with contempt, notwithstanding in making this examination he and it were representing the greatest and strongest Government on earth. The Government has had many bouts with these packers. It has gone to the courts with them many times, but sooner or later the packers have come out clear and free. No doubt they think they are stronger than the Government; otherwise they would not treat committees of Congress with this contempt or utterly disregard the plain rules of fair and square dealing. Doubtless their agents will soon be down here, when it becomes apparent to them that Congress means business on this cold-storage matter.

I ask you, gentlemen, to bear in mind this prediction. According to the testimony of these witnesses taken in these hearings 90 per cent thereof is controlled by the packers. Mr. Becker stated that 95 per cent or upward is held in storage by

the packers themselves (p. 188).

The Government now says that the premises are sanitary and have inspectors for that purpose, but that is about all. are some one-half dozen or more concerns in Chicago controlling 95 per cent of the meats of the country. The public has no information whatsoever of how they manage their business. The Government practically has no control over them. not regulated. They defy the Government at will. They make no reports of receipts or deliveries of supply and demand. No one knows how they fix prices. Everyone believes they are in a combination; and yet, in this matter, which is probably the most vital matter to the consuming public, which is of vital interest to every man, woman, or child in the United States, the Government has no information, knowledge, or power in reference to this great source of food supply. I do not believe there is a reasonable disinterested man in this country who does not believe that Congress should pass a law supervising and controlling and regulating the business of meat packing and kindred subjects and the method by which this great system of food products is distributed to the consumer.

# THIS BILL NOT DRASTIC.

It has been stated that this bill is drastic. This is incorrect, Its purpose is to be fair to the producer, to the consumer, and to the honest middleman. It is desired to bring about a wholesome, clean, up-to-date, cold-storage system, which will make for the more perfect preservation and distribution of our wonderful food supplies in all seasons of the year at reasonable and fair prices. Its provisions as to preparation of foodstuffs for cold storage are the result of scientific, expert, and actual experiments made by skilled and learned officers of this Government. Its provisions as to tagging, as to prohibiting coldstorage products from being re-stored, as to selling cold storage for fresh products, and, in part, as to time limits, are all based on laws of a number of States already passed or upon careful experiment and actual proof of expert witnesses

The drastic features of the bill are only aimed at the corrupt and dishonest, at the gamblers and speculators, at the plunderbund of voracious vultures who stand around in the market places and reap where they have not sown and fatten on other people's food. This bill as to these people is drastic, and it ought to be drastic as to them. I do not believe there is a Member in this great House of Representatives of the plain American people who will stand up and defend any such plunder-

bund of food sharks.

Mr. FORDNEY. May I ask the gentleman a question just for information?

Mr. McKELLAR. Certainly.

Mr. FORDNEY. I am not disagreeing with the gentleman or agreeing with him.

Mr. McKELLAR. With pleasure.

Mr. FORDNEY. If the gentleman puts a restriction upon cold-storage plants that prevents them from purchasing eggs at l

a time when eggs are plentiful in the market, and there is a season of the year when eggs are plentiful and when they are scarce, are you going to aid or injure the man who produces?

Mr. McKELLAR. I am going to aid him.

Mr. FORDNEY. Are you going to aid him in getting a better price for his eggs when there is a surplus on the market by curbing cold storage which preserves them at a time when there are few fresh eggs on the market?

Mr. McKELLAR. We are going to aid him, if the gentleman

will permit me to say.

Mr. FORDNEY. Surely; I asked for information.

Mr. McKELLAR. Whenever you fix and leave free the law of competition in the purchase of these eggs from the producer and put the man who fixes the price by combinations out of business, then you are going to increase the price at that particular time to the producer.

The effect of this bill, in my judgment, if the gentleman will permit me, will be to distribute and conserve the food products and to equalize the prices throughout the year. That is the

object of it.

Mr. FORDNEY. Now, the principle of your bill, if it will do that, is a good principle, and makes it a good bill; but tell me how any man or set of men can control the price of eggs in a country town at a time of year when eggs are very plentiful on the market, when every merchant buys from every farmer, and every household has the privilege of buying from farmers on the street? Tell me how you are going to arrange the price

Mr. McKELLAR. I will just read what this gentleman says. I received this letter to-day. I do not know if it will answer the gentleman's query. He says:

SAVANNAH, GA., December 6, 1913.

Congressman McKellar, Tennessee.

Dear Sir: I spent the summer of 1912 in east Tennessee, between Mooresburg and Mooresburg Springs. I often saw the hotel people send to a near-by store and buy eggs at 14 cents, turkeys 10 cents, chickens 10 cents. The hucksters traveled through the country and bought from families and the cross-road stores their produce and hauled it to a near-by station and were met by the cold-storage men from Morristown, Tenn., who combined and bought it at a slight advance. They dressed the poultry and put everything in cold storage. Returning home in September, I stopped at Morristown and priced eggs from the cold-storage dealers and found them to be 23 cents. When I returned to this city they were 28 to 30 cents, and went on up to 35 and 40 cents, just what the cold-storage men chose to price them at. I am confident that you are right in placing the high cost of living to the cold-storage men, and that if you can restrict them to 90 per cent, or better still to 60 per cent, the bottom will drop out and the market will be governed by the supply and demand, as it used to be, and we will have legitimate prices on the necessaries of life. The supply is ample now, but the cold-storage plants restrict the offerings. By all means, control these cold-storage people, and thereby help the suffering poor throughout the entire country. There is no better illustration of the evil than is practiced at Morristown, Tenn. I beg to refer you to Mr. Charles G. Edwards, Member of Cengress of first district of Georgia.

Very respectfully,

WM. B. Sturrevant,

WM. B. STURTEVANT, 302 York Street West, Savannah, Ga.

Mr. FORDNEY. Taking it for granted that what he says is true, let me ask you this question: In April, May, and June, down in Tennessee and throughout the whole country, eggs are placed on the market which will not keep until September without being put into cold storage.

Mr. McKELLAR. That is correct.
Mr. FORDNEY. How is anyone going to control the price in April, May, and June unless they can keep those eggs until a later date when they are scarce in the market? It can only be done by cold storage?

Mr. McKELLAR. It ought to be done by cold storage. The

only thing we want to do is to protect the consumer of eggs.

Mr. FORDNEY. I agree with you,

Mr. McKELLAR. Label them and show the consumer what he is buying when he purchases these eggs. We must act without fear or favor and without injustice or malice. The whole country has its eye on this Congress as to what it is going to do about this. There is no doubt about it. There is not any proposition that has come before this House in years that has so roused public interest as this particular one. I do not mean my people particularly-

Mr. FORDNEY. Is it the farmer or the consumer in the city

that is aroused?

Mr. McKELLAR. I take it that the protest is from all classes of the people, because I know of no community in this country where the newspapers of the country are violating public sentiment. They nearly always photograph it rather than create it, according to my understanding. And I say that if there is nothing else but these publications, which have already done a great good, in my judgment, in bringing down the price of eggs and calling a halt on these monopolies, a great good has been done.

Mr. FORDNEY. I asked if those protests about high prices came from the producer or from the consumer in this country. I am asking for information and am not quarreling with the gentleman. A former Member of Congress made a statement once that he favored a law that would reduce the hours of a day's work from eight to six, and that law must be written. He said that he also favored a law that would increase that man's pay for a man's work, and that that law should be written. He said he also favored a law that would lower the cost and value of that labor. If I was the brother of a man who made that statement, I would disown him—

Mr. McKellar. I think I would, too.

Mr. FORDNEY (continuing). Because he is either a fool or

a knave.

Mr. McKELLAR. Mr. Speaker, we must act without fear or favor, without injustice or malice. The whole country has its eye on this proposition and upon the attitude of Congress toward it. The noble women are organizing everywhere for the purpose of getting relief from unwholesome food and extortionate prices. The producer must be protected against combinations and trades and trusts which unjustly affect the prices at which his products are purchased from him. consumer must be protected against rotten and unwholesome foods and against greedy "corners" which bring about extortionate prices. The careful conservation and distribution of all foodstuffs should be jealously guarded. The right of the honest middlemen to a reasonable compensation for the preservation and distribution of these foodstuffs. preservation and distribution of these foodstuffs must be scrupulously cared for. No injustice to any of these must be done. But the greedy speculator and gambler or violator of the law dealing in the necessities of life must be put out of business, even if he has to be put behind prison bars. We must not withhold the heavy hand of the law in the punishment of these who would fatten many other world's horse would fatten many other world's horse world. those who would fatten upon other people's hunger, or who would enrich themselves by extorting from honest toilers these extortionate prices for the prime necessities of life. [Applause,]

Gentlemen of the House, I thank you most cordially for your splendid attention and great interest in this question. Speaker, I ask unanimous consent to revise and extend my

remarks in the RECORD.

The SPEAKER. The gentleman from Tennessee [Mr. McKellar] asks unanimous consent to revise and extend his remarks in the Record. Is there objection?

There was no objection.

Mr. McKELLAR. I wish to insert the following as an appendix to my remarks:

THIS BILL SECTION BY SECTION.

After making these general remarks, I now desire to take up the bill section by section and explain to the House as best I may its various provisions.

SECTION 1.

This section merely makes it illegal to ship adulterated and misbranded food products from one State to another. This is under the interstate-commerce clause of the Constitution, and need not be further dealt with.

SECTION 2.

Section 2 sets out in detail the periods in which the food products mentioned in the bill may be held in storage without becoming adulterated. I will take these up in their order.

Beef: The limitation for cold storage of beef is fixed in the

bill at seven months. This is upon the following evidence:

Dr. Wiley, while not posing as an expert on this subject, thought four months was long enough to keep meats (p. 17).

Mr. Murrell said three months (p. 28). Mr. Sinclair said six or eight months at the outside (p. 44). Mr. Webber, of Washor eight months at the outside (p. 44). Mr. Webber, of Washington, D. C., said there was a deterioration of meats as shown by his experiments at the end of six months (p. 78). His experiments were made in the Center Market. Mr. Becker, who testified for the warehousemen, stated that beef in cold storage became rancid in eight or nine months (p. 186). Mr. Brownell, three or four months (p. 194). This was substantially the evidence before the hearings, and upon this evidence Senator Heyburn, unanimously supported by his committee, fixed the time at seven months, and I believe he was right about it.

Veal: The same general rules that apply to beef apply to

veal, except that it is much more tender and much more subject to deterioration. Mr. Becker said, when asked about the time of cold storage of veal: "That is a detail that I would not be so well informed on. I do not think I would be qualified to answer that. I have seen veal in storage for long periods of time—I think as long as two or three months—that looked good. It is sound and healthful food if properly stored for four or five mouths." This is practically the only definite evidence about yeal in the record, and Senator Heyburn places the limit at

four months. I think, under the proof, this was entirely too long. I think the first statement of Mr. Becker, that he had seen it when it looked good as long as two or three months, was correct, and I have fixed the limit at two months in my bill.

Possibly it ought to be fixed at a shorter period.

There is another reason why I have fixed it at two months. As we all know, the number of cattle in the United States has constantly been decreasing for a number of years, and one of the principal causes of this decrease is supposed to be the slaughter of young calves for yeal. This looks like a very reasonable proposition, and I think, in so far as the time is concerned, we might well afford to err on the right side by fixing the time at a shorter period if we can thereby increase the

number of eattle raised in our country.

Pork: Dr. Wiley was of the opinion that four months would be sufficient for meat (p. 17). Mr. Murrell said three months (p. 28). He did not have any objection to the four-months'

period fixed by Senator Heyburn in his bill (p. 37).

Sheep and goats: Mr. Becker was of the opinion that sheep kept about as well as beef (p. 187). But other witnesses did not go this far, and Senator Heyburn fixed the time at four months, and it seems to me this is proper.

Lambs: Lamb was fixed at 3 months for the obvious reason the breaking down of the tissue would occur sooner in a lamb than in a sheep, just as the breaking down of the tissue of veal

would occur more quickly than it would in beef.

Game and poultry: Game and poultry were fixed by Senator Heyburn and his committee at 3 months, and I have fixed the same period. Dr. Wiley testified as to experiments which he had made, and his account is very interesting. He and his assistants hired space in Center Market, which space was reserved solely for this use. He further testified:

served solely for this use. He further testified:

We make these determinations once every three months, supposing that was about the time when any changes which would be induced would be of sufficient magnitude to be discernible. The result of these examinations, briefly, are as follows: That at the end of the first three months the jury's verdict in regard to the taste of the articles was wholly unsatisfactory as to being able to discriminate between cold-storage bird and the freshly killed bird; about as many preferred the one as preferred the other. After a number of determinations of that kind on this, as well as other subjects, we came to the conclusion that there was no perceptible deterioration of flavor in the space of three months. In the second period of six months there was a very preponderating testimony in favor of the freshly killed bird, but there were still numerous instances where a furyman would select the six-months bird as being superior in flavor to the fresh bird, but there was a preponderating vote that we assumed from this fact that a considerable deterioration in taste had taken place at the end of the six months. At the end of nine months it was a rare thing for any man on the jury to make any mistake in regard to which was the cold-storage and which was not.

Mr. Gamble thought that poultry could be kept in cold storage for a period much longer than a year (p. 18). Mr. F. C. Cook, chemist in the Bureau of Chemistry, said there was a decided deterioration in six months (p. 61). Mr. Horne, of New York City, said it is the custom to carry poultry about four months in cold storage (p. 99). Mr. Mack said that poultry was usually carried in cold storage about six months (p. 236). This was, in substance, the evidence upon which the period was fixed at three months.

Dr. Mary E. Pennington, of the Department of Agriculture, says:

The dictum of the warehousemen that there is no change in cold-storage poultry and that it may be kept for an indefinite period can not be accepted in its entirety. Both microscopic study and the taste of the cooked fowl confirm the fact that, microscopically, visible degenera-tion does take place.

Dr. Pennington further says:

Although it is impossible to obtain exact statistics on the subject, it is estimated that approximately from 75 to 90 per cent of the poultry produced in the United States is for a longer or shorter period preserved in cold storage. While the number of ducks, turkeys, and geese is by no means small, chickens, of course, are greatly in the majority, and from the appearance of the cold-storage warehouses in our large cities it would seem to be almost a matter of routine that every chicken intended for market should sojourn there for a certain, or rather an uncertain, time.

Dr. Brownell said their time for cold storage of poultry was

three or four months (p. 195).

Fish: As to fish, Mr. Field, the attorney representing the New York Wholesale Fish Dealers' Association, thought fish could be kept indefinitely. Lawyerlike, Mr. Field did so much talking that I hardly know what he did say about fish, except that it could be carried indefinitely, which does not mean much (p. 195).

Mr. Mack said there was no change so long as covered with ice (p. 242). Mr. Worden said nobody kept fish in cold storage any longer than they had to (p. 248). Mr. Prankard said fish would keep from three to nine months.

Everybody knows that fish deteriorate very rapidly, and inasmuch as they can be caught at any time of the year and are distributed all over the country, I think, probably, we have made a mistake in making the time three months. There is more poisoning from eating fish than any other food product, and I think we ought to be very careful. Senator Heyburn and his committee fixed the time at three months. I believe it

ought to be fixed at two months.

Eggs: We now come to the most talked of of all food products to-day. Likewise, there are more differences of opinion as to how long eggs may be kept in cold storage. It is likewise a most difficult proposition, because of the following facts: In February, March, April, May, and June the production of eggs tremendously exceeds the consumption. To illustrate what I mean, in those months the various cities receive probably four or five times as many eggs as they can consume. true that because of this glut of the market eggs are placed in cold storage. Now, the contention of the egg dealers is, if they can carry eggs in cold storage only three months, and would have to quit putting them in cold storage in June, that by the latter part of September the cold-storage supply would be out, and there would be an absolute dearth of eggs from October until January, because there are comparatively few eggs laid during these months. It is further claimed that eggs put in cold storage in hot weather, as in the latter part of June, July, August, and September, do not keep as well. I do not believe there is any reason for this latter contention, except they are not as carefully examined before putting in cold storage as they should be. If they are good eggs when put in cold storage, weather conditions could not have any effect on them, for they would remain exactly the same for a period of at least three months under this testimony. Senator Heyburn and his committee fixed the period in which eggs may be kept in cold storage at three months. Realizing there is more force in the contention of the egg dealers I have modified Senator Heyburn's provisions by exceptions to this effect:

"That eggs held in cold storage not less than 3 months, or more than 7 months, may not be classed as adulterated, if they are, upon inspection, sound and wholesome and are stamped or labeled as follows: 'Second period cold-storage eggs.'" I believe that the period of 3 months with this proviso will bring about equitable and just distribution of the egg supply throughout the 12 months of the year, and at the same time give to the consuming public wholesome eggs and cheaper eggs. As it is now no consumer knows or very few of them at any rate know whether eggs that he buys are fresh eggs or cold-storage eggs. It takes an expert to tell. Cold-storage eggs are sold in every season of the year. We have no statistics on them. No reports are to be found. No information is furnished by the dealer or the storage houses. We know that the egg supply has increased faster than the population up until the last two or three years. We have not been able to get the figures for the last two or three years, but there is no reason to believe the supply of eggs has decreased. Mr. Preston says it has decreased. On the contrary, we believe it has increased, and yet prices have steadily gone up. The only possible reason for

this is that the prices have been manipulated.

Butter: The consensus of opinion is that butter can be kept in a fairly good state of preservation in cold storage for three months. Some witnesses testified that it can be held longer, some for a shorter period. After hearing all of the testimony Senator Heyburn and his committee unanimously reported upon a period of three months, and I think they were practically correct, and have so provided in my bill.

SO-CALLED EVIDENCE OF PACKERS NOT CONSIDERED.

I have not considered the statements of the packers to any of this matter for the reason I do not believe the statements given in the way they are given and under the conditions which they were given is worthy of belief or consideration. If these packers wanted the public to know the facts and wanted the public to know the truth, they would not object to appearing before the committee of Congress and stating the facts.

I want to suggest right here that I hope the subcommittee will require every packer or dealer who wants to be heard on this bill to appear in person and submit to cross-examination. ARTICLES TAKEN FROM COLD STORAGE NOT ALLOWED TO BE RETURNED TO COLD STORAGE.

The evidence taken by the committee of the Senate was practically unanimous that when any of the above-mentioned articles of food had been frozen, or in cold storage for any period of time and taken therefrom, the process of deterioration was very rapid, and more rapid than it would be at first, and consequently it was improper to permit such articles to be restored to cold storage. It was shown by the proof that vast quantities of poultry, for instance, were taken from cold storage just before Thanksgiving and the Christmas holidays, and after each of said holidays the left overs were restored to cold storage. All the witnesses condemned this practice except the packers, and they need not be considered for the reasons heretofore stated.

SECTION 2

Section 3 provides for the labeling of all articles of food or the package containing it; such labels to correctly state the time of production, killing, packing, or manufacturing and the period of time the article has been held in cold storage. is the subject about which the witnesses disagreed, a majority of them, however, being of the opinion that these labels were right. A number of them claimed that it would be expensive. The packers, especially, made this claim. An expert as to the cost, however, was produced and it was shown that it could be done for a practically inconsequential cost. Mr. Carlin H. Reeves, of Chicago, the manager of the B. F. Cummings Co., of that city, manufacturers of perforating machinery, showed that his concern manufactured machines that would make the cost of labeling practically inconsequential.

SECTION 4.

Section 4 is a subject of more interest, as it provides broadly that no adulterated or misbranded food products shall be sold or offered for sale in any State of the United States when it is or intended for interstate commerce or territory or possession thereof. Of course the provision is good in so far as the District of Columbia and the Territories and possessions of the United States are concerned, but I have not yet had time to examine the constitutional question whether it is good under the Constitution without regard to the commerce clause; that is to say, whether it comes under the general-welfare clause governing the welfare of the country.

SECTION 5.

Section 5 provides that if packages containing food products shall be broken the seller shall give to the purchaser all proper information in regard thereto, and that all food products and the packages it contains they shall bear truthful statements as to the quantity, quality, and character thereof, the time of placing the same in cold storage, and its removal therefrom. All of which regulations are certainly right and proper for the protection of the consumer.

SECTION 6.

Section 6 defines what cold storage is. It is intended to include all the products named in section 2, ranging from eggs, which are never frozen but kept at about 33, down to fish which is kept below zero.

SECTION 7.

Section 7 provides that any of the above-named articles which have been frozen in cold storage shall not be sold or offered for sale except in a frozen condition, and they shall not be inflated or manipulated so as to alter the appearance of the product or make it resemble the unfrozen product. This provision is obviously for the protection of the consumer.

SECTION 8.

Section 8 provides that products when placed in cold storage shall not be diseased or unsound, and that they shall not be put there if caught, handled, or slaughtered in an unsanitary

SECTION 9.

Section 9 gives the power to the President of the United States to make regulations in reference to the inspection of all articles of food coming within the provisions of this act, which is manifestly a proper provision.

SECTION 10.

Section 10 provides for the punishment of all parties found guilty of misbranding or adulterating any food product and the violation of the act. The fines are large and the punishment is severe, but certainly not more so than they should be. Anyone guilty of manipulating food of the country to the detriment of the consumer should be severely dealt with.

SECTION 11.

Proof in this record shows that the cold-storage people are practically all together—that is to say, they seem to be divided into two classes: First, those who store for hire; and, second, the packers. The warehousemen are joined together in an association. Evidently they are well organized, as shown from this proof. From the failure of the packers to come forward and testify, and from common understanding and knowledge, it is fairly certain they are organized. It is generally believed that the prices of all these are affected by an agreement existing between the various dealers as to when and how and for what price these products shall be put upon the market.

This section prohibits this agreement, with heavy fines and imprisonment, and I think it is a proper provision.

If these various cold-storage industries or packers are not joined and are not confederated together for the purpose of fixing prices of what they buy and of what they sell, and do not use cold storage to aid them in such agreement, then this provision will hurt no cold-storage concern or packer. On the other hand, if they have joined for any such purpose, it is manifest this Government ought to prohibit just such a combination.

SECTION 12.

It is generally believed that one of the methods by which prices are controlled is by what is known as a gentleman's agreement, the common understanding and implied understanding of certain persons in certain localities to fix the prices at which all these dealers buy and sell at a particular time.

This practice is prohibited by section 12, and the same may be said of it as was said of section 11.

#### SECTION 13.

It is commonly believed that the territory of the United States is divided up between certain rival concerns, so as to do away with the principle of natural competition and thus enable the several members of the association to reap larger profits from the consumer. If this belief is erroneous, then no one will be hurt by this provision. On the other hand, if it is well founded, those engaged in this nefarious practice should be punished.

#### SECTION 14.

This section simply provides that cold-storage products must not be sold as a pure product. It is obviously a proper provision and no one could object to it.

#### SECTION 15.

Frankly this section is aimed more particularly at the packers. We ought to have exact statistics. We have not got them. The packers will not furnish them. They ought to be made to.

The packers will not furnish them. They ought to be made to. Dr. Pennington says, "The warehousemen association holds itself ready to give these figures to any who are interested, and they are published in a number of places. The warehouses in the city of New York also make their storage holdings of eggs public. Chicago refuses to do so" (p. 168). We have accurate statistics on cotton, on wheat, and on other articles of merchandise, and surely there are no reasons why we should not have these statistics on these articles of food. On what meat have these pork packers fed that they can say to our Government, "We will furnish this information, but will not furnish that"? We must regulate them. It will be better for everybody and for the packers themselves as well.

### ADJOURNMENT.

Mr. CROSSER. Mr. Speaker, I move that the House do now

The motion was agreed to; accordingly (at 6 o'clock p. m.) the House adjourned until to-morrow, Tuesday, December 9, 1913, at 12 o'clock noon.

## EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Doorkeeper of the House of Representatives, transmitting an inventory of all property under his charge belonging to the United States (H. Doc. No. 430); to the Committee on Accounts and ordered to be printed.

2. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers, reporting certain claims against the United States which have been adjusted and settled by that official and approved by me, under river and harbor act approved June 25, 1910 (H. Doc. No. 431); to the Committee on Rivers and Harbors and ordered to be printed.

3. A letter from the assistant clerk of the Court of Claims,

3. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of Henry W. Chester v. The United States (H. Doc. No. 432); to the Committee on War Claims and ordered to be printed.

4. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of John Y. Hitt v. The United States (H. Doc. No. 433); to the Committee on War Claims and ordered to be printed.

5. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of Trustees of the First Baptist Church of Chattanooga, Tenn., v. The United States (H. Doc. No. 434); to the Committee on War Claims and ordered to be printed.

6. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of Elijah B. Bailey v. The United States (H. Doc. No. 435); to the Committee on War Claims and ordered to be printed.

7. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of Andrew G. Fitz v. The United States (H. Doc. No. 436); to the Committee on War Claims and ordered to be printed.

8. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed in the case of Ralph Rogers, son and sole heir of Dudley Rogers, deceased (H. Doc. No. 437); to the Committee on War Claims and ordered to be printed.

9. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the finding of fact and conclusion in the case of Preston P. Doughty v. The United States (H. Doc. No. 438); to the Committee on War Claims and

ordered to be printed.

10. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the finding of fact and conclusion filed in the case of Frederick E. Ransom v. The United States (H. Doc. No. 439); to the Committee on War Claims and ordered to be printed.

11. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the finding of fact and conclusions filed in the case of William M. Gooding v. The United States (H. Doc. No. 440); to the Committee on War Claims

and ordered to be printed.

12. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the finding of fact and conclusions filed in the case of Thomas W. Durham v. The United States (H. Doc. No. 441); to the Committee on War Claims and ordered to be printed.

13. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusions filed in the case of George H. Devol v. The United States (H. Doc. No. 442); to the Committee on War Claims and

ordered to be printed.

14. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion in the case of William Moore v. The United States (H. Doc. No. 443); to the Committee on War Claims and ordered to be printed.

15. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusions filed in the case of Philo J. Beveridge, son and one of the heirs of John L. Beveridge, deceased, v. The United States (H. Doc. No. 444); to the Committee on War Claims and ordered to be printed.

16. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusions in the case of Mary E. L. Callaway, widow of James E. Callaway, deceased, v. The United States (H. Doc. No. 445); to the Committee on War Claims and ordered to be printed.

17. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed in the case of Ella S. Marsh, one of the heirs of Francis G. Sherman, deceased, v. The United States (H. Doc. No. 446); to the Committee on War Claims and ordered to be printed.

18. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusions filed in the case of Amanda Pierce, one of the heirs of Henry C. Pierce, deceased, v. The United States (H. Doc. No. 447); to the Committee on War Claims and ordered to be printed.

19. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusions filed in the case of Sarah Posey, sole heir of Thomas B. Posey, deceased, v. The United States (H. Doc. No. 448); to the Committee on War Claims and ordered to be printed.

20. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed in the case of Green B. Turner v. The United States (H. Doc. No. 449); to the Committee on War Claims and ordered to be printed.

21. A letter from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed in the case of Julia F. Yates v. The United States (H. Doc. No. 450); to the Committee on War Claims and ordered to be printed.

# REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr., LEVER, from the Committee on Agriculture, to which was referred the bill (H. R. 7951) to provide for cooperative agricultural extension work between the agricultural colleges in the several States receiving the benefits of an act of Congress approved July 2, 1862, and acts supplementary thereto, and the United States Department of Agriculture, reported the same

with amendment, accompanied by a report (No. 110), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. WATKINS, from the Committee on the Revision of the Laws, to which was referred the bill (H. R. 5850) to amend section 162 of the act to codify, revise, and amend the laws relating to the judiciary, approved March 3, 1911, reported the same without amendment, accompanied by a report (No. 111), which said bill and report were referred to the House Calendar.

## CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 9892) granting an increase of pension to Isaac Zimmerman, and the same was referred to the Committee on Pensions.

## PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. MURRAY of Oklahoma: A bill (H. R. 10064) to provide for a per capita payment to the Chickasaws and Choctaws; to the Committee on Indian Affairs.

Also, a bill (H. R. 10065) authorizing persons holding title from or through an allottee of Indian lands in the State of Oklahoma and his assigns to recover such land; to the Committee on Indian Affairs.

Also, a bill (H.R.10066) to provide for the purchase of homes for the Mississippi Choctaws; to the Committee on Indian

Also, a bill (H. R. 10067) to provide for drainage of Indian allotments of the Five Civilized Tribes; to the Committee on Indian Affairs.

By Mr. TALBOTT of Maryland: A bill (H. R. 10068) for the relief of certain officers on the retired list of the United

States Navy; to the Committee on Naval Affairs.

By Mr. STEPHENS of Nebraska: A bill (H. R. 10069) providing for the cancellation of an allotment trust patent and reallotment of the land to heirs of deceased allottee; to the Committee on the Public Lands.

By Mr. TAYLOR of Colorado: A bill (H. R. 10070) authorizing the Secretary of the Interior to designate certain tracts of land in the States of Arizona, California, Colorado, Kansas, Montana, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Washington, and Wyoming upon which continuous residence shall not be required under the homestead law; to the Committee on the Public Lands.

Also, a bill (H. R. 10071) providing for camping grounds along public highways through forest reserves and other public lands; to the Committee on the Public Lands.

Also, a bill (H. R. 10072) authorizing summer homestead entries; to the Committee on the Public Lands.

Also, a bill (H. R. 10073) extending the time and reducing the amount of annual payments to be made by entrymen upon reclamation projects; to the Committee on Irrigation of Arid

Also, a bill (H. R. 10074) to provide for the erection of a public building in the city of Montrose, Colo.; to the Committee on Public Buildings and Grounds.

By Mr. ADAIR: A bill (H. R. 10075) to authorize the payment of pensions monthly; to the Committee on Invalid Pensions.

By Mr. MURRAY of Oklahoma: A bill (H. R. 10076) for the regulation of the use of the mails by stock exchanges and their members, and to amend certain sections of the Criminal Code of the United States Compiled Statutes relating to lotteries, and for other purposes; to the Committee on the Post Office and Post Roads.

By Mr. TEN EYCK: A bill (H. R. 10077) to provide for a survey and estimate of cost of a deep-water channel in the Hudson River, N. Y., between the city of Hudson and the dam

at Troy; to the Committee on Rivers and Harbors.

By Mr. EDWARDS: A bill (H. R. 10078) authorizing the Secretary of State to invite other nations of the world to participate in the drainage congress to be held at Savannah, Ga., 1914, and to appropriate \$10,000 to help defray the expenses thereof; to the Committee on Foreign Affairs

By Mr. EDMONDS: A bill (H. R. 10079) appropriating \$642,000 for improvements at Frankford Arsenal, Philadelphia,

Pa.; to the Committee on Appropriations.

By Mr. LINDQUIST: A bill (H. R. 10080) providing for the labeling, marking, and tagging of all fabrics, leather, and rubber goods, as hereinafter designated, and providing for the fumigation of same; to the Committee on Interstate and Foreign Commerce.

By Mr. PADGETT: A bill (H. R. 10081) to make the tenure of the office of the major general commandant of the Marine Corps for a term of four years; to the Committee on Naval Affairs.

By Mr. LEE of Georgia: A bill (H. R. 10082) authorizing the erection of a post-office building at Rossville, Ga.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 10083) to fix the compensation of letter carriers of the Rural Delivery Service at a salary of \$1,500 per annum; to the Committee on the Post Office and Post Roads.

By Mr. JOHNSON of Washington: A bill (H. R. 10084) to authorize the changing of the names of the steamships Buckman and Watson; to the Committee on the Merchant Marine

and Fisheries.

By Mr. KEY of Ohio: A bill (H. R. 10085) to pension the widows of the officers and enlisted men of the Civil War who married such officers and enlisted men subsequent to June 27, 1890, and to pension widow and minor children of any officer or enlisted man who served in the War with Spain or Philippine insurrection; to the Committee on Pensions

By Mr. FERRIS: A bill (H. R. 10086) authorizing the Secretary of the Interior to sell to the city of Lawton, Okla., a tract of land to be used for watershed and water-supply purposes; to the Committee on the Public Lands.

By Mr. SUTHERLAND: A bill (H. R. 10087) providing for the appointment of a board for the purpose of selecting a suit-able site for a naval armor plant in the Ohio Valley, in the Parkersburg manufacturing district, and to submit a report of the cost and availability of said plant; to the Committee on Naval Affairs.

By Mr. OGLESBY: A bill (H. R. 10088) to prevent and punish the desecration, mutilation, or improper use of the flag of the United States of America; to the Committee on the Judiciary.

By Mr. HOBSON: Joint resolution (H. J. Res. 163) proprosing an amendment to the Constitution of the United States;

to the Committee on the Judiciary.

By Mr. ADAMSON: Joint resolution (H. J. Res. 165) for recognition of the services of the late David Du B. Gaillard. lieutenant colonel, Corps of Engineers, United States Army, as a member of the Isthmian Canal Commission, and for the relief of Mrs. Katherine Davis Gaillard; to the Committee on Interstate and Foreign Commerce.

By Mr. MANN: Resolution (H. Res. 333) directing the Secretary of War to send to the House of Representatives information concerning the operations of the Washington-Alaska military cable and telegraph system for the fiscal year ending June 30, 1913; to the Committee on Military Affairs.

By Mr. CARY: Resolution (H. Res. 334) authorizing and directing the Committee on the District of Columbia of the House, by subcommittee or otherwise, to investigate the health department of the District of Columbia and report its findings; to the

Committee on the District of Columbia.

By Mr. LAFFERTY: Resolution (H. Res. 335) to amend the rules of the House of Representatives by providing for record votes in committees, budget system for supply bills, authorizing two motions to recommit, providing for third reading of bills by title only, providing for yea-and-nay votes in Committee of the Whole House, limiting debate on private bills and bills on Calendar Wednesday, setting apart additional day for consideration of private bills and special days for motions to discharge committees, and providing for a committee on equal suffrage; to the Committee on Rules.

# PRIVATE BILLS AND RESOLUTIONS.

Also, a bill (H. R. 10107) granting an increase of pension to Lucia Barber Thorpe; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10108) granting an increase of pension to James McCarthy; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10109) granting an increase of pension to Margaret Ann Higgins; to the Committee on Invalid Pensions

Also, a bill (H. R. 10110) granting an increase of pension to Horace E. Jones; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10111) granting an increase of pension to Chancey M. Hall; to the Committee on Invalid Pensions.

By Mr. KENNEDY of Rhode Island: A bill (H. R. 10112) granting an increase of pension to Marion S. B. Sharps; to the Committee on Invalid Pensions.

By Mr. LANGLEY: A bill (H. R. 10113) granting a pension to William Wicker; to the Committee on Pensions.

Also, a bill (H. R. 10114) granting an increase of pension to Alexander Childers; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10115) for the relief of J. M. Potter; to the

Committee on Claims.

By Mr. LLOYD: A bill (H. R. 10116) granting a pension to James D. Silman; to the Committee on Pensions.

By Mr. MOON: A bill (H. R. 10117) granting a pension to Frank V. Griffith; to the Committee on Pensions.

Also, a bill (H. R. 10118) granting a pension to George W. Pinion; to the Committee on Pensions.

Also, a bill (H. R. 10119) granting an increase of pension to James M. Lloyd; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10120) granting an increase of pension to

William L. Lacewell; to the Committee on Invalid Pensions.

By Mr. MANN: A bill (H. R. 10121) to reimburse Samuel M. Fitch, collector of internal revenue, first district of Illinois, for cigar stamps lost or stolen in transit; to the Committee on Claims.

Also, a bill (H. R. 10122) to credit Samuel M. Fitch, collector of internal revenue, first district of Illinois, on the books of the Treasury Department with the sum of \$1,500 for cigar stamps

lost or stolen in transit; to the Committee on Claims.

By Mr. MURRAY of Oklahoma: A bill (H. R. 10123) granting a pension to Mary Van Duyne Evans; to the Committee on

Invalid Pensions

By Mr. POST: A bill (H. R. 10124) granting an increase of pension to James T. McCartney; to the Committee on Invalid

Also, a bill (H. R. 10125) granting a pension to Hannah Kizer;

to the Committee on Invalid Pensions. Also, a bill (H. R. 10126) granting a pension to Hannah D. Underwood; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 10127) to place the name of Capt. Charles E. Tucker on the unlimited retired list of the Regular Army of the United States, with rank and pay as a retired officer of the Regular Establishment; to the Committee on Military Affairs.

By Mr. RUSSELL: A bill (H. R. 10128) granting a pension

By Mr. RUSSELL: A bill (H. R. 10129) granting a pension to John T. Hensley; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10129) granting an increase of pension to William Husky; to the Committee on Invalid Pensions.

By Mr. SLOAN: A bill (H. R. 10130) granting an increase of pension to Andrew J. Bruer; to the Committee on Invalid Pensions.

By Mr. SPARKMAN: A bill (H. R. 10131) for the relief of

William H. English; to the Committee on Claims. By Mr. TALBOTT of Maryland: A bill (H. R. 10132) granting an increase of pension to J. Woodfin Minifie; to the Com-

mittee on Invalid Pensions.

By Mr. TUTTLE: A bill (H. R. 10134) granting an increase of pension to Francis Kenstler; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10135) granting an increase of pension to Robert Bimson; to the Committee on Invalid Pensions.

Also, a bill (H. R. 10136) granting an increase of pension to

Henry Hann; to the Committee on Invalid Pensions.

By Mr. McCOY: A bill (H. R. 10137) for the relief of Robert
Hamilton McLean; to the Committee on Naval Affairs.

By Mr. TALBOTT of Maryland: Joint resolution (H. J. Res.
162) for the relief of the heirs of George B. Simpson; to the Committee on Claims.

## PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of the Seattle Commercial Club, favoring an amendment to the seamen's bill; to the Committee on the Merchant Marine and Fisheries.

Also (by request), petition of Charles H. Clark, of Cleveland, Ohio, protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

Also (by request), memorial of the Portland Chamber of Commerce, of Portland, Oreg., favoring passage of pending Senate bill 3063, relative to employment outside of the classified service of competent consulting architects in the Supervising Architect's Office in the Treasury Department; to the Committee on Public Buildings and Grounds.

By Mr. ALLEN: Memorial of the Business Men's Club of Cincinnati, Ohio, approving suspension for one year of naval

construction; to the Committee on Naval Affairs.

By Mr. ASHBROOK: Evidence to accompany House bill 9698, for the relief of Farley Connerty; to the Committee on

By Mr. BARNHART: Petition of citizens of Michigan City, Ind., protesting against the passage of the seamen's bill in its present form; to the Committee on the Merchant Marine and Fisheries.

By Mr. BRITTEN: Memorial of the Chicago Post Office Clerks' Union, Local No. 1, National Federation of Post Office Clerks, favoring the passage of the Bartlett-Bacon antitrust bills (H. R. 1873 and S. 927); to the Committee on the Judi-

By Mr. DALE: Memorial of the Portland Chamber of Commerce, of Portland, Oreg., favoring approval of Congress of pending Senate bill 3063, relative to employment in the Office of the Supervising Architect of the Treasury Department outside of the classified service of consulting architects to relieve the congested condition of that office; to the Committee on Public Buildings and Grounds.

Also, petition of G. W. Van Slyke and Horton, of Albany, N. Y., favoring the passage of the Bartlett bill (H. R. 4322) for 1-cent letter postage; to the Committee on the Post Office and Post Roads.

By Mr. DOOLITTLE: Petitions of business men of St. Mary, Kans., favoring the passage of bill (H. R. 5308) relative to mail-order houses; to the Committee on Ways and Means.

By Mr. EDMONDS: Petition of the Philadelphia (Pa.) duce Exchange, the Continental Exchange, and the Oil Trade Association, of Philadelphia, Pa., all favoring the passage of legislation for the establishment of a regional reserve bank in Philadelphia; to the Committee on Banking and Currency.

By Mr. ESCH: Memorial of the Portland Chamber of Commerce, of Portland, Oreg., favoring the approval by Congress of the pending Senate bill (S. 3063) relative to employment of consulting architects for the Supervising Architect's Office in the Treasury Department; to the Committee on Public Buildings and Grounds.

By Mr. GRAHAM of Pennsylvania: Petition of the Philadelphia (Pa.) Produce Exchange, favoring the passage of legislation for the establishment of a regional reserve bank in Phila-

delphia; to the Committee on Banking and Currency.

By Mr. JOHNSON of Washington: Memorial of the Commercial Club of Seattle, Wash., favoring the passage of Senate bill

(S. 136) relative to the protection of life at sea; to the Committee on the Merchant Marine and Fisheries.

Also, memorial of the Chamber of Commerce of Cordova, Alaska, favoring the passage of the bill providing for the construction of a railroad in Alaska by the Government; to the Committee on the Territories.

By Mr. LAFFERTY: Petition of the Portland Chamber of Commerce, Portland, Oreg., favoring the passage of bill (8, 3063) authorizing the employment of a sufficient number of competent consulting architects to relieve the present congested condition of the Supervising Architect's Office in the Treasury

Department; to the Committee on Public Buildings and Grounds. By Mr. MOON: Papers to accompany bill for the relief of William L. Lacewell; to the Committee on Invalid Pensions.

Also, papers to accompany bill for the relief of Frank N. Griffith; to the Committee on Pensions.

Also, papers to accompany bill for the relief of James M.

Lloyd; to the Committee on Invalid Pensions. Also, papers to accompany bill for the relief of George W.

to the Committee on Pensions.

By Mr. SCULLY: Petitions of citizens of the State of New Jersey, protesting against the passage of the seamen's bill unless amended to exempt vessels in the bay; to the Committee on the Merchant Marine and Fisheries.

## SENATE.

## Tuesday, December 9, 1913.

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D.

COE I. CRAWFORD, a Senator from the State of South Dakota; GILBERT M. HITCHCOCK, a Senator from the State of Nebraska; and WILLIAM P. JACKSON, a Senator from the State of Maryland, appeared in their seats to-day.

The VICE PRESIDENT. The Secretary will read the Jour-

nal of the proceedings of the preceding session.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Fletcher Gallinger Hitchcock Hollis Hughes O'Gorman Smith, Mich. Smith, S. C. Ashurst Owen Page Perkins Bacon Bankhead Smoot Sterling Stone Sutherland Bankhead Bradley Brady Brandegee Bristow Bryan Burleigh Pomerene Pomerene Ransdell Reed Robinson Root Shafroth Sheppard Sherman Shields Shively James Johnson Jones Sutherland Swanson Thomas Thompson Thornton Townsend Vardaman Walsh Weeks Williams Kenyon Kern Burton Chamberlain Lane Chamberlair Chilton Clarke, Ark. Crawford Cummins Dillingham Lea Martin, Va. Martine, N. J. Nelson Norris Simmons Smith, Ga.

Mr. SHEPPARD. I wish to announce the unavoidable absence of my colleague [Mr. Culberson]. He is paired with the Senator from Delaware [Mr. DU PONT]. This announcement may stand for the day.

The VICE PRESIDENT. Sixty-four Senators have answered to the roll call. There is a quorum present. The Secretary will read the Journal of the proceedings of the preceding day.

The Journal of yesterday's proceedings was read and approved. ANNUAL REPORT OF THE COMPTROLLER OF THE CURRENCY (H. DOC. NO. 452).

The VICE PRESIDENT laid before the Senate the fiftyfirst annual report of the Comptroller of the Currency for the year ended October 31, 1913, which was referred to the Committee on Banking and Currency and ordered to be printed.

FRENCH SPOLIATION CLAIMS.

The VICE PRESIDENT laid before the Senate communications from the assistant clerk of the Court of Claims, transmitting findings of fact and conclusions of law filed under the act of January 20, 1885, in the French spoliation claims set out in the annexed findings by the court relating to the following

In the cause of the brig Adventure, master, Benjamin Bioren

(H. Doc. No. 458); In the cause of the ship Sally, master, Daniel McPherson (H. Doc. No. 457).

In the cause of the brig Almy, master, Mitchell Cutter (H. Doc. No. 455);
In the cause of the brig Delight, master, John Glazler (S.

Doc. No. 265); and
In the cause of the brig Nancy, master, Alexander Duguid (H. Doc. No. 456).

FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate the following communications from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusions filed by the court in the following causes

The cause of George B. Drake v. The United States (S. Doc.

No. 267):

The cause of Elizabeth B. Beal, administratrix of George L. Beal, deceased, v. The United States (S. Doc. No. 268);

The cause of Guy C. Pierce v. The United States (S. Doc. No.

The cause of F. G. Farrington, administrator of Stewart Hunter, deceased, v. The United States (S. Doc. No. 270)

The cause of Hattie L. Willis and Mollie T. Willis, daughters and sole heirs of Phlegmon W. Willis, deceased, v. The United States (S. Doc. No. 271);

The cause of Minerva A. McMillan, widow of James W. Mc-

Millan, v. The United States (S. Doc. No. 272);

The cause of Eliza J. Orr, widow of William A. Orr, v. The United States (S. Doc. No. 273);

The cause of Mary E. Smith, widow of John D. Smith, v. The United States (S. Doc. No. 274);
The cause of Willamina R. Allenbaugh, widow of Charles T.

Allenbaugh, v. The United States (S. Doc. No. 275)

The cause of Sophia E. Keys, widow of Allen C. Keys, v. The United States (S. Doc. No. 276);

The cause of John Hobensack v. The United States (S. Doc. No. 277);

The cause of William M. Paul v. The United States (S. Doc. No. 278);

The cause of Thomas E. Camburn v. The United States (S. Doc. No. 279);

The cause of M. C. Marsh, executor of Eugene A. Marsh, deceased, v. The United States (S. Doc. No. 280);

The cause of Benjamin Hecht v. The United States (S. Doc. No. 281);

The cause of Rhode Island Hospital Trust Co., executor of Zephaniah Brown, deceased, v. The United States (S. Doc. No.

The cause of Earl M. Rogers v. The United States (S. Doc. No. 283);

The cause of Ernest Lomler v. The United States (S. Doc. No. 284);

The cause of John F. Dumont v. The United States (S. Doc. No. 285):

The cause of Thomas M. Brady v. The United States (S. Doc. No. 286):

The cause of James A. Seebolt, administrator of the estate of John H. Seebolt, deceased, v. The United States (S. Doc. No. 287):

The cause of Mary G. Bright, executrix of George A. Bright, deceased, v. The United States (S. Doc. No. 288);
The cause of Christopher C. Andrews v. The United States

(S. Doc. No. 289); The cause of Lewis M. Jarvis v. The United States (S. Doc.

No. 290); The cause of Mary Lodwick, widow of Murty W. Lodwick,

deceased, v. The United States (S. Doc. No. 291); The cause of Adam Smith Leib v. The United States (S. Doc.

No. 292);

The cause of Charles P. Wickham and Samuel A. Wildman, executors of estate of Frederick A. Wildman, deceased, v. The United States (S. Doc. No. 293);

The cause of Charles D. Armstrong v. The United States (S. Doc. No. 294);

The cause of Abbie A. Upson, widow of Henry Upson, deceased, v. The United States (S. Doc. No. 295)

The cause of Elise Brammer, daughter and sole heir of Henry Kroeger, deceased, v. The United States (S. Doc. No. 296); The cause of Ludwell M. Cunard v. The United States (S.

Doc. No. 297);

The cause of County of Jessamine, State of Kentucky, v.

The United States (S. Doc. No. 298);
The cause of County of Newton, State of Missouri, v. The United States (S. Doc. No. 299);
The cause of The Curators of Central College of Fayette, Mo.,

v. The United States (S. Doc. No. 300);
The cause of James L. Wharton v. The United States (S. Doc.

No. 301);

The cause of Nannie B. Smith, one of the heirs of Lemuel N. Bishop, deceased, v. The United States (S. Doc. No. 302) The cause of Charles C. Adams v. The United States (S. Doc.

No. 303); The cause of Albert H. Lanphear v. The United States (S. Doc. No. 304);

The cause of Lizzie W. Townsley, widow of Artemus D. Townsley, v. The United States (S. Doc. No. 305); and

The cause of Frank J. Warren and Lily J. Warren, children and sole heirs of Fitz Henry Warren, deceased, v. The United

States (S. Doc. No. 306).

The VICE PRESIDENT. The findings in these several causes, except. I believe, as to four, are that they are not legal or equitable claims against the Government of the United States. In four of the causes the court decides that they are equitable claims against the Government. The Chair thinks they should be referred to the Committee on Claims, and that action will be taken.

#### JENNIE R. W. VOLLMER V. THE UNITED STATES.

The VICE PRESIDENT laid before the Senate a communication from the assistant clerk of the Court of Claims, transmitting a certified copy of the findings of fact and conclusion filed by the court in the cause of Jennie R. W. Vollmer, administratrix de bonis non of the estate of Malbone F. Watson, deceased. v. The United States, which cause was referred to the court by the resolution of the United States Senate under the act of

March 3, 1911, known as the Judicial Code.

The VICE PRESIDENT. This finding of the court is that it is a legal claim. The Chair believes that it should be referred

to the Committee on Appropriations.

Mr. GALLINGER. That is correct.

The VICE PRESIDENT. It will be so referred.

Mr. BRYAN. Mr. President, may I inquire of the Chair whether the report of the Court of Claims, which was ordered referred to the Committee on Appropriations, is a judgment of that court or is it a simple finding that there is a legal claim against the Government? If it is a judgment, of course it should go to the Committee on Appropriations; otherwise, it seems to me, it ought to be referred to the Committee on Claims.

The VICE PRESIDENT. The Chair is frank to say to the

Senator from Florida that there are about 500 pages, and this

matter just came in this morning.

Mr. BRYAN. I ask that the finding may be referred to the Committee on Claims, and if it is a judgment of the court, then that committee can report it back to the Senate and it can be sent to the Committee on Appropriations.

Mr. GALLINGER. Mr. President, I feel quite sure that all favorable findings by the court relating to any claims submitted to the court have been referred heretofore to the Committee on

Appropriations. I have no interest in it at all— Mr. BRISTOW. Will the Senator yield a moment? If the bill submitting the claims to the Court of Claims authorizes the court to make finding in whatever amount it may think is due and render a judgment against the United States, then it goes to the Committee on Appropriations.

Mr. GALLINGER. Certainly.
Mr. BRISTOW. But if it is purely for a finding of fact, it comes back to the Committee on Claims.
Mr. GALLINGER. That is right.
The VICE PRESIDENT. There is a large number of these

claims, and the Chair will ask as a personal favor that Senators acquainted with the procedure may examine them and then

advise the Chair as to what course shall be taken.

Mr. BRYAN. That was my object in asking that they should
go to the Committee on Claims. Then that committee can go to the Committee on Claims. Then that committee can report them back if a reference to the Committee on Appropriations is the proper course, and they can be so referred.

The VICE PRESIDENT. That will be done, then.

## MESSAGE FROM THE HOUSE,

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed the following bill and joint resolutions, in which it requested the concurrence of the Senate:

H. R. 9411. An act relating to expenditure of money received on account of liquor licenses, Washington Market Co., and from

other sources

H. J. Res. 107. Joint resolution directing the Secretary of the Treasury to transfer \$1,003,257.24 upon his books from the District of Columbia to the credit of the United States; and

H. J. Res. 164. Joint resolution authorizing the Secretary of the Senate and the Clerk of the House to pay the officers and employees of the Senate and House, including the Capitol police, their respective salaries for the month of December, 1913, on the 20th day of said month.

## PETITIONS AND MEMORIALS.

Mr. BURTON. I present resolutions adopted by the Business Men's Club Co. of Ohio, a prominent business and social organization, favoring the international suspension of naval construc-

tion program. The resolutions are brief, and I ask that they be printed in the RECORD and referred to the Committee on Naval Affairs.

There being no objection, the resolutions were referred to the Committee on Naval Affairs and ordered to be printed in the RECORD, as follows:

Whereas the following resolution (H. Res. 298) has been introduced in the United States Congress:

the United States Congress:

"Resolved, That in the opinion of the House of Representatives the declaration of the Lord of the Admiralty of Great Britain, the Right Hon. Winston Churchill, that the Government of the United Kingdom is willing and ready to cooperate with other Governments to secure for one year a suspension of naval construction program, offers the means of immediately lessening the enormous burdens of the people and avoiding the waste of investment in war material.

"Resolved, That a copy of thir resolution be furnished the President, with the request that, so far as he can do so, having due regard for the interests of the United States, he use his influence to consummate the agreement suggested by the Right Hon. Winston Churchill": Therefore Resolved, That the Business Men's Club Co. heartily approves the above resolution, and the secretary is hereby instructed to send copies of the action of this body to the President of the United States, the Senators from Ohio, and Representatives Allen and Bowdle.

Mr. THOMPSON presented positions of the Commercial Club.

Mr. THOMPSON presented petitions of the Commercial Club of Concordia, Kans.; of James H. Little and sundry other citizens of La Crosse, Kans.; and of W. J. Heiney and sundry other citizens of Grainfield, Kans., praying for the early passage of the pending banking and currency bill, which were ordered to lie on the table

Mr. OWEN. I present a memorial from the legislative council of the conference of Progressive State Granges, relative to the Mr. OWEN. pending banking and currency bill. I ask that the memorial lie on the table and be printed in the RECORD.

There being no objection, the memorial was ordered to lie on the table and to be printed in the RECORD, as follows:

Memorial on the pending banking and currency legislation. To the Senate and House of Representatives of the United States of America in Congress assembled:

Memorial on the pending banking and currency legislation.

To the Senate and House of Representatives of the United States of America in Congresa assembled:

We, the undersigned members of the legislative council of the Conference of Progressive State Granges, herewith memorialize you concerning the proposed reform of the banking and currency system.

We approve the main features of the House bill as amended and presented to the Senate by the chairman of the Senate committee, with the following exceptions:

(1) We believe that the law should provide for not less than 12 regional reserve banks. The country divides naturally into commercial centers, and each of these centers should have a regional reserve bank.

(2) We believe that the forthcoming law should enunciate a rule whereby the volume of the paper currency that is to be used in combination with the metallic money shall be properly gauged, so that there can not be any undue inflation nor any undue contraction, the ideal being stability in the purchasing power of money. When justice shall thus be established the money question will no longer be a political issue, any more than is to-day the number of cubic inches in the bushel or the number of ounces in the pound. The bill as introduced in the two Houses last spring contained the needed rule, and we suggest that it be restored—in other words, that paragraph (d) of section 15 be amended to read:

"Every individual reserve bank shall have power \* \* \* (d) to establish from time to time, subject to review and determination of the Federal reserve board, rates of discount to be charged by the Federal reserve bank for each class of paper, which shall be fixed with a view of accommodating commerce and promoting stability in the purchasing power of money.

The italicized portion is the amendment we propose.

(3) We believe that the Federal reserve notes provided for in section 17 should be full legal tender and be issued only in such quantities and rettred in such manner as will maintain stability in the purchasing

Respectfully.

Respectfully,

C. B. Kegley,
O. Gardner,
WM. T. Creasy,
John A. McSparrow,
Geo. P. Hampton,
Legislative Council, Conference of Progressive State Granges.
HINGTON, D. C., December 1, 1918 WASHINGTON, D. C., December 1, 1913.

State granges represented in the conference: Colorado, Idaho, Kentucky, Maine, Oregon, Pennsylvania, South Dakota, and Washington.

## BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GALLINGER:

A bill (S. 3600) making an appropriation for the construc-tion of a dry dock at the Portsmouth Navy Yard; to the Committee on Naval Affairs.

A bill (S. 3601) granting an increase of pension to Eunice M. Boynton (with accompanying papers); to the Committee on

By Mr. TOWNSEND:

A bill (S. 3602) providing for the disposition of land of the United States no longer considered suitable for use of the Organized Militia as target ranges; to the Committee on Mili-

By Mr. CHAMBERLAIN:

A bill (S. 3603) for the relief of John W. Hagan; to the Committee on Military Affairs.

By Mr. SHERMAN:

A bill (S. 3604) granting an increase of pension to Simpson Newman; to the Committee on Pensions.

By Mr. KERN:

A bill (S. 3605) for the relief of Jonathan Baker (with accompanying papers); to the Committee on Military Affairs.

A bill (S. 3606) granting a pension to Laura M. Goodwine

(with accompanying papers);

A bill (S. 3607) granting a pension to Mary E. Howard (with

accompanying papers); and A bill (S. 3608) granting an increase of pension to Silas W. Norris (with accompanying papers); to the Committee on Pensions.

#### DELEGATE FROM THE DISTRICT OF COLUMBIA.

Mr. POINDEXTER submitted an amendment intended to be proposed by him to the bill (S. 2863) providing for the election of a Delegate to the House of Representatives from the District of Columbia, and for other purposes, which was re-ferred to the Committee on the District of Columbia and ordered to be printed.

#### AMENDMENT TO THE RULES.

Mr. SMOOT. According to the notice I gave on December 6 of a proposed amendment to paragraph 1 of Rule XXIX, I submit the following resolution and ask that it be referred to the Committee on Rules.

Mr. GALLINGER. Let it be read first, Mr. President.

The VICE PRESIDENT. The Secretary will read the reso-

The resolution (S. Res. 234) was read and referred to the Committee on Rules, as follows:

Committee on Rules, as follows:

Resolved, That paragraph 1 of Rule XXIX be amended by inserting in line 8, between the words "Senate" and "otherwise," the words "shall by vote," so that the paragraph as amended shall read:

"I. Every motion to print documents, reports, and other matter transmitted by either of the executive departments, or to print memorials, petitions, accompanying documents, or any other paper, except bills of the Senate or House of Representatives, resolutions submitted by a Senator, communications from the legislatures or conventions, lawfully called, of the respective States, and motions to print by order of the standing or select committees of the Senate, shall, unless the Senate shall by vote otherwise order, be referred to the Committee on Printing. When a motion is made to commit with instructions, it shall be in order to add thereto a motion to print.

## HOUSE BILL AND JOINT RESOLUTIONS REFERRED.

The following bill and joint resolutions were read twice by their titles and referred to the Committee on the District of

H. R. 9411. An act relating to expenditure of money received on account of liquor licenses, Washington Market Co., and from other sources: and

H. J. Res. 107. Joint resolution directing the Secretary of the Treasury to transfer \$1,003,257.24 upon his books from the District of Columbia to the credit of the United States.

H. J. Res. 164. Joint resolution authorizing the Secretary of the Senate and the Clerk of the House to pay the officers and employees of the Senate and House, including the Capitol police, their respective salaries for the month of December, 1913, on the 20th day of said month, was read twice by its title and re-ferred to the Committee on Appropriations.

## ELECTION OF SENATORS.

Mr. BRADLEY submitted an amendment intended to be proposed by him to the bill (S. 2860) providing a temporary method of conducting the nomination and election of United States Senators, which was ordered to lie on the table and to be printed.

# ADDITIONAL CLERKS TO SENATORS.

The VICE PRESIDENT. Morning business is closed. The calendar under Rule VIII is in order, and the first business on the calendar will be stated.

The first business on the calendar was the resolution (S. Res. 19) reported by Mr. WILLIAMS, from the Committee to Audit and Control the Contingent Expenses of the Senate on April 28, 1913, with an amendment to strike out all of the original resolution and in lieu thereof to insert:

Resolved, That all Senators now having less than three employees, as chairmen of committees or otherwise, be allowed an additional employee, to be paid at the rate of \$1,200 per annum from the contingent fund of the Senate until otherwise provided by law.

Mr. THOMAS. I merely wish to inquire if that is the resolution submitted by the Senator from Washington [Mr. Jones].

The VICE PRESIDENT. It is a resolution submitted by the Senator from New Hampshire [Mr. Gallinger] on the 17th of March last. The question is on agreeing to the substitute amendment reported by the committee.

The amendment was agreed to.

The resolution as amended was agreed to.

## DIPLOMATIC AND CONSULAR SERVICE.

The next business on the calendar was the resolution (S. Res. 65) directing the Committee on Foreign Relations to report to the Senate certain information relative to employees in the Diplomatic and Consular Service of the United States.

Mr. GALLINGER. Let that go over.

The VICE PRESIDENT. The resolution goes over.

## ELECTION OF SENATORS.

Mr. SUTHERLAND. Mr. President, I should like to have the attention of the Senator from Montana [Mr. Walsh] for a moment. We are now considering the calendar under Rule VIII, and I would ask the Senator from Montana whether there is any reason why we should not proceed, if the Senate is willing, to the consideration of the senatorial election bill?

Mr. WALSH. There is no reason that I know of, and I should be very glad to join in getting the bill before the Senate at this time. I have a suggestion to make in relation to an amendment, which I feel will remove any objection which the Senator from Kentucky [Mr. Bradley] had to the consideration of the measure; and, if the Senator will give me his attention, I shall be very glad to read it, and doubtless he will find no occasion for further refusing to join in the request for unanimous consent for the present consideration of the bill.

If the bill is brought before the Senate for consideration, I will say to the Senator from Kentucky that it is my purpose to move to add to the bill as reported a section reading as follows:

Nothing herein contained shall be construed to affect the right of any person to a seat in the Senate under any election heretofore held or appointment heretofore made.

Mr. SUTHERLAND. Mr. President, in order that the matter may be properly before the Schate, I ask unanimous consent that the Senate now proceed to the consideration of Senate bill 2860, being the senatorial election bill.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the bill (S. 2800) providing a temporary method of conducting the nomination and election of United States Senators, which had been reported from the Committee on Privileges and Elections with an amendment to strike out all after the enacting clause and to insert:

strike out all after the enacting clause and to insert:

First. That at the regular election held in any State next preceding the expiration of the time for which any Senator was elected to represent such State in Congress, at which election a Representative to Congress is regularly by law to be chosen, a United States Senator from said State shall be elected by the people thereof for the term commencing on the 4th day of March next thereafter.

Second. That in any State wherein a United States Senator is hereafter to be elected either at a general election or at any special election called by the executive authority thereof to fill a vacancy, until or unless otherwise specially provided by the legislature thereof, the nomination of candidates for such office shall be made, the election to fill the same conducted, and the result thereof determined, as near as may be, in accordance with the laws of such State regulating the nomination and election of candidates for Members at Large of the National House of Representatives: Provided, That in case no provision is made in any State for the case of the nomination or election of Representatives at Large, the procedure shall be in accordance with the laws of such State respecting the ordinary executive and administrative officers thereof who are elected by the vote of the people of the entire State: And provided further, That in any case the candidate for Senator receiving the highest number of votes shall be deemed elected.

Mr. SUTHERLAND. I propose an amendment to the bill,

Mr. SUTHERLAND. I propose an amendment to the bill, which I send to the desk.

The VICE PRESIDENT. The Senator from Utah proposes an amendment to the bill, which will be stated.

The Secretary. It is proposed to strike out the remainder of page 2 after the words "election of," in line 19, and the word "State," in line 1, page 3, and insert in lieu thereof the follow-

Representatives in Congress: Provided, That if the manner of such nomination or election is not applicable to the case of a nomination or election by the people of the entire State, the laws respecting the manner of nominating or electing the governor shall be followed.

Mr. SUTHERLAND obtained the floor.

Mr. BACON. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Georgia?

Mr. SUTHERLAND. I do.

Mr. BACON. I wish to suggest that this is a matter of considerable importance, and if there are going to be any material amendments made to the bill we ought to have some better opportunity to understand them than simply by hearing them read at the desk

Mr. SUTHERLAND. The amendment which I propose has been on the desks of Senators for three or four days

Mr. BACON. I did not know that fact.

Mr. SUTHERLAND. And it has also been printed.

Mr. BACON. I was not aware of that.
Mr. STONE. How will the bill read as proposed to be amended?

Mr. SUTHERLAND. Mr. President, the bill as reported from the committee provides for both general and special elections of Senators, and it provides that in both cases

the nomination of candidates for such office shall be made, the election to fill the same conducted, and the result thereof determined, as near as may be in accordance with the laws of such State regulating the nomination and election of candidates for Members at Large of the National House of Representatives.

I think there are States where there is no provision made in the law for the election of Representatives at Large. Statutes of the United States contemplate that Representatives shall be elected in the districts of the State. Sometimes provision is made for the election of the Representative at Large when a new apportionment is made, but that is only a temporary matter. A temporary provision is sometimes made for the election of the Representative at Large until general provision can be made for a reapportionment of the State, but I think it will be found that in many of the States the language of the statute is applicable only to the election of Representatives in the various districts, and it will be found that there is no specific language applicable to the election of Representatives at Large. So the amendment which I propose is to strike out the language of the bill with reference to the election of Representatives at Large and to simply provide that the law with reference to the election of Representatives in Congress shall be followed. am aware of the fact that if that is done and if nothing more than that is done some confusion may result when we come to the question of the nomination of Senators, because the laws of some of the States with reference to nominations where primary laws are in effect will only be applicable to a district. and may not be applicable to the case of an officer elected by the entire vote of the people.

Mr. REED. Mr. President——
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SUTHERLAND. I do.

Mr. REED. I desire to ask the Senator what he would do in those States where the governor is not elected by popular vote?

Mr. SUTHERLAND. There is no such case, as I under-

Mr. REED. My understanding is that there is such a State. Mr. SUTHERLAND. I do not so understand. To what

State does the Senator refer?

Mr. REED. I have not examined the matter, but I think the election of a governor in New Hampshire frequently goes to the legislature under some circumstances.

Mr. GALLINGER. Mr. President, we changed our State

constitution last year, so that hereafter the governor will be The recent election was the last one elected by popular vote. to be held under the old constitution.

Mr. REED. Is a plurality or a majority required?

Mr. GALLINGER. A plurality. Our constitution and our laws now conform precisely to the rules that prevail in practi-

cally all of the States.

Mr. SUTHERLAND. As I understand, there are still one or two States perhaps where, when as a result of the election a majority vote has not been cast for any candidate, the election goes into the legislature. That, I suppose, is the case to which the Senator from Missouri refers; but that situation is covered by the second proviso in the bill, which is:

And provided further, That in any case the candidate for Senator receiving the highest number of votes shall be deemed elected.

Of course, in a State where the law provides that when no candidate for governor has received a majority of the votes the election must be held by the legislature, that can not be applicable to the case of the election of a Senator, because the amendment to the Constitution expressly provides that Senators shall be elected by the people; but in order to obviate any question we have inserted the proviso to which I have just called attention.

Mr. BACON. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Georgia?

Mr. SUTHERLAND. I do.

Mr. BACON. I desire to ask the Senator a question, which possibly might also be addressed to the Senator in charge of the bill. I ask whether or not Congress has any right to prescribe how Senators shall be nominated?

Mr. SUTHERLAND. No-

Mr. BACON. Pardon me a moment, please, that I may make plain my question. The constitutional provision is the one which controls, and if a man is elected in the way which the constitutional provision prescribes, the question of how he was put into the race, it seems to me, can not be considered. It occurs to me that it is not a proper thing for us to pass a law imposing conditions or laying commands unless we are authorized to enforce them. This bill provides that a man shall be nominated in a certain way. It uses the word "shall"—shall be nominated in a certain way. A man has a right to run for the Senate in an election before the people without being nominated at all; and if any man should choose to come out as an independent candidate and run as a candidate for Senator before the people and should receive a majority of the votes, or a plurality, as the case might be, we could not say to him, "You were not nominated as this law requires." We could not turn him away from this door on the ground that he had not received a nomination. That being the case, while it may be said that the words are harmless and surplusage, is it proper that we should include in an act words which impose a duty and make a command that we ourselves would not have a right to enforce or look into?

Mr. SUTHERLAND. The Senator from Georgia asks me a question and then proceeds to answer it himself. I think it is quite true that Congress ought not undertake to interfere with the laws of a State providing a method for nominating Representatives or Senators, but the difficulty with this situation is that the laws of the various States, particularly the primary laws providing for the manner of nominating Representatives and State officers, will not be applicable at all in the case of a Senator, because those laws are not by their terms made applicable, and the only way that those laws can be made available is for Congress by this legislation to recognize them until such time as the States themselves shall pass legislation either providing for an original method of nominating Senators or adapting their present State laws to

that condition.

The whole purpose of this measure is temporary. tide over this difficulty, and unless Congress legislates with reference to the nominations as well as the elections, then the primary laws of some of the States will not be applicable and can not be availed of by the people. That is the purpose as I understand.

Mr. President, I desire to proceed a little further with the

amendment I have proposed. Mr. WILLIAMS. Mr. Pr

Mr. WILLIAMS. Mr. President, I think, if I understand this provision, that I quite agree with the Senator from Geor-[Mr. Bacon]—that all reference to nominations ought to be left out of this bill, or else they ought to be made to conform with the State requirements absolutely.

Mr. SUTHERLAND. They do.

Mr. WILLIAMS. For example, in the State of Mississippi we never permit a man to be nominated by a plurality vote. No man can be the nominee of a party in Mississippi unless he has received a majority at the primary.

Mr. SUTHERLAND. Let me interrupt the Senator from

Mississippi long enough to say that this bill does not attempt

to interfere with that.

Mr. WILLIAMS. I read this on page 3:

And provided further, That in any case the candidate for Senator receiving the highest number of votes shall be deemed elected.

Mr. SUTHERLAND. But that does not apply to nominations. Mr. WILLIAMS. Does not that relate back to the provision for nominations?

Mr. SUTHERLAND. Oh, no; only to the election.

Mr. WILLIAMS. What would be the objection, if the Senator will follow me, to striking out, in lines 15 and 16, op page 2, the words "the nomination of candidates for such office shall be made"; and striking out, in line 17, the words "as near as may be"? This bill provides that the State laws shall be followed "as near as may be." Why can not the State laws be followed? Also, what would be the objection to striking out, in line 22, the words "nomination or"; in other words, why should this relate to a nomination at all? It seems to me what we are trying to do is this: We are trying to provide for the popular election of Senators. The method by which Senators

shall be elected at a primary, it seems to me, might very well be left to the States. One State requires a plurality and another requires a majority. In my State, for example, we have a general primary between the candidates, and, then, if no one gets a majority, there is another primary within 10 days between the two highest candidates.

Mr. WALSH. Mr. President— The VICE PRESIDENT. Does the Senator from Utah yield

to the Senator from Montana?

Mr. SUTHERLAND. In just a moment I will yield. Let me ask the Senator from Mississippi a question right there. Suppose that is stricken out of the bill, and nothing at all is said with reference to nominations and the bill is passed simply regulating elections. Under what law of Mississippi would you proceed to nominate a United States Senator?

Mr. WILLIAMS. We already have a law for nominating all officers in Mississippi, and we have had it for quite a long

The Senator has been nominated for years. SUTHERLAND. There is a law which applies to Sen-Mr. SUTHERLAND. Then that would cover the case of Mississippi.

Mr. WILLIAMS. It applies to all officers who are to be nominated at all.

Mr. SUTHERLAND. That would cover the case of Mississippi; but there may be States where no specific provision is made with reference to the nomination of Senators, and in those cases we want to adapt the law with reference to the nomination of Representatives.

Mr. WILLIAMS. I dare say there is not a State in the Union that has not some customary method of nominating men for office as representatives of the party. It may be that some States have not a primary nomination. I do not know about that. It may be that some of them do not nominate in primaries; but the point that it seems to me is clear is that ought to have nothing to do with that. We ought to leave that to the respective States.

Mr. WALSH. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Montana?

Mr. SUTHERLAND. I do.

Mr. WALSH. Allow me to say to the Senator from Mississippi that that is just exactly what we do do. We let them do just exactly as they see fit about it. If they have not any laws for the nomination of any of the other persons who are to be voted for, then they have not any law for the nomination of a United States Senator. If they have a law providing for the nomination of a governor, a secretary of state, or any other State officer, we provide that that law shall be equally applicable to the candidate for United States Senator.

Mr. WILLIAMS. If the Senator will pardon me, there are States which have no law at all upon the subject of nomination.

Mr. WALSH. Exactly.

Mr. WILLIAMS. It is a mere matter of party custom.

Mr. WALSH. Exactly. Therefore there will be no law in such a State for the nomination of a United States Senator.

Mr. WILLIAMS. Can that custom be followed? Why can you not leave it to the State and let the custom be followed? Prior to

Mr. WALSH. Mr. President, let me answer the Senator from Mississippi. If in any State there is no law in relation to the nomination of candidates for any offices, there will be no law for the nomination of a candidate for United States Senator. In such States the nomination of candidates for United States Senator will, as a matter of fact, be governed by the custom that prevails there, just the same as custom governs in the nomination of a candidate for any other office.

Mr. WILLIAMS. Mr. President, I believe the Senator from Montana is right about that. The bill was just brought to my attention. I had to read it rather hurriedly and hastily, and my inquiries have been as much for information as for criticism. That being the case, I want the State custom or the State law,

whatever it is, respected.

Mr. SUTHERLAND. This will not interfere in any way with the law of Mississippi. It will not interfere with it in the

slightest.

Mr. WALSH. Mr. President-

Mr. SUTHERLAND. I yield to the Senator from Montana. Mr. WALSH. Let me state further that in any of those States, just as soon as they make a general provision for the nomination of all officers or a special provision for the nomination of United States Senators, that will take effect under this

Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from California?

Mr. SUTHERLAND. I do.

Mr. WORKS. With respect to the suggestion made by the Senator from Georgia that one may become a candidate without a nomination, and that that is not covered by the bill, I suggest to the Senator from Utah that that objection might be covered by the insertion after the word "made," in the sixth line of the second paragraph, of words something like the following: mode of becoming a candidate determined," so that it would read, if amended:

Until or unless otherwise specially provided by the legislature thereof, the nomination of candidates for such office shall be made, the mode of becoming a candidate determined, the election to fill the same conducted, and the result thereof determined, as near as may be—

And so forth.

Mr. SUTHERLAND. I see no objection to that, although it occurs to me that the word "nomination" is sufficient to cover the whole subject.

Mr. WORKS. That may be so; but certainly under the law of many of the States one may become an independent candidate without any nomination, and this would cover that case.

Mr. SUTHERLAND. Personally, I see no objection to that. Mr. BACON. Mr. President, if the Senator will pardon me a

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Georgia?

Mr. SUTHERLAND. Yes.

Mr. BACON. If I do not unduly interrupt the Senator, I wish to ask him a question. Suppose, after we pass this bill, a Senator should be elected by a majority vote of the people at a duly authorized election in which there was an entire disregard of this provision as to nominations, and the Senator thus elected should present himself here for admission to a seat in the Senate. What would be the attitude of the Senator from Utah with reference to the disregard of the provision of law regarding nominations?

Mr. SUTHERLAND. Mr. President, I do not know what would be the attitude of the Senator from Utah with reference to that question. Until it arises I prefer not to express an opinion

about it

Mr. BACON. If the Senator will pardon me, I want to say that I have too high a regard for the Senator's ability as a lawyer to question in my own mind for a moment what he would The constitutional amendment says that a Senator shall be elected by the popular vote of the people, and the only requirement is that he shall be elected by those whom that amendment constitutes the duly qualified electors, to wit, those who are authorized to vote for the members of the most numerous branch of the legislature. We can not add to that qualification or take from it. Whenever that qualification is complied with and a Senator receives a majority vote and presents himself here I have not the slightest doubt in my mind, although the Senator himself may doubt it, as to what the judgment of the Senator from Utah would be. He would be entitled to his seat.

The only purpose of the inquiry is this: In view of the fact that this can not affect the right of a Senator to his seat, I do not think we have any right to impose a condition as to how a nomination shall be made. I do not think it is any of our business how a nomination shall be made. We do not require it in the case of a Representative. There is no such law on the statute books as to the manner in which a Member of the other branch of Congress shall be elected—that he shall be nominated in a certain way.

Mr. BURTON. Mr. President, will the Senator from Georgia yield to me?

Mr. BACON. I have the floor by the grace of the Senator from Utah.

Mr. SUTHERLAND. The Senator from Georgia has not the floor. The Senator from Utah will yield.

Mr. BURTON. I will state that we have legislated on the subject of nomination with regard to Representatives in Con-The degree of control which we have over nominations has often been discussed here. The apportionment act approved August 8, 1911, contains this section:

SEC. 5. That candidates for Representative or Representatives to be elected at large in any State shall be nominated in the same manner as candidates for governor, unless otherwise provided by the laws of such State.

Mr. BACON. That certainly escaped me whenever it passed. I did not know of it. I am speaking generally, however. The Senator will recognize, of course, that the election of a Representative at large from a State is very rare, and legislation with regard to that matter does not attract very general attention.

Mr. ROOT and Mr. WALSH addressed the Chair.

The VICE PRESIDENT. Does the Senator from Utah yield, and to whom?

Mr. SUTHERLAND. I yield first to the Senator from New

Mr. ROOT. I wish to express my agreement with the view of the Senator from Georgia. The difficulty about undertaking to legislate regarding the processes in the several States which culminate in an election is not any difficulty that we can see now; it is that we can not see what difficulties may arise. We can not see what interference the rules we prescribe may cause in the future. I think we had better let it alone and leave the States to regulate their own affairs in regard to elections. term "election" must include and embrace all steps of whatever kind whether by law or by custom or by voluntary and uncontrolled action of the people-all the steps which culminate in the final determination of the person who is to hold the office.

When we have legislated and said what we think it is necessary to say about election, we include, without any limitations on our part, all the varied methods of accomplishing an election. We include every kind of nomination that a State may see fit to adopt. I think we had better be as simple and as brief

about it as possible.

Mr. SUTHERLAND. I would quite agree with what has been said by the Senator from New York and the Senator from Georgia if it were not for one consideration, which I will mention in a moment. First of all, let me say that the legislatures of the various States act under a power conferred in exactly the same words as that under which Congress acts. The legislatures are given the power to regulate the time, place, and manner of elections. Under that power the legislatures of the various States provide for the nomination of representatives. They pass their primary laws. It is a preliminary step to the election, it is true, and yet it must come under one or the other of those descriptive words-the time, or the place, or the manner.

It seems to me that Congress, having the same power, would have the right, if it chose to exercise it, of regulating the manner of nomination as well as the States would have. But however that may be, I should not be in favor of Congress exercising the power except as a temporary expedient, as is done in this

Mr. GALLINGER. Mr. President-

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from New Hampshire?

Mr. SUTHERLAND. In just a moment I will yield.

The difficulty is that many of the States have primary laws that are not applicable in their terms to the case of the nomination of United States Senators. Unless Congress by some form of enactment gives the people of the States the power to resort to those laws, they can not be resorted to, as I understand it, or they may not be resorted to; and it is simply to tide over that temporary condition that this bill is proposed. Until or unless the States have otherwise provided we say that they shall use this manner of nomination.

Now I yield to the Senator from New Hampshire.

Mr. GALLINGER. That is precisely the point that I rose to call to the attention of the Senator from Utah. In my own State we have had for several years primary laws for the nomination of Members of Congress, members of the legislature, and so forth, and last year we enlarged it to include the governor. The legislature, however, did not provide that Senators should be nominated by popular vote, and the legislature is not in session. Unless Congress can give us some relief, it seems to me our legislature will have to be called in special session to make that provision. I do not see how we can get over it unless we are granted the right to nominate in any way we please. I do not know but that might be done; possibly it could be; but unless the proposed law is to include primaries as well as elections, I can see the difficulty that would confront us in New Hampshire in that respect. So I hope the provision

relating to nominations may be retained.

Mr. SUTHERLAND. Mr. President, I have been led somewhat away from what I desired to say with reference to the

amendment which I propose,

I have already suggested the reason why I offered as a substitute the language "Representatives in Congress" instead of the language of the bill, "candidates for Members at Large of the National House of Representatives."

The bill continues, and contains this proviso:

Provided, That in case no provision is made in any State for the case of the nomination or election of Representatives at Large, the procedure shall be in accordance with the laws of such State respecting the ordinary executive and administrative officers thereof who are elected by the vote of the people of the entire State.

This bill, as I have already said, applies both to the general election and to a special election. The difficulty with that language is that in many of the States—in my own State, for example—there is no provision whatever for the election of an executive or administrative officer of the State at a special election. Whenever a vacancy occurs in an office of that character

in the State of Utah, and in many other States, the vacancy is filled by the appointment of the governor; so you will have a case in a special election where your bill will not apply at all. If the special election under this proviso is to be held in accordance with the rule respecting the ordinary executive and administrative officers, then in many States you have no such Those officers are not elected at all. So I have proposed by this amendment to substitute for that proviso the following:

Provided, That if the manner of such nomination or election is not applicable to the case of a nomination or election by the people of the entire State, the laws respecting the manner of nominating or electing the governor shall be followed.

That leaves the general provisions of the bill with reference to the time and place applicable to the election of a Representative to apply here.

There never can be any confusion about those two elements, because the time and the place of electing a Representative in a district will be, of course, applicable to the election of an offi-cer at large. The time is fixed for the general election, the first Tuesday after the first Monday of November in the bien-nial years, and the places are fixed by the State law. The polling places are fixed as the places for holding the election. So there never can be any confusion with reference to those two elements. The only trouble will be with reference to the

manner of electing or nominating. I have by my amendment proposed to adopt the manner which is applicable to the nomination or election of a governor, and it seems to me that with that provision in the bill it will be

entirely workable.

Mr. BACON. Mr. President, I wish to suggest to the Senator, if he has a copy of the bill before him, an amendment, such as I will now indicate, simply by striking out. The copy I before me has not any numbers to the lines, so it is difficult to indicate them, but I will say that it is in the fourth line of the second paragraph of the printed copy before me. I will read it as it would read if amended. I want to strike out certain words, so that the second section, if amended, would read as I now read it. I do not interpolate any words; I simply strike out some:

Second. That in any State wherein a United States Senator is hereafter to be elected, either at a general election or at any special election called by the executive authority thereof to fill a vacancy, until or unless otherwise specially provided by the legislature thereof, the election to fill the same—

The words "shall be" will have to be put in thereshall be conducted, and the result thereof determined, as near as may, be in accordance with the laws of such State respecting the ordinary executive and administrative officers thereof who are elected by the vote of the people of the entire State.

Why does not that cover everything we need?

Mr. SUTHERLAND. The difficulty of that is, as I have already undertaken to show, that when you come to special elections there are many States where there is no provision for the election of an ordinary executive and administrative officer. Such officers are appointed when a vacanacy occurs. would not in many States cover the case of a special election

So far as leaving out reference to the nomination of Senator is concerned, I care personally nothing about it, but I think it

may result in some confusion in some of the States.

Mr. STERLING. Mr. President—
The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from South Dakota?

Mr. SUTHERLAND. I do. Mr. STERLING. I think the Senator in his last statement has just expressed a condition that will probably exist in my own State of South Dakota. I trust that this reference to the nomination of candidates will not be stricken out of the bill. Without such provision the situation probably would be that one faction would contend that the nomination must be made according to the laws of the State for the nomination of other Another faction would contend that since Congress has officers. not provided that the nomination of a candidate for United States Senator shall be made in accordance with the laws of the State, therefore some other method may be adopted. In order to prevent such confusion I think that the provision relating to the nomination ought to remain.

I appreciate what was said by the Senator from New York [Mr. Roor], that the term "election" perhaps includes the preliminary steps, such as the nomination and all proceedings preliminary to the election; yet in order to avoid confusion and uncertainty I think the nomination should be provided for in

the bill.

Mr. WORKS and Mr. WALSH addressed the Chair.
Mr. SUTHERLAND. I will yield the floor. I have completed what I desired to say.
The VICE PRESIDENT. The Chair recognizes the Senator

from California.

Mr. WORKS. I will yield to the Senator from Montana.

Mr. WALSH. No; let the Senator proceed.

Mr. WORKS. I was going to suggest that the amendment I referred to a moment ago would relieve the situation, it seems to me, in respect to other means of becoming a candidate than by nomination. Therefore, for the purpose of relieving that difficulty, I move to amend by inserting after the word "made," in line 16, "the mode of becoming a candidate determined," so that if the State allows one to become a candidate independently and without a formal nomination that would be covered.

Mr. SUTHERLAND. I have an amendment already pending.
Mr. WORKS. The Senator from Utah says that there is an
amendment pending offered by himself. Therefore I will with-

hold my amendment for the present.

Mr. WALSH. Mr. President, most of the matters which have been the subject of discussion here this morning have received specific consideration from the committee, and I rise simply to give the Senate the benefit of the discussions which took place there

The distinguished Senator from Georgia [Mr. Bacon] asks as to the power of Congress to legislate concerning the subject of nominations at all. Congress has legislated with reference to the nominations of Members of Congress not only in the particular to which the Senator from Ohio has referred, but likewise an act was passed requiring a financial report to be made by the candidate as to the expenses incurred by him in procuring his nomination as well as in securing his election after the nomination was made.

Mr. President, I have no doubt at all that Congress being vested with power under the Constitution to prescribe the time, place, and manner of the election of Senators and Representatives, the language of the Constitution embraces every step by which the election is eventually accomplished, including the nomination of candidates as well as the culminating acts of the

election.

Therefore, Mr. President, I do not think that the import of this bill would be in any manner affected by the amendment proposed by the distinguished Senator from Georgia. In other words, if we wiped out any reference to the nomination and simply provided that the election was to be conducted in the same manner as is provided by the State statute, the word "election" would be held to embrace all the machinery by which the election is accomplished, including the method by which candidates are nominated, as provided by the State statute.

I feel, however, in order to remove any uncertainty about the matter which might arise, that we ought in the law to be passed specifically to make the local statutes in relation to

nominations applicable as well.

The question is asked by the Senator as to why, conceding the power to the legislature in the matter, should we legislate in relation to the nomination of candidates? The answer to that is perfectly plain. It is that if we do not legislate, either by employing the general term "election" or by referring to nominations specifically, there will be no way by which the name of a candidate for Senator, the nominee of any particular party, can be placed upon the ballot in those States wherein the Australian system prevails. At least it can not be done unless, as in some of the States, there are general laws sufficiently comprehensive in the language employed to embrace candidates for Senator as well as other offices.

For instance, suppose you take the case of a State statute which provides that the ballot shall be framed in the following form: First, candidates for governor; second, candidates for Members of Congress; third, candidates for secretary of state, and so on down the list. No mention is made of United States Senator at all nor for the placing of nominees for United States Senator upon the ballot. This proposed statute is intended to so operate as that the party nominee shall find a place upon the official ballot at the election, and, likewise, that the nomination shall be accomplished just exactly the same as is the nomination for the general executive and administrative offices.

I wish to say a word with reference to the amendment suggested by the Senator from Utah, but before I pass to that I want to speak further in relation to another suggestion offered by the Senator from Georgia. He asked the Senator from Utah, and with great force, what he would do in case a candidate for United States Senator came here by vote of the people of a State and yet his nomination was not effected in the manner prescribed by the State statute. Unquestionably, unless the failure to observe the State statute was in respect to a provision fundamental in its character, the law unobserved, would be regarded as directory only, not mandatory, and the successful candidate ought to be seated as a matter of course in this body.

That would be in accordance with a rule that is universally in force with reference to these statutes regulating nominations. Even what would seem to be the most material departure from the method prescribed by the State statute is never permitted to operate to invalidate an election by the adjudication of the courts after the choice of the people has been made. When the Australian ballot was comparatively new in this country a decision was rendered by the supreme court of my State, was very severely criticized and finally overruled by that court itself. It held an election void under the authority of certain decisions of the courts of Australia, where the system originated, because the nomination of the candidate had not been made in strict accordance with the provisions of the law in relation to nominations, but upon further reflection and owing in some measure to the criticism provoked by its earlier ruling, the court held in a later case that any objection not absolutely fundamental in its character to the nomination of a candidate or to the method by which he is nominated or the method by which the certification is made must be made, to be effective, before the election takes place, in order that it may be corrected, if it can be corrected. But if it is not corrected and the attention of the officers is not called to the matter, nor the courts appealed to, in order to correct the irregularity, whatever it is, and the election goes on and the candidate receives a majority of the votes or a plurality, as the case may be, he will be held elected.

So, Mr. President, if it should so happen that any candidate for United States Senator would appear here, there being some irregularity in the way he was nominated, the requirement of the State statute not being in every particular observed, no effort having been made by his antagonist to correct ic, and he comes here supported by the vote of his State, there is no doubt

in the world about his admission to this body.

Now, a word in reference to the amendment offered by the Senator from Utah. I appreciate the force of the criticism made by the distinguished Senator to the language of the bill. It is founded upon inherent difficulties in the case that are by no means removed by the amendment which he proposes.

The bill as reported by the committee provides that the nomination and election shall be conducted, as near as may be, in accordance with the provisions of the State statutes in relation to the election of Representatives at Large. Everybody agrees that it is a wise and proper provision to have the election for both branches conducted in exactly the same way. The constitutional provision under which we legislate covers both branches. The method of election now is exactly the same. But some States may not have a provision for the election of Representatives at Large, no statutes covering the case.

In that case what course shall we follow? It was, in the first place, suggested as now proposed by the Senator from Utah, that the method prescribed by the State statute for the nomination and election of candidates for governor should be followed, but it was immediately considered that in the case of a governor, if a vacancy happens, it is not filled by an election ordinarily. No special election is called to fill a vacancy of that character, but the lieutenant governor steps into the office. So provisions for the election of a governor, while they might perhaps be proper enough in the case of a vacancy arising at the expiration of a term, would not be found applicable in the case of a vacancy occurring by death, resignation, or otherwise to be filled at a special election called for that particular purpose.

We therefore provided that the machinery provided by the State for the nomination and election of the general administrative and executive officers should be applicable to the case of the nomination and election of a Senator. We did that because in quite a number of States they have one system provided for the nomination and election of the general administrative and executive officers and another system for the nomination and election of judicial officers. We intended that the former should exercise.

The Senator from Utah called attention to the fact that in many States, in the case of administrative and executive officers, when a vacancy does occur it is not filled by a special election, but the governor appoints. That is true. It is so provided in my State. When if it so happens that there is no machinery in a State covering the case of the nomination and election of any State officer at a special election it will become necessary to apply, so far as they are applicable, the statutes in relation to a general election to the case of the special election.

Then it occurred to us that it might be that there would be some special provision in some State applicable to the nomination and election of a governor, for some reason or another, or to any particular officer who might be designated in the bill. The idea was that those special provisions ought not to be held to govern the case of the nomination and election of a United States Senator. We had particularly in mind the situation in

New Hampshire as it was generally understood until the idea was dispelled by the information given us this morning by the distinguished Senator from New Hampshire, that in some of the States the governor would be chosen in certain contingencies by somebody other than the body of the people. Accordingly, I feel that the amendment suggested by the Senator from Utah would not be an advisable one to adopt.

I feel with reference to the amendment offered by the Senator from Georgia that it would not change the situation, because I am entirely confident that if the language he adopts were used the judicial interpretation of it would be that it included all the steps leading up to the election, including the nomina-

tion as well.

Mr. SUTHERLAND. Mr. President, I think it must be conceded not merely that the difficulties are likely to arise but that they will inevitably arise under the bill as it is framed.

First of all, the provision is that the statutes of the State

with reference to the nomination and election of candidates for Members at Large of the House of Representatives shall be followed. As I have already said, there are States where there is no language in the statute that is applicable to the nomina-

tion or election of a Representative at Large.

The language of the statute will be applicable to the nomination and election of a Representative in a district of the State. So we meet with that difficulty right at the threshold of the matter. We will remove that, so far as that one difficulty is concerned, by simply providing that Senators shall be nominated and elected, as my amendment proposes, in accordance with the statute in reference to the nomination and election of

Representatives in Congress.

There can be no question that, if that language is used, the time and the place of the election or nomination will be applicable in all the States, because the time at which Representatives are nominated or elected in the districts would be applicable clearly to the nomination and election of Senators. would the place, because the place is the voting precinct or the voting district in the various States. There can be no difficulty about those two requisites in any of the States. The only diffi-culty that we will meet with will be with reference to the mauner, which includes every other element of an election. Those three words, "time" and "place" and "manner," include every conceivable element in an election, and when we have disposed of the time and the place by a provision which covers them, as the amendment which I propose will do, we have only to take care of the manner, which includes, as I have said, every other

Now, the difficulty that will arise, so far as the manner is

concerned, will be likely to arise in special elections.

The proviso of the bill, as it now reads, provides that when the statutes with reference to the nomination of Representatives at Large will not apply, then we shall follow the statutes with reference to the nomination and election of the ordinary executive and administrative officers of the State. As I have already pointed out with reference to those executive and administrative officers, there will be in many of the States no provision whatever that will cover a special election, because no special election is held for such officers. Those officers are appointed by the governor. Consequently, if we take this proviso as it appears in the original bill, we shall have a case where there will be no law that will apply.

Mr. WALSH. May I interrupt the Senator? The VICE PRESIDENT. Does the Senator from Utah yield

te the Senator from Montana?

Mr. SUTHERLAND. I yield to the Senator from Montana.

Mr. WALSH. Is it not a fact that, if we should adopt the amendment proposed, we should be confronted with that condition in every State practically, because in no State is there provision for a special election to fill a vacancy in the office of

Mr. SUTHERLAND. No; because the language that I have employed is confined to the question of the manner-only the manner. The manner of electing or nominating a governor would be the same at a special election as it would at a general election. The time would be different, because the time is fixed for a general election by the general provisions of law, and for a special election the time is fixed probably under the statute by the governor or some official body. Therefore the time and place will always apply to every election, whether it be a general election or a special election. There can never be any difference about that. The only difficulty will be with reference to the manner; and if we provide that the manner of nominating and electing a governor shall be followed, there can never be any difficulty about that, because although a governor is not elected at a special election, the manner of electing him at a

general election and nominating him for a general election will of necessity be the same as it would be at a special election.

Mr. WALSH. Mr. President, I have been advised that the junior Senator from Georgia [Mr. SMITH] desires to submit some observations on the matter, but is unable to attend this morning. I am going to ask, accordingly, for unanimous consent that the bill be temporarily passed over.

Mr. ROOT. Before that is done, will the Senator from Montana permit me to suggest an amendment to the first clause? It is very brief. The words used in the first clause of the bill

First. That at the regular election held in any State next preceding the expiration of the time for which any Senator was elected to repre-sent such State in Congress—

To give my suggestion form I move to amend by striking out. in line 6, the words "was elected" and inserting in lieu thereof the words "has been chosen," for I think there might be, and very probably would be, uncertainty as to the scope of this provision otherwise.

There are three ways by which a Senator may have a seat in this body: One is he may be selected; he may be chosen, as most of us have been, by a State legislature, and for a long time there will continue to be Senators here who will hold their sents by that title. The second is, a Senator may be appointed by the governor to fill a vacancy, and the third is he may be elected the people under the new constitutional amendment, I think this proposed law ought to cover all three cases. words of the Constitution which describe the way in which nearly all of us hold our title are that "Senators shall be chosen." The language is:

The Senate of the United States shall be composed of two Senators from each State, chosen by the legislature thereof.

The word "chosen" is the word generally used in the Consti-

tution as covering all ways of selecting an officer, and I think

would be wiser to use that word.

Mr. WALSH. If the Senator from New York will permit me, it was my purpose, so that any obscurity might be removed, to ask leave to amend by substituting the word "term" for the word "time." When that is done the amendment suggested by the Senator from New York ought not to be adopted. The first section of the bill provides for the case of the election of Senators at the expiration of the term for which the Senator was elected; that is, the expiration of the period of six years, or, in case of the admission of a State into the Union, a briefer period. We do not want to have an election of a Senator at the election next after a possible appointment. For instance, in the State of Massachusetts they have annual elections. We will assume that a Senator from that State dies or resigns and a temporary appointment is made by the governor. The purpose is to have the election take place not at a succeeding annual election at which the governor is selected, but at the election when the Members of the House of Representatives shall be elected. It is a very well established rule of law; the word "term" has been repeatedly determined to mean the entire time for which a Senator is elected. For instance, the term of Senator Johnston of Alabama is still running; that term still exists; and even though a successor to Senator Johnston should be elected or appointed, it would still be Senator Johnston's term. This provides for the case of the election at the election next preceding the expiration of the term for which the Senator was elected. I think the substitution of the word "term" for "time" will accomplish any result that might be obtained by the amendment offered by the Senator from New York [Mr. Root].

Mr. BACON. Mr. President, before the bill is laid aside I

desire to say a few words that they may be in connection with what the Senator from Montana [Mr. Walsh] has said with re-

gard to the position taken by myself.

It is true that the words are found in the statute as read by the Senator from Ohio [Mr. Burton] relating to the nomination of Representatives to be chosen from the State at large. I repeat that I myself did not know those words were ever found in the statute. Legislation with reference to the election of a Representative from a State at large is something which is so rare and relates to so small a number of people that the bill in its passage did not attract attention. I never saw anything of the kind.

I am very fixed in my opinion that the Congress has nothing whatever to do with the question of how a candidate shall be nominated. I think that is a local matter, and that we can not in any way either add to or take from any of the qualifications which are prescribed in the Constitution for either a Representative or for a Senator. I do not desire, however, to discuss that now; it is not material that I should do so. I simply desire, in order that I may not appear to have overlooked the consideration suggested by the Senator from Montana [Mr. Walsh], to say that I do not think that the legislation which we have enacted, requiring a limitation on the expenditures made by a candidate for Senator not only as to his election, but as to his nomination, is at all in conflict with the position which I now take that we have no authority to regulate the manner in which candidates shall be nominated. regard that legislation, Mr. President, simply as along the line of any other method which the Senate may take, either by legislation in advance or by inquiry after an election, to ascertain whether or not there has been any improper personal conduct on the part of a man who presents himself here for membership in this body. We are not limited by the Constitution as to our consideration of the question as to what shall constitute the qualifications which shall entitle a Senator to sit here. We have a right to exclude him for any reason which we think renders it improper that he should be a Senator here; he may have been duly elected, and yet he may be of such a character that we would not permit him to have a seat here. The legisthat we would not permit him to have a seat here. lation, therefore, which provides that a Senator shall not expend more than a certain amount in a nomination is not an assumption of authority regulating the manner of nomination, but it is a limitation upon that which we think is the proper conduct of one who is hereafter to be a representative here of his State, to be a Senator of the United States. It is deemed improper that more than an amount of money which is considered sufficient for legitimate expenses shall be used by anyone who seeks an election as a Senator in any State to procure his election, because it is that which leads to corruption, and which, in its excess, constitutes corruption.

I think in the same way, Mr. President, under the old law where a Senator was elected by a legislature we could exclude a man who sought to secure a seat here although he might pre-sent undoubted evidence of the fact that he was elected by his legislature, if we could show that he had used bribery in procuring the vote of a legislator or had used bribery in securing the election of a legislator, although that legislator himself may have been utterly free from blame in the matter, because it would have furnished evidence of the personal unfitness of that man to a seat here-not that it would in any manner invalidate the fact of the election, but it would go to a question of personal fitness. It is on that line that I would defend the right of Congress to limit the expenditure which a Senator can make in procuring a nomination, not that we have any right to control

the question of a nomination.

I wish to say, Mr. President, that, although I think it is a proper one, I do not intend to offer the amendment which I have suggested, for this reason: This I recognize is, in a measure, temporary legislation, and it is important that it should, under the circumstances, possibly, be enacted at an early date, because we do not know when occasion may arise that there may be need for authority to hold an election and when a State may not have its legislature in session for the purpose of granting the necessary authority. This bill will not affect my State, because we have already passed a law on that subject, regulating the manner in which Senators shall be elected by the people. I sincerely hope that all other States will do the same thing. and I have no doubt that a majority of them will. I do not know, even, that there should be any yea-and-nay vote on this measure. I am only concerned that no act of mine, either an affirmative act or a failure to act, shall be construed into a recognition on my part of the right of Congress to legislate as to how a man shall be nominated and to lay down a positive command that he shall be nominated in one way or in another, even though that way may be afterwards determined by the State.

I am of the opinion, as expressed before, that the qualification of a Senator is that which is prescribed in the seventeenth amendment, and can not be added to or taken from, and that if a man chose to announce himself on the day before or on the day of an election as a candidate and had no nomination whatever, if he were elected, his election would be valid.

Mr. SUTHERLAND. Mr. President, in the print of the amendment which I offered it appears that I proposed to strike out the word "State," in line 3, on page 3. That should be "line 1, page 3." I ask that the correction be made.

The VICE PRESIDENT. The correction will be made.

Mr. POINDEXTER. In regard to the pending bill which is now under discussion, Mr. President, Senate bill 2860, I agree

entirely with what the Senator from Georgia [Mr. Bacon] has said as to the general proposition that the validity of the elec-tion of a Senator can not be affected in any way by the manner in which he is nominated, so far as the Constitution of the United States is concerned, because the Constitution does not undertake to deal with party government. Nominations are

not elections, are not the choosing of Senators. The Constitution deals only with elections or with the manner of the choice of a Senator to a seat in this body. The same reason, nevertheless, Mr. President, which exists for some temporary legislation defining some certain fixed rule under which a Senator may be elected and fixing the form and manner of the election, so long as it is within the terms of the Constitution, which simply requires that it shall be an election by the people, exists with reference to the form and manner of the nomination, namely, to prevent disorder and confusion and dispute in the States where no rule has been adopted, the legislature not having been in session.

There is not any necessity, possibly not any desirability, where the State has acted that the Congress of the United States should undertake to lay down a rule even with reference to the election, much less with reference to a nomination; but, as a temporary expedient, in order to set before the people of the State a fixed manner of proceeding, the same reasons apply to the manner of nomination as apply to the final election.

I am of the opinion that the simple form in which the bill was originally framed, possibly with the addition of the words "special election" as well as "general election," covered the case very well, because it fixed the manner in which Representatives are elected as the manner in which Senators shall be elected. I do not think that the objection that one is confined to a representative district and that the other extends throughout the State is a material objection. In many States the district of the Representative is the State, because they have only one Representative, and any manner of election which is applicable in a district, even in the greatest State in the Union, such as New York, where there are many districts, if it is applicable in a district containing some 200,000 population, which is required to entitle them to a Representative in Congress, of course it would be applicable in the entire State.

I do not, however, regard the particular form or manner as important. The important thing is to have a fixed procedure. I am of the opinion that either one or any of the forms suggested here-either the amendment of the committee, the original bill, or the amendment proposed by the Senator from Utahwould be entirely workable.

Mr. ROOT. The Senator says he does not regard the time or manner as important. That is all we have anything to say about. Our whole function is to fix the time and manner. Unless we do that we had better not legislate at all.

Mr. POINDEXTER. Mr. President, if I used that language, it probably was not very apt to express what I meant. What I meant to say was that in my opinion which particular manner or which particular form we adopt is not important. I quite agree with the Senator in that.

Mr. POINDEXTER. The important thing is to adopt some one form of procedure. That is what I meant to express.

Mr. ROOT. Mr. President, I do not wish to interfere with the plan suggested by the Senator from Montana, but I hope there will be an opportunity for further discussion of this

Mr. WALSH. That was my purpose, Mr. President. I have no desire to crowd this matter at all, and am desirous on my own part that the various amendments suggested may be now taken by the Senators and the subject canvassed.

Mr. ROOT. I quite agree with the Senator from Washington. I do not care what is determined upon. I do not think it is of much consequence one way or another, because if it happens to be inconvenient the States will change it as soon as their legislatures meet, and the bill leaves that open. I think, however, that we ought to be careful not to introduce elements of doubt and litigation into the field of action by means of our legislation.

Mr. WALSH. The Senator from Kentucky [Mr. BRADLEY] has further amendments which he desires to offer; and when that is done I shall ask unanimous consent that the matter may be temporarily passed over without prejudice.

Mr. GRONNA. Mr. President, I do not know that I want to object to that, but I see the Senator from Georgia is now in his seat. I, for one, am very anxious to dispose of this measure. I will say that it is important to my State. The legislature of my State failed to enact a law providing a method of either nominating or electing a Senator, and I understand that the governor does not intend to call a special session of the legislature for the enactment of a special law prescribing the manner of procedure. I do not know that there is anything of any more importance than a matter of this kind, and I see no reason why we should not go on and pass the bill this morning.

Mr. SMITH of Georgia. Mr. President, I am sure there are

several Senators who would be glad to have an opportunity to study this measure quietly in their rooms. I am confident it will not cause a delay of more than a day or two. Senators who would not vote for it this morning probably would do so at an early date. I hope it will be passed or acted upon during the week, but I am very much gratified with the suggestion that it go over at least for the day.

Mr. ROBINSON. Mr. President, I desire to be informed by the Senator from Montana whether in his opinion this measure, if enacted, will control the Alabama case and the Maryland

case?

Mr. WALSH. Mr. President, I stated at the opening of the consideration of the question that it was my purpose that a section should be added to the effect that it shall not be construed to affect in any manner the election or appointment of anyone elected or appointed since the adoption of the constitutional amendment.

Mr. ROBINSON. I was not fortunate enough to hear the statement made by the Senator from Montana.

Mr. GALLINGER. Before the matter goes over, since we are all greatly interested in it, I ask unanimous consent that the bill (S. 2860) be reprinted with the amendments already offered in brackets or italics, so as to designate them that we may find them in the bill.

The VICE PRESIDENT. Is there any objection? The Chair

hears none.

#### AMENDMENT OF THE RULES.

Mr. THOMAS. Mr. President, I ask unanimous consent for the entry of an order to take from the calendar the notice given by me on June 13, 1913, that I should offer an amendment to Rule V, section 2, of the standing rules of the Senate.

Mr. GALLINGER. That would hardly require unanimous consent. I am sure the Senator can have it taken from the

calendar if he so wishes.

### BANKING AND CURRENCY (S. DOC. NO. 264).

Mr. OWEN. Mr. President, I ask for the adoption of an order that there may be printed as a Senate document, in document type and in parallel columns, a comparative print of the banking and currency bill, H. R. 7887, showing the House bill and the changes suggested by the amendment submitted to the Senate by the chairman of the committee, also the changes suggested by the amendments intended to be proposed by the Senator from Nebraska [Mr. HITCHCOCK], and that 5,000 additional copies be printed for the use of the Senate document room, not to exceed, however, the \$500 limit of cost.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered.

The order as agreed to was reduced to writing, as follows:

Ordered, That there be printed as a Senate document, in document type and in parallel columns, a comparative print of the banking and currency bill, H. R. 7837, "An act to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes," showing the House bill and the changes suggested by the amendment submitted to the Senate by Mr. Owen, also the changes suggested by the amendments intended to be proposed by Mr. Hitchcock, and that 5,000 additional copies be printed for the use of the Senate document room, not to exceed the \$500 limit of cost.

Mr. OWEN. I ask unanimous consent that the Senate pro-

ceed to the consideration of House bill 7837.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of bank-

ing in the United States, and for other purposes

Mr. NELSON. Mr. President, in my remarks yesterday I called attention to two glaring defects in the so-called Owen bill, especially one defect wherein it differed from both the Glass bill and the Hitchcock bill; I mean in respect to the payment of interest on deposits in reserve banks. spect the Glass bill differs from the Hitchcock bill in permitting interest to be paid only on Government deposits, while, as to all other deposits made in the reserve banks, there was an absolute prohibition. In the Owen bill there is nothing on the subject; it is left entirely optional. The result of leaving it optional may lead to the same experience we have had under the system that is now in vogue; that is, that there will be an effort by the reserve banks—or regional banks, as they are sometimes called-to secure a large volume of deposits by means of the offer to pay interest. To my mind, as I indicated yester-day, this would be utterly destructive of the plan proposed and outlined in the Glass bill and perfected in the Hitchcock bill.

To my mind, the strongest feature of this entire system of

legislation is the fact that it destroys our present vicious system of bank reserves and establishes a better, safer, and more

workable system.

I shall not dwell any further on that subject at this time. may take it up again when we come to discuss the several bills

paragraph by paragraph and section by section.

Last evening, at the close of my remarks, I called attention to the fact that in paragraph 8, among the powers conferred upon the regional banks, authority is given them to issue bondsecured currency identical with our present national bank-note currency, exactly of the same quality, based on the same kind of bonds, and subject to the same objections and criticisms that we now make against our national bank-note circulation-that it lacks all elasticity, all power to respond to the ebbing and flowing wants of trade and commerce.

I shall take up this question later on when I come to discuss what I call the refunding provisions of the two bills. When I come to that I shall show that, taking together the two sections of the Owen bill to which I have referred, they absolutely provide for the continuance and maintenance of our full volume of bond-secured currency. If those provisions are left in the bill, we shall not be able to get away from the present system

of bond-secured currency for many, many years, if ever.

Mr. SHAFROTH. Mr. President—

Mr. NELSON. I am only referring to that feature of the bill incidentally at this time. I will discuss it more fully when I come to take up what may be called the refunding provision of the bill.

Mr. SHAFROTH. I wanted to call attention to the fact that there was some suggestion made here on yesterday that there were \$200,000,000 of bonds upon which currency could be issued. hold in my hand a statement of the condition of the United States Treasury at close of business December 6, 1913, which gives the exact situation as to these bonds. I should like to read it, if the Senator has no objection.

Mr. NELSON. No; I have no objection.
Mr. SHAFROTH. The total amount of bonds upon which national-bank notes can be issued is \$913,317,490.

Mr. NELSON. Those are the exact figures I have here and to which I was about to refer.

Mr. SHAFROTH. The total amount of circulation outstand-

ing on those bonds, and consequently the total amount of bonds upon which circulation is issued, is \$743,542,000. That leaves the amount of currency that could be issued by the national banks under paragraph 8 at \$169,775,490, instead of \$200,000,000, as was suggested on yesterday. I want to call the attention of the Senate also to the fact that there are outstanding 4 per cent bonds, not used as a basis of circulation, to the amount of \$83,207,200.

Mr. NELSON. The 4 per cent bonds can be used as a basis

of circulation.

Mr. SHAFROTH. Certainly; I am saying that. The total issue is \$118,489,900.

Mr. NELSON.

Mr. SHAFROTH. And the total amount that has been hypothecated to secure circulation is \$35,282,700, which leaves still

unhypothecated with the Treasury, for circulation, \$83,207,200.

I will call the attention of the Senate to the fact that 4 per cent bonds are not usually favored in the issuing of bank circulation. The reason they are seldom used is because they sell at a premium of 10½ per cent, and a national bank is not justified in paying a premium of 101 per cent on bonds and issuing circulation upon them. Consequently, in all likelihood there will be no money whatever issued upon the remaining 4 per cent bonds. There was some issued in the olden days before the 2 percents were issued, and they still remain as a basis of circulation, but there is no likelihood that there will ever be any circulation issued on the remaining 4 per cent bonds, which amount to \$83,207,200. There are \$41,873,860 of 3 per cent bonds, and very seldom is circulation taken out on 3 percents. The amount taken out in the whole existence of the circulation of the 3 percents is only \$22,000,000, because the 3 percents sell at a premium, and national banks do not like to pay a premium and have circulation issued upon bonds that cost more than that amount-not, at least, to the extent of the premium on threes and fours.

The 4 per cent and 3 per cent bonds not now the basis of circulation, therefore, amount to \$125,081,060, upon which in all likelihood circulation will not be asked, and if asked, under paragraph 8 may be denied, and that leaves only \$44,495,430 against which there will be a likelihood of a circulation being issued.

Mr. NELSON. Mr. President, while these statements may be true, and at this moment I see no occasion to dispute them, I shall show later on, when I take up the provisions of the three bills, that what the Senator from Colorado has stated has no bearing at all upon the point that I shall make. I say that with all due respect to him.

Before coming to that question, however, I propose to take up other provisions of the bills. One of the most important questions involved in this legislation is that relating to the control of the reserve banks and the board of directors who are to manage them. In respect to the control of the regional banks there is a great difference between the three bills, or between two of them on one side and one on the other. All the three bills provide for nine directors for the reserve banks. Under the Glass and Owen bills six of these directors are to be selected by the banks and three by the Federal reserve board, while under the Hitchcock bill five of the directors are to be appointed by the Federal reserve board and four are to be selected by the member banks. The Federal reserve board designates from among the Federal reserve appointees one director to act as chairman and Federal reserve agent of the board.

It seems to me, Mr. President, that the plan of the Hitchcock bill is in every way superior in this respect to that of the other The banking business of this system will be practwo bills. tically controlled and conducted by the board of directors of the several reserve banks, for the Federal reserve board will have only a supervisory power, which is likely to be invoked only in cases of great emergency. It is this board of directors that will be in constant touch with the member banks and the public, and to my mind it is important to divorce these banks as far as possible from the exclusive control of the bankers. The purpose of establishing this new system is to place as much power as possible in the hands of the Government and to minimize as far as possible the power of the banks, not so much because of hostility to the banks as the fear that the directors may be unduly biased in favor of the banks as against the public. They constitute the power to which the member banks must apply when they seek to obtain discounts for the purpose of securing bank credits and bank circulation, and therefore it is of the utmost importance to have an unbiased and impartial tribunal to act as a just and fair umpire in such cases.

The directors of the reserve bank have it in their power, by indirect methods, to make or unmake a member bank. For these reasons I think it safer that the preponderance of power in the board of directors be placed in the hands of men who are likely to deal impartially with the public and with the member banks. One of the criticisms against the administration of Nicholas Biddle, president of the Second Bank of the United States, was that he unduly favored men and localities at the expense and detriment of other men and other localities. Under this new system we want, as far as possible, to prevent unfairness, partiality, and favoritism on the part of the board of directors of these reserve banks. Under the Hitchcock bill these directors may be removed for cause by the Federal reserve board after due hearing, and pending such hearing the directors may be temporarily suspended.

Mr. President, we have heard much in recent times about the great Money Trust; we have had a committee in the other House investigating this subject; and one of the greatest problems injected into public discussion has been how to curb the Money Trust and how to curb the power of the banks. While we place at the head of this system a general reserve board here in Washington, we establish in the system a number of reserve or regional banks. We equip them with a board of directors and give the board of directors practically plenary banking powers. It is only in a few special cases and in remote contingencies that the Federal reserve board can exercise any controlling power. So I do not see how those statesmen who are continually decrying the Money Trust, who are continually manifesting great anxiety to curb that trust, can be opposed to the plan provided in the Hitchcock bill of appointing five Government directors and four bank directors in the management of a regional bank.

While I am prepared to be surprised at many of the erratic suggestions that are made here in connection with legislation, one of the surprising things is to note the fact that Senators, members of the party which has for the last year made it a special point to investigate the Money Trust and curb the power of the banks, come in here and propose a banking system which leaves absolutely the final and ultimate control on the boards of the banks of the country by giving them six out of the nine directors.

Section 5 of the Hitchcock bill relates to the increase of capital of the reserve banks, and in the Glass and Owen bills it relates in part to the same subject.

Section 6 of the Hitchcock bill relates to the establishment of additional reserve banks after the four banks provided for have been in operation for two years. The same numbered section of the Glass and Owen bills relates to the insolvency of member banks and the reduction in capital of the reserve banks in consequence thereof.

We provide in the Hitchcock bill, as I stated to Senators yesterday, that only four reserve regional banks are to be established in the first instance, and after these banks have been in operation for the period of two years and have demonstrated their ability to serve the financial and monetary business interests of the country, if the reserve board, from that experience, is of the opinion that it is advisable and for the best interests of the country to establish additional reserve banks, we give them that authority. But we say that in the first instance we shall not establish more than four. We would put those in operation, and if we find that they work successfully, and find that the country needs more for the good of trade and commerce and the banking of the country, then we will authorize them to be created.

The Glass bill provides, as I stated yesterday, for the establishment of 12 regional or reserve banks in the first instance, with full liberty to establish as many more as the appointing and designating power desires, while the new bill, the last Owen bill—the bill that ran the gantlet of the Democratic conference or caucus—provides for not less than eight banks in the first instance and not more than 12 in all. So under that bill, if it should become the law, the organizing committee, consisting of the Secretary of the Treasury and two members of the reserve board, can, in the first instance, establish 12 of these regional or reserve banks.

I next come to the matter of the division of earnings.

Section 7 of the Hitchcock bill provides that after all necessary expenses and taxes have been paid a cumulative dividend of 5 per cent shall be paid to the stockholders, and of the net earnings above this 5 per cent 25 per cent shall be set aside for the purpose of securing a surplus fund equal to 20 per cent of the capital, and 37½ per cent of the net earnings shall be set aside as an insurance fund for the protection of depositors in insolvent member banks. All net earnings of the bank over and above these special assignments are to be paid to the United States, and when the insurance fund becomes larger than is needed for the purposes intended the excess of the same shall also be paid to the United States. Under the Glass bill the dividend allowed is the same as in the Hitchcock bill, and the same provision is made for a surplus fund, and as to the remainder of the net earnings, 60 per cent is paid to the United States and 40 per cent to the member banks in the ratio of their balances with the reserve banks.

I call your attention to what I deem to be the injustice of this provision, if it should remain in the bill. It is to pay to the member banks 40 per cent, not in proportion to their capital, but in proportion to the capital that they have invested; not even in proportion to their reserves, but in proportion to the balances that the member banks keep in the reserve banks.

The Owen bill provides for a cumulative dividend of 6 per cent—1 per cent more than the Glass and the Hitchcock bills—and provides that all net earnings over and above such dividends, and over what is needed to obtain a similar surplus fund, as in the case of the other bills, shall be paid to the United States.

Since preparing my remarks I understand that provision has been made by the Democratic caucus for an insurance paragraph, which appears in the latest edition of the Owen bill. So the main difference between the Owen and the Hitchcock bills is the amount of the dividends to be paid to the stockholders. These dividends and the assets of the bank are free from all taxes, Federal, State, and municipal. It seems to me, in view of the fact that the stock and the dividends of reserve banks are entirely immune from taxes, a dividend of 5 per cent is ample. It is at least equal to a dividend of 7 per cent, subject to full taxing liability.

Under the plan proposed by the Hitchcock bill, allowing the

Under the plan proposed by the Hitchcock bill, allowing the public to subscribe for this stock, it will undoubtedly be looked upon as a good investment, far more remunerative for money than deposits in savings banks or other similar financial institutions. So long as Government bonds can be floated at from 3 to perhaps 4 per cent at the maximum, it seems to me that this stock at 5 per cent is very desirable and will be readily taken by the public. As I said yesterday, it is not the purpose in creating this system of reserve banks to create money-making institutions. If that was the only purpose of these banks, it might be advisable to allow a dividend of 6 per cent on the stock instead of 5 per cent.

We know that investors are glad to buy good first-class rail-road bonds on the stock exchange that yield from 4 to 4½ per cent, and at a maximum of 5 per cent. If that is the case, why have we not a right to assume that the public at large would be glad to accept this stock of the reserve banks, paying a dividend of 5 per cent, with immunity from all taxation? The holders of railroad bonds, in which the public invest, find themselves

to-day, when they come to collect the interest upon them, confronted by the new income-tax law, but the holder of this 5 per cent stock in these banks would not be troubled with anything

So there is no occasion, Mr. President, to provide for a dividend of 6 per cent. When you provide for a dividend of 5 per cent, with immunity from taxation, and make that dividend cumulative, you get a stock that will be a profitable investment, of which

the people of this country will be glad to avail themselves.

Mr. HITCHCOCK. Mr. President—

The PRESIDING OFFICER (Mr. CHILTON in the chair). Does the Senator from Minnesota yield to the Senator from Nebraska?

Mr. NELSON. I yield.

Mr. HITCHCOCK. It is possible that the Senator from Minnesota proposes to proceed to discuss the point to which I desire to call his attention now, but I will take the liberty of inter-

Mr. NELSON. I shall be very glad to hear the Senator. Mr. HITCHCOCK. I call his attention to the fact that one of the great objects of this legislation is to give to the borrowing public a low rate of interest similar to what prevails in Europe, and that the provision in the Owen bill which permits the reserve banks to pay 6 per cent upon their capital stock necessarily involves a higher rate of discount to the member banks, and that higher rate of discount to the member banks involves also the inevitable result that the member banks will be required to charge the borrowing public a higher rate of interest for their loans.

Mr. NELSON. Mr. President, that is undoubtedly true to the

fullest extent.

Mr. SHAFROTH. Mr. President-

Mr. NELSON. That simply tallies with what I stated yesterday in respect to the payment of interest on Government deposits, that whatever burden we impose on the regional banks, either in additional dividends or in the requirement to pay interest on Government deposits, lessens their value as aids to the public and to that extent makes them necessarily more burdensome to the borrowing public.

The PRESIDING OFFICER. Does the Senator from Minne-

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Colorado?

Mr. NELSON. Certainly.

Mr. SHAFROTH. Mr. President, the reference which was made by the Senator from Nebraska is a subject, it seems to me, which does not cover the question here. The House bill as it came over to the Senate provided that there should be a 5 per cent dividend upon the stock, but it provided that the banks should get a profit after the accumulation of a surplus fund of 40 per cent of that which is remaining.

The bankers appeared before the committee and said this ought not to be a profit-making bank, but as sure as you leave in the bill a provision that there shall be a profit going to the bank it will be used and operated as a profit-paying institution, which will be likely to produce high rates of interest for the purpose of making this 40 per cent as large as possible. For that reason the bankers suggested that there should be no profits coming to the bank, that the amount which they are getting for their loans on the average in the United States was 6 per cent, and that if 6 per cent were allowed it would be per-

fectly agreeable to them that the profit should be cut down.
We believe that in cutting out the profit, as we have done in the Owen bill, the result will be that this reserve bank stock or the bank itself will not be run for a profit, and for that reason it would be to the advantage of the person who presented paper for discount that there should be not a great amount given to him, and the 1 per cent of the stock itself would be nothing compared to the advantage which he would get by reason of not making this a profit-making bank. It seems to us when we cut out that that we of necessity give to every member bank dealing with the Federal reserve bank the advantage of not having profits accumulate for the bank for the purpose of being divided among the member banks. For that reason it seems to me to be a better provision than the provision of the bill as it came from the House.

Mr. NELSON. Mr. President, my good friend, the Senator from Colorado, seems to be oblivious to the fact that under the provisions of the Glass and Owen bills the banks are compelled to subscribe for this stock. They are the only stock-holders. They are the only ones who will get the dividends. They are the only stock-While he chops off on one hand 40 per cent of the Glass bill, he adds 1 per cent of the cumulative dividend on the other side.

going exactly to the same source.

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield further to the Senator from Nebraska?

Mr. NELSON. Certainly.
Mr. HITCHCOCK. It is really not a question between the Glass-Owen bill and the House bill. The House bill has been practically eliminated as far as this provision is concerned. The real question before the Senate is whether these reserve banks shall be required to pay 6 per cent to the stockholders or 5 per cent. If they are required to pay 6 per cent, they must increase the rate of discount to the member banks, and if they increase the rate of discount to their member banks the member banks must raise the rate of interest to the borrowing public. That is the question.

Mr. SHAFROTH and Mr. OWEN addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Oklahoma?

Mr. NELSON. I will yield to the chairman of the committee if the Senator from Colorado will allow me.

Mr. SHAFROTH. Certainly; I yield to the chairman. Mr. OWEN. Mr. President, I wish to suggest to the Senator that under the Hitchcock proposal there would be a draft upon the earnings of these banks of \$5,000,000, the dividend distribution being 5 per cent upon \$100,000.00 approximately.

Under the plan proposed by the chairman of the committee there would be a draft upon the system of only \$3.000.000, instead of \$5,000,000, by a dividend of 6 per cent on \$50,000,000 approximately. It was the deliberate purpose to make as small a draft as possible in the way of dividends on the earnings of these banks. That is the reason why the capital was diminished. The difference, therefore, in favor of the draft upon the earning power of these banks is in favor of the proposal made by the chairman and not in favor of the proposal made by the

Senator from Nebraska.

Mr. HITCHCOCK. Mr. President— Mr. NELSON. If the Senator will allow me, I will say to the Senator from Oklahoma that we can only arrive at that mathematical conclusion on the theory that the regional reserve banks which he proposes to establish are small institutions. much smaller than the institutions contemplated by what is called the Hitchcock bill. Under the chairman's bill one of these regional banks can be established with a subscribed capital of \$3,000,000, and half of that is to be paid in three installments, and the other half is to remain a liability. The regional banks, under his system, can actually stop business when one-sixth of the subscribed capital has been paid in, or when one-sixth of the subscribed capital has been paid in, or they can start, in other words, with a capital of only \$500,000. What do you think, considering the other big banks of the country, of starting a picayune regional bank with only \$500,000 capital, in the first instance, and with a maximum of \$3,000,000? It is no wonder that men are pining to have such banks established in their localities, localities that are not even in the class of reserve cities under the present arrangement.

Mr. President-

The PRESIDING OFFICER. Does the Senator from Minne-

sota yield to the Senator from Oklahoma?

Mr. NELSON. I will say incidentally in this connection that am proud of the fact that while we have in the State of Minnesota two large cities in close proximity, the suburbs of one running into the suburbs of the other, with a bank capital large enough to make a respectable reserve bank, yet the people of Minnesota and the bankers of Minnesota have the good sense not to clamor for a reserve bank.

I now yield to the Senator from Oklahoma.

Mr. OWEN. Mr. President, the Senator was comparing very unfavorably the difference in the magnitude of the Federal system under the one plan or the other and arguing that under the Hitchcock plan a lower rate might be justified. The only difference between the Hitchcock amendment, so called, and the Owen amendment, so called, as to the size of the capital to be employed is that while the reserves are the same and the public funds deposited are the same, amounting to about \$600,000,000 in either case, in one case—the Owen amendment—the capital is \$50,000,000 of bank subscribers with double liability, and in the other—the Hitchcock amendment—the capital is \$100,000,000 of private subscribers, making a difference of \$50,000,000 out of \$700,000,000, or one-fourteenth part as to the volume of actual capital engaged in the system. So the difference is not so very large in that respect

I only called attention to the fact that the tax upon the system under the proposal which I had the honor to submit would only be \$3,000,000 in the way of dividends, and it would be \$5,000,000 under the Hitchcock suggestion, out of which \$50,-000,000 of capital stock would be available to earn that additional dividend. To earn \$2,000,000 extra dividend the \$50,000,000 of extra capital must be constantly employed at 4 per cent, which is beyond a reasonable expectation and would be against a low-interest policy. The real argument between us was, Would the proposal of dividends under the chairman's proposal of \$3,000,000 dividend raise the interest rate higher than the dividend of \$5,000,000 under the proposal of the Senator from Nebraska? Obviously the chairman has offered the more economical proposition and one more acceptable to the banks.

I do not wish to interrupt Senators discussing the bill, and I am not going to do so, because it is inexpedient. I rose only for the purpose to point this out. When we come to the consideration of the matter paragraph by paragraph, I will undertake to explain any points of difference that will be necessary, but I am not going to interrupt Senators, even where I think the Senator is in error in regard to argument or statement of fact.

Mr. HITCHCOCK. Mr. President-

The PRESIDING OFFICER. Does the Senator from Minnesota yield further to the Senator from Nebraska?

Mr. NELSON. I yield. Mr. HITCHCOCK. I think the Senator from Oklahoma has made a serious mistake in stating that the only difference is a difference of \$50,000,000 between the so-called Owen bill and the so-called Hitchcock bill. There is a vast other difference. There is a difference of \$150,000,000 in the loaning power, be-There is a vast other difference. cause that additional \$50,000,000 in these reserve banks will constitute a loaning power of \$150,000,000 on the basis of the reserve of 33½ per cent. That great difference of \$150,000,000 in loaning power not only means that the reserve banks will be able to accommodate their customers at a lower rate of interest, but it means that they will not so soon be called upon to apply to the Federal reserve board for the privilege of using currency; and if there is any virtue at all in the contention of the Senator from Oklahoma [Mr. Owen] that you improve a system by reducing its capital, why not wipe out the capital altogether? To my mind, he has suggested a serious defect and weakness in boasting that he has improved his system by reducing his capital stock, which is in effect the margin of security that the depositors have. We all know that one of the serious defects of our present banking system to-day is that the banks are trying to do too much business on too small a capital, and we propose to put these great reserve banks into the field to strengthen the system. In the meantime it is suggested that we can give them an inadequate capital in order to insure 6 per cent dividends. I should be glad to hear the Senator from Oklahoma when he gets to that provision of the bill, because I consider it one of the serious defects into which his section of the committee has fallen. It is an element of weakness; it will mean a lack of confidence in this country and abroad in a system which has reduced its capital, has cut it in two, in order to enable it to pay 6 per cent dividends instead of 5 per cent.

Mr. NELSON. Mr. President, I desire to call attention to another difference between the Hitchcock bill and the Owen bill; but before doing so, I pause to remark that all the earnings of these banks, aside from the 5 per cent dividend, aside from the insurance fund, and aside from what is required to be accumulated as a surplus, all goes to the Treasury of the United States. In the Owen till it is provided that the surplus fund shall be used to pay the bonded indebtedness of the United States in general, while in the Hitchcock bill it is provided that this money shall be devoted, in the first instance, to the payment and redemption of the 2 per cent bonds. We propose this for the purpose of maintaining the credit and integrity of the United States in respect to those bonds. We know to-day that those bonds are at a discount; we know that the banks are greatly disturbed over the situation; we know that but for the fact that the bonds have heretofore been available and are now available as a basis of our national-bank currency, that as an investment perhaps these bonds would to-day probably not be

worth over 75 or 80 cents on the dollar.

So, Mr. President, summing up the question of dividends, I will say that I believe that inasmuch as the smaller investors are glad to invest in savings banks paying only 3 per cent inare glad to invest in savings banks paying only 5 per cent interest, and larger investors are willing to invest in railroad and municipal bonds that pay only from 4 to 4½ and a maximum of 5 per cent, with liability to taxation, we believe that a 5 per cent dividend on the stock of these regional banks is ample, when you take into account that it is exempt from taxation.

There is another feature in the bill in reference to this matter, and that is the provision for a reserve fund, or for an insurance fund, to protect depositors in member banks, which means the

depositors in the several national banks.

I am aware of the fact that a strong argument can be made against it. I am aware of the fact that it can be said that this is putting good banks and bad banks on a parity and making the good banks pay for the lapses and failures of the poor

President, but at the root of it all lies the proposition that in the case of a great crisis, in the midst of a financial disaster, in the midst of a monetary panic, when depositors, whether they be individuals or banks, get frightened and make a run on the bank there is nothing that would stop that run quicker than such an insurance plan. The only other plan of which I have any knowledge is that which was resorted to by the New York and other banks in 1907, to shut their doors. That will surely stop a run.

Mr. HITCHCOCK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Nebraska?

Mr. NELSON. I suppose that most of the Democratic Sen-ators—if the Senator from Nebraska will excuse me—probably feel that they have already settled this question in their caucus, and some of our friends on this side are probably at lunch. However, if the Senator insists, I shall yield.

The PRESIDING OFFICER. The Senator from Nebraska

suggests the absence of a quorum, and the Secretary will call

the roll.

The Secretary called the roll, and the following Senators answered to their names:

Mr. HOLLIS. The junior Senator from Kentucky JAMES] is absent on important business in one of the depart-

The PRESIDING OFFICER. Sixty-eight Senators have answered to their names. A quorum of the Senate is present.

Mr. NELSON. Mr. President, when interrupted by the suggestion of the absence of a quorum, I was remarking that the Hitchcock bill sets aside a portion of the surplus earnings of the reserve banks as a sinking fund for the redemption of the 2 per cent bonds; in other words, the bill provides for taking care of these bonds, first, by providing a sinking fund from the net earnings of the reserve banks, and, in the next place, by providing for a refunding system, to which I shall subsequently call the attention of the Senate.

As I said a moment ago, I think it is essential to the credit of this Government that we take proper care of the 2 per cent bonds. Not only must we avoid entailing a loss upon the banks in that respect but it is for the interest and future welfare of our Government that the integrity of all our Government obli-

gations shall be maintained.

I also referred to the insurance of deposits, as it is called, and I stated the fact that, while much might be said against the system, especially on account of the fact that it was placing the strong and well-managed banks on a par with the poor and badly managed banks, and making the solvent banks contribute to the losses entailed upon the country by the weak or insolvent banks, yet, after all, we are legislating here, or ought to be legislating, for cases of great emergency; and I know of nothing more effective in the midst of a panic or money crisis to stop a run upon a bank, either by individual depositors or by other banks, than to let the depositors know that in any event they will sustain no loss. As I said before, I know of nothing more effective than that to stop a run, aside from the system adopted by the New York and other great banks in 1907 of shutting their doors, which, of course, stops a run. There is another

Mr. CLAPP. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield to his colleague?

Mr. NELSON. I yield to the Senator.
Mr. CLAPP. Is it not also true that the knowledge that the deposits of the banks were guaranteed beyond any question would not only stop a run but would prevent the beginning of a run?

Mr. NELSON. Certainly; it would prevent the initiation of a run.

There is another argument, to my mind, Mr. President, that There is a great deal of force in that argument, Mr. justifies it. It is similar to the plan of fire protection established in the large cities. We levy taxes to organize fire companies and equip them with fire apparatus to put out fires in all parts of the city. It may happen that the man who lives in an elegant two or three story brick house takes good care of it and is careful about his fires and his lights, so that there is little fire risk as to his premises, while next door to him there may be a shack, a poor building, where a reckless man lives, who is indifferent about his ashes, his fires, and everything of that nature, and is not only ready to expose himself to the risk of fire, but to expose his neighbors. We have fire protection in the cities to prevent fire spreading from such a shack to other buildings. The owner of the big building has to pay a larger share toward that fire protection than the owner of the shack. but it is just as important to the man who owns the fine mansion to have the fire stopped in the shack or other building that is near him or across the street from him as it is to stop it in his own building.

Likewise, Mr. President, in the midst of a panic it is just as important to stop a run on what you may call an indifferent institution, a badly managed institution, or a small institution, as it is to stop a run on the big and strong bank, because bank runs are like a prairie fire; they spread rapidly and soon get beyond control.

Mr. CRAWFORD. Mr. President, will the Senator per-

mit me?

Mr. NELSON. In just a moment I will yield. We had an illustration the other day right here in this city, where depositors got scared and commenced a run on one of the local trust companies. Going down Pennsylvania Avenue one day I was astonished to see a line of people in regular order, marshaled and kept in line by policemen, extending the distance of a block, leading up to the front door of this trust company building, with two policemen standing by the door to see that the frightened depositors went in in regular order. I looked at They seemed to be of all classes-black and white, men with paper collars and men with linen collars, men with silk hats and men with soft felt hats, men with blouses and warmuses and men in Prince Albert coats-but they all seemed to be equally scared and all striving to get their money out of the bank.

What stopped that run? It was not the policemen. stopped that run was the fact that the people were informed that the Treasury of the United States had advanced a million dollars to meet that run. It was done, of course, in a roundabout way, for the Treasury Department could not furnish the money directly to the trust company, but it was furnished to a coterie of banks in this city, who could, under the law, become Government depositories, and those banks took that Government money and utilized it to stop the run. Just as soon as that column of panic-stricken depositors that I noticed on the street ascertained that provision had been made to pay them in

full the run stopped.

That is one way of stopping a run. Another way is to have the assurance in advance that money will be forthcoming to pay all depositors. Let every depositor know when he puts money in one of these institutions, in one of the national banks of the country, in one of the member banks of the proposed reserve system, that his deposits are as safe as the bills of those banks, and there will be no longer any lack of confidence; and, Mr. President, I can see no reason why we should not protect the depositors as well as the bill holders.

Perhaps I am influenced in favor of the proposed plan of insurance because of an early experience I had in these matters. I can not help telling it to my colleagues on this floor. When I was a law student, after returning from the Army, I managed to save up \$500. I got that much ahead. I had an old, rickety buggy, an old horse that would balk at times; I had a cow, and I had a wife and a child. Those were all my possessions. There was a bank in the city of Madison, where my friend, one of the Senators from Wisconsin lives, called the Farmers' Bank. To me all banks were alike; a bank was a bank; but to me, especially, as I was a farmer boy fresh from the country, the idea of a farmers' bank was something grand, and it appealed to me, so I put my \$500 in that bank. But, Mr. President, in three months all I had left was my wife, my baby, the old balky horse, the buggy, and the cow. [Laughter.] Ever since that experience, Mr. President, I have always felt that depositors should be protected, and I have labored for years in the direction of bringing about legislation for the protection of depositors.

I tried to get such legislation some years ago—I think in 1908—and I then made a speech on the subject. It has always been my gospel, and I am very glad that on this occasion my genial friend from Mississippi [Mr. WILLIAMS] and other friends

on the other side of the Chamber have come to my relief, so that in any event, whether the Owen bill or the Hitchcock bill shall become the law, we will have something for the protection of depositors.

Mr. CRAWFORD. Mr. President, at that point-

Mr. NELSON. Now I yield to the Senator. Mr. CRAWFORD. The Owen bill, as we have it before us, contains no provision of that kind; but I understand that in the conference that has been held some provision has been agreed to. It seems to me that it would be helpful to all of us, when a matter of so much interest and importance is under discussion, if we could have the draft that it is reported was agreed upon in the conference held by Senators on the other side of the Chamber. I want to inquire if it is not possible for us to have before the Senate at this time, or very soon, the changes of this character that have been agreed upon in conference, so that we may have the benefit of them when points like this are being discussed in the Senate.

Mr. REED. Mr. President, I do not see the chairman of the committee present, and, therefore, will venture a reply on

behalf of that branch of the committee.

Mr. CRAWFORD. I am simply making the inquiry.

Mr. REED. That report has been printed for days; it is here as a public print, and it is accessible to everybody. supposed that the Senator from South Dakota and all other

Senators had seen it.

Mr. NELSON. If the Senator will allow me, I think it is incorporated in the last print of the Owen bill, is it not?

Mr. CRAWFORD. It is not in the print I have here.

Mr. REED. It is printed in the draft of the Owen bill.
Mr. TOWNSEND. The print of December 1.
Mr. CRAWFORD. I have just returned to the Senate this morning, and would like to have a copy of it.

Mr. REED. I will take pleasure in handing it to the Senator.
Mr. CRAWFORD. I did not know that it had been printed.
I beg pardon of the Senator from Minnesota for interrupting

Mr. NELSON. Mr. President, in two particulars both the Owen bill and the Hitchcock bill are of great value to the ordinary mortal. They do something for the common man. First is the provision to protect depositors, which is important. It will not do to say that people ought to know what bank to select. How is a poor laboring man, working late and early for \$1.50 or \$2 a day, who has scarcely time to read his penny newspaper, going to be able to determine which is a sound bank and which is a questionable or rickety bank? To him a bank is a bank. It is the poor, helpless people who are in a condition where they are not able to judge for themselves whether a bank is of the best order or of an inferior order whom it is our duty to protect, and I am glad that the bill reaches out in that

Mr. REED. Mr. President-

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Missouri?

Mr. NELSON. I yield to the Senator. Mr. REED. I do not want to interrupt the Senator, but I should like to ask how anybody, except a financial expert, is to know as to the safety and solvency of banks in view of the fact that the States have examiners for the State banks, that the National Government has examiners for the national banks, and that all of the banks which have their doors open and invite deposits have been examined; and if the examiner has not discovered that the bank is an unworthy institution, how is anybody else, poor or rich, to learn the fact, unless he has some inside information?

Mr. NELSON. The Senator is eminently correct. Mr. CUMMINS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Iowa?

Mr. NELSON. Certainly. Mr. CUMMINS. I am, of course, thoroughly in favor of the proposition which the Senator from Minnesota has so well stated. I rise to ask him as to the amount which the provision contained in the Hitchcock bill, and a similar provision in the Owen bill, will accumulate year by year in the fund intended for the protection of deposits.

That is difficult to say in advance. We pro-Mr. NELSON. vide, in the first instance, in the Hitchcock bill, for a cumulative dividend of 5 per cent; then we provide that 25 per cent of the earnings of the bank in excess of the dividends shall be set aside to accumulate a surplus fund of 20 per cent of the capital; then we provide that 37½ per cent of the net earnings shall be set aside for an insurance fund; in other words, we set aside 25 per cent for the purpose of accumulating a surplus, 37½ per cent for the purpose of securing an insurance fund for depositors, and the other 37½ per cent goes directly to the stock-

The Senator from Iowa can readily see that it is difficult for anyone to state in advance what the income or revenues of these banks may be. It may be that their revenues will turn out to be largely in excess of the dividend requirement, and of the surplus requirement, which the Senator knows will be only temporary, for when 20 per cent has been accumulated it stops.

It is impossible, as I said, to predict in advance what the

fund will be; but the Senator can see that if these banks prove a success, as I hope they will, manifestly there will soon be a considerable surplus acquired over the 5 per cent or 6 per cent

If you will look back over the history of our national banks you will see that the losses to depositors have been very small. While I have not the figures with me at this moment, some four or five years ago I had occasion to look up the question, and I found that the amount required to make up the losses of depositors from the beginning of the system up to that time was exceedingly limited. My recollection is that it was only one-tenth of 1 per cent. There are comparatively very few banks that fail, and even if they fail and suspend there is oftentimes a good deal left of their resources that is available.

In this bill we leave it to the reserve board to prescribe the method in which this fund is to be available. I think it would be a good idea to follow the Canadian system. As I understand, when a bank suspends in that country and the depositors can not be paid immediately, notes are issued to the depositors, a species of Government note, drawing 6 per cent interest, payable out of the funds of the bank; and if it develops that the funds of the bank are not sufficient they are payable out of a reserve fund provided for that purpose. Those 6 per cent notes, which are immediately issued to the depositors and which are considered as good as gold, can be taken by the depositor who has his little all in a bank and immediately discounted, so that he can get his money. He may have to stand a slight "shave" on the notes, but that will be a small matter compared with having his deposits tied up for a year or more.

So I hope and trust, and I have no doubt, that the reserve board will adopt a plan by which, as soon as the deposits are tied up, the depositors can get something that will be of imvalue-either the cash paid immediately or notes on which they can obtain cash. I have no doubt that course will

Mr. BRISTOW. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Kansas?

Mr. NELSON. Certainly. Mr. BRISTOW. If it wil If it will not interrupt the Senator, I desire to say that our Kansas bank-insurance law makes provision that when a bank becomes insolvent the bank commissioner of the State takes charge of the bank and immediately ascertains the amount that is due the depositors, and issues to them certificates bearing 6 per cent interest. Those certificates, in the case of the only bank that has failed since the law was enacted, sold for par anywhere. Any of the banks in the community would take them, and the depositors were not without their money more than 48 hours. They got within that time every penny they had in the bank. It works with absolute perfection. Instead of being a detriment to the banking system, it has been a stimulus. The banks that are within the guarantee association are better banks and are run in better shape than they were before the insurance was established.

Mr. CUMMINS. Mr. President-

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Iowa?

Mr. NELSON. I do. Mr. CUMMINS. I realize how utterly impossible it is to give an accurate estimate with regard to the fund that would be accumulated under this plan. The only doubt I have with regard to the matter is whether this fund ought not to be made the first charge upon the earnings of the reserve banks, instead of the last charge.

Mr. NELSON. Does the Senator mean ahead of the dividends?

Mr. CUMMINS. Ahead of everything. I think the protection of the depositors is of higher importance and would give greater steadiness to our financial system than anything else that could be devised. I had in mind that possibly the fund ought to be advanced in its rank as a charge upon the earnings of the bank.

Mr. NORRIS. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Nebraska?

Mr. NELSON. I do. Mr. NORRIS. In reply to the query of the Senator from I should like to suggest that this fund is accumulated from the earnings of the regional banks to pay depositors in member banks; so it would be hardly fair to make that a charge that would have preference over the stockholders of the regional If they were stockholders of the member banks, of course it ought to have preference; but, as I understand, the plan of both branches of the committee contemplates paying depositors in failed member banks out of the fund that is to be raised from the profits of the Federal reserve banks. Am I not correct?

Mr. NELSON. Certainly.

Mr. NORRIS. For that reason, it seems to me, a depositor of a member bank has not the same claim on that fund as against reserve-bank stockholder that he would have against the stockholder of a member bank.

Mr. CUMMINS. That depends upon the object to be attained. The purpose is, and it is a very wise purpose, to make the depositors of the member banks know that their money is safe, so that they will not ask to withdraw it unless their business requires it.

In order to create that feeling you must have a fund that is sufficiently large and sufficiently sure to inspire confidence in the mind of the depositor. If the earnings of the regional reserve banks should turn out to be insufficient to pay dividends upon the stock and to accumulate the surplus, there would be no fund, and there would be no confidence in the minds of the depositors.

After all, whatever is done ought to be adequate to accomplish the purpose for which the provision is made. Personally I can not see any injustice, especially in the Owen plan, in having the depositors' charge or insurance charge come first, because the banks are the owners of stock in the regional reserve-

banks in proportion to their capital and surplus.

Mr. NORRIS. But that would not apply at least to the other plan, where the public owns the stock. On that point I should like to suggest, with the permission of the Senator from Minnesota, that while it is undoubtedly shrouded in doubt as to how large this fund is going to be and how soon it will be accumulated, and nothing but a trial will demonstrate what will come out of it, it seems to me to be safe to say that when-ever you multiply the number of regional banks and thus increase the expense of operating the system to that extent, at least, you necessarily decrease the probability of this guaranty

fund being sufficiently large to work out properly.

Mr. NELSON. Mr. President, there is some difference between the Owen and the Hitchcock bills in reference to the time within which national banks are required to join the system. and I desire to call the attention of the Senate to that matter.

Under section 8 of the Hitchcock bill a national bank must determine within six months after stock has been allotted to it that a dividend of 5 per cent is ample. It is at least equal to a dividend of 7 per cent subject to full taxing liability. Under the plan proposed by the Hitchcock bill of allowing the public to subscribe for this stock it would undoubtedly be looked upon as a good investment-far more remunerative than money deposited in savings banks or other financial institutions. So long as Government bonds can be floated at from 3 to 4 per cent interest, it seems to me that this stock at 5 per cent is very desirable and will be readily taken. It is a good plan, too, to set aside a part of these net earnings for the protection of depositors in insolvent banks, as provided in the Hitchcock bill and for which provision is made in the new Owen bill. nothing equal to this plan of stopping runs on banks in time of panic, except the one adopted in 1907 of entirely suspending payment. It is also a good plan to set aside these net earnings, over and above the insurance and surplus requirement, for the payment and retirement of the 2 per cent bonds of the United These bonds are now at a discount, and it seems to me that the application of these earnings to the retirement of these bonds is one of the means of sustaining the credit of the Government and protecting the banks who have invested in these bonds.

Section 9 of the Hitchcock bill provides under what conditions State banks may come into the system. I need not dwell on that subject, except to say that the Hitchcock bill substantially provides that a State bank may come into the system provided, first of all, it has a capital sufficiently large to warrant it in becoming a national bank; in the next place, it must deposit its reserves in the reserve system; and, in addition to that, it must be subject to inspection and to the same report requirements as the national banks.

Mr. PAGE. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minne-

sota yield to the Senator from Vermont?

Mr. NELSON. Yes.

Mr. PAGE. I should like to ask what would be the modus operandi in case the requirements of the reserve banks should be unlike those of the States. In our State we have a law which compels a bank to carry a certain sum in its own vaults and a certain other sum may be carried in any bank, national or State, in the same county. In other words, there is a variety of provisions which must be followed to comply with the Will there be a conflict between the State and the national law?

Mr. NELSON. No, not necessarily; not under the Owen bill. There may be a conflict of power, but not a conflict of law; that is, for a State bank to join the system it must first of all have the requisite capital to become a national bank; and a national bank can be incorporated with \$35,000 capital in a

place that has not over 3,000 people.

Mr. PAGE. All of our banks would have sufficient capital,

so far as that is concerned.

Mr. NELSON. In the next place, the State bank must comply with the reserve requirements of this bill; that is, it must keep the same reserves with the reserve banks and the same amount in its own vaults as is required by this system; but, outside of that, there is nothing in the State laws to prevent it from keeping its funds wherever it may please.

Mr. PAGE. But if the State law required an additional sum

to be kept as a reserve, it would make an excessive reserve.

Mr. NELSON. That would be for the bank to determine. Mind you, the State banks are not required to join this system; it is entirely optional with them.

Mr. PAGE. I understand that.

Mr. NELSON. So, I say, as a legal proposition, that all we require of them is, first, the capital; next, the maintenance of the reserve required under the law; next, they must make the same reports to the Comptroller of the Currency and be subject to the same system of inspection as are national banks. In our bill, the Hitchcock bill, we impose no onerous conditions. the Owen bill there are other conditions imposed upon the State banks which are a little different and more onerous; but I shall not take up the time to discuss them at this moment. They will be discussed when we take up that part of the bill.

Section 10 of the three bills provides how State banks may become member banks of the new system. The conditions required by the Hitchcock bill are that such banks must have a sufficient paid-up capital to entitle them to become national banks, and that the banks shall be subject to the reserve requirement of this act, and shall be required to make the same reports and be subject to the same examination and supervision national banks. The Owen bill differs from the Hitchcock bill in this respect in imposing other and more onerous conditions upon State banks joining the system. As I said, I shall not refer to that in detail at this time. Our section of the committee deemed it inadvisable to exact special conditions and requirements in such cases beyond that stated, for State banks can not be compelled to join the system or be compelled to go out of business. It is purely voluntary with them, and they are not likely to join the system if unnecessary restrictions are imposed upon them. It seemed to us that if the capital and reserve requirements are fulfilled and the same supervision and inspection is given them as national banks that this is

I come now to another important subject as to which there is a difference between the Owen and the Hitchcock bills, namely, in reference to the reserve board. Section 11 of the Hitchcock bill provides that the Federal reserve board shall consist of nine members, of which the Secretary of the Treasury shall be an ex officio member, the eight other members of the board to be appointed by the President, with the advice and consent of the The terms of the eight members are to be for eight years, except that in making the first appointments one member shall be appointed for one year, one for two years, one for three years, one for four years, one for five years, one for six years, one for seven years, and one for eight years. This will leave it so that after the first appointments are made one member will be appointed every year. Vacancies on the board may be filled by the President for the unexpired term. The eight members thus appointed must devote their entire time to the work and duties of the board and must not be officers, directors, or employees of any bank or trust company or hold any stock in such They shall receive a salary of \$12,000 a year, payable monthly, out of the Treasury of the United States. President shall designate one member of the board, other than the Secretary of the Treasury, as governor thereof and one member as vice governor, who shall act in the place of the gov-ernor. The governor shall be the active executive and presid-ing officer of the board.

Under the Glass bill the board is to consist of seven members, three of whom, the Secretary of the Treasury, Secretary of Agriculture, and Comptroller of the Currency, are ex officio members, and four others to be appointed by the President, with the advice and consent of the Senate, for the term of eight years. Of the first appointees, one is to hold for two years, one for four years, one for six years, and one for eight years, and thereafter

one shall be appointed every year for the term of eight years.

I think that is a mistake. It should be every second year, I

think.

Mr. SHAFROTH. In the Owen bill?

Mr. NELSON. In the Glass bill. Mr. SHAFROTH. I think it is every two years; yes.

Mr. NELSON. The salary of each of the four members—this is the Glass bill—is to be at the rate of \$10,000 a year, and the Comptroller of the Currency is to have \$5,000 in addition to his regular salary. The Owen bill eliminates the Secretary of Agriculture and the Comptroller of the Currency from the board and leaves six members to be appointed by the President, with the advice and consent of the Senate. Of the first appointees, one is to hold for 1 year; one for 2 years; one for 3 years; one for 4 years; one for 5 years; and one for 6 years, and thereafter each member shall be appointed for a term of 6 years. One of the six thus appointed by the President shall be designated by the President as governor and one as vice governor. It thus appears that the committee was unanimous in eliminating the Secretary of Agriculture and Comptroller of the Currency from the board, and the committee was also unanimous in retaining the Secretary of the Treasury on the board. out our section of the committee felt that in view of the important work assigned to the Federal board, the inauguration, supervision, and control of a great Federal bank system, as is proposed to be established by this bill, it was of the utmost importance to have a large and strong board, and, therefore, we came to the conclusion that the board ought to consist of nine members instead of seven, and in order to secure continuity of service, we deemed it advisable to extend the terms of the members of the board appointed by the President, after the first appointments, to 8 years and to compel the members of the board to devote their entire time exclusively to the duties of their office, and in order to get the highest grade of men for this great work, we felt that it was necessary to make a liberal allowance for salaries, and that \$12,000 a year for each member is none too much, payable monthly out of the Treasury.

In order to make this system successful, it is important that we get men of the highest grade, of undoubted integrity, and of the greatest experience. In order to get men to occupy these positions, if they are bankers, or have engaged in banking, they must abandon and lay aside that business. If they hold stock in national banks, in State banks, or in trust companies, they must dispose of it; in other words, they must divest themselves in every way of any interest in any bank other than the par-ticular bank of which they are placed in charge.

For that reason, in order to get men of high character, we felt it important to give them this salary. We also felt it important, inasmuch as great work is entailed upon the board to start this system, to keep it going, and to make it successful that it should be a board of nine members instead of seven.

I come in the next place to discuss briefly the powers of the Federal reserve board, the board that is at the head of the

system, and in which rests the ultimate control.

Section 12 of the Hitchcock bill defines the powers of the Federal reserve board in six separate paragraphs lettered from "a" to "f," inclusive. One of the most important powers conferred on the board is the power to compel one reserve bank, in times of emergency, to rediscount commercial paper for another reserve bank; in other words, to supply the needed funds in case of an emergency. This is a most extraordinary, drastic, and arbitrary power, but it is one that is absolutely necessary for the life of the system with so many reserve banks. Without it the entire reserves of the country can not be utilized, and some of the smaller reserve banks might find themselves, in cases of emergency, greatly embarrassed and, so to speak, at the end of their rope.

The least particle of reflection must make it apparent to everyone that this system of a number of regional banks, designed and intended to gather up, concentrate, and utilize the bank reserves of the country, in order to be a success and in order to work as a unit, must provide that in cases of emergency the reserves, as Mr. Vanderlip expressed it, can

be piped from one reserve bank into another.

This, of course, is an arbitrary power. It is most arbitrary to say to one bank, "You must discount, nolens volens, the commercial paper of another bank," when the directors of the bank to which the application is made feel that it would be

unwise, risky, and dangerous to do so; yet under these bills they are compelled in any event to obey the orders of the board. It is a most crastic power, which we could have obviated if we had adopted the only plan that would make a perfect system in this country-the plan of a central bank, a people's bank, controlled by the Government of the United States.

Mr. HITCHCOCK. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Nebraska?

Mr. NELSON. I shall later on come to this subject again. I yield to the Senator.

Mr. HITCHCOCK. I suggest the absence of a quorum, Mr.

The PRESIDING OFFICER. The Senator from Nebraska suggests the absence of a quorum. The Secretary will call

The Secretary called the roll, and the following Senators answered to their names:

Ashurst Fletcher Martine, N. J. Smoot Gallinger Gore Gronna Nelson Owen Perkins Stephenson Sutherland Thomas Bacon Bankhead Brady Brandegee Bristow Hitchcock Hollis Hughes Pomerene Ransdell Reed Robinson Thompson Thornton Townsend Vardaman Bryan Burton Chamberlain Root Saulsbury Shafroth Sheppard Shively Simmons Johnson Walsh Chilton Warren Weeks Clapp Clark, Wyo. Clarke, Ark. Crawford Dillingham du Pont Kenyon Kern Williams Works Lea Lewis McLean Martin, Va.

Mr. WEEKS. I wish to state that my colleague [Mr. Lodge] is absent on account of illness. I will let this statement stand for the day

The PRESIDING OFFICER. Sixty-three Senators have answered to their names. There is a quorum present. The Sena-

tor from Minnesota will proceed.

Mr. NELSON. Mr. President, another important power is that of regulating the issue and retirement of Federal reserve In this power rests ultimately our safeguard against undue inflation or undue contraction of our currency, a matter of the most vital importance and one that ought not to be lost sight of under any circumstances. In one respect the Glass and Owen bills differ from the Hitchcock bill, and that is in permitting the Federal reserve board to suspend the reserve requirements of the law for a period of 30 days and to extend the same for 15 days. This power is not conferred by the Hitchcock bill. Under the Hitchcock bill the banks may reduce their reserves to a limited extent, and within certain limits, upon the payment of a graduated tax upon such reduction, to which I shall hereafter refer in my remarks. The power to suspend or remove directors of Federal reserve banks, contained in this section of the Owen and Glass bills, is covered by the last part of section 4 of the Hitchcock bill. In fact, there is not any substantial difference between the bills in this respect. The Federal reserve board has the power to suspend temporarily directors of the reserve banks in case of maladministration or misbehavior in

Another provision found in the Owen bill not found in the Hitchcock bill is that of empowering the Federal reserve board to authorize the member banks to count as a part of their reserves the Federal reserve notes and the national-bank notes. I call the particular attention of the Senate to that provision. It permits the member banks to count as their reserves not only the national-bank notes, as they can do now, but also the reserve notes.

This seemed to our section of the committee as a dangerous power. It is the permitting of one promise to pay to be used as a reserve for another promise to pay. Reserves to be of any intrinsic value ought to be in specie, in gold or gold certificates; or, at all events, ought to be limited to national-bank notes. The provision in this section of the Owen bill empowering the Federal reserve board to permit national banks to act as trustees and executors is covered by section 26 of the Hitchcock bill, which confers this power on national banks absolutely. There is this difference

Mr. HITCHCOCK. Mr. President-

If the Senator will allow me to explain that Mr. NELSON. difference, I will then yield. The Hitchcock bill gives the power absolutely to the banks to act as trustees, as executors, and administrators, while the Owen bill permits the reserve board to give that power to the banks. That is my understanding of

[Mr. OWEN] permitting Federal reserve bank notes to be used as a reserve by member banks.

Mr. NELSON. I have already referred to that matter.

Mr. HITCHCOCK. I wanted to call the Senator's attention to another objection to that provision. If member banks throughout the country are permitted to count in their reserves the Federal reserve notes that are issued, it means that those notes will not come in for redemption as they would come in for redemption when the needs of business should dictate. universal experience is, and it was our experience with bank notes, that notes issued in that way to accommodate business should be drawn back just as soon as the business needs subside, and they can not be drawn back for redemption if banks are permitted to keep them in their vaults and count them as

Mr. SHAFROTH. If the Senator from Minnesota will yield

Mr. NELSON. I yield to the Senator. Mr. SHAFROTH. In answer to the Senator from Nebraska, relative to that matter, I will say if there comes into this system the State banks there will be an absolutely insufficient quantity of reserve money as provided by his bill. We have not enough reserve money, in my judgment, now to carry on in a fair manner the business of the national banks. This stream of redemption would not continue to go through the banks to the Federal Treasury here if it were not for the purpose of getting reserve money. That is the very object and purpose of it. That being the case, there is an insufficiency now for the national banks, and if you add to that the system of 18,000 other banks you will find that there will not be within many hundred millions of dollars sufficient money to act as reserves. If you have not money to act as reserves, those banks can not come into the system. It is on that account that we gave to the Federal reserve board the power to determine when, if at all, there should be Federal reserve notes to act as reserves of the banks.

Mr. POMERENE. May I make a suggestion to the Scnator in this connection? Many State banks are now authorized to use national-bank notes as reserves, and there is a reason which can apply to national-bank notes that would not apply with

equal force to reserve notes.

Mr. SHAFROTH. I thank the Senator for the suggestion. We have now held by the State banks many million dollars of these bank notes. They are held as reserves and the laws of the States permit them to be held as reserves. If we take that away and do not have sufficient reserve money by which they can come into the system, we are going to cripple the system

very much indeed.

Mr. HITCHCOCK. I will say to the Senator from Colorado that if it shall happen that the Federal reserve notes which he proposes to make redeemable in lawful money, in gold or other promises, are permitted to be held by the 7,000 national banks of the country as well as by the State banks of the country as reserves, the inevitable result will be that millions of these Federal reserve notes will be held by these thousands of banks as reserves, and the better money, to wit, the gold, will be driven out of this country under the inevitable operations of the Gresham law, and the banks instead of holding gold or gold certificates in their vaults as reserves will find it difficult to get the gold, because under the Gresham law it will be driven out of the country

Mr. POMERENE. Mr. President, will the Senator from Nebraska permit me to remind him that this privilege is not given under this bill as a matter of right, but that it is to be controlled wholly by the reserve board? This is the language:

(k) To authorize member banks to use, as reserves, Federal reserve notes, or bank notes based on United States bonds, to the extent that said board may find necessary.

Mr. HITCHCOCK. That I consider another vice, because it empowers the Federal reserve board to legislate instead of having the legislation here in Congress. It places in the hands of a few men a power which is entirely too great, and which in its exercise is likely to prove dangerous. When it is exerin its exercise is likely to prove dangerous. cised I believe the inevitable effect is going to be to drive gold out of circulation, or to tend to reduce the supply which we

have held in this country.

Mr. SHAFROTH. Mr. President—
The PRESIDING OFFICER (Mr. VARDAMAN in the chair). Does the Senator from Minnesota yield to the Senator from Colorado?

Mr. NELSON.

Mr. NELSON. Certainly. Mr. SHAFROTH. In answer to the Senator from Nebraska, I will say that we must bear in mind that our hindsight is a good deal better than our foresight. We shall have to vest some power in the persons who administer this system in order We shall have to vest the difference. I now yield to the Senator from Nebraska.

Mr. HITCHCOCK. Mr. President, I wanted to refer to the provision in the bill reported by the Senator from Oklahoma to meet the exigencies which will arise. Consequently, when we

find that there is now a shortage of reserve money, we are leaving it to a board, who have unquestionably the best interests of the system at heart, to determine just how much and just when

this money shall act as reserve money.

The Senator has said that this is going to drive gold from the country, and he further says that these Federal reserve notes will be hoarded by the banks. As a matter of fact, if a bank takes in a Federal reserve note, it can hold it, it is true, but when it has got to settle with the Federal reserve agent to take up its 30, 60, and 90 day paper, I do not see any reason why it should keep longer that money. It has to pay it in gold or in some other lawful money. Even if it does, it has got to emit lawful money, and consequently, whether it retains this Federal reserve money, or whether it retains the greenbacks, or whether it retains the gold, it seems to me would be immaterial.

The theory is advanced here that this gold will leave the country. I can not see in what manner it can do so. We have now a national-bank note out. Gold does not leave the country now. These national-bank notes are not permitted to be reserve money in national banks. That has not driven any gold out of the country that I know of. Yet it is an inferior currency, because it is not a legal tender, nor can national-bank notes act as reserve money. For that reason I have no fear that any gold will leave the country on that account.

The PRESIDING OFFICER. The Senator from Minnesota

will proceed.

Mr. NELSON. Mr. President, I will not at this time further discuss the question of permitting national-bank notes and notes of the reserve banks to be used as reserves. Later on, when that question will more appropriately come up for consideration. I shall probably have something to say regarding it: not, however, as a matter of oratory, because I am not gifted in that respect, but for the information of the Senate. I am anxious to compare the Owen bill and the Hitchcock bill, so that Senators may be able to judge of their respective merits or demerits.

I come next to section 13. Some slight changes have been made in that section, the subject matter of which is the Federal

advisory council.

There is no substantial difference between the three bills in respect to the provisions of this section. The council consists of as many members as there are reserve banks, and the members are appointed and paid by the banks. The council is to meet in Washington at least four times each year and is given the power, first, to confer with the Federal reserve board; second, to make oral or written representations to the Federal reserve board; third, to call for full information and to make recommendations as to discount and rediscount rates, note issues, reserve conditions, purchase and sale of gold, open-market operations, and the general affairs of the reserve system.

The next subject—and it is one of great importance—is that of rediscounts. There is no substantial difference in most of the provisions of this section between the three bills, except in following particulars: The Hitchcock bill requires that the indorsement by the member bank of the commercial paper which it seeks to discount shall be accompanied with a waiver

of demand, notice, and protest.

I want to say, Mr. President, that that was incorporated in the original Hitchcock bill, but was not in the original Owen bill as reported to the Senate. However, the Democratic conference adopted that provision, so that the Owen bill has adopted the very same phraseology in that respect; in other words, it requires that when member banks indorse their commercial paper for the purpose of passing it on to the reserve banks they shall do it with a waiver of demand, notice, and protest. Senators will readily see the value of that provision. These notes are taken by the local banks. They are generally payable at the local banks. If the regional banks, with whom these notes are left for rediscount for the purpose of securing Federal currency, were in every instance required to protest those notes it would cause them great expense, and they would have to present them for payment and protest them at the local bank where they were payable. To avoid that trouble this provision is inserted in both bills at this time.

In another respect there is a great difference between the Hitchcock bill and the Owen bill. The Owen bill permits no paper to be discounted that has a maturity of more than 90 days, while the Hitchcock bill permits paper having a maturity of 180 days, or 6 months, to be discounted to the extent of 50 per cent; that is, of the aggregate paper presented for discount by a member bank not to exceed 50 per cent of it can be 180-day paper, while the balance of it must be paper that matures within 90 days. In this respect the Hitchcock bill differs from both the Glass and the Owen bills. We were impelled to make this change in the bill, because bankers and business men who

appeared from the grain and stock raising sections of the country west of the Mississippi River said that they dealt but very little in 30-day paper, very slightly in 60-day paper, and only to a limited extent in 90-day paper; that most of the paper their banks dealt in was 6 months, 9 months, and 1 year paper; and that to cut them off from the discount privileges of this proposed law would be a discrimination against those banks that would be unjust and unfair.

As a matter of fact, Mr. President, barring the question of

time, that paper is as liquid and as good and reliable as any commercial paper of its kind. The 6 months paper taken by western banks from men engaged in the cattle industry, in the grain raising, in hog raising, and in other industries incident to farming in the Mississippi Valley is as good and reliable paper as any commercial paper. So in order to meet that condition

we put this provision in the bill.

Mr. POMERENE. I should like to interrupt the Senator, but I will not do so if he prefers that I should not.

Mr. NELSON. It will be no interruption, only I should be

glad if the Senator would not take too long a time.

Mr. POMERENE. I wish to state very briefly the reasons which actuated the section of the committee of which I am a member in keeping the limitation of 90 days upon paper which might be rediscounted. In the first place, it is true that many of the banks in the western country have 6 months paper, or paper of a longer date of maturity, and this paper is being constantly received by these banks. There is no time in their history in which there is not a substantial part of their paper that is due within 90 days. The 90-day provision applies not to the length of the paper, but to the time of maturity from the date it is presented for rediscount.

But in order that there might be no disadvantage to the bank in that respect we added a provision on page 44 which permits each of the member banks to execute and discount at the regional bank its own paper, giving collateral security therefor, so that a member bank could present its 30, 60, or 90 day note of its own execution and deposit with that the collateral which it might have in its own vaults in the shape of farmers' notes or commercial notes. The provision of the bill to which I refer is on page 44 of the print of December 1, and is as follows:

The Federal reserve board may authorize the reserve bank of the district to discount the direct obligations of member banks secured by the pledge and deposit of satisfactory securities, but in no case shall the amount so loaned by a reserve bank exceed three-fourths of the actual market value of the securities so pledged or one-half the amount of the paid-up and unimpaired capital of the member bank.

Mr. NELSON. That is an improvement upon the original Owen bill, but it is far from being satisfactory, because the member bank has to incur a direct liability, whereas in the other case it only incurs the liability of an indorser. The Hitchcock bill also permits paper having a maturity of 180 days, instead of 90 days, to be discounted, provided, as I have said, that not more than 50 per cent of the paper discounted for any member bank shall have a maturity of more than 90 days, and in no case—here is the qualification—and in no case shall any member bank have more than \$200,000 of rediscounts having a maturity of more than 90 days. In these particulars the Hitchcock bill differs from the Owen and Glass bills. In another important respect the Hitchcock bill differs from the Owen and Glass bills in providing that the member banks shall be entitled as a matter of right to the rediscount of eligible paper to the full amount of its capital stock upon the lowest current rate of discount, and no bank shall be permitted to discount an amount of paper exceeding the amount of its capital stock except upon the payment of a higher rate of discount; and in no case shall a Federal reserve bank discount paper for a member bank in excess of twice the amount of its capital stock without special authority of the Federal reserve board.

The principle of this provision is that under the Glass and Owen bills it is left discretionary with the board of directors of the reserve banks whether they will discount the paper of a member bank. If they feel hostile or unfriendly to a member bank, they can shake their heads and say "We do not care to rediscount your paper; we do not desire to do that" can give any such plausible reasons as bankers are in the habit of giving when they do not want to extend accommodations. This power under the Glass and the Owen bills is vested in the board of directors of the reserve banks, while under the Hitchcock bill, if a member bank presents the right kind of paper. such as is required by law—and the bill makes careful provision in this respect—it shall absolutely be entitled to have a discount for that paper. That provision is made to prevent the possibility of the directors of a regional bank discriminating between different member banks.

In the one case, the case of the Glass and the Owen bills, it is discretionary with the board of directors of the reserve banks as

to whether they will grant any discount to a member bank, while under the Hitchcock bill they are compelled, if the paper is of the right kind and quality, to grant the favor of a rediscount. We thought, Mr. President, that it would be a most dangerous power to leave with the directors of a reserve bank the discretion to say to bank A, "We will discount your paper," and to say to bank B, "We will not discount your paper." Those banks might be rival banks in the same community or in the same city. The board of directors of a regional bank might be disposed to favor one bank at the expense of another. prevent such discrimination we made this provision in the Hitchcock bill.

I have already called attention to the fact that the Hitchcock bill provides that there shall be no interest paid on any deposits by the reserve banks. They are depositors of the member banks, and their chief deposits are the reserves, which the member banks may deposit, which may be a great deal more than their reserves if they see fit. In order to get away from the method that has proven so vicious in our present reserve system, in order to make the new system a success, it is absolutely necessary to prevent the payment of interest on deposits of member banks.

So. Mr. President, the Hitchcock bill contains an absolute prohibition on the subject; the Glass bill also contains a pro-vision prohibiting interest on deposits, except Government deposits; while the Owen bill, as it appears before the Senate to day is entirely silent on the subject, and leaves it discretionary with the reserve banks to pay or not to pay interest. It may be that these reserve banks, if the door is left wide open, may be so greedy to secure deposits from country and member banks that they will adopt the method which has proven so harmful under the present reserve system of paying interest on bankers' deposits.

Section 15 of the bill relates to what we call open-market operations. The purpose of this section of the bill is to confer upon the reserve banks the authority to go into the open market and buy foreign and domestic exchange, gold coin and gold bullion, bonds of the United States and of any State, county, or municipality, and short-time obligations of foreign Governments, and so forth. I need not go into details in respect to the provisions of this section any more than to say that the purpose in giving this power to the reserve banks is to enable them by this means to regulate the rate of discount and the supply of gold, and it may, to some extent, accomplish this. It is sufficient to say that it is the purpose of this provision in the bill to enable the banks to control by this system what are called the discount rates; if rates get too high, to cut them down; and it may be necessary to use these discount rates for the purpose of controlling the gold supply.

The Glass and Hitchcock bills provide, in section 16, that, aside from the 5 per cent redemption fund of our national-bank note currency and the redemption fund provided for the reserve notes to be issued under the provisions of this act, the residue of the Government funds are to be deposited in the reserve banks which are to act as fiscal agents of the United States, and that the disbursements of the Government shall be made through checks upon the banks against these funds.

In this respect, as I have said, Mr. President, the provisions of the Glass bill and the Hitchcock bill are identical. Both bills contemplate what I regard as of the utmost importance, that the Government revenues shall from day to day be deposited with the reserve banks and that the Government shall draw its checks against those deposits. The purpose of this provision is to get away from the rigidity and the vicious character of the present subtreasury system, which locks up the surplus funds in the Treasury or Subtreasury of the United States and makes them dead capital, except where a Secretary of the Treasury sees fit to peddle them out to various banks.

The Owen bill is radically different in this respect from both the Hitchcock and the Glass bills. It is different in that it leaves it absolutely discretionary with the Secretary of the I have heretofore stated, is a most dangerous power to confer upon the Secretary of the Treasury. I have already pointed out how the exercise of this power in one instance led practically to the destruction of a Federal bank. The all-important reason for keeping the Government funds on deposit in the banks is to keep the surplus moneys of the Government in active use and circulation in the channels of commerce and trade instead of having them locked up in the vaults of the Treasury as dead funds. To leave to the discretion of the Secretary of the Treasury as to whether he will make such deposits or not is a most dangerous power. The moneys are not his, but the moneys of the Federal Government—in other words, the moneys of the people of the United States. If, for the purpose of establishing a new monetary system under the control of the Federal Government

for the welfare of the people and of the Government of the United States, it is necessary to establish such a system of banks as is provided in this measure, surely the surplus funds of the Government ought to be available to their fullest extent for the strengthening and maintenance of the system.

The Government revenues owing to the income tax, provided for by recent legislation, will be by the beginning of each fiscal year undoubtedly swelled largely beyond the immediate wants of the Government. These surplus revenues may for the time being be a source of great help to various parts of the country. At one season of the year they may prove to be of great help in moving the cotton crop, at another season of the year in moving the wheat crop, and at another season of the year in maturing and marketing the cattle supply of the country. To leave it with the Secretary of the Treasury to determine when, where, and to what extent he shall deposit the surplus revenues of the Government would be equipping him with a power of pure absolutism. If it is necessary to have any discretion exercised at all in the matter of such deposits, the discretion ought to be vested in the Federal reserve board and not with the Sec-

retary of the Treasury.

I now come to another important feature of the bill, which relates to the manner of note issues of the new currency which we propose to create.

The Hitchcock bill, section 17, provides that Federal reserve notes shall be issued under authority of the Federal reserve board for the purpose of making advances to Federal reserve banks. The notes are to be the obligations of the United States and shall be receivable for all taxes, customs, and other public dues, but shall not be held as reserves by member banks or by reserve banks; that they shall be redeemable in gold on demand at the Treasury of the United States or at any Federal reserve bank. These notes are to be issued upon the application of Federal reserve banks accompanied with a tender to the local Federal reserve agent of collateral security consisting of the commercial paper that may be discounted equal in amount to the reserve notes applied for.

The Federal reserve bank may issue and circulate such notes, either upon a reserve of gold coin, gold bullion, or gold certification. cates, equal in amount to the face value of the notes issued and outstanding, or the bank may, at its option, upon a gold reserve of 45 per cent and the deposit of collateral security consisting of such notes and bills as may be discounted under the provisions of this act or revenue notes of the United States, or both, equal at their face value to the face value of the outstanding reserve notes; or to put the matter more briefly, reserve notes may be issued par for par in gold or may be issued for a par of commercial paper backed by a reserve of 45 per cent in gold.

Mr. BORAH. Mr. President—
The PRESIDING OFFICER (Mr. Hughes in the chair). Does the Senator from Minnesota yield to the Senator from Idaho?

Mr. NELSON. I do. Mr. BORAH. Will it interrupt the Senator if I ask a question?

Mr NELSON. Not at all. Mr. BORAH. The Senator from Minnesota says that these notes are to be issued by the Government and are obligations of the Government. Technically, of course, that is correct; but, as a matter of fact, they can not be issued except upon the initiative of the Federal reserve banks, can they?

Mr. NELSON. That is true.

Mr. BORAH. The application must be made?

Mr. NELSON. It must come from the Federal reserve bank.

Mr. BORAH. As a matter of fact, then, while the Government formally and technically issues such currency the substantive power of calling it into existence rests with the reserve banks?

Mr. NELSON. The initiative must come from them.

Mr. BORAH. In other words, the Government itself has no power to put into circulation any currency unless the banks say that they think they need the currency.

Mr. NELSON. That is right.
Mr. BORAH. Then, again, if, the notes having been issued in this form, the banks come to the conclusion that they would like to contract the currency, what power has the Government to prevent the banks from contracting the currency; in other words, to prevent the banks from refusing to put up more collateral, which would necessitate the collecting of money to pay

off the collateral put up and thereby contract the currency?

Mr. NELSON. The power comes in this way: The applica-Mr. NELSON. The power comes in this way: The applica-tion, in the first instance, for relief comes from a member bank. A member bank applies to a reserve bank for credit. We will say that it applies to a reserve bank for \$100,000, half of it in book credit in the reserve bank and half in currency.; If that demand is made on the reserve bank it is the duty of the reserve bank to discount the paper of the member bank and to give that credit; and if it is not possessed of the circulating notes sought for it must seek to obtain them at the earliest That is my understanding of the practical workings

Precisely, Mr. President; but what I want to get very clear in my mind, because to my way of thinking this note-issuing proposition is the vital principle of this bill-

Mr. NELSON. One of the vital principles.
Mr. BORAH. Well, to my way of thinking it is the vital principle, for the reason that in the power to issue these notes lies the power either to inflate or to contract the currency of the country to a very marked degree.

Mr. NELSON. To some extent. Mr. BORAH. Of course, there is such a thing as inflating from the mere point of extending loans, and so forth. There is a form of inflation which grows out of an extension of credit in that way; but we have here the power to issue these notes technically belonging to the Government, but the Government can not move in the matter, either pro or con, until the Federal reserve banks put up the collateral and say that they deem it wise to have this issue. It is true that the Government may refuse to issue if the banks ask for it, but it is not true that the Government may issue it whether or not they think it wise.

Mr. NELSON. Not in the first instance; not on their own

Mr. BORAH. Then, on the other hand, if after a hundred million dollars or two hundred million dollars have been put out the banks come to the conclusion that the currency of the country should be contracted, they simply refuse to put up more collateral, and that necessitates collecting the money from the people of the country to pay the collateral which is up, and contraction must necessarily ensue. I think the power lies here for the banks of this country to contract or inflate the currency almost at will.

Mr. NELSON. I hardly think so. Mr. SHAFROTH. Mr. President, I should like to call the attention of the Senator to the fact that under the Hitchcock bill it is proposed to retire the national-bank circulation to the extent of \$50,000,000 each year, and there is no provision for any permanent currency to take its place.

Mr. NELSON. That is a mistake, as I will show when I

come to deal with that subject.

Mr. SHAFROTH. Of course, that bill provides for currency that is based upon 30, 60, 90, or 180 day paper; but that, as the Senator from Idaho [Mr. Borah] has said, is directly in the hands of the banks, and they can issue it or not at their

Mr. BORAH. Mr. President, I am not able to discuss with the Senator the difference between the Hitchcock bill and the Owen bill with reference to that fact. It may be that the Sen-

ator is correct; I do not know; but—
Mr. SHAFROTH. The difference is that the Owen bill provides that there shall be issued in place of the national-bank notes, at the will of the banks presenting them, the currency of the Federal reserve banks, dollar for dollar as it comes in for redemption. The purpose was to confer on the banks, which had 2 per cent bonds up and felt that they ought not to be driven into a system against their will, the right to cash those bonds and transfer practically the circulating medium over to the Federal reserve banks.

Mr. BORAH. Does not the Owen bill contemplate the final

retirement of the present national-bank notes?

Mr. SHAFROTH. It can be done, but it leaves it with the banks to do it; and the reason it is left with the banks to do it is because they are afraid they will lose money on the 2 per cent bonds and it was thought to be unfair to drive them into the Federal reserve system without providing a way by which they could get eash for their 2 per cent bonds.

Mr. NELSON. Mr. President, I desire, before the Senator from Idaho proceeds further, to call his attention to two fundamental propositions. In the first place, it is agreed unanimously that one of the chief defects in our present banking and currency system is what is called its lack of elasticity, its rigidity, being based, as it is, upon Government bonds.

Mr. BORAH. Mr. President— Mr. NELSON. I will yield to the Senator after making a brief statement.

Mr. BORAH. Very well.

Mr. NELSON. That is the defect of the present system. The object of the proposed legislation is to secure currency that will be more elastic, more responsive to the commerce and trade of the country. It is conceded that the only system by which you can get a currency that will be in its nature elastic is to

which, as is sometimes said, collects itself. There is provided, therefore, as we might say, a natural system of elasticity. It is put into operation in this way: A member bank wants currency. To get that currency it takes its portfolio of short-time commercial paper, presents it to the reserve bank, and says, want notes on this." After it presents its short-time commerpaper to the reserve bank the reserve bank is in duty bound, under the bill, if it has not got the reserve notes on hand, to make application to the Federal reserve board for leave to issue them. So the notes are issued. When those notes go into circulation the question of their retirement is like the retirement of any other notes. When they have performed their function, when they have traveled around and ultimately returned to the bank for redemption, they are re-deemed. There is no artificial way, so far as I can see, by which we can get an effective system that will make such banknote paper elastic except by some such plan as this. That is

the theory of the bill. Now I yield to the Senator.

Mr. BORAH. Well, Mr. President—

Mr. HITCHCOCK. Mr. President, will the Senator from Idaho permit me to answer a little more fully the question he

addressed to the Senator from Minnesota?

Mr. BORAH. I will be glad to yield to the Senator.

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Nebraska?

Mr. NELSON. Yes.

Mr. HITCHCOCK. The question raised by the Senator from Idaho involves a criticism which I think applies with force to the Owen bill, because there is nothing at all in the Owen bill requiring the reserve banks to respond to the needs of business. The directors of the reserve banks to respond to the needs of business. The directors of the reserve banks, under the Owen bill, have absolute power to refuse or to grant discounts. It is practically within their discretion, so long as they treat the banks with some equality. Under the bill which has been reported by the Senator from Minnesota, myself, and others, every bank belonging to the system is entitled as a matter of right to discounts to the amount of its capital stock, which, in the aggregate, might be a thousand million dollars if they all took advantage of the provision at the same time. They are entitled to the discounts. and the reserve bank directors must grant them. bank directors can not discount the paper, unless they have the cash, without calling upon the Federal reserve board for currency. The Federal reserve board is required when a reserve bank applies for currency to grant it, provided the reserve bank complies with the law as to gold reserve and securities. Thus it happens that in the hands of the business world lies the power of securing additional currency when the needs of business require it, and that currency can only be retired as the needs of business subside.

I think the Senator will see that it would be possible under the Owen bill for the directors of the reserve banks to refuse to discount paper, which would compel member banks to refuse to grant loans, which would result in a constriction of currency; but under the bill which the Senator from Minnesota and I stand for that can not occur, because, as the individual banks call for discounts, they are entitled to them, and when they get them, the reserve bank is compelled to call for currency, and when the reserve bank calls for currency, the call must be answered.

Mr. POMERENE, Mr. President—
The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Ohio?

Mr. NELSON. I yield. Mr. POMERENE. In view of what has been said by the Senator from Nebraska [Mr. HITCHCOCK], I think it would be quite pertinent for the Senate to bear in mind the language of the Owen bill in this behalf. It reads:

Said board-

Speaking now of the board of directors of the reserve banks-Said board shall administer the affairs of said bank fairly and impartially and without discrimination in favor of or against any member bank or banks and shall—

Note the word "shall"-

subject to the provisions of law and the orders of the Federal reserve board, extend to each member bank such discounts, advancements, and accommodations as may be safely and reasonably made with due regard for the claims and demands of other member banks.

I may say, in addition, that if the board of directors should refuse to administer the funds and the business of the regional bank as required, they are subject to removal by the Federal reserve board, which has full supervisory powers over all of the

Mr. HITCHCOCK. Mr. President, the quotation is quite correct, but it exactly verifies what I say-that the question of granting discounts rests in the discretion of the directors of the Federal reserve banks. They grant discounts to a bank to the base it upon short-time commercial paper, which is liquid, and extent of 20 per cent of its capital, or 30 per cent of its capital,

or 100 per cent of its capital, or 200 per cent of its capital, or 500 per cent of its capital; they can make a constriction of credits and a restriction of business, or, in their discretion, they can expand credits; but in the bill which we support this discretion is not permitted them, and it remains for the business world, through the individual banks, to show what the needs of business are.

Mr. BORAH. Mr. President-

Mr. SHAFROTH. If I may say a word right here, I want to say, in answer to the Senator from Nebraska [Mr. HITCHCOCK], that that clause of his bill is known as the "compulsory rediscount provision"; it leaves no discretion; and I maintain that in the administration of this system it may be very unwise to have circulating notes issued; it may be that for many reasons it may be improper to do so, and consequently there ought to be a discretion left, as it has been left in the Owen bill, to determine from all the facts whether or not there should be money issued at a particular time. Instead of that, no matter what the condition of the circulating medium may be, under the provisions of the Hitchcock bill a member bank may go to the Federal reserve bank and say, "I want this money; I demand it," and there is no discretion left. It seems to me, as we do not know how this system is going to work, that we had better leave a discretion in the hands of some persons who can see all of the circumstances at the time the power is sought to be exercised.

Mr. O'GORMAN. Mr. President, if the Senator will pardon me a moment—

The VICE PRESIDENT. Does the Senator from Minnesota

yield to the Senator from New York?

Mr. NELSON. I have yielded to the Senator from Idaho [Mr. Borah], and he can yield to the Senator from New York if he so desires.

Mr. BORAH. I yield.

Mr. O'GORMAN. I merely desire to say a word supplementary to what has been said by the Senator from Colorado [Mr. Shafroth], and I think it is quite pertinent. The members of the committee who subscribed to the so-called Owen amendment were not unmindful of the view entertained by the Senator from Nebraska [Mr. Hitchcock] regarding the need of safeguarding member banks from possible discrimination on the part of the officers of the regional banks. To make discrimination impossible, it was the suggestion of the Senator from Nebraska that the members of the regional banks be deprived of all discretion and be compelled to make loans or allow discounts up to a certain figure, even though their own judgment condemned the transaction.

The bill as it stood at that time provided, in substance, that any aggrieved bank could communicate its complaint of discrimination or favoritism to the members of the reserve board in Washington. It was said in that connection that that would involve delay, and some conceived the possibility of a member bank being forced to the wall before it could secure suitable redress in that manner, because the bill at that time provided that the Federal reserve board in Washington would be required to give a hearing to the six of the nine members of the regional bank before any one of the six could be removed.

The bill at that time provided, in substance, that the three governmental appointees in each regional bank could be removed by the Federal reserve board after a hearing. It also provided that the three representatives of business in the district, or any one of them, could be removed after a hearing; but no power was conferred upon the Federal reserve board to remove the three representatives of the bankers who would be

on the Federal reserve board.

At that stage of the matter, having in mind the objection of the Senator from Nebraska, we changed the bill and conferred upon the members of the reserve board in Washington arbitrary, unrestricted, and unlimited power to romove every one of the nine officers of a reserve bank, including even the three representatives of the bankers. It was thought that with that summary power lodged in the Federal reserve board in Washington no officer of a Federal reserve bank could be induced to discriminate against any of the member banks in the district affected because, as the provision in our bill stands now, if a member bank has reason to believe that the officers of the regional bank are not treating it fairly and impartially it can at once communicate its complaint to the Federal reserve board and if the evidence laid before the board is satisfactory the offending officer of the regional bank will be at once decapitated without a hearing, the only requirement of the statute being that when the removal takes place the Federal reserve board chall state its reasons for the removal.

Mr. NELSON. Mr. President, if the Senator will allow me to proceed, the mere statement of the case by the Senator from

New York shows how long and tedious a process takes place. If a country bank, with a portfolio of short-time, first-class commercial paper, is in urgent need of currency, it can get that currency only in the discretion of two boards. The first of those is the board of directors of the reserve bank. If they fail in their duty, then the matter is in the discretion of another board. If the board of directors of the reserve bank fail in their duty, there must be a hearing, a trial, and a removal, and new men must be appointed.

What a slow and unsatisfactory process that would be in case of an emergency! Take a case of money stringency, when banks need currency immediately. They have the commercial paper on hand, as good and as liquid paper as you can find anywhere. Why should they not get it immediately, in limited quantities, if it does not exceed their capital stock and they need it? Who is a better judge of whether a member bank needs currency on its paper than the country bank out in Minnesota or in Idaho? Who is the better judge of the need for currency of that community—the local bank, or the reserve

board, or a board sitting here in Washington?

Mr. BORAH. Mr. President, as I understand the distinction between the two bills as a result of this illuminating discussion, it is that more power is vested with the board to determine the issuance of currency under the Owen bill than under the Hitchcock bill. In other words, the Hitchcock bill undertakes to transfer more power to the several business communities, to the banks, and so forth; but that was not the question which interested me with reference to the note-issuing matter.

The thing that interests me is that while the board has a negative power to prevent, after all the initiative in issuing currency rests alone with the banks. The banks alone can provide the currency, and it is absolutely within the power of the banks to contract the currency when they get ready to do so.

Regardless of which one of these bills is the better, so long as the proposition is clearly established that it is within the power of the banks of the country either to inflate or to contract the currency, it seems to me it is well worthy of consideration

whether we want to give that power.

For myself, I believe the power to provide a sufficient volume of currency with which to do the business of the country belongs exclusively to the Government. I believe that it should not depend upon the initiative of banks to provide that currency and that it should not be subject to the power and dictation of the banks in contracting that currency; that when a sufficient volume of currency has been provided by the Government with which to do the business of the country it is then the province of individuals and private corporations to establish their own credit.

Mr. NELSON. Mr. President, when I took the floor between 11 and 12 o'clock to-day I supposed I should be through before this time. Owing, however, to the large number of interruptions—and I am not finding fault with them, because I regard the interruptions as very valuable—I have detained the Senate much longer than I expected to do, and it will take me some time longer to cover what I intend to say. In my remarks I have aimed to go over the bill paragraph by paragraph and to describe as best I could the difference between the two plans, so that Senators could see the respective merits of the two systems; but in view of the length of time I have already occupied to-day, I now yield the floor to the Senator from Kansas [Mr. Bristow], with the purpose of resuming my remarks at some time to-morrow.

Mr. GALLINGER. Mr. President, in view of the small number of Senators present, especially on the Democratic side, I suggest the absence of a quorum.

Mr. POMERENE. I hope the Senator will not call all of those Senators Republicans who are on the Republican side at this moment.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hollis	O'Gorman	Smith. Md.
Bacon	Hughes	Owen	Smith, S. C.
Bankhead	Jackson	Page	Smoot
Borah	James	Perkins	Stephenson
Brandegee	Johnson	Poindexter	Sterling
Bristow	Jones	Pomerene *	Sutherland
Bryan	Kenyon	Ransdell	Swanson
Chamberlain	Kern	Reed	Thomas
Clapp	Lane	Robinson	Thompson
Clarke, Ark.	Lea	Saulsbury	Thornton
Crawford	Lewis	Shafroth	Townsend
Cummins	McLean	Sheppard	Warren
Fletcher	Martin, Va.	Sherman	Weeks
Gallinger	Martine, N. J.	Shields	Williams
Gronna	Nelson	Shively	
Hitchcock	Norris	· Smith, Ga.	

The VICE PRESIDENT. Sixty-two Senators have answered to the roll call. A quorum of the Senate is present. The Senator from Kansas is recognized.

Mr. BRISTOW. Mr. President, I have prepared in more or less continuous form an argument which I should like to deliver. After it is through I shall be glad to answer any question I can that any Senator may desire to ask me. I would rather not be interrupted until I have completed the manuscript.

For a number of years there has been agitation for a revision of our banking and currency laws. It has been alleged that the reserve provisions of the present law are not adequate to properly serve the business requirements or to meet financial emergencies through which every civilized nation at times passes. Under the present law national banks are divided into three classes-country banks, consisting of banks that are not in reserve or central reserve cities; reserve city banks; and central reserve city banks. Country banks are required to maintain a reserve of 15 per cent of their deposits. The purpose of this is to require them to have on hand or available a sufficient amount of money to meet any immediate demand that might be made upon them by their depositors. Such banks are permitted to keep 9 per cent of this reserve in banks located in reserve cities, the theory being that when they need this 9 per cent they can get it promptly from such banks. Forty-seven of the commercial centers of the country have been designated as reserve cities, and the national banks in those cities are termed reserve banks. Of the reserve banks there are at the present time something over 350. The banks in the reserve cities are required to keep a reserve of 25 per cent of their deposits, but 121 per cent, or onehalf of that reserve, may be kept in banks located in what are known as central reserve cities. There are three central reserve cities—New York, Chicago, and St. Louis—and the banks in these cities are required to keep 25 per cent of their deposits in reserve in their vaults.

The country banks, therefore, are permitted to keep 6 per cent of their legal reserve in their vaults and may keep 9 per cent in reserve city banks; banks in reserve cities must keep 12½ per cent of their deposits in their vaults and may keep 12½ per cent in central reserve city banks; while the banks of the central reserve cities are required to keep 25 per cent of their deposits in their vaults.

Now, it so happens that when a financial crisis comes upon a central reserve city that the banks of the country, not only in the reserve cities, but the country banks as well, become uneasy as to the safety of their reserves, which are deposited in any of the banks in such central reserve city. This is natural, because if any of these banks fail the reserve funds which the country banks might need for their own depositors would be tied up and unavailable. The result is, as was demonstrated in 1907, that there is a stampede of country bankers to get their money out of the central reserve city. There is, in fact, created a bankers' run on the banks of the central reserve city which may spread to other cities, which would create a nation-wide bank panic. The utter inability of a create a nation-wide bank panic. central reserve city bank to stand such a run from its country bank depositors has been demonstrated upon a number of occasions. This condition has led to the agitation in favor of reforming our reserve system so that the reserves can be concentrated into fewer banks and made more available for use in emergencies, and also to a demand for the creation of some process by which a bank can temporarily hypothecate its securities for currency to meet the demands of its depositors if the required reserves should prove inadequate.

Again, during certain seasons of the year the banks in different sections of the country are unable to supply their customers with all of the money that is needed in moving the crops, and upon such occasions they borrow the money upon their own notes from other banks or they carry the notes of their local customers to the reserve city banks and rediscount them, and in that way obtain more money than is furnished by their local supply to loan to their customers who at such times are demanding additional accommodations. This is true of the banks located in the cotton, wheat, and the cattle producing sections of the country. The result is that at times ducing sections of the country. The result is that at times the demand for currency during these crop-moving periods is greater than the reserve banks are able to supply without denying to their local customers loans that are necessary in the conduct of their business—that is, at times we have a plethora of currency and at other times a stringency. Because of these conditions our currency system has been criticized as inelastic— that is, there are no methods by which currency when it is not needed can normally and automatically retire, and when it is needed can be automatically and normally brought out. In order to give this desired elasticity to our currency it has been urged that there should be modifications of our present banking and currency laws. The purpose sought by this legislation, therefore, is to cure these apparent defects by providing for the

mobilization of the reserves and the creation of an elastic cur-

The increased mobilization of the reserves has been sought by the changing of our reserve system so as to have the reserves deposited into 1 or not more than 12 central banks, instead of being scattered in 350 or more banks in half a hundred different cities.

By assembling these reserves into one or a few banks throughout the country they become more mobile; that is, they can be used to supply one section of the country when it is needing currency by using the reserves and the surplus money of other sections which may not at that time be needed by them.

The usefulness, therefore, of a central bank as a reserve depository depends largely upon the magnitude of the country which it serves and the diversity of the industries in that region. If it serves but a small section, then the demand for currency will probably come at the same time from all of the banks in such region, and the plethora of currency would occur likewise at the same time during the year. That is, if the territory of a regional bank consisted of a wheat-producing or a cotton-producing section only, the demand for money would come from all of the banks at the same time, and as a result the reserve bank would be unable to meet it. But if such territory includes a vast area embracing manufacturing, cotton growing, and corn and wheat producing regions, the demands will occur at different seasons of the year, so that the surplus at one time of one section can be used to supply the necessity of another part of the same district where conditions require more than the normal amount of currency.

than the normal amount of currency.

It is recognized by students of finance and experts with practical unanimity that the ideal system would be one great central reserve depository for the entire Nation. But this has been objected to for reasons which I shall later discuss, and as a substitute for such central depository there has been suggested a number of these central depositories which have been designated as regional reserve banks.

The chief purpose of the creation of such central bank or banks is to utilize the bank reserves which consist of the lawful money or currency that now exists, thereby minimizing the necessity for the excessive issue of asset currency.

I have briefly outlined the reasons that have been assigned for modifying our present banking laws, namely, the mobilization of the reserves and the creation of an elastic currency. There practically is no difference of opinion as to the desirability of such changes, but as to the methods by which they shall be brought about there is a very wide diversity of views. I shall not take the time to discuss all of them, but shall proceed to the consideration of the bill which came from the House embodying the iews of the chairman of the House committee and the few individuals whom he called upon to cooperate with him in the formation of the measure.

As is well known, the Committee on Banking and Currency of the Senate, to which the bill was referred, divided into two sections when it reported the measure back to the Senate, one report being filed by the chairman of the committee [Mr. Owen] and the other by the senior Senator from Nebraska [Mr. Hitchcock]. Both reports radically change the House bill. Both sections after two months' study came to the conclusion that the House bill was absolutely unworkable, and while I appreciate the politeness of my colleagues, the Senator from Nebraska [Mr. Hitchcock] and the Senator from Missouri [Mr. Reed], when they compliment the work of the authors of the House bill, yet I can not agree with them. I do not believe that the bill showed any evidence of genius or talent. Its enactment as it came from the House would have been a national calamity, and in spite of the fact that there was urgent demand from high places for its immediate passage, the committee, with unusual industry, began correcting its imperfections, and after two months of arduous labor have rewritten more than 60 per cent of the bill and presented to the Senate reports setting forth their views, and the reasons that made such radical changes necessary and desirable.

I concurred in the Hitchcock report and, in the main, am in favor of the provisions of the bill as amended by that section of the committee. Since the reports were filed the Owen section of the committee has adopted a number of the important amendments suggested by the Hitchcock report, and in so doing has materially improved its bill. But there still remain a number of fundamental differences between the two series of amendments as now reported. They principally consist of the following:

THE FUNDAMENTAL DIFFERENCES BETWEEN THE TWO BILLS.

The chairman of the committee, Mr. Owen, and his colleagues believe that there should be not less than eight regional banks. We believe that there should be not more than four.

The chairman of the committee and his colleagues believe that the banks should own the stock of the regional system; we believe that the people should own the stock.

The chairman of the committee and his colleagues believe that the banks should select a majority of the directors in the regional banks; we believe that the Government should select a

majority of these directors.

The chairman of the committee believes that the member banks should be compelled to subscribe for the stock of and be compelled to keep their reserves in the regional banks, but that the regional bank should not be compelled to discount the paper of the member bank; we believe that this would be unfair and vicious; that the banks should be compelled to keep their reserves in the regional banks, but that, in turn, the regional banks should be compelled to discount the paper of any member bank up to the amount of its capital stock when such paper is

of the character required by the law.

The chairman of the committee believes that the regional bank should be permitted to refuse one bank relief, to decline to rediscount its paper, and at the same time to rediscount without limit the paper of another bank, possibly in the same territory or community, thereby opening the door to the widest possible discrimination and favoritism. We believe that such discrimination and favoritism should be made impossible and that the regional banks should be compelled to discount the lawful paper of any member bank in good standing and for-bidden to discount the paper of any member bank for more than two times its capital stock without special permission from the Federal board.

We believe that the profits over and above the dividends and a desirable surplus and the expenses of this regional system should be used for two purposes: First, for the creation of a fund to insure the deposits of the people who put their money in the member banks, and, second, to pay off the Government debt. The chairman of the committee and his colleagues as they reported the bill to the Senate refused to incorporate a deposit insurance provision into it. The Democratic caucus, however, has placed in the bill what I regard as a rather weak and unsatisfactory provision of this nature.

We believe that farmers' paper which is usually given for a period of six months should be eligible for rediscount the same as the 90-day paper of the merchant. This privilege the chairman of the committee and his colleagues deny.

These are the fundamental differences between the two measures. There are many other important differences of a more or less detailed character, which I shall discuss when we take up and consider the bill by paragraphs.

I shall now discuss, in the order that I have named, these fundamental differences.

THE NUMBER OF REGIONAL BANKS.

First, as to the number of regional banks. The ideal banking system for our country, in my opinion, would be one central bank controlled by the Government, the stock of which should be owned by the people in small subscriptions, so as to give the widest possible diversity of ownership among our population. Such bank should be the depository of the reserves of all the banks of the Nation, and also the depository of all Government funds. It should be a bank of issue and a bank of discount. This bank should establish branches in every commercial center throughout the country where the business of the people required them, and having one great central reservoir into which is deposited the reserves of the country, these reserves could be utilized so as to render the greatest possible service to the banking system. This financial heart would send through its branches the currents of financial aid, and stimulate everywhere the commercial and industrial life of the Nation. But our section of the committee realized that under the present political situation that confronts us, the Executive having taken the position that he will not consent to such a bank, a measure of that kind, however desirable, can not be enacted. Therefore we abandoned the idea of a central bank, and have undertaken to organize a regional banking system having as nearly as possible all of the advantages of the central banking system and minimizing as far as is practicable the weakness of the regional

We have recommended four regional reserve banks. of these necessarily would be located at New York, one at Chicago, and one at St. Louis, these being the central reserve cities which have been created in response to the normal business demands of the Nation. Into these cities are now massed the reserves of more than 350 reserve city banks, as well as of thousands of other banks throughout the country. Such locations would conform the regional system as nearly as practicable to existing conditions and disturb as little as possible the normal operation of the country's business in

transferring the reserves from one system to another. In addition we recognize that San Francisco being the great metropolis of the Pacific coast there might with some advantage be established there a regional reserve bank to serve that section of the country.

We have provided that regional banks shall establish branches in their territory wherever the business of the country demands it. In both bills provision is made for the establishment of branches by the regional banks. So that each regional bank in either plan is for its district a central bank. It is not possible, in my opinion, to establish successfully more than four of such regional banks. That number can far more efficiently meet the demands of those sections of the country which they are created to serve. As I have stated, there are certain seasons of the year when there is a demand in the wheat and corn growing sections for more money than at other seasons. such periods in other sections there may be a surplus; and the same is true of the cotton growing and manufacturing sections of our country. When a central or regional bank embraces a wide extent of territory covering cotton, corn, and wheat producing, as well as manufacturing or mining sections, it will occur that when one part of that territory has a surplus of funds another part may not have enough funds for its use. demand for additional money does not come from all sections of such territory at the same time. If the region that is covered by the reserve bank is large, it will include territory embrac-ing these diverse conditions. The purpose of the reserve bank is to utilize the surplus of one section to supply the needs of another. This is to be done by discounting the paper of the of the section of the country which need additional When the demands of that section of the country are passed the periodical necessity of other sections may appear, and thus the surplus of the entire region is available for use in different sections of the country as needed. A reserve bank that can not perform this function will be useless. Therefore it is absolutely essential for the successful operation of the reserve-bank system that the region which is served by each bank should cover a wide territory of diversified interests. For that reason one great central bank, constituting a great national reservoir, would be much more useful than four. We believe, however, that four, located as I have suggested, can be successfully organized.

The bank at St. Louis would supply corn, cotton, and manufacturing and mercantile sections; at Chicago, corn, wheat, manufacturing, mercantile, and to some extent cotton areas; New York would have a wider diversity, covering corn, wheat, cotton, vast mercantile and manufacturing regions; and San Francisco the same as St. Louis and Chicago, but to a much less extent. These four regional banks could be adapted to the uses for which a reserve bank is required, but more than four will be not only useless but harmful. They would render the system less helpful, because the reserve deposits would be comparatively small, the expense of operation great, and the breadth of territory covered by some of them would not have the diversified interests necessary for their success. creasing of the number above four would not add a single element of strength or value to the system. We believe, as I shall hereafter discuss at some length, that the public should be permitted to own the stock of these banks. I do not believe that the smaller banks, if more than four are created, will be able to pay expenses of operation and provide dividends for their stock. The amount of business available for them would not be sufficient. The increasing of the number of regional banks would make the stock less desirable and thereby discourage the public from subscribing for it. The cutting up of the territory of the United States into 8 or 10 regions will surely weaken and endanger the success of the system, and I challenge any Senator to point to a single advantage which 5, 6, 7, 8, or a dozen

regional banks can have over 4.

The only serious objection that has ever been offered against the central-bank plan is that it was placing too great power in the hands of one central banking organization, but that criticism has been upon the assumption that the central bank was to be owned and controlled by the banks. But when we provide that the ownership of the stock of a central bank shall be by the people and not by the banks, and that its control shall be by the Government and not by the banks, then that objection vanishes. With a bank so owned and operated it would be impossible for selfish and greedy interests to control it, unless they got complete possession of the Government itself, and in that event they would control any governmental system of whatever nature. One objection that has been offered to four regional banks is that they could be more easily controlled or monopolized than could be a larger number. But we propose that the stock of these regional banks shall be owned by the people and that the

Government shall appoint a majority of the directors, and they shall also be under the supervision of the Federal board, all of the members of which are to be appointed by the President. With such ownership and control the fear of monopolization must pass away. It has been argued that four banks would not be sufficient, because they would be located at widely separated points, and therefore would be too distant to be useful to many sections of the country. That objection could be made against 8 or 12 with almost equal force. Under the systems proposed by any of these bills there will be communities located a thousand miles from the regional bank that serves it. In any event, whether there be established 4, 8, or 12, these regional banks will have to create numerous branches through which they will serve the various sections of the country. The branch will be the agency that reaches the various localities of the Nation, and a branch of a strong, powerful institution will be far more useful than the branch of a weak one.

PUBLIC OWNERSHIP OF THE STOCK.

There are many advantages in having the stock in this system owned by the public rather than by the banks. It would interest a large number of our people, the rank and file of our population, directly in the success of our Government banking system. The people would hold a proprietary interest in it, and as a result our great system would have friends and representatives in every community and become intrenched in public confidence. It would give thousands and hundreds of thousands of our people an opportunity to make a small investment in a Government-controlled security that would be more profitable to them than are their average investments. That is what the amendments which we are supporting endeavor to do.

Another important advantage of the public ownership of the stock is that it would increase the banking capital of the country more than a hundred millions of dollars, thereby giving our banking system that additional strength. The tendency of modern times, as was pointed out so forcibly upon the opening of this debate by the Senator from Nebraska [Mr. HITCHCOCK] is for our bank liabilities to grow very much faster than our banking capital. So great has been this tendency that some of the States have found it desirable to prevent a bank from receiving deposits above a certain multiple of its capital stock. Some States have fixed it at eight times, others at ten times the amount of the capital. Bringing this additional banking capital into active service would strengthen the system and not only make the deposits of the people more secure, but would increase the loaning facilities of the bank, and thereby help the general business public.

With the stock owned by the public, the incentive which the greedy special interests might have in acquiring control of this great banking system would be in a large measure removed. They could not profit by excessive dividends, because the dividends go to the people and not to the banks. This stock ownership could not be used for selfish purposes.

CONTROL OF DIRECTORS OF REGIONAL BANKS.

We believe that the majority of the directors of the regional bank should be governmental officers. The chairman and his colleagues believe they should be selected by the banks. These regional banks are to be the depositaries of the Government funds aggregating from \$150,000,000 to \$250,000,000; the stock of these banks is to be owned by the public; the Government as trustee for the public is to be responsible to the stockholders for the proper management of the institutions; these two interests being the majority interests involved, the Government should have the controlling management of the banks.

The banks, however, are required to deposit their reserves in these regional banks; such reserves amount to hundreds of millions and are highly necessary for the strength and stability of the banking system of the country. It is with force argued that they have, therefore, a right to a substantial voice in the management of the reserve banks, and this right we recognize by giving them four of the nine directors. By the system which we propose the public is interested in the success of the reserve banks, because it owns the stock; the Government has a direct interest in their success, because they are the depositaries of its funds, and it is also the trustee for the public stockholders; and the banks are interested in their success, because they have deposited their reserves in these reserve banks, and the success of the system is necessary that such reserves may be useful and perform the important function for which they are impounded. Such a plan, it seems to me, lays the foundation for the strongest possible banking system that could be created, bringing as it does to its support all those elements in our commercial, industrial, and political life which are so necessary to the success of any system. And we challenge the

attention of the country to the recommendations that we make, and appeal to the intelligent judgment of every Senator to consider the stability, the soundness, and the advantages of such a system as compared with the bill reported by the chairman of the committee and his colleagues. Theirs is a bankers' banking system, owned by the banks, controlled by the banks, and conducted almost wholly for the profit of the banks, while ours is a people's bank, owned by the general public, controlled by the Government, and used to strengthen and fortify our great independent banking system.

REDISCOUNTS OF PAPER FOR MEMBER BANKS SHOULD BE LEGAL RIGHT.

We believe, further, that when the Government requires a member bank to deposit its reserves in a regional reserve bank that it should require that regional bank to extend to the member bank the help which it needs in times of stress by the discounting of that bank's paper up to the amount of its capital stock when it presents the securities prescribed by the law. I can not understand how this proposition can be successfully disputed. Yet the chairman of the committee and his colleagues have refused to incorporate it into their bill.

It is said that the member bank may not be good for the amount of its capital stock, that its paper might not be ofvalue, and that the regional bank would therefore be compelled to discount doubtful paper. But the law prescribes the character of the paper, and it is of the highest quality. regional bank has not only such paper equal to the amount of the loan, but in addition has a lien on all of the assets of the bank. My contention is that if a member bank is so weak and involved that it can not safely be trusted by the Government for a loan from a regional bank when it not only pledges its assets but puts up the amount of prime commercial paper prescribed by the law, then this Government has no right to allow such a bank to continue in business and receive the deposits of the people. If the credit of the bank is so bad that it can not be trusted by the Government, if its business is run in such a manner and its paper is so worthless that the Government can not afford to trust it with a loan equal to its capital stock when it receives as security the paper which the law prescribes, then that bank should not be permitted to take over its counters the money of the people who innocently trust it with their daily earnings. I challenge any Senator here to dispute the soundness of that proposition. If the bank is good, then it has a right to the fall accommodation prescribed in this bill. Under the present law any bank may choose from over 350 banks its reserve agent or correspondent; by this bill the Government takes from it this opportunity and requires its reserves to be kept in one regional bank, and does not permit it to deposit them elsewhere. It does this in order that the regional reserve bank may have funds to use in helping other banks in time of need.

When the Government requires a bank to so deposit its reserves, it voluntarily accepts the obligation to help that bank in time of necessity, and to refuse would be unjust and indefensible. If the bank is insolvent and its credit bad, then it should be expelled from the association, or, if a national bank, closed and its affairs wound up. Senators may vote against this amendment, but they will never be able to convince the American public that it is not right, or that it is just to permit the officers of a Federal reserve bank to refuse a reputable banking institution the credit to which it is entitled. If it is not a reputable banking institution, to permit it to run and to give to such bank the Government's indorsement by continuing it as a member of the association would be indefensible. Upon this proposition I invite the judgment of every honest and fair-minded American citizen.

## INSURANCE OF DEPOSITS.

We have recommended that after the dividends have been paid to the stockholders and the expenses of maintaining the system have been met and a proper surplus created, that the profits should be used for two purposes: The insuring of the deposits in member banks and the paying of the national debt. This disposition of the profits of the system is just and equitable. The profits will be made from the use of the funds of the bank. These funds are obtained from three sources: First, the capital stock; second, the deposits of the Government; and third, the deposit of the reserves of the member banks. The stockholders are paid a 5 per cent cumulative dividend upon a nontaxable investment; that satisfies their interest in the earnings of the reserve banks. It is proper and equitable that the profits that are derived from the handling of the reserves of the member banks should be used for the benefit of the banks and their depositors. The depositors in the first instance provide the money of which the reserves are a part. So we recom-

mend the setting aside from the profits of these institutions a trust fund for the purpose of insuring the payment of the depositors in the member banks in case of the failure of any of such banks.

No greater benefit can come to our banking institutions than the adoption of a system that will insure to every depositor in a member bank of this governmental banking system that his money so deposited is safe and that he can not lose it by the failure of the bank. It will invite millions of dollars to come out of hiding and be deposited in our banks to be used for the commercial and industrial welfare of the country. Such a plan will prevent runs on all our banking institutions that belong to the system, because there will be no object in the depositors scrambling in haste to get their money out of a bank because they think that it is insolvent. They will know that in the Treasury of the United States there is a great fund from which they will get their money if the bank in which it is placed If the Government finds it necessary to close up an insolvent bank it will at once take possession of its assets and provide for the payment of all depositors from the fund that has been created by the use of a part of the money which these depositors originally placed in the banks. It is utilizing the reserves in such a way as to create a fund which will give to the entire banking system stability and the confidence of the people. It will be a strong inducement for banks to come into the system. Such a just and beneficent policy, it seems to me, should appeal to the judgment and the conscience of every fairminded American citizen.

I am glad to say that since we made the report the Democratic caucus in casually and superficially reviewing the bill has been so impressed with the absolute fairness of this provision that it has accepted it, though in a mutilated and unsatisfactory form. I hope that the Senate, however, when it considers the bill will adopt the proposition which we make because it certainly is much more satisfactory than that prepared by the Democratic caucus.

We also believe that a part of the profits should go to the payment of the national debt. Since the Government will provide these banks with deposits ranging from one hundred and fifty to two hundred and fifty million, by the use of which large profits will accrue, in my opinion it is proper that such profits should be used to reduce our national debt, and we suggest the taking up of the 2 per cent bonds, the value of which this proposed legislation has so greatly reduced. It is a humiliation to me, and I believe to every patriotic American, to see our Government bonds that for more than a quarter of a century have been selling at a premium suddenly fall below par because of threatened immature and unwise legislation. The provisions which we have incorporated in the bill, if accepted by the Congress, will restore public confidence in the credit of our country which has been so violently shaken during the last few months.

Both bills authorize national banks to loan money on real estate, equaling one-half of its actual value, but the provision in the Hitchcock bill will be much more useful to the farmers of the West. It provides that the banks may make such loans for periods not exceeding five years and to an amount equaling 50 per cent of their time deposits, while the Owen bill authorizes such loans aggregating only 25 per cent of the bank's capital and surplus. The following illustration demonstrates the superior advantage of the Hitchcock amendment: I have recently examined the bank statements of three banks located in the State of Kansas. One has a capital and surplus of \$75,000; its deposits aggregated \$600,000, of which \$250,000 were time deposits. Under the amendment of the chairman this bank could loan \$18,750 on real estate, while under the amendment proposed by the Senator from Nebraska [Mr. Hitchcock] it could loan 50 per cent of its time deposits, or \$125,000.

Another statement examined was that of a bank having a capital and surplus of \$150,000. Its aggregate deposits were \$940,000, of which \$338,000 were time deposits. Under the amendment proposed by the chairman this bank could loan \$37,500 upon real estate security, while under the amendment proposed by the Senator from Nebraska it could make such loans aggregating \$169,000,

The next statement examined was that of a bank with a capital and surplus of \$225,000 and a total deposit of \$890,000, of which \$328,000 were time deposits. Under the amendment proposed by the chairman this bank could loan \$62,500 on real estate, while under the Hitchcock amendment it could loan \$164,000. Time deposits are virtually savings deposits, and it is safe to permit such deposits to be loaned on real estate. The above illustrations show the wide latitude that is given the bank in making such loans and the superior advantage which the

amendment we propose will be to the farmers of the West over that proposed by the chairman, and I trust that my colleague [Mr. Thompson], who on Wednesday of last week expressed such an earnest desire for prompt legislation in the interests of the Kansas farmers, will join with me in endeavoring to have the Hitchcock amendment as to the real estate loans incorporated into the bill.

There are many other points of difference which I might discuss, but I shall defer their consideration until we take up the bill in detail.

I have outlined in a brief and imperfect way the fundamental differences between the measures submitted by the two sections of the committee and indicated a few of the reasons why the recommendations of our branch of the committee should be adopted by the Senate.

By these amendments we have sought to preserve the independence of and strengthen our great democratic banking system. I agree with the Senator from Missouri [Mr. Red] when he said on this floor a few days since that we have in the United States the best banking system in the world. Its great superiority consists in the number of its independent, individual units.

To-day we have more than 25,000 independent, competing banks. We seek to preserve the independence of these banks, while the bill presented by the chairman, instead of preserving this great independent banking system, of which every American should be proud, practically destroys it by placing all of our banks into 12 great banking combinations or trusts. It organizes that number of central banks that are owned and controlled by the banks, and every criticism that has been made against the Aldrich bank bill, which the chairman of the committee so violently denounced on this floor a few days since, can, with equal force, be made against the regional bank bill which he and his colleagues propose. The principle of bank ownership and bank control, which was the fundamental and underlying principle of the Aldrich bill, is carried out in the bill as it passed the House and as reported by the chairman of the committee.

I do not mean to infer that the banks of the United States would voluntarily form a bankers' trust for the purpose of controlling credit. The bankers of our country, as a rule, are men of the highest character, of fine intelligence, and the leading citizens of their communities, and are interested in all matters for the promotion of the public welfare, but it is asserted upon high authority that certain great banking interests of the country have obtained a monopoly of credit even under the present independent banking system, and my assertion is that the provisions of the bill as reported by the Senator from Oklahoma make it more easy for such great concerns to monopolize the banking credit of the United States than is possible under present conditions. Through the method of selecting the directors of the regional banks he has invited an effort on the part of these concerns to obtain the control of these legally organized banking combinations.

Every national bank is required to deposit its reserves in one of these banking trusts, and the trust is not required to furnish help to those banks; that is optional with the directors of the banking combination. To me such a proposition is monstrous. The creation of such a power is dangerous to the financial interests of our country-more dangerous than the credit monopoly that the Wall Street interests are said to have organized, which has been denounced with such vehemence on this floor. I have been amazed to see men who pretend to be hostile to the control by these great Wall Street interests of our banking system propose a scheme which they themselves must admit, if controlled by such interests, would be more powerful for evil than any which Wall Street could organize under existing laws. system proposed by the chairman of this committee would be intrenched under the protection of the laws of the United States. and the power of refusing relief or extending credit beyond limit is made a legal privilege. In order to minimize this danger, upon the demand of the Senator from Missouri [Mr. Reed] there has been incorporated in their amendments a provision giving the Federal board the right to summarily remove, without hearing, any member of the regional board; but that not only does not cure the evil that is implanted in the organization, but injects into it a most dangerous feature. That is the summary removal of a public official without giving him an opportunity to be heard. Such a policy opens the door to the widest political abuse and favoritism. It is a Russian power ingrafted on an American institution, We give the Federal board the right of removal for cause, but the charges must be made in writing and the accused given full opportunity for hearing and defense before action is taken. Under the plan proposed by the chairman the grossest abuses might be practiced by the officers of the regional banks by extending favor to one bank and denying it to another in a way

that would be of deadly effect. I am pleading for the recogni-tion of the individual right of the independent bank. This individual right of the independent bank the Owen bill denies,

and I am protesting against that iniquitous provision.

Men may argue that the Federal board has supervision over regional banks. So has the Comptroller of the Currency supervision over the banks to-day; yet these grave abuses are alleged to have grown up. The chief reason assigned by the adminis-tration for this legislation is the desire to break the power of Wall Street over the credit of the country. It declares that it wants to protect the people from a credit monopoly that exists, but in seeking to accomplish this purpose it is creating a monopoly that is capable of more dangerous abuses than can be wrought under the existing law.

We believe that every bank, whether its capital be twenty-five thousand or twenty-five million, should have the right, not the privilege, to get relief in time of need. This the chairman and his colleagues persistently deny.

#### RURAL CREDITS.

We should have had, and I would like to have seen, a rural credit system incorporated into this bill, but when that was suggested we were advised that the administration had future plans for such legislation and that it must not go into this bill now,

but wait for a more convenient season.

There are a number of other provisions which personally I should have been pleased to have had placed in the bill that have been omitted. I believe that the regional banks should have the right to loan money in the open market and to discount the notes of individuals. I do not believe that this should be a general practice, because I realize that with more than 25,000 banks in the country doing a general banking business there is strong competition among them, and as a rule any man whose credit is good can procure proper financial accommodations. But there are in some sections combinations of banks by series of interlocking directories and otherwise that at times prevent the extension of legitimate credit to concerns that may be competing with industrial enterprises in which these banks or their officers may be interested. In order to give the regional banks the power to prevent such abuses, I believe that they should be given authority to go into the open market and discount paper, and I voted in the committee to incorporate such a provision in the bill.

I believe also that there should have been a provision making unlawful the system of interlocking directories that prevails in some of the large centers of the country, especially New York, where the directors of one bank are directors of numerous competing banks. Such a system, I believe, has been devised for the purpose of evading the law which forbids national banks to establish branches. It gives certain powerful banks knowledge as to the operation of their competitors and tends to produce a monopoly of credit. The House of Representatives has spent thousands of dollars in what is known as the Pujo investigation and has brought to light the evils that have grown out of this system of interlocking directories. It is by that means that the alleged Wall Street monopoly of credit has been created which has been so vehemently denounced by the partisans of this administration. Yet this bill, which has passed the House of Representatives, is championed by the chairman of the Committee on Banking and Currency of the Senate, and by Mr. Untermyer, the attorney for the Pujo investigating committee, and has the ardent support of the President, has not incorporated in it any provision that will carry out the findings of the Pujo committee. It will not destroy the evils which that investigation has shown to exist, and can only affect them in an indirect way. Why have the Senators and Members of the House committee, who from the housetops have been so loudly denouncing the Money Trust, suddenly lost interest in legislation to break it up? Why do they not only refuse to place in the bill provisions that would carry out the recommendations of the Pujo committee, but persistently vote against amendments proposed by others that would break up the evils so graphically set forth in that report? Why this legislative dodging or delay? We presume the answer will be that legislation for such purpose, like that for rural credits, must await a more convenient

There are in the bill proposed by the chairman some desirable provisions, but unfortunately with them are planted the seeds The system that he proposes may develop into a benevolent banking monopoly and be useful to the country, and it may grow into a far-reaching and menacing danger. Hitchcock bill is proof against monopoly, because the individual rights of every bank are protected in the law. It does not depend upon the will or uncertain judgment of any board for its needed relief, but upon its legal rights written in the statute.

I hope the Senate will rise above party partisan prejudices and incorporate in this bill amendments that will insure justice to all and enable every Senator in the end to give the measure his hearty support.

If I have made any statement about which anyone desires to ask me, I shall be glad to undertake to answer it as best I

Mr. WEEKS. Mr. President-

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Massachusetts?

Mr. BRISTOW. I do. Mr. WEEKS. The Senator from Kansas has referred with great force to the general proposition of providing a different discount rate to be made by the different regional banks. It seems to have been contended by some that the Federal board, through the regional bank, should have the right to make a rate at some brauch of a regional bank different from that which obtains at the main office or at other branches. In other words, in the final analysis, in what is known as the Owen bill, the Federal board has the right to determine what rate of interest shall be charged in making rediscounts. We carefully provide in this bill that paper, to be rediscounted, shall be of a specified character, and of no other kind.

I wish to ask the Senator from Kansas if he thinks it would

be fair or just to provide that the regional bank in Kansas City, for instance, should charge for rediscounting a specified class of paper a higher rate than the Federal bank located in New York, discounting exactly the same kind of paper.

Mr. BRISTOW. I do not think it would be just. Mr. WEEKS. Does the Senator conclude that if that power were placed in the hands of the Federal reserve board it would produce the same character of criticism that has been made against the Secretary of the Treasury in the distribution of Government moneys? Whether or not the Secretary in the past has distributed Government moneys equitably and fairly, I do not know. I do not pretend to know. I do know, however, that ever since the policy was instituted, in 1888, by Secretary Fair-child there has been criticism of the manner in which the funds have been distributed.

If a board located in Washington, a political board to some degree, had the power to fix rates here and there and anywhere, whether it did so with the greatest wisdom in the world or not, would not the criticism be made that these rates were being made for partisan or political or sectional reasons, with the effect of bringing the whole system into disfavor?

Mr. BRISTOW. My opinion is that any system we may organize that shall proceed along such lines as those indicated by the Senator, of discriminating between communities, in the end will break down, and it ought to break down. I do not believe the Secretary of the Treasury should have discretion as to parceling out the Government funds to banks that may be political favorites of his, or of putting these funds in different sections of the country where he may have interests, political or otherwise.

There has been criticism in the past, and there will be in the

There is not a Senator here whose State at some time in its history has not had trouble with its State and county treasurers who deposited the public funds so as to acquire profits, sometimes to themselves, sometimes to pay political debts, and sometimes for certain favorite business purposes. The result has been that nearly every State in the Union-I know it is true of practically all the States with which I am familiar in the Westhas prescribed by law what shall be done with public funds when they accumulate in the treasury.

The Federal Government, however, has gone on for years, and this same system of favor has been extended from time to time by the Secretary of the Treasury in parceling out millions of the Government funds to this favorite bank or that favorite bank, giving them to the banks in which he might have a political friend and denying them to some other bank that did not have a political friend at hand. If it were not for the fact that things relating to the Federal Government are so far away from the local communities affected, it would not have been tolerated as long as it has been.

Mr. CUMMINS. Mr. President—
The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Iowa?

Mr. BRISTOW. I do.

Mr. CUMMINS. I call the attention of the Senator from Kansas to the provision in the bill which he supports giving to member banks the absolute right to discounts that equal their capital stock or capital. The principle is obviously sound; but when I attempt to work out the principle I become rather confused in the statistics of the subject. I wish the Senator from Kansas would make a little clearer its actual or practical operation. What is the aggregate capital of the national banks of the United States?

About a billion dollars. About a billion dollars? Yes; a little over that. Mr. BRISTOW. Mr. CUMMINS. Mr. BRISTOW.

I think it is somewhat over that, but I will Mr. CUMMINS. take that as a basis. Assuming, then, that they all entered the system, that would give the member banks the right to call upon the reserve banks at one time for discounts aggregating a billion dollars or more. The query in my mind is—and I ask it purely for information—where will the reserve banks get the money to discount at one time a billion or more dollars of commercial

I hope the Senator from Kansas will run over the situation, and tell us how much new money must be issued in order to meet that demand if it should be a concurrent demand on the part of all the member banks.

Mr. BRISTOW. My answer to the Senator from Iowa is that I think the proposition he submits is an impossibility. of the banks would not demand, at the same time, discounts for the full amount of their capital stock. The whole banking sys-tem depends upon averages. If all the depositors in any bank demand their money, the bank closes; but all of the depositors in any bank never need all of their money at the same time. There is never any unusual demand unless there is something that affects, in the minds of the depositors, the safety of their money so deposited.

I do not believe such a thing could possibly occur as all of the banks in the United States demanding at the same time discounts for the full amount of their capital stock. If they did, the regional banks would go about meeting the demand in this way:

First, they would use the reserves until they were exhausted. Then they would take the securities which the member bank brought, upon which it asked for the loan, and the regional bank would demand currency from the Federal board for those The Federal board, under the provisions of our bill, is required to furnish that currency, provided, first, there is a gold reserve of 45 per cent and under no circumstances less than 30 per cent, which would be the minimum amount.

Now, the question naturally is, Suppose they obtained the money until they had run down to the minimum of 30 per cent? Forty-five per cent is the legal reserve, but it can go to 30 per cent by permission of the board. Suppose the demand still is not met, because the gold reserve has not been sufficiently large to enable this enormous volume of currency to be floated. Then, if there is not sufficient gold, the bank must get more gold.

It has two ways of getting gold. First, it can purchase foreign bills, and then, when those bills are liquidated, gold will be sent to our country to liquidate them. Second, it can sell shorttime Government bonds or notes that run for one year, and in that way obtain gold.

It must go out and get the gold from the markets of the world and bring it in. That would be expensive, but it is not impossible. So even the impossible condition which the Senator suggests can be met, but it will cost money. When you get down so that you have to increase your credit so enormously, it may cost heavily to get the gold, but if you bid more for it than other nations you will get it, and until such an enormous demand should be made it would operate in the normal way.

Mr. CUMMINS. Mr. President, I was wondering whether this absolute right that is given to the member bank, a right which seems to me to be easily established, should not be for a proportion of the loanable funds of the Federal reserve bank. I do not mean the loanable funds that might be on hand at any given time, but all the loanable funds of the Federal reserve bank, so that there could not be a demand made which the Federal reserve bank could not satisfy without resorting to the somewhat extraordinary measures that have just been described by the Senator from Kansas. Would it not be more practicable if the right of the member bank, given to it as a right, should be confined to its proportion of the loanable money of the Federal

Mr. BRISTOW. If the Senator from Iowa will pardon me, I think the plan which we have devised would be better than that, because there is no limitation except the capital stock, and it can run up to double the capital stock. It can not go beyond that without the consent of the Federal board. The plan we suggest is better, because if the demand became so great, infer it is in the mind of the Senator that a lot of banks might demand notes until the regional banks became hard up and the reserve became low. But we have a provision in the bill which provides that whenever the capital reserve falls below 45 per cent the bank coming in has to pay an additional interest rate. That is increased until the reserve is reduced to 30 per

The additional interest is charged up to the banks of the cent. entire region in proportion to the amount of loans that they have had during the year. So the bank that has paid the interest has not any greater burden to bear than the bank that got the money before the interest rate was put up, for this interest is charged to the member banks by the regional bank in proportion to the amount of accommodation that such member banks have had during the year from the regional bank. So this burden would not come on the borrower who was latest in his appearance. He stands just as well as the others. It costs him no more than the bank which got the first loan before the rate

Mr. SMOOT. Mr. President—
Mr. BRISTOW. If the Senator will excuse me just a moment, it seems to me that that provision is as perfectly worked out from the standpoint of the equities of the banks concerned as

it is possible to work out a provision of law.

The VICE PRESIDENT. Does the Senator from Kansas

yield to the Senator from Utah? Mr. BRISTOW. I do.

Mr. President, I do not believe any harm will Mr. SMOOT. ever come from the suggestion of the Senator from Iowa, and I will state the reason why it will not. There are thousands of banks that do not rediscount notes in their business. I have never been connected with a bank that rediscounts notes. During all the time that I have been connected with banking institutions they have done no rediscounting business

I want to say to the Senator that the most dangerous kind of banking is the rediscounting of bank paper. It is the rediscounted paper that generally causes a bank trouble, if trouble ever comes to it, as it is generally a transaction with other banks, and if a stringency in the money market comes the holding bank demands payment and at a time when money is scarce and when the bank rediscounting is least able to pay it. In the past I have never believed in a banking concern doing a rediscounting business, and I believe there will be but a small proportion of the banks of the country take advantage of this provision of the bill for some time to come. It is only in times of need that they would do so.

Mr. McLEAN. I should like to ask the Senator from Kansas if it was not the opinion of all the bankers and economists who have made a very careful study of this subject that \$150,000,000, or at the outside \$200,000,000, would be all the increase of the additional emergency currency that could possibly be used legitimately at any one period of the year.

Mr. BRISTOW. Over and above our present supply of cur-

The testimony shows that there is an expansion and a contraction of the currency in the nations where they have this flexible currency of about 8 per cent, I believe. The Senator from Nebraska [Mr. Hitchcock] will remember that better than I. I think it is about 8 or 10 per cent. It was estimated by those who appeared before the committee that a contraction and expansion, an elastic movement, of about \$200,000,000 is all that would occur in this country under normal conditions during the year. Regarding our present supply, as the normal supply which our commerce demands, it would not go more than \$100,000,000 above nor more than \$100,000,000 below the present supply in any season of the year.

Mr. NORRIS. Mr. President— Mr. BRISTOW. I yield to the Senator from Nebraska. Mr. NORRIS. I wanted to ask the Senator from Kansas a question bearing on the thought suggested by the Senator from Utah. As I understand this system, no matter which bill is enacted into law, it will ultimately mean the retirement of the national-bank circulation, will it not?

Mr. BRISTOW. That was supposed to be the purpose of all the bills; but yesterday it seems that the Senator from Oklahoma [Mr. Owen], the chairman of the committee, and the Senator from Colorado [Mr. Shafroth] stated that it is not the purpose of their bill to retire national-bank currency at all, but to add to it whatever additional currency may come out under this rediscounting.

Mr. NORRIS. I assume that both bills provide for the retirement of the national-banking currency.

Mr. OWEN. Mr. President—
Mr. NORRIS. If the Senator will permit me, I have not quite completed the question I wanted to ask. Practically the only means these Federal reserve banks will have of making money is to rediscount the paper of member banks. most of the witnesses before the committee testified that it was desirable to bring about a condition under which member banks would get into the habit, as a matter of course, in the ordinary routine of business, of discounting commercial paper, and that there was a prejudice on the part of the bankers against rediscounting the paper, When this system is put into full force and effect it was the intention of those who favored

it that that prejudice should pass away.

I wish to ask the Senator from Kansas, first, if that is not true; and, second, if it is not true, how he expects these Federal reserve banks to make the money that would pay the stockholders and set aside money for the funds provided for in both

Mr. NELSON. Will the Senator from Kansas yield to me? Mr. BRISTOW. I yield to the Senator from Minnesota,

Mr. NELSON. Mr. President, I desire to say in reference to the statement made by the Senator from Nebraska that the evidence before the Committee on Banking and Currency disclosed the fact that as a rule rediscounts are not common in this country; that they are rather the exception, but that in Europe the custom has prevailed to a large extent and is considered good banking and in order.

I may state in this connection that the system of commercial paper in Europe is entirely different from ours. A large share of our domestic commercial paper consists of promissory notes. Such a thing is little known of, if at all, in the countries of the Old World. Most of their paper is in the form of bills of

I trust I am not taking too much time.

Mr. BRISTOW. All right; go on.

A merchant from one of the rural cities of Mr. NELSON. England goes to London to buy a bill of goods. He gets the goods, and instead of making a book account of it, as is done in this country, or taking a note for it, as soon as he gets the goods the wholesale merchant who sells to him draws a bill of exchange upon him. It may be a 30-day bill, a 60-day bill, or a 90-day bill. That bill is presented, and after it is accepted it becomes the obligation of the country merchant who bought If the country merchant is unable to meet the bill, he goes to the bank in his neighborhood and gets the bill discounted and pays it. That is the character of their domestic

Their foreign paper is like our own foreign bills of exchange, but their system of credit is entirely different from ours, because they avail themselves of bills of exchange or domestic

The bankers who were before us said that while the custom is not general in this country for banks to rediscount, they thought that in time under this new system the plan of rediscounting paper would grow in this country and find favor. It will find favor because it will be a means of securing credit from these reserve banks. It will take some time to educate our bankers and people up to that system, but if this system of regional or reserve banks is a success I have no doubt in time, and it will take some time, rediscounts will prevail more than they have to the present period.

Mr. BRISTOW. The Senator from Minnesota has given very clearly the practice in foreign countries and also the custom in our own country as to rediscounting it. I think that the practical operation of the system, whichever bill is adopted, when the regional bank is established and it goes into business, will be

to rediscount.

If the national-bank notes are retired, the bank, we will say, in Michigan or Minnesota, that has \$100,000 of bonds upon which it has issued to it \$100,000 of national-bank notes will gradually retire them; and when they are retired that bank will keep to its credit in the regional bank or a branch of the regional bank nearest to the place where this bank is located an amount of the paper, as prescribed by the law, upon which it can have this currency issued whenever it needs it. Whenever the demand is in the community for more currency than it has it sends the security to the branch or the regional bank and asks for the currency.

If it buys a Government bond, it gets currency from the Government. It will not have to buy the bond. It will take the notes which it has received for the money it has loaned out to the people in that community, and that security will stand as a credit to it upon which it can draw for additional

currency.

As soon as that system is in force, it will be different from the system which now prevails, because the bank now that takes its paper for rediscount confesses that it has not sufficient capital to supply the demands of its community and it has got to borrow money to loan. Instead of loaning its own resources, it becomes then a broker the same as a loan agent on the street to buy a loan on commission, and that is not regarded as good banking business.

Mr. SMOOT. Let me suggest to the Senator that they become responsible for that class paper; the rediscount is a liability of the bank. I think the Senator from Minnesota explained the situation correctly in relation to the rediscount that will take place in the future. I think it will be gradual, but I believe

if this bill becomes a law the rediscounting feature of the banks will be changed materially from what it is to-day.

Mr. NORRIS. That is the point I wanted to call attention to.

judged the Senator from Utah was opposed to that.

Mr. SMOOT. Oh, no.
Mr. NORRIS. I wanted to call attention to the fact that in reality there is not any way for this new currency to get our into circulation except through the rediscount of commercial paper by banks; that that is practically the only way the regional bank will have to make money. When the bond-secured currency is retired, it is the intention to replace it with this new currency, and that can only come about by rediscounting. When the system is in full vogue no bank will be in discredit because it rediscounts its paper. It will be an ordinary, everyday occurrence.

Mr. President, the Senator is right. The only Mr. SMOOT. object I had in making the statement I did in relation to rediscounting paper as unsafe banking was that the Senator from Iowa had suggested that perhaps there would be an immenseamount of bank paper rediscounted at once, and the demand made upon the reserve banks would be so great that they could hardly take care of it. I suggested it because of the fact that I believe the principle of rediscounting will have to be gradually learned by the conservative bankers of this country, as to-day they do not indulge in it, they do not believe in it, and it is bad

banking business

I did not suggest any such fact. Mr. CUMMINS.

Mr. SMOOT. Then I will say to the Senator that I misunderstood him.

Mr. CUMMINS. I said if the reserve banks were called upon for the full measure of the obligation that is contained in this bill the Federal reserve banks would be compelled to issue a very large amount of money in addition to our present note circulation; but I assumed-and that is the reason why I asked the Senator from Kansas the question-that it was intended to provide against one of those contingencies, one of those periods of banking disaster, such as we experienced in 1907, when it was no discredit to any bank to discount its paper for the purpose of securing currency.

Mr. GRONNA. Mr. President, in regard to what has been said about the danger of a bank rediscounting its paper, I agree with the Senator from Utah that it is not only dangerous but most unprofitable. However, I want to remind the Senator from Utah and to suggest to Senators generally that the system of banking will be changed. Under the present system a bank which can not take care of its own paper confesses that it is a weak bank. A bank can do nothing that would be more injurious to it than to let its customers know that it discounts its depositors' or its customers' paper; but under the new system everybody will know that it will be the common practice.

The Senator from Minnesota called attention to the fact that business is done on a different basis in Europe. That is true. In this country the wholesaler extends the credit. The country merchant does not apply to the banker for his credit; he applies to the wholesaler; but under this proposed legislation the entire

system will be changed.

That, however, was not what I was going to address myself I wanted to ask the Senator from Kansas [Mr. Bristow], who has given this matter thorough study, with respect to that part of section 2 which provides that the public shall have the privilege of buying the stock. It has been suggested to me that this is, in a way, a proposition which will afford to the socalled banking powers, or, in other words, Wall Street, the opportunity of getting hold and control not only of the stock of the regional bank in the locality in which it may be located, but of all the stock in all the banks. From reading the bill, I do not believe that that is true; but I should like to have the Senator from Kansas explain the matter, so that I may understand it fully.

Mr. BRISTOW. I will merely read the provision of section 2 of the Hitchcock amendment, which clearly makes that impossible; and if the language does not completely and fully cover that point, I know hat the Senator from Nebraska and all other members of the committee will welcome any suggestion that will cover it. The language is:

But no more than 100 shares

The shares are fixed at \$100 each, and that holding would be equivalent to \$10,000-

but no more than 100 shares shall be allowed to be subscribed for or held by any person, firm, or corporation, and all of the allotted stock not subscribed for and taken by the public shall immediately be subscribed for and taken by the national bank to which the same was in the first instance allotted. The preparation, allotment, subscription to, and sale of stock shall be under the control of the board, which in case of oversubscription shall give preference to the smaller subscriptions. scriptions.

Under the provisions of the bill no one person, firm, or corporation could subscribe for or hold-

Mr. GRONNA. Well, Mr. President, is it not possible to own stock, and yet not hold it? Would it not be possible to own that stock, to subscribe and hold it—
Mr. CUMMINS. It has no voting power or property power.

Mr. GRONNA. I understand that.

Mr. BRISTOW. It has no voting power, anyway. In reply to the suggestion of the Senator from North Dakota [Mr. Gronna], I will say it would depend upon the legal interpretation of the word "hold." It seems to me that to say that "no person, firm, or corporation shall acquire or hold" covers the point. If it does not, then it is for some of the lawyers of the body to suggest a phrase that will cover the point and make it impossible for any person to hold more.

Mr. NELSON. I want to say, further, that any stock sub-

scribed by private individuals would be utterly without any voting power. All the power that the stock gives to the holders of it is simply the right to draw the 5 per cent dividend. They can not vote for directors or have a voice in any direction in the

management of the bank.

Mr. HITCHCOCK. Mr. President, before the Senator from Kansas takes his seat, I want to say, in answer to the query just made of him by the Senator from North Dakota [Mr. GRONNA], that my original idea was that, in addition to the prohibition which he has cited, it might be wise to insert a proviso that no person acquiring stock in excess of that amount should be permitted to draw the dividends upon it; but it was thought in committee that the prohibition against holding an amount of stock in excess of 100 shares would make it impossible for one violating that provision to draw the dividends. Of course it might be easily possible that an individual or a corporation might, by the process of foreclosure or other judicial proceedings, come into possession of more than 100 shares of this stock, but the prohibition against their holding it being there, they would be under obligation to sell it, because it would be of no value to them so long as they were violating

Mr. ROOT. Mr. President, I do not want to take up time, but I will suggest to the Senator from Nebraska that we have a statute which prohibits the transfer of any claim against the Government of the United States in advance. I think the terms of the statute are "in advance" of its audit, in advance of the time when it becomes due. I am not sure but that it goes further than that. At all events it prohibits the sale or transfer of a claim against the United States. The courts have uniformly held—there are a number of decisions on the subject—that when there is a transfer of such a claim-that is, the sale of italthough the legal title can not pass the person who has made the sale becomes the trustee for the person to whom the sale is made, and thereafter, he remaining the legal creditor, holds the claim in trust for his grantee. The query is, whether the same result would not follow from the provision in the amendment of the Senator from Nebraska in reference to the stock?

Mr. HITCHCOCK. I do not fully grasp the application of that but the Senator from New York would concede that if the law specifically provided that one holding in excess of a hundred shares should draw dividends against it, the holding of it would

become useless by that provision.

Mr. ROOT. Doubtless. I was speaking merely about the provision prohibiting the transfer of that stock from one person to another, and made the query whether the only effect of that prohibition would not be to keep the legal title in the hands of the original holder, and, in case he made a sale, to make him

the trustee for the grantee in the sale.

Mr. HITCHCOCK. Unless the Senator from Kansas desires to conclude his speech. I should like to draw his attention to a matter which he dwelt upon rather lightly at the time. As I remember, he stated that he did not mean to charge that the bill as drawn by the section of the committee represented by the Senator from Oklahoma [Mr. Owen] tended to create a banking trust. Do I understand the Senator from Kansas to disclaim that assertion?

Mr. BRISTOW. I claim that it does create a banking trust.
Mr. HITCHCOCK. I possibly misunderstood the Senator.
Mr. BRISTOW. Certainly. I tried to denounce, in the most positive terms, that provision. It organizes under the forms of law 12 banking monopolies that are controlled by the banks. I said that there was not a single criticism that ever had been made against the Aldrich central bank bill that could not be made with equal force against the bill and the provisions of the bill reported by the Senator from Oklahoma.

Mr. HITCHCOCK. I draw the Senator's attention also to the fact that all of the great central banks in Europe are in fact owned by the people, and that the banking interests, whether Those six directors will control that reserve bank. Their

they have a right to own stock or not, as a matter of fact do not own the stock. The stock is divided into a very large number of holdings among the people. The banks, therefore, have no interest in combinations; they have no interest other than the use of the central bank as a public utility; they have no interest in maintaining a high rate of dividends; they have no interest in any plans which might result in a discrimination in favor of certain banks or a policy which might result in

favoritism toward certain other banks.

Mr. CRAWFORD. Mr. President, I will ask the Senator from Nebraska if there is not another very marked difference between all the European systems and each of these drafts of bills reported from the Senate committee, arising from the fact that in every European system, including the Bank of England itself, the banks deal directly with the public, discount paper for individuals, and undertake to control discount rates by dealing with individuals; while in both of these drafts the operations of the banks, with the exception of some transactions in relation to foreign bills, are confined exclusively to transactions between reserve banks and the member banks, and the reserve banks and the Government? Does not that contradistinguish the foreign systems from the drafts of both the bills which we have there?

Mr. HITCHCOCK. The Senator is undoubtedly correct, so far as his statement goes, that the central banks of Great Britain, France, Germany, and possibly those of other countries do deal to a limited extent with customers direct, but they deal with those customers direct upon the same bas's that the other banks do. They do not give to those customers the rates of discount which they give to the banks, and therefore they are not cutting the business of the other banks. Moreover, their direct business with the borrowing public and with the de-

positing public is very limited.

There is a reason for the banks in all of European countries doing business direct with the public which does not exist in the United States. In England, as I recall, there are not more than 30 active banks doing the business of the British Isles there may be a few more, but not many-in France there are probably not 15 banks doing all the business of France: while in Germany I doubt whether there are 12 banks doing the business of that country. Each of these banks, of course, has a great number of branches, but there is nothing like the system of competitive banking either in England, France, or Germany that we have in this country, with our 7,500 national banks and our 17,000 or 18,000 State banks. So that, while there is a possible field in those countries for the great central banks to enter into business relations directly with the public, there is not that same field in the United States, and, with the exception of a comparatively few great borrowers, there would be no benefit which would come to the people of the United States by providing that the reserve banks could do business directly with the public, first, because while we have perhaps 20,000 cities and towns in the United States having banking interests, the reserve banks are necessarily confined to a few great centers.

Mr. CRAWFORD. Will the Senator permit me there?

Mr. HITCHCOCK. Certainly.
Mr. CRAWFORD. Take, for instance, New York City. We have heard and read a great deal since the Pujo committee made its investigation about the menace to the country that these consolidated banks and trust companies constitute, with their vast power to control credits and discriminate against one class of borrowers in favor of another. How is a Federal reserve bank planted in New York really to strike at that sort of abuse if we are to leave untouched entirely the question of interlocking directorates and also withhold from the Federal reserve banks the exercise of that very effective power which, it seems to me, they would have to use in emergencies against great combinations there in dealing with individuals? Is not that a weak spot in both these bills, making the system ineffective where it ought to be the most strong? I am calling attention both to the draft of the Senator from Nebraska and that of the Senator from Oklahoma.

Mr. HITCHCOCK. Mr. President, the criticism which the Senator from South Dakota makes is very effective against the so-called Owen draft, because when the New York reserve bank is established, under the Owen draft it will be absolutely in the control of the great banking interests of New York City. They will dictate the selection of the majority of its directors-and when I say "they," I mean the powerful banking interests of New York that know how to combine and are supposed to be already in a combination-they will dictate the selection of five out of the nine directors,

power will be practically without limit. An attempt has been made in the Owen draft of the bill, by stating a general principle that the banks shall be equally treated, to put some check upon favoritism on the one side and discrimination on the other; but suppose those six directors decide to refuse discounts from certain banks and for certain paper; suppose they blacklist certain paper for discount in their banks, as they now are said to blacklist certain paper in their own banks, have you not thereby legally created the banking combination that now exists in violation of law in New York City?

Possibly, under those circumstances, the suggestion made by the Senator from South Dakota should be taken into account. If the reserve bank in New York City is to be placed in the hands and under the control of the banking interests of New York, and you are afraid of them, then you ought to authorize the reserve banks to deal directly with the people, both as depositors and borrowers; but how vain that would be when the banking interests themselves control a majority of those direc-

I do not know how bad the banking combination in New York is; it may be as bad as it has been painted, or there may have been a reform; but if Senators who declaim against it and who spend hours in denouncing it desire to curb it, why do they not plead for Government control of the New York reserve bank? Why do they stand before the country saying that they believe in Government control and then deliberately authorize the same banking interests to nominate and elect a majority of the board?

Mr. SHAFROTH. I should like to answer the question of the Senator, if he will yield to me. Mr. HITCHCOCK. I shall be delighted to hear the Senator Mr. HITCHCOCK. I a

Mr. SHAFROTH. All right, sir.
The objection we have to this bank being controlled by the Government is because no banks would go into this system if it were. It is absurd to say that banks will put their deposits and their capital into a Federal reserve bank and then not control it. The result will be that you will have no system in that event. That is the reason.

It is like a national bank. Suppose the laws of the present time with relation to national banks had prescribed that a majority of the directors of a national bank should be appointed by the Government; would there ever have been a "When we have our money there, when we have our capital there, when we have our reserves there, we have a right to have control of the board that passes upon the paper and determines upon the policy with relation to the amounts to be loaned."

Whenever you say that somebody not interested shall control those amounts, it will be tantamount to absolutely destroying the system, because no banks will come into it. That is the the system, because no banks will come into it.

reason it should not be done, in my judgment.

It is absurd to talk about having a majority of the directors of one of these reserve banks controlled by the Government and not controlled by the banks that put the money there. I am aware that I have taken the position from the very start that there should not be even a banker upon the Federal reserve board. I have done that because there are certain governmental powers to be exercised there; but as to the administration of the very funds themselves that are placed there by the banks and are subscribed by the banks, it seems to me you might just as well say to a national bank, "You can not organize a national bank unless you have a majority of the directors appointed by the Government." There is much more reason for the Government. ment having a majority of the directors in a national bank than there would be in one of these Federal reserve banks, because a national bank deals with other people's money. The national bank is the one that takes in \$10 of the people's money to \$1 of its own. The Government might well say, "Inasmuch as the people of this country are interested, therefore we will require that a majority of the directors shall be appointed by the Government." No such claim can be made, however, as to a Federal bank. The Federal reserve bank has simply got the deposits of the banks themselves and the capital of the banks themselves. If you deprive them of control, you will find that

themselves. If you deprive them of control, you will find that not a single bank will come into the system.

Mr. BRISTOW. Mr. President, I challenge the Senator from Colorado to name one bank that says it will not come into the system if the Hitchcock bill is adopted.

Mr. SHAFROTH. Oh, Mr. President, I should not be controlled by what a bank says; but, as a matter of fact, there was strong opposition upon the part of the banks, as represented in their conventions throughout the courtey, to the bill as it came from the House which did not give representation to the came from the House, which did not give representation to the banks upon the Federal reserve board. Any bank that would an even show with the Government in the control of the bank

object to not having representation upon the Federal reserve board would object ten times as strongly to not having majority representation upon a board that controls every dollar of money which the banks, and they alone, put into the system.

Mr. BRISTOW. The Senator, by his position, admits that he gives the Government a control of the board that can not be effective; that he gives the banks the control of the board that is the effective controlling force in the banking system. The Senator from Colorado, by his position, admits that the pretense that the bill for which he stands places in the hands of the Government the governing force of this system is not true; that it pretends to do that which it does not; that while it pretends to be a bank system that is controlled by the Government, it is in fact a bank system that is owned by the banks and controlled by the banks for the profit of the banks; and that all of the pretense with which the press of the country has been flooded for months is hypocritical sham.

Mr. SHAFROTH. Mr. President, the board of control, or the Federal reserve board, as it is called, has certain powers given to it under this bill. Those powers are great. They do not relate to the determination as to whether or not they

should discount one particular piece of paper.

Mr. BRISTOW, True, Mr. SHAFROTH, Wait just a moment. They do not go into the question of the policy of lending out a certain quantity of money. These policies properly belong to a bank. That is what it does, and that is where the discretion is vested. however, they go to the question of fixing a rate of discount, which involves a question of policy for the Government itself and for the people in general, the powers of the Federal reserve board come into play, and any abuses that the Federal reserve bank may perpetrate are subject to review in that body.

It is ridiculous, however, to think that any banker would go into a bank controlling his money and controlling his subscriptions and controlling his reserves and yet not have a

majority of the board of directors of that bank.

In other words, in my judgment, if such a bill were passed, there would be no system. There would be no banks going into it at all. It would be an absolute failure, and we should have no such thing as a discount market, by reason of the fact that we should not have any bankers who would come into a system of that kind.

Mr. BRISTOW. That is to say, according to the position taken by the Senator from Colorado, his committee would create a banking system which the banks would go into because they control it; because they control its discounts; because these regional banks can say to one bank in one community: "Your paper does not suit us; therefore we will give you no currency; we will not discount your bills," while to another bank in the same community they can say: "We will discount your bills because they conform to our notions."

The banks will go into a system which the Senator desires to create, from his point of view, because he gives them unlimited power to do as they please; and whenever it is suggested that this great regional reserve system should be independent of selfish control or monopolistic combinations, that the people should own its stock and that the Government should appoint a majority of its directors, we are denounced because we are taking from the banks the control of the system which controls

the credit of the country. The Senator from Colorado admits every indictment I have made against the bill for which he stands. He admits that it is a bill which creates a monopoly by law and turns over to the banks of the country the control of that monopoly for them to

use for their profit and in their interest.

Mr. SHAFROTH. Mr. President, with due deference to the position of the Senator from Kansas, I do not do anything of the kind. We have in our bill certain safeguards that make it preeminently a public-guarded bill. We do not appoint all of the directors of the reserve bank. We find that we have three of the directors appointed to the membership of the Federal reserve bank by the Government, or by the Federal reserve board. They are there to watch things. They are there to act with relation to the banking system in its policy. In addition to that, they are to act somewhat as the Comptroller of the Currency now acts with relation to the national banks of the coun-We find that the banks are entitled to three directors of their own for business in their own line as bankers. there are three selected by the bankers who have no interest whatever in any bank and who represent commerce and industry and agriculture. Those three are removable by the Federal

reserve board. They are checks.

It may be that this is not all that the banks want; but I am satisfied they never would come into a system unless they had

operations.

as to the banking operations of the system. For that reason it seems to me that this is guarded well and that the banking

system can be made a success.

If this other principle prevails, you will not have a bank of banks. It is all well and good to talk about "the people's bank," but as a matter of fact all of these banks in the country are people's banks. Any five men can organize a bank whenever they find conditions existing in the country that they think are not fair. If, as a matter of fact, they think interest is too high, any five men can organize a bank, and it becomes a people's bank because it competes with the other banks and brings down the rate of interest.

Mr. SUTHERLAND. Mr. President, will the Senator from

Colorado permit me to ask him a question?

Mr. SHAFROTH. Yes, sir.

Mr. SUTHERLAND. Perhaps the position of the Senator from Colorado and those associated with him may have been stated upon the matter I am going to inquire about. If so, I

have not heard it.

As I understand, one of the vital differences between these two propositions, the Hitchcock bill and the Owen bill, is with reference to subscriptions to the stock. The Owen bill, for which the Senator from Colorado stands, provides that the banks of the country shall be compelled to subscribe in certain proportions to the stock, while the bill presented by the other branch of the committee allows subscriptions to be made by the people at

Mr. SHAFROTH. That is not exactly the situation. Mr. SUTHERLAND. It permits that sort of thing, does it

Mr. SHAFROTH. No. The Hitchcock bill provides that the subscriptions shall be first offered to the people. The Owen bill provides that the banks shall subscribe in the first instance, or the stock shall be offered to them, or they shall be permitted to subscribe to it, and if they do not subscribe the people can. Our theory is that the banks will jump at the opportunity of sub-scribing for this stock, because of the advantage it will give in the way of preventing runs upon banks.

Mr. SUTHERLAND. Do I understand that the Owen bill

provides that popular subscriptions may be made?

Mr. SHAFROTH. After the banks have had an opportunity to subscribe, and then, if the people do not take it, that the Gov-

ernment shall subscribe.

Mr. SUTHERLAND. The question I wanted to ask the Senator was, Why not give the people the opportunity in the first

instance?

Mr. SHAFROTH. In the first place, this is a bank of banks, as we conceive it, and the banks should have the first oppor-tunity to subscribe. You gentlemen may think to the contrary, but I am satisfied that under the terms of the bill the banks will come into the system almost universally.

Mr. SUTHERLAND. If the proposition is so attractive as the Senator from Colorado now seems to think, why should not the common, ordinary citizens of the country have an oppor-tunity of getting into it in the first instance? What harm can

it possibly do to the efficiency of the system?

Mr. SHAFROTH. Because there dovetails into that proposition the control of the bank. If the people have control of the bank, it is then no longer a bank of banks. As a matter of fact, the theory upon which this bill has been constructed is that we need a bank of banks. Indirectly, of course, it is for the benefit of the people. It is to prevent runs upon banks. It is to furnish them with a discount market, so that at any time they need money they can get it, so as to prevent runs upon their

The theory of a people's bank would be a competing bank. That is not the object we have in view. We have 25,000 competing banks. The Government of the United States by this provision is not expected to make an investment for the people or offer an investment for the people. The people can get numerous investments. The object is to create a bank that will give relief under these conditions. It can not do that if you are going to have it controlled by people who are not interested in the banks, because then the banks will not come into it. You might just as well kill the bill by voting "No" on its passage as to put in a provision that the Federal reserve banks shall have a directorate that is controlled by people who do not own the money and do not own the capital.

Mr. SUTHERLAND. I should like to ask the Senator one other question. I had understood the situation differently from the way it has been stated by the Senator from Colorado. I had the understanding that the banks of the country were quite satisfied to come in under the provisions of the bill presented by

the Senator from Nebraska and his associates. Mr. SHAFROTH. I do not think so.

Mr. SUTHERLAND. If that be not true, I should like to have the Senator from Colorado name one bank in the United States that will not come in under the Hitchcock bill.

Mr. SHAFROTH. I will state the situation to the Senator. When the bill came over from the House it provided that this should be a bank of banks, and that a majority of the directors, or six out of the nine, should be named by the banks. Upon that bill hearings have been held. Nobody has ever protested against that, so far as I have heard, before the Committee on Banking and Currency of the Senate. They assumed, of course, that that would be the provision of the bill. They did object most strenuously to the fact that they did not have representatives upon the Federal reserve board, which meets in Washington. They said: "If we furnish the capital and if we furnish the reserves, surely we ought to have representation." The distinction was made that there was not a European bank of issue that permitted a banker to be upon its board of directors, and that on that account there ought to be this board above it all that would control and would not be influenced by banking

If the banks would make a protest of that kind, surely they would make a protest with a great deal more vehemence if they were to be deprived of a majority of the directors of one of the banks that deals with the very money that they have and that they have placed in these Federal reserve banks.

Mr. CLAPP. Mr. President, if the Senator will pardon an interruption, whatever force there may be in the argument that if these banks are made up of the capital of subscribing banks, the subscribing banks should control them, what I should like to hear, and I think a great many other people, is a statement of the reason why the stock should be subscribed by the banks. While I have not heard all that has been said on this subject I have inquired of those who have listened to every word, and we can not get a reason assigned why the stock should be subscribed by the banks instead of by the people.

Of course, starting in with the proposition that the banks are to take the stock, there may be considerable force in the position taken by the Senator from Colorado. As I understand it, the Bank of England is not controlled by banks, nor are the banks of other countries. This bank will not be in the control of other banks. As I understand it, its deposits will be the deposits of the banks, serving every purpose of a great central bank—a great central reservoir—if it carries out the purpose of those who are back of it, to meet a certain condition that may come from any part of the country.

Now, what I should like to hear, for one, and I think there are others who would like to hear, is the reason advanced why the people should not put their capital into that bank. That being answered in favor of the people having the first right to take the stock, then on that basic proposition the argument of the Senator absolutely, it seems to me, falls to the ground.

Mr. OWEN. Mr. President-

The VICE PRESIDENT. Does the Senator from Kansas yield to the Senator from Oklahoma?

Mr. BRISTOW. I do.

OWEN. The reason why these banks were framed so that the stock should be held by the member banks was for the primary reason stated by the Senator from Colorado, that these Federal reserve banks were intended to be bankers' banks, and not to be a Government bank dealing with individual citizens of the United States as stockholders, depositors, and borrowers from the bank. Our great banking system, which has 25,000 individual banks dealing directly with the individual citizens in this way, were believed to be sufficient for the purposes intended by a competitive banking system, because the citizens own the stock of these 25,000 banks, the citizens own the deposits of these 25,000 banks, and they are the borrowers of these These 25,000 individual competitive banks are in fact, under the American system, the "people's banks," as they are They have not been able to perform their function, because they had no way of getting instantly when necessary ready money for the purpose of meeting the demands of commerce or of their patrons or depositors. This bankers' bank system is to provide a means by which the people's banks can fulfill their functions, by which they can accommodate the commerce of the country, by which they can at all times furnish money easily and readily to their customers, their depositors and borrowers. If that be efficiently done through the 25,000 individual people's banks, the purpose which the Senator probably has in mind-that is, certain loans at low rates to the people-will be accomplished.

If we take the policy which is suggested in the Hitchcock alternative, that we should have these banks with the stock subscribed by private citizens, the banks owned by private citizens, we would be in the attitude of compelling the member

banks to put all their reserves in a bank in which they had no stock, in which they were not expected to be stockholders, and in which of necessity they would have no right to ask any control or representation. If they are not stockholders, why should they have the right to elect any directors of the Federal reserve banks simply because they are required to make reserve deposits there?

What the Senator from Colorado said had great force with us in considering this matter. We are trying to build a system that will succeed and stand. We are trying to build a system that will be approved and entered into by those who are invited to put their reserves into the system; and if we invite them to join the system and take from them the administrative power of safeguarding their own reserves and passing upon the lending of their reserves and keeping the paper liquid, many of them would refuse to enter and take State charters

We have a just reason to believe that instead of our having 18,000 State banks and 7,000 National banks we would have 25,000 State banks, and this Federal reserve system would fall.

Of course we could build a reserve-bank system on another We could have a great Government bank. open the stock to the general public. We could no doubt obtain a capital subscribed by the public of \$100,000,000 or \$200,000,000 or \$300,000,000. We could put the Government of the United States in the banking business in competition with the 25,000 banks which we have built up so patiently and so laboriously, and we could drive them all out of business. Are you ready for Do you advocate it?

Mr. CLAPP. Will the Senator pardon an interruption? Mr. OWEN. I will.

Mr. CLAPP. If that bank did not receive the general de-

Why not?

I say if it did not-Mr. CLAPP.

Mr. OWEN. Why not?

Mr. CLAPP. But opposing it, as the Senator does, he can not in meeting the mere question of the ownership of stock insist upon a complete change in the proposed law regulating

Here is the proposition in a nutshell, it seems to me. Take the law as proposed by the Senator from Oklahoma and simply change that one proposition of the ownership of stock, it does not follow that you must necessarily change the whole character of the bank and make it a bank of deposit for Government

If the bill of the Senator from Oklahoma was changed so as to allow a subscription by the public and changed in no other respect, and that is all we are insisting on in that matter, that bank would no more be in competition with the thousands of banks throughout the country than the bank that is proposed by the Senator from Oklahoma, for its sole business would be the rediscount of commercial paper. But the moment we stand for the public owning that bank, then the opponents of public ownership of the bank immediately say, You must change the entire system and make it a bank receiving deposits generally and put it in competition with all the other banks in the

Mr. OWEN. I have given good reasons for making the banks stockholders and putting the administrative detail on them under the watchful supervisory control of the Government, but I had not completed my answer to the Senator when he interrupted me. I was dealing with only one branch of it. There is a further answer which I will get to, if the Senator

will be patient. I say when you start upon the policy of having the stock owned by the general public, the most natural thing in the world would be to take the next step. Why should not a stockholder have the right to ask a discount of his paper from this bank when those not stockholders are given that right? Why should the banks of the country

Mr. CLAPP rose.

Let me get through, if the Senator pleases. Why should the banks of the country which are not stockholdhave a right of discount which the actual stockholders are denied? I am now laying the foundation to show you where that policy naturally and necessarily goes. If we are ready for Government ownership of the banking business and to have the Government drive all the banks out of the banking business, that is one thing, but we are not proposing to have these adverse policies merged with a bill that is intended to be a bankers' bill, and intended to protect the banks and enable them to perform their proper functions.

Naturally when you have established this individual ownership of the stock the individual will say, Does not the Bank of Germany deal with private individuals by the thousands and by

the tens of thousands? The Reichsbank has 70,000 clients to whom it lends money. The Bank of Germany was compelled to deal with the public, because there had been built up in the German Empire a few gigantic banks, with branches running everywhere, who could control the credit system of the Ger-The German Empire wisely established the German Reichsbank, for otherwise it could not have assured a square deal for the German people. The same is true with But in our country we have 25,000 individual banks, big and little, at every crossroads, but without branches worth Where five citizens can get together and raise a small amount of money and gather together from their neighbors as much as \$25,000 of capital, they can establish a national bank, and with \$10,000 a State bank, to receive their own deposits and the deposits of their friends, and deal in that way directly with the people. These American banks are distinctively people's banks, and it has been a great system, even with its obvious weaknesses. Notwithstanding, it has been a great system built up in this way, and we are now amending its de-We have not been willing to let those who are not in sympathy with the plan we propose tear it to pieces or delay it by the various suggestions that have been made by the Senators who have been obstructing us and giving us bad advice.

This proposal for a central Government-controlled bank was finally presented by Mr. Vanderlip. He and his associates, A. B. Hepburn and Joseph Tolbert, had been our chief antagonists, and they are the very men who have been the active agencies of the Money Trust. Their advice we consider with great caution.

Mr. CLAPP. Mr. President, it had been the proposal of the American people for years before Mr. Vanderlip was ever heard of; in my opinion, before he ever entered into the banking business

Mr. OWEN. Yes; it has been thought of before; it is not original with him. It has been talked about quite a while in various ways, but the policy of the conception is at fundamental variance with the policy which we have approved, and which passed the House of Representatives, and which we have been proposing to carry out—that is, the policy of a bankers' bank.

Now, there are some other reasons which I think I ought to present to the Senator. The Government of the United States is expected to put into these banks \$200,000,000 approximately. Government could put in \$286,000,000 to-day \$175,000,000 of Panama bonds due the general fund. The Government of the United States in putting that vast fund into these Federal reserve banks ought to have such a safeguard as would be thrown around it by a double liability of the stockholders, and of stockholders whose financial reliability is beyoud dispute. The proposal which we have submitted, while it only requires fifty millions to be paid up, requires a subscription of one hundred millions and a double liability that amounts to two hundred millions, an amount equal to that which the Government is expected to put in.

That character of vast financial responsibility before the great financial thinkers of the world, before the bankers of the world, those who are dealing with these banks and with the banks of our own country-that great financial strength gives the Fedour own own county—that great maneral strength greater strength and greater power. Whereas if you had no double liability, if you had only the contribution of capital from individual citizens, or even if you had a double liability of unknown citizens it would be uncertain.

Under our plan if there should ever be any loss it would fall on the banks; under the Bristow-Hitchcock plan it would fall on the United States, if the Government were so made respon-

As to the character and value of the security, there is an obvious conflict of policy between these two plans and they are irreconcilable. I am not prepared to say that it is impossible to make a success of a Government bank owned by the Government itself. Of course it would build up a great bureau. It would put gigantic power in the hands of a bureaucracy. I do not look with favor upon building up a giant bureaucracy controlling the credits of the country. In this case, where we make the banks responsible for the administration of the details of this system, and we put across the table of the board of directors three Government members of this board of directors and supervise the system by the Federal reserve board, we have the best method and, moreover, Mr. President-

Mr. CLAPP. Mr. President— Mr. OWEN. I wanted to conclude what I have to say, but I will yield to the Senator without concluding.

Mr. CLAPP. I simply wanted to say that the suggestion of a minority representation of the Government on that board suggests to my mind the potency of a very strong minority repre-

sentation in the Senate when the effort to frame a bill for the general public-I think the potency of one-

If the Senator would like to make a speech on the evils of the caucus this is a good time to make his speech, and I will yield the floor.

Mr. CLAPP. Is equal to the potency of the other.
Mr. OWEN. If the Senator wants to make an anticaucus speech, I am willing; but I was trying to point out to the Senator the reasons why we were not willing to have this stock sold to the general public. We have given you reasons at least sufficient to thoroughly satisfy the minds of those who have studied this matter from that point of view, and having done so I yield the floor to the Senator.

Mr. WEEKS. Mr. President-

The VICE PRESIDENT. The Senator from Kansas is entitled to the floor. Does the Senator from Kansas yield?

Mr. BRISTOW. I will take the floor after awhile in my own

right. I do not want to hold it the whole afternoon.

Mr. WEEKS. Mr. President, I should like to have the attention of the Senator from Colorado [Mr. Shafeoth]. He has been arguing with his usual force and eloquence in favor of the banks controlling the regional banks. Here is something that I am going to read to him from an address delivered during the hot season last summer, on the 23d of June, by the President. He said:

The tyrannies of business, big and little, lie within the field of credit. We know that. Shall we not act upon the knowledge? Do we not know how to act upon it? If a man can not make his assets available at pleasure, his assets of capacity and character and resource, what satisfaction is it to him to see opportunity beckoning to him on every hand, when others have the keys of credit in their pockets and treat them as all but their own private possession? It is perfectly clear that it is our duty to supply the new banking and currency system the country needs, and it will need it immediately more than it has ever needed it before.

\* \* And the control of the system of banking and of issue which our new laws are to set up must be public, not private, must be vested in the Government itself, so that the banks may be the instruments, not the masters, of business and of individual enterprise and initiative.

Now, I want to ask the Senator from Colorado how the system which he has been defending so eloquently conforms to that proposition made by the President? Does he not know that the reserve board, which, under the proposed law is a board for general supervision purposes but not for detail action, is a board appointed by the President, but that the real detail of carrying out this law, the business to be conducted under the provisions of this law, must be carried out by the reserve banks? The Senator is, notwithstanding the declaration in favor of Government control of the credits of the Nation, defending the election of two-thirds of the members of the boards of directors of the reserve banks by the banks themselves, and they are charged with the control of the credit of the country.

Mr. SHAFROTH. Yes, sir; I am here defending the feature of the Federal reserve bank that a majority of the directors shall be selected by the member banks, because it deals with their money and deals with their capital, and because any other system would not be adhered to nor would it be acceptable in any way to the banks nor could they be forced to come into that system. The Federal reserve board is paramount upon all questions where the Government has an opportunity to exercise the powers of Government in a governmental matter, but dealing with the question of the amount of money, the paper to be discounted, is not a matter in which the Govern-

ment can be interested.

The President, no doubt, in that address had in mind the fact of the conditions in New York City where combinations have been made, and it was for the purpose of permitting any bank, whether a bank in another city or a bank in New York, going and getting the discounts to which it is entitled under this bill. The position of a bank whose capital stock is subscribed for by the people presents this peculiar condition: The capital subscribed by the people and the law forcing the banks to deposit their reserves in that bank in which they have not a majority of the board of directors and making money out of the reserves of the bank for the benefit of the stockholders who are not the bank. That is a condition of affairs that shows it is an inconsistent system. It may be all right if you want to organize a great Government bank with different functions from what this bank will have, but it can not do that as a bank of banks and be successful.

Senators have asked that I name a bank which has stated that it will not come into this system if this section of the Owen bill is adhered to. I will state that all the hearings were had on the proposition that the banks should have the control of the selection of six of the nine directors. There was no discussion of the proposition; that was a matter that was practically conceded in all the hearings; but I want to ask the Senators upon the other side if they can show me a single bank that has written to them that it approves of this provision of the Hitchcock bill, or that it will come into the system if the provision of the Hitchcock bill is adopted?

Mr. HITCHCOCK. Mr. President, I want to say to the Senator that we will submit to him a pretty complete list of the banks which are willing to come in under these conditions as readily as under the provisions of the Owen bill. I want to ask the Senator, who has made a pretty broad and sweeping statement, how he knows that the banks will not come in under the

provision of the Hitchcock bill?

Mr. SHAFROTH. I know human nature; that is all. that you never would have organized a national bank if the law had said that the Government should have the appointment of five out of the nine directors; I know that men do not turn their money over to persons who have no interest in the concern with which they deal. When these banks are required to deposit their reserves and subscribe the capital they have a right to come in with relation to the banking transaction and to deal with it.

Mr. WEEKS. Let me ask the Senator one more question. What difference does it make how the directors of these banks are appointed or selected if they are suitable and qualified men to fill the places? They are not there to represent the banks; they are not there especially to represent the Government; they are not there especially to represent the stockholders; they are not there to represent the depositors of reserves or for any other specific purpose; but they are there to manage the banks in the best possible manner, and they must be competent men for that purpose. What difference does it make when a man takes his oath to do his duty whether he is appointed by the President or is elected by a bank?

Mr. SHAFROTH. I will state, in answer to that question, that the very interest that a man has in his own moneys prompts him in every corporation which he enters to desire that he should have a control of the majority of the directors of that

corporation.

Mr. WEEKS. Yes; but, Mr. President, we provide in our bill that no man who has any interest whatever in any bank as a stockholder, officer, or in any other way, direct or indirect, shall be a director in either the regional banks or the reserve board.

Mr. SHAFROTH. We provide that they shall not be in the reserve board, and I was eager that that should be the rule. I do not believe that the banks should have a say in the governmental part of this banking system; but on the question of handling the money itself, there is a great difference as to whether a man is interested in the money or not. He can make loans which are not the best in the wide world; he can make discounts; and if it is no concern to him, it does not become of the greatest importance whether or not there is a loss.

Mr. CUMMINS. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Iowa?

Mr. WEEKS. I yield to the Senator from Iowa. Mr. CUMMINS. If the view of the Senator from Colorado is correct, why not make the bill for which he stands optional, and allow the national banks to take stock, if they so desire, and thus participate in the affairs of the Federal reserve banks, and allow them to dispose of their stock, if they so desire in accordance with the view taken by the Hitchcock bill? If they would rather have your system, then allow them to have it; if they would rather have the other system, allow them to take

Mr. SHAFROTH. Our bill does provide that this stock shall be first open to subscription to the banks, and if they fail to take it, in order to prevent a failure of the system itself it will be open to the people.

Mr. CUMMINS. No. Mr. SHAFROTH. Then, if the people do not subscribe for it, the Government subscribes for it.

Mr. CUMMINS. That statement, while accurate so far as it goes, is not entirely complete. Your bill requires every national bank to take capital stock in the Federal reserve bank equal to the amount of its capital and surplus. If it refuses to do so, or fails to do so, it forfeits the charter of that national bank. It can hardly be said, therefore, that you have simply said to the banks, "You can take the stock, but if you do not take it, it is open to the public for subscription."

Mr. SHAFROTH. I will state, in answer to the Senator, that the national-bank law of the United States contains a provision. that all parts of the act can be repealed at the will of Congress.

Mr. CUMMINS. I am not now discussing the power of Congress to do it. I will discuss that at a later time. But I am discussing the merits of the matter. If you really believe that the national banks want to come in and take the stock rather than to allow the Government to control the Federal reserve banks, why not give the banks the opportunity of exercising

the option?

Mr. SHAFROTH. The reason is that no matter what system you devise there would be some banks that would not want to come into it. The result would be that you would impair the system which you want to apply to all national banks. that one national bank shall belong to a system and that another national bank shall not belong to it would make a mixed system, which, I am satisfied, would not be for the best interests of the people of the United States.

Mr. SMOOT. May I ask the Senator a question? The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Utah?

Mr. WEEKS. I do.

Mr. SMOOT. In order that I may understand the position of the Senator, I want to ask him this question: Suppose one of the Federal reserve banks were organized with a capital of \$15,000,000, or, in other words, 6 per cent of the stocks of the national banks within the regional-bank territory would amount to \$15,000,000, and that under the Owen proposition it was open to those banks to subscribe; and suppose there were only a sufficient number of the national banks who took advantage of the subscription, 6 per cent of which would only amount to \$7,000,000, do I understand that there is any provision in the bill that the bank would still have a capital of \$15,000,000 and the other \$8,000,000 that was not subscribed for by the national

banks would be open for subscription to the people living in that region or district?

Mr. WILLIAMS. The capital must be not less than \$3,000,000.

Mr. SMOOT. I know that the provision is that it shall not be organized for less than \$3,000,000; but there will be districts where the 6 per cent of the capital stock of the national banks will amount to \$15,000,000. It was upon that basis that I asked

the question of the Senator.

Mr. SHAFROTH. I will answer the Senator's question. My recollection of the bill is that when these districts are established an estimate will be made of the capital and surplus of the national banks of each district, and it will then be open to the banks to subscribe for the stock. If the banks subscribe for it all, then, of course, that ends it; but if they do not subscribe for it all, then it will be open to the public. As a matter of fact, our section of the committee did not want to compel the banks to take it, but, inasmuch as the banks might prefer to go out of the system and we wanted to have a large bank, consequently, it was provided that the stock should be open to be subscribed for by the people, and they are entitled to subscribe for it in the event that the banks fail to subscribe for it all.

Mr. SMOOT. I understood that that was the position taken

by the Senator.

Mr. SHAFROTH. Yes, sir.
Mr. SMOOT. But the result will be in a case similar to the one which I have pointed out that the people would own a majority of the stock and the bankers would have a majority

of the directors.

Mr. SHAFROTH. That may be; and it would be deplorable if that were the case. We would then have, as a matter of fact, a condition that was not perfect; but by reason of the fact that the majority of the directors would be named by them, although only one-third of them would be of the banking fraternity, yet notwithstanding that, the banks could rely upon the management of the reserve bank in the interest of the deposits and in the interest of the capital which they had subscribed. They therefore would not expect that there would be any mismanagement of the reserve bank. Under the other system, however, whereby five of the nine directors represent the Government and only four represent the banks, the banks will not come into it. If they would come into it, it might be will not come into it. It they would come into it, it might be all right; but they will not come into it. It would, in effect, be simply killing this bill; that is all.

Mr. SMOOT. That is the Senator's opinion. My opinion is that they would come into it more quickly in that way than

they would under the provisions of the Owen amendment.

Mr. SHAFROTH. Has the Senator ever been a member of a

national bank?

Mr. SMOOT. For a good many years I have been a director

Mr. SHAFROTH. I will ask the Senator, then, if the law provided that on the organization of a national bank the Government should name five directors and the persons who subscribed the capital and put up the money should name four, whether he would go into a bank of that kind?

Mr. SMOOT. I do not know what the question was asked for, because the question is in no way comparable with the situation I have presented.

Mr. SHAFROTH. It is exactly parallel, because the capital of the reserve banks has to be subscribed by the member banks, and their reserves are deposited with the reserve bank, so that it is their money which is dealt with. To say that a bank would go into a system of that kind without a control of the board of directors of the reserve bank would be absolutely absurd.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from Massachusetts yield to the Senator from Kansas?

Mr. WEEKS. I yield. Mr. BRISTOW. I desire for the information of the Senator

from Colorado

The VICE PRESIDENT. Solely in the interest of the Reporter the Chair will suggest that, while he does not care how many Senators talk at once, it is a difficult matter for the Reporter to report the remarks of two Senators speaking at the same time.

Mr. BRISTOW. Mr. President, for the information of the Senator from Colorado, I desire to read to him a few letters from bankers who have read the Hitchcock amendment, as to the desirability of the public ownership of the stock of the reserve banks. I have here a letter from the cashier of the First National Bank of La Harpe, Kans., in which he says:

We especially approve the limiting of the number of reserve banks to as small a number as possible \* \* and more especially the provision allowing the public to subscribe for the stock of the banks is commendable, for it gives the public a chance to acquire a stock that is gilt-edged and free from taxation. This latter point was forcibly illustrated in Kansas a short time ago, when an issue of \$100,000 of Kansas City school bonds was largely oversubscribed, even though it drew an interest rate of 4½ per cent, which is low under present conditions tions.

Mr. SHAFROTH. I want to ask the Senator whether he can find a single letter from a bank which indorses the proposition that, although they put their money into the Federal reserve banks, a majority of the directors shall be named by the Government?

Mr. BRISTOW. Yes, sir; the indorsement comes from this individual banker. He says that he prefers very much the Hitchcock amendment to either the House bill or the Owen amendment; and he says so because it will promote the interest of the people in his community in the banking system of the country.

Mr. SHAFROTH. I can readily see how the banks would

favor the public subscribing for their stock if the provisions of

the House bill were retained.

Mr. BRISTOW. I will say to the Senator that they do not complain of the Government having a majority of the directors in this system.

Mr. SHAFROTH. Can the Senator find an indorsement of it?

Mr. SHAFROTH. Can the Senator and an indorsement of it.

Mr. BRISTOW. I am giving the Senator the indorsement
now. I submitted to these bankers—

Mr. SHAFROTH. That letter is not an indorsement of the
Government appointing a majority of the directors.

Mr. BRISTOW. I will say to the Senator that I submitted
to these bankers the Hitchcock bill, and these gentlemen say they prefer the Hitchcock bill, and give their reasons for do-

ing so.

Mr. SHAFROTH. There are, I have no doubt, some provisions of the Hitchcock bill which they would prefer.

Mr. BRISTOW. They prefer them as a whole. Mr. SHAFROTH. I would like to hear of one who says he will come into the system in the event that the Government appoints five out of the nine directors.

Mr. BRISTOW. I have not received a single letter from a banker who says he will not come in, and I have received letters from but two who favor the Owen bill over the Hitchcock bill. Again, I have a letter from the cashier of the Citizens' National Bank, of Anthony, Kans., in which he says:

In our opinion the bill as amended and recommended by your committee is a decided improvement over the bill as passed by the House. The plan to allow the public in general to hold the stock in the reserve banks and the proposition to permit a certain amount of the profits to remain in the reserve bank for the payment of depositors in failed banks, are, in our opinion, certainly very great improvements over the original bill original bill.

Mr. SHAFROTH. Is there anything there in favor of the directors being appointed by the Government?

Mr. BRISTOW. He has not referred to that, but he says the bill which he read is better than the bill which you propose, and the bill which he read provides that the Government shall name five of the nine directors.

Mr. SHAFROTH. There are many provisions of your bill

that I have no doubt the bankers prefer, but I should like you

DECEMBER 9.

to show me a single letter which says that they approve of the provision that five out of nine members of the board of directors which is to manage and control their own reserves should be appointed by the Government.

Mr. BRISTOW. The Senator has been talking here for, I should say, an hour this afternoon, declaring that if the people were permitted to own the stock in this system the banks would not go into it.

Mr. SHAFROTH. No; I have said that if a majority of the Mr. SHAFROTH. No; I have said that if a majority of the directorate are appointed by the Government in the handling of the affairs of the reserve banks—

Mr. BRISTOW. The Senator is dodging and evading what he has been advocating all the afternoon.

Mr. SHAFROTH. I have said that the natural result of having the stock open to the public would be to conform with your theory, namely, that the Government should control a majority of the directorate. That proposition naturally follows from your plan, while our proposition follows from the provision that the bankers shall own the stock. That is true; but the vital provision is the control of the directorate, and I want you to show me a single banker who has stated that he will come into the system with a majority of the directors of the bank which controls his reserves appointed by the Government.

Mr. BRISTOW. The Senator has shifted his entire position. He started in here with an argument that if the public were permitted to own the stock the bankers never would come into the system. I have selected a lot of letters from bankers who commend the proposition of the public owning the stock, which let-ters were written in response to copies of the bill which were sent them for their examination. They have examined the Hitchcock amendment, which contains the public ownership of the stock and the control of the regional banks by a board of directors, a majority of whom are appointed by the Government, and they commend that bill in preference to the other.

I am reading letters from gentlemen who have examined the bill and say they prefer it, and they give the reasons which appeal to them most strongly for their preference.

I will now read a letter from the president of the Bank of

Mr. CUMMINS. Is it a national bank?
Mr. BRISTOW. No; this is a State bank. The other two are national banks. This is from Mr. John R. Mulvane, a wellknown banker in the West:

I understand the Bank of France is owned by the people of France, just as a great bank ought to be.

I noticed your bill and your suggestions with a great deal of pleasure. They are absolutely right, and time will vindicate you.

Is not that an indorsement of the Hitchcock bill by one of the largest bankers in the State of Kansas?

Mr. SHAFROTH. Yes; but he does not say he will come into I should like to know where there is any statement there that they will submit their money to somebody else's control.

Mr. BRISTOW. The Senator can quibble over that as much as he pleases. It will be pretty hard, in the present state of mind of the Senator from Colorado, to frame language that will satisfy him upon a thing which he has been declaring impossible here all the afternoon.

I will see if I can find some other letters along the same line. I have here a letter from the president of the First National Bank of Columbus:

The bill looks good to me, especially that part that the public ought to own the stock. If the public is not given a chance to buy the stock, it will have the appearance of favoritism. Only a selected few will have the privilege to buy the stock, and it will then get into politics, and a terrible howl will go up from the Socialists, like the old Greenback Party made against the national banks.

That is from Mr. T. P. La Rue, president of the National Bank

of Columbus, Kans. I have here a letter from the cashier of the First National Bank of Jewell City, Kans.:

Bank of Jewell City, Kans.:

Your favor of the 20th ultimo, inclosing the new banking and currency bill recommended for passing by yourselves and associates, was received several days ago.

I have gone over it very carefully, and believe it to be a much better bill than the House bill. In fact, I can find very little in it to criticize, and am perfectly willing that the bill should pass at it now stands.

The proposition to use part of the earnings of the Federal reserve banks for insurance of deposits of member banks, the extension of discounts to six months, and the permission for national banks to make five-year farm loans with a small part of their funds, I especially indorse.

Here is one from the National Bank of Lincoln, Nebr.:
Under the plan we would have a Government-owned Federal bank, the stock of which is held by the people, which would discount for other banks, It would be a fortification, and would provide a reserve center where they could get relief when it is necessary.

This letter is from the president of the National Bank of Commerce, of Wichita, Kans.:

I am especially impressed with the feature making it possible for the general public to invest in the stock of these banks, and I believe that

Here is a letter from J. R. Burrow, president of the Central National Bank, of Topeka, Kans. Speaking of the provisions of the bill, he says:

The one appealing to me, and I believe it would make the bank a popular bank and supported by all the people of the United States, is allowing the people in general to subscribe for the stock.

When the Senator produces a number of letters from banks stating that they will not go into a system because the general public is permitted to own its stock and the Government to control it, it will be time for him to allege that this is an effort to destroy this proposed legislation.

Mr. SMOOT. I should like now to answer the question of

the Senator from Colorado.

The Senator from Colorado asks whether I, as a director of a national bank, would organize another national bank if the Government of the United States had a right to appoint a majority of the directors of that bank. He asks that question and compares the provision in this bill with a situation of that kind.

I wish to say to the Senator, very briefly, that there is no parallel between the two cases, for this reason, among others: In the case of a national bank organized in a city a great majority of its customers are, perhaps, those doing business or residing in the city. The money is loaned on personal notes to a large extent. The officers and directors of the bank know the men with whom they are dealing. They extend credit to them because of the fact that they believe them to be honest, and they believe them to be in a business that will be suc-

It would not be reasonable to suppose that the Government, if it appointed a majority of the directorate, would appoint men familiar with the conditions in local communities, whereas a regional bank often would cover a territory of a thousand miles. It is not proposed that a regional bank shall discount personal paper. The bill enumerates the kinds of paper that can be discounted by it. The two are entirely different propositions. I do not see why the Senator asked the question.

Mr. SHAFROTH. But the reserves are the reserves of the

## PERSONAL EXPLANATION.

Mr. LA FOLLETTE. Mr. President, I rise to a question somewhat of personal privilege. I think never in my political experience have I made any reply to any misstatement con-cerning me which appeared in any newspaper; certainly not since I have been a Member of the Senate.

My attention has been called to an editorial which appeared in the Washington Times of yesterday, which is quite extended, but from which it is necessary for me to read only two paragraphs. The editorial is entitled:

## THE SENATE AND MR. CLEMENTS.

Senator La Follette has sounded a warning to the President that if he persists in removing Judge Clements from the Interstate Commerce Commission there will be danger of senatorial refusal to confirm the appointments.

Senator La Follette ought to be right. Most likely, however, he is

I am going to send to the Secretary's desk and ask to have read the editorial which appeared in La Follette's Weekly of December 6, upon which the editorial comment I have just read is made.

The VICE PRESIDENT. Without objection, the Secretary will read as requested.

The Secretary read as follows:

[From La Follette's Weekly, Madison, Wis., December 6, 1913.] A CRITICAL JUNCTURE.

A CERTICAL JUNCTURE.

What will President Wilson do with the Interstate Commerce Commission?

The untimely death of John Marble creates a vacancy which the President must fill. The term of Commissioner Judson C. Clements is about to expire. The resignation of Commissioner Prouty is now in the President's hands. Prouty has long thought of retiring, and proposed at this time to do so and assume under the commission the immediate direction of the work of railroad valuation. It is said that the President will not name Clements to succeed himself because he is now 67 years of age and would, if reappointed, pass the 70 mark before the expiration of his next term. Clements is 10 years younger than his calendar age—a big, raw-boned, vigorous, white-oak type of man. It is inconceivable that his 20 years of unswerving aid to public interest, his rips knowledge of the law and economics of transportation, his familiarity with the important work the commission has in hand, should all be east aside for an untried man. But the state of the President's mind, as reported, is such to at least leave in serious doubt the reappointment of Clements. If he should fall of reappointment, there will then be three vacancies upon the commission to fill with new men.

In the valuation of the railroad property of the country the Interstate Commerce Commission is just entering upon the most stupendous economic investigation in the world's history.

It faces to-day the greatest responsibility with which it has been confronted since established, 26 years ago. It will be required to classify, inventory, and value all of this property. It will thereupon fix pri-

marily the rule under which the value so ascertained shall be applied in rate making. Over this vast work there will be waged, ultimately, the greatest contest in the history of railroads.

In the meantime the railroads in the classification territory are rushing forward to secure an increase of 5 per cent upon their present freight rates. Based on the amount which these roads collected on freight traffic from the people last year, 5 per cent increase would impose upon the consumers of the country, who in the end pay all the freight, an increased expenditure of more than \$100,000,000 annually. The people are already carrying too heavy burdens; a hundred million more added each year to the present high cost of living will count heavily in the final balance. Let that be remembered.

A legislative program is a fine thing, provided the laws passed strike down deep into the vitals of existing wrong. But even the best statutes are not self-executing. The people are waiting for results—results that count. Everything depends on those to whom the President commits the administration of the laws.

The Interstate Commerce Commission is to be practically reconstructed through the appointments that President Wilson makes. This commission will exercise its control over railroads which collect transportation charges from the people amounting to more than three times the total cost of running the Federal Government each year. The railroad influence of the country is at this moment being actively exerted to secure the appointment of commissioners who will adout the railroad standard of enormously increased transportation rates. President Wilson's appointments upon the Interstate Commerce Commission will be awaited with keenest public interest.

Mr. LA FOLLETTE, Mr. President, I submit that there is

Mr. LA FOLLETTE. Mr. President, I submit that there is no intimation or suggestion or warning or threat contained in that editorial which warrants the deduction made from it in the comment of the Times. I did not feel that I ought to permit it to be so construed without some statement.

NATIONAL FOREST RESERVATION COMMISSION (S. DOC. NO. 307).

The VICE PRESIDENT. The Chair lays before the Senate a communication from the Secretary of War, as president of the National Forest Reservation Commission, transmitting, pursuant to law, the report of the National Forest Reservation Commission for the fiscal year ended June 30, 1913. The communication and accompanying report will be printed and referred to the Committee on Commerce.

Mr. SMITH of Maryland I ask that an order be entered for the printing of 1,000 copies of the report in addition to the

usual number. Mr. SMOOT. Mr. SMOOT. I did not hear the request. Will the Chair repeat it, or will the Senator repeat what his request was?

Mr. SMITH of Maryland. Nothing, except to present the re-

port and request to have it printed.

Mr. SMOOT. I will ask the Senator if this is the entire

report.

Mr. SMITH of Maryland. It is the report of the commission for the fiscal year 1913. In fact, it is a summary of the entire purchases approved by the commission up to June 30, 1913.

The VICE PRESIDENT. The Senator from Maryland asks

for the printing of additional copies of the report. Is there objection? The Chair hears none, and it is so ordered.

The order as agreed to was reduced to writing, as follows:

Ordered, That 1,000 additional copies of the report of the National Forest Reservation Commission for the fiscal year ended June 30, 1913, be printed for the use of the Senate document room.

# COMMITTEE ON INTERSTATE COMMERCE.

Mr. NEWLANDS. Mr. President, pursuant to a resolution passed by the Interstate Commerce Committee, I have to request of the Senate permission for that committee to sit during the sessions of the Senate.

The VICE PRESIDENT. Is there objection to the request of

the Senator from Nevada?

Mr. BRISTOW. I object, Mr. President. If we have to stay here for 13 hours a day and consider the banking and currency bill, the members of the Interstate Commerce Committee ought to be here with the rest of us.

Mr. CLAPP. Mr. President, I hope the Senator from Kansas will withdraw his objection. It is not intended that the Inter-state Commerce Committee shall go into session and sit all the time, or any great length of time. There are one or two very important matters before the committee. Its members can be brought here on a moment's notice. It is only intended, out of courtesy to the Senate, instead of the committee sitting and answering to the call of the bell, that it shall have some formal authority so to sit.

Mr. TOWNSEND. Mr. President, I also object to meetings of the committee being held under the conditions that are main-

tained at the present time.

I have attended all the meetings of the Interstate Commerce Committee, and desire to attend all of its meetings. I am compelled, however, to come here and remain from 10 o'clock in the morning until 11 o'clock at night.

Since a week ago last Monday, when the resolution was pre-sented to the Senate, with the exception of last Saturday night about midnight, there has not been five minutes during the whole time when there has been a quorum in the Senate Cham-

ber. It has been called for, but before the call was completed the Senate Chamber was practically vacant.

So long as there is no disposition to filibuster, so long as the disposition is to legislate, if a reasonable hour of meeting can be fixed for the Senate, so that the committees can meet and conduct the business they are supposed to carry on, I shall not object; but I desire to attend the meetings of the Interstate Commerce Committee. Therefore I shall object, so far as I can, to permitting the committee to meet during the continuance of

Mr. NEWLANDS. Mr. President, I have only to say that I called the committee together last Friday simply for the purpose of organizing for the business of the coming session, and not with a view of instituting continuous hearings. tion was asked by one of the members of the committee whether the consent of the Senate had been obtained. motion was made and carried that the committee should request permission of the Senate to hold its sessions during the sessions of the Senate.

#### RECESS.

The VICE PRESIDENT. The hour of 6 o'clock having arrived, the Senate stands in recess until 8 o'clock p. m.

Thereupon (at 6 o'clock p. m.) the Senate took a recess until 8 o'clock p. m.

# EVENING SESSION.

The Senate reassembled at 8 o'clock p. m. BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes.

Mr. SMOOT. Mr. President, there are only seven Senators in

the Chamber, and I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. THORNTON in the chair). The Senator from Utah suggests the absence of a quorum. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gallinger	Myers	Smith, Md.
Bacon	Gronna	Norris	Smith, S. C
Bankhead	Hollis	O'Gorman	Smoot Smoot
	Jackson		
Brady		Owen	Sterling
Brandegee	James	Page	Stone
Bristow	Johnson	Pomerene	Swanson
Bryan	Jones	Reed	Thomas
Burton	Kenyon	Robinson	Thornton
Chilton	Kern	Saulsbury	Townsend
Clapp	Lane	Shafroth	Vardaman
Clark, Wyo.	Lea	Sheppard	Walsh
Clarke, Ark.	Lewis	Sherman	Warren
Colt	McLean	Shively	Weeks
Dillingham	Martin, Va.	Simmons	Williams
Fletcher	Martine, N. J.	Smith, Ga.	DESCRIPTION OF

The VICE PRESIDENT. Fifty-nine Senators have answered

to the roll call. There is a quorum present.

Mr. McLEAN. Mr. President, I fully realize the futility of post facto arguments, but as I am a member of the Committee on Banking and Currency and entertain views wholly at variance with the decision which is about to be rendered by the Senate upon the pending measure. I feel it to be a duty to myself at least to record a brief protest before the decision of the Democratic caucus has been formally ratified by the Senate.

I want to say at the outstart that I am not so bitterly opposed to the methods which have been used to secure this decision as are some of my colleagues upon this side of the Chamber. It is the decision that I regret and object to and not the caucus. I do not think that legislation by caucus is the best way. It confesses the substitution of party loyalty for conviction, if this be necessary to secure the performance of party promises The caucus also confesses the fear of party failure without the restraining influence of the caucus. But if it is the only way in which action can be had, and the majority of the Senators belonging to the party in power is convinced that although it is a minority of this body, its judgment is wiser and safer than that of the Senate, and the minority of that majority can be persuaded that it is its duty to surrender its convictions for the good of the country—and all this is possi-ble—the responsibility for wisdom or folly is certainly placed where it belongs. And while, as I have said, legislation by caucus is not the best way, if the party in power honestly conceives it to be the only way to perform party promises, whether wisely or unwisely made, it is a matter for the conscience of the minority of the Democratic majority, and I am content to leave it there. But believing as I do that one grave and irreparable

mistake has already been made by the present administration, and that another is about to follow, I desire to enter a brief protest, useless and futile as I am assured it will be.

In the first place, I have considered the present a most unfortunate and inopportune time to create a new banking and currency system for the United States. The Sixty-third Congress has already enacted two new and revolutionary measures of the greatest importance and of unknown consequences. With regard to the income-tax law, I believe in the principle, and while I think it has justly aroused much complaint I approve its purposes and wish it well, and I am glad to learn that the Secretary of the Treasury is rapidly amending it so that it can be understood

But the new tariff law is quite a different matter. The income tax affects less than 1 per cent of the people; the tariff affects everybody. For better or worse it enters every laborer's home and increases or diminishes his net daily wage. The new tariff law professes to deprive the American manufacturer, farmer, and employee of any economic advantage which he may have over his competitors in other countries. It must in its very nature be experimental, and it is an experiment which the American people have never found satisfactory. It is probably true that there has never been a time in the history of this country when conditions were better able to sustain severe tariff reductions than at present. The Congressional Record is full of high Democratic testimony to the fact that the country was in a strong and exceedingly prosperous condition when this law was signed by the President. I sincerely hope that the new tariff rates will prove to be sufficient to sustain the prosperity of the American laborer and his employer. And I want to say further that if the new tariff bill brings a greater degree of prosperity to the working people of this country than existed when President Wilson signed it, the Democratic Party will have demonstrated its ability to cope with this great question, and the Republican Party must take the consequences. But it is my sincere regret that when President Wilson announced that the new tariff would restore competition and destroy monopoly in this country he did not give it a chance to perform or fail to perform this promise. A permanent and satisfactory settlement of the tariff question, to my mind, is of more consequence to the Nation than any other 10 questions now confronting us. If the tariff is a burden, it is high time the American people found it out. If, on the contrary, it is the price or pittance we must pay to secure prosperity, the American people ought to have an opportunity to find it out.

For more than a century this question has been the dominant and dominating one in American politics. It has been the remote or primary cause of every serious disturbance since the Nation was formed. The people of this country have demanded protective tariffs since 1860, with one brief exception, and during that short period progress stopped and the business of the The Democratic Party insisted then, and country was dead. insists now, that this period of depression was due to the agitation in favor of the bimetallic money standard for which Republicans were equally responsible with Democrats. It is undoubtedly true that the so-called silver issue had much to do with the panic of 1893, and that Republicans were equally responsible with Democrats for the bimetallic heresy. It is also true that the Republicans acknowledged their error early and rallied to the defense of the single standard and saved it against the onslaughts of the Democratic organization. It is my belief that the severe cuts in the tariff rates made at that time were a contributing cause, if not the principal cause, of the business depression which came in the nineties. But however this may be, it seems to me that the experience which the country went through then ought to warn it now against coupling Democratic tariff legislation with Democratic currency legislation, and administering both to a confiding and forgetful people in one dose. I shall hope for the best, Mr. President, but if depression comes we can not expect our Democratic friends to admit that it is due to a tariff for revenue only. Republicans, of course, will insist that the "hard times," if they come, must be due to a Republicans, of course, will tariff for revenue only and nothing else. And so, instead of settling the tariff question and the currency question, we shall have projected them both into American politics for another 20 years or may be for another century.

I wanted the new tariff law to have all of the road, and the middle of the road, uninterfered with by other revolutionary and drastic measures which might interfere with its effects, good or bad. It is inconceivable that the manufacturers of the country will branch out into schemes requiring additional capital until the new tariff law has had an opportunity to show its effect upon their business. It is inconceivable that capital in general will be venturesome until the effects of the new tariff law have been discounted and tried. The situation would neces-

sarily conserve the reserves and token money of the country, and if there was sufficient to meet all demands, ordinary and extraordinary, in the current year, there would certainly be sufficient to meet the demands of commerce during the year 1914. It is claimed by the economists that the present high prices are in a great measure due to the unprecedented increase in the output of gold in recent years.

I am heartily in favor of reform in the banking system of the United States, but I felt confident six months ago, and I feel certain now, that it would have been much better for the country if the President had announced his intention to give the new tariff a fair field and a fair test before complicating it with a revolutionary banking and currency system. Amendments could have been made to the Aldrich-Vreeland law now on the statute books without opposition which would have maintained confidence in the business world, and we all know that confidence has coined more wealth for the American people than all her mints, and that where there is a lack of it prosperity is impossible. If the business interests of the country had suffered no setback, but on the contrary had taken on new vigor and impetus by the 1st of July next, the faith in the Democratic tariff thus inspired would have enabled the administration to create a new banking system which in turn could have been tested upon its merits. I know that President Wilson is a very learned man in some respects, and a very determined man in all respects. I am sure he believes that he has been, and will continue to be, of great service to his country, and the people up to date are inclined to take him at his own inventory. I sincerely hope that neither he nor they will be disappointed. No one can read President Wilson's messages and essays without admiring his style and confidence in his ability to bring light out of darkness and good out of evil, and I would not, if I could, hinder his purposes, but I am bound to criticize his methods when I believe them to be fatal to those purposes.

I believe that a tariff for revenue only, which is the ultimate goal of his party, will not restore competition and prevent monopoly. I believe the inevitable will happen now, as it has in the past, and that a tariff for revenue only will destroy competition and strengthen monopoly if there is virtue left in the law of industrial gravity.

of industrial gravity.

But, Mr. President, I realize that it is too late to expect postponement of action upon this important matter now. The President has said that the tariff will restore competition and destroy
monopoly in the producing world. He has said that the GlassOwen bill will restore competition and prevent monopoly in the
banking world, and the only power, the only instrumentality
that will test the merits of a political prophet is time, and,
realizing as I do that we must have a new banking and currency system at once, my only desire now is to procure the best
system that can be had.

On the 22d of October last, as a result of the investigation and deliberations of the Committee on Banking and Currency, I was encouraged to believe that the only system which has stood the test of experience in other nations, and the system approved by nine-tenths of the economists who appeared before your committee, would be adopted by your committee. But about this time it was discovered that the Democratic campaign book, which quoted the Democratic platform as pledging that party against the Aldrich plan "for" a central bank, was a party against the Aldrich plan for a central misprint, and that in the original draft as prepared by Mr. a central bank. Some one, by accident or design, had added "f" to the disjunctive "or." About this time, too, Mr. Vanderlip, of New York, president of one of the largest banks in the world, appeared before your committee and expressed the belief that a central bank, controlled by the Government and owned by the people, could be created that would meet the needs of the banking world as well if not better than regional banks controlled by the bankers themselves. 25th of October Mr. Glass declared, in substance, that Mr. Vanderlip had changed front for the purpose of defeating any and all legislation. On the 26th of October Mr. Bryan, who had been away upon evangelical work and had not read the profane press announcing Mr. Vanderlip's change of views, declared that Wall Street was opposed to the Glass-Owen bill because a majority of the central reserve board were to be appointed by the President. The atmosphere suddenly became charged with declarations that the people of the country would never stand for a central bank; that the Democratic Party had always stood firmly against a central bank, and the foundation for this state of mind in the Democratic Party took its origin in Andrew Jackson's famous victory over the second bank of the United States, that hydra-headed monster and devourer of the people's rights. I at once turned my attention to an investigation of the merits of this historical incident, and when I found that President Jackson, in the very message in which he asked Congress to refuse a charter to Mr. Biddle's bank, recommended the establishment of a central bank, I thought it worth while to go further into the history of the great bank war and ascertain the real merit, if any, of the superstition against a central bank. I soon became satisfied that this superstition was as free from virtue and fact as the superstition which forbade our fathers to kill a pig in the waning of the moon lest the pork shrink in the pot.

The second bank of the United States was established by

The second bank of the United States was established by strict constructionists. The Jeffersonian and Madisonian Democrats in those days found nothing either in the Constitution or in the highest ideals of popular government to prevent or dis-

courage the creation of a single central bank.

The financial disturbances and disasters which followed the expiration of the charter of the first Bank of the United States, as they were aggravated and intensified by the War of 1812, brought the credit exchanges of the Nation to a standstill. In 1814 specie payments were suspended; bank failures and fraud were the order of the day; the Government had no money to pay the interest on the national debt, and we have the testimony of Daniel Webster to the fact that the War Department refused to pay a bill of \$30 for lack of funds.

Beginning in January, 1814, several attempts were made to create a central bank, and among its advocates we find John C. Calhoun and William Lowndes, of South Carolina. Mr. Calhoun and Felix Grundy, of Tennessee, took the leadership in the contest in favor of the establishment of a central bank. Constitutional questions were raised, but Mr. Calhoun argued that all constitutional objections would be obviated by locating the bank in the District of Columbia, and he secured his charter, with the full approval of President Madison, on the 10th day of April, 1816. Mr. Calhoun was always proud of his victory, and as late as 1834, when the bank was under fire, he asserted that it never would have been chartered but for his efforts.

The bank thus created was similar in its framework to the first Bank of the United States, and, in a sentence, I want to call the attention of the Senate to its important features and Its capital was \$35,000,000, \$7,000,000 to be taken by the United States and the remainder by "individuals, companies, and corporations." The bank was managed by 25 directors, 5 to be appointed by the President, with the consent of the Senate, and the remaining 20 to be chosen by the stockholders, no director to be a director in any other bank, the directors to choose the president. The discount rate was limited to 6 per cent. Branch offices could be established wherever the directors saw fit. These branch offices were to receive "and take charge of the cash of all such persons as should choose to place In other words, the second Bank of the United States was a bank of discount and deposit, in direct competition with the other banks of the country, and it was owned and controlled by private interests. If it were important to the point I wish to make, it could easily be shown that, with all the defects in its framework, it nevertheless served a most useful and beneficial purpose; but my object in calling the attention of the Senate to a few items in the career of the second central bank of the United States is not to praise or glorify that institution in any respect, but to show to the Senate that it been created upon different lines—that is, upon lines which have met the approval of experience—had its powers been limited to such as would give aid and protection to the banking and currency system of the country, it would have met with the hearty support of Andrew Jackson, and in all probability it would still be in existence.

When the second bank of the United States was organized, in July, 1814, President Madison made the initial mistake of selecting all five of the Government directors from his political party, if, indeed, they were not all political friends. The stockholders named 10 Federalists and 10 Democrats, then called Republicans. The 15 administration directors very foolishly succumbed to the appeals of the political backers of Mr. William Jones, who was then pro tempore Secretary of the Treasury, and elected him as the first president of the bank. Jones was a clever politician, but ignorant of banking principles, and, in the language of Mr. James C. Fisher, ran the bank upon "a perfect want of system." Mr. Jones believed in having plenty of money and new banks. Speculation in bank stocks became a mania from 1815 to 1818. One historian tells us that a bank was chartered wherever there was "a church, a blacksmith shop, and a tavern." It was not long before Mr. Jones was caught taking commissions on sales of the stock in the bank of which he was president. He resigned in 1819 and fled. An examination of the bank was ordered by Congress, but all attempts to repeal the charter were voted down by large majorities. The

friends of the bank were able to satisfy Congress that the straits to which it had been brought were entirely due to careless and dishonest management on the part of Jones and his directorate. In January, 1819, Mr. James C. Fisher became president pro tempore. He was soon succeeded by Mr. Langdon Cheves. During the latter part of Jones's administration the State banks became very jealous of the competition indicted by the United States Bank. The State banks generally refused to pay balances due the central bank. Illinois in her first constitution prohibited the existence of any but State banks within the State. Heavy taxes were laid by the States upon the branches of the United States Bank, and they would have been taxed out of existence, taking the central bank with them, had not the Supreme Court come to their rescue in the cases of McCullough against Maryland and Osborn against Bank of the United States.

Mr. Cheves, when he assumed the presidency, said that the bank was like "a ship without a rudder or mast on a stormy sea, and far from land, with short provisions and water." If Jones had remained in charge another month the bank would have collapsed and specie payments would have been suspended; but, to the great gratification of the friends of the bank, Mr. Cheves had it out of danger in two months, and in six months everything was safe and in regular order; but, unfortunately, Mr. Cheves was not a banker. It did not seem to occur to anybody that a banker should be placed in charge of the Bank of the United States.

Mr. Cheves was a politician, an ex-Speaker of the House of Representatives, but he was honest and positive and economical. He stopped dividends and cut down expenses and made insolvent debters surrender their stock. He compelled other banks to pay up their loans and made it so uncomfortable for nonconforming directors that many of them resigned. He prosecuted McCullough and Buchanan, of the Baltimore branch, for conspiracy and fraud. In January, 1821, the full capital of the bank had been restored and a dividend of 11 per cent was declared, Mr. Cheves unfortunately became enamored with long-time paper, gilt-edged real estate loans, and so forth, and took the stock of the bank as security for the loans. In the meantime the State banks were in a deplorable condition; repudiation and failure were on every hand. It became the fashion to lay all the evils of bad banking on the part of the State banks to the United States Bank, which was, of course, unjust.

Mr. Cheves quit in 1832, and Mr. Nicholas Biddle took his place. Biddle was but 37 years of age when he became president of the Second Bank of the United States. He was a graduate of Princeton College, a lawyer, and editor. He was appointed a director of the bank in 1819 by President Monroe, and he immediately went to work to master the principles of banking. Historians say that Biddle was able, tactful, and honest. He at once sought and secured the advice and support of such men as Daniel Webster, Robert Lennox, James Lloyd, R. L. Colt, Robert Oliver, and others. He was ambitious to have his bank meet every need of the growing commerce of the country, and his note circulation increased from \$4,400,000 in 1825 to \$9,600,000 in 1826. He invited and secured a large increase in deposits and discounts. At first he restricted discounts to prime short-time paper and rejected all loans on real estate and stock securities. The bank prospered and grew rapidly under his management. He exerted every effort to strengthen and increase the branch banks. In 1825 the possibilities of the steam engine in reducing the cost of transportation and production introduced an era of speculation, both in this country and England, never before equaled. In 1826 England suffered one of the severest panics in her history, which was followed by great suffering and loss. Mr. Biddle's bank, however, bore the strain without serious trouble. It certainly prevented a panic in this country, and at no time during this crisis was the discount rate raised above 6 per cent.

In 1826 the circulation of the bank had increased to nearly \$10,000,000, the deposits to \$6,142,000, the surplus had reached the tidy sum of \$1,500,000, and the dividends to stockholders were paid regularly at 7 per cent. The foreign exchanges returned a profit of \$60,000 a year. Mr. Catterall, in his history of the Second Bank of the United States, uses the following language in describing its services to the country during this period:

The period 1823-1828 was one both of conservative and of successful banking on the part of the Bank of the United States; the affairs of the institution were carefully managed; it extended its dealings considerably; it checked the tendencies of the State banks to do unsound business; it put an end to most of the depreciated State-bank currencies; it was fairly popular; its dealings with the Government were on the best footing; it gave the Nation a better currency than the country ever before had; and it had finally reached the point in public opinion where it was considered necessary for the uses both of the Government and of the people.

From 1828 to 1832 the growth of the bank was still more rapid. It was Biddle's ambition to control the entire inland exchanges of the country. The branch banks bought bills and sold drafts on other branch banks and on the State banks. South and Southwest proved to be the most fruitful fields for were \$2,500,000; in 1832 they were \$40,000,000 in the South alone; the total amount for the year 1831 was \$67,000,000. The notes outstanding were \$20,000,000.

It was at this time that Stephen Girard warned Mr. Biddle that he must increase his amount of specie and stop the renewal of credits on long-time paper. Mr. Biddle realized fully the difficulties under which the bank labored and tried to check the constant renewal of discounts, but he found his efforts in this line strongly opposed by those in charge of the branch banks. The State banks resented the competition of the United States Bank and were quick to arouse public opinion against it. Martin Van Buren, a Democrat and master politician of his time, had declared against the bank in 1826. He renewed his time, had declared against the bank in 1826. attacks in 1829, not on constitutional grounds, but because of its power to monopolize and control credits. In 1827 one of Mr. Monroe's friends in the House introduced a resolution ordering the sale of the stock held by the Government. This resolution was defeated by a vote of 174 to 9. In the Senate Mr. Benton began his attacks on the bank in 1828, but he had little or no following.

Andrew Jackson was elected President of the United States in 1828. No sooner was his election announced than some of his most active political friends accused Mr. Biddle of using his bank and its numerous branches throughout the country to defeat Jackson.

Amos Kendall, who was at that time one of President Jackson's closest political advisers; Isaac Hill, of New Hampshire; and Francis P. Blair, of Kentucky, who owed the bank more than he could pay, were among the first to raise the hue and cry against the bank as a monopoly and political machine of the Federalists. Hill and Senator Woodbury, of New Hamp-shire, asserted that Jeremiah Mason, president of the Portsmouth branch, was guilty of pernicious political activity against Jackson. Senator Woodbury wrote Biddle that Mason was a particular friend of Daniel Webster's, and that the friends of Gen. Jackson had just cause to complain of his political activities. It is claimed by some that President Jackson's determination to destroy the bank was formed as early as 1829 and for the purpose of revenge only. Whether this is true or not is quite immaterial to the point I wish to make. The charges against Mason were in a large measure groundless, but it is safe to conclude that politicians then, as now, were quick to take advantage of the popular dread of monopolies of any and every kind. Bearing in mind that the Bank of the United States was owned and controlled by private parties and empowered and allowed to compete with the State banks as a bank "discount and deposite," the wonder is that it was allowed to live out half its charter years.

President Jackson was not a banker; he was a patriot and a soldier-and he was a fighting soldier. The opposition to the bank was started by his friends-his political friends. political enemies came to its defense. Jackson stood by his friends; but I think it is clear that he would have spared the bank if its owners had not prematurely sought a renewal of its charter, thus defying the President and compelling him to take sides with the opposition. Mr. Biddle's ire was aroused by the insinuation that he had encouraged the managers of the branch banks to support Adams as against Jackson. Mr. Biddle was probably innocent of any such purpose; but in his anxiety to save the bank, once war against it had been declared, he made the grave mistake of asking for a renewal of the bank's charter four years before the date of its expiration. In 1829 the Secretary of War, with Jackson's approval, ordered the pension funds removed from the Portsmouth branch to a State branch in Concord, of which his friend Hill had been president. That same year Mr. Jackson's Secretary of the Treasury objected to paying the banks commissions for the transfer of Government funds abroad.

Andrew Jackson was not much of a letter writer, but Secretary Ingham and Mr. Biddle were experts, and the correspondence between these gentlemen in the summer of 1829 became so embittered that in November of that year Jackson did write a letter to Biddle, which no doubt accurately reveals Jackson's state of mind at that time. I quote from this letter

I feel very sensibly the services rendered by the bank at the last payment of the national debt and shall take an opportunity of declaring it publicly in my message to Congress. That is my own feeling to the bank and Mr. Ingham's also. He and you got into a difficulty thro' the foolishness, if I may use the term, of Mr. Hill. Observing he was a little embarrassed, I said, "Oh, that has all passed now." He said

with the parent board and myself (yourself?) he had ever(y) reason to be satisfied, that he had heard complaints, and then mentioned a case at Louisville, of which he promised to give me the particulars.

I said, "Well, I am very much gratified at this frank explanation. We shall be proud of any kind mention in the message, for we should feel like soldiers after an action commenced by their general." "Sir," said he, "It would be only an act of justice to mention it (1. e., the bank's service to the Government)." (November, 1829.)

It is very clear that at this date the bank was a minor incident in Jackson's victorious career, but with Amos Kendall, James W. Webb, Hill of New Hampshire, and many others the bank was a brutal monopoly, and its "taking off" was necessary to save the Republic. Webb was editor of the New York Courier and Inquirer, and its pages were used freely by the enemies of the bank. Legislatures all over the Union were memorialized to instruct their representatives in Congress to vote against the bank. All kinds of flat money and crazy banking and currency schemes were proposed as substitutes. Jackson was finally persuaded that the bank was unconstitutional. I quote now from a letter which he wrote to Biddle in November.

Mr. BIDDLE: I was very thankful to you for your plan of paying off the debt sent to Maj. Lewis. I thought it my duty to submit it to you. I would have no difficulty in recommending it (the bank) to Congress, but I think it right to be perfectly frank with you. I do not think that the power of Congress extends to charter a bank out of the 10-mile

square.

I do not dislike your bank any more than all banks, but ever since I read the history of the South Sea bubble I have been afraid of banks. I have read the opinion of John Marshall, who, I believe, was a great and pure mind, and could not agree with him, though if he had said that as it was necessary for the purposes of the National Government there ought to be a national bank, I should have been disposed to concur.

Somewhere I have read that the use of the capital letters "O. K." as indicating the approval of the person using them originated with Mr. Jackson in the following manner: It was Mr. Jackson's custom when he approved papers which were submitted to him to indorse them with the words "Oll kerrect," spelled as indicated. Mr. Jackson's friends suggested to him that in the interests of brevity the initials "O. K." would answer all purposes, and Mr. Jackson followed their advice. Anyone reading Mr. Jackson's correspondence will find no difficulty in believing that Mr. Jackson's "O. K." could have been secured for the new charter had he been handled right.

I have no fault to find with President Jackson's veto of the charter, but his failure to consent to and aid in the preparation and enactment of a sound and satisfactory substitute brought panic to the commerce of the country and want and ruin to a large percentage of the people. It was not a central bank that he was opposed to; it was Biddle's bank, a bank with powers and privileges which would not be thought of to-day and should not have been granted then. President Jackson in his first and second messages to Congress clearly indicated that it was Biddle's bank and not a central bank which he opposed.

And now I want to put into the RECORD Mr. Jackson's views with regard to a central bank, as expressed in his first and second messages to Congress:

PRESIDENT JACKSON'S FIRST MESSAGE, DECEMBER 8, 1829

The charter of the Bank of the United States expires in 1836, and its stockholders will most probably apply for a renewal of their privileges. In order to avoid the evils resulting from precipitancy in a measure involving interests, I feel that I can not, In justice to the parties Interested, too soon present it to the deliberate consideration of the Legislature and the people. Both the constitutionality and the expediency of the law creating this bank are well questioned by a large portion of our fellow citizens; and it must be admitted by all that it has failed in the great end of establishing a uniform and sound currency. Under these circumstances, if such an institution is deemed essential to the fiscal operations of the Government, I submit to the wisdom of the Legislature whether a national one, founded upon the credit of the Government and its revenues, might not be devised, which would avoid all constitutional difficulties, and at the same time secure all the advantages to the Government and country that were expected to result from the present bank.

PRESIDENT JACKSON'S SECOND MESSAGE, DECEMBER 7, 1830.

PRESIDENT JACKSON'S SECOND MESSAGE, DECEMBER 7, 1830.

PRESIDENT JACKSON'S SECOND MESSAGE, DECEMBER 7, 1830.

The importance of the principles in the inquiry whether it will be proper to recharter the Bank of the United States, requires that I should again call the attention of Congress to the subject. Nothing has occurred to lessen in any degree the dangers which many of our citizens apprehend from that institution as at present organized. In the spirit of improvement and compromise, which distinguishes our country and its institutions, it becomes us to inquire whether it be not possible to secure the advantages afforded by the present bank, through the agency of a Bank of the United States, so modified in its principles and structure as to obviate constitutional and other objections.

It is thought practicable to organize a bank, with the necessary officers, as a branch of the Treasury Department, based on the public and individual deposits, without power to make loans or purchase property, which shall remit the funds of the Government, and the expense of which may be paid, if thought advisable, by allowing its officers to sell bills of exchange to private individuals at a moderate premium. Not being a corporate body, having no stockholders, debtors, or property, and but few officers, it would not be obnoxious to the constitutional objections which are urged against the present bank; and having no means to operate on the hopes, fears, or interests of large masses of the community, it would be shorn of the Influence which makes that bank formidable. The States would be strengthened

by having in their hands the means of furnishing the local paper currency through their own banks, while the Bank of the United States, though issuing no paper, would check the issues of the State banks, by taking their notes in deposit and for exchange only so long as they continue to be redeemed with specie. In times of public emergency the capacity of such an institution might be enlarged by legislative provisions.

These suggestions are made, not so much as a recommendation as with a view of calling the attention of Congress to the possible modifications of a system which can not continue to exist in its present form without occasional collisions with the local authorities and perpetual apprehensions and discontent on the part of the States and the people.

As early as 1832, when the contest was at its height. Mr.

As early as 1832, when the contest was at its height, Mr. Biddle, always ready to compromise and go more than half way to save the bank, persuaded Edward Livingston to intercede with Mr. Jackson, and, if possible, get from him suggestions as to the kind of a central bank he, Mr. Jackson, would approve. This interview took place on the 22d of February, 1832, and Mr. Livingston noted down President Jackson's views, as follows: as follows:

as follows:

1. No Government interest in the bank.
2. Appointment of one or more directors at the branches.
3. Government represented there.
4. Taxation by States of property of bank; i. e., property in bank, whether real or personal, to be liable to same rule of taxation of State as their own property.
5. No real estate except such as b'ot in to secure debts, and to be sold in reasonable time.
6. Government to have no interest in bank.
7. Certain proportion of capital thrown open for new subscription, which may be done by pro rata deduction from present capital.
8. Directors to nominate two or three friends; of them, President of the United States to choose one a president.
Written 22d February, in Mr. Livingston's house and presence; read to and sanctioned by him.

C. L. Ingersoll.

C. L. INGERSOLL.

Many books have been written about the bank war and Jackson's glorious victory over the hydra-headed monster, but the facts leave no doubt that the bank war was a mere political scrabble without the least significance or binding force upon any party. On the contrary, this great political fuss proved, if it proved anything, that the leaders in it knew but little and cared less about banking and currency systems or principles. The superstition against a central bank was born and reared in ignorance, and the ablest man on the subcommittee which had the Democratic currency plank in charge in the last Democratic convention must have been surprised when he was told cratic convention must have been surprised when he was told less than a month ago that by accident or design the letter "f" had been added to the disjunctive "or," so that the pledge of the party in the campaign textbook read, "We are opposed to the Aldrich plan 'for' a central bank," whereas in the original draft, as approved by Mr. Bryan, it read, "We are opposed to the Aldrich plan 'or' a central bank." But in neither announcement of Depresenties represented the properties are provided by the surprise of the plan to the surprise of the plan to the surprise of the plan to the surprise of the surpr ment of Democratic principles do we find any indication that the learned draftsman or draftsmen knew that there ever had been or could be more than one kind of a central bank; and while the bank that Jackson opposed might, and perhaps did, aid monopoly of credit and help destroy competition, Jackson himself approved a central bank that would have for its principal object the encouragement of competition among credit merchants and the prevention of credit monopoly and money and depositors' panics.

My desire to secure for this country a banking system which has stood the test of experience in every civilized nation, a system approved and eagerly preferred by all the leading economists of this and other countries, is so intense that I can take but little interest in second-best schemes and still less in third

and fourth class systems.

I believe that a central bank, with its great power, controlled by a directorate which will stand before the people as a supreme court of finance, absolutely independent of all political and selfish alliances, is to be preferred to a conglomeration of banks controlled by selfish interests. I want this new bank to stand as a sort of lighthouse that will keep revealed always to the banks, the Government, and the people the rocks and shoals of bad banking and inflation. And for this reason I think that one all-powerful light that can search the continent from one end to the other will be more effective than any number of lan-

terns operated by private individuals.

There is not a detail necessary to the framework of a national banking system which will not conform with greater ease, harmony, and economy to a central bank than a regional bank The task of putting more than one useful hub into a single wheel is for politicians; the mechanic knows it is impossible. The argument that the vast territory of the United States requires a large number of reserve banks has no force whatever in my opinion. The first thing to be prevented in any banking system is a money panic. There must be no fear on the part of the people that the token money in daily use will not be convertible into gold upon demand. Certainly a central bank, with

its enormous resources and powers, would have a great advantage in this regard over a large number of banks each issuing its own notes.

The next thing to be guarded against is a depositors' panic. It would certainly be unwise, if not illegal and immoral, for the Government to guarantee the deposits in insolvent banks, but if a central bank were created, allowing stockholders a limited dividend only, the remaining profits to be paid into the Treasury of the United States, a small percentage of this money received from the banks might be set aside as a security fund against losses by depositors without serious offense to principle. In any event, some means for preventing depositors' panics can and should be devised. The run on the Knickerbocker Trust Co. !n New York in 1907 added fuel to the flame of panic and caused mental anguish and money loss which might well have been avoided. With the danger of money and depositors' panics reduced to a minimum, a degree of confidence and safety would at once be assured that would entirely eliminate the element of distance. For the making of contracts, the transaction of business, and the granting and transfer of credits, North America is not as large to-day as was the State of Delaware when the Second Bank of the United States was created,

Sections of the country requiring currency for crop move-ments will prepare for this emergency without difficulty if confidence is maintained, and it is the belief of those best informed that with a central bank where the cash resources of the country may be safely mobilized and always ready to answer the needs of any particular section, token money in addition to the store already in the country will not be needed for many years to come. If it is true that the daily exchanges exceed \$1,000,000,000, it is also true that 95 per cent of these exchanges are made with checks, and the use of checks is constantly increasing because experience has demonstrated that it is a much safer and more satisfactory way to pay debts than by paper money payable to the bearer. It is easy to see that half the cash now in this the bearer. It is easy to see that half the cash now in this country, if kept busy, as it will be if allowed to flow freely to and from a central reservoir, will be more than sufficient to answer all the needs of pay rolls, crop movements, and transportation charges.

Under the bill as it passed the House 12 or more banks, controlled by the bankers and owned by the bankers would in my opinion bring but little if any improvement over the present system. If an attempt to locate these banks did not bring on civil war owing to local jealousies and political complications, all sorts of sectional rivalries and political deals would be possible. The regional banks will, to be sure, be nominally under the supervision of a central board of control, but if the immediate banking operations are left to the bankers and we ever have periods of depression, almost anything may happen, ever have periods of depression, almost anything may happen, and we will have periods of depression. It was the late Thomas B. Reed who said, "The alternations of good and bad times antedate the pyramids," and he might truthfully have added "Will postdate the pyramids." All that any banking system can do or ought to try to do is to protect and facilitate the exchange of credits where credits are sound; honestly conducted banks for honest men, the Government may encourage and protect to the full extent of its legislative powers, but the gambling instinct is strong in the human race, and it will continue to be strong for many years after the present administra-tion has gone into history. The desire to reap where we have not sown will bring periods of high speculative prices, which, when they come to a certain pitch, must go the other way, and the unwary will be caught in the downward trend and suffer losses. No banking system can prevent this, and any attempt to protect gamblers or gamblers' banks will only breed more of the same sort. Whether it is true or not I do not know, but there is a deep-seated feeling that the banks controlling great aggregations of capital and credits have at times combined to control the price of credits and by alternating processes of restriction and inflation have extorted large profits from those who have been at their mercy.

It is also said that men seeking legitimate credit for legitimate enterprises have been refused assistance by the banks, because the proposed industry might compete seriously with established concerns whose owners controlled the banks. It is also said that money is drawn by the banks from all parts of the country and centered in Wall Street to be used in speculation commanding high rates of interest, and the effect of this is to raise the rate over the entire country, if not shut out many legitimate needs.

As I have before remarked, I do not know whether this is true or not, but no one will say that this is impossible, and I want Congress, now that it has this all-important matter in hand, to do all that can be done safely to keep the bad bankers

from contaminating the good bankers. If the bankers control these regional banks, it will be easier for them to connive with the member banks, or at least it will be more difficult to detect and publish such connivance. With a central bank controlled by men of the highest standing, with no banking connections whatever, men who will be looked upon as the trusted agents of the people, always subject to public criticism and investigation, honest bankers and credit merchants would have nothing to fear and the public will have much less to fear than under the system proposed by the Administration. There is great force in the contention that if the bankers subscribe the capital for a central bank, or regional banks, they should have a right to control their own property, but where the stock is subscribed by the public this argument would lose its force, and a single central bank controlled by nine of the best men of the country, appointed by the President with the consent of the Senate, it is my belief that the greatest confidence would exist in the minds of the bankers as well as in the minds of the people. This kind of a central single bank has been tried and found worthy by all the civilized nations. It promises results sound in theory and safe in operation, the kind of a bank which history tells us Andrew Jackson himself would have approved, and which, had it been created in 1836, would probably be in existence to-day. Its great resources would command the confidence of the world; its restraining and protecting in-fluence over the commercial and banking operations of the country would be sound and impartial. It seems to me to be weak, if not cowardly, for us at this time to abandon and lay aside an opportunity which may never come to us again.

It is urged by the opponents of a central bank that the people

do not want it and the people will never stand for it. Mr. President, the people want the best, and we ought to try, at least, to give them the best. The people are densely ignorant of the technique of banking and currency. When this bill passed the House I doubt if there were 10 men in that body who could have described the different kinds of money now in use in the United States or have told which kinds were legal tender. have no fear that my constituents want anything but the best, and I am sure they expect me to find out the best, if I have the wit to do it, and then work and vote for it. And I repeat, it is sincere regret to me that the best can not be considered at this juncture, because of objections known to the Baltimore convention and unknown to history or experience. But if the best can not be had. I sincerely hope that the nearest possible thing to the best will be permitted, which is a system of four banks, controlled by the Government, the stock owned by the people. A greater number means a weaker and less satisfactory system; less certain of wise management, more certain of domination by untoward influences; more expensive, less responsive.

However, in order to secure the support of the committee to a reasonably safe second choice, I consented to a provision which would permit an increase of the number of regional banks to 12, if in two years the central board of control found them to be necessary. I was willing to give President Wilson 12 banks if the central board appointed by him found them necessary after two years of observation and experiment; and, sir, the committee, by a vote of two to one, approved this solution of the problem. It was a tentative vote, but I believe it expressed the convictions of the committee. But on the day following this vote it was asserted that the President would not stand for less than eight banks, and so, reluctantly, I believe, two votes in the committee were changed and the committee was deadlocked. It is only fair and just to accord to every member of that committee the purest motives. I do not say that any man on the committee voted against his convictions, for men change their convictions, and have a right to; but it was a matter of deep regret to me when I learned that a system of not less than eight banks, owned and controlled by the bankers, was to be jammed through the Senate. When you extend this system beyond four banks-one in New York, one in Chicago, one in St. Louis, and one in San Francisco-you invite conditions and embarrassments without number, which will greatly endanger the success of the system, however safe it may seem to be at

There are many important details upon which I will not such at this time. The amount of reserves to be kept, the chartouch at this time. acter of the paper eligible for rediscount, the limit upon such rediscount, the limit upon note issue and their character when issued, the safety of depositors and the rights of regional banks to purchase paper in the open market, the methods of maintaining gold reserves and the retirement of the 2 per cent bonds, the gradual substitution of one kind of bank note for the many now in vogue, the issuance of short-time exchequer notes in exchange for gold—all these questions could have been determined with practical unanimity had not the flat come from some source that eight banks at least, to be owned by the bankers, must be agreed to or it would do unto us even as it was done

Mr. President, there is another item in this controversy which has been liberally urged upon the attention of the Senate, and which is quite as formless and void as is the superstition against a central bank. I refer to the oft-repeated declaration made by Senators upon the other side of this Chamber that the people look upon the pending bill as one of vital necessity to their well-being and are therefore demanding immediate action

by Congress.

First, I want to give my own testimony to the fact that I have received a great many urgent appeals for delay and the exercise of caution in this matter, but I do not remember that I have received a single request, oral or written, in favor of any one of the pending schemes or urging haste in their enactment, Since I have been in the Senate I have noted no measure of importance which has met with such an absolute lack of popular concern as the pending banking and currency legislation. this subject threw open its doors and extended a hearty welcome to every man in the United States who might be interested come to every man in the United States who might be interested to appear and state his views, and yet the committee was compelled to invite, if not urge, the attendance of the handful of men whose testimony it finally secured. There were, perhaps, a few economists and bankers who volunteered their services to the committee, but the people, the general public and the public in general, took no more interest in the hearings than if they had related to the canals in Mars. The economists and bankers and Congressmen especially interested in this subject have discussed for years the needed reform in our banking system in just one particular—that is, the need of a central reservoir, where a portion of the reserves could be kept for emergenciesand had such a reservoir been created, as it easily could have been, our present banking system would have remained unchallenged as the best in the world.

The origin of the present haste to revolutionize the banking system of the country is purely political. There is not one man in ten thousand who cares anything about the subject except to have the right thing done when anything is done. not one man in ten thousand who knows anything about the principles or detail of banking, and his ignorance in this regard is as natural and excusable as his ignorance of the Chinese language. If I am not mistaken, the alleged popular demand and need for this bill, as well as the oft-repeated prophecies and promises of its beneficient effects when enacted, are born of wishes, earnest, deep, and laudable, but purely political in their nature and of very doubtful fulfillment.

The Underwood bill is to furnish the motive power for half the voyage; the Glass-Owen bill is to "waft" us the rest of the way. This is the promise of the Democratic Party and its captain and pilot, and yet we have not gone far enough to hide from view the shores of the dear old Republican harbor, where all was peace and prosperity, when we must fain send up rockets of distress and work the wireless overtime on the "S. O. S." What is it that threatens to send us all to "Davy Jones's locker" before we are out of sight of our old moorings? Tens of thousands of men already thrown out of employment and other tens of thousands working on short time. The steel industry-the great barometer of coming events, the one industry which it has been confidently asserted could stand against the world—is moribund; idle cars and idle factories constantly and rapidly increasing; all the signs pointing but to one thing—hard and still harder times.

The tariff-for-revenue-only wit-sharpening device, instead of propelling the old ship, has done the only thing it has ever or can ever do. It has blown a gigantic hole through the bottom, and the captain says he must have 8 regional banks at least-12 would be better—owned by the bankers, with which to plug up the hole and do the "wafting," or the bottom of the sea will be our next landing. If the captain thinks third-rate banks will stop the leak better than first-rate ones, he will, of course, get them, and I devoutly pray that they will perform the service he anticipates; but, living as I do in an age when miracles are rare, and patriotic, scholastic, eloquent, and well-meaning, but false, political prophets are very plentiful. I shall await results with some concern. I sincerely hope the new banks will keep us affoat until repairs can be made. As I have said, time is the only instrumentality that will test prophecy, and I fully realize now that the sooner free opportunity is given for the test the better. I do not believe that men can buy and pay without money, and I do not believe that men can sell at a loss and have money to pay with very long. I do not believe that the fiscal policy which denies and defies the first law of life will work, and so I am very confident that history will soon repeat itself in American politics.

Mr. WEEKS. Mr. President, when the Senate convened tonight, the point was made that no quorum was present. I think 51 Senators responded to their names on the call of the roll. At 8.30 there were 15 Democrats on the floor of the Senate and 16 Republicans; at 8.40 there were 12 Democrats on the floor and 17 Republicans; at 8.50 there were 12 Democrats on the floor and 18 Republicans; at 9 o'clock there were 13 Democrats on the floor and 17 Republicans; at 9.10 o'clock there were 14 Democrats on the floor and 13 Republicans; and at 9.20 there were 23 Democrats on the floor and 17 Republicans. There has not been a quorum present since the Senate convened to-night; there is not a quorum present now, and I make the point of no quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators an-

swered to their names:

Simmons Smith, Md. Smith, S. C. Ashurst Bacon Bankhead Gallinger Gore Gronna Hitchcock Martine, N. J. Martine, N Myers Newlands Norris O'Gorman Owen Page Pomerene Ransdell Smith, S. Smoot Sterling Stone Swanson Thomas Borah Brady Brandegee Bristow Hollis Jackson James Johnson Jones Bryan Burton Thornton Townsend Vardaman Kenyon Kern Lane Lea Lewis McLean Martin, Va. Chilton Clapp Clark, Wyo. Clarke, Ark. Reed Robinson Walsh Warren Weeks Williams Saulsbury Shafroth Sheppard Colt Crawford Cummins Sherman Shively

Mr. LEWIS. I desire to announce that the absence of the Senator from South Carolina [Mr. Tillman] is caused by illness.

Mr. JAMES. My colleague [Mr. Bradley] is unavoidably absent. He has a general pair with the junior Senator from Indiana [Mr. KERN].

I desire to announce that the senior Senator Mr. SMOOT. from North Dakota [Mr. McCumber] is unavoidably detained from the Senate.

The VICE PRESIDENT. Sixty-three Senators have answered

to the roll call. There is a quorum present.

Mr. OWEN. Mr. President, during the last 10 days Senators on the opposite side of the aisle have frequently made it a matter of entertainment to be making the point of no quorum for the obvious purpose of delaying and wasting time. It is perfectly well known to every Senator who has made the point of no quorum that the Members of this body are in the cloakroom or in the immediate vicinity if they are not on the floor. lieve it has only occurred once, or perhaps twice, that it took some minutes to obtain a quorum. The country might as well observe what the meaning of this is, and I wish to call the attention of the country to the attitude of Senators who are wasting the time of this body.

Mr. BRISTOW. Mr. President—

The VICE PRESIDENT. Does the Senator from Oklahoma

yield to the Senator from Kansas?

Mr. OWEN. I decline to be interrupted, Mr. President.

Mr. BRISTOW. I thought the Senator would in making such

remarks as those. Mr. OWEN. Yes; I do; especially by the Senator from Kansas, whose lack of self-restraint has been so obvious.

The Congress of the United States has a vast work to perform. This currency bill is only a part of it; the tariff bill was only a part of it. Under the head of currency matters we have still many other things which are necessary to be done by Congress. We should have a codification of the national bank acts; we should have laws passed controlling the abuses, the outrages, of the various stock exchanges, of the exchanges that gamble with food products, with agricultural products, and help to fix

high prices upon this country. We should pass laws that are necessary to control the abuses of the clearing houses.

We should pass laws prohibiting interlocking directorates, which control banking systems and trust companies and great industrial companies and railways, linked together on a gigantic scale and thus making effective private monopoly. ought to pass laws establishing an agricultural credit system in this country, a matter of the most serious importance in promoting the food products of this Nation and in promoting the production of the raw materials which come out of the soil. We ought to pass the necessary measures which will control the abuses of private monopoly in this country, and yet day after day is wasted by idle talk upon the floor of the Senate and by day is wasted by idle talk upon the hoor of the senate and by call after call for a quorum, when it is perfectly well known that a quorum will immediately respond to the roll call. We ought to pass laws solving the problem of the high cost of living, which is making the ordinary citizen of this country tremble under the load he carries.

Mr. GALLINGER. We thought the tariff was going to do that.

Mr. OWEN. We ought to pass laws providing for good roads in this country; we ought to pass laws providing for the development of our national waterways. I have some other things to present which this Congress ought to consider and act on, and I propose to place them in the RECORD now for the information of the country—not for the information of the Senate, for the Senate knows perfectly well what they are. We ought to pass a law establishing an independent bureau of public health to protect the public health of this country, which now is simply under the jurisdiction of a branch of the Treasury Department, relatively obscure, smothered, ineffective, although not without much value. We ought to pass laws protecting child labor in this country; we ought to pass a proper employees' insurance system; we ought to pass proper laws for the compensation of workmen; we ought to pass laws establishing proper safety appliances and steel cars on the railway systems of the country; we ought to pass a law for the "probation of convicts" for the benefit of young men who are convicted for the first time, young men who are sent to their ruin by the cruel hand of society, because they make a single mistake.

Year after year I have tried to secure the passage of such a bill through the Senate, and have made no progress. We ought to have cold-storage legislation; we ought to have legislation to bring about pure fabrics and honest measures of goods that are sold to our people; we ought to have a better system for the proper control of railway rates; we ought to have a better system for the control of the issue of stock and bonds, so that the people of this country may not be unfairly taxed by the issue of fraudulent watered securities; we ought to establish vocational education in this country, so as to teach the boys and girls, the young men and women, of this country how to make a

living.

How shall we ever consider these things when day after day is used up in idle debate, without any economy whatever of the time of the Senate? That is the reason why these seats of Senators are vacated. It is because Senators who have made up their minds, have studied the question, do not want to stay a whole week listening to a debate which no longer instructs or interests. That is evidently the reason why Senators vacate their seats-because the debate on the floor of the Senate has become a farce.

We ought to establish postal telegraphs and postal telephones cheap and at the convenient service of the people instead of a

monopoly controlled by a few men unfairly taxing the people and giving them indifferent and poor service.

The Government of the United States ought to own plants for making its own armor plate, for making its own powder, for making its own guns and materials of war, and for building its own battleships. We have not time even to discuss such questions, but have spent about 10 hours during the last week debating a motion to meet at 10 o'clock in the morning.

We ought to have proper legislation to build up the merchant marine of the American Nation. Our flag is practically never seen in foreign ports, and hardly ever seen in our own ports. We ought to take steps, through the Legislature of this Nation, in the House of Representatives and in the Senate, to promote, bring about, and establish universal peace, which we could do if we spent the same amount of money and energy in promoting peace that we do in building navies and in supporting armies.

Nevertheless, until we have a better condition, we ought to have time to consider the naval program and the development

of our military forces.

We ought to have time to discuss on the floor of the Senate the right of the women of this country to the equal privilege of life, liberty, and the pursuit of happiness. This question affects the right of 45,000,000 Americans. Yet we talk from noon till 10 or 11 o'clock at night on Hetch Hetchy, a serious waste of time, because two or three days would be sufficient for the Frisco water supply.

We ought to have an opportunity to discuss upon the floor licentiousness in the public press, which under present conditions is able to give publicity broadcast and wholesale and continuously to things that are untrue and against the public in-terest. The fountains of information for the people are fre-quently poisoned by reckless publications that ought to be guided by law along the lines of decency and moderation, at the same time that full liberty of the press is preserved. We have

not time to debate such questions, but can discuss questions of order at length.

We shall have to pass in the Senate a thousand million dollars of appropriations, and the time will come in the Senate when in a few hours you will see rushed through this body appropriation bills carrying \$100,000,000 with very little analytical discussion. We never have had time even to pass on the question of a budget or to take the necessary steps to adequately provide for the adequate economy and efficiency of the Government.

We have had volumes of reports on economy and efficiency. I have tried to read them. I have read them in part. I doubt if many Senators on the floor have had time to read these reports, which have cost this Nation thousands and thousands of Yet the recommendations there would seem to be of great value in promoting both economy and efficiency of gov-

We ought to have a national progressive inheritance tax as a part of the fiscal system, as every country in Europe has,

because no State can make it effective.

We ought to have the "gateway amendment" passed by which to make comparatively easy the amendment of the Constitution of the United States by the people, because whenever you come into a condition where a vested wrong is established you will find always that the Constitution is urged to prevent a remedy for the people. We could not pass an income tax because the Constitution forbade it, according to the interpretation of a divided court.

We ought to pass an act providing for a presidential primary

for the nomination and election of Presidents.

We ought to have an act passed that will establish the improvement of judicial processes in this country, by which the people may obtain quick justice and cheap justice.

We ought to have laws improving the conditions of labor.

We ought to have a legislative reference bureau and drafting division for the Senate and for the Congress. It is on the calendar. Every time it is brought up objection is made to its consideration.

We ought to have the systematic development of our water

powers and laws passed to encourage and direct them.

We ought to have laws passed for the proper conservation and use of our national forests and of our national minerals, laws that will enable the living generation to enjoy them, to use them, and to conserve them,

We ought to have our patent laws perfected.

There are innumerable questions affecting the welfare of this Nation, in the way of social and industrial reforms, which ought to be considered by the Senate. The time of the Senate ought not to be wasted, and I want to put in the RECORD my protest against it.

I do not make these observations because of the banking and currency bill. The banking and currency bill is only one of the

many things which ought to be passed by the Congress.

The reforms have been pledged or suggested in various platforms, not only Democratic platforms but other platforms, representing large groups of people.

I have in my hand a splendid statement of the various needed social and industrial reforms, which was put into the platform of the Progressive Party of the Nation, a party which registered 4,000,000 votes.

It proposes the conservation of human resources through enlightened measures of social and industrial justice.

It proposes effective legislation, looking to:

The prevention of industrial accidents; Occupational diseases, overwork;

Involuntary unemployment and other injurious effects inci-

dent to modern industry;

The fixing of minimum safety and health standards for the various occupations, and the exercise of the public authority of State and Nation, including the Federal control over interstate commerce and the taxing power, to maintain such standards;

The prohibition of child labor; Minimum wage standards for working women, to provide a "living scale" in all industrial occupations;

The prohibition of night work for women and the establishment of an eight-hour day for women and young persons;

One day's rest in seven for all wageworkers; The 8-hour day in continuous 24-hour industries;

The abolition of the convict contract-labor system, substituting a system of prison production for governmental consumption only, and the application of prisoners' earnings to the support of their dependent families;

Publicity as to wages, hours, and conditions of labor; full reports upon industrial accidents and diseases; and the opening to public inspection of all tallies, weights, measures, and check

systems on labor products;

Standards of compensation for death by industrial accident and injury and trade diseases, which will transfer the burden of lost earnings from the families of working people to the industry, and thus to the community;

The protection of home life against the hazards of sickness, irregular employment, and old age, through the adoption of a system of social insurance adapted to American use;

The development of the creative labor power of America by lifting the last load of illiteracy from American youth and establishing continuous schools for industrial education under public control and encouraging agricultural education and demonstration in rural schools;

The establishment of industrial research laboratories to put the methods and discoveries of science at the service of Amer-

ican producers.

These are some of the social and industrial reforms which ought to be considered, which ought to be provided for, as far as the Federal Government can do so or promote them. want to protest again against the waste of time in the United States Senate. The time has come for cloture in the Senate of the United States. The time has come when Senators who want to address the Senate upon a subject shall be given a reasonable time within which to do it, and then yield the floor to other Senators.

Mr. KERN. Mr. President, the Senator from Massachusetts has seen fit to place in the RECORD the precise number of Senators present on either side of the Chamber at certain intervals named by him. I do not know why he desired thus to reflect upon the drawing powers of the distinguished Senator from Connecticut [Mr. McLean] by emphasizing the proposition that Members of the Senate declined to listen to his very able ad-

While the RECORD is being arranged by Senators on the other side, showing the number of Senators present at stated intervals, it would be well enough to let the RECORD also show that immediately upon the call for a quorum, without any delay at all, 39 Democratic Senators answered to their names, and 2 have since entered the Chamber, making a total of 41 Democratic Senators present out of a possible 50, 2 being sick, leaving 7 Democratic Senators not present and unaccounted for. It might be well for the RECORD also to show in this connection that out of a possible 45 Senators on the Republican side, there were 24 who answered the roll call, leaving 21 unaccounted for, except that 1 on that side is sick, leaving 20 unaccounted for.

So, if the purpose of the Senator on the other side was to

show that the Democratic Senators were not paying attention to their duty, while the Republican Senators were vigilant in that regard, it seems to me he has utterly failed in his purpose.

Mr. GALLINGER. Mr. President, this is, I think, the third

tirade we have listened to in the last two weeks from the Senator from Oklahoma. I confess it is getting a trifle tedious, because if there is any one Senator who wastes the time of the Senate without either rhyme or reason it is the Senator from Oklahoma when he reads a lecture to the Senate on what he

considers the duty of Senators.

What a paradise this Nation would be, and possibly the world, if the membership of both Houses of Congress should abdicate and let the Senator from Oklahoma transact the business of the country! What a program he has laid out for us to-night, consisting of every conceivable wildcat theory in legislation that has been suggested by any man during the last 20 Yet the Senator stands here and seriously says he is informing the country as to the dereliction on the part of the Republicans in the matter of legislation.

He finds fault because a quorum is called for from time to time. The rules of the Senate give any Senator that privilege. I have stood at my desk for days and days, advocating what I conceived to be important measures, when the roll was called regularly once in five minutes at the request of Members on the other side of this Chamber. We did not find fault. It was their privilege to do it if they chose. I sat at my desk and listened to the Senator from Oklahoma occupying, I think, eight hours in the closing sessions of Congress defeating legislation by conducting a filibuster that was not justified under the circumstances.

Yet the Senator from Oklahoma says these things for the purpose of "acquainting the country"—he cares nothing about the Senate, he says—with the terrible things that are being committed by the Republicans of this body in the matter of requiring a decent attendance upon the sessions of the Senate.

Mr. President, we have been compelled by the majority to come here at 10 o'clock in the morning and remain until 11 o'clock in the evening. There is no reason for it. There is no justification for it. I say that under such circumstances it is not only our right but our duty to see that the business of the Senate is conducted with a quorum of the Senators in their seats.

The Senator from Oklahoma calls attention to the fact that after a little while appropriation bills will be here appropriating a thousand million dollars to carry on the work of this great country of ours. The Senator from Oklahoma and I are both members of the Committee on Appropriations. If the only opportunity I had to become acquainted with the Senator from Oklahoma were in the room of the Committee on Appropriations, I should not have been able to recognize him to-night, [Laughter.]

I think it is time to stop this ill-natured discussion as to the duty of Senators and our rights under the rules of the Senate. We were kept here under the whip and lash and told that we must pass a tariff bill in a certain length of time. We passed the tariff bill in less time than any tariff bill has been passed during my 20 years' service in this body. We did it because it was demanded of us by the majority in this body and by the President of the United States. We were promised that if we passed that law great relief would come to the people of the United States, that the high cost of living would be reduced, and that happiness would pervade every American home. As I said the other day, one Democratic Senator stood in his place and solemnly said that the passage of that bill would lift a burden of \$400,000,000 from the shoulders of the American

What has been the result? Every intelligent man knows that the passage of that law did not remove the burdens from the American people. Every man knows that the high cost of living has not been reduced, but that it has steadily increased since that time. Every man who goes to the trouble to acquaint him-self with industrial conditions in this country to-day knows that there is great industrial disturbance, great want of employment, and great misery among a large class of our people.

Only two days ago a gentleman conducting one of the largest businesses in this country—I think employing 13,000 men—stated in this city that he had had in a single day 6,000 applications for employment, and that the average was 3,000 per

I picked up a paper only to-day, the Evening Star, of Philadelphia, and found in it an article to which I wish to call attention. For the purpose of showing how this glorious tariff law which was going to give such relief to the American people is working, I propose to read a little editorial from that paper:

The people of Phoenixville, which is close to this city-

That is, close to Philadelphia-

have an excellent chance to observe the workings of the new tariff.

They find that there are at least 3,000 persons who live there who are at present out of employment, and the entire population of the town is but 10,000.

This makes the prospect for Christmas the drearlest which Phoenix-ville has had since the time when the former Democratic tariff was enacted.

Congressmen of the Democratic

rins makes the prospect for Christmas the dreariest which Phoenix-ville has had since the time when the former Democratic tariff was enacted.

Congressmen of the Democratic persuasion may talk in high-sounding phrases, they may promise a lower cost of living while prices continue to soar, they may prate of what they are going to do for the country and for its people, but the people of Phoenixville know what they have already done for them, and the 3,000 who are out of work have excellent reason for being dissatisfied with it.

Charles M. Schwab and other business men have foretold what would happen under this tariff. There can be no excuse made that the Democrats were not warned before they acted. They were told again and again, but they went right ahead with their legislation with a supreme indifference to what was being said. In fact, they laughed and jeered at those who told them they were legislating against the well-being and the prosperity of the country.

The day is at hand when we are about to have that proof of the pudding which consists of the eating. Unfortunately it is by no means the kind of a Christmas pudding which we may relish. On the contrary, it is found to be anything but inviting, and there are thousands who now know from bitter experience the truth of the discussions which were had at such length, pro and con, concerning the tariff.

So long as old orders remained to be filled the workmen of Phoenix-ville continued employed. But the time came when the old orders were all gotten out. New orders did not come in. Work slacked down, gradually at first, but later on faster. There was nothing for the men to do in the mills, and as a consequence men had to be laid off. At first only small numbers, but later, more. The condition in that small and formerly prosperous, happy, and bustling city speaks for itself. It will not do for any Democratic orator to go there to try and convince the formerly contented and happy workmen that this is a merry Christmas.

Mr. President, that was the panacea which was going to cure all the ills of the body politic, the passage of the new tariff law. It has not worked as our Democratic friends prophesied.

We have now a currency bill before us for consideration. Heaven's sake, Mr. President, is not that of sufficient consequence to engage the attention of the Senate for a reasonable length of time? But the Senator from Oklahoma wants to rush it through this body at lightning speed. I presume if the Senator had his way he would make his speech and then the argument would be closed and the vote would be taken. But we are not going to legislate that way this year. We are going to have a fair, considerate, and intelligent discussion of this question, and when the vote comes it will be after reasonable and intelligent debate.

Of course, those of us on this side of the Chamber know that that discussion is in one sense futile. We understand that a Democratic caucus has decreed that the bill which the Senator from Oklahoma stands sponsor for is to become the law of the

land. But that does not warrant us, Mr. President, in remaining silent and permitting the Senator from Oklahoma to do the legislation for the country, which we are all sworn to do our best to conserve.

So I say, Mr. President, that I regret the Senator from Oklahoma has for a third time taken occasion to read a lecture to the Senate, and especially to the Republican side of the Senate. The Senator from Oklahoma has not presented this matter fairly, so far as the calling of the roll is concerned. A few days ago the Senator from Oklahoma caused to be put in the RECORD the fact that when the roll call was demanded there were 56 Senators present, when there were only 8 Senators present when the roll call was demanded. I used some language then, Mr. President, in response to the Senator from Oklahoma, which at his suggestion has been stricken from the RECORD, but I am tempted to repeat it in view of what the Senator from Oklahoma has said to the Senate.

Mr. President, I see no reason why we should not be goodnatured. I see no reason why we should not attribute to each other honest motives and intelligent purposes. I see no reason why the legislation of this session may not proceed in an orderly and proper way. If we are to sit here from 10 o'clock in the morning until 11 o'clock at night, to the injury of the health of every one of us, let us at least conduct ourselves like gentlemen and give to each Senator the same praise for industry and

for the performance of his duties that we claim for ourselves.

But, Mr. President, I desire to put on record the fact that I will not sit in my seat, commanded to be here by the majority of this body at unreasonable hours, and permit any Senator to make a speech when eight Senators are in the Chamber and the others are enjoying themselves in the cloakrooms or in their committee rooms, smoking their cigars and telling of the triumphs of their political lives.

Mr. President, let the work go on. Let the legislation proceed. Let us continue to consider this bill as it has been considered. I can not recall a single speech that has not been an instructive one, and I am waiting, Mr. President, with eager expectancy, with buoyant anticipation, to hear the Senator from Oklahoma, when he will solve all the problems that confront us to-day and lead us along a path that will bring to us all hap-

piness and contentment and prosperity.

Mr. OWEN. Mr. President, I will solve only one problem at a time. The first problem I will solve is the problem proposed by the Senator from New Hampshire in repeating in substance what he put in the Record a few days ago. He put the following language in the Record. On page 167 of the Record the Senator said:

I am unwilling that any Senator should impeach the integrity of other Senators—and if it were not that a rule stands in the way, I should use more emphatic language than I propose to do—by sending out to the country the statement that when I made the point of no quorum there were 56 Senators present in the Chamber. It was not true.

I call the attention of the Senator from New Hampshire to that language. I did not know at the time it was done that the Senator had made a statement which in effect was intended to impeach the integrity of the Senator from Oklahoma. When my attention was called to it 24 hours later I called his attention to his breach of etiquette and to his breach of the rules of the Senate in imputing to a Senator on the floor a lack of integrity in having made a statement which "was not true." The Senator said, "I am unwilling that any Senator should impeach the integrity of other Senators," and immediately was himself guilty of the very fault which he said he was unwilling that another Senator should commit.

But, Mr. President, let us see how far justified the Senator from New Hampshire was in his criticism of the Senator from Oklahoma. The Record, on page 164, shows the following language used by the Senator from Oklahoma:

Mr. Gallinger made the point of no quorum at 5.15 p. m. on Monday. Mr. Penrose had a roll call taken on a motion for a recess, which resulted in 53 yeas and 5 nays, at 5.35 p. m. Mr. Smoot made the point of no quorum at 8 o'clock and 1 minute p. m. on Monday. Mr. Sutherland made the point of no quorum on Tuesday at 1.55 p. m. There were 58 present on the roll call, although doubtless there were not 58 present at the time the call was made.

Mr. GALLINGER. Does the Senator find the words "roll call" in the CONGRESSIONAL RECORD?

Mr. OWEN, I am reading it; yes. Mr. GALLINGER. Did the Senator state it at the time he

made that statement-on his honor?

Mr. OWEN. I do not know just what the Senator means by his question. Does the Senator mean to suggest that this language was interpolated in the RECORD after the statement had been made?

Mr. GALLINGER. I listened to the Senator, and the Senator said that 58 Senators were present. That is precisely the language he used.

Mr. OWEN. When the RECORD was brought to me I do not remember whether I put in "roll call" or not, but the term "roll call" appears frequently throughout my remember and makes perfectly clear my meaning. I will say to the Senator that while I do not recall the identical words that I used on any of these occasions, at the same time I do know that the Senator had no reason to believe, that the Senate had no reason to believe, and that no one had any right to believe that any other purpose was intended by the Senator from Oklahoma than to refer to the number of Senators answering to the roll call.

Mr. GALLINGER. The Senator will recall that he showed me that very matter that he is reading and had written with his own hand "on the roll call."

Mr. OWEN. The Senator never showed this [referring to the record in his hand] to the Senator from New Hampshire, be-

cause he, the Senator, has never seen it.

Mr. GALLINGER. I beg pardon; the Senator is mistaken. Mr. OWEN. The Senator had seen the RECORD, no doubt, but that is not what I have in my hand.

Mr. GALLINGER. I ask the Senator if the Senator did not interpolate those words?

Mr. OWEN. I do not think so.

Mr. GALLINGER. The Senator ought to know.

Mr. OWEN. It is very easy for the Senator to say that one ought to know. I do not recall exactly what changes I might have made, or the language of the RECORD when it was brought to me, but I know this term appeared frequently. The original Record can be very easily obtained. I will have it sent for. I ask the reporter to have it brought to the Chamber.

Mr. Sutherland made the point of no quorum at 2.45 p. m., and 59 were present on the roll call. \* \* \* Mr. Smoot made the point of no quorum at 4 p. m., and 54 were present on the roll call. Mr. Smoot made the point of no quorum at 5.12 p. m., and 52 were present on the roll call.

I wish the reporter to have the report of this Record brought to the Senate.

Mr. Gallinger made the point of no quorum at 8 o'clock p. m., and 56 were present on the roll call.

Mr. GALLINGER said:

Will the Senator from Oklahoma permit me to say that at the time I made the point of no quorum there were just eight Senators in their seats?

My reply was "Doubtless."

Mr. GALLINGER. Mr. President, will the Senator permit me? The Senator is reading the first statement that he made in reference to the roll call?

Mr. OWEN. I am not. I am reading the second statement,

on page 164, as I have said.

Mr. GALLINGER. Will the Senator kindly read the first statement he made, to which I made the response?

Mr. OWEN. I will before I conclude.

Mr. GALLINGER. Thank you.

Mr. OWEN. I read on:

Mr. Owen. Doubtless; but the Senator did not state the number of Republicans who were in their seats.
Mr. Gallinger. It does not make any difference on that point at all.
Mr. Owen. I do not think it does.
Mr. Gallinger. The Senator from Oklahoma has already put into the

Mr. Owen. The Senator from Oklahoma will continue to put in the Record the attitude of Senators on the other side.

Mr. Gallinger. The Senator has put into the Record that when I made the point of no quorum there were 65 Senators present. They may have been in the cloakroom or on the street or somewhere else, but they were not at that time present in the Senate Chamber, as the Senator would have the country believe.

Mr. Owen. They were in the cloakrooms, relieving themselves of the weariness of prolonged and tedious debate that ought not to have taken any such length of time. It does not require any Senator 10 hours to tell what he knows about Hetch Hetchy.

When I first referred to this matter, December 2, page 53 of the Record, column 1, when the Senator from New Hampshire asked me what I said in regard to the Senators present, the following colloquy took place. The first time I did not say "on the roll call." I simply said there were 56 Senators present, meaning, of course, on the roll call, because that is the only way we can authoritatively determine the number of Senators present. But immediately following that this took place:

Mr. Gallinger. Mr. President, did I understand the Senator to say that when I made the point of no quorum, at 8 o'clock, there were forty-odd Senators present?

Mr. Owen. I said the call of the roll disclosed the presence of 56

Senators.

Mr. GALLINGER. Yes; but we do not count Senators who are in the cloakroom or in other places outside of the Chamber. There were not half that number present when I made the point of no quorum.

That was the first time there came an interchange between the Senator from New Hampshire and the Senator from Oklahoma, and it would be impossible for anybody to understand from that language that the Senator from Oklahoma desired to express to the country the idea that there were 56 Senators

in their seats at the instant when the Senator from New Hampshire made the point of no quorum. On the contrary, the Senator from Oklahoma then and there said in the plainest possible language:

I said the call of the roll disclosed the presence of 56 Senators.

Mr. GALLINGER. But previous to that the Senator said 56 Senators were present at the time I made the point.

Mr. OWEN. The Senator asked me what I meant by it, and

immediately answered.

Mr. GALLINGER. Of course, the Senator is entitled to the credit of what he meant; but he did not say it, and that is the statement that I controverted.

Mr. OWEN. The Senator from Oklahoma is entitled to what the Senator from Oklahoma actually said. The Senator from Oklahoma said, on page 67 of the RECORD, column 1, that on Tuesday, the 2d day of December, a call of the roll disclosed 56 Senators, explaining the words which had just been used a

moment before. It was after that—
Mr. GALLINGER. The Senator said that after his attention had been called to the fact that he had used the other term

previously

Mr. OWEN. No; the Senator from New Hampshire said: Mr. President, did I understand the Senator to say that when I made the point of no quorum at 8 o'clock there were forty-odd Senators present?

Mr. OWEN said:

I said the call of the roll disclosed the presence of 56 Senators.

Mr. GALLINGER. That is precisely what the Senator from Oklahoma did not say.

Mr. OWEN. That is precisely what the Senator from Oklahoma did say, and the Record shows it, as I am reading from it. Mr. GALLINGER. I mean, the Senator did not say it on the previous occasion, when he was rebuking the Republican side.

Mr. OWEN. It was well known. If the Senator will look at page 67 of the RECORD, column 1, he will see the accuracy of what the Senator from Oklahoma said.

Mr. GALLINGER. Here is what the Senator said:

It is very painful to make observations of this character in the absence of the Senator.

That was the absence of the Senator from Utah [Mr. Smoot], who for once was out of the Chamber.

The Senator from New Hampshire made the point of no quorum at 8 o'clock to-night. There were 56 Senators present.

If the Senator thinks that the country to which he is talking-I am not talking to the country at all; I do not think the country cares a rap about this, but the Senator is talking to the country—if the Senator thinks the country thought that

those 56 Senators were here after a roll call—
Mr. OWEN. The next paragraph shows the complete explanation, for I immediately said the call of the roll disclosed the presence of 56 Senators.

Mr. GALLINGER. But the Senator did not say it.
Mr. OWEN. The Senator did say it immediately.
Mr. GALLINGER. After the Senator's attention was called to it he corrected himself, it is true.

Mr. OWEN. If the Senator desires to quibble, I have no objection.

Mr. GALLINGER. I have no desire to quibble. I think the Senator from Oklahoma is wasting a good deal of valuable time. Mr. OWEN. No; the Senator from Oklahoma is wasting no time. When the Senator from New Hampshire attempts to put him in the attitude of making a misrepresentation, the Senator from Oklahoma has a right to defend himself on the floor, and to make it perfectly clear that he did not misrepresent the Senator from New Hampshire, and that he did the Senator from New Hampshire no injustice, but that the Senator from New Hampshire, having had his attention called to it a dozen times, on page 67, on page 164, and on page 167, where the Senator from Oslahoma referred to the roll call seven times, the Senator from New Hampshire, nevertheless, thereafter made his complaint that the Senator from Oklahoma was misrepresenting

Mr. GALLINGER. No; Mr. President-

Mr. OWEN. And it is for the Senator from New Hampshire

Mr. GALLINGER. Suppose we have a modus vivendi. The Senator from Oklahoma entertains his opinion and the Senator from New Hampshire entertains his, and I am willing to go on with the consideration of the currency bill.

President is anxious that we should proceed with it.

Mr. OWEN. I am perfectly willing to drop it. I do not think when the Senator used the language he had any intention to say anything that was unfair or unjust. I took it just as a thoughtless speech, as it was.

Mr. GALLINGER. It was not very thoughtless.

Mr. OWEN. Oh, yes; it was thoughtless and unintentional; and instead of making any answer to it in the RECORD I simply called the attention of the Senator from New Hampshire to it, and called his attention to his own inaccuracy, so that he might expunge it from the RECORD, which he ought to have done. But the Senator saw fit to renew it.

Mr. GALLINGER. I did not renew it. I did not admit any inaccuracy. I did expunge it from the permanent Record, because the Senator from Oklahoma wanted me to do it, and I

wanted to please him.

Mr. OWEN. Now, the whole record is in. I have no desire that the original shall be expunged, and I ask that it be put

Mr. GALLINGER. That is satisfactory to me. The VICE PRESIDENT. The official reporters will correct

the RECORD to suit the Senators.

Mr. SMOOT. Mr. President, I have called for a quorum of the Senate twice to-day, and I deny the charge of the Senator from Oklahoma [Mr. Owen] that on either occasion I called for a quorum to waste time. The first time I called for a quorum to-day was at 2 minutes past 10 o'clock this morning, when there were but eight Senators on the floor of the Senate. Every Senator on the Democratic side of the Chamber knows that I have said on more than one occasion that I do not believe we ought to consider business in this Chamber unless there is a quorum present.

Mr. WILLIAMS. Mr. President, I wish to ask the Senator a question for information. Do I understand the Senator to say that it was at 2 minutes after 10 o'clock when he made the point of no quorum-2 minutes after the time fixed for the

Senate to convene?

Mr. SMOOT. It was.

Mr. WILLIAMS. I wish to ask the Senator from Utah if it is not the rarest thing in the world that there is ever a quorum of this body or of the other 2 minutes after the hour of meeting?

Mr. SMOOT. Lately that has been true, Mr. President. It

is a very rare occurrence.

Mr. WILLIAMS. It hardly ever occurs,

It happens of late that it has been a very rare Mr. SMOOT. occurrence; in fact, since the time was set to meet at 10 o'clock a. m. there has never been a quorum here at that hour.

Mr. WILLIAMS. When we meet at 12 o'clock, there is hardly ever a quorum here at 2 minutes past 12 o'clock

Mr. SMOOT. Many times I have seen a quorum in this body at 12 o'clock, and I do not think there would be any difficulty

about getting a quorum now if we met at 12 o'clock.

The next time that I called for a quorum was this evening shortly after 8 o'clock, when there were but seven Senators in the That happened after the recess from 6 o'clock until 8 o'clock; the Senator from Connecticut [Mr. McLean] was to begin his speech, and I felt that it was nothing but right and proper that he should have a quorum here.

I recognize the vast amount of work to be performed by Congress, but I want to say to the Senator from Oklahoma that that work is to be performed not in the cloakrooms or in a Democratic caucus. The proper place to perform that work is upon the floor of the Senate or in the committees of the Senate, as

it has always been performed in the past.

The Senator has recited a long list of laws that we ought to pass; and I want to say to him that if we are to pass them, Senators at least have got to be in Washington.

Mr. President, last evening, after 9.30 o'clock, there was no quorum present here, either in the Chamber or in the cloakrooms; no one called for a quorum; and it seems rather strange, indeed, to charge that it is for delay that quorums have been called for to-day, when each call took about 10 minutes 40 minutes out of 13 hours. If we wanted delay, Mr. President, there is not a Senator on either side of the Chamber who could not take the floor and occupy it 40 minutes at any time upon this question, or upon any other question that might be before

I want to deny, Mr. President, that there is any intention on the part of any Senator on this side of the Chamber to delay the consideration of the currency bill, as has been stated The Senator from time and again upon the floor of the Senate. Oklahoma has to-night wasted more time that would otherwise have been occupied in the discussion of this bill than has any Senator upon this side of the Chamber from the day that we started with the consideration of the bill.

I also wish to ask the Senator, if we wanted to waste time and to delay this measure, does he think that Senators on this side of the Chamber would furnish a quorum? Last night, when a quorum was called for and the President of the Senate announced that 45 Senators were present, there were 25 Democratic Senators who answered the roll call and 24 Republicans

who answered it. Does that look as though we wanted to delay the consideration of this measure? If we had so desired, the Republican Senators would have absented themselves from the Chamber and required the Democrats to furnish a quorum here all the time.

I wish to say, not only to the Senator from Oklahoma but to the country, that I do not propose to delay nor to be a party in any way toward delaying the consideration of this bill; and I do not know whether or not I shall occupy the time of the Senate by the remarks which I intended to make in reference to it, for I want a vote upon this measure.

What was the object of the Senator in reading a lecture to this body to-night and telling what laws ought to be passed?

The Senator from Oklahoma knows, and every other Senator in this body knows, that just as soon as the currency bill is passed it will take but one session of the Senate to consider the bills that are on the calendar which will be considered be-fore the holidays, and I do not think there is a Senator here who does not believe that as soon as the currency bill is passed and the conference report agreed to, Congress will take a recess until after the Christmas holidays. The lecture, however, was

given not for Congress but for the country.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Oklahoma [Mr. Owen] to the

pending bill.

Mr. ASHURST. Mr. President, in my opinion the speech which the Senator from Oklahoma [Mr. Owen] delivered to the Senate to-night will become historic, for he has not only delivered an address accurately advising the Democrats and the Republicans what their duty is, but he has also stated what another political party will do if the Democrats and Republicans fail to enact the legislation which he has described and that should be enacted.

Mr. CRAWFORD. Mr. President, I infer from some things which have been said here that they were being said for the purpose of going to the country, and I have wondered if the Senators who were giving utterance to them really believed that they would be very beneficial to them when they got to the country-a sort of hors de combat here over the question of how many times the question of no quorum has been raised, and these personal disputes are matters in which I do not believe

the country is profoundly interested.

Mr. President, the country is interested in the currency bill. I believe the country would like to have the discussion proceed in a spirit of nonpartisanship; it would like to have a discussion the purpose of which is to reach conclusions sound and just and which will end in wholesome legislation. I do not believe it is quite fair to Members on this side of the Chamber to assume that because the majority has determined in a conference what they shall do in regard to this bill it is a waste of time for Members on this side of the Chamber to discuss the various provisions of it, although it is probable that their views will not find a place in the statute when this bill shall be crystallized into statute.

I am unable to forget, Mr. President, that, even as a member of the minority, I have some responsibility when I come to vote upon this measure, and some duty to perform in the dis-cussion of the bill itself. I am not at all disposed to think that these bills, whichever one prevails here, do not have more of good in them than evil. I would like, I will say frankly, to see the bill reported by the group of Senators with whom I joined in making a report be the one adopted and passed by the Senate, because I think it is a better bill than the other; but if it should be determined that the other is the bill which must be passed, I expect to vote for it, because I believe that, notwithstanding there are defects in it which I think we ought to remove, on the whole it will be of great benefit to the people of the United States.

I am not going to make a formal speech-I have not prepared one-but I want to call attention to some things which I think ought to be seriously considered by the Senate in weighing the merits of the two bills which have been presented in the two reports. The first and the great difference to which I desire to address myself—the hour is late, and I shall speak briefly-is the difference between the two bills in relation to stock ownership.

Mr. President, when I read the draft of the bill which was introduced in the House of Representatives and which afterwards passed that body, I felt some resentment and a sort of inherent repugnance to the provisions in it which require all the national banks to subscribe for the stock of these reserve banks; not, sir, because I have any feeling of partiality or disposition to indulge in favoritism toward national banks, but because I believe that fundamentally it is un-American and un-sound to say to any citizen, corporate or individual, "you shall

pay your money for stock in a reserve bank whether you want to do so or not, and the penalty of your failure to subscribe and pay for such stock shall be that you give up your charter and go out of business."

I have not liked that provision of the bill as it passed the House, and which is in the bill as it was reported by the group of Senators of which the distinguished Senator from Oklahoma [Mr. Owen] is the head. I have not been able to see any necessity for so drastic a requirement as that, and I will say that it seems to me to be fundamentally wrong, because if the great public is willing voluntarily to come forward without coercion and subscribe and pay for this stock and is willing, anxious, and ready to furnish this capital, why should the Government say to the banks, "You and you alone shall be required to do it?" Upon what theory does that principle rest and why should such a power as that he county. and why should such a power as that be exerted to compel the banks to take this stock? Suppose the banks yield, as I presume they will, to that coercive feature of the bill and take this stock; then you will have forced an exclusive privilege upon the subscribing banks, whether they so consider it or not, because, as stockholders, you have confined the ownership to a class; you have given them the exclusive right to purchase and own that stock. I want to ask my friends on the other side of the Chamber, do they really consider that that is democratic?

Mr. SHAFROTH. Mr. President—
Mr. CRAWFORD

Mr. CRAWFORD. Is there not an element in that very proposition of the most vicious kind of class legislation? Is there not a principle there that is really on its face un-American? Mr. Brown, Mr. Smith, and Mr. Jones have \$5,000, \$10,000, and \$2,000, respectively, at their disposal, which they are anxious to invest in stock in a Federal reserve bank; they are perfectly willing to do so to get 5 per cent interest upon their investment; they are looking for just such an investment as that, but you deny to them the privilege of subscribing to that stock, investing their money in it, and receiving-

Mr. SHAFROTH. Mr. President— Mr. CRAWFORD. Just let me finish this thought—receiving the 5 per cent dividend upon it. They are American citizens The person seeking the investment may be a widow or a minor child whose guardian is anxious to make an investment of this character for him; they have the funds, they are seeking a place to invest them, and want to take this stock; in fact, they are anxious to subscribe for it and believe in it; but you say to them, "You shall not have the privilege of taking the stock." and then to the small bank out in a little town of 1,500 people, in a community where the officers of that bank are unable to see how any investment in the stock of a Federal reserve bank is going to be of any benefit to them, and who say, "We have not the kind of prime liquid assets that we can take over to the reserve bank upon which to obtain credit or upon which we can get currency, and we do not want to be coerced into taking funds out of our bank and investing in the stock of that Federal reserve bank"; you say, "You shall do so or give up your charter; you shall do so within 12 months or else go out of business as a national bank." You say to the stockholders who have their funds invested in this little country bank, upon which they may be receiving 12 per cent per annum, and who have for 10 or 15 years enjoyed all the rights of stockholders in a bank which has its local clientele, which has its peculiar business adjusted to its surroundings in the community in which it is planted, who are all satisfied, and who do not see the need of having stock in a Federal reserve bank, you say to them, "Your bank shall subscribe for an amount of stock in a Federal reserve bank equal to 20 per cent of its capital; it must pay for it; if it does not do so, it must give up its charter." At the same time you deny to the private individual living in the same community who may be anxious to take the stock and get the 5 per cent upon it the privilege of subscribing for it. I want to ask some of my friends on the other side of the Chamber is that American; is that democratic; is that fair and just; is it placing all classes of individuals and corporations upon a basis of equality? I say, when I read the bill and looked at that feature of it, it was repugnant to my sense of what is just and fair, and I wondered why it was put in the

Why was this provision coercing all of the national banks to take this stock, and not recognizing the right of individuals to subscribe for a dollar of it, put in the bill? We are told, "Because the system will not be a success unless all of the national banks are compelled to come into it." We are told: "It is to be a bank of banks. It is to be an institution created by law to enable the banks to get relief by rediscounting paper

in it, by procuring currency from it."

When one gets that viewpoint of the matter he asks the

where existing banks have been compelled to come in and furnish the capital for new banks of this kind, which can deal only with banks?

I do not know where it is. In all the literature that was collected by the National Monetary Commission-and our shelves are loaded down with it-volume after volume deals with the banking systems of France and of Germany and of Belgium and of Russia and of England and of Canada and of all the civilized nations, but you will find no such banking system as that.

We were told that our present system is archaic, not up to date, not modern, and it is insisted that the system of England and the system of France and the system of Germany are so much better that we are away in the rear. When we look at these banking systems, do they have any such feature as this

in them? Not at all.

The Bank of France, about which we have heard so much in the discussions and read so much in the literature, is owned by individuals scattered all through the Republic. The number of stockholders reaches into the thousands. It is not a bank of banks. In order to regulate discounts, check speculation, and secure a stock of gold it goes into the market and deals with individuals. It receives the deposits of individuals and loans money to individuals. We do not get this principle of coercion from the Bank of France. We do not get it from the German system. Although controlled by the Government and all that, the Imperial Bank of Germany is owned by individuals and it can deal with individuals. The Bank of England can deal with the man who comes in from the street as well as with the great joint-stock companies of England.

Where do we find a precedent for a close corporation like this, interlocking all the national banks, tying them together, and requiring them to own its stock exclusively, so that individuals can not share at all in the ownership of or enjoy direct dealings with it? Where do we find a precedent for this anywhere in all the banking systems of the world? I ask Senators who are championing this particular feature of the bill to point out a precedent for it in the banking systems of

the world.

I should be glad to hear from some Senator on that subject and have him point to a single instance in the history of modern banking and modern banking systems where banks organized by the Government, as these banks are, are owned exclusively by banks and the business of which is confined exclusively to banks.

Mr. REED. Mr. President-

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Missouri?

Mr. CRAWFORD. I do.

Mr. REED. I wish to ask the Senator who owns the stock of the small country national banks of his State?

Mr. CRAWFORD. The stockholders.

Mr. REED. Oh, yes; but what class of people?

Mr. CRAWFORD. All kinds of people-farmers, merchants, lawyers, doctors-all kinds of people.

Mr. REED. It is scattered generally throughout the communities in which the bank is situated, is it not?

Mr. CRAWFORD. Yes.

Mr. REED. That is true of the small banks all over the country, is it not?

Mr. CRAWFORD. Generally.

Mr. REED. The same thing is true of the State banks, is it not, that may come into the system?

Mr. CRAWFORD. Quite generally. Mr. REED. Then, is it not true that the stock of the present banking system is scattered generally among the people of the United States, of all classes?

Mr. CRAWFORD. That is true.

Mr. REED. Is there, then, any danger if the stock in these new banks is owned by the existing banks, which in turn are owned by the people generally, scattered all through the United States?

Mr. CRAWFORD. Mr. President, I have not referred to it as a danger. I have referred to it as a wrong principle to coerce these people and these banks into subscribing for this stock. I have challenged Senators to point to a precedent for such legislation anywhere in the world in modern banking systems, I have not called attention to it as being a danger. I will discuss that a little later on,

Mr. REED. But if there is no wrong that can be pointed out, we need not disturb ourselves about whether or not it has ever

happened before.

Mr. CRAWFORD. Mr. President, if I were to come to the Senator from Missouri and, at the point of a pistol, compel him question: "Is there any banking system similar to this pro-posal anywhere in the wide world? Is there a place on earth I had a benevolent purpose, that when I got it I was going to to go into his pocket and pay over his money to me, saying that invest it for his benefit and no harm would come to him, I imagine the Senator from Missouri would protest nevertheless.

Mr. REED. Not in the least, Mr. President.
Mr. CRAWFORD. Then, the Senator is a greater lover of
peace and thinks less of his liberty and personal freedom than

No; not at all. I simply put a proper value on Mr. REED.

my purse, Mr. President.

Mr. CRAWFORD. Mr. President, I can not give up my time It is late. I am going to discuss several things here. I know the Senator's charming habit, and his delightful manner, and all that, but it is 10 minutes of 11 o'clock, and I want to follow some thoughts here in some sort of consecutive fashion. I hope the Senator will not take up too much of my time.

Mr. REED. No; I do not intend to. The VICE PRESIDENT. The Senator from South Dakota is entitled to the floor, and he refuses to yield.

Mr. REED. But a moment ago the Senator was hurling challenges over at this side.

Mr. CRAWFORD. My challenge has not been accepted.

Mr. REED. I am accepting it now. Mr. CRAWFORD. Where is your law, where is your prece-

dent, anywhere on earth, for this kind of legislation?

Mr. REED. I have just discussed the public end of it. The Senator conceded that all the stock of the present system was owned by the public and that there was not any wrong in that.

Mr. CRAWFORD. No; I do not concede it the way the Sena-

tor puts it.

Mr. REED. Now I am coming to the question of coercion. I want to ask the Senator if it is not true that it is the primary duty of every bank to stand ready and able at all times to pay to its depositors, dollar for dollar, on demand, the money they have put over its counters? Is not that its legal and moral duty?

Mr. CRAWFORD. That is true. Mr. REED. Then I want to ask the Senator if the banks have not utterly failed to keep themselves in a position to respond to that legal liability?

Mr. CRAWFORD. They have not utterly failed, in the

broad sense. They have at times failed.

Yes; they have at times failed, and at all times they are unable to comply with the demand if the demand is

Mr. CRAWFORD. Mr. President, the trouble with the Senator is that he is assuming a line of thought that I am not following. I am not defending these banks; I am not championing them. I am talking about a principle. I am talking particularly about the exclusion of the general public from the right, which it may be anxious to have, of subscribing to this stock.

Mr. REED. But if the Senator will bear with me, one thing

at a time. Let us talk about this for a moment, because the

Senator has been very free with his challenges.

Mr. CRAWFORD. But the Senator is not accepting my

challenge

Mr. REED. Oh, yes, I am. The Senator will not wait—
Mr. CRAWFORD. Mr. President, I shall have to insist on

following my argument in my own way. If the Senator can point to a law in a single civilized country as a precedent for this legislation, he has bad time to do it and he has not done it.

Mr. REED. Mr. President, I can point to a law on the stat-

ute books of the United States to-day that compels banks to impound their reserves.

Mr. CRAWFORD. Yes; and I want that feature preserved

in this law.

The Senator can not escape by denying me the right now to follow his assertions to the conclusion, and he ought not to try to do so. At the present time the law of the United States requires the banks to keep their reserves in certain localities.

Mr. CRAWFORD. Mr. President, I can not consent to the Senator from Missouri traveling over a line of argument and discussing matters that I intend to discuss myself in the future, instead of accepting my challenge and going to the point to which I alluded. I am going to make this argument myself. [Laughter.

The VICE PRESIDENT. The Chair has stated that the Sen-

ator from South Dakota is entitled to the floor.

Mr. CRAWFORD. I decline to yield to the Senator's digressions.

Mr. REED. I will not digress; but I trust the Senator will

The VICE PRESIDENT. The Senator from South Dakota is within his rights.

Mr. CRAWFORD. I do not want to be discourteous to the Senator from Missouri. I know his good nature, and his charm-

ing method of discussion; but he wants to digress here, and I

can not consent to it.

Mr. REED. Well, Mr. President—
The VICE PRESIDENT. The Chair has tried several times to protect the Senator from South Dakota, but the Senator from South Dakota refuses to be protected.

Mr. CRAWFORD. I am depending upon the Chair. I refuse

to yield.

The VICE PRESIDENT. The Senator from South Dakota refuses to yield. He is entitled to the floor.

Mr. CRAWFORD. Mr. President, I insist that to come to these banks and say to them, "You shall subscribe," and at the same time to close the doors to all other people and institutions so that they can not subscribe is without precedent. It is un-American. It is undemocratic. It is unrepublican. This system can be floated and made a success, and reserve banks can be created to hold the deposits of the banks throughout the country, of which the public shall be the owner instead of the banks. If you are giving them something that is of value to them, and excluding the public from it, you are conferring upon them a special privilege. Of all the people on earth who arraign special privilege and the granting of exclusive rights, before the public, on the forum, in declarations everywhere, the assumed champions on the other side of this Chamber ought not create a special class privilege like this. Mr. REED. Mr. President—

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Missouri?

Mr. CRAWFORD. I can not stop now. I am going to yield to the Senator later on, but I must have time to follow some of these thoughts.

Mr. REED. I hope the Senator will allow me-

The VICE PRESIDENT. The Senator from Missouri is out

Mr. REED. I am appealing to the Senator to yield to me. Mr. CRAWFORD. Not now. I shall have to occupy some time to-morrow, and I am going to take special pains to give the Senator from Missouri an opportunity to interrogate me

then; but I wish to pursue this thought a little further. Mr. President and Senators, if you can create reserve banks that will discharge all the functions that the pending bill provides they shall discharge and get rid of this special privilege, why not do it? Instead of having their stock belong to the banks as the result of coercion or, if you wart to put it from the other standpoint, instead of having the ownership enjoyed as an exclusive privilege, why not allow the public to come in,

subscribe for, and enjoy the ownership of this stock?

Mr. NEWLANDS. Mr. President—

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Nevada?

Mr. CRAWFORD. Not to-night. [Laughter.]

Mr. President, there is no precedent anywhere in history in banking in the past or in the present for such a provision as that which we find in this bill.

Is it necessary? If it is not necessary, it ought not to be in the bill. If it is unsound, it ought not to be in the bill, and certainly if it is dangerous, it ought to be kept out of the bill.

I think it is dangerous. You can not force the 17,000 State

banks into this system. They can come in or they can stay out, just as they choose. You are compelling the national banks to come in, whether they want to or not, or to give up their charters.

This is not a light matter. It is a serious matter. Here is a national bank owned by stockholders in a country community people of small means. Its business is established. It has been conducting that business for years. It enjoys the confidence of the community. Its stockholders are among the best people there. They are satisfied with their investment. The money is employed at home. It is being loaned out to people about there. It is making a fair return on the investment. You say to those people: "You must subscribe to this stock; you must take the money out of your loanable assets and invest it in a reserve bank over in Chicago or in St. Louis or in New York. You must take it away from your customers, while the stockholders of the bank across the street, the State bank which is your competitor, are not compelled to do it. You stockholders in a national bank are compelled to submit to it, but stock-holders in your competitor are not. It is optional with them."

Is not that an unjust discrimination? Is it not class legislation? Is it not, at its foundation, unjust, and is it necessary? The VICE PRESIDENT. The hour of 11 o'clock having arrived, the Senate stands adjourned until 10 o'clock a. m. of

to-morrow.

Thereupon (at 11 o'clock p. m.) the Senate adjourned until to-morrow, Wednesday, December 10, 1913, at 10 o'clock a. m.

# HOUSE OF REPRESENTATIVES.

Tuesday, December 9, 1913.

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the fol-

lowing prayer:

God in heaven, without whom we are nothing, so move upon our minds and hearts that we may be clear in our conceptions, strong in our convictions, pure in our motives, that we may work the works of righteousness and hallow Thy name by giv-

ing to our homes, our country, our world, the best that is in us.

And now, O Father, be very near to the Members of this House whose family ties have been broken. A little child, the pet and pride of the home circle, gone away, leaving the hearts desolate. The wife and mother taken from another home. Comfort the stricken family, the bereaved husband and children by the precious truth that time nor space can sever the affections of the heart; that somehow, somewhere, they will mingle more closely, never again to be severed, in the dispensation of Thy providence. Amen.

The Journal of the proceedings of yesterday was read and

approved.

ENBOLLED BILL PRESENTED TO THE PRESIDENT OF THE UNITED STATES FOR HIS APPROVAL.

Mr. ASHBROOK, from the Committee on Enrolled Bills, reported that this day they had presented to the President of

the United States for his approval the following bill:
H. R. 7207. An act granting to the city and county of San Francisco certain rights of way in, over, and through certain public lands, the Yosemite National Park, the Stanislaus National Park tional Forest, and certain lands in the Yosemite National Park, the Stanislaus National Forest, and the public lands in the State of California, and for other purposes.

LEAVE TO WITHDRAW PAPERS-J. H. KAMPO AND OTHERS.

By unanimous consent, at the request of Mr. Konop, leave was granted to withdraw from the files of the House, without leaving copies, the papers in the cases of J. H. Kampo, Lucy A. Jeffcott, and Adam Reiland, Sixty-second Congress, no adverse reports having been made thereon.

## REPAYMENT OF ILLEGAL COTTON TAXES.

The SPEAKER. The gentleman from Florida [Mr. CLARK]

is recognized for 40 minutes.

Mr. CLARK of Florida. Mr. Speaker, it is my purpose to briefly call the attention of the House to House bill 1711, introduced by myself on the 7th day of April, 1913. This bill has for its object the refunding by the Government of the United States to the persons who paid the same certain taxes which, in my judgment, were levied and collected in violation of the plain provisions of the Constitution. For more than 40 years past bills of this character have from time to time been presented to Congress, and to this good hour every effort to right the wrong inflicted has been barren of results; but surely now, Mr. Speaker, in this era of universal good feeling among all the people of every section of this great Republic, I shall not appeal in vain

to the American Congress to restore to my people money unlawfully, wrongfully, and unconstitutionally exacted from them.

The bill which I have introduced and which I shall discuss—H. R. 1711—I ask leave to print as a part of my remarks. A bill (H. R. 1711) to credit and pay to the several States and Territories and the District of Columbia all moneys collected under the direct tax levied by the acts of Congress approved, respectively, July 1, 1862; March 7, 1864; July 13, 1868; and March 2, 1867.

direct tax levied by the acts of Congress approved, respectively, July 1, 1862; March 7, 1864; July 13, 1866; and March 2, 1867.

Be it enacted, etc., That it shall be the duty of the Secretary of the Treasury to credit to each State and Territory of the United States and the District of Columbia a sum equal to all collections by set-off or otherwise made from said States and Territories and the District of Columbia, or from any of the citizens or inhabitants thereof, or other persons, under the acts of Congress approved, respectively, July 1, 1862; March 7, 1864; July 13, 1866; and March 2, 1867.

SEC. 2. That there is hereby appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be necessary to reimburse each State, Territory, and the District of Columbia for all money found due to them under the provisions of this act; and the Treasurer of the United States is hereby directed to pay the same to the governors of the States and Territories and to the Commissioners of the District of Columbia; but no money shall be paid to any State or Territory until the legislature thereof shall have accepted, by resolution, the sum herein appropriated, and the trusts imposed, in full satisfaction of all claims against the United States on account of the levy and collection of said taxes under the several said acts of Congress, and shall have authorized the governor to receive said money for the use and purposes aforesaid; Provided, That where the sums or any part thereof, or any other person, either directly or by the sale of property, such sums shall be held in trust by such State, Territory, or the District of Columbia, have been collected by the United States from the citizens or inhabitants thereof, or any other person, either directly or by the sale of property, such sums shall be held in trust by such State, Territory, or the District of Columbia.

set-off against any indebtedness alleged to exist against the State, Territory, or District of Columbia, in which such taxes were collected: And provided further. That no part of the money hereby appropriated shall be paid out by the governor of any State or Territory, or any other person, to any attorney or agent under any contract for services now existing or heretofore made between the representative of any State or Territory and any attorney or agent. All claims under the trust hereby created shall be filed with the governor of such State or Territory and the Commissioners of the District of Columbia, respectively, within six years next after the passage of this act; and all claims not so filed shall be forever barred, and the money attributable thereto shall belong to such State. Territory, or the District of Columbia, respectively, as the case may be.

This bill seeks to have refunded to the persons who paid the same what for years has been denominated the "illegal cotton taxes." In order that the House and the country may understand just what is meant by the "illegal cotton taxes," I feel that it will not be out of place to give a brief history of the legislation itself, and something of the various efforts which have been made from time to time to enact relief legislation along the lines proposed in my bill. Some people have for years been laboring under the delusion that these taxes levied on cotton and collected by the Government were simply deposited in the Treasury and kept there in a separate fund for all these years. That is not true. These taxes when collected went into the general revenues of the Government and were disbursed by the Government as other taxes were used and disbursed. I believe I have introduced a bill of this character during every term of Congress of which I have been a Member, and from my investigation I knew there was in the Treasury no "cotton-tax fund," but in order to settle the question beyond controversy, in December, 1907, I addressed a letter of inquiry to the Secretary of the Treasury, and in due time received his reply, both of which I ask to print in the RECORD as a part of my remarks:

HOUSE OF REPRESENTATIVES, Washington, D. C., December 24, 1907.

The SECRETARY OF THE TREASURY, Washington, D. C.

Sir: In 1862 Congress levied a tax of one-half of 1 cent per pound on cotton; in 1864 Congress levied a tax of 2 cents per pound on cotton; in 1866 Congress levied a tax of 3 cents per pound on cotton; in 1867 Congress levied a tax of 2 cents per pound on cotton; in 1868 Congress levied a tax of 2½ cents per pound on cotton, and in 1868 Congress repealed all laws levying direct taxes on cotton. During the life of these respective tax acts, viz, from 1862 to 1868, the United States Government, as shown by the record in the office of the Commissioner of Internal Revenue, collected the sum of \$68,072,389.99 from the owners of cotton.

Internal Revenue, collected the sum of \$68,072,389.99 from the owners of cotton.

My understanding is that the money arising from these cotton-tax acts was treated just the same as money arising from internal-revenue taxes; that is to say, it was collected by the Government and used by the Government for governmental purposes. I notice, however, that some persons refer to the "illegal cotton-tax fund" as though this money was never used by the Government, but that it has been held for all these years in a separate and distinct fund, known and described as "the illegal cotton-tax fund."

I will appreciate it if you will advise me as to the truth of the matter.

Yours, respectfully,

FRANK CLARK.

On the 27th day of December, 1907, Mr. Edwards, Acting Secretary of the Treasury, wrote in reply as follows:

TREASURY DEPARTMENT, OFFICE OF THE SECRETARY, Washington, December 27, 1907.

Hon. Frank Clark, House of Representatives, Washington, D. C.

House of Representatives, Washington, D. C.
Six: In reply to your communication of the 24th instant, relative to the tax on cotton collected during the fiscal years ended June 30, 1863, to June 30, 1868, I have to state that the provision authorizing the levy and collection of said tax is found in the seventy-fifth section of the act entitled "An act to provide internal revenue to support the Government and to pay interest on the public debt," approved July 1, 1862 (12 Stat., pp. 482-489), and that the moneys derived from the tax on cotton, together with all other taxes levied and collected under the said act, were deposited as receipts from internal revenue and applied to the support of the Government and payment of interest on the public debt.

No separate or distinct account known or described as "cotton-tax fund" was ever kept on the books of the Treasury Department.

Respectfully,

J. H. Edwards.

J. H. EDWARDS, Acting Secretary.

Mr. Speaker, on the 24th day of January, 1908, I delivered in this House an address upon this same subject. In that speech I stated all the facts surrounding and connected with the levying and collection of these taxes. I briefed all the decisions of the Supreme Court of the United States which in anywise tended to elucidate the questions involved in the levying and collection of these taxes, and, with all due modesty, I desire to say that I demonstrated beyond the shadow of a doubt that the levying and collection of these taxes was absolutely unconstitutional. I can not strengthen the argument which I then made, and I ask leave to print at this place in my remarks the major portion of that speech, leaving out some of the introductory re-

marks:
"There were four different acts of Congress levying a tax upon raw cotton. One was the act of July 1, 1862, which levied a tax of one-half of 1 cent per pound. The next was the act of March 7, 1864, which levied a duty of 2 cents per pound. The third was that of July 13, 1866, which levied a tax of 3 cents per pound, and the last was the act of March 2, 1867, which levied a tax of 2½ cents per pound. On the 3d day of February, 1868, Congress passed an act liberating cotton from all taxes thereafter.

"In order that we may fully understand the legislation in this behalf, I call the attention of the House to these different acts of Congress.

"The several statutory provisions laying taxes on cotton are as follows:

as follows:

"Act of July 1, 1862:

"On and after the 1st day of October, 1862, there shall be levied, collected, and paid a tax of one-half of 1 cent per pound on all cotton held or owned by any person or persons, corporation, or association of persons; and such tax shall be a lien thereon in the possession of any person whomsoever. And further, if any person or persons, corporation, or association of persons shall remove, carry, or transport the same from the place of its production before said tax shall be paid, such person or persons, corporation, or association of persons shall forfeit and pay to the United States double the amount of such tax, to be recovered in any court having jurisdiction thereof: Provided, however, That the Commissioner of Internal Revenue is hereby authorized to make such rules and regulations as he may deem proper for the payment of said tax at places different from that of the production of said cotton: And provided further, That all cotton owned and held by any manufacturer of cotton fabrics on the 1st day (of) October, 1862, and prior thereto, shall be exempt from the tax hereby imposed." (12 Stat. L., p. 465.)
"Act of March 7, 1864:

"From and after the passage of this act, in lieu of the duties provided in the act referred to in the first section of this act, there shall be levied, collected, and paid upon all cotton produced or sold and removed for consumption, and upon which no duty has been levied, paid, or collected, and paid upon all cotton produced or sold and removed for consumption, and upon which no duty has been levied, paid, or collected, and paid upon all cotton produced or sold and removed for consumption, and upon which no duty has been levied, paid, or collected, and paid upon all cotton produced or sold and removed for consumption, or association of persons remove, carry, or transport the same, or procure any other party or parties to remove, carry, or transport the same from the place of its production, with the intent to evade the duty thereon, or to defraud t

exempt from duty at the time of and after the sale thereof, and the same shall be marked free, and the purchaser furnished with such a bill of sale as shall clearly and accurately describe the same, which shall be deemed and taken to be a permit authorizing the sale or removal thereof. (13 Stat. L., p. 15.)

"Act of July 13, 1866:

"'There shall be paid by the producer, owner, or holder, upon all cotton produced within the United States, and upon which no tax has been levied, paid, or collected, a tax of 3 cents per pound, as hereinafter provided \* \* \* and such tax shall be and remain a lien thereon, in possession of any person whomsoever, from the time when this law takes effect, or such cotton is produced, as aforesaid, until the same shall have been paid.' (14 Stat. L., p. 98.)

"Act of March 2, 1867:

"On and after the 1st day of September, 1867, a tax of 2½ cents per pound only shall be levied, collected, and paid on any cotton produced within the United States.' (14 Stat. L., p. 471.)

"Act of February 3, 1868:

"'All cotton grown in the United States after the year 1867 shall be exempt from internal tax; and cotton imported from foreign countries on and after November 1, 1868, shall be exempt from duty.'" (15 Stat. L., p. 9.)

"When the tax of 1862 and that of 1864 was levied the countries of the countri

"When the tax of 1862 and that of 1864 was levied the country was in the throes of civil war, and there may be something in the idea sometimes advanced that the exigencies of war demanded and justified the setting at naught of statutory laws and constitutional provisions. I do not subscribe to that doctrine, because I believe that in a republican government such as ours there can arise no circumstances, there can exist no conditions, there can be no emergencies which would justify the National Legislature in violating the solemnly enacted provisions of the organic law.

Be that as it may, there can be no sort of question but that the act of 1866 and the act of 1867 were both passed in a time of profound peace, and therefore can not in anywise be regarded "war measures"; and if the gentlemen will examine the statement which I shall ask permission to incorporate in my remarks, they will find that the great bulk of the taxes levied and collected on raw cotton came from the acts of 1866 and 1867. The tabulated statement of the amounts annually collected in the different States in pursuance of these acts of Congress has been furnished by the Secretary of the Treasury and is as follows:

Statement showing internal-revenue tax receipts from raw cotton.

"So far as I have been able to find, and I have made exhaustive research, only one case has ever been brought in the courts directly affecting these acts of Congress levying a tax on cotton, and that suit was brought to test the validity of the act of

July 13, 1866.

"On the second Monday in June, 1867, William M. Farrington commenced an action in the law court of Memphis, Tenn., against Rolfe S. Saunders, a collector of internal revenue, for damages for the seizure of 148 bales of cotton which had been assessed by an internal-revenue assessor for taxes amounting to \$2,005.74. The case was removed to the United States circuit court for the sixth circuit by Saunders, and that court decided in his favor. Farrington appealed to the Supreme Court of the United States on December 6, 1867, and the judgment of the court below was affirmed by the Supreme Court—a divided court, there being only eight justices who heard the case, and they stood four to four—February 20, 1871.

"It can be found in only one volume, and that is a volume known as Records of Briefs, volume 216.

"Mr. GOULDEN. Will the gentleman permit an interruption right there? Why was not that decision reported?

"Mr. CLARK of Florida. I do not know. The fact is that it

"Mr. Sims. I would like to ask the gentleman a question. Were any written opinions given by the divided court either

way? "Mr. CLARK of Florida. No. "Mr. SIMS. There is no way, then, to get a written statement of the four justices who contended against the constitutionality

"Mr. Clark of Florida. No, sir; there is not. All that is contained in the volume that I referred to is copies of the pleadings and the argument of counsel on both sides, with a statement as to the court's finding. But the judgment was affirmed solely because of a divided court. Four were in favor of affirmance, and four were in favor of reversal, and that, of course, resulted in affirmance of the judgment of the court

"The facts in the case appear in the following case agreed, which had been filed in the circuit court at the September term,

"The plaintiff and defendant have agreed that the above cause, now pending in the circuit court of the United States for the district of west Tennessee, shall be tried by the court without the intervention of a jury, upon the following facts, which are submitted and agreed upon by both parties, to wit:

"1. That on the 26th day of June, 1867, the plaintiff, William M. Farrington, was the holder and owner, in his own right, of 148 bales of cotton, of the net weight of 66,858 pounds. That said cotton was the growth of and produced within the United States.

"2. That no internal revenue or other tax had been levied, paid, or collected upon said cotton.

"3. That on the said 26th day of June, 1897, H. F. Cooper, assistant United States assessor for the eighth district of the State of Tennessee, within which said district said cotton then was, acting under the provisions of the act of Congress of the United States, approved 13th July, 1866, assessed a tax of 3 cents per pound upon said cotton, making in the aggregate the sum of \$2,005.74, and returned said assessment on that day into the office of the defendant, who is the United States revenue collector for said district.

"Mr. Sims. Mr. Chairman, I would like to ask the gentle-

"Mr. Sims. Mr. Chairman, I would like to ask the gentle-man from Florida [Mr. CLARK] one question. Does the statement show the issue raised in the case—that is, the grounds of the issue?

"Mr. CLARK of Florida. Yes, sir; fully and completely.

"4. That the plaintiff on the same day protested against said assessment, for the reason that said assessment was without authority of law, said act of Congress of the 13th of July. 1866, being contrary to the provisions of the Constitution of the United States of America and void.

"5. That on the 27th day of June, 1867, the defendant, who is the

the provisions of the Constitution of the United States of America and void.

"5. That on the 27th day of June, 1867, the defendant, who is the legally authorized United States internal-revenue collector for said district, the said cotton being then within said district, demanded said tax of 3 cents per pound on said cotton, amounting in the aggregate to the said sum of \$2.005.74, from the plaintiff.

"6. That the plaintiff then and there protested against said tax, and protested against the defendant's demand, and objected to pay the same for the reasons assigned in his protest against the assessment of said tax, and was removing said cotton from said district.

"7. That the defendant then and there, on the day aforesaid, averred that he would, as internal-revenue collector, seize said cotton, and threatened the plaintiff then present that he would forthwith seize said cotton unless said tax was paid to him.

"8. That the plaintiff thereupon and by reason of said threats paid to the defendant the said sum of \$2.005.74, lawful money of the United States, that being the amount of said tax, under protest.

"9. That on the same day the plaintiff demanded said money back from the defendant; that the defendant refused to refund it, and the plaintiff thereupon on the same day duly appealed to the Commissioner of Internal Revenue, at Washington, according to the provisions of law in that regard and the regulation of the Secretary of the Treasury, established in pursuance thereof.

"10. That the plaintiff's appeal, the same containing a properly certified record of the acts of the said assessor and the defendant, and the reasons of plaintiff's protest, were duly forwarded to and laid before the Commissioner of Internal Revenue at Washington, who examined the plaintiff's claim for the refunding of said sum of \$2,005.74,

and rejected it, for the reason that he regarded the law imposing a duty of 3 cents per pound upon cotton as constitutional.

"11. That the action of the commissioner was on the 1st day of August, 1867, and within six months before the suing out of summons and commencement of the plaintiff's action in this cause.

"12. That the plaintiff and defendant were forthwith notified by the Commissioner of Internal Revenue of his action in the premises, and on the 10th day of August, 1867, the plaintiff again, and after notice as above to the defendant, demanded to have said sum of \$2,005.74 paid back to him, which the defendant refused.

"13. That the amount in controversy in this cause is more than \$2,000.

\*14. That the following tabular statement shows the growth and production of cotton within the United States from the year 1820-21 to the year 1866-67, inclusive, in bales:

Judgment.

"Upon the foregoing case agreed, Judge Trigg rendered judgment as

follows:

"And upon consideration of the same the court is of the opinion that the said act of Congress of the 13th of July, 1866, imposing an internal-revenue tax of 3 cents per pound upon cotton grown and produced within the United States is constitutional and valid. and that the law of the case upon the facts agreed is with the defendant. It is therefore considered by the court that the defendant go hence and

recover of the plaintiff, and of T. A. Nelson, his security therefor, the costs of this suit, and that execution issue.

"In the Supreme Court of the United States briefs were filed by P. Phillips, W. L. Sharkey, Albert Pike, James Hughes, Robertson Topp, J. A. Campbell, Robert W. Johnson, and B. R. Curtis, for Farrington; and by Attorney General Akerman, Assistant Attorney General C. H. Hill, and, later, by Attorney General E. R. Hoar, and Assistant Attorney General W. A. Field, for Saunders.

"Mr. SPARKMAN. Will my colleague allow me to ask him a question?

"Mr. CLARK of Florida. Certainly.

"Mr. SPARKMAN. Did either one of the justices file any opinion in the case?

'Mr. CLARK of Florida. No. sir; they did not.

"Mr. Sparkman. Then your remarks embrace not the opinion, but only the findings of fact?

'Mr. CLARK of Florida. That is all.

"Counsel for Farrington contended that the acts laying the tax on cotton violated all the provisions of the Constitution of

the United States delegating the right to levy and collect taxes.

"Counsel for Saunders controverted this position, and relied mainly upon the case of Hylton v. United States (3 Dallas, 171). Their contention was summarized in the brief of Attorney General Hoar as follows:

"If the cotton tax imposed by the act of 1866 was a direct tax, then, inasmuch as it was not laid by the rule of apportionment, it must be pronounced unconstitutional. It must also be pronounced unconstitutional if it was an export tax. But if, on the other hand, the tax was an indirect one simply, it is submitted that there was no conflict between the provision referred to and the Constitution, and its validity should be nfilmed. He also contended that 'the tax on cotton of 1866 is not a direct tax, being neither a tax on land nor a tax on slaves or other capitation tax.

"I desire to call the attention of the House especially to the admission made by Attorney General Hoar in his brief in the Farrington case that-

"If the cotton tax imposed by the act of 1866 was a direct tax, then inaxmuch as it was not laid by the rule of apportionment it must be pronounced unconstitutional.

"Was it a direct tax? Let us now examine the constitutional provisions applicable to this tax. What are they? Upon an examination of the Constitution it will be found that it contains only four provisions respecting Federal taxation, and they are as follows:

"I. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. (Art. I, sec. 2, clause 3.)

"The fourteenth amendment modified this provision so that the whole number of persons in each State should be counted, 'Indians not taxed' excluded.

"2. The Congress shall have power to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States. (Art. I. sec. 8, clause 1.)

"3. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken. (Art. I, sec. 9, clause 4.)

"4. No tax or duty shall be laid on articles exported from any State. (Art. I, sec. 9, clause 5.)

"In the light of these constitutional provisions, I desire to call attention briefly to the objections which lie to the levy and collection of all these taxes. First, my insistence is that each and every one of the acts referred to levied a direct tax upon raw cotton, which was violative of that provision of the Constitution which prohibits the levy of a direct tax, except it be done by the rule of apportionment; that Congress has the power to levy direct taxes is not now and never has been questioned since the Constitution itself was adopted. The Constitution says, in Article I, section 2, clause 3, that 'Representatives and direct taxes shall be apportioned among the several States which may be included within this Union, according to their respective numbers."

Gentlemen will search the four enactments of Congress in this behalf in vain for any Provision levying the tax in accordance with that requirement of the organic law.

"Again, in Article I, section 9, clause 4, we have this provision: "No capitation or other direct tax shall be levied unless in proportion to the census or enumeration hereinbefore directed to be taken.

"In none of these statutory enactments will you find any provision that these taxes are to be laid 'in proportion to the

census,' as is positively required.

"I desire also at this place to call the attention of this House to the historical fact that so great was the fear of members of the Constitutional Convention that Congress might have the power to levy direct taxes without regard to the rule of apportionment or the population of the different States, as shown by the census, that the Constitution itself would never have been adopted by the people of the different States if they

had not been solemnly assured by the leading statesmen of that day that it would never result in oppressive taxation or violate in that respect the principle of equality. [Applause.] That this is true I apprehend no one will deny, and I cite those who desire to investigate the subject further to The Federalist,

No. 36.
"In the argument of Mr. Phillips, of counsel for Farrington, who was plaintiff in error in the Supreme Court of the United States in the case of Farrington against Saunders, in referring to these constitutional provisions we find this strong lan-

"By these restrictions the States supposed that they had protected themselves against partial or corrupt legislation. For indirect taxation they established uniformity; for direct they secured apportionment according to the census.

"In the history of this Government, Congress has several times resorted to the levying of direct taxes for the purposes of the Government. But in each and every case, with very few exceptions (and in those exceptions the money was subsequently refunded), Congress has always laid the tax by the rule of apportionment. [Applause.]
"Perry on Political Economy, page 443, defines a direct tax

as follows:

"A direct tax is levied on the very persons who are themselves expected to pay it; an indirect tax is demanded from one person in the expectation that he will pay it provisionally, but will indemnify himself in the higher price he will receive from the ultimate consumer. Thus the income tax is direct, while duties laid on imported goods are laddlessed.

"There can, I think, be no question but that these taxes come squarely within the definition of a direct tax given by Perry. There has never been any argument worthy of the name to the

contrary.

"I suppose that the best defense that has ever been made for the levy of these cotton taxes was made in a letter to Hon. George S. Boutwell, then Secretary of the Treasury, by the Hon. Israel Kimball, at that time Commissioner of Internal Revenue. The opinion of Mr. Kimball can be found in Executive Document No. 181, Forty-second Congress, third session. It is covered in a letter from the Hon. George S. Boutwell, Secretary of the Treasury, under date of February 4, 1873, and directed to the Hon, James G. Blaine, at that time Speaker of the House of Representatives. Mr. Kimball consumes some 14 pages undertaking to bolster up the right of the Government to insist upon these taxes. But when his entire argument is sifted and brought down to its last analysis, the one main reason that he gives to support his contention that these taxes were indirect and not direct is his statement, unsupported in reason or by fact, that the producer did not in fact pay the tax: that the tax was added to the selling price and the consumer paid it. With all due respect to Mr. Kimball, this contention in the minds of those who know the present situation, and who have been familiar with conditions in the cotton-growing section of our country for the past 35 or 40 years, is simply absurd, impossible, and ridiculous. No man who ever lived on a farm, South, North, East, or West, but who knows that the farmer has no more to do with fixing a price for his products than has the man in the moon.' When a farmer has anything to sell he is forced to accept whatever may be offered him by those who buy. When the farmer desires to buy he is forced to pay the price put on the goods by the seller. It is notorious in the South that the price of cotton has always been fixed in the market at Liverpool.

"Messrs. Hughes and Sharkey, of counsel for Farrington, have, however, answered this contention so much better than I can that I shall adopt their argument, which, with reference to Mr. Kimball's contention, is as follows:

Mr. Kimball's contention, is as follows:

"Is it (this tax) levied on the person who pays it, or does some other person ultimately pay it? Can the planter add this to the price of the cotton when he sells it? The court must assume this; otherwise it is a direct tax. Can the court assume it in the face of the facts? Liverpool is the great cotton mart of the world and controls the price of cotton. Can the planter who ships his cotton to Liverpool add this tax to the price? If the Southern States had entire control of the market, or a monopoly, perhaps he might, but there the cotton of the United States comes in competition with the cotton of about 12 or 15 other countries, and the planter's price must conform to the standard there fixed. Consequently he is not remunerated to the value of a farthing a bale. The whole loss falls on him. He is the person who pays it.

"If continues will investigate the debates hed in the Con-

"If gentlemen will investigate the debates had in the Constitutional Convention on this subject of taxation, they will readily see that the contention which I make here and which was made by the planter's attorneys in the Farrington case is absolutely correct. Gentlemen upon that investigation will find that as the taxing power was originally introduced in the report of the Committee of Detail it stood-

"The Legislature of the United States shall have power to lay and collect taxes, duties, imposts, and excises. (See Madison's Debates,

"If this clause had stood as the Committee of Detail originally reported it, it would have given to Congress unlimited power of taxation, which might have been used to the advantage of some States and to the prejudice of others, and for this reason, which was conceded by all, when this taxation matter came before the convention itself for adoption, it was amended by adding thereto these words:

"'But all such duties, imposts, and excises shall be uniform throughout the United States.'

"And right here is the provision of the organic law under which it is sought to justify the levy of these taxes. The insistence of those who support the legality of the tax levy is that the tax is laid by the rule of uniformity, as it is stated in the act that the tax is to be levied on 'all cotton produced within the United States.'

"This clause is quoted and gentlemen say that as the tax is laid upon all cotton in the United States it is necessarily uniform and fully complies with the constitutional requirement. If cotton were grown in all the States of the Union, this contention would be eminently correct, but when it is known to the courts and known to the Congress and known to every one that at the time of the levy of these taxes cotton could not be grown in any but 11 States, and that while the act levied the tax upon all cotton grown within the United States, it would not cost some States one penny, and would extort from the pockets of the people in other States millions of dollars, the plea of uniformity

vanishes into thin air. [Applause.]

"The case relied on by the advocates of the legality of these acts is the case of Hylton v. The United States, to be found in 3 Dallas, page 171. This was a case of an act of Congress levying a tax upon carriages, and an investigation of it will show that the court sustained the constitutionality of the act largely, and, in fact, I might say wholly, upon the ground that it was a tax on the consumer of an article. The three learned judges in that case, who delivered written opinions, concurred in intimating (they say expressly that they do not give a judicial opinion) that the direct taxes contemplated by the Constitution are only two, to wit, the capitation tax and the tax on land. Even if the intimation of these judges were correct, and that direct taxes as referred to in the Constitution were limited to two, and that those two were the capitation tax and the tax on land, then the contention which I here make would be sound. I assert this because the courts and the law writers of approved authority all concur in the holding that the product of land, whether it be in rentals or whether it be in crops, stands upon exactly the same footing as the land itself. In other words, if the levy of a tax upon land would be a direct tax, and it should be required that the tax be levied by the rule of apportionment, then cotton, corn, wheat, or other raw product of the land itself would likewise be considered as land and the rule of apportionment would necessarily have to be complied with.

"I desire also to call the attention of the House to the fact that the Supreme Court of the United States, when it delivered the opinion in the Hylton case, was denied access to the debates in the Federal Convention. It is recognized in all courts that one of the very best rules of statutory or constitutional con-struction is the will or the meaning of the legislator as contained in the debates leading up to the adoption of the particular enactment. The debates in the Federal Convention were secret. No copies were allowed, and when the convention adjourned the journals were placed in charge of the President and they were not laid before Congress, or the country, or published, until after the decision in the Hylton case was made. This statement I get from the argument of Mr. Robertson Topp, of counsel for appellant in the Farrington Saunders case,

and Mr. Topp, after making this statement, says:

"Thus it will be seen that the court was deprived of one of the best means of determining the real meaning of the Constitution, viz, the reasons given by those who made it.

"Referring to this fear that some of the States would be in the power of the others and that grave injustice would be done the weaker ones in the matter of taxation, Mr. Madison, in the convention, said:

"It is represented to be oppressive that the States which have slaves and tobacco should pay taxes on these for Federal wants when other States who have them not would escape. But does the Constitution on the table admit of this? On the contrary, there is a proportion to be laid on each State according to its population.

"Mr. Topp, in his argument in the Farrington case, submits some figures taken from the Census of 1860, which strike me as being a powerful exposition of what might occur and of the injustice which might be perpetrated, and which, in fact, was perpetrated in the levy of these cotton taxes. I desire to call attention to the table referred to.

By referring to the Census of 1860 it will be seen that the total population of the United States was	31, 445, 089
By the same table the population of the 11 cotton- producing States was	9, 103, 333
By the same table the value of the real and personal property of the United States in 1860 wasOf the 11 cotton-producing States	\$16, 159, 616, 068 \$5, 402, 165, 107
By referring to the agricultural report of 1867, page 90, It will be seen the corn crop of that year was worth.	\$610, 948, 390
The wheat crop	\$421, 796, 460 \$172, 472, 970
The hay crop.  The cotton crop.  And that including rye, barley, buckwheat, potatoes,	\$372, 864, 670 \$201, 470, 495
and tobacco, the whole crop of 1867 was worth	\$2, 007, 462, 231

"By referring to the census of 1860 it will be seen that the cotton crop, except 100 bales raised in Missouri and 6 bales in Illinois, was entirely raised in the 11 cotton States, and such has been the case since the existence of those States and

since cotton was produced for export.

"By referring to the tax laws of the United States it will be seen that cotton and sugar were the only crude products of the soil taxed-that corn, which grew in every State from Maine to Texas, worth treble, wheat worth double, hay worth nearly double the cotton crop; that in fact the whole crop of every character and description, passes free, whilst cotton, less than one-tenth in value, is singled out and made to bear ruinous burdens-1867, 331 per cent of the gross value-whilst more than two-thirds of the people escaped the tax.
"Is this fair? Is this just? Is this uniform?

"The attorneys for the Government in the Farrington case, in addition to the contention that these taxes on cotton were not direct taxes, took the further position that the tax on cotton was an excise and therefore the rule of apportionment did not apply. Let us examine this contention under the light of the Constitution.

"The Encyclopedia Britannica under the article excise defines an excise to be

"A term used in finance to signify the duty charged in a country upon articles produced in it before they are permitted to get into the possession of the public.

"Judge Storey says:

"An excise is an inland imposition or duty; a duty or tax laid on certain articles produced or consumed at home.

"Accepting these definitions as being correct, how stand the cotton taxes with relation to clause 1, section 8, Article I of the Constitution of the United States? That clause reads as follows:

"The Congress shall have power to lay and collect taxes, duties, imposts, and excises, to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

"Were these taxes uniform throughout the United States? That is the gist of the whole question, and upon the correct answer to that question must stand or fall the cotton taxes.

We are permitted in the discussion of a question like this, whether that discussion take place in the court room or in the legislative halls, to take notice of the physical conditions of the country. We are permitted to consider those things which are matters of common information. Acting upon this rule, the Congress must have known that when these taxes were levied cotton was grown in only eleven of the States of the Union. Outside of those eleven States I believe that no cotton was grown in the United States except about one hundred bales in the State of Missouri and about six bales in the southern part of the State of Illinois. This being true—and no one will question its correctness—can it be contended that these acts were uniform throughout the United States?

"In order that the Congress may see and know and understand just how uniform these acts were in their practical operation, if they will turn to the table that I have incorporated in my remarks they will see that under these four acts of Congress levying taxes upon raw cotton the State of Georgia paid into the Treasury of the United States \$11,897,094.98, while the State of Kansas, with a population almost as large, only paid into the Treasury of the country \$286.15. And so in many other cases these figures are of themselves fully sufficient to show the injustice and gross inequality of these cotton taxes. But I have discovered in the act of August 5, 1861 (12 Statutes at Large, pp. 294–295), some figures which by comparison with those of the table referred to will make the inequality still more impressive from another point of view. That act laid a direct tax of twenty millions of dollars upon the United States and apportioned the same among the several States according to population. It was a constitutional act, and it is highly instructive to compare the amounts apportioned under it to the several cotton States with the amounts actually collected

under the operation of the unconstitutional cotton-tax acts. I have done this in a tabular statement which I now present: Table showing direct taxes apportioned to the several cotton-growing States by act of August 5, 1861, and amounts collected in same States under the cotton-tax acts.

Name of State.	Apportion- ment un- der act of 1861.	Collected under cot- ton-tax acts.
Georgia Alabama. Mississippi. Louisiana.	\$584,367 529,313 413,081 385,886	\$11,897,094 10,388,072 8,742,995 10,098,501
Florids Arismass Tennesse North Carolina South Carolina	77, 522 261, 886 669, 498 576, 194 363, 570	918, 944 2, 555, 638 7, 873, 460 1, 959, 704 4, 172, 420

"It would be hard to find in the history of the world a more grievous, oppressive, or unjustifiable exercise of arbitrary power than that illustrated by this table. But that is not all. direct taxes laid by the act of 1861, in conformity with the Constitution, have been refunded to the States from which they were collected; while these illegal and unconstitutional cotton taxes have been covered into the Treasury, and used for the benefit of the United States, and no restitution made. It is an

"Suppose the acts of Congress imposing these taxes had provided that eleven States, naming them, should pay these taxes and that the remaining States should be exempt therefrom. Would it be contended for a moment that this was a compliance with the constitutional provision which required that such taxes should be uniform throughout the United States? Certainly not. Can Congress by simply placing the words 'all cotton produced in the United States' evade this provision, when Congress knew, or must have known, that the whole burden would fall upon cleven States and would not and could not be made uniform in its operation throughout the United States? Such a contention would merely be a juggling with words and a prostitution of a solemnly enacted provision of our organic law unworthy of the merest tyro in constitutional law. If our Constitution can be distorted and emasculated by such legislative legerdemain, then the right to live, the right to be free, and the right to pursue happiness, for which our fathers fought and died in the Revolution, are not protected by our sacred bond of union. Not in anger, but in a broad spirit of brotherly love and patriotic devotion to our beloved country, let me appeal to the majority to right this most grievous wrong to constitutional government.

"I also take the position, Mr. Chairman, that these taxes are obnoxious to another provision of the Constitution. Clause 5 of section 9, Article I, provides:

"No tax or duty shall be laid on articles exported from any State.

"That cotton, when these different acts were passed by Congress, was an article of export was well known. Practically every pound of cotton grown in the Southern States during the period from 1862 to 1868 was grown expressly for export, and export to foreign countries. The courts and the law writers of approved authority agree that the clause of the Constitution to which I have just called attention applies as well to articles exported from one State in the Union to another State in the Union as it does from one of our States to foreign countries.

"It is said that the cotton crop of 1867 was 2,240,282 bales, of which 1,657,015 bales were shipped to foreign parts, leaving for home consumption 553,267 bales, of which it is estimated that about 60,000 bales were manufactured in the cotton-growing States. In other words, 60,000 bales out of a total of 2,240,282 bales remained in the States where the cotton was grown, thus showing that the great bulk of the crop was exported and establishing raw cotton as an export beyond all question.

That this constitutional provision applies to the exporting of goods from one State to another in the Union, I desire to call attention to the definition of the word 'export' given by Web-

ster. He says that exporting means-

"To carry out, to convey, or transport any traffic, produce, or goods, from one country to another, or from one State or jurisdiction to another, either by water or land. We export wares and merchandise from the United States to Europe. The Northern States export manufactures to South Carolina and Georgia.

"In the case of Almy v. California the court decided that articles of export from one State to another could not be taxed. No court in this country has ever rendered an opinion, not even excepting the Hylton case, that is contrary to the contention which I make for the refunding of this money wrongfully exacted from the people of these different States.

"We are standing in this demand squarely upon the law as it has been declared, and upon our rights under the Constitution. as those rights have always been conceded. Pacific Insurance Co. v. Soule, the learned judge who rendered the opinion in that case said:

"The taxing power is given in the most comprehensive terms. The only limitations imposed are that direct taxes, including the capitation tax, shall be apportioned; that duties, imposts, and excises shall be uniform, and that no duty shall be imposed on articles exported from any State. With these exceptions, the exercise of the power is in all respects unfettered. (7 Wallace, p. 446.)

"In asking the passage of this bill and insisting upon this measure of retarded justice, I stand squarely upon the law as laid down by the court in the case of Soule. This Government ought to have the right to tax anything and everything when the necessities of the Government require it. But this Government in the exercise of that right should comply strictly with every provision of the Constitution, else constitutional government is a failure. Every man who loves his country and who honors the flag must agree in preserving without variance each and every clause of our organic law as framed and handed down to us by the patriots who planted the seeds of liberty in the friendly soil of this western world.

"Since I have referred to the direct-tax act of 1861, it may be well, in this place, to refer to other acts amendatory of it, and to certain decisions of the courts construing the same. The acts of June 7, 1862, 12 Stat. L., 422: January 6, 1863, 12 Stat. L., 640; March 3, 1865, 13 Stat. L., 501, and the resolution of February 25, 1867, 14 Stat. L., 568, made provisions for the assessment and collection of this tax.

"All these acts were construed by the Court of Claims in the case of Seabrook v. United States (Court of Claims Reports, 39), Harrison's case (20 id., 176), and Thompson's case (20 id., 270). In all these cases it was held that where a tax has been illegally collected, the money should be refunded. And in Miles v. Johnson (59 Fed. Rep., 38, 40) it was held that the word 'tax' includes taxes which have been illegally levied, as well as those which have been illegally collected, though legally levied. In nearly all jurisdictions provision is made by statute for the refunding of taxes illegally exacted (27 American and English Encyclopedia of Law (2d ed.) 756-757). And the word 'exacted' includes the levy as well as the collection.

"The act of June 8, 1872 (17 Stat. L., 339), restored to the former legal owners all lands then held by the United States under the direct tax acts upon payment of taxes, interest, expenses, etc., and released the title of the United States to the said lands. And subsequent statutes have, as I have said, refunded the entire amount collected under the act of 1861 and the acts amendatory of it to the several States. See the act of March 2, 1891, 'to credit and pay to the several States and Territories and the District of Columbia all moneys collected under the direct tax levied by the act of Congress approved August 5, 1861.' (26 Stat. L., 822.) By this act it was en-acted that 'it shall be the duty of the Secretary of the Treasury to credit to each State and Territory of the United States and to the District of Columbia a sum equal to all collections by set-off or otherwise made from said States and Territories and the District of Columbia, or from any of the citizens or inhabitants thereof, or other persons, under the act of Congress approved August 5, 1861, and the amendatory acts there-'that all moneys due to the United States on the quota of direct tax apportioned by section 8 of said act are hereby remitted and relinquished.' And an appropriation was And an appropriation was made of 'a sum sufficient to pay all money found due to them under the provisions of this act.' In almost every general deficiency bill which has passed this House within 20 years there has been an appropriation for refunding taxes illegally collected. I will cite only two instances out of many—the act of April 30, 1890 (26 Stat. L., 547), appropriated \$31,156.43 'for the refunding of taxes illegally collected'; the act of March 3, 1891 (26 Stat. L., S91), appropriated \$12,317.42 for the same purpose. Section 3689 of the Revised Statutes continuously provision requiring all such taxes to be refunded tains a general provision requiring all such taxes to be refunded upon application of the party aggrieved.

"Now, I claim that the cotton taxes were not only illegally collected but illegally levied; because, in addition to the violation of the rule of apportionment, Congress, in laying these taxes, also violated the constitutional provision against laying duties on exports from any State, and those provisions relating to due process of law. But a literal compliance with the man-datory provisions of the Constitution, whether affirmative or negative, is a condition precedent to the validity of any law laying taxes on the property of the people. Nor does it matter, therefore, whether this cotton tax was a war tax, as the gentle-man from Georgia says it was, or not; for the taxing power is restricted and qualified in respect to all taxation by all the general limitations which are imposed upon its authority by the Constitution. (Wilkes Co. v. Coler. 180 U. S., 506, 525.) The Constitution. (Wilkes Co. v. Coler, 180 U. S., 506, 525.) gentleman from Georgia is, however, again mistaken, unquestionably, as to the two last acts, and, in my opinion, the first two also.

Furthermore, these acts violate the fundamental principle of all taxation. We are inclined on any and all occasions to boast that under our beneficent form of government 'all men are equal before the law.' The rich and the poor, the great and the small, the strong and the weak, we have always been taught, must, in proportion to ability, aid in bearing the burdens of government while permitted to share its blessings.

"That principle, which is as fully applicable to the action of the Federal Government as to that of any State, county, or municipal government, was stated by Judge Cooley in the case of The People v. Town of Salem (20 Mich., 452, 474), as follows:

"The tax must be laid according to some rule of apportionment, not arbitrarily or by caprice, but so that the burden may be made to fall with something like impartiality upon the persons or property upon which it justly and equitably should rest. A State burden is not to be imposed upon any territory smaller than the whole State, nor a county burden upon any territory smaller or greater than the county. Equality in the imposition of the burden is of the very essence of the power itself, and though absolute equality and absolute justice are never attainable, the adoption of some rule tending to that end is indispensable.

"Under this legislation the Government of the United States collected, mainly from the people of the Southern States, who had no voice in laying these taxes, the sum of \$68,072,388.99, and disposed of that sum as it did of legitimate revenue. Every man, no matter from what State he hails, or what may be his politics, should support this measure as an act of simple justice to the people who were wronged. In all fairness, that sum should be refunded to those from whom it was extorted, and I believe that the bill I have introduced to that end should have the support of every fair-minded man in Congress.

"Mr. GOULDEN. I would like to ask the gentleman if that included all the taxes collected on cotton from 1861 to 1868?

Mr. CLARK of Florida. That included all the money under the four acts of Congress collected and accounted for.

"Mr. SIMS. That includes all that went into the Treasury of the United States?

Mr. CLARK of Florida. Yes.

"Mr. Sims. But a great deal was collected that never went into the Treasury, and I do not understand that this makes the Government liable for that.

"Mr. CLARK of Florida. No; only for the principal collected and accounted for by being paid into the Treasury of the United States. No interest is asked, simply the principal.

"Surely, those who were compelled to pay these unconstitutional taxes should not be treated worse than those persons who, acting under the provisions of the sugar-bounty law, spent money in improvements and machinery needed for the production of sugar. When the sugar bounty was declared unconstitutional by the Court of Appeals of the District of Columbia (Miles Planting Co. v. Carlisle, 5 D. C. App., 138), Congress refunded to them, by the act of 1895, the money which they had expended in accordance with the act of 1890, known as the 'McKinley bill.' In construing the act of 1895, the Supreme Court of the United States, in the celebrated Sugar Bounty Case (United States v. Realty Co., 163 U. S., 442-443),

"Among the latest examples of payments that are not of a right or of any legal claim, but which are in the nature of a gratuity depending upon equitable considerations, are the cases just decided by this court of Blagge v. Balch, Brooks v. Codman, and Foote v. Women's Board of Missions, reported as one case in 162 U. S. 439. The claims in those cases are what have been known as the 'French spoliation claims,' being based upon depredations of French cruisers upon our commerce prior to July, 1801. An appropriation for their payment was made by Congress in 1891 upon the conditions and to the class of persons named in the act. Questions arose as to the proper interpretation of the act and as to the character of the payments provided for therein. The court held the payments were purposely brought by Congress within the category of payments were purposely brought by Congress within the category of payments that are not of right, but which are in the nature of a gratuity and as an act of grace, though founded upon a prior moral or honorable obligation to pay to some one who might be said in some way to represent the original sufferers. No question of the power of Congress to make such appropriation was raised by anyone.

No question of the power of Congress to make such appropriation was raised by anyone.

"The power to provide for claims upon the State founded in equity and justice has also been recognized as existing in the State governments. For example, in Guilford v. Chenango County (13 N. Y., 143), it was held by the New York Court of Appeals that the legislature was not confined in its appropriation of public moneys to sums to be raised by taxation in favor of individuals to cases in which legal demands existed against the State, but that it could recognize claims founded in equity and justice in the largest sense of these terms or in gratitude or in charity.

"Of course, the difference between the powers of the State legislatures and that of the Congress of the United States is not lost sight of, but it is believed that in relation to the power to recognize and to pay obligations resting only upon moral considerations or upon the general principles of right and justice, the Federal Congress stands upon a level with the State legislature.

"In truth, the general proposition that Congress can direct the payment of debts which have only a strong moral and honorable obligation for their suport is not, as we understand it, denied by the learned counsel for the United States."

"No one can deny that the claim of the cotton planters is altogether as valid as the 'sugar-bounty claims' or the 'French spoliation claims.' The cotton planters acted under the guaranty of the Constitution of the United States, that their products should not be taken from them without compensation or due process of law, unless by means of direct taxes apportioned among the several States according to numbers. This guaranty was violated by the Federal Government. Under the guise of taxation, the Government compelled them to contribute a large portion of their property to public uses. In the 'Income tax cases' it was clearly demonstrated that any law of this kind was invalid. What, then, is the legal consequence? Is it not clear that the Government assumed the responsibility of refunding to those from whom it took the money in question every cent so taken? But for the prevalence of sectional ill-feeling, these claims would have been paid 33 years ago. In the Forty-third Congress bills were introduced, with that end in view, by Mr. McKee of Mississippi, by Mr. White of Alabama on behalf of Mr. Alexander H. Stephens of Georgia, by Mr. Blount of Georgia, and also by Mr. Sheldon and Mr. Cook. In the Forty-fourth Congress a similar bill was introduced by Mr. Roger Q. Mills of Texas. These bills, respectively, were: H. R. 2250, Forty-third Congress, first session, to refund certain taxes collected by the Government of the United States on raw cotton during the years 1865, 1866, 1867, and 1868, introduced March 2, 1874, by Mr. McKee; H. R. 2338, Forty-third Congress, first session, to refund the cotton tax, introduced by Mr. White, on behalf of Mr. Stephens, who was absent on account of sickness; H. R. 1076, Forty-third Congress, first session, to refund taxes collected by the United States on raw cotton during the years 1863, 1864, 1865, 1866, 1867, 1868, introduced by Mr. Cook; H. R. 1632, Forty-third Congress, first session, to extend the time for collecting the cotton tax and reviving such claims as are now barred, introduced by Mr. Blount; H. R. 3448, Forty-third Congress, first session, to refund the cotton tax, introduced by Mr. Sheldon; H. R. 982, Forty-fourth Congress, first session, refunding the cotton tax to the producer of the cotton, introduced by Mr. Mills. All of these bills except Mr. Blount's were referred to the Committee on Ways and Means, but were never reported back. The men who prepared them were among the best lawyers then in Congress; but the animosities engendered by the late war were still too strong to secure for them a respectful hearing.

"Another reason and a very cogent one, and one which should appeal strongly to the conscience of Congress, is the fact that when these taxes were levied, when these acts of Congress were enacted, the 11 States affected by them and which had to bear the burden of over sixty millions of dollars of taxation, had no representatives in either branch of this Congress; no Representative in this House and no Senator at the other end of the Capitol was here to raise his voice or to cast his vote on these questions which so vitally affected the impoverished people of the 11 cotton-growing States.

"Therefore, Mr. Chairman, that provision of the Constitution with reference to representation and taxation was violated. It seems to me that this objection to the validity of the taxes in question ought to appeal more strongly, if possible, to the conscience of Congress than even the other clauses which were violated by these different acts. The Constitution says:

"Representation and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers.

"It has been said that-

"representation constitutes the genius of this Government, and to impose taxes or burdens without it is to change its character, but for taxation without representation the Government itself would never have existed.

"The stamp act, the act placing a duty on tea, and other acts of the British Parliament brought on the Revolution on the ground pure and simple that it was legislation without repre-[Applause.] This Government had its origin in the sentation. [Applause.] This Government had its origin in the protest of the fathers against taxation without representation. In 1766 on the question of the repeal of the stamp act in the British Parliament Lord Camden, formerly Chief Justice Pratt,

"My proposition is this:

"'I repeat it and will maintain it to the last hour. Taxation and representation are inseparable. Opposition is founded in the law of nature. For whatsoever is a man's own, it is absolutely his own. No man has the right to take it from him without his consent. Whoever attempts to do it does him an injury. Whoever does it commits a robbery.' (See 5 Bancroft's History, pp. 446-448.)

"In discussing the question of the right of Parliament to tax America, William Pitt in the House of Commons said:

"I will only speak to one point—the point which seems not to have been generally understood. I mean the right some gentlemen seem to have considered it a point of honor. If gentlemen consider it in that light, they leave all measures of right and wrong to follow a delusion that may lead to destruction. It is my point that this Kingdom has no right to lay a tax on the colonies. At the same time, I assert the authority of this Kingdom over the colonies to be sovereign and supreme in every circumstance of government and legislation whatsoever. They are the subjects of this Kingdom, entitled with yourselves to all the rights of mankind and the peculiar privileges of Englishmen, equally bound by its laws and equally participating in the constitution of this free country. The Americans are the sons of England. Taxation is no part of the governing or legislative power. The

"Mr. Pitt took this position solely on the ground that the colonies were not represented, and it must be remembered that taxation without representation was the great rallying cry of the colonists and their chief cause of complaint when they severed their relations with the mother country.

"James Burgh, the celebrated Scotchman, in discussing this

same question, said:

"No protext can justify taxing them (the colonies) so long as they continue unrepresented.

"The States affected by the cotton taxes were not only not represented when these several tax acts were enacted, but they were positively denied representation in both the Senate and House of Representatives by solemn resolution of both bodies.

"In December, 1805, the House of Representatives passed a resolution to this effect:

"That all papers which may be offered relative to the representation of the late so-called Confederate States of America, or either of them, shall be referred to the joint committee of fifteen without debate, and no members shall be admitted from either of said so-called States until Congress shall declare said States, or either of them, entitled to repre-

"On February 20, 1866, the House passed, and on March 2, 1866, the Senate passed, this resolution:

"Resolved by the House of Representatives (the Senate concurring), That in order to close agitation on the question which seems likely to disturb the action of the Government, as well as to kill the uncertainty which is agitating the minds of the people of the 11 States which have been declared to be in insurrection, no Senator or Representatives shall be admitted into either branch of Congress from any of said States until Congress shall have declared such State entitled to representation.

"As it has been repeatedly held by the Federal courts, and by all the departments of government, that these States were never out of the Union, you have here a Congress denying them representation and at the same time exacting taxes from them. 'Taxation without representation is robbery.' The remarkable spectacle was presented to the world of eleven States of this Republic solemnly declared by the different departments of government to be States in the Federal Union, yet by solemn resolution denied representation in the law-making body, and that law-making body exacting taxes from them on their principal product of over sixty millions of dollars. Surely now that the clouds of civil war have vanished and sectional hate, we are told, lies buried never to be resurrected, in this day of national unity and general good feeling and brotherly love, you will refund to us these moneys that have been wrongfully,

"In 1868 Congress repealed the tax on raw cotton. Why should this tax have been repealed? If the tax were just and constitutional and right, why repeal it? If it was constitutional and proper in 1862, 1864, 1866, and 1867, why was it not constitutional and right in 1868? And if it were constitutional,

why not retain it?
"But, Mr. Chairman, we are not left to these old decisions The Supreme Court of the United States has for comfort. more recently passed upon this question in the case of Pollock v. Farmers' Loan & Trust Co. As reported in United States Supreme Court Reports, vol. 158, at page 601, the Supreme Court of the United States has squarely and fairly declared these taxes to be illegal and unconstitutional. In the case stated, Hylton v. The United States (3 Dallas, p. 171), is further considered, and in view of the historical evidence cited, shown to have only decided that the 'tax on carriages involved was an excise and was an indirect tax.'

"Chief Justice Fuller, in rendering the opinion in that case,

said:

"In distributing the power of taxation the Constitution retained to the States the absolute power of direct taxation, but granted to the Federal Government the power of the same taxation upon condition that in its exercise such taxes should be apportioned among the several States according to numbers, and this was done in order to protect the States, which were surrendering to the Federal Government so many sources of income, the power of direct taxation, which was their principal remaining resource.

"The Chief Justice further said:

"Taxes on real estate being indisputably direct taxes, taxes on the lands or incomes of real estate are clearly direct taxes.

"Again he said:

"Taxes on personal property or on the income of personal property are likewise direct taxes.

"The Chief Justice further in the decision uses this lan-

"The tax imposed by sections 27 to 37, inclusive, of the act of 1894, so far as it applies to the income of real estate and of personal property, being a direct tax within the meaning of the Constitution and therefore unconstitutional and void because not apportioned according to representation of those sections constituting one entire scheme of taxation, is necessarily invalid.

"These were the 'income-tax cases,' and it will be remembered that the Chief Justice and four of his associates concurred in the opinion rendered by the majority of the court. It is true that four Associate Justices—namely, Mr. Justice Harlan, Mr. Justice Brown, Mr. Justice White, and Mr. Justice Jackson-dissented from the opinion, Mr. Justice Harlan using this language:

"The recent Civil War, involving the very existence of the Nation, was brought to a successful end and the authority of the Nation restored in part by the use of vast amounts of money raised under statutes imposing duties on income derived from every kind of property, real and personal, not by the unequal rule of apportionment among the States on the basis of numbers but by the rule of uniformity operating upon individuals and corporations in all the States, and we are now asked to declare, and the judgment this day rendered in effect declares, that the enormous sums thus taken from the people and so used were taken in violation of the supreme law of the land.

"There can be no receible question in view of the decision of

"There can be no possible question in view of the decision of the court in the 'income-tax cases' that it is the duty of Congress to refund the moneys collected by virtue of these tax statutes. [Applause.] It is said by some that Congress can not afford to do it because it involves such a large amount of money, more than sixty-eight millions of dollars. But when gentlemen view the case from that standpoint they must remember that the Government has had the use of this \$68,000,000 for 40 years and more; that it was originally wrung from the lean purses of people who were impoverished by 4 years of cruel, ceaseless war; that it was wrung from the lean purses of people whose homes had been laid in ashes, and whose every household was in mourning. They must remember that this money was taken from people who had no voice in the levying of it; that it was taken from a people who could least afford to bear the burden, and that now, after this rich, powerful Government has had the use of it without interest for more than 40 years, these people are simply asking that the principal be refunded. The Surreme Court of the United States has said, in effect, that it ought to be refunded; has said, in effect, that it would not be honest on the part of the Government to retain it. [Applause.]

"And just here, Mr. Chairman, I desire to say that my attention was called to this matter by a venerable statesman of this country, who gave most of his years in the service of his country in this House and as a soldier in the Union Army. Hon. Charles H. Grosvenor, who was a Member of the last Congress, and who for more than 20 years represented his district in this House, first called my attention to this matter and urged that we, who were primarily interested in behalf of our constituents, should make an effort to have the Govern-

ment act justly toward our people.

"On the 9th of the present month I addressed a letter to

Gen. Grosvenor, a copy of which I shall read.

"And I want to say here, Mr. Chairman, before I read it, that being the son of a Confederate soldier, living all my life in the South, imbued and filled with every sentiment that ever nerved and actuated that people, I am glad to know that men like this man who at times in my life I have thought were unnecessarily bitter-I am glad to know that in these latter days he, and people like him, of the North, commanding in their influence, loyal to their country, loyal to their States, loyal to every interest of this great Republic, are disposed to wipe out the last remaining differences between us, and treat us as citizens of the United States in very truth. [Applause.]

" JANUARY 9, 190S.

"Hon. Chas. H. Grosvenor,

"Athens, Ohio.

"My Dear General: On the first day of the present session of Congress I introduced a bill to refund the taxes collected under the several acts of Congress levying a direct tax on raw cotton. I was inspired to introduce and undertake to pass this bill by remarks which you made to me during a conversation we had during the last days of the Fifty-ninth Congress. I intend before many days to address the House in support of my bill, and desire to quote you on the subject, but as what you said to me was in course of an informal private conversation, I do not care to quote you without your consent. Again, I might, in just relying on my memory, misrepresent you, and, of course, I do not desire to do that.

"My recollection is that you said to me substantially while we were discussing what is called the illegal cotton tax, that the levy and collection of these taxes were wrong, illegal, and unconstitutional, that the Supreme Court had so decided, and that there was no valid reason on earth why the money collected should not be refunded to the rightful owners or to the States.

"Am I right as to this? I will certainly appreciate it very much if you will write me fully upon this subject, and give me permission to use your letter in connection with my speech. I will also appreciate it if you will cite me to the decision of the Supreme Court you referred to, wherein these tax acts were held to be unconstitutional.

"Thanking you in advance for your kind attention to this matter and with best wishes.

"Frank Clark.

with best wishes. "I am, yours, most truly, "A few days since I received this reply:

"FRANK CLARK,

"ATHENS, OHIO, January 13, 1908.

"Hon. FRANK CLARK. "Washington, D. C.

"Dean Sir: I have your letter of January 9. My recollection of our conversation is substantially the same as related by you. I understood myself then, as I understand now, that the practical effect of the Supreme Court decisions had been to hold the cotion tax unconstitutional. It is possible that I may be wrong, but you are at entire liberty to quote me if it is of the smallest benefit to you.

"With kind regards, yours, truly,"

"C. H. GROSVENOR.

"C. H. GROSVENOR.

"[Applause.]

"I desire now to ask permission to print in the Record an abstract of the history of efforts that have been made in the past looking to a refund of these taxes. In doing this I shall incorporate a brief statement of each bill introduced at different times by different Members of Congress some years back. I do not pretend to give them all, nor do I give them in chronological order, but I present these to show that our people can not be charged with laches in this matter.

"Those that I have been able to find are as follows:

"[H. R. 2354, Fifty-third Congress, first session. By Mr. Enloe.]

"That the Secretary of the Tressury issue to the governors of the several States in which cotton faxes were paid United States bonds in amounts specified for each State and count to the amount of taxes collected within the State. These bonds to be held by said States, to be refunded and distributed to the parties who naid the tax. In case of a surplus remaining, the funds to be devoted to the school fund.

"(There was no report on this bill.)

"[H. R. 281, Fifty-third Congress, first session. By Mr. Money.]

"[H. R. 281, Fifty-third Congress, first session. By Mr. Money.]

"That the Secretary of the Treasury issue noninterest-bearing Treasury notes in such denominations as may be deemed excedient to the several States in amounts equal to the cotton taxes collected therein, as indicated by the internal-revenue report. That the sum so paid shall be held in trust by the several States for the benefit of the cotton producers, to be paid to them under such provisions as each State may deem it proper to make. In case the producer can not be reimbursed, the sum not distributed shall become the property of the State. The claims must be filed with each State within two years after the passage of an act by such State providing for the distribution of the money refunded. That these notes shall become leval tender and shall not be canceled by the United States when received at the Treasury, but used as other money. (No report.)

"[H. R. 2356, Fifty-third Congress, first session, is same as 2354.]

"[H. R. 196, Fifty-third Congress, first session. By Mr. Wheeler.]

"That the Secretary of the Treasury shall pay money equal to the amount collected in cotton taxes to each State, said State to designate who shall be custodian of the fund. In case the tax was paid by the person to whom the cotton was shipped residing in another State, the State where said cotton was grown shall be the recipient. (No report.)

"[H. R. 138, Fifty-third Congress, first session. By Mr. Oats.]

"[H. R. 138, F'fty-third Congress, first session. By Mr. Oats.]

"IH. R. 138, F'fty-third Congress, first session. By Mr. Oats.]

"In the case of the Supreme Court holding the law under which cotten taxes were collected unconstitutional, any citizen who had paid the tax shall be permitted to bring suit for its recovery in the Court of Claims. Within 60 days after judgment, either the petitioner or the United States shall have the right of appeal to the Supreme Court, and when such appeal shall have been taken the court shall not try any case until the appeal case has been decided. The Court of Claims shall decide all suits which are brought within one year of the Supreme Court's holding the original tax law to be unconstitutional. (No report.)

"[H. R. 124, first session, Fifty-third Congress. By Mr. McRac.]

"That the Secretary of the Treasury pay to each State a sum equal to the cotton taxes collected therein. The said States to pay to such producers as shall make claim within two years after the passage of this act. The remainder, if any, shall be used as a permanent school fund. In no case shall payment be made to any assignee of such claim. (No report.)

"[H. R. 2040, first session, Fifty-second Congress, is same as 124, first session, Fifty-third Congress, No report.]

"[H. R. 2607, same as H. R. 196, first session, Fifty-third Congress. No report.]

"[H. R. 650, first session, Fifty-second Congress, same as 2354, first session, Fifty-third Congress. No report.]

"[H. R. 8365, first session, Fifty-second Congress. By Mr. Oats.]

"This bill is same as introduced by Mr. Oats in Fifty-third Con-ess. The House report is 2528, first session, Fifty-second Congress. "IH. R. 8366, first session, Fifty-second Congress. By Mr. Oats.]

"That the Secretary of the Treasury pay to each State an amount squal to the cotton tax collected within said State, to be disposed of by such State as their next legislatures shall direct. (No report.)

"[H. R. 700, second session Forty-second Congress. By Mr.Golladay.]

"That the Secretary of the Treasury refund to all persons the cotton tax collected by the United States, and that he shall make such rules as he may deem necessary in connection therewith. (No report.)

"[H. R. 1592, second session Forty-second Congress. By Mr. McKee.] "[H. R. 1592, second session Forty-second Congress. By Mr. McKee.1 "That restitution shall be made of all moneys collected as cotton taxes. That the Secretary of the Treasury shall issue bonds of \$500 and \$1,000 denomination and Treasury notes to cover amounts less than that. That a commission shall be appointed by the President, by and with the advice and consent of the Senate, which shall adjudicate all claims. That such commission shall sit for two years and all claims must be filed within that time. (The rest of this long bill prescribes the manner of taking testimony and the duties and powers of the commission.)

"(No report.)

"And also I shall attach to my remarks and print in the RECORD copious extracts from the opinion of the court, as well as from the dissenting opinion of the justices in the 'incometax cases.' It will be seen by these extracts, I am quite sure, that every contention which I have made is amply sustained by the highest court in the land-the most exalted judicial tribunal in all the world:

[Pollock v. Farmers' Loan & Trust Co., U. S. Supreme Court Repts., vol. 157, p. 420.]

"Chief Justice Fuller;
"The men who framed and adopted that instrument (the Constitution) had just emerged from the struggle for independence, whose rallying cry had been that "taxation and representation go together."

"'The mother country had taught the colonists in the contests waged to establish that taxes could not be imposed by the sovereign except as they were granted by the representatives of the realm, that self-taxation constituted the main security against oppression.

"'Thus, in the matter of taxation, the Constitution recognizes the two great classes of direct and indirect taxes, and lays down two rules by which their imposition must be governed, namely, the rules of apportionment as to direct taxes and the rule of uniformity as to duties, imposts, and excises.

"'And this view was expressed by Mr. Chief Justice Chase in The License Tax Cases (5 Wall., 464-171), when he said: "It is true that the power of Congress to tax is a very extensive power. It is given in the Constitution, with only one exception and only two qualifications. Congress can not tax exports, and it must impose direct taxes by the rule of apportionment and indirect taxes by the rule of the uniformity. Thus limited, and thus only, it reaches every subject, and may be exercised at discretion."

"'Ordinarily all taxes paid primarily by persons who can shift the burden upon some one else, or who are under no legal compulsion to pay them, are considered indirect taxes; but a tax upon property holders in respect of their estates, whether real or personal, or of the income yielded by such estates, and the payment of which can not be avoided, are direct taxes.

"'In the convention of Massachusetts by which the Constitution was ratified, the second section of Article I being under consideration, Mr. King said: "It is a principle of this Constitution that representation and taxation should go hand in hand."

"'And John Adams, Davis, Sumner, King, and Sedgwick all agreed at a direct tax would be the last source of revenue resorted to by

"In Virginia, Mr. John Marshall said: 'The objects of direct taxes are well understood; they are but few; what are they? Lands, slaves, stock of all kinds, and a few other articles of domestic property.'

"Mr. Randolph said:
"'But in this new Constitution there is a more just and equitable rule fixed—a limitation beyond which they can not go. Representatives and taxes go hand in hand; according to the one will the other be regulated. The number of Representatives is determined by the number of inhabitants; they have nothing to do but to lay taxes accordingly.'

"In discussing the case of Hylton v. United States (carriage-tax case), the Chief Justice says: 'It will be perceived that each of the justices, while suggesting doubt whether anything but a capitation or a land tax was a direct tax within the meaning of the Constitution, distinctly avoided expressing an opinion upon that question or laying down a comprehensive definition, but confined his opinion to the case before the court.'

"By the act of July 14, 1798, when a war with France was supposed to be impending, a direct tax of two millions of dollars was apportioned to the States, respectively,' etc.

"'By the act of August 2, 1813, a direct tax of \$3,000,000 was laid and apportioned to the States."

"'The act of January b, 1815, laid a direct tax of \$6,000,000, which was apportioned, assessed,' etc.

"These acts are attributable to the War of 1812.

"The act of August 5, 1861 (12 Stat., 292-294, C. 45), imposed a tax of twenty millions of dollars, which was apportioned and to be levled wholly on real estate, and also levied taxes on incomes whether derived from property or profession, trade or vocation (12 Stat, L., 309), and this was followed by the acts of July 1, 1862 (12 Stat, L., 309), and this was followed by the acts of July 1, 1862 (12 Stat, L., 432, 473, C. 119); March 3, 1863 (12 Stat, L., 713, 723, C. 74); June 30, 1864 (13 Stat, L., 223, 281, C. 173); March 3, 1865 (13 Stat, L., 469, 479, C. 78); March 10, 1866 (14 Stat, L., 4 C. 15); July 13, 1866 (14 Stat, 188, 137, C. 184); March 2, 1867 (14 Stat, 471, 477, C. 169; and July 14, 1870 (16 Stat, 256, C. 255).

"He finds:
"First. That the distinction between direct and indirect taxation
was well understood by the framers of the Constitution and those who
adopted it.

adopted it.

"Second. That under the State systems of taxation all taxes on real estate or personal property or the rents or income thereof were regarded as direct taxes.

"Third. That the rules of apportionment and of uniformity were adopted in view of that distinction and those systems.

"Fourth. That whether the tax on carriages was direct or indirect was disputed, but the tax was sustained as a tax on the use and an excise.

was disputed, but the tax was sustained as a tax of the excise.

"Fifth. That the original expectation was that the power of direct taxation would be exercised only in extraordinary exigencies, and down to August 15, 1894, this expectation has been realized.

"In Pacific Insurance Co. v. Soule (7 Wall., 433) the validity of a tax which was described as 'upon the business of an insurance company' was sustained on the ground that it was 'a duty or excise,' and came within the decision in Hylton's case.

"'In Veazle Bank v. Tenno (8 Wall., 533, 544, 546) a tax was laid on the circulation of State banks or national banks paying out the notes of individuals or State banks, and it was held that it might well be classed under the head of duties, and as falling within the same category as Soule's case (8 Wall., 547)."

"And, in respect of the opinions in Hylton's case, the Chief Justice (Chase) said:

"'It may further be taken as established upon the testimony of Paterson, that the words "direct taxes," as used in the Constitution, comprehended only capitation taxes and taxes on land, and perhaps taxes on personal property by general valuation and assessment of the various descriptions possessed within the several States."

"'Scholey v. Rew (23 Wall., 331) was the case of a succession tax which the court held to be "plainly an excise tax or duty" upon the devolution of the estate or the right to become beneficially entitled to the same, or the income thereof, in possession or expectancy."

"In Raliroad Company v. Collector (100 U. S., 595, 596) the validity of a tax collected of a corporation upon the interest paid by it upon its bonds was held to be "essentially an excise on the business of the class of corporations mentioned in the statute."

"The case of Springer v. United States (102 U. S., 586, 602), chiefly relied on and urged upon us as decisive.

"That was an action of ejectment brought on a tax deed issued to the United States on sale of defendant's real estate for income taxes. The defendant contended that the deed was vold because the tax was a direct tax, not levied in accordance with the Constitution. Unless the tax were wholly invalid, the defense failed."

"The opinion thus concludes:

"Our conclusions are that direct taxes, within the meaning of the Constitution, are only capitation taxes, as expressed in that instrument, and taxes on real estate; and that the tax of which the plaintiff in error compains is within the category of an excise or duty."

"While (says Chief Justice Fuller) this language is broad enough to cover the interest as well as the professional earnings, the case would have been more significant as a precedent if the distinction had been brought out in the report and commented on in arriving at judgment, for a tax on professional receipts might be treated as an excise or duty, and therefore indirect, when a tax on the income of personalty might be held to be direct.

"Be this as it may, it is conceded in all these cases, from that of Hylton to that of Springer, that taxes on land are direct taxes, and in none of them is it determined that taxes on rents or income derived from land are not taxes on land.

"The requirement of the Constitution is that no direct tax shall be

"The requirement of the Constitution is that no direct tax shall be laid otherwise than by apportionment—the prohibition is not against direct taxes on land, from which the implication is sought to be drawn that indirect taxes on land would be constitutional, but it is against all direct taxes—and it is admitted that a tax on real estate is a direct tax. Unless, therefore, a tax upon rents or income issuing out of lands is intrinsically so different from a tax on the land itself that it belongs to a wholly different class of taxes, such taxes must be regarded as falling within the same category as a tax on real estate co nomine. The name of the tax is unimportant. The real question is, is there any basis upon which to rest the contention that real estate belongs to one of the two great classes of taxes and the rent or income which is the incident of its ownership belongs to the other? We are unable to perceive any ground for the alleged distinction. An annual tax upon the annual value or annual user of real estate appears to us the same in substance as an annual tax on the real estate, which would be paid out of the rent or income. This law taxes the income received from land and the growth or produce of the land. Mr. Justice Paterson observed in Hylton's case, 'Land, independently of its produce, is of no value'; and certainly had no thought that direct taxes were confined to unproductive land.

"Nothing can be clearer than that what the Constitution intended to guard against was the exercise by the General Government of the power of directly taxing persons and property within any State through a majority made up from the other States. It is true that the effect of requiring direct taxes to be apportioned among the States in proportion to their population is necessarily that the amount of taxes on the individual taxpayer in a State baving the taxable subject matter to a larger extent in proportion to its population than another State has would be less than in such other State, but this inequality must be held to have been contemplated, and was manifestly designed to operate to restrain the exercise of the power of direct taxation to extraordinary emergencies, and to prevent an attack upon accumulated property by mere force of numbers.

"But the acceptance of the rule of apportionment was one of the compromises which made the adoption of the Constitution possible, and secured the creation of that dual form of government, so elastic and so strong, which has thus far survived in unabated vigor. If, by calling a tax indirect when it is essentially direct, the rule of proportion could be frittered away, one of the great landmarks defining the boundary between the Nation and the States of which it is composed

would have disappeared, and with it one of the bulwarks of private rights and private property.

"We are of opinion that the law in question, so far as it levies a tax on the rents or income of real estate, is in violation of the Constitution and is invalid.

"Mr. Justice Field:

"First calls attention to the debates in the "convention," and particularly to the unwillingness of the coast States to relinquish their right to levy duties upon imports, and of the small interior States to confer upon the General Government the right to levy direct taxes, and says: "It was feared at times that the effort to form a new government would fail. But happly a compromise was effected by an agreement that direct taxes should be laid by Congress by apportioning them among the States according to their representation. In return for this concession by some of the States, the other States bordering on navigable waters consented to relinquish to the new Government the control of duties, imposts, and excises, and the regulation of commerce, with the condition that the duties, imposts, and excises should be uniform throughout the United States; so that on the one hand, anything like oppression or undue advantage of any one State over the others would be prevented by the apportionment of the direct taxes among the States according to their representation, and, on the other hand, anything like oppression or hardship in the levying of duties, imposts, and excises would be avoided by the provision that they should be uniform throughout the United States. This compromise was essential to the continued union and harmony of the States. It protected every State from being controlled in its taxation by the superior numbers of one or more other States."

"'If the court sanctions the power of discriminating taxation and nullifies the uniformity mandate of the Constitution,' as said by one one who has been all his life a student of our institutions, 'it will mark the hour when the sure decadence of our present Government will commence.'

"There is no safety in allowing the limitation to be adjusted except in strict compliance with the mandates of the Constitution, which require its taxation, if imposed by direct taxes, to be apportioned among the Sfates according to their representation, and if imposed by indirect taxes, to be uniform in operation and, so far as practicable, in proportion to their property, equal upon all citizens."

"I also ask permission to print in the RECORD and as a part of my remarks Report No. 2528, made in the Fifty-second Congress at the second session by Mr. Oates, a Member of Congress from the State of Alabama, from the Committee on the Judiciary:

"[House Report No. 2528, Fifty-second Congress, second session.]

from the State of Alabama, from the Committee on the Judiciary:

"House Report No. 2528, Fifty-second Congress, second session.]

"The Committee on the Judiciary, having had under consideration the bill (H. R. 8365) entitled 'A bill to provide for refunding the tax laid and collected on raw cotton in the event that the Supreme Court holds the law under which the same was collected to have been unconstitutional,' make to the House the following report.

"By act of Congress approved July 1, 1862, and subsequent amendatory acts, a tax was imposed on raw cotton, under which collections were made and the money paid into the Treasury of the United States, aggregating \$68,072,388.99. This money was collected in the years 1863 to 1868, both inclusive.

"At the beginning of the late war a large part of the crop of 1860 was held by brokers and factors in the Northern States for the benefit of the producers. A large part of the crop of 1861 in the border States also went into the hands of northern factors, which accounts for the fact that a considerable amount of this tax was collected in New York, Philadelphia, and other points in the Northern States, but all of the cotton upon which the tax was thus collected was grown exclusively in the Southern States. This tax was enforced and collected upon all these cottons as well as those grown subsequent to its enactment; \$64,935,121.56 of this tax was enforced and collected upon all these cottons as well as those grown subsequent to its enactment; \$64,935,121.56 of this tax was enforced in the Southern States, either directly or indirectly, from the producers.

"Section Sof Article I of the Constitution empowers Congress to lay and collect taxes, duties, imposts, and excises for three general purposes, viz, first, to pay the debts of the United States; second, to provide for the general welfare of the United States; and, third, to provide for the general welfare of the United States; and, third, to provide for the general welfare of the United States; and, third, to provide for

no legal ground or claim for refunding the tax. On the other hand, if the law imposing the tax was unconstitutional, the money was wrongfully collected, and there is an implied promise upon the part of the Government to refund it; or, in other words, it is a debt against the United States which should be paid.

"A great many people, and among them many of the very best lawyers in the country, believe that the law was unconstitutional. The argument of ex-Justice John A. Campbell before the Supreme Court is very convincing. The Government of the United States is one which proceeds in all of its civil operations according to law, and it never was intended to be administered in any of its departments otherwise. Your committee think the question of sufficient importance to provide a means by which the Supreme Court may determine the question of constitutionality and thereby forever set at rest the question as to whether this large sum collected as taxes was rightfully or wrongfully collected. The bill provides for opening the Court of Claims to those who paid the tax, until a case is made and appealed to the Supreme Court, and then for a stay of proceedings until that court decides the question; and should the court hold the acts to be unconstitutional, it allows one year thereafter to all persons interested to bring their sults in said Court of Claims. On the contrary, if the law is sustained, that would put an end to all these claims.

"Your committee, therefore, believing it just, report said bill favorably to the House and recommend its passage.

"Mr. Chairman, I have placed in the Record as part of my re-

"Mr. Chairman, I have placed in the RECORD as part of my re marks an abstract statement with reference to several bills that have heretofore been introduced in relation to this matter. They were introduced years ago when the feeling of humanity and brotherly love between the sections was not such as it is now, and, of course, no relief was expected. The gentleman from Alabama [Mr. Heflin], I believe, deserves credit for renewing interest in this matter, because he introduced a bill looking to the refunding of this money in the first session of the Fifty-ninth Congress. The gentleman from North Carolina [Mr. THOMAS] has also introduced a bill looking to that same result. The gentleman from Tennessee [Mr. Sims] has likewise introduced one; the gentleman from Ohio [Mr. ANSBERRY] has likewise introduced a bill of the same character, and various other gentlemen have introduced bills of like character. I want to say now, Mr. Chairman, in conclusion, that I, as a southern man and the son of a southern soldier, am opposed absolutely to the bill of the gentleman from Alabama to pension Confederate soldiers by the United States Government. plause on the Democratic side.] [Ap-

"Mr. HEFLIN. Mr. Chairman, I would like to ask the gentleman to whom he refers, what gentleman from Alabama?

"Mr. CLARK of Florida. The gentleman from Alabama, Mr. Horson. I am opposed to it because as a Representative upon this floor I do not believe it is right. I do not believe it is a proper charge against the Government of the United States. I am opposed to it in the second place because our own States will take care of these veterans of the 'lost cause.' We will tax ourselves to care for them, and we will cheerfully aid in caring for Union veterans besides. [Applause on the Demo-cratic side.] No, Mr. Chairman, I will never be found upon this floor asking this Congress for charity to the people whom I represent. I am asking in this bill that this Congress be just to those people; that this Congress pay them the money that is their due, and that has been wrongfully, unconstitutionally, and illegally taken from their pockets. No charity is asked, and never will be; all that we ask is simple, naked, even-handed justice under the Constitution of our country. [Applause on the Democratic side.]

Mr. THOMAS of North Carolina. Mr. Chairman, before the gentleman sits down I would like to ask him a question.

The CHAIRMAN. Does the gentleman yield?

"Mr. CLARK of Florida. Yes.

"Mr. Thomas of North Carolina. I have listened, Mr. Chairman, with a great deal of interest to the very eloquent speech of the gentleman from Florida, which is perhaps the most exhaustive discussion of this question we have ever had. I perhaps was not attentive at the time, but I want to ask the gentleman from Florida if a considerable portion of these taxes, if refunded, would not go to the States of the North?

"Mr. Clark of Florida. About eight millions of dollars would

go north and about sixty million dollars south.
"Mr. Thomas of North Carolina. I want to ask the gentleman this further question: I understood from his argument, and that is my understanding of the decisions of the Supreme Court, that in the case of the Farmers' Loan and Trust Company the court reverses the former decision of the Supreme Court and holds substantially that this tax was an unconstitutional tax.

"Mr. CLARK of Florida. Absolutely. The dissenting opinion of Mr. Justice Harlan admits that. He distinctly calls attention to the fact that under the decision of the court vast sums

of money must be returned to the people."

Mr. Speaker, since the speech referred to was delivered the Supreme Court of the United States in a number of cases has had occasion to discuss the levying of "direct" and "excise" taxes by Congress, but in not one instance has the court shown

the slightest inclination to vary its ruling as to "direct" taxes as defined in the case of Pollock v. Farmers Loan & Trust Co. (157 U. S., 429). The case wherein the taxing power of Congress and the various kinds of taxes which Congress may lay is most exhaustively discussed is the case of Flint c. Stone Tracy Co. (220 U. S., 107), known as the "Corporation tax case." Section 38 of the tariff act of 1909 provided for the levying of an annual "special excise tax" on all corporations, joint-stock companies, or associations "organized for profit and laving a capital stock represented by shares," and all "in-surance companies" organized "under the laws of the United States or of any State or Territory, or under the acts of Congress applicable to Alaska or the District of Columbia," "with respect to the carrying on or doing business by such corporation," and so forth, "equivalent to 1 per cent upon the entire net income over and above \$5,000," and so forth. This section was attacked upon various grounds and among others, that it was unconstitutional, at least so far as it attempted to tax the income from the real and personal property of such corporations, joint-stock companies, and so forth, because this was a "direct tax" and "required to be apportioned according to population among the States.'

Mr. Justice Day delivered the opinion of the court, and there was no dissenting opinion. The court quoted the provisions of

the Constitution which were applicable, as follows:

The Congress shall have power to lay and collect taxes, duties, imposts, and excises to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States. (Art. I, sec. 8, clause 1.)

Representatives and direct taxes shall be apportioned among the several States which may be included within this Union, according to their respective numbers. (Art. I, sec. 2, clause 3.)

No capitation or other direct tax shall be laid unless in proportion to the census or enumeration hereinbefore directed to be taken. (Art. I, sec. 9, clause 4.)

After quoting these constitutional provisions the court proceeds to differentiate this case from the Pollock case, it having been asserted by counsel in argument that for the court to sustain the constitutionality of the "corporation tax" would be to reverse its judgment in the Pollock case or the "income-tax cases." The court in its opinion makes it clear that in laying the tax in section 38 of the tariff act of 1909 the Congress intended to, and by clear and unmistakable language did. place a tax on "the carrying on or doing of a certain designated business." It was in no sense a tax on property, either real or personal, as such, but was an occupation tax or a tax on the privilege of engaging in a particular kind of business in a particular way.

In speaking of the Pollock case, Mr. Justice Day says:

In speaking of the Pollock case, Mr. Justice Day says:

The issue presented in the Pollock case was whether an income tax was direct within the meaning of the Constitution. The contentions which the case involved were thus presented: On the one hand it was argued that only capitation taxes and taxes on land as such were direct, within the meaning of the Constitution, considered as a matter of first impression, and that previous adjudications had construed the Constitution as having that import. On the other hand it was asserted that in principle direct taxes, in the constitutional sense, embraced not only taxes on land and capitation taxes, but all burdens laid on real or personal property because of its ownership, which were equivalent to a direct tax on such property, and it was affirmed that the previous adjudications of this court had settled nothing to the contrary.

Undoubtedly, in the course of the opinion in the Pollock case, it was said that if a tax was direct within the constitutional sense the mere erroneous qualification of it as an excise or duty would not take it out of the constitutional requirement as to apportionment. But this language related to the subject matter under consideration, and was but a statement that a tax which was in itself direct, because imposed upon property solely by reason of its ownership, could not be changed by affixing to it the qualifications of excise or duty. Here we are asked to decide that a tax is a direct tax on property which has at all times been considered as the antithesis of such a tax; that is, has ever been treated as a duty or excise because of the particular occasion which gives rise to its levy.

Considering that the constitutional rule of apportionment had its origin in the purpose to prevent taxes on persons solely because of their general ownership of property from being levied by any other rule than that of apportionment, two things were decided by the court: First, that no sound distinction existed between a tax levied on a person solely because of his general ownership of real property and the same tax imposed solely because of his general ownership of personal property. Secondly, that the tax on the income derived from such property, real or personal, was the legal equivalent of a direct tax on the propertioned. These conclusions, however, lend no support to the contention that it was decided that duties, imposts, and excises, which are not the essential equivalent of a tax on property generally, real or personal, solely because of its ownership, must be converted into direct taxes, because it is conceived that it would be demonstrated by a close analysis that they could not be shifted from the person upon whom they first fall.

Thus it is seen that the court, in plain language, declares the law of this land to be "that no sound distinction existed between a tax levied on a person solely because of his general ownership of real property, and the same tax imposed solely be-

cause of his general ownership of personal property." The court even went further than that and declared "that the tax on the income derived from such property, real or personal, was the legal equivalent of a direct tax on the property from which said income was derived, and hence must be apportioned." These taxes were levied directly on cotton, the constitutional rule of apportionment was ignored, utterly ignored, and surely no man, in view of the facts, in view of the constitutional requirement, and in view of these strong declarations of the Supreme Court of the United States, will contend that they were legally levied and collected. I have made a thorough search of the cases, and I here and now assert, without the fear of successful contradiction, that from the days of Marshall down to this good hour no utterance of the Supreme Court of the United States can be found not in consonance with the position I take in this case. The language of the Constitution itself is so clear that no clarification of its meaning is neededthe wayfaring man, though a fool, need not err therein." But an unbroken line of decisions, beginning with the very birth of our judicial system, in terms which no man can fail to comprehend, declare null and void all acts of Congress levying direct taxes upon either real or personal property or the income from either, except the same be apportioned among the several States and Territories in accordance with their population.

Not one of these four acts of Congress levying taxes on cotton apportioned the taxes among the States and Territories. In each case the act provided for the levy of a direct tax on personal property-cotton-and therefore each and every one of the four acts of Congress was absolutely null, void, and unconstitutional. This money was exacted illegally and wrongfully, and until it is refunded will forever stand as a disgrace to this great Government, which can not afford to be the recipient of money wrung from the lean purses of its own people by such

outrageous methods.

Mr. Speaker, 48 years ago last April, when the knightly Robert E. Lee surrendered the remnant of the once invincible Army of Northern Virginia to the courageous Ulysses S. Grant, the war, so far as the brave men of both armies were concerned, came to an end, and the heroic souls from every section of the Republic bent themselves to the task of building a better and more glorious Union than had ever existed before. Old Glory, the starry emblem of freedom, proudly floats over 48 sovereign States bound together not only by a common destiny and common interests, cemented not only with the sacred blood of our fathers in that four years of fratricidal war, but sanctified by that patriotic love for our common country which 15 years ago sent the sons of "those who wore the blue" and the sons of "those who wore the gray" in solid phalanx to meet a To-day, with a hundred million people, with our mines, our forests, our factories, our farms, with all our material wealth and our incomparable governmental institutions, we have the best country and the best Government which ever existed upon the earth. Under these conditions and at this time, may I not appeal with confidence to my fellow Members for justice to those people whom in part I represent upon the floor of this great House of Representatives?

The objection has been made that it is a large sum of money. This is true. But, my friends, we are not asking for interest. We are simply asking this great, powerful, and wealthy Government to return to the poor people, or to their heirs, the principal—the exact amount of money—which forty-odd years ago was wrongfully and illegally taken from them. These people are not asking for charity; they are not seeking alms; they are asking justice-simple, naked, even-handed justice. My friends, we are the guardians of the Nation's honor, and we should guard it as safely as we seek to protect our own personal honor. No Government is justified in taking property simply because it is powerful enough to do so, and if by mistake of law, or otherwise, a Government illegally and wrongfully deprives a citizen of his property the only honest course for that Government to pursue is to make restitution, to return the property. The Government of the United States has taken this money without warrant of law, without a shadow of legal authority. It should be returned. It is a large sum, but that does not justify the Government in keeping it. I should not object to the bill being amended so that it would be returned in installments during a series of years; but I am jealous of the honor of my country and I want steps taken, and taken now, to discharge

this debt.

Mr. Speaker, bills of various kinds have from time to time been presented to Congress seeking to make some disposition of the money collected under these unconstitutional tax acts. Some have proposed that it be paid into the school funds of the different States wherein it was collected; some have proposed that it be paid to these States to be used in constructing good

roads; some have proposed that it be paid to Confederate veterans; and some proposed other plans to dispose of it. to submit that Congress has no power to dispose of this money in any of these ways. Congress can only do one thing-there is only one honest and legal thing for Congress to do-and that is to make provision for the return of this money to the rightful owners, or to the heirs of the rightful owners. In my bill I

have made provision for this.

The first section of the bill provides that the Secretary of the Treasury shall credit each State and Territory and the District of Columbia with a sum of money equal to all collections made in them, respectively, under these several cotton-tax acts, and the second section provides for the appropriation, directs that the money be paid to the governors of the different States and Territories and the Commissioners of the District of Columbia, but not until the legislature of the State or Territory has, by resolution or otherwise, agreed to accept the particular sum named and the trusts imposed by the bill in full satisfaction of all claims against the United States on account of these cotton taxes. The bill further provides that each State and Territory and the District of Columbia shall hold the money in trust for six years, during which period claimants may submit proof of their claims, and all money unclaimed at the expiration of six years shall revert to the respective State or Territory or to the District of Columbia. This bill is drawn exactly as the act of Congress of the 2d day of March, 1891, by the terms of which Congress refunded to the several States and Territories the money collected under the act of Congress of the 5th day of August, 1861, levying a direct tax on land, and where, as in the acts here, the rule of apportionment was disregarded.

This bill is pending now before the Committee on War Claims, and I sincerely hope and believe that before many days that honorable committee will report the same favorably to this House. I have sought this opportunity to speak in order that might place this whole case in the RECORD, in order to give Members ample opportunity to become fully advised before they would be called on to vote. I have given a great deal of time, investigation, and thought to this matter, and am fully convinced that no Member will vote against this bill if he will familiarize himself with it. It is honest and clean, and again repeat that my people are asking no benefaction; they are pleading for no alms; they are seeking no charity, but, standing upon the solid granite of eternal truth, they are demanding that measure of even-handed justice which they have the right to expect from the Representatives of the glorious manhood of

this mighty Republic. [Loud applause.]

LOBBY ACTIVITIES AND CHARGES AGAINST MEMBERS OF THE HOUSE.

Mr. GARRETT of Tennesee. Mr. Speaker, I have here for presentation the report of the select committee of the House appointed under House resolution 198.

For the information of Members I wish to state that it was about 1 o'clock this morning when I carried the final corrected proof of the report to the Printing Office. I was not able at that hour to obtain the number which the report would bear, and consequently could not have the House print made. As early as possible this morning the number was obtained, and instructions have been given to the Printing Office, and it is hoped that a print will be here within an hour, or as soon as possible, for distribution among the Members.

I now present the report and ask for its reading under the order heretofore entered.

The SPEAKER. The Clerk will read the report.

The Clerk began the reading of the report.

Mr. GARRETT of Tennessee. Mr. Speaker, unless there is objection. I ask unanimous consent that the reading of the resolution under which the committee was appointed be omitted.

The SPEAKER. The gentleman from Tennessee asks unanimous consent to omit the reading of the resolution. Is there objection?

Mr. MANN. Mr. Speaker, I think the whole report ought to be read.

The SPEAKER. The gentleman from Illinois objects. The Clerk resumed and completed the reading of the report, which is as follows:

[House Report No. 113, Sixty-third Congress, second session.] CHARGES AGAINST MEMBERS OF THE HOUSE AND LOBBY ACTIVITIES.

CHARGES AGAINST MEMBERS OF THE HOUSE AND LOBBY ACTIVITIES.

Mr. Garrett of Tennessee, from the Select Committee of the House of Representatives appointed under House resolution 198, submitted the following report:

The Select Committee of the House of Representatives, appointed under House resolution 198, respectfully submits the following report:

On June 29, 1913, there appeared in the New York World and the Chicago Tribune, daily newspapers published in New York, N. Y., and Chicago, Ill., respectively, articles giving an account of various alleged activities along lines, industrial, political, and legislative, of certain organizations known as (1) the National Association of Manufac-

turers of the United States (hereinafter referred to as the N. A. M.), and (2) the National Council for Industrial Defense (hereinafter referred to as the N. C. I. D.), together with kindred and, in a certain sense, coordinate organizations, to which later reference will be

and (2) the National Council for Industrial Defense (hereinafter referred to as the N. C. I. D.). together with kindred and, in a certain sense, coordinate organizations, to which later reference will be made.

Following the appearance of these articles there were published in these and other newspapers throughout the country upon successive days other stories and matter in elaboration and amplification of the original. These subsequent publications, however, did not present anything substantially new or add to the original, in so far as the scope and purpose of the investigation ordered to be made by your committee is concerned.

These original articles, filling many columns in the newspapers, were exceedingly sensational in character and excited widespread attention throughout the country. The names of many men now conspicuous in public affairs and political life, as well as many who, while not now in office, were formerly prominent and active, were used with freedom and in various connections. Among these were many who were formerly and some who are now Members of the House of Representatives. Some of these were so mentioned and written about and commented upon as to occasion the belief on their part and on the part of others that their official integrity had been impugned and their official character seriously and sinisterly questioned. Aside from the charges involving the good names of Representatives, the articles contained other allegations of public and political activity which caused many Members of the House to believe that an investigation in regard thereto was desirable and proper, and accordingly several resolutions were introduced providing for an inquiry not alone as to the charges relative to individual Members in their representative capacity, but also as to the general activities and efforts along legislative and political lines of these organizations during a period of many years. These several resolutions being referred to the Committee on Rules, that committee reported a substitute therefor

# House resolution 198.

"Whereas there have appeared in recent issues of various newspapers published in the United States divers statements and charges as to the existence and activity of a lobby organized by and on behalf of an organization known as the National Association of Manufacturers for the purpose of improperly influencing legislation by Congress, the official conduct of certain of its Members and employees, the appointment and selection of committees of the House, and for other purposes, designed to affect the integrity of the proceedings of the House of Representatives and its Members: Therefore be it "Resulted That the Speaker appoint a select committee of seven

the official conduct of certain of its Members and employees, the appelintment and selection of committees of the House, and for appelintment and selection of committees of the House, and for of the House of Representatives and its Members: Therefore he it "Resolved, That the Speaker appoint a select committee of seven Members of the House and that such committee be instructed to Inquire into and report upon all the matters so alleged concerning said Representatives, and more especially whether during this or any previous Congress the lobbyists of the said National Association of Manufacturers, or the said association, through any officer, agent, or member thereof, did, in fact, reach or influence, whether for business, political, or sympathetic reasons or otherwise, the said Representatives or any one of them or any other Representative or any officer or employee of their official duties, and if so, when, by whom, and in what manner. "Said committee shall also inquire whether money has been used or improper influence exerted by said National Association of Manufacturers or other person, persons, association, or organization, or any agent thereof, to accomplish the nomination or election or secure the defeat for nomination or election of any candidate for the House of Representatives, and said committee shall likewise inquire whether Members of the House of Representatives and said committee whether any other more than the said of the said of the said likewise inquire whether Members of the House of Representatives and said committee whether improper influence has been exerted by said association or by any other association, corporation, or person to secure or prevent the appointment or selection of any Representative to any committee of the House in this or any other Congress.

"Said committee is also directed to inquire whether improper influence has been exerted by said association or by any other association, corporation, or person to secure or prevent the appointment or selection of sink house in the said

your committee as one of its first acts caused to be mailed to each Member a copy of the resolution, together with a letter inviting suggestions, which letter read as follows:

WASHINGTON, D. C., July 18, 1913.

House of Representatives, Washington, D. C.

House of Representatives, Washington, D. C.

DEAR SIR: The select committee appointed under House resolution 198, to make investigations of charges against Members of the House, the activities of lobbles, and for other purposes, desires to perform the duties with which it is charged fully and thoroughly and to the satisfaction of the Members of the House and of the country in so far as possible. To this end, the committee desires the cooperation and aid of all the Members of the House of Representatives and has directed me, as chairman, to address this communication to each Member and inclose a copy of the resolution and invite each of them to offer to the committee any suggestions which it is thought will aid in the performance of its duties, and give to the committee any information touching any lobby activities coming within the scope of the resolution that may be within the knowledge of the Member.

By direction of the committee.

Very respectfully, yours,

Finis J. Garrett.

The committee has carefully considered all suggestions received in

Very respectfully, yours.

The committee has carefully considered all suggestions received in response to this invitation as well as from other sources, adopting many of them and rejecting only such as did not seem to come within the purport of the resolution, or, if coming within it, furnished no tangible basis from or upon which it could work. The daily prints have been ordered sent to each Member of the House and to all others who have made requests therefor and a copy of an index has been furnished to all who received the hearings.

It has been the single purpose of the committee to interpret and act under the resolution according to the true, full spirit of its terms. The testimony of a large number of witnesses was heard, and applying the resolution to the testimony so adduced the committee finds the following facts and has reached the following conclusions:

AS TO THE WORLD AND TRIBUNE ARTICLES.

For a proper understanding of this report it must be borne in mind

AS TO THE WORLD AND TRIBUNE ARTICLES.

For a proper understanding of this report it must be borne in mind that the original publications appearing in the World and Tribune consisted of two distinct parts. One part was what may be called a personal narrative. This was written by Martin M, Mulhall and appeared over his signature. The other was what may be called a summary. This was prepared by Louis Seibold, a member of the World staff, and was based, according to his testimony upon (1) the personal narrative of Mr. Mulhall, (2) a mass of correspondence purporting to be letters, copies of letters, telegrams, notations, and various other written and printed documents accumulated and filed by said Mulhall during his period of service as an employee of the N. Å. M. and subsequent thereto, and by him turned over to the World, and (3) personal statements made by Mulhall to Seibold during the time of the preparation of the summary. Because of the extreme length of the articles it is not deemed desirable to set them out in full, but all parts material to the report will be subsequently quoted or epitomized.

## THE N. A. M.

The N. A. M. had its genesis in 1895, being then launched as a voluntary organization or association. It continued as such until 1905, in which year it was incorporated under the laws of the State of New York, its corporate name being "The National Association of Manufacturers of the United States."

It is stated in its charter that—
"the corporation is not organized for pecuniary profit and shall not make or declare dividends."

Its purposes, as set forth in the charter of incorporation, are as follows:

follows:

"The general objects and purposes for which the said corporation is formed are the promotion of the industrial interests of the United States, the fostering of the domestic and foreign commerce of the United States, the betterment of the relations between employer and employee, the protection of the individual liberty and rights of employer and employee, the education of the public in the principles of individual liberty and ownership of property, the support of legislation in furtherance of those principles, and opposition to legislation in derogation thereof.

ployer and employee, the education of the public in the principles of individual liberty and ownership of property, the support of legislation in furtherance of those principles, and opposition to legislation in derogation thereof.

"The particular objects and purposes of said corporation are to establish and maintain a mutual and cooperative organization of American manufacturers in the United States for the fostering of their trade, business, and financial interests, to reform abuses relative thereto, to secure freedom from unlawful and unjust exactions, to diffuse accurate and reliable information as to the standing of merchants and other matters, to procure uniformity and certainty in the customs and usages pertaining to the trade, business, and financial interests of the members of said corporation, to settle differences between its members, to promote a more enlarged and friendly intercourse between the manufacturers of the United States, and to do all things necessary to carry out the aforesaid purposes for the mutual benefit and protection of its members under and subject to such regulations, conditions, and limitations as may be prescribed by the by-laws." (See charter, p. 41, House hearings.)

The committee understands from the testimony that its purposes prior to incorporation were the same, in substance, as they have been since, but its activities have been gradually developed and now cover a much wider range than they did in the earlier days.

J. P. Bird, general manager of the N. A. M., states these activities in part as follows:

"We publish two export magazines, we publish a domestic magazine, both known as American Industries. We conduct a large foreign department in which are several suddepartments, a legal department wherein we advise our members on questions of corporation law and State law, a foreign-collection department, and a domestic-collection department." (Testimony, Bird, p. 2036, House hearings.)

Mr. Bird does not, however, cover in this statement all the efforts and ambitions of t

The publication work of the N. A. M. is carried on through another corporation of the State of New York, organized by substantially the same persons as those who organized the N. A. M. and it the same way, the latter corporation being styled "The American Manufacturers' Co." This was organized, as the committee understands, because of the Inability of the N. A. M. to do that particular work desired, under the terms of its charter and the laws of the State of New York. In other words, the N. A. M. not being organized "for pecuniary profit," caused, or its responsible agents caused, the American Manufacturers' Co. to be chartered in order that through this entity its publication business and other purely business operations might be carried on.

The membership of the N. A. M. at this time, as we understand from the testimony, is, and has for several years been, approximately 4,000. The membership has varied from time to time, some dropping out and other new members joining. The membership consists of individuals, firms, copartnerships, corporations, etc., who are engaged in manufacturing enterprises of nearly all kinds and characters. The members are located in all parts of the United States. An annual fee of \$50 is charged, so that the association has from this source an annual income approximately of \$200,000. It has a department for the solicitation of members which is now and has been since 1909 in charge of Mr. F. F. Porter. This department has a force of seven men who solicit necessary of members which is now and has been since 1909 in charge of Mr. F. F. Porter. This department has a force of seven men who solicit necessary of members which is now and has been since 1909 in charge of Mr. F. F. Porter. This department has a force of seven men who solicit necessary of mental free paid by a member, and out of the funds received by him in this way he pays the expenses of his department.

funds received by him in this way he pays the expenses of his department.

There is a board of directors consisting of 23 members (see testimony, Bird, p. 2036, pt. 24), which meets four times a year, and an executive committee consisting of 5 members, which meets "during the interim of the board meetings or at the call of the president."

The present president is George E. Pope, of Hartford. Conn., who is not a salaried officer; the general manager is J. P. Bird, who receives a salary as such of \$7,500 per annum; the secretary is George S. Boudinot, who receives a salary is merely nominal, just sufficient to cover his bond. The principal office is located in the city of New York, and there is an office force of about 60 people.

The association has numerous standing committees, as well as special and select committees, appointed from time to time to deal with the many subject matters which challenge its interest. It holds annual meetings or conventions, usually in the month of May, and in such city as may be selected, at which its business matters are attended to and at which there are discussions by its members and others of the various questions before it. The minutes of these annual proceedings are published, and there have been filed with the committee and placed in evidence, but not published in the record because of their length, copies of the several reports of these annual conventions.

THE N. C. I. D.

#### THE N. C. I. D.

THE N. C. I. D.

The organization of the National Council for Industrial Defense was perfected in January, 1908, following a number of conferences held in the city of New York, the first of which was in August, 1907. It seems that as early as June, 1907, Mr. James W. Van Cleave, who was at that time president of the National Association of Manufacturers, sent out a circular letter addressed to various industrial organizations, probably confined to what were known as national organizations, probably confined to what were known as national organizations as distinguished from State and local entities, inviting them to meet in New York and consider methods of cooperation. This letter of Mr. Van Cleave has been placed in evidence and will be found at page 2246 of the House hearings. It calls attention to the necessity of having some central committee through which the various industrial organizations might work upon those matters concerning which they were agreed, including "a carefully organized legal department, which will do all the work of the council, advise local organizations, assist interstate business organizations which violate interstate and antitrust acts, carry on prosecutions of every case of lawlessness during strikes, the proper prosecution of attempted boycotts, or assault and intimidation, and a careful compilation and distribution of all work handled by the legal department."

In addition to these things the suggestion lays special and particular emphasis upon the necessity of having some central organization in connection with legislative work. It says:

"Congress will again be in session in a short time, and it is more essential than ever to give the most careful attention to

"Congress will again be in session in a short time, and it is more essential than ever to give the most careful attention to Federal and State legislation."

"Congress will again be in session in a short time, and it is more essential than ever to give the most careful attention to Federal and State legislation."

The National Association of Manufacturers, through its president, having thus taken the initiative, various industrial organizations did meet in conference, as stated, in August, 1907, and after that time three other conferences were held before the final agreement, which produced the N. C. I. D., was reached. The final agreement, in brief, seems to have been that there should be created and organized an association known as the National Council for Industrial Defense. This council thus created consisted of three persons, a president, a secretary-treasurer, and a counsel. The purposes of this council are stated in resolutions adopted August 19, 1907, as follows:

"Said council shall have power—

"1. To establish and maintain a legislative bureau.

"2. To establish and maintain a bureau of publicity and education." Mr. John Kirby, ir., was selected president of the council and has served since that time. At the time of his selection he was a prominent member of the board of directors of the National Association of Manufacturers and was president of that organization from 1909 until 1913, and he is now a member of the board of directors and of the executive committee. Mr. Bird, the secretary-treasurer of the N. C. I. D., was at the time of his selection general manager of the N. A. M., and has continued in that position until the present time. Mr. James A. Emery, the counsel for the N. C. I. D., had been previous to his selection as such connected with an organization known as the Citzens' Industrial League in a relation somewhat similar to that he now bears to the N. C. I. D. Since the organization of this council there has never been a meeting of the members of the council; it has no by-laws and no constitution other than that contained in the resolutions adopted at the time of its organization. There is no provision in any of its articles for a meeting of

\$12,000 per annum and an allowance for expenses, the amount of which is not fixed. The president receives no salary.

The membership of the N. C. I. D. consists not of persons but of associations. These number about 250. It is most largely, however, the creation of the N. A. M., and in the particular work performed by the N. C. I. D. the two are practically one. Mr. Kirby defined the situation when, in answer to an inquiry during his examination by the committee, he said that the N. C. I. D. is the mouthpiece of the N. A. M.

There is no fixed fee for membership in the N. C. I. D., and it is supported financially by voluntary contributions on the part of its members. Mr. F. F. Porter, who has general charge of the solicitation of members for the N. A. M., also performs the same service for the N. C. I. D., and receives a commission of 334 per cent of the amount collected from members of the latter organization, paying the expense of his department out of this as in the case of the N. A. M.

From the testimony taken the committee is of the opinion that the N. C. I. D. was organized and has been kept in existence for two reasons:

First. It enabled the centralization for particular work, especially political and legislative effort, in which a number of organizations and associations, the N. A. M. distinctly, were interested.

Second, Through the instrumentality of the N. C. I. D. the N. A. M. and other affiliating associations were enabled to more conveniently and expeditiously engage in political and legislative activities and make expenditures for purposes which would not have been permitted the N. A. M. by the terms of its charter under the laws of the State of New York.

# NATIONAL TARIFF COMMISSION ASSOCIATION.

NATIONAL TARIFF COMMISSION ASSOCIATION.

Following the November election of 1908 there began a very active agitation for the creation of what is commonly termed a "tariff commission." Among those strongly favoring this was Mr. J. W. Van Cleave, now deceased, who at that time was president of the N. A. M. Other officials and members of the association were likewise favorable, and very active efforts were begun to build up sentiment throughout the country and in the Congress in its behalf. Largely due to Mr. Van Cleave, a convention of those interested was called to assemble in Indianapolis, Ind., in February, 1909, for the purpose of discussing this question and promoting the views entertained. To Mr. M. M. Muhlall, who was then in the employ of the N. A. M., was assigned the work of sounding Members of Congress as to their views upon this subject and extending verbal invitations to them to attend the Indianapolis meeting.

At the Indianapolis convention a committee of one hundred was appointed, and at the time, or shortly subsequent, there was organized the National Tariff Commission Association as a voluntary organization, It is still in existence and has headquarters in New York City. The N. A. M. and the N. C. I. D. became members, as did a large number of other organizations, persons, firms, corporations, and associations. The purpose of the N. T. C. A. seems to have been to work for the establishment of "a nonpartisan semijudicial tariff commission—permanent in character." The National Association of Manufacturers, or its responsible officials, unquestionably fathered the N. T. C. A., and, in so far as we can determine from the evidence adduced, it was the latter's chief financial stay and supporter.

# THE WORKINGMEN'S PROTECTIVE ASSOCIATION.

It was the latter's chief financial stay and supporter.

THIS WORKINGMEN'S PROTECTIVE ASSOCIATION.

From time to time throughout the hearings had by your committee reference is made to an organization known as the Workingmen's Protective Association.

This organization was first formed, it appears, by Mr. Mulhall in the city and county of Baltimore, Md., during the political campaign of 1900, which was prior to the time that he became connected with the N. A. M. According to his testimony it was for political purposes, solely to aid the Republican organization in that campaign, and the expense incident to its organization and work were at that time paid by the Republican National Committee. Subsequent to this, to wit, in 1903, after Mulhall had been employed by the N. A. M. at the suggestion of Marshall Cushing, then managing the political work of the N. A. M., the organization was revived and strengthened for the purpose of participating in a local campaign in Baltimore in opposition to the city ticket which was being supported by United States Senator McComas, of Maryland, who was being generally antagonized by the N. A. M. on account of his position upon what are generally known as "labor questions"—that is, certain legislation in which labor unions were taking an active interest. The expenses at this time were paid by Mr. Cushing, acting for the N. A. M.

At different times after this Mr. Mulhall, acting for the N. A. M., organized this body under the same name in different sections of the country for political purposes. The organization was never more than local in character and its existence was temporary, it appearing as political exigency seemed to require and disappearing after the particular function desired had been performed. It seems to have been composed of members of organized labor, apparently those who did not sympathize in all respects with the political policies and purposes of the labor unions generally. It was by the organization of this body and through it that Mr. Mulhall performed a larg

# THE AMERICAN FEDERATION OF LABOR.

THE AMERICAN FEDERATION OF LABOR.

In the course of its investigation under the resolution your committee inquired into the political and legislative activities of the American Federation of Labor, examining at length its president, Mr. Samuel Gompers, and its secretary, Mr. Frank Morrison.

The American Federation of Labor (hereinafter referred to as the A. F. L.) is composed of about 118 national unions of trades and industries, including organizations in the Dominion of Canada and in the American possessions. It was organized at Pittsburgh, Pa., in November, 1881, following a preliminary meeting held at Terre Haute, Ind., about the middle of that year, at which a call was issued for the Pittsburgh convocation. It has grown steadily from a small beginning until there are now in the various organizations composing it approximately 2,050,000 individual members. The purposes of the federation, as stated by its president, Samuel Gompers, in his sworn testimony before your committee, are and have been as follows:

"To relieve the workers—the working people—from burdensome long hours of toil: to protect them in their work, their lives, their health; to improve their material and social and moral and political standing; to bring about a better condition for the toilers of our country as the result, and as a reward for the services they render to society."

The funds received and expended by the A. F. L. amount now to more than \$200,000 per annum. This is paid by the individual members of the various organizations composing the federation, the assessment being now about 9 cents per individual per annum. It should be

noted just here that the moneys which have been expended by the federation in political activities—that is, in such efforts as it has made in elections, which will be hereinafter more specifically set forth—have not come from those funds above referred to, but have been received by voluntary contributions from various members. Complete reports of all funds received and expended for all purposes have been published in the official organ of the federation and have been placed in evidence before the committee.

At page 2423 of the committee hearings will be found a statement of the receipts and expenditures from 1881 to 1912, inclusive. The receipts during that time aggregate \$2,638,042.41, the expenses \$2,518,568.48, leaving a balance on hand September 30, 1912, of \$119.473.93. This was the general fund collected in the way of dues from the membership.

The association publishes a magazine known as the American Federationist and also publishes a weekly news-letter, giving a résumé of all matters of particular interest to the federation. These are widely circulated and are public publications. In addition, it publishes many pamphlets and circulars covering a variety of themes of interest to its members and to the public generally.

The president of the association is Samuel Gompers, who has served in this capacity for a long period of time; he receives a salary of \$4,000 per annum. The secretary is Frank Morrison, who receives a salary of \$4,000 per annum. The secretary is Frank Morrison, who receives a salary of the federation's affairs. It has also a legislative committee, headed by its president, to which is committed general management of the federation's affairs. It has also a legislative committee charged with the duty of looking after legislative matters in which it is interested. Its headquarters are located in the city of Washington, where it has a very considerable office force.

#### DISTRICT OF COLUMBIA ORGANIZATIONS.

The development of the investigation led your committee into an inquiry concerning the activities of certain organizations and persons interested in legislation affecting the District of Columbia solely, and herein we first note the local associations of dealers in intoxicating liquous

Inquiry concerning the activities of certain organizations and persons interested in legislation affecting the District of Columbia solely, and herein we first note the local associations of dealers in intoxicating liquors.

There are in the District of Columbia a number of organizations composed of those engaged in the different branches of liquor and beer manufacturing and dealing and related businesses. These several organizations are as follows: First, bottlers; second, brewers; third, jobbers; fourth, salesmen; fifth, wholesale dealers; and sixth, retail dealers. Each of these organizations is made up of individuals engaged in the particular business indicated by the name of the association. These individuals pay into their respective organizations certain monthly or annual dues.

The associations above named are federated into a central body, and they as associations maintain and finance it. A fir, Muhleisen is president of the central organization, Mr. Hugh F. Harvey is secretary, and a Mr. Jacobson is the treasurer.

After the introduction in the Sixty-second Congress of what is commonly referred to as the Jones-Works bill these several associations took a very considerable interest in that proposed legislation. An attorney was employed, who appeared before the Senate Committee on the District of Columbia to argue as to the merits, and numerous other persons appeared voluntarily and without compensation. There were also other activities, such as the distribution of briefs and arguments. Also, this district organization communicated with men in the liquor business in all parts of the country to try to get them to interest the Representatives in Congress from their districts. Mr. Harvey testifies upon this point:

"All we asked them to do, of course, was this moral influence they pointing to bear through communication with their Representatives, pointing out to them from our viewpoint the effects of this legislation. There was also a certain degree of interest felt by the organization in what is commonly

# THE "LOAN SHARKS" AND THE PAWNBROKERS.

During several past Congresses there have been introduced various bills commonly known as "loan-shark" bills, designed to prevent the charging of exorbitant rates of interest by persons lending money and taking chattel mortgages as security, and certain classes of note discounters. In 1911, about the beginning of the extraordinary session of the Sixty-second Congress, such a bill was presented by Representative Dyen, of Missouri, and was referred to the House Committee on the District of Columbia. After being for several weeks considered by that committee it was amended so as to include within its provisions that class of money lenders known as pawnbrokers, and as amended was favorably reported to the House and passed. Subsequently the bill passed the Senate with certain amendments, one of which was atriking out of the provision including the pawnbrokers. Being sent to a conference committee of the House and Senate, it was there considered and finally agreed upon, the pawnbroker provision being restored, and near the close of the last session of the Sixty-second Congress, in February, 1913, was passed, signed by the President, and became a law.

It being suggested before your committee that funds had been raised and efforts made to improperly influence the defeat of this legislation, certain of the money lenders and pawnbrokers alleged to have been most prominent in the matter were summoned to appear and their testimony was taken.

The principal character in this activity was one George D. Horning, who was both a loan shark and a pawnbroker. Two other pawn-

brokers examined were Isaac Heidenheimer and Abraham Burnstine. All of these were reluctant and unwilling witnesses. It was with the greatest difficulty that they could be brought to relate the most simple facts, and their manner and appearance while testifying were such as to create a distinctly unpleasant and unfavorable impression upon the committee. After a number of hours of difficult examination, however, your committee finally elicited the following information:

Very shortly after the introduction of the Dyer bill, it being believed that it would receive serious attention in so far as it applied proceeded to endeavor to rise a figure of the procession of the procession of the committee of the procession of the proc

to have had general charge of the expenditure of this fund. No books were kept, and payments among themselves were made sometimes in cash and sometimes by check.

The nearest approach to clearness as to how the fund was expended is in the testimony of Horning. At page 770 of the hearings he undertakes to state how it was distributed. According to his statement there was paid to Mr. Henry E. Davis, an attorney of the city of Washington, the sum of \$2.000 for services rendered in discussing or attempting to discuss this pawnbroker legislation with certain of the conferees and with Senators and Representatives and for appearing before the President to argue the alleged injustice of the bill. There was paid to the law firm of Tucker, Kenyon & McFarland, also of Washington, the sum of \$350 for services in preparing a brief and for an opinion at some time rendered on the bill. To a man named William Hart there was paid \$200 or \$250, a Mr. Sullivan received \$200, and a Mr. Schulteis \$300. These latter three individuals seem to have been employed to discuss this legislation with Members of Congress and present the views of the pawnbrokers to such of said Members as they should see personally. From the testimony before your committee it does not appear whether these men actually did anything they were employed to do.

The bills for printing briefs, letters, and other matter filed by Heidenhelmer, and which he paid, aggregate \$67.86, and Horning estimates that the total for printing and distribution approximated \$100. The latter also swears that out of this fund so raised he contributed the sum of \$500 to the Democratic national campaign committee, paying the same to John Costello, the national campaign committee, paying the same to John Costello, the national campaign committee, paying the same to John Costello, the national campaign committee, paying the same to John Costello, the national campaign committee, paying the same to John Costello, the national campaign committee, paying the same to John Costello, the nation

Concerning the payment of \$2,000 to Mr. Henry E. Davis, there was some controversy, and some doubt apparently exists. Heldenheimer seemed to believe that his fee was \$1,500. Mr. Davis himself testified before the committee that this sum of \$2,000 was paid him and that on February 26, 1913, when the last payment was made he executed a receipt therefor. This paper was placed in evidence before the committee. He further testified that after being paid he returned \$500 to Horning with which to pay one Ryan for services alleged to have been performed by him in connection with the matter, similar, as your committee understands, to those of Hart, Sullivan, and Schulteis. He states that he did this voluntarily, it being suggested to him by Horning that Heldenheimer and Burnstine were unwilling to pay more, and that he (Horning) would have to pay Ryan's entire fee. Horning had been for many years a client of Davis, and under the circumstances, he says, he felt inclined to and did pay the same himself.

There was considerable question in the committee as to the fact of this alleged payment to Mr. Davis, but it does not appear to be material to the inquiry, since it can not in any way affect its findings upon those matters coming within the scope of the resolution, and hence no opinion is here expressed upon it.

Having described the various organizations, associations, etc., concerning which investigation was made, the specific matters which the committee was directed to inquire into and report upon will be now discussed. It is proper to state that in the preparation and rendition of this report it has been determined to follow a different order of statement than that laid down in the resolution. It will be observed that in the preamble of the resolution the only organization referred to is the National Association of Manufacturers, while in its body an inquiry is directs the committee to inquire first, whether the National Association, etc., that the committee might learn to be engaged in the efforts therein defined and

### WHAT IS A LOBBY?

The resolution does not define for us the word "lobby," and distinguished and eminent authorities entertain wide differences of opinion as to its correct definition. The word at one period carried with it a certain idea of acts, sinister and corrupt, and the first impression now made upon the mind of the average man when this word is used in connection with legislative bodies is probably in line with this conception. That it was not so intended to be understood in this resolution, however, appears to be certain, because the second part of paragraph 4 requires the committee to ascertain and report "to what extent and in what manner, if at all, legislation has been improperly effected or prevented by reason of the existence of such lobby, if it be found to exist now or to have existed heretofore." Had it been intended that your committee should consider the word "lobby" as used in the resolution to have the meaning above set forth, there would have been no necessity or occasion for the insertion of the word "improperly" in the subsequent clause.

Your committee has therefore in the taking of testimony treated and does, for the purposes of this report, treat the word "lobby" as used in the resolution as having the broad meaning of a person or body of persons seeking to influence legislation by Congress in any manner whatsoever, and under this definition it finds that the National Association of Manufacturers, the National Council for Industrial Defense, the National Tariff Commission Association, the American Federation of Labor, the local associations of intoxicating liquor dealers, and the local lons sharks and pawnbrokers have maintained, and some of them do now maintain, lobbies for the purpose of influencing legislation by Congress.

LEGISLATIVE ACTIVITIES AND METHODS OF THE N. A. M. AND THE N. C. I. D.

Congress.

Legislative activities and methods of the N. A. M. And the N. C. I. D. There has heretofore been given a history of the organization and a general statement of the purposes of the N. A. M. and the N. C. I. D., and their unity of intention as to political and legislative matters has been set forth.

As a rule, the attitude of these organizations on legislative matters have been negative; that is to say, they have opposed with all the vigor possible certain legislative propositions:

(1) That limiting the right of workmen to contract as to the amount of time they shall labor.

(2) Any limitation upon the power of courts of equity to issue the writ of injunction.

(3) The exclusion of organized labor from the provisions of the Sherman law.

These three matters have engaged their most serious attention and have been the subjects of their most active opposition. All bills and amendments—and there have been too many to try to enumerate them here—seeking to accomplish either of these ends, or even looking in that direction, have been met at the threshold and have been fought with untiring persistency and unwavering earnestness.

Other matters in which from time to time they have taken an interest have been workmen's compensation legislation, industrial and vocational education, merchant-marine legislation, and the creation of a tariff commission, all of which one or both of the organizations have favored. They have also opposed all legislation looking toward the permitting of "unionization" of Government employees, and seem to have been adverse to the principle involved in bills proposing to restrict or prevent the transportation in interstate commerce of articles that are the product of child labor. The question of Federal incorporation has been also a subject matter of discussion, but the record discloses no particular effort relative to either of the latter subjects.

To a certain extent also the N. A. M. seems, through its employee, Mr. Mulhall, to have taken some interest, a few years ago, in behalf of

## CUSHING.

Marshall Cushing was seceretary of the association for a period of several years, retiring in 1907. Because of the remoteness of the time of his service your committe has not made so searching inquiry of his activities and efforts as of the others. The testimony shows that he was secretive and reticent to an extreme degree as to the character of his work, and it was evidently friction in the association caused by this

that led to the severance of his connection with the organization, which occurred not long before the launching of the N. C. I. D.

EMERY.

EMERY.

James A. Emery became counsel for the N. C. I. D. in the year 1908 and has served in that capacity since that time, having his headquarters in the city of Washington.

The constituent members of this organization at the time of joining sign a card—something in the nature of a power of attorney—authorizing the counsel to represent them in those legislative matters in which an interest is taken by them, and he has complete authority in the premises to act and speak for them before committees of Congress and other persons and authorities thought necessary to be communicated with.

The activities of Mr. Emery in his capacity as counsel have been many and varied. When bills are introduced he procures copies, makes abstracts of them, prepares briefs and arguments upon them, keeps the members of his organization advised as to the contents and status of such bills by means of belletins, letters, pamphlets, etc., answers any special inquiries that may be directed or referred to him concerning such bills or in regard to existing law, seeks opportunities for making arguments before the committees having such bills in charge, and makes such arguments whenever opportunity is afforded. It also appears that by keeping constantly informed as to the status of bills in committees and upon the calendars he is able to and does advise the members of his organization when and how to address Representatives and Senators by letter or telegram urging action or nonaction, as may be desired by such members.

MULHALL.

Martin M. Mulhall entered the employ of the N. A. M. about the last of January 1903 and continued in the service until the class of the status of the status of the status of the status of the process of the status of the status

Muhall.

Martin M. Mulhall entered the employ of the N. A. M. about the 1st of January, 1903, and continued in its service until the close of the year 1911, a period of 10 years.

In September, 1911, he was suspended by the general manager, Mr. Bird, and subsequently was removed by the board of directors or resigned, his retirement to take effect at the close of the year.

Following his retirement the offered, in the latter part of 1911, to turn over his letters and correspondence to the American Federation of Labor and also sought to bring them to the attention of Congress through the then chairman of the Committee on Labor, Mr. William B. Wilson. These offers were not accepted, and in 1913 he endeavored to bring the matter to the attention of William Randolph Hearst, owner and publisher of various newspapers and magazines. It does not appear that he sought any compensation in connection with these offers.

After these negotiations had failed, the correspondence was finally brought to the attention of the New York World, and arrangements were made whereby, for the sum of \$10,000, the correspondence was furned over to that journal, and the personal narrative which appeared in the World and the Chicago Tribune on June 29, 1913, was written.

brought to the ettention of the New York World, and arrangements were made whereby, for the sum of \$10,000, the correspondence was turned over to that journal, and the personal narrative which appeared in the World and the Chicago Tribune on June 29, 1913, was written.

Since the appearance of this article and its companion piece, the summary prepared by Mr. Siebold, Mr. Mulhall has been variously and vigorously assalled.

Your committee has not felt called upon to enter upon either his personal condemnation or his personal defense. It has concerned itself wholly with an inquiry to ascertain the facts called for by the resolution committed to its charge. The fullest and freest opportunity was given to those interested to cross-examine Mr. Mulhall upon any and all parts of his personal narrative appearing in the journals referred to an examination of the proper under the resolution. He was given a very rigid cross-examination by Mr. James S. Easby-Smith, counsel for Representative James T. McDershort, and by Mr. Robert H. McCarter, who appeared as attorney for the N. A. M. and the N. C. I. D.

In his examination Mr. Mulhall admitted that he had been in error in sundry statements appearing in his personal narrative as published in the World and Tribune and as to matters contained or asserted in his correspondence. Some of these matters were vital and important; others were wholly immaterial:

Upon many other matters of great importance Mr. Mulhall has been abundantly corroborated by the testimony of officials of the N. A. M. accommittee, while also many of his statements and much of his testimony has been sharply and fiatly contradicted.

It is of vital necessity that the proper perspective be obtained and maintained. What Mr. Mulhall actually did in the matter of reaching and influencing Members of Congress is Important as relating to their integrity, and hence the integrity and purity of representative cyonement. Of almost equal importance, in another aspect, is what the organizations employing him thought he w

without question, except in perhaps one minor instance as to a small typewriting account, so far as the record discloses. That there was some friction at times because of his temper appears, but this was always smoothed over until the time of his suspension in 1911, and upon the whole he undoubtedly enjoyed the confidence, esteem, and appreciation of the officials who were his superiors, and his acts, with few exceptions, met their approval and received their commendations.

One exception which it seems proper to note at this juncture is the use by him of a room in the Capitol. In the Mulhall narrative appearing in the press, and in the comments concerning it, much stress was laid upon this fact. Hereinafter this will be more fully discussed. For the present it is sufficient to say that the use of this room by him was explicitly disapproved by that official of the N. A. M., Mr. Bird, under whose direction he was working, and positive instructions vergiven him not to use it. His subsequent use of the room was in violation of these instructions and seems to have been without the knowledge of Mr. Bird, Mr. Emery, or other of the officials of either organization. This protest was not against what he was to do in the room, but was simply against its use by him, it evidently being feared that such action would meet merited public suspicion and criticism.

Under all the circumstances and conditions it seems fair and just to say that the N. A. M. and the N. C. I. D., by now assailing and denouncing Mulhall, and by proving or attempting to prove that he did not do many of the things which at the time he reported he was doing, can not escape whatever criticism and condemnation may be deserved for his alleged acts as their agents, because, whether he did or did not do the hings which he reported to them he was doing, they thought he was reporting the truth, and, with few minor exceptions, approved his course unreservedly.

The exact duties that Mr. Mulhall was supposed and expected to perform your committee confesses prov

He appears also to have solicited members for the association to some extent, but this seems to have been a minor and merely incidental part of his business.

President J. W. Van Cleave unquestionably entertained a high regard for his abilities, was responsible for his salary being increased, and evidently held him in esteem, and between him and Ferdinand S. Schwedtman, secretary to Van Cleave, who carried on the greater portion of the latter's correspondence as president, there seems to have existed a deep and mutual friendship and admiration. He was constantly complimented and encouraged by Mr. Schwedtman, who assured him also of his chief's appreciation.

Some time after the formation of the N. C. I. D. Mulhall was "loaned" to the latter by the N. A. M., instructed to come to Washington, and was placed while here under the direction and control of Mr. Emery. While away from Washington, engaged in field work, he was to be under the direction of Mr. Bird. The services which he rendered the N. C. I. D. were considered by the N. A. M. as its contribution to the former organization.

There is an unsatisfactory indefiniteness also about the functions he was to perform in Washington. He was at this time receiving a salary of from \$250 to \$300 per month and a not illiberal allowance for expenses. The latter was not a fixed amount. He sent in his expense accounts and they were paid without question, except in the instance cited.

One of his duties seems to have been that of procuring bills, reports.

One of his duties seems to have been that of procuring bills, reports, etc., but the most of this work was, during much of the time at least, performed by I. H. McMichaels, who was employed by Mulhall for that purpose with Mr. Emery's consent, Mr. Emery paying him at least in

performed by I. H. McMichaels, who was employed by Mulhall for that purpose with Mr. Emery's consent, Mr. Emery paying him at least in part.

He did not appear before any committees of Congress to make arguments upon pending measures, nor does it appear that he had anything to do with the preparation of the bulletins and pamphlets sent out by Mr. Emery.

From the testimony adduced before your committee, the conclusion must be inevitable that in so far as Mr. Mulhall's duties in Washington and about the Capitol are concerned he was employed and used by these organizations very largely and primarily for personal lobbying. They believed him to be a man of extended acquaintance among Representatives, Senators, and other public men, and believed that this acquaintance could be capitalized and utilized in influencing individual Members in their official acts, and so affect the general course of legislation; and it was for this purpose that he was employed and retained. Having pointed out the legislation in which the organizations were interested, we turn now to the methods, and especially to Mulhall's work, in this regard.

In his personal narrative in the World and Tribune he asserted that he would obtain advance information as to legislation that was to be offered by way of amendment as riders upon bills; that upon one occasion he reported to Mr. John Dwight, the Republican whip of the House, that a rider would be offered to the sundry civil bill two weeks before it was offered, and that Dwight kept in Washington as many Members of bis side of the House as he possibly could, etc. He states that this rider was "a general eight-hour bill, which William Hughes, of the sixth New Jersey district, put upon the sundry civil high, and this rider was squarely defeated by a party vote of the House, the Republicans voting against it and the Democrats voting for it."

Concerning this statement there has been much testimony and a very considerable amount of confusion. We think the article was so worded as to make the impression

does not substantiate this idea, but that upon one occasion, which was that referred to by Mr. Mulhall, he did obtain such information is clearly and unmistakably proven. It does not appear, however, that he obtained this information two weeks in advance of the amendment being offered, but apparently it was some two or three days, nor was the amendment effered by Mr. Hughes of Jersey, but, as the record shows, it was by Mr. Kendall of Iowa.

Mr. Mulhall is also mistaken as to it having been defeated by a party vote, "the Republicans voting for it and the Democrats voting against it." As a matter of fact, a point of order was made to the amendment, and it was sustained by the Chairman of the Committee of the Whole. An appeal from this ruling was taken, and the Chair was sustained upon a teller vote—yeas, 99, nays 61. There is no method of ascertaining whether this vote was along party lines, nor do we deem it material. It is very well known in the House and throughout the country that divisions upon these questions have not been uniformly along party lines.

In a letter written to Mr. John Kirby, jr., of Dayton, Ohlo, under date of June 4, 1910, Mr. Mulhall makes a long report as to his activities. This letter has been placed in evidence before your committee. It appears from the context that upon June 3 Mr. Mulhall went to the Capitol and "received a brief report from my labor friends and was handed the following written statement:

"'The sundry civil bill now before the House, page 116, at the end of the bill, on page 184, Mr. Hughes, of New Jersey, has an amendment on the eight-hour law to be offered; every effort is being made to get your men in, so that the amendment can be defeated. Notice has been given all Republicans to be on hand to vote with the chairman, Tawney, against same going into the bill. I will look after the end of keeping the other way."

McMichael statifies that he did about that time hand Mulhall a note, but he is quite positive in the belief that not all of the language above quoted was

did so.

The original of this note was not placed in evidence. When Mr. Mulhall was before your committee he was questioned concerning it, and it was his impression that it had been filed before the Senate lobby investigating committee. We thereupon addressed a request to the Senate committee to be permitted to examine this, if the original had been filed, and in response thereto were advised that it had not been placed in evidence or presented to the committee. From all the evidence and the surrounding circumstances, your committee thinks it probable that McMichael's version is correct and that the other portions of the note became mixed with the original McMichael matter in quoting the same. same.

of the note became mixed with the original McMichael matter in quoting the same.

The letter of Mr. Mulhall continues, giving an account of his call upon the Republican whip of the House and informing him that such an amendment would be offered, and tells his (Mulhall's) efforts to procure the attendance of Members adverse to the legislation when this matter should arise.

It appears from an examination of the sundry civil bill, as it was reported to the House in the Sixty-first Congress, second session, that it did consist of 184 pages. It also appears from an examination of the Congressional Record (see pt. 7, vol. 45, 61st Cong., 2d sess., p. 7327) that at the close of the session on June 2, page 11f of the bill was under consideration. It will be remembered that Mr. Mulhall claims to have obtained this note on the morning of June 3 and prior to the meeting of the House. It further appears that the amendment of Mr. Kendall was proposed on page 184 and before the last section of the bill—section 11. (Pt. 7, vol. 45, p. 7410.)

This record evidence is necessarily strongly corroborative of certain of the details of Mr. Mulhall's letter, and, in addition to this, the testimony of Mr. Emery is conclusive upon that point.

Under date of June 6, 1910, Mr. Emery, writing to Mr. Kirby, gave an account of the contest over the Kendall amendment, saying among other things:

"In accordance with the warning received, an account of which was given you in my recent letter, an attempt was made by the Democrats.

other things:

"In accordance with the warning received, an account of which was given you in my recent letter, an attempt was made by the Democrats to attach the eight-hour bill to the sundry civil bill on Saturday afternoon. The colonel's authentic advance information enabled ample warning to be given to the Republican whip, and the prompt and efficient assistance which the colonel gave secured every precaution."

The "colonel" therein referred to was Mr. Mulhall.

In a subsequent part of the letter it is further stated:

"The colonel deserves the greatest credit in the manner of obtaining his information and the promptness and efficiency with which he applied it."

Another of the matters of legislation against which these organiza-tions have made vigorous and determined warfare has been the exemp-tion of labor unions from the operation of the Sherman antitrust law, and in connection with this same sundry civil bill in 1910 there was a contest over this in which Messrs. Emery and Mulhall took a most

contest over this in which Messrs. Emery and Aluman took a most active part.

On June 2, 1910, while the sundry civil appropriation bill was under consideration in the House (see Cong. Rec., vol. 45, pt. 7, 61st Cong., 2d sess., p. 7324), Representative William Hughes, of New Jersey, offered an amendment designed to prevent the use of any portion of a special fund allotted the Department of Justice for the investigation and prosecution of violations of the antitrust law being used for prosecuting members of labor unions under certain conditions. This amendment was offered to be inserted at the end of line 24, page 116, of the bill

ment was offered to be inserted at the end of line 24, page 116, of the bill.

We think it strongly probable that Mulhall, in writing his personal narrative, confused the Kendall amendment, above referred to, with this Hughes amendment, and hence some of the inaccuracies that appeared in his statement.

The Hughes amendment was adopted in the Committee of the Whole. No separate vote was had or demanded upon it at the time of the final passage of the bill by the House on June 4, 1910. The Senate, however, amended the bill by striking out the House amendment, and this action became Senate amendment No. 76. When the bill as amended by the Senate was returned to the House all Senate amendments were disagreed to by unanimous consent and the bill was sent to conference. There were a number of conference reports, partial in character, made from

time to time and acted upon. On June 21 (Rec., 61st Cong., 2d sess., vol. 45, pt. 8, p. 8056) Mr. Hughes moved that the House conferees be instructed to disagree to Senate amendment No. 76. Upon this motion there was a call of the roll, and the yeas were 154, nays 105, answered "present" 12, not voting 118.

The next final test came on June 23, 1910 (Rec., vol. 45, pt. 8, p. 8552, 61st Cong., 2d sess.), when Mr. Tawney moved that the House recede from its disagreement and concur in the Senate amendment striking the provision from the bill. This motion carried upon the roll call—yeas 138, nays 130, present 16, and not voting 105.

There has been placed in the record of your committee, and proven, a letter of Mr. James A. Emery, written to Mr. John Kirby, ir. (House hair), so was actions in regard thereto, and the work performed by Mulhall. Among other things, he says:

"In the Meantime, after an hour's conference with Mr. Dwight, the whip of the House, at his office, the program was outlined and carried out to the letter. To the colonel (Mulhall) was given a list of 14 names, some Democrats, some Republicans, who voted with HUGHES. He accomplished his work so successfully that of the 14 but 1 failed to either absent himself or vote with us yesterday."

In view of this statement, your committee has carefully examined the Record upon the two votes. This shows (see volume of Record the vote of June 21 who voted for the Hughes amendment on June 22; that there were 30 that voted for the Hughes amendment on June 22; who answered "present" on June 23; 6 that voted for it on June 21 who are recorded as not voting on June 23; 6 that voted for it on June 21 who are recorded as not voting on June 23; being paired, and 3 that voted for the work of all of those recorded as not voting on both days were paired, and as, of course, your committee has no way of determining who of them were absent from the city or engaged at the time in other official business, it has been deemed essential to rectite the Record facts in view of th

mittee to "ascertain and report to what extent and in what manner, if at all, legislation has been improperly effected or prevented by reason of the existence of such lobby if it be found to exist now or to have existed heretofore."

This necessitates the expression of the judgment of the committee as to what character of efforts may properly be exercised by an individual or an association in the attempt to influence the action of Congress and its individual Members in legislation. The committee realizes the extreme delicacy and difficulty of laying down such a rule and the practical impossibility of asserting one sufficiently specific to be generally satisfying. This is a matter of individual opinion and is a question which must largely be determined by the Member for himself. After all the searching and defining and speculating, we come back to the elemental proposition that the whole matter must depend altimately upon the judgment, the intelligence, the honor, and above all, perhaps, the courage of the individual Congressman.

No rule which this committee can lay down even if it could be crystallized into law, will protect a fool from his folly or a weak man from his timidity, nor can it give courage to the cowardy or virtue to the depraved. The man who enters public life in a representative government assumes grave responsibilities, and most largely upon his own judgment, his own firmness of will, and his own sense of honor must he rely in meeting the constant pressure from conflicting interests that are ever pleading and appealing, ever enticing and threatening him. Each appeal and each threat and each inducement offers its own problem to be solved, and each man must have a standard of his own.

The elements which may annoy may offer no obstacles to another. We see things from different angles, and, so seeing them, their appearances are different.

Nevertheless, your committee believes that there is a general standard in the public conscience of this country which renders it possible and proper to lay down

when we come to apply this rule to the activities of the N. A. M. and the N. C. I. D. in legislative matters we are at once confronted with the impossibility of divining the motives which actuated the attitude of the various Members of Congress.

Accepting as true the statement that upon the final vote on the Hughes amendment Members were induced to change position by the acts of Mulhall and Emery and the influence of telegrams and letters,

the question still remains as to what were those acts and what methods were used. In the very nature of things the committee could not ascertain these facts in detail or learn the motives of those who changed. As to the inducing of Members to remain away, which is also stated to have been done, the committee has no hesitation in saying that this was highly improper. The Members so induced violated the rules of the House, which require attendance and the casting of a vote unless excused by the House, and, what is more important, violated the obligations due their constituencies and the public.

This we say without reference to the merits of the legislation concerning which differences of opinion exist.

To this extent, at least, the lobby of the associations was guilty, in the opinion of your committee, of improperly preventing and seeking to prevent this legislation.

For the reason that it is impossible for your committee to know the motives of those who changed their position, it is impossible to say whether they were improperly influenced; but we feel constrained to say that there is a limit beyond which men should not in decency go, even in argument, and we entertain the gravest doubt as to the propriety of the acts of Mulhall and Emery relative to this matter, and we hope that future Congresses may be trusted to legislate without the particular kind of aid rendered in the particular manner that those gentlemen then gave.

We think it is offensive and outrageous that these associations should have their paid hirelings about this Capitol buttonholing Members of Congress, striving to induce them to remain away from the Chamber when a vote was being taken. We think they went beyond the limits of legitimate effort and that they deserve the severest censure as well as a pointed invitation and suggestion that they completely reform their methods or else remain away in the future. We have striven to make clear our opinion as to the right of persons and organizations to argue and appeal to Representatives and Senat

### AS TO THE NATIONAL TARIFF COMMISSION ASSOCIATION.

During the extraordinary session of the Sixty-first Congress, in 1909, the N. T. C. A., which, as has heretofore been pointed out, was a kind of offspring of the N. A. M., maintained a lobby in the city of Washington in an effort to bring about the creation of a tariff commission. The active work for this began immediately following the Indianapolis convention of February, 1909, and during the entire time that the tariff bill was pending before the extraordinary session of Congress there was a most vigorous and earnest campaign conducted in its behalf.

there was a most vigorous and earnest campaign conducted in its behalf.

The committee of 100 which was appointed at the Indianapolis convention in turn appointed an executive committee of 15, to which was given plenary power, apparently, in carrying on this fight. Mr. H. E. Miles, of Racine, Wis., was its chairman. The special session convened March 15, 1909. Prior to this time for several months the Committee on Ways and Means had been conducting hearings on the various schedules of the tariff bill. There had been no appearance before that committee of anyone advocating a tariff commission, nor had there been any very noticeable agitation of the subject, except by the N. A. M.

The majority members of the Ways and Means Committee had prepared the bill substantially as it was presented in the House by the date of the convening of the extraordinary session, and it was introduced and reported to the House within a very short time and its consideration began. Hon. James E. Watson retired from the House of Representatives on March 4, 1909. He had been a Member for 12 years, serving the time consecutively except for one term. He was for six years the Republican whip of the House and was on terms of closest intimacy with the Speaker and other prominent Members of his party in the body. As one of the leaders of his party and because of his agreeable personality, as well as great intellectual ability, he was generally popular and strongly influential in the House. He had served on important committees, being at one time a member of Ways and Means, from which he resigned in June, 1908, to enter the campaign as nominee of his party for governor of Indiana.

About the 26th or 27th of March, 1909, while the tariff bill was under consideration in the House, Mr. Watson, who was at his home in Indiana, received a message from either Mr. Muhall or Mr. Emery (see testimony, Watson, p. 2509) to come to Washington. He did so, and upon his arrival here negotiations were opened with him to take employment by the N. T. C. A. to wor

In view of the statement in the Mulhall article that Mr. Watson was employed in this capacity while yet a Member of Congress, we feel that attention should here be called to the fact that this is an error. This will be subsequently discussed more particularly.

'Mr. Watson's duties under his employment seem to have been to personally urge the question with Members of the House and Senate belonging to the dominant party. He did not appear before any congressional committee and make arguments upon it, nor were any public arguments before the committee of either House had upon it.

The tariff-commission amendment to the tariff bill was defeated in the House, and the activities of those engaged in the propaganda were then centered on the Senate. Mr. Watson (p. 2571) tells of the efforts there as follows:

then centered on the Senate. Mr. Watson (p. 2571) tells of the efforts there as follows:

"I had my headquarters down here in town, and I would get gentlemen to go and see their own Senators. I did not go to see all these gentlemen or argue to different Senators about it, but I had men from the different States go to see their own Senators, and then report to me. I had charge of that organization and that campaign for a tariff commission in the House and in the Senate, and I had various Members of Congress coming to report to me about how their delegations stood, and I had gentlemen who were interested in this proposition. For instance, I asked Mr. John C. Cobb, who at that time, I believe, was president of the Merchants' Association of Boston. He came here, and I asked him to see Senator Lodge and Senator Crane about it, and so on through the various States."

He also gives an account of a call by himself, Mr. Van Cleave, then president of the N. A. M., and Mr. Schwedtmann, secretary to Mr. Van Cleave, upon Senator Aldrich; states that Mr. Aldrich advised he was

not against a tariff commission properly limited and defined, and brought in a proposition which he submitted to their examination, and

says:
"We sat down and went over it while he was there. My recollection
is that I took my pencil out of my pocket and just wrote in this expression. They were providing for finding the facts for various purposes,
and how a report should be made to the President, etc., in that proposition of Senator Aldrich's, and I took my pencil and wrote in this lan-

guage:

"And for use in the preparation of tariff legislation.'"

Without going into the details it is sufficient to say that the bill which finally passed—the Payne bill—carried a provision for a modified form of tariff commission or board. It was not entirely satisfactory to those of the N. T. C. A. and the N. A. M. who had led in the propaganda, but was accepted as a step toward their ultiThere was no evidence.

mate desire.

There was no evidence presented to your committee which would indicate that under the rule as to improper influence set forth this tariff commission legislation was improperly effected by the lobby which worked in its behalf. At the same time the committee questions the propriety of one who has been a Member of Congress and attained a personal and political influence capitalizing that influence in pressing legislative propositions upon Congress for hire by personal contact and personal efforts with Members, as was done in this case, and we confess to a feeling of regret that upon any question, whatever its merits, the lobbyist for it should be able to say, as Mr. Watson said in this case (p. 2571), "I had various Members of Congress coming to report to me about how their delegations stood."

LEGISLATIVE ACTIVITIES AND METHODS OF THE A. F. L.

LEGISLATIVE ACTIVITIES AND METHODS OF THE A. F. L.

Watson said in this case (p. 2071), "I had various Members of Congress coming to report to me about how their delegations stood."

LEGISLATIVE ACTIVITIES AND METHODS OF THE A. F. L.

The testimony of Mr. Gompers before your committee shows the various matters of legislation in which the federation has taken an interest. As a rule its position has been affirmative—that is to say, it has pressed for the adoption of legislation; but at times it has also opposed certain matters that have arisen. Its activities in this direction have been exerted in the States, as well as in the Federal Congress. Your committee has not felt that it was called upon or authorized to make investigation as to the efforts in the States and sonfined itself to Federal and congressional matters.

At its first convention in Pittsburgh, when organized, it declared generally for "a shorter workday, for increased wages," or at any rate a protest against the continual decrease in wages which has been imposed apon the workers since 1877; it also took up the question of immigration and its regulation, and also declared for a Federal law that would "regulate and limit and finally stop the Chinese immigration." There has been a greater enlargement in its demands since that time, and the following legislation has been urged and supported:

1. The establishment by law of a limitation of the hours of labor of women and childern. At first the limitation sought was to 12 hours per day, then to 60 hours per week, then to 58 hours, then to 54 and to 48 hours. The efforts in behalf of this legislation were mainly in the States, but from Congress there has been sought such legislation for the District of Columbia.

2. Legislation concerning vestibules upon the street cars for the protection of motormen in the District of Columbia.

3. Compulsory education and free text-book laws for the District of Columbia.

4. Lien laws for workmen in the District of Columbia.

5. Legislation of the Federal Government in the various departments should be shortened and limi

16. Legislation relative to interstate shipment of convict-made goods.

17. Legislation designed to prevent the manufacture of a certain character of matches. In the manufacture of which the disease of "phossy jaw" is alleged to be contracted.

18. Legislation creating a Bureau of Labor and the Department of Labor.

18. Legislation creating a Bureau of Labor and the Department of Labor.

19. Election of Senators by direct vote of the people.

20. Immigration, with particular reference to its restriction.

In addition to the matters above recited upon which the American Federation of Labor sought affirmative action by the Congress, there were also certain matters which it opposed, as follows:

1. The so-called compulsory antipliotage bill.

2. The repeal of the eight-hour law on the 1sthmus of Panama.

3. The so-called ship-subsidy bill, in March. 1907, which was opposed particularly because the organization held if "to include a very objectionable conscription provision injurious to and affecting seamen."

4. Compulsory investigation of labor disputes, opposed because it was considered a step toward compulsory arbitration.

Your committee finds from the testimony adduced before it that the methods pursued by the representatives of the American Federation of Labor in the effort to obtain or defeat legislation were the appearance before committees of the House, by its president, secretary, and legislative committee, where arguments were made at the public hearings held for the purpose of argument, and also, according to the testimony of Gempers and Morrison, its representatives have at times discussed with individual Members of Congress these matters of legislation, arguing upon the merits and soliciting the aid and support of such Representatives.

In the letter of Mr. Emery to Mr. Kirby giving an account of the fight over the Hughes amendment, a portion of which has been here-tofore quoted, it is also stated:

"Mr. Gompers made his headquarters in the office of Representative CARY, of Wisconsin, in the House Office Building, and had something in the neighborhood of 100 aids about him making a persistent office canvass, petitions and memorials being piled in from every union source."

Mr. Gompers when on the stand was questioned in regard to this and made a flat denial, saying:

"In so far as that statement refers to me or any number of men with me or aiding me in Mr. Cary's office or in the Capitol Building or in any office of the Government of the United States, it is absolutely untrue."

The committee feels assured that Mr. Emery was misinformed as to the fact at the time of writing the letter and made an error in the

The committee feels assured that Mr. Emery was misinformed as to the fact at the time of writing the letter and made an error in the statement.

It is a matter of common knowledge that Mr. Gompers in his capacity of president of the A. F. L. took a most keen interest in this legislation, as great, if not greater, than in any other matter which has arisen. He states that from his office he directed the legislative committee of the A. F. L. to go to the Capitol and render such assistance as they possibly could in having the Hughes amendment retained, and undoubtedly this committee obeyed instructions. This committee consisted of Messrs, Holder, Hamilton, and Moffett.

There seems to have been about all of the efforts of the A. F. L. relative to legislative matters entire frankness and full publicity. In so far as the record discloses there have been no secret methods connected with the work of its representatives in this regard. As will be hereinafter pointed out, it has vigorously opposed for election candidates, for office whose views and votes on public questions have been in opposition to its policies, but in its case, as in that of the other organizations referred to, your committee has no method of divining the extent, if any, to which Representatives have been influenced against their better judgments by fear of its political power. That the organization is actively and carnestly engaged in political and legislative effort and has been for many years is well known, but your committee has found nothing from the evidence taken before it to indicate it has done or attempted to do in these matters aught that is illegitimate or that is not within the rights and privileges of citizens of these United States. We do not find that its lobby has improperly effected or prevented legislation under the rule laid down.

THE LIQUOR DEALERS AND MONEY LENDERS.

THE LIQUOR DEALERS AND MONEY LENDERS.

In that part of the report wherein we gave an account of the legislative efforts of the liquor dealers, the loan sharks, and the pawn-brokers of the District of Columbia, all the facts except as to certain loans made to a Member of Congress, which will be subsequently discussed, have been quite fully set forth. There is no evidence that such lobbies as were maintained by these effected or prevented legislation improperly or otherwise.

EFFORTS AS TO COMMITTEE ASSIGNMENTS.

ation improperly or otherwise.

EFFORTS AS TO COMMITTEE ASSIGNMENTS.

In the third paragraph of the resolution your committee was directed to inquire whether improper influence has been exerted by said association (the N. A. M.) or by any other association, corporation, or person to secure or prevent the appointment or selection of any Representative to any committee of the House in this or any other Congress.

In the Mulhall article it was asserted that at the request of Mr. Emery and Mr. Mulhall three active members of the House Judiciary Committee were removed through the influence of Hon. James E. Watson: that one of these was Mr. George A. Pearre, late a Representative from the State of Maryland, the names of the others not being given; that in the place of the three men removed "three very subservient Members were appointed, Mr. Vreeland, of New York, and Mr. Bannon, of Ohio, being two of these," and the article adds:

"So this committee was fixed from that time on to make it impossible to get any legislation through unless it was O. K'd by the National Association of Manufacturers."

The Congress in which this is alleged to have taken place is not given, but from the surrounding circumstances it appears to have been the intention of Mulhall to assert that it was at the time the House committees were appointed for the Sixty-first Congress. The Judiciary Committee or that Congress was appointed near the close of the extraordinary session in August, 1909.

It is perfectly evident that Mulhall is in error as to at least a part of the statement. Mr. Vreeland was never at any time during his service in Congress a member of the Judiciary Committee. Mr. Bannon was appointed a member of the Judiciary Committee, Mr. Bannon was appointed a member of the Sixty-first Congress. At the time of his original appointment he succeeded to a vacancy caused by the resignation of Mr. Gillette, of California, who was not removed but who resigned from Congress to become governor of his State. In testifying, Mr. Mulhall was unabl

beginning of the Fifty-ninth Congress he was not reappointed. The then Speaker of the House, Mr. Joseph G. Cannon, appointed the committee.

It is well known that Mr. Cannon's views upon what are called the labor questions were also in antagonism to those of Mr. Pearre and were in accord in the main, if not wholly, with those of the N. A. M. officials. Your committee has no doubt that the failure to reappoint Mr. Pearre was due to his position on this question and because the Speaker did not deem it proper. There is no evidence in our record, however, to indicate that there were any efforts made by the N. A. M. in this direction. Mr. Watson denies that he ever consulted with the Speaker concerning or advised his removal. Mr. Emery likewise enters a denial of any activity in this regard. He was not at that time counsel for the N. C. I. D. The entire matter rests upon the unsupported statement of Mr. Mulhail, and since he is so unmistakabily in error as to other vital matters alleged to have been connected with this transaction, the committee feels assured that he was mistaken as to this. this transaction, the committee levis must be the transaction, the committee levis must be as to this.

Doubtless the removal or failure to reappoint Mr. Pearre was gratifying to the N. A. M., because of the antagonism of views between

them, and it is not beyond the range of possibility that the matter was by some of its representatives discussed with the Speaker, or others known to be close to him, but there is no evidence of any improper influence sought to be exerted upon him and no reason to assume that his act was other than upon his own initiative and responsibility.

Another charge in the Mulhall article is that in the Sixty-first Congress Mr. John J. Gardner, of New Jersey, then chairman of the Committee on Labor. "allowed the lobby of the N. A. M. to suggest to him the gentlemen they wished to have serve on his subcommittees of the House Labor Committee and to pigeonhole the labor bills and measures, through these subcommittees, that had been offered before 1908 and all that came up at the regular session of Congress in 1908 and 1909."

Mr. Mulhall, Mr. Emery, and Mr. Gardner each testified before the committee and were closely examined upon the statement. The substance of Mulhall's testimony upon this point is that he and Emery discussed the matter, and that in the latter's office certain persons were agreed upon to constitute at least one, and perhaps others, of the subcommittees; that Mr. Emery wrote on a slip of paper the names of five men to be suggested for appointment on subcommittee No. 2; that Mr. Mulhall communicated this to Mr. Gardner, and that they were so appointed.

There has been proven and placed in the record a cony of a tele-

So appointed

There has been proven and placed in the record a copy of a telegram sent by Mulhali to Emery, which reads as follows:

WASHINGTON, D. C., February 11, 1910.

JAMES A. EMERY, National Association of Manufacturers, Notional Association of Manufacturers, 170 Broadway, New York:

Subcommittee No. 2 appointed as suggested and bill referred to that committee by Chairman Hughes, of New Jersey, making personal canvass of full committee to try to force bill out next Tuesday.

M. M. Mulhall.

(Charge James A. Emery.)

Subcommittee No. 2 aphonited as suggested and but leave reason committee by Chairman Housins, of New Jersey, making personal canvass of full committee to try to force bill out next Tuesday.

(Charge James A. Emery.)

Also there have been proven end placed in evidence letters written by Mulhell about the same time in which there are statements tending to corroborate his assertions in this regard.

Mr. Emery and Mr. Gardner each make denial of the truth of these assertions. Mr. Emery undertakes to explain the telegram above quoted by saying that it evidently had reference to an effort which he and others were making to obtain a hearing upon an "cight-hour" bill. This explanation is not satisfactory to your committee. Its wording, it is not satisfactory to your committee. Its wording, and does not appear to reasonably bear the construction of having reference or discussion relative to appointment of the subcommittee, and does not appear to reasonably bear the construction of having reference for a bearing. That Mr. Gardner did, during his last term as chairman, become indifferent to the fate of "labor measures" which he had formerly champloned and made practically no effort to press them we think can not be questioned in the face of his own statements in the continuous of the conflicting testimony, the interest pominists in the realm of doubt as to the verity of the allegations concerning these subcommittee appointments.

The two Instances above clied are the only cases related in the Mulhall article. However, there are in the correspondence placed in the face of the subcommittee appointments.

It is in evidence that shortly prior to the election of the No. 2. M. M. and the No. 2. D. felt across the subcommittee appointments of the subcommittee appointments of the subcommittee of the Sixty-second Congress (this beling the first Congress after through the office of the committee of the committees of the Democratic cancus the Democratic members of the committee, expressed to him their interest in these two committee

EFFORTS IN ELECTIONS.

By the second paragraph of the resolution the committee was directed to "inquire whether money has been used or improper influence exerted by said National Association of Manufacturers or other person, persons,

association, or organization, or any agent thereof, to accomplish the nomination of election or secure the defeat for nomination of election. It has been heretofore stated that Mr. Mullail, as field agent of the N. A. M., was the chief character in the general conduct of its political and Tribune he related a number of instances in which in the World and Tribune he related a number of instances in which is the world of the control of the consideration of the control of the

"Now, Mr. Chairman, this man is Mr. Clyde Painter.

"Mr. Stafford For a list of delegates or for a list of members?

"Mr. Colle For a list of members in the association in my district.

C. R. Painter, of Bowling Green, was here to get one of his friends appointed as postmaster at Bowling Green and another at North Baltimore. There was a Democrat, Gea. Sherwood, representing his district, and consequently, being a friend of mine, he called on me and lived with me in my rooms at the hotel during that time. He was in my office when Mr. Mulhall came in, and a few days ago he came to me in Findlay and said, 'I remember when Mr. Mulhall came into your office and will make affidavit to it.' If you want him here to testify, I will have him here to-morrow, but this is his affidavit [indicating]. It reads:

"The State of Onio, Hancock County as:

"THE STATE OF OHIO, Hancock County, ss:

"C. R. Painter, being first duly sworn, says near the 1st day of February, 1910, he was in Hon. R. D. Cole's office in Washington, D. C., when Mr. Mulhall entered said office and engaged in conversation with Mr. Cole, representing that he bad a message from Mr. Cannon. Mr. Cole became very angry and ordered Mr. Mulhall from his office. Mr. Mulhall left, and Mr. Cole and this affiant spent the rest of the day together, and this affiant says that Mr. Cole did not on that day go to Mr. Emery's office, nor did he go on that night.

"C. R. Painter.

"Sworn to before me and signed in my presence this 9th day of September, 1913.

"E. T. DUNN, "Notary Public, Hancock County, Ohio.

"Notary Public, Hancock County, Onio."

Mr. Cole states positively that he never at any time received any campaign contribution from the N. A. M. or any of its officials (p. 2659).

In view of all the testimony your committee thinks it fair to state it does not believe that he was an emissary of this association or its agent in any way, or that he ever received any financial reward therefrom. We think Mr. Mulhall is in error as to having conducted Mr. Cole to Emery's office as stated, and that the entire allegation as to this meeting at Emery's office and what occurred there is untrue. Mulhall's own testimony upon it is confusing and contradictory upon its face.

hair's own testimony upon it is contusing and contradictory upon its face.

The most vigorous efforts which have been put forth by the association in any campaign were those exerted in 1906 in behalf of Mr. Charles E. Littlefield, of Maine. Because of the great prominence which Mr. Littlefield had attained in the country, as well as by reason of the conspicuous forces engaged for and against him, that contest excited extraordinary interest and is a well-remembered event of recent political history.

excited extraordinary interest and is a well-remembered event of recent political history.

In his narrative Mr. Mulhall discusses it in much detail, and, being examined concerning it, reiterated under oath substantially what he had said in the article. The repetition of his statement and testimony is deemed unnecessary here.

Mr. Littlefield has testified also before the committee concerning it at great length and with a fullness which leaves little or nothing to be desired.

is deemed unnecessary here.

Mr. Littlefield has testified also before the committee concerning it at great length and with a fullness which leaves little or nothing to be desired.

The dity of your committee under the resolution does not require the other was a substitute of the control of

Workingmen's Protective Association and using this in his campaigns, the expenses being borne by the N. A. M. Mr. Bird and Mr. Kirby have each testified as to this, as has Mr. Emery. Throughout the multitude of expense accounts of Mr. Mulhall placed in evidence there were items reading: "Paid member of the Stone Hoisters' Union" so much: "Paid member of Silk Weavers' Union" so much; "Paid to party workers to do campaign work and gather information in the labor unions" so much, etc. All these items were, according to Mulhall, for political work by the persons described, but not named, employed by him, except that in some instances the employment might have been for the obtaining of information to be used in connection with efforts to break strikes. It was understood by Mr. Bird and others who passed upon Mr. Mulhall's accounts that he was employing these individuals in connection with the organization of these workingmen's protective associations, and he was not required or expected to give the names of the persons so employed.

The committee of the Senate engaged in lobby investigation had, prior to the organization of the House committee, issued subpenas for

with the organization of these workingmen's protective associations, and he was not required or expected to give the names of the persons so employed.

The committee of the Senate engaged in lobby investigation had, prior to the organization of the House committee, issued subpenas for and obtained the books and papers of the N. A. M. and N. C. I. D. It caused an examination of the books to be made by an expert accountant, and his testimony taken by the Senate committee has been adopted by your committee and published as a part of the record, being "Appendix C," page 2909.

This evidence shows the aggregate expenditures, by years, of the N. A. M. from March 31, 1904, to March 31, 1913, March 31 being the end of its fiscal year.

The total as given by Mr. Frawley was \$1,785,398.37. This was expended for the following general purposes in the following amounts: President's office, \$98,381.19; secretary's office, \$15,139.59; general office, \$253,760.30; membership, \$134,259.94; public affairs, \$245,337.39; board of directors, \$13,812.82; committees, \$68,294.19; convention, \$38,979.71; convention reports, \$14,552.01; freight bureau, \$87,438.68; foreign department (general), \$120,679.55; translations, \$108,690.81; credits, \$59,680.47; collections, \$44,005.77; lists, \$12,996.87; special reports, \$2,729.68; bulletin, \$9,946.35; law department (general), \$23,401.57; patents and trade-marks, \$20,840.19; American industries, domestic, \$193,001.97; American industries, export, \$119,435.92; American Trade Index, \$62,361.88; miscellaneous printing, \$2,268.48; fixtures and library, \$17,490.82; miscellaneous printing, \$2,268.48; fixtures and library, \$17,490.82; miscellaneous printing, \$2,268.48; fixtures and library, \$17,490.82; miscellaneous, \$8,401.19; service to Members, \$11.751.41; field men, \$53,035.27.

The public affairs expenditures included "publicity work, amounts paid Mulhall tariff commission convention, and other field men." We understand that the funds expended in political campaigns are included under this head.

It has not been possible for your committee to ascertain the aggregate amount which these organizations have expended in the effort to effect nominations and elections of Members of the House of Representatives, but we find that money has been by them expended for that purpose.

Passing from the simple question of the use of money to that of whether "improper influence was exerted," this being the second part of paragraph 2, your committee has to report that it looks with greatest suspicion upon the act of sending Mulhall abroad in the country furnished with funds to organize temporary and speedily dissolving associations for use in elections, as was done again and again, and the secretiveness practiced induces in the common intelligence of men a surmise that there was not that scrupulousness which is attendant upon cleanly political practice. Mr. Mulhall's political work seems to have been largely to proselyte members of labor unions along political lines, and to do it by the use of money. The officials of the N. A. M., particularly Mr. Bird, knew this fact well, and Mr. Emery, of the N. C. I. D., also understood it, and Mulhall's accounts on their faces were made ambiguous, but were well understood in the office and were passed without question. The extent of the political influence thus exerted your committee can not tell, but the method was improper and dishonest, and to the extent that this method was used it was the exertion of improper influence and was disreputable.

The political activities of the American Federation of Labor seem to have begun in 1996; that is to say, this was the first occasion upon which the organization attempted to influence the election or defeat of persons for Congress. In March of that year there was formally presented to the President of the United States, the President pro tempore of the Senate, and the Speaker of the House by the executive council of the American Federation of Labor was demanding, there are set out the several questions in which it was a that time primarily

the other districts seems to have consisted wholly of a few addresses and the mailing out of literature. The expenditures for that year amounted to a little more than \$8.000 for all political purposes.

An itemized statement of the receipts for political expenditures and the disbursement of same, showing the sources from which derived and the payments out, will be found, for the several campaigns in which the A. F. L. participated, beginning at page 2428 of the hearing.

In 1903 the American Federation of Labor again participated actively in the political campaign, there being expended in that year a little less than \$8,500. The president, Mr. Gompers, made a general tour of the country, going into many congressional districts and speaking in behalf of the Democratic candidate for President of the United States, and in behalf of candidates for Congress in various parts of the country. Other speakers were likewise sent out by the federation, and literature was mailed, the records of various sitting Members of Congress upon legislation in which the A. F. L. was interested being furnished upon request of those seeking it. This record furnished was simply the record as compiled from the Congressional Record and gave the statement as to how the Member voted upon the several questions.

In the year 1910 there was also political activity on the part of the

questions.

In the year 1910 there was also political activity on the part of the A. F. L. similar in all respects to those exercised in the prior years, except that the amount collected and expended in the latter year was only about \$3,600.

In the year 1912 there were no political expenditures and no political efforts put forth by the organization as such.

To the extent above set forth the committee finds that the A. F. L. did in the years named and in the manner described use money for the purpose of effecting the nomination and election of Representatives in Congress.

the purpose of effecting the nomination and election of Representatives in Congress.

Your committee does not find that any improper influence was exerted or was sought to be exerted by it to precure the nomination or election or the defeat for nomination or election of any Member of this or past Congresses. Your committee does not deny the right of an organization or an association to advocate particular matters of legislation and to seek by legitimate means to secure the election of Representatives in accord with the views it entertains.

## PAIDLOYMENT OF REPRESENTATIVES FOR IMPROPER PURPOSES.

EMPLOYMENT OF REPRESENTATIVES FOR IMPROPER PURPOSES.

In the latter clause of paragraph 3 your committee is directed to "inculre whether Members of the House of Representatives have been employed by any of said associations, or have knowingly aided said associations, or any of them, for the accomplishment of any improper purpose whatever."

In the Mulhall article it was asserted that Mr. James E. Watson, while a Member of the House, had been employed by the association to lobby for the creation of the Tariff Commission, being paid therefor a compensation of \$230 per week. In his testimony Mr. Mulhall admitted that he was in error as to this statement, and Mr. Watson has related to your committee under oath the facts of his employment in that connection. He retired from Congress on March 4, 1909, and has not since been a Member. A few days subsequent to this he was employed by the National Tariff Commission Association to work for the securing of a commission in the tariff bill passed at the extraordinary session in 1999, and served in this capacity for a number of months. He received as compensation the sum of \$3.750.

Inquiry was made of all the representatives of the several organizations that have been referred to herein as to the employment of Members of the House of Representatives, and no evidence has been adduced of any such employment by them or by any other person or association.

# EMPLOYMENT OF HOUSE EMPLOYEES.

EMPLOYMENT OF HOUSE EMPLOYEES.

We have also made examination with reference to the employment and use of House employees. The substance of this alleration was that a chief page of the House. I. H. McMichael, was in the employ of the N. A. M., and the intimation was that he had used the pages of the House to sny upon Members, obtain information that might be gotten from overhearing conversations, and for other purposes, inconsistent with their duties as employees of the House; also during the course of the investigation it was charged that Henry Neal, the colored man who has served for many years as Speaker's messenger, and Harry Parker, for a long time messenger or ianitor of the Committee on Ways and Means, were in the employ of the association.

We deem it unnecessary to review in detail the evidence respecting the employees. We find that I. H. McMichael while a chief page of the House was employed by Mulhall, and that the fact was either known to Mr. Emery at the time or when it later came to his knowledge, was ratified by him, and also that his employment was ratified by Mr. Bird when it came to his knowledge, and McMichael was paid by the N. A. M. and the N. C. I. D. The weight of the testimony is that he received a salary of \$50 per month and was in the service from some time in the fall of 1909 until the close of the regular session of the Sixty-first Congress, in August. 1910; and again from the beginning of the session, in December, 1910, until the 1st of January, 1912; that is to say, during the year 1911 he received pay not only while Congress was in session but during the vacation as well.

It should be stated here that at the beginning of the extraordinary

January, 1912; that is to say, during the year 1911 he received pay not only while Congress was in session but during the vacation as well.

It should be stated here that at the beginning of the extraordinary session of the Sixty-second Congress, in April, 1911, McMichael ceased to be a chief page of the House and became for a time an employee located in the press gallery, serving in this capacity for a few months, after which he became an elevator operator, where he was employed until the publication of the charges, when he was discharged.

The services rendered by McMichael to the N. A. M. seem to have consisted principally of the obtaining of such public documents, bills, reports, etc., as were desired by Mr. Emery or Mr. Mulhall. At times he would also ascertain by inquiry of the clerks of the committees the status of bills pending before such committees, when hearings would be had, and like information of a public character. So far as your committee can determine, the work performed by Mr. McMichael was nothing more than that which any person familiar with the document room and having a general idea as to procedure and custom in the House might have performed. He did at one time furnish Mulhall with advance information of an amendment that was to be proposed to an appropriation bill. This has been referred to before and will be again discussed. Your committee does not believe that employees of the House should be permitted to accept outside employment, even of the character given McMichael in this instance. It tends to excite suspicion in the public mind, and may lead to dangerous and improper activities. This action of the N. A. M. officials in employing him and of McMichael in accepting the employment meets the strong disapproval of your committee. It was a violation of all the proprieties, and all persons connected with it deserve the severest censure.

As for the use of the pages in the manner alleged, there is no evidence to substantiate this charge in any respect. McMichael did a few times, perhaps, send one of the small boys with documents to Mr. Emery's office. This was improper in that it took an employee of the House and sent him upon a private mission, thus removing him from his place of duty; but the child, being under control of the chief page, of course, was innocent of any intent of wrongdoing.

We think the weight of the evidence is against the allegation that the colored messengers were regularly in the employ of or maintained any contractual relations with these organizations or their officers. Henry Neal, the Speaker's messenger, having access to the floor under the rule of the House, did at times go in for Members whom Muhall might desire to see, and he probably showed some courtestes to officials of the organizations and their families in placing them in the gallery and admitting them to the Speaker's antercoom. Parker, messenger of the Ways and Means Committee, seems at times to have procured some public documents of that committee for some of the officials interested. For these services liberal gratuities or "tips" were given them from time to time, and these were accepted. Your committee can not conceive that these men in their position and circumstances could have been considered as able to aid or affect in any way the course of legislation, and does not believe that they were employed as agents, but we think the acts of those men who were here as professional lobbyists, in constantly bestowing gratuities upon these employees, was reprehensible in the extreme, and generally we feel that there is impropriety in the tipping of even the menial employees of the House.

# CHARGES AGAINST MEMBERS.

In the tipping of even the menial employees of the House.

CHARGES AGAINST MEMBERS.

By the first paragraph of the resolution, which must be considered in direct connection with the preamble, your committee was directed to inquire and report particularly and especially upon all the matters alleged in the several publications concerning Representatives, and more especially whether the lobbyists of the said National Association of Manufacturers did reach and influence, "whether for business, political, or sympathetic reasons, or otherwise, the said Representatives, or any one of them, or any other Representative or any officer or employee of this or any former House of Representative or any officer or employee of this or any former House of Representatives in or about the discharge of their official duties," etc.

Attention has been directed in the beginning of this report to the fact that the publications consisted of two parts, (1) the personal narrative of Muthall and (2) the summary prepared by Selbold. In pursuance of this part of the resolution, your committee has made a thorough and complete examination as to all Members of the present House of Representatives whose names were mentioned in said articles in such manner as to suggest impugnment of their conduct. There are seven Members of the present House so mentioned in these unblications. Of these seven, two are referred to in both the Mulhall article and the summary, while the other five are mentioned in the summary alone. These five gentlemen were Messrs, Richard Bartholdt, James F. Burke, William M. Calder, Swagar Sherler, and E. Y. Webb. The two gentlemen mentioned in both summary and nersonal narrative are Messrs, George W. Fairchild and James T. McDernott.

In the consideration of the charges against the present Members of the House we shall take up first those mentioned only in the summary of the World and Tribune articles and shall set out fully all the evidence concerning them in detail.

In section 7 of this summary is the following statement:

There Johnson this a fong list of names, including those above recited, and this is the only mention concerning them at any point in the entire article.

Your committee in examining Mr. Seibold had him present his interpretation of the language above quoted. He stated that the expression "reaching and influencing" was not intended in any invidious sense; that by the expression "reaching" was meant simply that a hearing could be gotten and that because of business, political, or sympathetic reasons effective hearings could be had. Defining the sense in which he used the expression "for business, political, or sympathetic reasons," he stated that by the word "business" was meant the business conditions existing in the districts of Representatives; that by the word "political" was meant matters of party policy; and by the word "sympathetic" was meant that there were many thoroughly housest men who are genuinely sympathetic with the undertakings and policies of the National Association of Manufacturers.

Notwithstanding these definitions, your committee feels that it was unfortunate and unjust that these forms of expression were used. Section T was a portion of a sensational article, parts of which made serious charges. By an association of ideas the language "reaching and influencing for business, political, or sympathetic reasons" carried with it a sinister suggestion. Standing alone it might have carried no invidious meaning. Placed in the relation it was it did create suspicion in the public mind toward men upon whom nothing the Mulhall article or in the correspondence turned over by him could justify the casting of the slightest imprenment. We think it extremely unfortunate that public isournals should by the ingenious use of ambienous terms cast discredit upon public men not justly subject to attack. This is true not alone because of the insperiment. We think it extremely unifortunate more because of the importance in a representative government of preventing unjust public suspicion. We think it is quite as i and the corrupt.

## REPRESENTATIVE RICHARD BARTHOLDT.

In the correspondence turned over by Mulhall to the World there are a number of letters about Mr. Bartholdt passing between officials of the N. A. M., but there are nene written to him, excepting a letter of introduction written by Ferdinand Schwedtman introducing Mulhall to Mr. Bartholdt; this letter was written under date of October 29, 1907. Nor are there any letters by Mr. Bartholdt, excepting a formal and wholly noncommitted letter relative to some matter of labor legislation. Your committee examined Mr. Mulhall at considerable length relative to his personal recollection of any incidents or events occurring with Mr. Bartholdt.

Nothing further appears than that Mr. Bartholdt was somewhat troubled because of the conflicting opinions existing among his constituents relative to eight-hour and injunction legislation. He was a member of the Committee on Labor, before which some of these matters were pending, and was being constantly appealed to by both the advocates and the opponents of the measures. The National Association of Manufacturers, upon at least one occasion when a vote was expected in the House, caused a pressure to be brought by many manufacturers in

his district telegraphing him and urging him to vote in a particular manner. Your committee does not find anything which indicates that he was persuaded to vote or act in any manner other than his conscience and honor dictated, or that he was in any way influenced in his vote or actions by the lobbyists of the National Association of Manufacturers.

## REPRESENTATIVE JAMES F. BURKE.

REPRESENTATIVE JAMES F. BURKE.

After an examination of the Mulhall correspondence, it is somewhat difficult for your committee to understand how the name of Mr. BURKE could have been used in any connection. He is mentioned but three times in all the vast volume of correspondence. One mention is in the letter written by Schwedtman to Mulhall, under date of February 13, 1908, in which he purports to quote from a letter he had previously written to some one in Washington, giving a list of some 16 Representatives who had pledged support to some measure, it not appearing from the letter, in any way, what the measure was. Mr. BURKE's name is in this list. The best impression your committee can obtain as to what the bill was, from reading the letter, is that it was either a ship-subsidy or an antipitotage measure. There certainly has been no secret as to the attitude of Mr BURKE upon these questions. The other two references are in letters from Mulhall to Schwedtman, in which he related calling upon Mr. BURKE to try to get him interested in securing for Hon. James E. Watson a place in the Cabinet of President Taft. It seems to have been especially desired that Mr. BURKE should see Mr. Knox, who had been selected for the position of Secretary of State. Mr. BURKE seems to have expressed his personal friendship for Mr. Watson, but to have advised that this was a matter which Mr. Knox would probably not feel disposed to take up with the President, except upon the President's own initiative.

There is nothing in this record to indicate that Mr. BURKE was reached or influenced by any officer or agent of the National Association of Manufacturers for any business, political, sympathetic, or any other reason.

#### REPRESENTATIVE WILLIAM M. CALDER

or Manufacturers for any business, political, sympathetic, or any other reason.

REPRESENTATIVE WILLIAM M. CALDER.

In the case of Mr. CALDER the references are also meager and meaningless. His name is given in the list along with that of Mr. Burke, above referred to, as being piedged to the support of some bill, believed to be the antipliotage bill, but in a subsequent paragraph of the same letter therein quoted it is stated as follows:

"In talking over this matter with one of our and your good friends, whose name I think it best not to mention in this letter, I was assured that among the members of the Committee on Merchant Marine and Fisherles, which you named for me, the following gentlemen can be relied upon for bringing the bill out of committee for a heaving in the House: William W. Wilson, Illinois: Edmund H. Hinshaw, Nebraska, Grant E. Mouser, Ohlo; Geomee W. Fairchild, New York; while some one else states that it is more than likely that Mr. WILLIAM M. CALDER, of New York, and Mr. George E. Sturgess, of West Virginia, could be sufficiently impressed with the importance of this bill to vote for bringing it out of committee."

It will be remembered that this matter so quoted is from a letter written by Mr. Ferdinand Schwedtman from St. Louis, under date of February 13, 1908, to Mr. Mulhall, at Fort Wayne. Ind., this particular part being a quotation from a letter which he had written previous to that date to some one, whose name is not given. The letter is contradictory upon its fact. Mr. CALDER is first put down in the list of those who had pledged their support to the bill and then, in the same letter, the belief is expressed that he may be supported to the bill, but simply to vote to report if out of committee in order that the House might consider it. As a matter of fact, if the bill referred to was the antipliotage bill, as is believed, it is well known that Mr. CALDER was opposed to this bill, and certainly there is no evidence that he was in any way reached or influenced by the N. A. M. or any o

mittee, but stated that if this was done the enert was when, unsuccessful.

Certainly there is nothing in this record that even tends to indicate that Mr. Calder was reached or influenced by the N. A. M. for business, political, or sympathetic reasons, or otherwise.

## REPRESENTATIVE SWAGAR SHERLEY.

It is also difficult to understand how the name of Mr. Swagar Sherley could have been used, even in section 7. His name is three times mentioned in the Mulhall correspondence, each time in letters written by Mulhall himself. Two of these references are wholly incidental. The first is in a letter written by Mulhall to Schwedtman on September 21, 1908, in which the writer was commenting particularly upon Mr. Gill, of Maryland, and apparently seeking to get the N. A. M. to aid in the latter's campaign; in this it is stated that he (Mr. Gill), along with Congressman Sherley, of Kentucky, "had the nerve to fight openly against the injunction bill upon the floor at the last session of Congress when it opened"; the second is in a letter written by Mulhall to Emery under date of September 22, 1908; it also is in reference to the campaign of Mr. Gill, and states: "He had the backbone to back Congressman Sherley against the injunction bill publicly in the last session." The third reference is in a letter written by Mulhall to Schwedtman under date of January 15, 1909. At this time Mr. Mulhall was engaged in making a cenvass of the membership of the House in an effort to ascertain the views of the Members upon the question of a

tariff commission. He was doing this work under the direction of the officials of the National Association of Manufacturers. It does not appear that he was seeking to do anything except to ascertain the sentiments of the membership and extend invitations to attend the meeting which had been called for the discussion of this question at Indianapolis, Ind.. some time in February of that year. In this letter he says:

"I left Mr. Bennet's office and sent my card to Mr. Swagar Sherner, of the fifth Kentucky district. My interview with Mr. Sherner started in a brusque manner, he protesting against our stand on the tariff question; but by using a good deal of diplomacy and telling him how our people admired his straight, manly course in Congress I got him in a better humor, and he wound up by stating to me that he was in favor of a tariff commission bill, but that he would have to see the bill and pass upon it before he cast his vote on it. He stated it was impossible for him to attend the convention at Indianapolis, for his congressional duties were so numerous now that he could not get away."

It would require a greater stretch of the imagination than your committee is able to indulge to find in this anything faintly suggestive of the idea that Mr. Sherler had been, or could be, reached or influenced for any reason whatsoever—business, political, sympathetic, or otherwise—by the N. A. M., through any officer, agent, or member thereof. The testimony of Mulhall himself upon the subject, as well as that of all others, flatly and unequivocally contradicts any such statement or idea.

REPRESENTATIVE EDWIN Y. WEBB.

REPRESENTATIVE EDWIN Y. WEBB.

The allegations as to Mr. EDWIN Y. WEBB have no more basis than the others above recited. His name is mentioned four times in the Mulhall correspondence, three times in letters written by Mulhall himself, and once in a letter written by Schwedtman to Mulhall. These letters passed during the time that Mr. Mulhall was making the canvass of the House to ascertain the sentiment relative to the tariff commission, already referred to. In one of them, under date of January 19, 1909, written to Schwedtman by Mulhall, he states that he called at the office of Mr. Webb; that he found Mr. Webb favorable to a tariff commission idea, and that he would be pleased to receive an invitation to attend the Indianapolis convention. Writing to the same party, under date of January 27, 1909, Mulhall suggests the idea of the payment of Mr. Webb; expenses by the association if he should attend the tariff-commission convention. When examined on the stand concerning this Mr. Mulhall testified that the suggestion came wholly from him and that such a thing was not hinted at by Mr. Webb.

Under date of January 29, 1909, Schwedtman acknowledges the receipt of the last letter above referred to and states, in substance, that the matter of paying the expenses of persons who should attend the convention would be submitted to Mr. Van Cleave, the president of the organization. This is the last, so far as the record discloses, ever heard of this matter.

The fourth reference is in a letter written by Mulhall to Mr. John

convention would be submitted to Mr. Van Clenve, the president of the organization. This is the last, so far as the record discloses, ever heard of this matter.

The fourth reference is in a letter written by Mulhall to Mr. John Kirby, jr., Dayton, Ohio, under date of July 15, 1909, relating a call by him upon Mr. Webb on his tariff commission canvass and reciting that Mr. Webb expressed sentiments favorable to the tariff commission idea. This is all that the record shows relative to Mr. Webb.

The testimony of Mr. Mulhall is clear and unequivocal in regard to it. The only call or calls he ever made upon Mr. Webb in regard to any question—in fact, the only calls he ever made upon him—were at the time he was conducting this general canvass seeking to ascertain the sentiments of all the Members he could interview relative to a tariff commission. As a matter of fact, the record shows that in the House Mr. Webb opposed and voted against the tariff commission proposed in the Sixty-first Congress. There is no evidence of any kind or character indicating that Mr. Webb was reached or influenced by the National Association of Manufacturers in any of his official acts for business, political, or sympathetic reasons or otherwise.

REPRESENTATIVE GEORGE W. FAIRCHILD.

# REPRESENTATIVE GEORGE W. FAIRCHILD.

REPRESENTATIVE GEORGE W. FAIRCHILD.

As has been stated, Representative George W. FAIRCHILD was mentioned in both the summary and the Mulhall personal narrative. The mention of him in the summary is in section 7, he being therein listed as one of the men whom the lobbyists of the association had no difficulty in reaching and influencing for business, political, or sympathetic reasons. In the personal narrative of Mulhall the following is the statement made in regard to him:

"Congressman George W. Fairchild, of New York, an active member of the National Association of Manufacturers, a very large and wealthy manufacturer limself, and one of the most active adherents of the National Association of Manufacturers, frequently told me of those political meetings and dinners held in Emery's home. Mr. Fairchild Stated, at his last interview with me on the subject, late in 1912, that he thought it was an honor to sit down with some of the leading manufacturers of the country at those meals, and to associate with such men as Senator Looge, of Massachusetts; ex-Senator Crane, of Massachusetts; Senator Root, of New York; Senator Townsend, of Massachusetts; Senator Root, of New York; Senator Townsend, of Massachusetts; senator myself, at his special request. In 1906 I was sent by Mr. Cushing, and all my expenses in that campaign were paid by the National Association of Manufacturers, and Mr. Fairchild was sent by Mr. Cushing, and employed a number of workers to carry him through." (See p. 1232.)

The committee has made a full and thorough examination concerning these allegations. Mr. Fairchild himself testified before the committee, being the first witness and appearing voluntarily and requesting to be heard. He stated that—

First, He has never been a member of the National Association of Manufacturers.

heard. He stated that—
First. He has never been a member of the National Association of Manufacturers.
Second. That, never having been a member, the statement that he was "one of the most active adherents of the association" was necessarily inaccurate.
Third. That the statement that he had frequently told Mulhall of these polltical meetings and dinners in Mr. Emery's home was erroneous; that he (Mr. FAIRCHILD) was never in Mr. Emery's home and never had a meeting or conference with Mr. Emery or any of his friends or associates; that he did, a few months ago, attend a small impromptu dinner at the New Williard Hotel, given by Mr. Emery to the district attorney of Los Angeles, and this is the only dinner he ever attended given by Mr. Emery or any other member of the National Association of Manufacturers.
Fourth. As to his statement that Mulhall had been in Mr. FAIRCHILD's district on three different occasions, at his special request, Mr. FAIRCHILD's district on three different occasions, at his special request, Mr. FAIRCHILD states that he was in his district in 1906, spending one day there, and came entirely without request or prearrangement; that he was in error as to having been in the district in 1908; that in 1910, in his preliminary campaign for Congress, which was very spirited, he sent for Mr. Mulhall, and he remained with him only one day, to get

certain information which he (FAIRCHILD) desired to obtain from parties who were endeavoring to defeat him for the nomination to Congress who were endeavoring to defeat him for the nomination to Congress who were endeavoring to defeat him for the nomination to Congress who were endeavoring to defeat him for the nomination to Congress who were to do certain defective work, but after he had been there for a day or two, at the request of the Republicans who suggested his coming, he was asked to return to New Jersey, where he calimed to be working, and "his expenses were paid by the Republicans who asked him to come there."

There were in the Mulhall correspondence a number of letters menulated the congress of the companies of which he was a great to all the letters that were placed in evidence. He testified as to the alleged membership of Mr. FAIRCHILD in the National Association of Manufacturers. The fact in regard to that appears to be this: Mr. FAIRCHILD is himself a manufacturer, engrhe he companies of which he was a member did through him, take membership for a year in the National Association of Manufacturers, paying the membership fee. Mr. FAIRCHILD did not personally become a member, but this company, through him, did. This membership continued to the participation of Mulhall in the campaigns of Mr. FAIRCHILD by Marshall Cushing, at that time secretary of the N. A. M. The purpose of his visit seems to have been to do, -sa Mr. FAIRCHILD shows home he found the latter ill and confined to his room. He says:

"I said I was sent by Mr. Cushing and given a letter to Mr. FAIRCHILD was sick in bed at home. I went to his home and I sent in my card and I went into his room, where he was sitting or lying, and he made a state-mature of the companies of the state of the companies of th

[Mulhall narrative.-New York World, June 29, 1913.]

"LABOR" CONGRESSMAN M'DERMOTT "LOBBYIST AND TOOL OF TRUSTS."

I have been reluctant all through this story to bring into it any of the so-called friends of labor, but there is a gentleman in Congress who boasts of being a great labor unionist. He has a union card in his pocket. He has been elected to Congress four terms by "the labor vote," as he tells it, but there has never been a lobbyist or a tool in Washington who is more subservient to the trusts than Mr. James T. McDermott, Congressman from the fourth Illinois district, the stockyards district of Chicago.

It has generally been the rule of the National Association of Manufacturers to have its lobbylsts interview all newly elected Congressmen to find out how they stood on measures that would interest the organi-

zation.

I first interviewed Mr. McDermott when he came to Washington in 1907. I told him of the organization I was serving in Washington. He used language at this interview which I thought was not possible for a man filling the high position he filled to dream of using to any stranger who called on him. Later on I became acquainted with his confidential secretary, Mr J. H. McMichaels, and told Mr. McMichaels about my first interview with Mr. McDermott.

HE'D WIND M'DERMOTT USEFUL,

McMichaels and myself were extremely friendly from our first meeting, and I made Mr. McMichaels acquainted with the language Mr. McDermott had used when I first called on him. Mr. McMichaels assured me that McDermott did not mean what he was saying. He told me that McDermott was having a very hard fight on big hands for re-

It appears that Mr. Mulhall was in error in his statement that he was in the campaign in Mr. FAIRCHILD'S district in 1908; but in 1910 he did go into the district at Mr. FAIRCHILD'S request, made through the officials of the N. A. M., as appears from the correspondence proven in our record. At page 2079 will be found the following letter:

JUNE 14, 1910.

Mr. James A. Emery, 613 Union Trust Building, Washington, D. C.

MY DEAR MR. EMERY: We are in receipt of the following telegram from Mr. G. W. FAIRCHILD:

"If possible, should like Col. Mulhall to spend a few days in my interest at Cooperstown, N. Y. He understands the situation. Wire answer."

To which we replied as follows:
"Your telegram received. Consult with James A. Emery, Union Trust Building, in reference to disposition of colonel. Without doubt can be a lotter morning brings us a lotter.

arranged."

This morning brings us a letter as copy inclosed, to which I am replying as per copy inclosed.

As suggested to you over the telephone yesterday, if you can spare the colonel for a day or two in Mr. FAIRCHILD's interests, I would suggest that it be done.

Yours, very truly,

On page 2000 the response of Mr. Frank therete reads as follows:

On page 2080 the response of Mr. Emery thereto reads as follows:

NATIONAL COUNCIL FOR INDUSTRIAL DEFENSE, Washington, D. C., June 15, 1910.

Mr. J. P. Bird.

National Association of Manufacturers,
170 Broadway, New York, N. Y.

Dear Mr. Bird: I beg to acknowledge receipt of copies of your communication with Mr. Fairchild. I saw him personally, and the colonel has been in communication with him to-day. I have arranged, very much to Mr. Fairchild's satisfaction, that the colonel can go to this district next Monday and obtain some information of great importance to one of our most distinguished friends at the same time.

Believe me, very truly, yours,

James A. Emery.

And the response of Mr. Bird, general manager, to the above, as follows:

JUNE 16, 1910.

Mr. James A. Emery.
613 Union Trust Building, Washington, D. C.

My Dear Mr. Emery: Your letter of June 15 is duly received, and I am pleased that you have made arrangements with the colonel to serve Mr. Fairchild in any manner within his power.

I had hoped to have had an opportunity of meeting you to-day, but evidently something has delayed you in your return from Hartford. With many regrets, I was unable to be there, and I trust I may be favored with a newspaper report, or, if time permits, a more detailed report from you.

Yours, very truly,

It appears that Mr. Mulhall's expenses were paid by the N. A. M. on this trip. In 1912, Mr. Mulhall also went into the district of Mr. Fairchild and remained for a brief time; this, however, was after he had severed his connection with the N. A. M., and neither this organization nor the N. C. I. D. had anything to do with his visit therein that year, and an investigation of this does not come within the scope of the House resolution.

No evidence has been adduced of any discussion of legislation had with Mr. Fairchild by any representative of the organizations other than such as might be drawn by inference from hazy references in some of the Mulhall letters, and no evidence has been presented that any effort was made to reach and influence—or that he was reached or influence—by business, sympathetic, or political reasons.

REPRESENTATIVE JAMES T. M'DERMOTT.

REPRESENTATIVE JAMES T. M'DERMOTT.

REPRESENTATIVE JAMES T. M'DERMOTT.

Representative JAMES T. MCDERMOTT, of Illinois, is also listed in the summary among those whom the N. A. M. had no difficulty in reaching and influencing for business, political, or sympathetic reasons, and mentioned in the personal narrative of Mulhall.

In view of the fact that that part of the Mulhall narrative appearing in the Chicago Tribune relative to Mr. McDermott is somewhat more elaborate than that which appeared in the New York World, it is deemed advisable to reproduce both, and, for convenience, they are placed in parallel columns:

[Mulhall narrative.-Chicago Tribune, June 29, 1913.]

HOW CONGRESSMAN M'DERMOTT, FRIEND OF THE UNION, WORKED FOR ITS FOES-INTRODUCING PACKER AND BANKER TILDEN, OF LORIMER FAME, WITH AN INTERESTING SIDE LIGHT ON AN EPISODE INVOLVING A CAMPAIGN CHECK.

PAIGN CHECK.

[By Martin M. Mulhall.]

I have been reluctant all through the story of my relations with the National Association of Manufacturers to bring into it any of the so-called friends of labor, but there is a gentleman in Congress who boasts of being a great labor unionist. He has a union card in his pocket. He has been elected to Congress four terms by "the labor vote," as he tells it, but there has never been a lobbyist or a tool in Washington who is more subservient to the trusts than Mr. JAMES T. McDermort, Congressman from the fourth Illinois district, the stockyards district of Chicago.

It has generally been the rule of the National Association of Manufacturers to have its lobbyists interview all newly elected Congressmen to find out how they stood on measures that would interest the organization.

I first interviewed Mr. McDermott when he came to Washington in 1907. I told him of the organization I was serving in Washington. He used language at this interview which I thought was not possible for a man filling fhe high position he filled to dream of using to any stranger who called on him. Later on I became acquainted with his confidential secretary, Mr. J. H. McMichaels, and told Mr. McMichaels about my first interview with Mr. McDermott.

HE DID NOT MEAN WHAT HE SAID.

McMichaels and myself were extremely friendly from our first meeting, and I made Mr. McMichaels acquainted with the language Mr. McDermott had used when I first called on him. Mr. McMichaels assured me that McDermott did not mean what he was saying. He told me that McDermott was having a very hard fight on his hands for re-

Mulhall narrative - New York World-Continued.

Mulhall narrative—New York World—Continued.

nomination and election and wanted me to get into closer touch with him, assuring me that I would find him a very useful friend if we needed his friendship.

Mr. McMichaels also wished me to send out numerous letters to manufacturers in McDermorr's district asking manufacturers to support him for renomination and election in 1908. To please Mr. McMichaels I sent out about 100 letters to different manufacturers in the fourth Illinois district. McMichaels made McDermorr aware of the interest I took in his reclection, and from that time on he became extremely friendly, allowing me et all times to use his congressional frank, his secretary. Mr. McMichaels, not barring it from general use with three exceptions.

CAUTIONED HIM ABOUT FRANK.

CAUTIONED HIM ABOUT FRANK.

Mr. McDermott told me that he thought it was not safe for me to use his frank to frank cut documents to Mr. D. M. Parry, Mr. James W. Yan Cleave, and Mr. John Kirby, jr., for these names were so well known to labor agitators that his frank with Mr. Van Cleave's or Mr. Parry's addresses dopen a document would not look good to any labor leaders that might discover it.

In addition to using his frank he also suggested to me the advisability of having the chief page of the House, Mr. J. H. McMichaels, his confidential secretary, use the seventy-five-odd pages upon the pay roll of the House to pick up any information of value on the floor of the House which would be of any benefit to the interests of the manufacturers. He said that these boys who were pages on the floor of the House would not be suspected if they were seen hanging around where the Congressmen met in private conversation, and that they could make themselves useful in the cloakroon of the House picking up information which would be useful and which could not be got in any other way.

### CHIEF LOEBVIST APPROVES

I informed Mr. Emery, chief lobbyist in Version at that time, of the suggestions made to me by McDermott, and he approved of the scheme at once. He not only instructed me to go ahead with the proposition, but later on he gave orders to me to have McMichaels send the pages of the House with documents and bills that he might call for and act as messengers from the Capitol Building to Emery's office, Nos. 611 and 613 Union Trust Building.

Mr. McMichaels told me on June 25 last that Emery owes him \$16, advanced by Mr. McMichaels as car fare for page boys sent to Emery's office with reports and public documents. The page boys received

About the time that Mr. Emery approved of the suggestion he put on his pay roll Mr. McMichaels at \$50 a month, with instructions that if any piece of information that McMichaels or McDermott might pick up would be useful we would pay extra for it. I want to say here that this service, suggested by Mr. McDermott and carried out under his instructions by McMichaels, was completely successful and effective, we getting information sometimes two weeks ahead regarding bills that had been or would be introduced on the floor.

# GOT ADVANCE NEWS OF BILLS.

In fact, we got information of bills that would be brought up that the Republican Speaker or the Republican whip of the House did not know anything about until the bills would be introduced as riders on measures. On one occasion when I reported to Mr. John Dwight, the whip of the House, a rider that was to be put on the sundry civil bill, Mr. Dwight did not believe me. I told him the rider would be offered two weeks before it was offered, and Dwight kept in Washington as many Members of his side of the House as he possibly could for two weeks before this measure came up.

He frequently asked me when the measure would come up, and he doubted it, for I did not tell him the name of the party giving the information or how it came to me. The rider I am speaking about was a general eight-hour bill which WILLIAM HUGHES, of the sixth New Jersey district, put upon the sundry civil-service bill, and this rider was squarely defeated by a party vote of the House, Republicans voting against it and Democrats for it.

Another suggestion carried out by Mr. McDermorr was that he allow me to use a room in the basement of the Capitol which was assigned to him for bis own use. He gave me the use of this room for the purpose of meeting me there when he had important information, as we could talk it over more privately than we could otherwise, and he also supplied this room so that I could meet Mr. McMichaels on all occasions, as McMichaels was frequently sent there to meet me at the suggestion of McDermorr.

Mulhail narrative.-Chicago Tribune-Continued.

nomination and election, and wanted me to get into closer touch with him, assuring me that I would find him a very useful friend if we

nomination and election, and wanted me to get into closer touch with him, assuring me that I would find him a very useful friend if we needed his friendship.

Mr. McMichaels also wished me to send out numerous letters to manufacturers in McDermott's district asking manufacturers to support him for renomination and election in 1908. To please Mr. McMichaels I sent out about 100 letters to different manufacturers in the fourth Illinois district. McMichaels made McDermott aware of the interest I took in his reelection, and from that time on he became extremely friendly, allowing me at all times to use his congressional frank, his secretary. Mr. McMichaels, not barring it from general use with three exceptions his secretary. A

## NOT SAFE TO USE HIS FRANK.

Mr. McDermott told me that he thought it was not safe for me to use his frank to frank out documents to Mr. D. M. Parry, Mr. James W. Van Cleave, and Mr. John Kirby, Jr., for these names were so well known to labor agitators that his frank with Mr. Van Cleave's or Mr. Parry's address upon a document would not look good to any labor leaders that might discover it.

In addition to using his frank be also suggested to me the advisability of having the chief page of the House, Mr. J. H. McMichaels, his confidential secretary, use the seventy-five-odd pages upon the pay roll of the House to pick up any information of value on the floor of the House which would be of any benefit to the interests of the manufacturers. He said that these bors who were pages on the floor of the House would not be suspected if they were seen handing around where the Congressmen met in private conversation, and that they could make themselves useful in the cloakroom of the House picking un information which would be useful and which could not be got in any other way.

HE WAS AFRAID OF A LEAK.

I was slow to use Mr. McDermott's suggestion, for I was afraid

I was slow to use Mr. McDeamort's suggestion, for I was afraid that there would be a leak in some way among the small boys employed by the House as pages. But McDeamort assured me that the boys could renort all the information they might pick up to McMichaels alone, who was in sole charge of them, and they would never question McMichael's right to so instruct them or to get from them any information along the lines he suggested.

I informed Mr Emery, our chief lobbyist in Washington at that time, of the suggestions made to me by McDermott, and he approved of the scheme at once. He not only instructed me to go ahead with the proposition, but later on he gave orders to me to have McMichaels send the pages of the House with documents and bills that he might call for and act as messengers from the (apitol Building to Emery's office, Nos. 611 and 613 Union Trust Ruiding.

As a general rule the mails were too slow for Mr. Emery. Whenever I found it necessary I riways asked Mr. McMichaels to send a page with any documents that Emery might require the moment they were introduced upon the floor of the House.

## EXTRA PAY FOR INFORMATION.

About the time that Mr. Emery approved of the suggestion be put on his pay roll Mr. McMic'aels at \$50 a month, with instructions that if any piece of information that McMichaels or McDermott might pick up would be useful we would pay extra for it. I want to say here that this service, suggested by Mr. McDermott and carried out under his instructions by McMic'aels, was completely successful and effective we getting information sometimes two weeks ahead regarding bills that had been or would be introduced on the floor.

In fact, we got information of bills that would be brought up that the Republican Speaker or the Republican whip of the House did not know anything about until the hills would be introduced as riders on measures. On one occasion when I reported to Mr. John Ilwight, the whip of the House, a rider that was to be put on the sundry civil bill, Mr. Dwight did not believe me. I told him the rider would be offered two weeks before it was offered, and Dwight kept in Washington as many Members of his side of the House as he possibly could for two weeks before this measure came up.

## EIGHT-HOUR LAW DEFEATED.

He frequently asked me when the measure would come up, and he doubted it, for I did not tell him the name of the party giving the information or how it came to me. The rider I am speaking about was a general eight-hour bill which WILLIAM HUGHES, of the sixth New Jersey district, but upon the sundry civil-service bill, and this rider was squarely defeated by a party vote of the House, Republicans voting against it and Democrats for it.

As I went along with McDermott and his secretary, McDermott became bolder. He frequently met me at the Fritz Reuter Hotel, I'ennsylvania Avenue and Four-and-a-haif Street. I never met McDermott there when he had any information for me that he did not strike me for a loan. He never paid it back. This became so frequent that I got so that I used to shun him, for I had considerable difficulty in meeting his requirements in money matters. There are numbers of letters and notes which I have turned over to the Tribune which establish the dates of these transactions.

HE "GREANED" "DERMOTT GOOD.

During my relations with McDermott, covering a period of four

During my relations with MCDERMOTT GOOD.

During my relations with MCDERMOTT, covering a period of four years, it is my best recollection that I personally gave to him in the aggregate between \$1,500 and \$2,000, always while Congress was in session, and in sums varying from \$10 to \$30. I rarely gave him more than \$20, and never so much as \$50 at one time. Most of my financial transactions with him were held at the Hofel Reuter.

Another suggestion carried out by Mr. McDERMOTT was that he allow me to use a room in the basement of the Capitol which was assigned to him for his own use. He gave me the use of this room for the purpose of meeting me there when he had important information, as we could talk it over more privately than we could otherwise, and he also supplied this room so that I could meet Mr. McMichaels on all occasions, as McMichaels was frequently sent there to meet me at the suggestion of McDermott.

DID BIRD NEED "STEERING"?

# DID BIRD NEED "STEERING "?

I found this room very useful for many purposes, for the National Association of Manufacturers was continually asking, through their secretary, Mr. Boudinot, and their general manager, Mr. J. P. Bird, for

Mulha!! narrative .- New York World -- Continued.

## HELPED M'DERMOTT COLLECT.

McDermott was very much worried about my leaving the national association, and said to me when I told him I was going to resign that the money he got from me on different occasions was very handy to have, as he had been able to reach me at any time he wanted help. After I did leave the organization he prevailed on me to send letters out to his district and had me visit Chicago on the 24th day of March, 1912, and stay there in his district and help him collect money from the manufacturers until the 18th day of April.

At this time he was having a very hard fight for renomination against Alderman McAnerny, of Chicago, who was seeking to be promoted to congressional honors. McAnerny and McDermott had a very stiff fight, and I was in Chicago only a very brief period of time until Mr. McDermott fully confided to me that he had been supplied with funds in the past through the Beef Trust.

In addition to having me solicit funds from the manufacturers he sent me to the Beef Trust, which comprises all the large concerns, such as the Armours and others, in the stockyards in Chicago, along with his political manager in Chicago, Mr. George Fleming, and instructed Mr. Fleming and me to see Mr. Edward Tilden.

## HOLDUP OF MR. TILDEN.

Mr. Tilden is chief political manager for the Beef Trust, and McDer-mort told me plainly, as did his political manager, Mr. Fleming, that Tilden always stood his campaign expenses, not giving him less than \$5,000 at each campaign, and frequently more.

Fleming and I made two or three efforts to see Tilden, but without success. Later on I went with Fleming to see the Sulzberger Bros., an independent packing concern in Chicago, and we saw the general manager of this establishment. When I made known our wants to him he, like the rest, told me he sent all business of this kind to Mr. Tilden, and advised us to see Tilden.

I chased Tilden, along with McDermorr and Fleming, to his uptown and downtown offices for several days, but failed to land him.

# M'CORMICK'S CHECK FOR \$250 AND EVENTS THAT FOLLOWED.

Among the manufacturers we called upon was Mr. Harold F. McCormick, of the Harvester Trust, and son-in-law of John D. Rockefeller, Mr. McCormick told me when I called on him with Mr. McDermott that he was a member of the National Association of Manufacturers, and when I told him of the many good things that McDermott had done for that organization he agreed to give him a check for \$250, and he told McDermott and me that the check would reach me in a few days, as all checks that were given for campaign purposes had to come from the McCormick estates.

# Mulhall narrative.—Chicago Tribune—Continued.

Mulhall narrative.—Chicago Tribune—Continued.

all kinds of documents, instructing me to send out the Congressional Record and the Congressional Directory, the Yearbook published by the Department of Agriculture, and any public document which might be useful to the members of the association. There were hundreds of thousands of these documents sent out. Sometimes Mr. Bird asked for such things as charts of the harbor of New York, all kinds of maps of the United States and its colonies, compasses for the purpose of navigation, along with the charts. On another occasion Mr. Bird went so far as to insist that I should go to the War Department to get a list of bids and specifications issued by the War Department to nshells, projectiles, guas, etc. Most of these things came through McDermott and, as a rule, were franked out by him.

M'DERMOTT WAS A CAUTIOUS MAN

# M'DERMOTT WAS A CAUTIOUS MAN.

MCDERMOTT WAS A CAUTIOUS MAN.

McDermott was always careful to keep away from me when any labor delegation was in Washington, for he did not want the working people or the officers of the American Federation of Labor to see him and me together. He often said that this would hurt his usefulness, as far as we were concerned. He frequently showed me letters that came to him from different labor leaders throughout the country, and at one time instructed his secretary, Mr. McMichaels, in my presence, to allow me to read any confidential matter coming from the labor organizations which would be of benefit to the National Association of Manufacturers.

McDermott was very much worried about my leaving the national association, and said to me when I told him I was going to resign that the money he got from me on different occasions was very handy to have, as he had been able to reach me at any time he wanted help. After I did leave the organization he prevailed on me to send letters out to his district and had me visit Chicago on the 24th day of March, 1912, and stay there in his district and help him collect money from the manufacturers until the 18th day of April.

# M'INERNEY RAN HIM A TIGHT RACE.

M'INERNEY RAN HIM A TIGHT RACE.

At this time he was having a very hard fight for renomination against Alderman McInerney, of Chicago, who was seeking to be promoted to congressional honors. Mr. McInerney and McDermort had a very stiff fight, and I was in Chicago only a very brief period of time until Mr. McDermort fully confided to me that he had been supplied with funds in the past through the Beef Trust.

In addition to having me solicit funds from the manufacturers he sent me to the Beef Trust, which comprises all the large concerns, such as the Armours and others, in the stockyards in Chicago, along with his political manager in Chicago, Mr. George Fleming, and instructed Mr. Fleming and me to see Mr. Edward Tilden.

# TILDEN STOOD HIS EXPENSES.

Mr. Tilden is chief political manager for the Beef Trust, and McDermott told me plainly, as did his political manager, Mr. Fleming, that Tilden always stood his campaign expenses, not giving him less than \$5,000 at each campaign, and frequently more.

But on account of McInerney being also very useful to the Beef Trust, he getting through the city council several measures that were favorable to the trust, Tilden was slow this year about giving up. McDermott said that if Tilden supported him in this fight he. Tilden, would lose the active support of McInerney and aldermen of his stripe, and for that reason he was wanting outsiders to bring influence upon Tilden to have Tilden to do as he had done in the past, and pay his campaign expenses.

Tilden to have Tilden to do as he had done in the past, and pay his campaign expenses.

Fleming and I made two or three efforts to see Tilden, but without success. Later on I went with Fleming to see the Sulzberger Bros., an independent packing concern in Chicago, and we saw the general manager of this establishment. When I made known our wants to him he, like the rest, told me he sent all business of this kind to Mr. Tilden, and advised us to see Tilden (because any subscription he would make and that the Sulzbergers would make for political purposes would have to come from Mr. Tilden).

# CHASED HIM BACK AND FORTH.

I chased Tilden, along with McDermott and Fleming, to his uptown and downtown offices for several days, but failed to land him. In the meantime we had been collecting from a number of concerns around Chicago, but getting only small sums, for the manufacturers of Chicago were pretty well bled about this time in the primary fight that was going on, and they were slow about giving up to McDermott.

Among some of the people that McDermott had me solicit funds from were the liquor interests of Chicago. He told me that the liquor people were under many obligations to him for votes in Congress for all their measures an I for the active support he always gave them in the campaigns in Chicago. Mr. Fleming and I saw the State agent of the liquor dealers in Chicago, but he, like Tilden, of the Beef Trust, was under obligations to McInerney and would not support McDermott in the primaries against McInerney, but would support him if he got the nomination.

# HOW HE COLLECTED FROM M'CORMICK.

Among the manufacturers we called upon was Mr. Harold F. McCormick, of the Harvester Trust, and son-in-law of John D. Rockefeller. Mr. McCormick told me when I called on him with Mr. McDermotthat he was a member of the National Association of Manufacturers. and when I told him of the many good things that McDermotthat done for that organization he agreed to give him a check for \$250, and he told McDermott and me that the check would reach me in a few days, as all checks that were given for campaign purposes had to come from the McCormick estates.

When Mr. McDermott went around with me, just the moment we got outside the door of the institution that would give us a check or cash I would turn the money over to McDermott, as he instructed me to always ask for the money in my name. For the last few days I was collecting for McDermott there his manager, Fleming, went around with me, as McDermott was busy making campaign speeches, and I turned the money over to Fleming in the same way.

USED PERSUASION TO MAKE HIM STAX.

# USED PERSUASION TO MAKE HIM STAY.

About this time I had been in Chicago two weeks, and I became convinced that it would be a useless expense for me to stay there any longer. So I notified Mr. McDermott that I would leave about the 5th of April for Baltimore. McDermott used some persuasion for me to stay until after the date of the primaries, the 15th instant, but I felt sore the way I was treated, for McDermott did not give me a dollar from the time I reached Chicago up to the 5th of April, and my expenses at the Hotel Sherman for room and board amounted to about \$8 per day.

Mulhail narrative .- New York World-Continued.

I made frequent inquiries of McDmanorr and his manager to know if the McCormick check had come. I wanted it to meet my expenses. That was the only compensation I asked from McDemiorr while I was helping him in Chicago. McDemiorr instructed me that when the Mc-Cormick check came in to use it to pay my expenses.

M'CORMICK CHECK DOESN'T COME.

I remained in Chicazo until April 18, and the McCormick check did not show up. McDermort and Fleming told me that they had phoned over to McCormick's office and were told he was cut of the city and that they could not get a satisfactory statement out of Mr. McCormick's private secretary.

I left for Baltimore on April 18, reaching my home in Baltimore on the 19th, When I got there I found the McCormick check, which had been forwarded by the hotel people on the morning that I gave up my room on April 5 with some other mail, to my home in Baltimore. I notified McDermort of this fact, and on June 1 I received notice from a bank in Baltimore that McDermort had asked for a duplicate check, telling McCormick that the original check sent to me was lost. He got a duplicate check from the McCormick people, which read as follows:

"Pay to the order of Col. M. M. Mulhall \$250. Harold F. McCormick,"

When I received this notice from the bank in Baltimore I was convinced that McDermott had committed a forgery, for the bank in Baltimore showed me by some letters from the Merchants' Loan & Trust Co., of Chicago, that there were two checks paid of \$250 each, one on the 20th of April, which was the original check sent to me, and one later on, which was the duplicate, McDermott using this check and lying to McCormick and forging my name on the back of it.

I had considerable correspondence with Mr. McDermott's secretary, Mr. McMichaels, concerning this check. I tried to talk on several occasions when I came to Washington with Mr. McDermott about the check matter, but he always seemed to avoid this subject when I broached it. I felt angry at McDermott on account of his actions in this check matter, for I knew that he gave a wrong impression to his secretary, Mr. McMichaels, and to other friends in Washington concerning it. At an interview I had with Mr. McMichaels on the 10th of June, 1913, I first got a clear conception of McDermott's dirty work in the matter.

It is true that from the time of Mr. McDermott's entrance into Congress up to a few weeks before the publication of the articles in question, the relations between him and I. H. McMichael were of an exceedingly intimate and friendly character; and they were much together. McMichael did undoubtedly aid him to a very considerable extent at times with his correspondence and clerical work, both while a chief page of the Heuse and during the time subsequent. We think the fair conclusion from all the testimony and circumstances developed is that Mr. McDermott knew of the employment of McMichael by Mulhall, and that he understood what Mulhall was engaged in—that is, that he was a lobbyist for the N. A. M.

Mr. McDermott has denied in his testimony very vigorously that the relations between Mulhall and himself ever became close and of an especially friendly character. We think, however, that they did. While we are of opinion that Mulhall has exagerated largely the intimacy existing between them, we are, at the same time, of opinion that Mr. McDermott has unduly minimized it. Your committee has no doubt that these three men were much in each other's society, that they frequently consorted socially together in this city and were upon terms of perfect understanding and friendliness. The evidence in the record as to this is too voluminous and convincing to admit of any other conclusion. We think too, that the weight of the testimony is that Mr. McDermott did obtain occasional sums of money from Mulhall, in the way of small loans, when they were together, but the testimony is that fire the standard of the settimony is that Mr. McDermott did obtain occasional acts of Mulhall, and we do not believe that he let McDermott have this money with a view of corrupting him.

Neither does your committee believe that McDermott received from \$1,500 to \$2,000, as alleged in the newspaper article. When examined

Mulhall narrative.-Chicago Tribune-Continued.

So on the morning of the 5th I paid my bill at the hotel and told the clerk at the Sherman House that if any mail came for me to forward it to my home address in Baltimore. My intentions were to take the train at 4 o'clock that afternoon, but about 2 p. m. on the 5th of April, 1912, Fleming called on me at the hotel and insisted on my remaining, telling me that he had a new list of manufacturers he would like to have me go around with him and see for the next few days.

HE CONSENTED TO REMAIN.

After a good deal of persuasion from Fleming and others I consented to remain over in Chicago until the primaries were over, so I registered again at the hotel and was assigned to another room, as I had given up my room and my baggage and everything was packed ready for de-

up my room and my baggage and parture.

I made frequent inquiries of McDermort and his manager to know if the McCormick check had come. I wanted it to meet my expenses. That was the only compensation I asked from McDermort while I was helping him in Chicago. McDermort instructed me that when the McCormick check came in to use it to pay my expenses.

I remained in Chicago until April 18, and the McCormick check did not show up. McDemmorr and Fleming told me that they had phoned over to McCormick's office and were told he was out of the city and that they could not get a satisfactory statement out of Mr. McCormick's private secretary.

HE FOUND THE M'CORMICK CHECK.

HE FOUND THE M'CORMICE CHECK.

I left for Baltimore on April 18, reaching my home in Baltimore on the 19th, When I got there I found the McCormick check, which had been forwarded by the hotel people on the morning that I gave up my room on April 5 with some other mail, to my home in Baltimore. I notified McDramorr of this fact, and on June 1 I received notice from a bank in Baltimore that McDramorr had asked for a duplicate check, telling McCormick that the original check sent to me was lost. He got a duplicate check from the McCormick people, which read as follows:

"Pay to the order of Col. M. M. Mulhall \$250.

"HAROLD F. MCCORMICK."

When I received this notice from the bank in Baltimore I was convinced that McDrrmott had committed a forgery, for the bank in Baltimore showed me by some letters from the Mcrchants' Loan & Trust Co., of Chicago, that there were two checks paid of \$250 each, one on the 20th of April, which was the original check sent to me, and one later on, which was the daplicate, McDermott using this check and lying to McCormick and forging my name on the back of it. The following letter I quote in full is a copy of a letter sent to the Mcrchants' National Bank in Baltimore, June 1, 1912, by the Mcrchapts' Loan & Trust Co., of Chicago:

ONE INDORSEMENT WAS A FORGERY.

DEAR SIE: We are inclosing original and duplicate checks issued by Harold F. McCormick, No. 19991, dated April 1, 1912, in favor of Col. M. M. Mulhall, No. 3933 Old York Road, your city, for \$250. Both checks have been paid by us, the original on April 20, subsequent to the payment of the duplicate. The indorsement of Col. Mulhall on one of these checks, presumably the duplicate, is a forgery, and we shall thank you to communicate with him and procure from him an affidavit setting forth the fact that the indorsement appearing on said check is a forgery. We shall greatly appreciate any assistance that you may render us in the matter and shall be glad to reimburse you for any expense incurred.

Very truly,

Merchants' Loan & Trust Co.

MERCHANTS' LOAN & TRUST Co., Chicago, III.

After receiving the letter from the Merchants National Bank of Baitt-more I called on their cashler and made an affidavit that I did not sign two checks from Harold F. McCormick and that anybody who had signed my name to the duplicate check drawn in favor of my name had committed a forgery. That affidavit the Merchants National Bank still holds.

CORRESPONDED CONCERNING THE CHECK

CORRESPONDED CONCERNING THE CHECK.

I had considerable correspondence with Mr. McDermott's secretary, Mr. McMichaels, concerning this check. I tried to talk on several occasions when I came to Washington with Mr. McDermott about the check matter, but he always seemed to avoid this subject when I broached it. I felt angry at McDermott on account of his actions in this check matter, for I knew that he gave a wrong impression to his secretary, Mr. McMichaels, and to other friends in Washington concerning it. At an interview I had with Mr. McMichaels on the 10th of June, 1913, I first got a clear conception of McDermott's dirty work in the matter.

upon this matter Mulhall was unable to give amounts or dates even approximately. We feel assured that this has been exaggerated. We think the most reasonable theory is that when they would be together in a social way in cafés and other places and McDermott would be in need of money he would borrow smail amounts from Mulhall. Mr. Mulhall admits in his testimony that such transactions were purely personal, that he never reported them to his organization, and that they were not charged to it but treated as purely personal matters.

That Mr. McDermott may have borrowed some moneys from McMichael at times which the latter received from the N. A. M. we think not improbable, but we do not believe there was any understanding that he was to regularly receive a portion or that there was any corrupt motive in the act. Probably it was an act of impropriety for Mr. McDermott to solicit and accept loans from McMichael from this salary, knowing its source.

The fact of the use of a room in the Capitol by Mr. Mulhall has been referred to heretofore. In the article he claims that this was procured for him by Mr. McDermott. We think this is true, or, at least, if he did not procure it for him, he did, having control over it, knowingly permit him to use it. The facts relative to this room, concerning which so much has been said, are that during the Sixty-second Congress two small adjoining rooms in the basement of the Capitol, Nos. 27 and 29, respectively, were allotted to the Committee on Expenditures in the Department of Commerce and Labor, of which Mr. ROTHERMEL, of Pennsylvania, was chairman and Mr. McDermott was ranking member. They were not used for committee on purposes, however, but were turned into storage rooms by the chairman, who seldom visited them and who gave Mr. McDermott the right to use them also, and Mr. McDermott in turn gave to McMichael a key or, with his knowledge and consent, McMichael had a key made and used

the room freely; and eventually, at the suggestion of either Mr. McDERMOTT or Mr. McMichael (and we do not deem it material which, for we do not doubt the former had knowledge of the fact and acquiesced willingly), Mulhall was furnished a key and given the use of the room and did use it for a few hours each day, having a stenographer come there and take the dictation of his correspondence relative to his association work. His use of the room was limited to a few weeks during the summer.

In testifying, Mr. Mulhall alleged that the information received by him on June 3, 1910, from McMichael, as to the proposed offering of an eight-hour amendment to the sundry civil bill, was furnished by McDERMOTT to McMichael, and the intimation is that it was so given in order that he (Mulhall) might have opportunity to become active against it. McMichael verifies the statement that Mr. McDERMOTT gave him the information, but (aithough he expresses his opinion) he is cognizant of no fact that would legitimately lead to the conclusion that it was done for the purpose intimated by Mulhall, nor do we believe it was.

MCDEMOTT to McMichael, and the intimation is that it was so given a order than he (Minial) might have opportunity to become active more of the proposed in the property of the proposed in the

records of forwarding addresses made by the hotel at that time have been destroyed, but from the testimony of the auditor, Mr. Schopen, before your committee (p. 1654) it is perfectly clear that at no time before April 8 did Mr. Mulhall surrender his room and reregister. He occupied the same room, No. 622, from March 28 to April 8, and no other room after that date. He does nat claim to have changed hotels, but states that he was at the Sherman during his entire stay.

In the meantime, on April 8, Mr. McDermott, having heard nothing of the check, called personally upon McCormick and there was issued a duplicate which was delivered to him, indorsed by him, and used to pay his campaign expenses, same being reported in his official statement. At the time of issuing the duplicate the bank was notified not to pay the original, but by oversight it did pay it. Subsequently, when the fact of the issuance of the two checks and their payment by the bank was called to his attention, he arranged with the cashier, Mr. Estes, and repaid to him the \$250, making the last payment about the last of June, 1913.

In view of all the facts and circumstances your committee does not feel that the course of Mr. McDermott's use and benefit that it was issued. We think he had the moral right to indorse the name of Mulhall to it.

It should be stated, in passing, that the primary election in which Mr. McDermott's was nominated was held on the 9th of April, a circumstance which strengthens the conclusion that Mulhall left on the 8th. He would have had no occasion to remain until the 18th.

Your committee is of opinion that the most serious question of propriety affecting Mr. McDermott's not in connection with the N. A. M. or the other matters above related, but grows out of his acts and dealings with the Liquor Dealers' Association of the District of Columbia and with George Horning, one of the pawnbrokers, to which allusion has been made.

Your committee is of opinion that the manuscript of the N. A. M. or the other matters above related, but grows out of his acts and dealings with the Liquor Dealers' Association of the District of Columbia and with George Horning, one of the pawnbrokers, to which allusion has all the pawnbrokers and in the course of this states fault statifies at length and with great detail relative to Mr. McDemborr's relations with the pawnbrokers and in the course of this states faulty and unequivocally that McDemborr's (see p. 494) told him that the pawnbrokers and in the course of this states faulty and unequivocally that McDemborr, see p. 494) told him that the pawnbrokers arised about \$10,000 to be used in the effort to defeat this He states that that he has been considered to the course of the cours

18 months; and that he has no note or other evidence of the indebtedness. He deniss that any part of this came out of the funds raised by him to be used in connection with the loan-shark and pawnbrokers; legislation, and states that it was a purely personal loan made to him because of personal friendship, and that after the total amounted to about \$1,000 he declined to lend him any more.

Mr. McDermorr agrees with this statement of Horning practically

inin to be used in connection with the loan-shark and pawnbrokers legislation, and states that it was a purely personal form made to him because of personal friendship, and that after the total amounted to about \$1,000 he decilined to lend him any more.

Mr. McDramorr agrees with this statement of Horning practically in toto.

McMichael was vigorously cross-examined by counsel for McDramorr and the relative to some phases of the investigation and was sought to be impeached as to others, but he adhered rigidly to his assertion relative to the pawnbroker matter.

Such is the substance of the testimony bearing upon this phase. In a previous part of this report we have set out the factuality to the several organizations engaged in the District of Columbia, and have given the story of their activity relative to the so-called Jones-Works excise bill. It will be remembered that all these organizations are federated into a central body, which is supported by dues paid by its constituent associations, and that during the pendency of the Jones-Works excise bill. It will be remembered that all these organizations are federated into a central body, which is supported by dues paid by its constituent associations, and that during the pendency of the Jones-Works will a special assessment was levied to procure additional funds to be used in fighting this legislation.

Harvey, secretary of this central body, there was loaned to Representative McDramorr out of fits freasury the sum of \$500. It does not clearly appear whether this \$500 was out of funds raised by the regular payment of dues to the central organization or out of that raised by the special assessment referred to and paid into the central body treasury. His note due at 90 days and beauty, the special assessment referred to and paid into the central body treasury. His note due at 90 days and beauty for the series of the series of

he was friendly to the legislation that you people favored?

"Mr. Harvey. Well, I had never had reason to think he was unfriendly.

"Mr. Russell. Did you know, when the legislation was presented to the House, what his attitude was on it?

"Mr. Harvey. I do not recall.

"Mr. Russell. Well, would the fact that he was supposed to be friendly to the legislation have something to do with making this loan?

"Mr. Harvey. I do not know. I suppose that he would consider it in that friendly spirit that a great many others would be; but as for his doing anything—if he has ever done anything to help us in any way—I do not know it and have never discovered. I do not know whether he could or not.

"Mr. Russell. You would not have loaned \$500 to him if you had understood he was unfriendly to you, would you?

"Mr. Harvey. That would not be a natural transaction; but I do not know what would have been done under the circumstances with a man as distressed as he appeared to be."

Your committee can go no further than ascertain and report to the House the facts as it finds them. The Members of the House know Mr. McDermott, know his ideals and his characteristics as the public generally does not and in the nature of things can not know them. His training and associations have not given him the ethical perceptions and standards relative to public office that usually characterize public men. We can not say that he has been corrupted in his votes, but some things which a private citizen may do with impunity must be avoided by one in official station, and we should feel that we had shirked a duty which we owe to the House and the country did we not say that we are driven, much to our regret, to the conclusion that he has been guilty of acts of grave impropriety, unbecoming the dignity of the distinguished position he occupies.

Finis J. Garrett, Chairman.

FINIS J. GARRETT, Chairman. CYRUS CLINE. JOE J. RUSSELL. SCOTT FERRIS. WILLIAM H. STAFFORD, FRANK B. WILLIS.

Laboring as I do under the disadvantage of lack of that experience along legislative lines so abundantly possessed by all of my colleagues upon the committee and, in addition, hampered by having been placed upon the committee at a late period to fill a regrettable vacancy occasioned by the protracted illness of my colleague, Mr. Nolan, of California, through which the committee lost a valuable member who had keenly followed the course of the labors of the committee from their meeption and who was so well qualified by nature and training to have to differ with the undings of my colleagues. Not that I disagree as to differ with the undings of my colleagues. Not that I disagree as to the facts so far as stated therein which they have so concisely and ably presented in their report, but only in my conclusions given herein and in the angle from which I view these facts and which impels me to set forth what I believe to be the striking fundamental propositions develored the striking fundamental propositions develored to the striking fundamental proposition of the striking fundamental proposition of the legislative body, I think that I should have remained silent and content with the report of my colleagues. But in my opinion this inquiry has developed a situation of a graver character, so far-reaching in its possible consecutive of my colleagues. But the striking fundamental proposition of the fundamental proposition

indictment. If anyone has any doubt as to the correctness of my position in the matter, he has only to read the undisputed portions of the letters and papers, the publication of which brought about this inquiry.

The belief has been common among the people that the large special interests of the country were so firmly entrenched in and surrounding the legislative branch that, by reason of the system built up under their influence, the enactment of remedial laws, popularly demanded, has been either denied or only partially accorded, and then reluctantly. During the present Congress the President publicly charged that legislation was being interfered with by an insidious lobby; and these charges were met in Congress with incredulity, and even attempted ridicule. Yet only a few days passed before the disclosures with which we are here confronted brought overwhelming confirmation of these charges.

While I do not mean to convey that there has been any wholesale individual corruption, or even many specific cases that can be denominated as cases of personal venality, yet the record of this inquiry shows that a system, none the less effectual, was built up and means offered thereby, and used, for the purpose of defeating and preventing remedial legislation.

There is only one portion of this record that startled the Nation and which presents any new features in our legislative history; that is, the various activities, political and otherwise, of the National Association of Manufacturers. It is the conditions surrounding these activities that, in my opinion, constitute the vital matter of the inquiry. The evidence convinces me that Mulhall, Emery and his associates, with the enthusiastic approval of the responsible officers of the National Association of Manufacturers, did influence legislation; did prevent the enactment of laws; did force the appointment upon committees or subcommittees of certain men believed to be necessary for the carrying out of their schemes, and prevented other men whom they believed to be influ

of organization labor men to betray their fellows in election campaigns and strike-breaking activities, they instituted a new and complete system of co nmercialized treachery.

One other thing must be borne in mind—that is, that during much of the period covered by the inquiry some officers of the House were in close sympathy and working with Mulhall and Emery, who, indeed in many instances were not only in close conference with these officers in carrying out their plans, but reported to these officers confidentially and received reports from them, as they might make reports in carrying out their plans, but reported to these officers in their organization.

Let it be noted that all this was done with a sinister secrecy. Much, of course, was done that is not disclosed, but that can be easily supplied from the evidence of what was done. And when we consider the influence exerted by these public officials upon their associates it is indeed a startling picture.

The facilities offered by legislative methods during the period covered by these transactions for insidious, secret, and sinister influence and operation are plain. The secrecy of committee hearings and sessions; the lack of well-defined and orderly conducting and docketing of the committees' business, or the proper keeping of the minutes of committee proceedings; the 'interminable tangle of technical proceedure, resulting from the slavish following of precedent, frequently wrongly established: the custom of suffering conference committees to absolutely frustrate the plainly expressed and recorded will of the Horse or Senate, and the arbitrary use of this power; the binding and gazging of the major portion of the Members of the body by the system of partisan leadership, rendering them absolutely helpless at the will of the few who really transacted the business or refused to transact it—these may be mentioned as the most striking conditions of this kind.

I can not let this phase of the situation pass without referring to the cyalical contempt in which Cong

he says:

"Some fears are also expressed that the President may be inclined to revive his injunction program if Congress is further delayed in adjournment, as he occupies a peculiarly powerful strategic position, the so-called 'pork' bills being in his hands for signature, and, of course, no other subject is so dear to the Congressman as public buildings in his district, and he will do anything to get them."

And again in an extract of a letter (p. 2390) of Mr. Emery, in which he says:

"Let him also say that I took this matter up personally with the Speaker at his house yesterday morning, and he turned loose upon the conservatism of the Senate, after my explanation to him, a streak of original and awe inspiring profanity that made the alleged utterances of a Missouri mule driver sound in comparison like the prattling innocence of a lisping babe."

Again in letter (p. 2394) it is stated:

of a lisping babe."

Again in letter (p. 2394) it is stated:

"\* \* the most important work he can do here between now and the end of this session is to strengthen the House Judiciary Committee as much as possible, and that a direct promise, if it can be had, be gotten that Malby and Denby can be placed on a special subcommittee for all labor bills. The Speaker has intimated as much, but if the colonel will act sharply on this matter with Watson, securing his support, definite action may be obtained. I emphasize this because I believe it will be the keynote of the entire position next winter."

And again in the extract of a letter (p. 2389) of Mr. Emery to Mr. John Kirby, jr., in which it is stated:

"And we had four votes to spare which were not used—the Speaker's vote and three Members who would have changed from 'not present' to 'aye' if necessary."

And in telegram (confidential print No. 2959) from Col. Mulhall to Hon. James E, Watson:

Washington, D. C., August 2, 1909.

WASHINGTON, D. C., August 2, 1909.

M. M. MULHALL

(Charge J. A. Emery.)

And in the reply (confidential print No. 2973) of Watson to the foregoing:

AUGUST 3, 1909.

Col. M. M. MULHALL, Baltimore, Md.

My Dear Colonel: Your message was sent to Anderson, as was the one sent the other day, and communicated to me over the phone. There is no Postal Telegraph in my town, and the only way you can reach me direct is by the Western Union.

Before I left Washington I did what I could with Uncle Joe to get him to name Dave Coudrey on the Committee on Rivers and Harbors. I do not think he will do it; if he does not it will not be any fault of mine, as I most earnestly recommended him. I did this on your account, because you wanted it done, and I told the Speaker you were interested in Coudrey. I therefore tried to impress on him that Coudrey should succeed Ellis on that committee.

I suggest that you get Coudrey to get Bartholdt to go with him personally to the Speaker and ask for this appointment. That will help.

I will write to the Speaker at once, though I do not think I could give any additional weight to the words I have already uttered on this question.

Let me know the result of the conference you fellows had with Miles. Very sincerely,

Let me know the result of the conference you fellows had with Miles.

Very sincerely.

James E. Watson.

The naïve effrontery shown upon the witness stand by the officers of the National Association of Manufacturers in assuming that the committee would accept at face varue the bald denials and ridiculous evasion and perversion of the meaning of actions all too pilainly corrupt and sinister, and would simply and guilelessly make these explanations their own and attempt to hand the deception on to their colleagues and the public, can not be permitted to pass without mention. Their plainly shown attitude was that the American Congress was considered by them as their legislative department and viewed with the same arrogant manner in which they viewed their other employees, and that the American Jongses was considered by them as their legislative department and viewed with the same arrogant manner in which they were accustomed to disciplined in the same manner in which they were accustomed to disciplined in the same manner in which they were accustomed to disciplined in the same manner in which they were accustomed to disciplined in the same manner in which they were accustomed to disciplined in the same manner in which they were accustomed to disciplined in the same manner in which they were the Conneil for Industrial Defense were, in any sense, anything exceet instruments of the varying activities of the same men; or to ask anyone to believe that the so-called Workmen's Protective Association was anything but the filmslest cover for Mulhail's operations in corrupting, by the use of money, union labor men of some influence with their fellows to wantouty be tray these fellow workmen.

Here stands out unmistakably a fact, of which Congress and your committee is apparently expected to remain in complete ignorance, but which to the most casual reader of the record must be plainly apparent. That is that this is only another plase of the department of the protect of the country and organized labor. Indeed, the two countr

"Mr. Bird. I do not say that. I say that they were necessary. I do not say whether they justified the means.

"Mr. MacDonald. Is it your intention to continue with work of this kind?

"Mr. Bird. We have not done it.

"Mr. Bird. We have not done it.

"Mr. Bird. I do not think so

"Mr. Bird. It can be handled in a different way.

"Mr. Bird. It can be handled in a different way.

"Mr. Bird. It can be handled in a different way now?

"Mr. Bird. It can be handled in a different way now?

"Mr. Bird. It can be handled in a different way.

"Mr. Bird. Yes, sir.

"Mr. MacDonald. In an entirely different way now?

"Mr. Bird. Yes, sir.

"Mr. MacDonald. You do not think it will be necessary to use the means you have used?

"Mr. Bird. I think, sir, that these investigations that have been conducted here will be a great enlightening incident to manufacturers of this country. I believe that it will impress upon them, more than anything that has been done, the necessity of manufacturers standing together to preserve the rights that they hope to enjoy in this country of ours, and therefore I say that these investigations must eventually—not immediately, but eventually—be of a great deal of good to us, because it will convince manufacturers of conditions of which we have been unable to convince them single handed. We have never had the opportunity of presenting to the American manufacturer and business man the operations of organized labor as these investigations and publications have brought them out. I consider this expose—if it is called an expose—a sunlight ray from heaven."

"Mr. Gompers, president of the American Federation of Labor, intimates his view in his testimony (p. 2462) when he says:

"Mr. Gompers, president of the American Federation of business man could cialm was due to the normal activities of the workers; the injunction proceedings brought by the Buck Stove & Range Co.; the proceedings in contempt against Mr. John Mitchell, Mr. Frank Morrison, and myself—all these aroused an interest and an activity among the

tions of life. Altogether they compose that great interest known as "the public," whom Congress must serve. And remedial legislation must be found, and that speedily, to put an end to this merciless warfare being waged between organized capital and organized labor.

While many abuses in the legislative methods of the House have been corrected, it is all important, before our really great problems can be successfully met, that reform in the legislative methods of the House must be further continued and made drastic and complete. To obtain social justice we must see that there is no opportunity for perversion of the legislative machinery. We will not obtain this under a legislative system in which remains so many opportunities for powerful influences to secretly hinder and delay the operation of the lawmaking body.

RECOMMENDATIONS.

First. In my opinion, therefore, if we are to profit by the lessons of this inquiry, the cumbersome operations of the House itself must be simplified.

If necessary to enable public business to be transacted with expedition and individual Members to actually and freely legislate for their constituents and the Nation, reduce the membership of the House. Simplify the rules so that the object of getting things accomplished may not be lost sight of in a highly technical system calculated to offer the amplest encouragement to filibustering and delay.

The following should be obtained:
Publicity for all committee hearings and committee sessions.
A well-ordered system of docketing and conducting the business of committees.

A thorough and complete system of minutes of committee proceedings, open to the public.

A thorough and complete system of minutes of committee proceedings, open to the public.

A change in the present custom-made practice of legislation by conference committees.

Abolishing of partisan caucuses and the elimination of the system of party leadership in so far as it hampers the free and independent exercise of the prerogative of the individual Member.

Second. A system of registration of lobbyists and legislative agents, so that no person may engage, as a business, in such work here without there being a public record of his connection and the source of his employment.

Adequate penalties for the punishment of those who engage or conspire to improperly influence Members of Congress.

Third, While I regard the case of Representative McDeamott as not the most vital thing developed by this inquiry—being only a case of individual venality resulting from the vicious and corrupting influences which are shown to have been in operation around the House—yet, any refusal to recognize the enormity of such shocking disregard by a Member of his solemn duty and trust can not but tend to weaken the standing of the House. The disciplinary powers of the House must be rigorously and unsparingly applied, unless it is intended to minimize the offense.

If within the power of Congress, proceedings should be taken to cite the responsible officials and agents of the National Association of Manufacturers shown to have been engaged in improper lobbying activities and punish them for contempt.

Respectfully submitted.

WILLIAM J. MacDonald,

WILLIAM J. MACDONALD.

During the reading of the report the following occurred:

Mr. HULINGS. Mr. Speaker, a parliamentary inquiry.
The SPEAKER pro tempore (Mr. Ferris). The gentleman will state it.

Mr. HULINGS. Is it necessary to go on with this farce indefinitely in reading this report; would it not be better to distribute the printed reports among the Members?

The SPEAKER pro tempore. That is not a parliamentary

inquiry, and this reading of the report is under a special order.

Mr. HULINGS. By law or special order?

The SPEAKER pro tempore. By a special order of the House. If the gentleman from Pennsylvania desires to ask unanimous consent to omit the further reading, he can do so.

Mr. HULINGS. If it is in order, Mr. Speaker, I move that the further reading of the report be dispensed with and the report be distributed to the Members instead.

The SPEAKER pro tempore. That motion is not in order. If the gentleman desires to ask unanimous consent, I will put the request.

Mr. HULINGS. Then I ask unanimous consent to dispense with the further reading of the report,
Mr. MURDOCK and Mr. RUSSELL objected.

The Clerk proceeded with the reading of the report.

Mr. GARRETT of Tennessee. Mr. Speaker, I ask unanimous consent that the reading of the articles from the New York World and the New York Tribune, quoted in the report, may be

dispensed with.

Mr. MANN. Reserving the right to object, I would like to ask the gentleman if these articles in parallel columns are comparative statements; and if so, whether it would be practicable to have one reading clerk read one column while the other clerk is reading the other at the same time? [Laughter.]

Mr. GARRETT of Tennessee. That might be practicable, but

it would not be pleasant.

Mr. MANN. Oh, it is very pleasant to hear either or both of

them read. However, I will not object. The SPEAKER pro tempore (Mr. RAINEY). Is there objection to the request of the gentleman from Tennessee? [After a pause.] The Chair hears none, and the Clerk will omit the articles.

Mr. GARRETT of Tennessee. Mr. Speaker, there is a typographical error, which is obvious, and yet it seems important to call attention to it. In the ninth line, on page 67, in a quo-tation of Mr. Hardy's examination, the word "now" should

be "not." Of course, I can not offer any amendment now, as it is entirely too late, but it is proper to call attention to it.

The reading of the report was concluded.

Mr. MacDONALD. Mr. Speaker, in connection with this report I present for adoption two privileged resolutions, which I ask unanimous consent to have considered together.

The SPEAKER. The gentleman from Michigan presents two resolutions, which he asks unanimous consent to have considered together.

Mr. GARRETT of Tennessee. Let them be reported.

The Clerk read as follows:

House resolution 341.

Resolved. That the House proceed forthwith to determine whether under the report of your select committee on lobby investigations it has not been shown that J. Philip Bird, John Kirby, jr., James A. Emery, Martin M. Mulhall, and other officers and agents of the National Association of Manufacturers have been engaged in systematic, continuous practices against the order and dignity of the House and in improper and vicious lobbying activities rendering them liable to punishment by this House for contempt.

Mr. GARRETT of Tennessee. To that I reserve a point of order.

The SPEAKER. All points of order are reserved.

The Clerk read as follows:

House resolution 342.

Resolved, That this House proceed forthwith to determine whether under the report of your select committee on lobby investigations Representative James Thomas McDermott, of the fourth congressional district of the State of Illinois, has not been shown guilty of disgraceful and dishonorable misconduct and venality, rendering him unworthy of a seat in this House and justly liable to expulsion from the same.

Mr. GARRETT of Tennessee. I reserve a point of order to at. Mr. Speaker, I have no desire to press the point of order. Mr. MURDOCK. But there is a unanimous consent pending. The gentleman from Michigan asks unanimous consent that they

be considered together.

The SPEAKER. The first question to be disposed of is whether the resolutions are privileged. Has the gentleman from Tennessee anything to say upon that point?

Mr. GARRETT of Tennessee. I will not make the point. I

will move-

Mr. MacDONALD. Mr. Speaker, will the gentleman withhold his point of order?

Mr. GARRETT of Tennessee. Certainly.

Mr. MURDOCK. I think the gentleman from Tennessee

should state his point of order.

Mr. GARRETT of Tennessee. I make the point of order that the resolutions are not privileged resolutions. I reserve the point of order.

Mr. MacDONALD. Just for a brief statement.
Mr. GARRETT of Tennessee. How much time does the gentleman desire?

Mr. MacDONALD. Five minutes.

Mr. GARRETT of Tennessee. Mr. Speaker, I reserve the point of order for five minutes.

Mr. MacDONALD. Mr. Speaker, a very voluminous report. has been made here from a committee after months of work involving the gravest matter that could be involved concerning the interests of this House. The committee have made their report largely by stating the facts and the conclusions, in some cases, which the members of the majority of the committee and the minority draw from those facts, but there has been no recommendation made to the House as to the action to be taken upon this matter. As I say, it is a grave matter. It is a matter that this House must consider carefully and solemnly before acting upon it. The responsibility for the minority views is my own, since the report is mine alone. It was evidently in the minds of all the committee that the next step in this procedure would be taken by this House. I have no desire to do anything except to take the next logical, orderly step that must be taken; and I state that there can be no doubt in the mind of any gentleman of this House, after reading the record of the hearings and the report, but that the subject matter of the resolution, which I present here in regard to Representative McDermort and the members of the National Association of Manufacturers who were engaged in these lobbying activities, is a matter that is up before this House for determination now, and that the House can not evade this issue or delegate its powers to anyone else who will evade it. It is up to this House to answer to the American people now for the things that are revealed in this report. I say, answer it; I am not saying how the House shall answer it, but the answer must be made and made now.

The SPEAKER. The gentleman from Michigan asks unarimous consent to consider these two resolutions together.

Mr. GARRETT of Tennessee. Mr. Speaker, I reserve the point of order on both resolutions. The SPEAKER. The Chair will hear the gentleman.

Mr. MANN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Is it not within the power of the gentleman from Michigan to offer the two resolutions together as one series of resolutions?

The SPEAKER. It is not one resolution.

Mr. MANN. As a series of resolutions growing out of the me report. Is it not within his power to do that?

The SPEAKER. The Chair thinks that he could have made two sections out of one resolution. The resolutions could have been joined together, but when they are voted upon each man has to be voted on by himself.

Mr. MANN. If the resolutions were offered together, of course

they would be divisible, if anybody asked it.

The SPEAKER. Of course. Mr. Speaker Blaine held on a similar occasion that two men could not be joined together in the same condemnation. The case was not exactly like this. The first resolution which the gentleman from Michigan offers bunches together these men who are accused of being part and parcel of an association that was lobbying, but the resolution about Mr. McDermott and the resolution about these alleged lobbyists would have to be voted on separately, whether joined

in one resolution or not.

Mr. GARRETT of Tennessee. Mr. Speaker, while reserving the point of order, I wish to make this statement: The House and the country should understand the attitude of the com-The select committee appointed under House resolution 198 has not made recommendations for the very plain and simple reason that it was not authorized to make recommenda-Not only was it not called upon but it was not authorized, and any recommendation which it might have made calling for affirmative action on the part of the House would have been in clear excess of its authority, and would have received, as it would have merited, criticism. There has been no desire, and I think the report will show that, upon the part of the committee to avoid or evade any proper responsibility. Neither has it been the desire of the committee to exceed the authority

which was committed to it by the House under the resolution.

Having said that much, I wish to state that there is no disposition on the part of this committee, or upon any individual member of it, to insist upon any technicalities in dealing with this question. The resolutions which the gentleman from Michigan has submitted I think are not privileged, but I do not care

to press the point of order.

I move that the resolutions and report of this committee, together with the entire record, be referred to the Committee on the Judiciary, with directions to report to the House at the earliest practicable date what action, if any, should be taken by the House thereon.

Mr. KELLY of Pennsylvania: Mr. Speaker

The SPEAKER. For what purpose does the gentleman rise? Mr. KELLY of Pennsylvania. To make a point of order against this motion.

The SPEAKER. Why? Mr. KELLY of Pennsylvania. On the ground that it is a question of privilege, and no motion under the rules except a motion to adjourn can be considered.

Mr. GARRETT of Tennessee. Mr. Speaker, the gentleman from Michigan [Mr. MacDonald] had yielded the floor, and I make that motion, which is a privileged motion, a motion to refer, and on that I move the previous question.

The SPEAKER. The Chair will decide two or three things at once. Both of these resolutions offered by the gentleman from Michigan are privileged. The motion of the gentleman from Tennessee [Mr. Garrett] is proper and in order, and on

that he moves the previous question.

Mr. KELLY of Pennsylvania. Mr. Speaker, will the Speaker listen to the reading of one rule of the House on the proposition as to whether a motion to refer is privileged? I have it here and I would like to read it.

The SPEAKER. The Chair will hear it.

Mr. KELLY of Pennsylvania. Rule IX of the House of Representatives covers this point.

The SPEAKER. What is the number of the rule?
Mr. KELLY of Pennsylvania. Rule IX. Questions of privilege

The SPEAKER. What section?

Mr. KELLY of Pennsylvania. Section 653 of House Manual and Digest, and I can read it in a moment.

Questions of privilege shall be, first, those affecting the rights of the House collectively, its safety, dignity, and integrity of its proceedings; second, the rights, reputation, and conduct of Members, individually, in their representative capacity only; and shall have precedence of all other questions, except motions to adjourn.

The SPEAKER. If the gentleman will consider section 765, he will find out that a motion to refer is in order.

Mr. KELLY of Pennsylvania. Mr. Speaker, there are a number of precedents on the subject where it was not considered in order, as given in Hinds' Precedents.

Mr. GARRETT of Tennessee. Mr. Speaker-

The SPEAKER. When the Sherley resolution was up the Chair ruled then, and he ruled correctly, that a motion to refer was in order, and it was referred.

Mr. FITZGERALD. The rule of the House expressly makes

it in order, Mr. Speaker.

The SPEAKER. Why, of course; in section 765, the fourth clause of Rule XVI provides that when a question is under debate the following motions are in order: A motion to adjourn, a motion to lay on the table, a motion for the previous question, which are to be voted on without debate; and then, next, a motion to refer, to postpone, and so on, and so on, which are de-batable within the discretion of the Chair; but the gentleman from Tennessee makes the motion for the previous question, which is not debatable.

Mr. MURDOCK. Mr. Speaker, a point of order.
The SPEAKER. The gentleman will state it.
Mr. MURDOCK. Has the gentleman from Tennessee, after the gentleman from Michigan has the floor and yields to him for an explanation, the right to take the floor to make the

Mr. GARRETT of Tennessee. Mr. Speaker, my understanding of the fact does not agree with that stated by the gentleman

from Kansas.

Mr. MURDOCK. I do not know where I misstated the facts. Mr. GARRETT of Tennessee. I reserved the point of order, and the gentleman from Kansas asked if I would withhold making the point of order for five minutes, and I responded that I would, and did.

Mr. MURDOCK. The gentleman means the gentleman from

Michigan, by the way.

Mr. GARRETT of Tennessee. Yes; and the gentleman from Michigan spoke for five minutes and took his seat, and thereupon I obtained recognition in my own right.

Mr. MURDOCK. My recollection, Mr. Speaker, is that the

gentleman from Michigan did not take his seat, and the gentle-man from Tennessee asked the gentleman from Michigan—

SEVERAL MEMBERS. Oh, no.

Mr. MURDOCK. I beg the pardon of the House. I ask for an audience here. I am going to try to state exactly what transpired, and if any gentlemen wish to interrupt they should rise to their feet.

My recollection is that the gentleman from Tennessee [Mr. GARRETT] did request the gentleman from Michigan [Mr. MAC-DONALD | to withhold for a few minutes for an explanation. And I make the point of order, Mr. Speaker, that the gentleman from Tennessee can not, when time is yielded to him in that fashion, take the floor to make a motion.

Mr. GARRETT of Tennessee. Mr. Speaker, time was not yielded to me by anyone. I was recognized in my own right.

The SPEAKER. The gentleman from Michigan [Mr. MAC-DONALD] asked for five minutes, and got it and used it, and whether he sat down or did not makes not a particle of difference. His five minutes were up, and the gentleman from Tennessee [Mr. Garrett] took the floor in his own right, having reserved the points of order.

Mr. GARRETT of Tennessee. And I then withdrew them to

make the motion.

The SPEAKER. Yes. The gentleman has the right to make the motion to refer.

Mr. GARRETT of Tennessee. And I thought I moved the

previous question.

Mr. McCOY. Mr. Speaker, I rise to ask that the resolution of the gentleman from Tennessee [Mr. GARRETT] be read again. The SPEAKER. Without objection, it will be again reported. The Clerk read as follows:

Resolved, That the report of the select committee appointed under House resolution No. 198, and the findings and testimony, be referred to the Committee on the Judiciary, with directions to report to the House at the earliest practical date what action, if any, should be taken by the House thereon.

Mr. GARRETT of Tennessee. It included, in addition to what is written and has just been read by the Clerk, the two resolutions offered by the gentleman from Michigan and the report of the committee and the hearings.

Mr. KELLY of Pennsylvania. Mr. Speaker, a parliamentary

inquiry.

The SPEAKER. The gentleman will state it.

Mr. KELLY of Pennsylvania. On a question of privilege such as this, is it proper parliamentary procedure to move the previous question? I have a precedent here I would like to read. It is in Volume II, and is a case which concerns this same question.

The SPEAKER. The gentleman from Pennsylvania will please cite the section.

Mr. KELLY of Pennsylvania. Section 1256, in Hinds' Precedents. Volume II.

Mr. MURDOCK. Mr. Speaker, I ask that I may be recognized to make the point of order against the previous question.

Mr. FITZGERALD. Make it now. Mr. MURDOCK, I make the point of order against the previous question.

The SPEAKER. What point of order does the gentleman make against the previous question?

Mr. KELLY of Pennsylvania. It is not in order to move the

previous question on the question of privilege.

The SPEAKER. Now, that very section to which the gentleman from Pennsylvania [Mr. Kelly] refers, provides that the previous question does apply to a question of privilege, and there can not be any reason given against the rule.

Mr. KELLY of Pennsylvania. In the paragraph to which I refer the Speaker decided at that time, that, in his judgment, the matter before the House was a question of privilege, and that on a question involving the privileges of a Member of the House, the previous question could not be applied, and consequently the question of postponement was open to debate.

The SPEAKER. That is not before the House,

Mr. KELLY of Pennsylvania. It was overruled by the House. The SPEAKER. The House overruled the Speaker on that occasion.

Mr. KELLY of Pennsylvania. Yes.

The SPEAKER. And the voice of the House is better than the voice of any Speaker who ever sat in this chair, and higher

Mr. KEBLY of Pennsylvania. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. KELLY of Pennsylvania. Did the Chair rule or not, that

this entire resolution was a question of privilege?

The SPEAKER. As a matter of fact, the Chair ruled that these two resolutions offered by the gentleman from Michigan [Mr. MacDonald] were privileged resolutions.

Mr. KELLY of Pennsylvania. The question of privilege is a little bit different than the privileged question. Are these questions of privilege or privileged questions?

The SPEAKER. Privileged questions.

Mr. KELLY of Pennsylvania. I made a point of order that these resolutions were questions of privilege, involving the integrity of Members of the House and of the House itself.

The SPEAKER. That is not involved in the matter pending before the House now.

Mr. CLARK of Florida. Mr. Speaker, I demand the regular

The SPEAKER. The question is on the previous question on the motion to refer these resolutions, testimony, documents, and so forth, to the Committee on the Judiciary

Mr. McCOY. Mr. Speaker, a parliamentary inquiry. The SPEAKER. The gentleman will state it.

Mr. McCOY. Would it be proper, in view of the motion pending, to ask why this matter should be taken away from the special committee and referred to the Committee on the Judiciary:

The SPEAKER. This committee of which the gentleman from Tennessee [Mr. Carrett] was chairman was ordered to investigate. It had no right under the terms of the resolution to make recommendations, and no question is in order, anyway, when the previous question is demanded. The question is on the ordering of the previous question.

The question was taken, and the Speaker announced that the

ayes seemed to have it.

Mr. MacDONALD. A division, Mr. Speaker.

The SPEAKER. The gentleman from Michigan [Mr. Mac-DONALD] demands a division. Those in favor of a division will rise and stand until they are counted. [After counting.] One hundred and twenty-nine gentlemen have arisen in the affirmative. Those opposed will rise and stand until they are counted. [After counting.] Thirty-six gentlemen have arisen in the negative.

Mr. MacDONALD. Mr. Speaker, I demand the yeas and

The SPEAKER. The gentleman from Michigan demands the yeas and nays. Those in favor of taking the vote by yeas and nays will rise and stand until they are counted. [After count-

ing.] Twenty-two gentlemen have arisen in the affirmative.

Mr. MacDONALD. The other side, Mr. Speaker.

The SPEAKER. Those opposed to taking the vote by yeas and nays will rise and stand until they are counted. [After counting.] One hundred and twenty-nine gentlemen have arisen in the negative. Twenty-two is not a sufficient number, and the

yeas and nays are refused. On the former vote the ayes were 129 and the noes were 36, and the previous question is ordered. The question now is on the motion of the gentleman from Tennessee [Mr. GARRETT] to refer the resolution, and so forth, to the Committee on the Judiciary.

The question was taken, and the Speaker announced that the

ayes seemed to have it.

Mr. MacDONALD. Mr. Speaker, I ask for a division. The SPEAKER. The gentleman from Michigan asks for a division. Those in favor of referring these resolutions, and so forth, to the Committee on the Judiciary will rise and stand until they are counted. [After counting.] One hundred and thirty-three gentlemen have arisen in the affirmative. opposed will rise and stand until they are counted. LAfter counting.] Thirty-four gentlemen have arisen in the negative. On this question the ayes are 133 and the noes are 34, and-

Mr. MacDONALD. Mr. Speaker, I demand the yeas and

SEVERAL MEMBERS. Too late!

Mr. MANN. Oh, no; the gentleman demanded the yeas and

navs in time.

The SPEAKER. The gentleman from Michigan [Mr. Mac-DONALD] demands the year and nays. Those in favor of taking the vote by yeas and nays will rise and stand until they are counted. [After counting.] Twenty-three gentlemen have arisen in the affirmative—not a sufficient number—and the resolutions, and so forth, are referred to the Committee on the Judiciary.

Mr. MacDONALD. Mr. Speaker, I make the point of order

that there is no quorum present.

### ADJOURNMENT.

Mr. UNDERWOOD. Mr. Speaker, I make the point of order that the gentleman's point of order comes too late. I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 43 minutes p. m.) the House adjourned until to-morrow, Wednes-

day, December 10, 1913, at 12 o'clock noon.

# EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting a report by the Chief of the Quartermaster Corps, United States Army, of all receipts and expenditures of contingent funds collected for the fiscal year ended June 30, 1913, from the nonmilitary residents at Fort Monroe under the terms of the act approved August 1, 1894, making provision for fortifications and other works of defense (H. Doc. No. 397); to the Committee on Expenditures in the War Department and ordered to be printed.

2. A letter from the Attorney General, transmitting a statement of the expenditures of the appropriation for the United States Commerce Court for the fiscal year ended June 30, 1913 (H. Doc. No. 451); to the Committee on Expenditures in the

Department of Justice and ordered to be printed.

A letter from the Acting Comptroller of the Treasury, transmitting the fifty-first annual report of the operations of the Currency Bureau for the year ended October 31, 1913 (H. Doc. No. 452); to the Committee on Banking and Currency and ordered to be printed.

4. A letter from the First Assistant Secretary of the Interior, transmitting report of withdrawals of lands that have been made in connection with the Flathead Indian Reservation, Mont. (H. Doc. No. 453); to the Committee on Indian Affairs and ordered to be printed.

5. A letter from the Attorney General, transmitting a statement of the expenditures of the appropriation for the United States Court of Customs Appeals for the fiscal year ended June 30, 1913 (H. Doc. No. 454); to the Committee on Expenditures in the Department of Justice and ordered to be printed.

6. A letter from the Attorney General transmitting the annual report of the Attorney General of the United States for the year 1913, with accompanying appendixes (H. Doc. No. 460); to the

Committee on the Judiciary and ordered to be printed.
7. A letter from the president of the Board of Managers of the National Home for Disabled Volunteer Soldiers, transmitting the report of the board of managers of the said home for fiscal year ended June 30, 1913 (H. Doc. No. 459); to the Committee on Military Affairs and ordered to be printed.

8. A letter from the assistant clerk of the Court of Claims, transmitting a copy of the conclusions of law and of fact in the French spoliation cases relating to the vessel brig Nancy (H. Doc. No. 456); to the Committee on Claims and ordered to be printed.

9. A letter from the assistant clerk of the Court of Claims, transmitting a copy of the conclusions of law and of fact in the French spoliation cases relating to the vessel brig Almy (H. Doc. No. 455); to the Committee on Claims and ordered to be printed.

## REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows

Mr. MOON, from the Committee on the Post Office and Post Roads, to which was referred the bill (H. R. 9318) to amend the act approved June 25, 1910, entitled "An act to establish postal savings depositories for depositing savings at interest with security of the Government for repayment thereof, and for other purposes," reported the same without amendment, accompanied by a report (No. 118), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 9317) to regulate the payment of postal money orders, reported the same without amendment, accompanied by a report (No. 117), which said bill and report were referred to

the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 9321) to amend the act approved May 9, 1888, as amended by the act of June 11, 1896, reported the same without amendment, accompanied by a report (No. 116), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. PADGETT, from the Committee on Naval Affairs, to which was referred the bill (H. R. 10081) to make the tenure of the Major General Commandant of the Marine Corps for a term of four years, reported the same without amendment, accompanied by a report (No. 115), which said bill and report were referred to the House Calendar.

Mr. FLOYD of Arkansas, from the Committee on the Judiciary, to which was referred the bill (H. R. 5849) to amend section 100 of an act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, reported the same without amendment, accompanied by a report (No. 121), which said bill and report were referred to the House

Mr. DYER, from the Committee on the Judiciary, to which was referred the bill (H. R. 9994) to amend section 24, chapter 2, of the Judicial Code of the United States, reported the same without amendment, accompanied by a report (No. 120), which said bill and reoprt were referred to the House Calendar.

Mr. FERRIS and Mr. DAVENPORT, from the Committee on the Territories, submitted a minority report on the bill (H. R. 1739) to authorize the President of the United States to locate, construct, and operate railroads in Alaska, and for other purposes (H. Rept. 92, pt. 2), which was referred to the Committee of the Whole House on the state of the Union.

## REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Also, petitions of Kohler & Campbell, D. F. McAllister, Thompson & Ballantine, and Hudden & Co., of New York City, favoring an amendment to the se men's bill; to the Committee on the Merchant Marine and Fisheries.

# SENATE.

# Wednesday, December 10, 1913.

The Senate met at 10 o'clock a. m. Prayer by the Chaplain, Rev. Forrest J. Prettyman, D. D. THE JOURNAL.

The VICE PRESIDENT. The Secretary will read the Journal

of the proceedings of the preceding session.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll. The Secretary called the roll, and the following Senators answered to their names:

Ashurst Bacon Bradley Overman Owen Page Perkins Smoot Sterling Stone Sutherland Hollis Jackson Brady Brandegee Bristow Perkins Reed Robinson Shafroth Sheppard Sherman Shields Shively Simmons Swanson Thompson Thornton Townsend Johnson Jones Kenyon Bryan Burleigh Kenyon Kern La Follette Martin, Va. Martine, N. J. Nelson Norris O'Gorman Burton Vardaman Walsh Warren Weeks Williams Clapp Colt Crawford Dillingham Gallinger Simmons Smith, Ga. Smith, S. C.

Mr. SHEPPARD. I wish to announce the unavoidable absence of my colleague [Mr. CULBERSON] and to state that he is paired with the Senator from Delaware [Mr. DU PONT]. announcement may stand for the day.

Mr. SMOOT. I desire to announce that the senior Senator from North Dakota [Mr. McCumber] is unavoidably detained from the Senate.

•The VICE PRESIDENT. Fifty-six Senators have answered to the roll call. There is a quorum present. The Secretary will read the Journal of the proceedings of the preceding session.

The Journal of yesterday's proceedings was read.

Mr. WILLIAMS. Mr. President, I notice from hearing the minutes read that upon yesterday a resolution (S. Res. 19) seems to have passed the Senate to pay some clerk hire out of the con-tingent fund of the Senate. The resolution never passed the Committee to Audit and Control the Contingent Expenses of the Senate, and the Senate can not pass a resolution which is valid in law to pay anything out of the contingent fund of the Senate until it has met the approval of the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. MARTIN of Virginia. Mr. President— Mr. WILLIAMS. Wait a minute. In other words, the Senate can not by a resolution repeal a law of the United States. is a law of the United States which provides that nothing shall be paid out of the contingent fund of the House unless it has been approved by the Committee on Accounts of that body, and that nothing shall be paid out of the contingent fund of the Senate unless it has been approved by the Committee to Audit and Control the Contingent Expenses of the Senate. Now, I yield to the Senator from Virginia.

Mr. MARTIN of Virginia. Mr. President, I simply want to

say that at the proper time, when we reach that order of business, I expect to move a reconsideration of the vote by which the resolution referred to by the Senator from Mississippi [Mr. Williams] was passed, for the reason that in the last appropriation bill these additional employees were provided for act of Congress, and that, in addition to the reason given by the Senator from Mississippi, is amply sufficient to show the necessity of reconsidering the vote which was had on yesterday, and I contemplate making, and shall at the proper time make, a motion to reconsider the vote on the resolution, which was taken yesterday. Mr. WILLIAMS.

Mr. President, the resolution went to the Committee to Audit and Control the Contingent Expenses of the Senate and was reported adversely; so, of course, even if it stands without reconsideration, it is not worth the paper on

which it is written, and can not be executed.

Mr. SMOOT. Mr. President, I do not desire to take any time in discussing this matter, but this question has been before the Senate previously. The approval which the Senator speaks of is the approval of the voucher which is made by the chairman of any committee of this body. Of course I do not want to consume the time of the Senate now, as I believe the resolution will be reconsidered.

Before the Journal is approved, however, Mr. President, believe I ought to call attention to the fact that the Journal and the RECORD ought to agree, and they do not agree. The Journal shows, as read by the Secretary, that yesterday morning when I called for a quorum the President announced that there

were 58 Senators present. The RECORD this morning shows that

there were 64 Senators present. Both can not be right.
While I am discussing the matter, I might as well call attention to changes that have been made in the RECORD for the last two days, the practice of which I believe ought to be stopped. On December 8 I called for a quorum.

Mr. WILLIAMS. I yielded to the Senator for-

Mr. SMOOT. Oh, no; the Senator yielded the floor.

Mr. WILLIAMS. I want to dispose of this point first, though, and this matter of the call has nothing to do with what the Senator is talking about.

Mr. SMOOT. The Senator did not yield to me. I took the

floor in my own right.

Mr. WILLIAMS. The Senator took the floor by saying that he did not want to discuss the question, and then he did proceed to discuss it by giving an ex cathedra opinion to the effect that what was meant by this law, which is a very plain law, was that the committees had power to audit, and nothing else. Now, I submit to the Chair the proposition that it does not make so much difference just now, but the law is that nothing shall be paid out of the contingent fund of the House unless it has received the approval of the Committee on Accounts of that body, and that nothing shall be paid out of the contingent fund of the Senate unless it shall receive the approval of the Committee to Audit and Control the Contingent Expenses of this body. It is, in other words, a self-denying ordinance to keep the contingent funds from being burdened by all sorts of accounts.

Mr. SMOOT. I have the floor, and I wish to continue. the morning of December 8 I called for a quorum, and the Vice President announced that there were 48 Senators present. next morning when I looked into the RECORD I found that 61 Senators were recorded as being present. On that same day WEEKS called for a quorum, and the Vice President announced 51 Senators as being present. The RECORD the next morning shows 59 Senators as being present. Senator Bristow called for a quorum that day, and the Vice President announced 48 Senators as being present, while the Record shows 58 as being present. Yesterday morning I called for a quorum, and the Vice President announced that there were 51 Senators present, while the RECORD this morning shows 64 Senators as being present. It shows the Senator from Oklahoma [Mr. Owen as being present, although he did not enter this Chamber until 29 minutes past 10 o'clock. The Journal shows there were 58 Senators present, while the RECORD shows 64 Senators as being Senator Hitchcock asked for a quorum, and it was announced that there were 57 Senators present. I do not know how many the Record will show as being present, because the call was made in a speech of the Senator from Minnesota [Mr. Nelson], yet to be published. Senator Gallinger called for a quorum, and the Vice President announced 59 present, while the RECORD shows 62 Senators as being present. I called for a quorum at 8 o'clock last night, and the Vice President announced there were 56 Senators present, while the Record shows 59 as being present.

Mr. President, I simply call attention to this fact, because I believe the Record should show the exact facts. I am perfectly willing to say that I think it has happened in this way: Senators have come into the Chamber perhaps after the announcement, and the Secretary has recorded their names as being present as answering to the roll call, but I do not believe that practice should be hereafter allowed.

Mr. BACON. Mr. President-

The VICE PRESIDENT. May the Chair make a statement before the Senator from Georgia proceeds?

Mr. BACON. Certainly.

The VICE PRESIDENT. Whatever is wrong about this matter is directly traceable to the conduct of the present occupant of the chair. The Chair was inquired of by the Secretary as to whether it was a proper thing, after the result of the roll call had been announced and before any other business had taken place, if a Senator entered the Chamber and requested the Secretary to put him on the roll as being present, for the Secretary to do so. The Chair asked what had been the custom of preceding presiding officers, and was informed by the Secretary that the immediate predecessor of the present occupant of the chair had said that until some other business was transacted, al-though the announcement had been made by the Chair, it was not in violation of the rules of the Senate to mark Senators present who actually arrived in the Chamber before any other business had talen place. The Chair then instructed the Secretary to proceed in accordance with the ancient custom of the Senate, and the Chair does not desire that the Secretary shall be criticized for doing what was done by direction of the Chair. If it is not the desire of the Senate that that practice shall continue, the Secretary from this time forward, after the an-nouncement of the result of a roll call is made, will not record

the name of any Senator. The Sen tor from Georgia.

Mr. BACON. Mr. President, I merely wish to state from my own experience something in illustration of what the Chair has just said. This morning I was in the Chamber before the Senate convened. I went into the cloakroom to put up my hat and hang up my coat. While I was there, which seemed not exceeding two minutes, the bell rang. As is usual, the bell rings after the roll call has begun, and my name, being second on the list, was called before I entered the door. I was in the room when the name of Mr. BRADLEY was called. for a few moments while the call was proceeding, intending to ask the Chair to permit me to record my presence, when I was called to the door upon an official matter by a messenger from the Smithsonian Institution, of which I am one of the regents. Standing at the door, thinking I would certainly be in time to answer my name, I was detained longer than I anticipated; I entered the Chamber the Vice President announced the result of the call. I then asked the Secretary to record my name, and he did so. Is there any impropriety in that?

Mr. SMOOT. No. Mr. President; I do not think so; but there

is not a similar case once in a thousand roll calls.

Mr. BACON. That simply happened this morning, and I have no doubt that similar cases are happening all the time. As the Vice President has said-

Mr. BRISTOW. Mr. President-

Mr. BACON. Pardon me a moment, until I finish the sentence. As the Vice President has said, of course, after we have passed from the roll call and proceeded to other business, it would be improper to then add a Senator's name to the list, but where a Senator is in the Chamber, although after the announcement has been made by the Chair, but before the Senate has proceeded to other business, there is certainly no impropriety in the presence of that Senator being recorded.

Mr. SMOOT. Where a Senator was in the Chamber at the time the roll was called or had been in the Chamber during the roll call, that would be a different thing entirely; but I do believe. Mr. President, that after the announcement of a roll call has been made, and a Senator later enters the Chamber, he ought not to be recorded as present during that roll call.

Mr. BRISTOW. Mr. President, I should like to ask the Senator from Georgia what would be his judgment in regard to a case like this: At the roll call on the convening of the session yesterday morning the Senator from Oklahoma [Mr. Owen] was not present and did not appear until some time after half past 10 o'clock. In the meantime a bill had been taken up and was under discussion. The RECORD shows that at the time the roll was called the Senator from Oklahoma was present and answered to his name, when, as a matter of fact, he was not in the Chamber for about half an hour afterwards, and business had been transacted before he appeared. Does the Senator from Georgia think the RECORD ought to show that he was present when he was not and did not appear for half an

Mr. SMOOT. And I desire to call the Senator's attention to the fact that the roll call was commenced at 2 minutes past

10 o'clock yesterday morning.

Mr. BACON. Mr. President, I have addressed my reply to the statement of the Vice President, and I think under the circumstances stated by the Chair the secretaries are not to be criticized, nor is the practice to be departed from.

Mr. BRISTOW. I desire to say that I am in entire accord with the Senator from Georgia [Mr. Bacon], for I think he should have been recorded as present, because he was present, and it is well known that he was here, as he had been in the Chamber.

Mr. OWEN. Mr. President, I did not understand the particular roll call to which the Senator from Kansas referred. A number of times when the roll call has been proceeding I have walked up to the desk and asked to be recorded, and immediately gone out. Probably it was such an occasion as that to which the Senator has referred.

Mr. SMOOT. No. Mr. President; the roll call to which the Senator has reference was the first roll call yesterday morning. The Senator from Utah called for a quorum yesterday morning at 2 minutes past 10 o'clock, and the Senator from Oklahoma did not enter this Chamber yesterday morning until 29 minutes past 10

Mr. GALLINGER. Regular order!

Mr. SUTHERLAND. Mr. President, the resolution to which the Senator from Mississippi has called attention, providing for additional cierks—

The VICE PRESIDENT. If the Senator will pardon the Chair for just one moment, the Chair wants this matter first settled, because the Chair has assumed the responsibility for what has been done on information obtained as to the conduct of his predecessor in this office, and the Chair does not want the secretaries criticized when the blame is with the Chair. The Chair desires to know now whether they shall be instructed to record no Senator as present after the result of the roll call is announced or whether the previous custom, which, as the Chair believes, did exist, shall continue.

Mr. GALLINGER. Mr. President, during the short period that it was my privilege to preside over the Senate I feel quite sure that there were a few exceptional cases where a Senator was permitted to record his name when he came in the door just as the roll call was completed, but it was not the custom to allow Senators to go to the desk after the announcement had been made and record their names. I do not know that any great harm comes from it, and yet I think it is a bad practice. While the name of the Senator from Georgia ought to be recorded this morning, of course-for we all knew that the Senator was present-I think it would be a wise thing for the secretaries to refuse to enter any name that was not on the roll when the announcement was made from the Chair.

The VICE PRESIDENT. Well, it must be settled one way or the other, and the Chair will instruct the secretaries to record

no Senator's name after the Chair has announced the presence of a quorum unless such Senator obtains permission of the

Senate to have his name recorded as present.

Mr. SUTHERLAND. Mr. President, the resolution (S. Res. 19) providing for additional clerks, which was agreed to on yesterday, is probably entirely unnecessary, because of the provision in the appropriation bill to which the Senator from Virginia [Mr. MACTIN | has called attention; but I do not want to let the construction which the Senator from Mississippi has placed upon the law pass without challenge. The position of the Senator from Mississippi, as I understand, is that the Senate is powerless to authorize a payment from the contingent fund unless the Committee to Audit and Control the Contingent Expenses of the Senate has first sanctioned it. Am I correct about that, will ask the Senator?

Mr. WILLIAMS. Yes.

Mr. SUTHERLAND. The language of the law is:

Hereafter no payment shall be made from the contingent fund of the Senate unless sanctioned by the Committee to Audit and Control the Contingent Expenses of the Senate—

And so on. It seems to me that that only means that the payment itself shall not be made unless the committee shall sanction it, but not that it may not be authorized by the Senate to be made. In other words, the Committee to Audit and Control the Contingent Expenses of the Senate in that respect simply exercises the power of an ordinary auditor. When the Senate has authorized an expenditure to be made and the time has come when payment should be made under the authorization of the Senate, then it is the duty of the committee to see that it is properly made under the law, but-

Mr. WILLIAMS. Will the Senator read the exact language of

the law?

Mr. SUTHERLAND. It is:

Hereafter no payment shall be made from the contingent fund of the Senate unless sanctioned by the Committee to Audit and Control the Contingent Expenses of the Senate—

And so on.

It seems to me that it would be a remarkable situation if the Senate, which is the crea or of the Committee to Audit and Control the Contingent Expenses of the Senate, was rbsolutely powerless to do anything unless its creature had first authorized it to do it.

Mr. WILLIAMS. Mr. President, if the Senator from Utah will pardon me, there are some things beyond the power of the Senate, and one or them is to amend, modify, or vary a law which has been passed by both branches of the Legislature and approved by the President.

Mr. SUTHERLAND. That is quite true.
Mr. WILLIAMS. This is one of those cases. can not do anything which would have that effect. underlying this law was that very frequently, in that spirit of comity and courtesy and good fellowship that characterizes both bodies, resolutions get through very easily to make pay-I ents out of the contingent fund. Therefore the two Houses joined together in passing a self-denying ordinance, a law which should restrain their own power over their own contingent fund, and so they have said expressly that no payment shall be made out of the contingent fund of either body unless sanctioned by the Committee on Accounts of the House and by the Committee to Audit and Control the Contingent Expenses of the Senate. The entire reason of the law would be defeated if the construction were placed upon it which the Senator from Utah now

seeks to place upon it.

The object of my announcement this morning was to give notice, so that Senators would understand the situation, that so far as this resolution was concerned it carried no appropriation; that until the Committee to Audit and Control the Contingent Expenses of the Senate had approved of it, it was just that much waste paper; and that there was no obligation upon the Committee to Audit and Control the Contingent Expenses of the Senate to approve of it at all; that it was a matter in foro conscientiæ so far as they were concerned. I do not see how language could be used that is plainer than just what the Senator has read-that no payment shall be made out of the contingent fund unless sanctioned by these two committees in the respective Houses.

Mr. SUTHERLAND. Mr. President, I quite understand the position taken by the Senator from Mississippi, and I have no doubt that, if the law had provided that no payment should be authorized, then the Senator's construction would have been

correct, but I do not think-

Mr. WILLIAMS. I have never said that.

Mr. SUTHERLAND. If the Senator will bear with me. I do not think it was the intention of the law to preclude the Senate from controlling its contingent fund or to prevent the Senate from controlling the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. ROBINSON. A parliamentary inquiry, Mr. President. The VICE PRESIDENT. Does the Senator from Mississippi yield to the Senator from Arkansas?

Mr. WILLIAMS. If the Senator will pardon me, the inten-

tion of the law is expressed by the words of the law.

Mr. ROBINSON. Mr. President, I desire to submit a parliamentary inquiry. What is before the Senate?

Mr. WILLIAMS. Nothing, except—

Mr. ROBINSON. I ask for the regular order, Mr. President. The VICE PRESIDENT. The Journal of yesterday's proceed-

ings will stand approved as read.

Mr. SUTHERLAND. Mr. President, just a moment. I understood that the Senator from Virginia [Mr. MARTIN] had moved to reconsider the vote by which this resolution was Am I correct about that?

The VICE PRESIDENT. The Senator from Virginia said he would do so at the proper time. It will undoubtedly come

Mr. SUTHERLAND. May I be indulged to say just a single word? I have said what I have simply because I differ with the Senator from Mississippi as to the construction of this law, and I do not think his statement ought to pass unchallenged.

Mr. WILLIAMS. I do not think we differ. The Senator from Utah and I agree that the Senate can authorize the payment, but they can not enforce it, and they can not compel it. It must be sanctioned by the committee before it becomes anything except a brutum fulmen.

Mr. LANE. Mr. President, I understand the ruling of the Chair to be that hereafter any Senator who is not here during the time of the roll call will not be marked upon the roll. Is

that correct?

The VICE PRESIDENT. That is correct; after the Chair has announced the result, there being objection to the practice. Mr. LANE. That being the fact, I wish to announce for the benefit of my friend the Senator from Utah that I got in a bit late, just after the roll call was finished, but that I am here. [Laughter.]

Mr. GALLINGER. We are glad to welcome the Senator.

ADDITIONAL CLERKS TO SENATORS.

Mr. MARTIN of Virginia. I move that the vote by which Senate resolution 19 was agreed to on yesterday may be reconsidered. It is the resolution which was referred to in the discussion a few moments ago, by which an additional clerk is to be provided for certain Senators and paid out of the contingent fund of the Senate. The resolution was inadvertently passed, as provision was made in the last general deficiency appropriation bill that these additional clerks shall be paid as other clerks are paid, under a statute. I move, therefore, that the vote be reconsidered.

Mr. WARREN. That was from December 1 until the 30th

of June next.

Mr. MARTIN of Virginia. That is true; and they will be provided for in the regular way in the regular appropriation bill; but at present the resolution which passed yesterday is not only unnecessary but is confusing and calculated to give trouble.

Mr. JONES. Mr. President, I desire to say that the statement of the Senator from Virginia is entirely correct. There will be no objection to the reconsideration.

The VICE PRESIDENT. The question is on the reconsideration of the vote whereby the resolution was agreed to.

The motion to reconsider was agreed to.

Mr. GALLINGER. Now, Mr. President, let the resolution be

indefinitely postponed.

Mr. MARTIN of Virginia. I concur in that request, and move that the resolution be indefinitely postponed.

The motion was agreed to.

BAILWAY LAND GRANT IN IOWA (S. DOC. NO. 310).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of War, transmitting, in further response to a resolution of the Senate of August 19, 1913, reports of the Chief of Engineers and Chief of the Quartermaster Corps of the United States Army relative to the land grant under the act of Congress approved May 12, 1864, which was ordered to be printed, and, with the accompanying papers, ordered to lie on the table.

TRAVEL OF EMPLOYEES OF INTERIOR DEPARTMENT (H. DOC. NO. 464).

The VICE PRESIDENT laid before the Senate a communication from the Secretary of the Interior, transmitting, pursuant to law, a statement showing in detail what officers or employees (other than special agents, inspectors, or employees who in the discharge of their regular duties are required to constantly travel) of the Department of the Interior who have traveled on official business from Washington to points outside of the District of Columbia during the fiscal year ended June 30, 1913, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

ANNUAL REPORT OF THE ATTORNEY GENERAL (H. DOC. NO. 460).

The VICE PRESIDENT laid before the Senate the annual report of the Attorney General of the United States for the fiscal year ended June 30, 1913, which was ordered to lie on the table and be printed.

UNITED STATES COMMERCE COURT (H. DOC. NO. 451).

The VICE PRESIDENT laid before the Senate a communication from the Attorney General, transmitting, pursuant to law, a statement of the expenditures of the appropriation for the United States Commerce Court for the fiscal year ended June 30, 1913, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

COURT OF CUSTOMS APPEALS (H. DOC. NO. 454).

The VICE PRESIDENT laid before the Senate a communication from the Attorney General, transmitting, pursuant to law, a statement of the expenditures of the appropriation for the United States Court of Customs Appeals for the fiscal year ended June 30, 1913, which, with the accompanying paper, was referred to the Committee on Appropriations and ordered to be printed.

FINDINGS OF THE COURT OF CLAIMS.

The VICE PRESIDENT laid before the Senate the following communications from the assistant clerk of the Court of Claims, transmitting certified copies of the findings of fact and conclusions filed by the court in the following causes:

The cause of Mary Sommers, widow of Rudolph S. Sommers, deceased, v. United States (S. Doc. No. 308); and

The cause of Mary D. Gearon, granddaughter and sole heir of Patrick Dee, deceased, v. United States (S. Doc. No. 309).

The foregoing findings were, with the accompanying papers, referred to the Committee on Claims and ordered to be printed.

PETITIONS AND MEMORIALS.

Mr. KENYON presented a petition of sundry citizens of Randalia and Fayette, in the State of Iowa, praying for the enactment of legislation to further restrict immigration, which was referred to the Committee on Immigration.

He also presented a memorial of sundry citizens of Dubuque County, Iowa, remonstrating against the adoption of an amendment to the Constitution granting the right of suffrage to women, which was ordered to lie on the table.

Mr. O'GORMAN presented petitions of sundry citizens of Brooklyn and Albany, in the State of New York, praying for the enactment of legislation granting relief to persons who served in the United States Military Telegraph Corps during the Civil War, which were referred to the Committee on Pensions.

Mr. SMITH of Michigan presented resolutions adopted by the Michigan Equal Suffrage Association, of Jackson, Mich., favoring the adoption of an amendment to the Constitution granting the right of suffrage to women, which were ordered to lie on the table.

#### PAY OF EMPLOYEES.

Mr. MARTIN of Virginia. From the Committee on Appropriations I report back favorably without amendment House joint resolution 164, authorizing the Secretary of the Senate and the Clerk of the House to pay the officers and employees of the Senate and House, including the Capitol police, their respective salaries for the month of December, 1913, on the 20th day of said month. I ask unanimous consent for the present consideration of the resolution. It simply provides for the payment of the salaries of the employees of the two Houses on the 20th of this month.

The VICE PRESIDENT. Is there objection to the present

consideration of the resolution?

Mr. GALLINGER. Mr. President, I think the resolution

should be read in full.

The Secretary read the joint resolution, and there being no objection, the Senate, as in Committee of the Whole, proceeded to its consideration.

The joint resolution was reported to the Senate without amendment, ordered to the third reading, read the third time, and passed.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. SMITH of Georgia:

A bill (S. 3609) to amend section 237 of the Judicial Code as to provide for a review by the Supreme Court of the United States of all final decisions rendered by the highest court of a State in suits of the character and kind named in said section, and for other purposes; to the Committee on the Judiciary.

By Mr. BRISTOW:

A bill (S. 3610) for the relief of C. E. Moore; to the Committee on Post Offices and Post Roads.

A bill (S. 3611) granting a pension to Anna J. Shepherd; and A bill (S. 3612) granting an increase of pension to William B. Warren (with accompanying papers); to the Committee on Pensions.

By Mr. LA FOLLETTE:
A bill (S. 3613) granting an increase of pension to Hattie A. Harris; to the Committee on Pensions.

By Mr. BURLEIGH: A bill (S. 3614) granting a pension to Emil Ginther; to the Committee on Pensions.

By Mr. OWEN:

A bill (S. 3615) for the relief of the estate of Allen J. Mann, deceased: and

A bill (S. 3616) for the relief of the heirs of G. W. Click, deceased; to the Committee on Claims,

A bill (S. 3617) granting an increase of pension to W. H. Riner; to the Committee on Pensions.

By Mr. CHAMBERLAIN:

A bill (S. 3618) granting an increase of pension to Oregon Washburn (with accompanying papers); to the Committee on

By Mr. TILLMAN:

A bill (S. 3619) for the relief of heirs of John D. and Elizabeth Witherspoon, deceased; to the Committee on Claims.

By Mr. TOWNSEND:

A bill (S. 3620) to remove the charge of desertion from the record of Isaac Terwilliger; to the Committee on Military

A bill (S. 3621) granting an increase of pension to Hattie S. Russell (with accompanying papers); to the Committee on Pen-

By Mr. BRANDEGEE:

A bill (S. 3622) for the relief of the heirs of Adam and Noah Brown; to the Committee on Claims.

By Mr. JONES:

A bill (S. 3623) providing for certain regulations to the business of commission merchants engaged in interstate commerce; to the Committee on Interstate Commerce.

By Mr. O'GORMAN:

A bill (S. 3624) granting a pension to Nana E. Sears; to the Committee on Pensions.

# AMENDMENT TO INDIAN APPROPRIATION BILL.

Mr. OWEN submitted an amendment authorizing the Secretary of the Interior to withdraw from the Treasury of the United States the sum of \$10,000 on deposit to the credit of the Creek Indians and pay the same to the trustees of the Henry Kendall College, intended to be proposed by him to the Indian appropriation bill; which was referred to the Committee on Indian Affairs and ordered to be printed.

#### BANKING AND CURRENCY.

Mr. CRAWFORD submitted two amendments, intended to be proposed by him to the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes; which was ordered to lie on the table and be printed.

### PERSONAL EXPLANATION.

Mr. OWEN. Mr. President, I rise to a question of personal privilege.

On page 549 of the Congressional Record of December 9, 1913, the Senator from New Hampshire [Mr. Gallinger] suggested that the Senator from Oklahoma had interpolated in the RECORD the words "roll call." I was not able to recall what the Record showed, and therefore requested that it be sent for. I now have it in my hand-folios 200, 201, and 202.

Mr. GALLINGER. I will ask the Senator if that relates to

his first statement?

Mr. OWEN. I decline to be interrupted by the Senator from

New Hampshire.
The PRESIDING OFFICER (Mr. Walsh in the chair). The Senator from Oklahoma declines to yield. The Senator from Oklahoma will proceed.

Mr. OWEN. On page 549 the Senator from Oklahoma called attention to the RECORD, on page 149, where he had called the attention of the Senate to the various quorums called for and to the number of Senators who answered "present" roll call. At that time the Senator from Oklahoma mentioned the matter of a roll call in connection with these quorums eight different times, the last time in reference to the Senator from New Hampshire [Mr. Gallinger], who made the point of no quorum at 8 o'clock p. m., and 56 Senators were present on the That was the eighth time the roll call was menroll call. tioned.

When reference was made to that last night the Senator from New Hampshire suggested that the term had been interpolated, and cross-questioned the Senator from Oklahoma. The Senator from Oklahoma did not remember what the original record was, but remembered what he intended to say. He now finds from the original record that he used the term "roll call" eight times, and it was the eighth time that he referred to the Senator from New Hampshire.

The Senator from Oklahoma finds from the RECORD, folios 200, 201, and 202, that he did not interpolate the words "roll call," as suggested by the Senator from New Hampshire, but that the Senator from New Hampshire did interpolate certain words in referring to the statement made by the Senator from Oklahoma, so as to read as follows:

Mr. Gallinger. The Senator has put into the Record that when I made the point of no quorum there were 65 Senators present. They may have been in the cloakroom or on the street or somewhere else, but they were not at that time present in the Senate Chamber—

The Senator from New Hampshire interpolated the wordsas the Senator would have the country believe

intending to impute to the Senator from Oklahoma a desire to misrepresent the Senator from New Hampshire before the country. He suggested that the Senator from Oklahoma had interpolated words not used, which was not a true suggestion, but he did not suggest that he himself had interpolated words which were not true, as the fact now appears from the Record.

The only possible foundation for the complaint of the Senator from New Hampshire is that on the first occasion, when the Senator from Oklahoma referred to the number of Senators present at these calls, the RECORD shows that he did not, on page 53, column 1, insert the words "roll call," but immediately afterwards explained to the Senator from New Hampshire in the following words:

I said the call of the roll disclosed the presence of 56 Senators.

So the imputation of the Senator that he was being misrepresented is not true, much less that the Senator from Oklahoma desired to misrepresent him. The Record shows it is not true; and yet the Senator has persisted in misrepresenting the Senator from Oklahoma, under the color of the claim that the Senator from Oklahoma had misrepresented him.

Mr. GALLINGER. Mr. President, at best this is a tempest in a teapot; and I hardly think the Senator from Oklahoma, who is so anxious to have the currency bill considered, ought to con-

tinue this controversy.

What does the RECORD show? The first time the Senator from Oklahoma lectured the Senate and told us what our duty was, and that we ought not to have roll calls, although the rules of the Senate give us that liberty, and the roll has been called several times at the request of Senators on the other side during the past few days. This is what the Senator said:

Mr. President at 1.55 p. m. to-day the Senator from Utah [Mr. SUTHERLAND] made the point of no quorum. There were 61 Senators

Mr. LIPPITT. I should like to ask who made that statement? Mr. GALLINGER. The Senator from Oklahoma,

At 2.45 p. m. the Senator from Utah [Mr. SUTHERLAND] again made the point of no quorum. There were 65 Senators present. At 4 o'clock p. m. the Senator from Utah [Mr. Smoot] made the point of no quorum. There were 56 Senators present. The Senator from Utah [Mr. Smoot] again made the point of no quorum at 12 minutes past 5. There were 58 Senators present.

Mr. President, this entire controversy hinges upon that statement made by the Senator from Oklahoma, that those Senators were present. It is true that subsequently he said that he meant to say that it was on a roll call, after he had been called to account for what I considered to be a statement calculated to make a false impression.

The matter is not of great consequence at best, however. The Senator from Oklahoma says I have made statements that were not true. In that respect he has evened it up, because I made the same observation concerning himself; so we will just let it

Mr. OWEN. Mr. President, it is a serious matter when one Senator imputes to another a wrongful purpose and when one Senator tries to misrepresent another Senator. It is a serious matter. It interferes with the parliamentary proprieties of this body. It is a breach of the etiquette of this body. It is contrary to the rules of this body.

After having all this explanation and having had it perfectly wall understood, the Senator interpolated in the RECORD words he did not use, to the effect that the Senator from Oklahoma would have the country believe that these gentlemen were all in their seats at the instant the point of no quorum was made.

I agree that it is a tempest in a teapot in a certain sense, but I do not think the Senator ought to try to put a Member of this body in a false position, much less that he should do so under

the color of imputing that very fault to another.

Mr. GALLINGER. Mr. President, I say again that I think we had better proceed with the currency bill rather than with this personal controversy. The Senator from Oklahoma has not been overcareful in what he has said in debate. I simply repeat that I called attention to an inaccuracy, and it was an inaccuracy. As to my suggestion that the Senator õesired the country to understand that, the Senator has told us three or four times that he is talking to the country and not to the Senate. I have not been talking to the country. As I said last evening, I do not think the country cares a rap about this matter, and I think we bad better let it go.

Mr. OWEN. I agree with the Senator.
The PRESIDING OFFICER. Morning business being closed, the calendar under Rule VIII is in order.

# PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had on the 6th instant approved and signed the act (S. 2318) authorizing the appointment of envoys extraordinary and ministers plenipotentiary to each Paraguay and Uruguay.

## BANKING AND CURRENCY.

Mr. OWEN. I move that the Senate proceed to the consideration of House bill 7837.

The PRESIDING OFFICER. The Senator from Oklahoma moves that the Senate proceed to the consideration of House bill 7837. Is there objection? The Chair hears none.

There being no objection, the Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes

Mr. NELSON. Mr. President, on account of the importance of the subject matter under consideration and many of the in-tricate questions involved. I felt it incumbent upon me to pre-pare a written speech. If I had not been interrupted I prob-ably would have finished the speech on the first day, for I was four hours on my feet; but as you know, Mr. President, both on Monday and yesterday I was subjected to a great deal of interruption It is very embarrassing not to submit to such inter-ruptions. If a man has a written speech and declines to submit to interruptions some critical people may infer that he is not familiar with the subject, and therefore declines to answer questions. Sometimes a man may be considered impolite when he declines to yield for interruptions. In view of these and

other considerations I felt that I could not deny to my colleagues the right to interrupt me and to catechise me.

There is another consideration that I want to call attention to that has actuated me in taking up so much time of the Senate in going over this bill in detail. It is this: I have heard the remark on several occasions from Senators that there is no real difference between the Owen bill and the Hitchcock bill; that they are both about the same. To my mind a statement of that kind conveys the impression that any gentleman who makes such a statement is not familiar with either bill; that he takes his information at second hand; that he really does not know the distinction between the Glass bill and the Owen bill and the Owen bill and the Hitchcock bill; that he is for anything that the spirit of Democracy and the Democratic caucus may prescribe.

I wish to say, before proceeding further, that I shall invite the attention of the Senate this morning to some other provisions of the bill. I have aimed in this discussion to take up the several bills and discuss paragraph by paragraph the important sections. I have omitted some of the minor ones, or those as to which there is not much difference between the three bills, but I have aimed to present to the Senate, as clearly as I could, the difference between the three bills and to point out what I conceive to be the superior merits of the Hitchcock bill.

Yesterday I was on the subject of the issue of the proposed new currency, the Federal reserve notes. Under the Hitchcock bill these notes may be issued on two plans. First, they may be issued dollar for dollar in gold or gold certificates; in other words, the reserve notes may take the place of our present gold certificates.

The other condition is that they may be issued upon shorttime commercial paper of the nature prescribed in the bill, accompanied by a gold reserve of 45 per cent: in other words, the reserve bank on presenting commercial paper of this character equal to the par value of the reserve notes asked for, and having in connection with it a supply of 45 per cent in gold, is entitled to these new reserve notes. But th's gold reserve of 45 per cent may in emergencies be reduced from 45 per cent to 30 per cent. In case of such reduction the reduction is subject to a special tax regulated in proportion to the deficiency of the reserve. Such a tax is to be at the rate of 1 per cent per annum upon every 24 per cent or fraction thereof of reduction below the maximum reserve, but in no event can the gold reserve go below 30 per cent. The object of requiring that of these banks where the reserve falls below 45 per cent is to act as a deterrent on the undue inflation of the currency. I regard the requisite of a gold reserve as important for two reasons. It not only furnishes a fund for redeeming the currency in gold, but there is another important reason. Where a bank is required to keep a large gold reserve it acts as a brake upon the undue infintion of currency. Our old State-bank system, where the banks were required to keep little or no gold reserve, led to endless inflation, to a superabundance of paper currency, practically irredeemable; commerce and trade suffered from it in general, and many people were bankrupted and lost their little all.

In the particulars to which I have referred, Mr. President, the Glass bill differs from both the Hitchcock bill and the Owen bill in allowing the reserve notes to be redeemed in gold or in lawful money justered of in gold alone. As the original Glass bill came before this body it allowed this new currency to be redeemed not only in gold but in lawful money, and the term "lawful money" technically meant not only what are denominated "greenbacks" but silver dollars. I am glad to say that we succeeded in convincing our friends on the other side in the committee that our position in this respect was correct, and that they ultimately concurred with us in the view that we ought to eliminate the term "lawful money" and make these notes absolutely redeemable in gold coin or gold certificates, which are practically the same as gold coin.
Mr. BORAH. Mr. President—

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Idaho?

Mr. NELSON. Yes. Mr. BORAH Do I understand that the redemption is now confined to gold?

Mr. NELSON. The redemption of these new notes, these reserve notes, is confined to gold or gold certificates. It does not refer to national-bank notes.

Mr. BORAH. Certainly not; but I was under the impression that the last report upon the bill provided not for redemption in gold at the Treasury but for redemption in gold or lawful money at the reserve bank.

Mr. NELSON. I think that has been corrected in the last or caucus print; that is, if a man insists on the gold he must go up to Uncle Sam's counter and demand a redemption of his notes. If he is content to take lawful money, he can present them to the bank.

Mr. BORAH. Of course, ultimately, I suppose, it amounts to

gold redemption.

In the final analysis it will, but it weakens Mr. NELSON. the character of the notes. In order to make these notes firstclass commercial paper, they ought absolutely to be redeemable in gold or its equivalent under all conditions and at all times and places.

The Glass bill required, as I said, 33% per cent of lawful money of reserve notes, and the Owen bill requires a reserve of 331 per cent in gold if presented at the Treasury, or gold or

lawful money if presented at the reserve bank.

The Owen bill, as it originally came here when reported by the chairman's section of the committee, provided that these bills should be receivable for all Government dues except customs. That was made an exception. I am glad to say, however, that the caucus corrected that and eliminated the exception.

Both the Glass and the Owen bills differ from the Hitchcock bill in leaving it entirely discretionary with the Federal reserve board to issue currency to a reserve bank. The Hitchcock bill provides that the reserve bank is entitled to reserve notes on complying with the conditions of the law as to gold reserves and as to collateral security; in other words, if a reserve bank has a gold reserve of 45 per cent and tenders eligible commercial paper equal to the par value of the notes required, it is absolutely, upon such notes and such collateral security, entitled to circulation. Under the Owen bill it is discretionary with the reserve board whether it will allow such currency to issue to a reserve bank. Under the Hitchcock bill, the reserve bank, if it has eligible commercial paper equal to the par value of the currency at par and has the 45 per cent gold reserve, is entitled to that currency.

As I said a moment ago, the requirement of this new reserve serves a double purpose. Not only does it fortify the notes and make them absolutely safe, but, in the next place, it is a deterrent and a brake upon undue inflation; it prevents an excess of such paper circulation. We find that principle adopted in France, in Germany, and in Great Britain. The Bank of England can issue notes representing the permanent Government debt, sixteen or eighteen million pounds. I forget the exact amount, but it is something like that,

Mr. SHAFROTH. Eighteen million pounds is right.

Mr. NELSON. Eighteen million pounds. All issues of notes beyond that by the Bank of England are pound for pound in

Under the Owen bill, even allowing the bank, as we propose to do, to issue notes, gold for gold, dollar for dollar, it would be discretionary with the reserve board.

Mr. NORRIS. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Nebraska?

Mr. NELSON. I do.

Mr. NORRIS. I should like to inquire of the Senator what particular object can be accomplished by issuing these notes with the gold reserve of 100 per cent. Would it not be just the

same in reality as a gold certificate?

Mr. NELSON. In effect it would be, but the gold would be in the banks, and it would be the property of the banks instead of being in the Treasury. It is the property of the holders of gold certificates scattered all over creation. Some of the holders of gold certificates may be in Europe. The gold in the Treasury is their gold, whereas if the gold certificate is presented to the bank and the bank wishes currency for it, the bank must go to the Treasury, draw the gold, and keep it in its own vaults as a reserve.

Mr. NORRIS. From what the Senator has said in regard to the owner of the gold certificates, if it be the rule that a man could take a hundred cents on the dollar, would he not in reality

be the owner of it?

Mr. NELSON. No; he would not be the owner of it in the sense that he would be of a gold certificate. He would have those same notes, and their character as legal obligations and promises to pay would be identical with the other notes.

Mr. NORRIS. In one case he would have gold certificates to

go and get the gold with.

Mr. NELSON. To go and draw the gold. Mr. NORRIS. Yes; and in the other case he would have the Federal reserve notes to back up by gold, which he could also get by presenting Federal reserve notes.

Mr. NELSON. And that he can do in the other case as to notes based on commercial paper. They are exactly on a par in that respect.

Mr. NORRIS. But the explanation I want to get from the

Senator is what good would come from it?

Mr. NELSON. The good of it is that the bank secures that store of gold reserve; it has an opportunity to get it in the vaults of the bank and issue its notes against it, while in the other case, as long as the gold reserve is outstanding, you do not know where those certificates may be and the Treasury is

only a custodian and keeper of the gold.

But imagine, and I want to be very frank with Senators, that this is not so much a practical question as the other feature of the note-issuing provision. I imagine that most of the notes will be issued upon commercial paper with the 45 per cent gold reserve or, as it is in the other bill, 43\frac{1}{2} per cent gold reserve—whichever provision is finally adopted—and the banks are not likely to issue this dollar-for-dollar currency to any great extent, except for the purpose of replenishing their gold

supply.

There is another small matter to which I will call the attention of the Senate. The Owen bill provides for the issue of reserve notes in denominations of \$1, \$2, \$5, \$10, \$20, \$50, and \$100. In the Hitchcock bill we have eliminated the ones and twos. We do not believe that these reserve notes ought to be smaller than \$5. There are several reasons for our belief. These notes circulate from hand to hand, and we have a large amount of silver currency circulating in the shape of silver certificates. I think our silver dollars and our silver certificates can well occupy the field of the \$1 and \$2 notes and that the reserve notes should not be of a smaller denomination than \$5.

I am glad to see the Senator from Mississippi [Mr. WILLIAMS] in front of me listening to what I am saying, for I look at the situation just as it is. He and his coadjutors will finally fix up the bill as it will become a law, and I hope I may be able to convert him to that extent, so that he will impress the ideas that I am trying to impress upon him upon his Democratic

associates.

In reference to the so-called clearing-house or exchange provisions in the bills, the Owen bill and the Hitchcock bill are identical. The original Glass bill was very defective in that respect, though in one sense it might be good for the country, at large. It would be a great blessing to provide a place for the clearing of checks and drafts without expense to the public at large, but it would be a terrible blow to the country banks. Practically, as it appeared from the evidence presented to our committee, it would deprive the smaller country banks of a large proportion of their net income and net resources by wiping out the exchange business and preventing them from making any charge for selling drafts or making collections. From the evidence before the committee it appeared that some of these banks, most of them, I think, have been reasonable and fair, but some of them have been guilty of making unreasonable and undue charges. That matter we have cured both in the Owen bill and in the Hitchcock bill. We permit these banks to make reasonable collection and exchange charges, but we allow the reserve board to regulate it so that there can not be any undue or excessive charges. I think it is a very wholesome provision. By means of it we do not deprive the small local banks of a reasonable amount of revenue, and at the same time we have a tribunal that has the opportunity to check or restrain any undue exactions of the banks.

Section 18 of the oill simply repeals the provision of the law requiring a national bank to deposit Government bonds before it can do business. Under the existing law national banks, regardless of whether or not they take out circulation, are obliged to deposit \$30,000 and not less than one-third of their capital with the Treasury Department in United States bonds. I have no doubt the provision was originally inserted in the law for the purpose of securing a market for Government bonds at that time, in 1864, but the provision is practically obsolete and should be repealed. These bonds are not the basis of circulation, as are the bonds a bank must deposit as a prerequisite

to secure a charter as a national bank.

I now come to a question which I regard as one of the most important in the bill, made so because of the changes in the Owen bill by the Democratic conference. I refer to the pro-

vision for the refunding of the 2 per cent bonds.

The Hitchcock bill, section 19, provides that the reserve banks shall each year purchase 2 per cent bonds of the United States at par and accrued interest equal in amount to not more than 50 per cent of their capital. The reserve banks purchasing such bonds may deposit them with the reserve agent—that is, the reserve agent who is an officer of the directors of the

regional banks-as security for the circulation of Federal reserve notes, or they may exchange the bonds at the Treasury Department for one-year Treasury gold notes bearing 3 per cent interest. In case such exchange is effected the banks are required, at the option of the Government, to renew the oneyear gold notes, year by year, for a period of 20 years; that is, instead of commercial paper, those one-year gold notes may be presented as a basis of circulation, or a bank requiring circulation may present partly commercial paper and partly such oneyear gold notes to secure circulation. Those one-year gold notes may also be used as security for reserve-note circulation, and are also available as an investment of the bank for the employment of its idle funds, and to aid them in protecting the gold supply.

It is conceded that those one-year 3 per cent gold bonds can be readily sold and gold procured on them, and that in that way they will be a means of maintaining and keeping up the gold reserve. In addition to that, they will be valuable to the reserve banks in case they have idle funds. In case they have funds that are not called for by the member banks they can invest them in these 3 per cent bonds and derive the interest that inures from them as an addition to their income and re-National banks that sell their 2 per cent bonds in the manner indicated must retire that portion of their note circulation for which the bonds were given as security. These oneyear 3 per cent gold notes are to be immune from all kinds of taxes. The Glass bill provides for the exchange of the 2 per cent bonds for 20-year 3 per cent bonds at the rate of 5 per cent year and the retirement of national-bank-note circulation in the same proportion. In other words, the Glass bill provides that 5 per cent a year of these 2 per cent bonds now outstanding may be converted into 20-year 3 per cent bonds. Under the Owen bill they can be converted into one-year 3 per cent gold notes, which the banks are required to renew from year to year if necessary. One advantage of the one-year notes is that the Government at any time it has a surplus revenue can redeem those notes while in the other case, if we issued a new 20year bond, the Government could not redeem those bonds in any other way than by going into the open market and buying them.

Mr. WEEKS. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Massachusetts?

Mr. NELSON. I yield. Mr. WEEKS. May I suggest to the Senator another advantage which the proposition before the Senate has over the Glass bill? In the Glass bill the earnings of the reserve banks were to be divided between the Government and the banks after paying a stipu'ated rate of interest; as I recall it, 40 per cent of the excess to be added to the rate of interest to be paid the banks and 60 per cent of the earnings going to the Government, Refunding these bonds, as is proposed in the Glass bill, imposes an additional rate of interest of 1 per cent, so that there would have been in the end \$750.000.000 of 2 per cent bonds, as there are now, refunded into 3 per cent bonds, costing seven and a half million dollars more in interest, without any recompense in any way, of which seven and a half million dollars the Government would receive 60 per cent of the profits and the holders of the stock of the bank the other 40 per cent. As a net result it would cost the Government \$3.000,000 a year more than it does now to carry the same amount of debt, and the indebtedness would not be in such shape that it could be used for any purpose, like maintaining our gold supply. Is not that a correct statement?

Mr. NELSON. It certainly is exactly correct, and I am very

glad that the Senator has made it.

Mr. WEEKS. If we have not done anything else in the delay which has taken place in the hearings and discussion of the bill, we have certainly saved the Government \$3,000,000 a year and have furnished the banks with a security which will enable them to maintain the gold supply.

Mr. NELSON. I now come. Mr. President, to compare the

Owen bill with the Hitchcock bill in this respect, and to point out and demonstrate that the Owen bill by its provisions perpetuates and continues the present inelastic national-bank-note

One of the chief objections sought to be attained by this legislation was to escape from the effects, often in the past proven to be disastrous, of an inelastic currency based upon bond circulation. There are two provisions in the Owen bill which, beyond any doubt, will lead to a continuation of the present bond secured currency. So that instead of escaping from that, elimi nating it, and relying on the new currency which we are providing for in this bill, we are left at the mercy of the old currency.

The provisions that bear on this subject and make it clear are, first, paragraph 8 on page 14 of the last print of the Owen bili,

the bill, as I understand, which has been passed upon by the Democratic conference. It is one of the provisions that relate to the power of the reserve banks. I will quote the provision in

Eighth. Upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by existing law relating to national banas, to re-rive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, such notes to be issued under the same conditions and provisions of law which relate to the issue of circulating notes of national banks secured by bonds of the United States bearing the circulating registrates. privilege.

Can any Senator maintain that that provides for any other than the same kind of notes that we now have under our national-bank system? The paragraph which I have just read gives the reserve banks the power to issue the same kind of currency based upon Government bonds as our national banks can issue at this time.

In this connection, I propose to call the attention of the Senate to the refunding provision of the Owen bill, and to show how that bill further fortifies and makes this contention absolutely sure. I ask Senators to turn to page 60 of the last print of the Owen bill, and, at the risk of some delay, I will quote the whole paragraph to the Senate in order that they may what it provides. I rend from the last print of the Owen bill, which I may call for brevity the caucus print:

SEC. 18. Any member bank desiring to retire the whole or any part-

A member bank is a national bank-

A member bank is a untional bank—

Any member bank desiring to retire the whole or any part of its circulating notes may file with the Treasurer of the United States an application to sell for its account, at par and interest, United States bonds securing circulation to be retired.

The Treasurer shall, at the end of each quarterly period, furnish the Federal reserve board with a list of such applications, and the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks whose applications have been filed with the Treasurer at least 10 days before the end of any quarterly period at which the Federal reserve board may direct the purchase to be made. Upon notice from the Treasurer of the amount of bonds so sold for its account, each member bank shall duly assign and transfer, in writing, such bonds—

That is, the outstanding bonds-

to the Federal reserve bank purch sing the same, and such Federal reserve bank shall thereupon deposit lawful money with the Treasurer of the United States for the purchase price of such bonds, and the Treasurer shall pay to the member bank selling such bonds any balance due after deducting a sufficient sum to redeem its outstanding notes secured by such bonds, which notes shall be canceled and permanently retired when redeemed.

Here I come to "the milk in the coconut":

The Federal reserve banks purchasing such bonds shall be required to take out an amount of c'rculating notes equal to the amount of national-bank notes outstanding against such bonds.

Now, listen:

Now, listen:

Upon the deposit with the Treasurer of the United States bonds so purchased, or any bonds with the circulating privilege acquired under section 4 of this act, any Federal reserve bank making such deposit in the manner provided by existing law shall be entitled to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited. Such notes shall be the obligations of the Federal reserve bank procuring same, and shall be in form prescribed by the Secretary of the Treasury—

Listen to this, Senators-

and to the same tenor and effect as national-bank notes now provided by law. They shall be issued under the same terms and conditions as national-bank notes.

Can anything be plainer than that? This section provides that the reserve banks may buy up the Government bonds which have the circulation privilege and put the money in the Treasury, whereupon the Treasury transmits it to the bondholders, and then the reserve banks deposit these bonds again with the Comptroller of the Currency and get exactly the same kind of bond-secured currency that we have now. In that way, under this provision of the bill, you will be perpetuating our present system of bond-secured currency; you will continue under the provisions of this bill, which I have quoted, to maintain all these notes in circulation based upon Government bonds instead of upon commercial paper.

What has been the cause of the lack of elasticity in the national-bank notes? Why have they been inelastic? Why have they been too rigid to meet the commercial needs of the country? Why have It is because they have been based on Government bonds and would only ebb and flow in volume as the banks saw fit to buy those Government bonds. That, as I supposed, was the system which we were endeavoring to get away from by this legislation.

There are two important points that we seek to accomplish, or should seek to accomplish, by this legislation. One is to gather up, concentrate, and utilize the bank reserves in a better and more effective manner than has been the case up to this date; the other is to provide the country with an elastic currency, a currency that will be regulated, not by the purchase of bonds but by the commerce and trade of the country, based on the commercial paper that is used as an incident to that trade and commerce.

It is only in that way that we can secure an elastic currency; it is only in that way that the countries of the Old World, where they have better banking systems than we, have succeeded in securing an elastic currency that responds to the commercial wants of the country. Yet, while that is avowedly the purpose, or ought to be the purpose, of this legislation, in cold blood, with malice prepense, the Owen bill proposes to perpetuate the very system that we are trying to get away from by this legislation.

Mr. SHAFROTH. Mr. President, does not the Senator recognize the fact that the United States notes or greenbacks are just as inelastic as the national-bank notes, and is the Senator in favor of retiring the greenbacks?

Mr. NELSON. Oh, the Senator does not mean what he says. Mr. SHAFROTH. Yes, sir.

Mr. NELSON. I will tell you why.

Mr. SHAFROTH. They are a fixed currency.

Mr. NELSON. I will tell you why; and I say it in a spirit of humility. There is no comparison between the two, for the reason that we have a law on the statute books which prevents the amount of greenbacks from being increased. That circulation can not be extended. Heretofore we had more greenbacks outstanding than we have now; and some years ago-I do not recall when-we had at the head of the Treasury Department Secretaries who were trying to eliminate the greenbacks and get them out of circulation. To prevent that Congress passed a law-I can not recall the year-

Mr. SHAFROTH. In 1878.

Mr. NELSON. Yes; Congress passed a law prohibiting the further retirement of any notes. You can not call that an elastic currency, for it has remained at the volume of \$346,-000,000 for a great many years. Until we change the legislation of the country that will continue to be its volume; it can be neither more nor less. So it has not even the elasticity of national-bank-note circulation, which does have some slight elasticity.

We know that during the panic of 1907, while the banks as a rule were averse to purchasing bonds and extending their circulation, under the stress of the conditions then prevailing the banks did take out considerable circulation. If I recall the facts—and I think I am correct—during the pendency of that panic, and until the banks fully resumed, our nationalbank-note circulation increased to the extent of about \$50,000,-000. I can not give the figures exactly. So in the matter of elasticity there is no comparison between greenbacks and national-bank notes.

Mr. SHAFROTH. That is, the national-bank notes are a

little more elastic than the greenbacks?

Mr. NELSON. The greenbacks are not elastic at all.

Mr. SHAFROTH. They are not elastic at all, but the national-bank notes are a little more elastic than the greenbacks. If objection be made to the national-bank notes on the ground that they are inelastic, why is not that a much greater reason for retiring the greenbacks, because they are less elastic than the national-bank notes?

Mr. NELSON. There are a great many people who think they ought to be retired; and, as a matter of sound banking and currency principles, I think they could well be retired. I think we ought to have one uniform currency, such currency as is prescribed in this bill. I will take the Senator a little bit into my confidence in this matter, however. While I admit that that would be most sound, yet we old soldiers who fought in the War of the Rebellion, who carried muskets and rifles on our shoulders and greenbacks in our pockets, sustaining the Government's credit by carrying its greenbacks and sustaining the Government itself by carrying its muskets and rifles on our shoulders, have a kind of love for the dear old greenback. [Laughter.] While they now have new rifles, new guns, Krag-Jörgensens, and other improved firearms, instead of the old Enfield and Springfield rifles, we say nothing about that, but we old soldiers hate to let go of the dear old greenback. [Laughter.]

Mr. SHAFROTH. I agree with the Senator.

Mr. NELSON. The capitalists of the country may say that it was unjust and unfair to compel the people to take that kind of currency, which was then at such a great discount. I never heard a soldier at pay day object to taking greenbacks, and if the soldiers did not object, why should these moneybags object? They did not encounter the dangers or incur the risks of war, as did the boys who wore the blue. This, however, is foreign to the question, and I am sorry to have taken up the time of the Senate with it.

I will quote again the last part of the paragraph I have been discussing.

Such notes

That is, the notes that are to be issued upon these 2 per cent Government bonds

shall be the obligations of the Federal reserve bank procuring same, and shall be in form prescribed by the Secretary of the Treasury, and to the same tenor and effect as national-bank notes now provided by law. They shall be issued under the same terms and conditions as national-bank notes.

So, Mr. President, it seems to me that anyone who reads this refunding provision and, in connection with it, paragraph 8 of the powers given to the reserve banks, must inevitably come to the conclusion that, if this measure is enacted into law, it will perpetuate and maintain our present rigid bond-secured currency.

I desire now to call attention to another provision. I am reading from the Owen bill:

United States bonds bought by a Federal reserve bank against which there are no outstanding national-bank notes may be exchanged at the Treasury for one-year gold notes bearing 3 per cent interest. In case of such exchange for one-year notes the reserve bank shall be bound to pay such notes and to receive in payment thereof new 3 per cent one-year Treasury gold notes year by year for the period of 20 years.

That limits the purchase of 2 per cent bonds, and the substitution of 3 per cent one-year gold notes for them, to bonds that are not the basis of national bank note circulation. But under the funding provision of section 18 of the Owen bill, whenever the 2 per cent bonds on which circulation is now issued are purchased by the reserve banks they are to issue similar notes based on the bonds purchased, so that practically you are simply changing about. Instead of the national banks, as now, hav-ing outstanding seven hundred and fifty-odd millions of national-bank notes based on Government bonds, you would have these reserve banks—assuming that they bought up all the bonds, as they can do—having outstanding the same volume of notes based upon the same class of security, the Government bonds. So by this legislation you are not getting away from the present system.

As I have said several times, I regard it as of the utmost importance that by this legislation we shall escape from the rigid character of our present currency. We can only escape from it by substituting, as rapidly as we can and with as little friction as possible, the new system provided for in this bill and

the new class of notes provided for in it.

Mr. SIMMONS. Mr. President—

The VICE PRESIDENT. Does the Senator from Minnesota

yield to the Senator from North Carolina?

Mr. NELSON. Certainly.

Mr. SIMMONS. I desire to ask the Senator a question for information, because I confess I am a little bit confused about this matter.

At the present time the national banks which hold these Government bonds have, in a large measure, discretion as to the amount of currency they will take out upon them, have they not?

Mr. NELSON. I can not exactly answer the Senator's question. I will say that any bank can buy Government bonds, but if a bank wants to issue national-bank notes it must deposit Government bonds with the Comptroller of the Currency, and it then gets circulation, as at present. It used to be that they got circulation only at the rate of 90 per cent, but as a result of recent legislation they now get dollar for dollar.

Mr. SIMMONS. The Senator does not catch my point. understand that now a national bank can get 100 cents on the dollar on its bonds.

Mr. NELSON. Yes, Mr. SIMMONS. The question I meant to address to the Senator-probably I did not express myself with clearnesswas whether the national banks holding these Government bonds did not have a discretion as to whether they would take out anything in the way of notes, or as to the amount of notes they would apply for upon those bonds.

Mr. NELSON. There is a discretion as to the circulation

they will take out, of course.

Mr. SIMMONS. Yes; a discretion as to the circulation.

Mr. NELSON. But for whatever circulation they do take

out they must deposit bonds. Yes. The discretion is absolute?

Mr. SIMMONS. Yes, The discretion is absolute. NELSON. Oh, it is not mandatory now.

Mr. SIMMONS. The discretion is absolute with the national

Mr. NELSON. Yes; as to the amount. Mr. SIMMONS. The Government has no power to control that discretion?

Mr. NELSON. No.

Mr. SIMMONS. The Government can not say to a national bank, You ought to increase your circulation on these bonds?

Mr. NELSON. No; it can not do that. Mr. SIMMONS. Under the system proposed in the Owen bill, will not the Government come into a power which will permit it in a measure to control the amount of circulation based upon Government bonds?

Mr. NELSON. Not under this provision. Mr. SIMMONS. Suppose the reserve banks of the country, we will say in the course of a dozen years, should come into possession of all of the 2 per cent bonds?

Mr. NELSON. By buying them?

Mr. SIMMONS. By buying them and having them in their vaults. By reason of the Government's control over these banks, the fact that three directors of the banks are appointed by the Government, the fact that three other directors of the banks are not stockholders but are representatives of commercial interests in the country, and the further fact that the Government appoints the reserve board, could not the Government, in practical effect, say to these reserve banks, You shall increase your circulating notes based upon Government bonds?

Mr. NELSON. No. The bill defines the power.

Mr. SIMMONS. Technically speaking, it would not have the power, but in practical effect would it not have that power?

Mr. NELSON. It has not. Mr. SIMMONS. What I mean to ask is, by means of the Government's control through its reserve board and through its representation upon the directorate of the banks, would it not be able to practically control the amount of bank notes based on Government bonds?

Mr. NELSON. It could not control it in the respect that I refer to; absolutely not. I will read the provision again.

Mr. SIMMONS. I think I undertand the provision which the Senator has read.

Mr. SHAFROTH. If the Senator will yield to me-

Mr. NELSON. Let me first answer the Senator from North

Mr. BRANDEGEE. Will the Senator state whether the print

Mr. BRANDEGED. Will the senator state whether the print from which he is reading is that of December 1?

Mr. NELSON. Mine is the print of December 1. I have mine marked "Third Owen bill." It is the bill that ran the gantlet of the Democratic conference. The first part of the section provides for application by the national banks.

Mr. CRAWFORD. From what section is the Senator read-

Mr. NELSON. Section 18, page 60. It provides how national banks can get rid of these bonds, as they are anxious to do, because they are at a discount. It provides that they can sell them. I will not read the entire paragraph.

The Federal reserve banks purchasing such bonds-

That is, these 2 per cent bonds, for instance-

shall be required to take out an amount of circulating notes equal to the amount of national-bank notes outstanding against such bonds.

That is mandatory. There is no regulating power here at Washington. Neither the reserve board nor the directors of the regional banks can override that clear mandate of the law.

I now yield to the Senator from Colorado.

Mr. SHAFROTH. The object of that is to overcome the provision of the Hitchcock bill that \$50,000,000 of this nationalbank currency shall be retired, without providing a substitute currency for it, unless that substitute currency arises from the issuance of currency upon paper of 30, 60, 90, or 120 days, which may be deposited for the purpose of getting currency. That was the object of that provision, so as to prevent the contraction of the currency and to keep the currency at its present volume.

Mr. BRADY. Mr. President-

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Idaho?

Mr. NELSON. I yield to the Senator. Mr. BRADY. Is not the authorization of this additional currency discretionary with the board?

Mr. NELSON. Not the currency that we refer to here.

Mr. NELSON.

Mr. BRADY. It says:

The Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks whose applications have been filed with the Treasurer at least 10 days before the end of any quarterly period at which the Federal reserve board may direct the purchase to be made.

My understanding is that the Federal reserve board is not compelled to do it.

Mr. NELSON. They can direct the purchase of the bonds, but if they are once purchased circulation must be taken out.

Mr. BRADY. After they are purchased?

Mr. NELSON. Yes.

Mr. BRADY. The circulation must be taken out? Mr. NELSON. Yes. If the Senator will look at the foot of the page, commencing on line 24, he will see the provision.

Mr. BRADY. But it is to be left to the judgment of the reserve board as to whether or not the reserve bank shall purchase these bonds? Is that correct?

Mr. NELSON. No; not absolutely. The first question is as whether the bonds shall be offered for sale. I read at the top of the page:

Any member bank desiring-

Of course these bonds can not be sold unless the banks that hold them are willing to sell them.

Mr. BRADY. Section 18, commencing with the first part of the section, says:

Any member bank desiring to retire the whole or any part of its circulating notes may file with the Treasurer of the United States an application to sell for its account, at par and interest, United States bonds securing circulation to be retired.

Mr. NELSON. Yes. That is, the first demand must come from the national banks.

Mr. BRADY. But they are not compelled to make that demand?

Mr. NELSON. No.
Mr. BRADY. They may do it?
Mr. NELSON. They may do it. Now, these bonds are not

due in any particular year.

Mr. BRADY. And they may file applications stating that they desire to sell the bonds?

Mr. NELSON. Yes. Mr. BRADY. Then the Federal reserve board has the power to require some bank to take the bonds and issue currency for them. Is that correct?

Mr. NELSON. It has the power, which I will read:

The Treasurer shall, at the end of each quarterly period, furnish the Federal reserve board with a list of such applications—

That is, applications from the national banks to sell those

And the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks.

That is, compel the reserve banks to buy those bonds.

Mr. BRADY. That is the very question I was asking the Senator.

Mr. NELSON. It can compel them to do that; but before that can be done there must be first an offer, a desire, on the part of the national banks to sell the bonds.

Mr. BRADY. I understand that quite well.
Mr. NELSON. The Senator can see that now, when the 2 per cent bonds are at a discount and are likely to remain at a discount, they will all be ready to sell.

Mr. BRADY. That is quite true; but I am trying to have the Senator make as clear as possible the real authority of the re-

serve board.

Mr. NELSON. The only authority of the reserve board is in reference to the requirement to purchase the bonds. If the bonds are once purchased, circulation must be issued on them. The Senator can see that as long as the national banks do not apply to sell the bonds on which circulation is based those notes remain in circulation. Let me call the Senator's attention to the first paragraph:

SEC. 18. Any member bank desiring to retire the whole or any part of its circulating notes may file with the Treasurer of the United States an application to sell for its account, at par and interest, United States bonds securing circulation to be retired.

That comes from the national banks that have their notes outstanding. They want to get rid of them; they want the notes

redeemed, so that they can sell the bonds. If they make such an application, it is in the power of the Federal reserve board to require the Federal reserve bank to buy those bonds, but if the Federal reserve board does not buy them, the notes are outstanding and the bonds are there. They are not due; they can not be redeemed.

Mr. BRADY. But, as I understand it, the Federal reserve board do not buy the bonds. They simply take the application of the purchaser and require some particular reserve bank to buy the bonds.

Mr. NELSON. It is the national banks that are trying to sell the bonds, and it is one of these new regional reserve banks that buys them.

Mr. BRADY. That is quite clear, but there is one point I wish the Senator would make plain. I want to find out what happens in case the Federal reserve board decides that they will not require the Federal reserve bank to buy the bonds.

Mr. NELSON. Then those bonds will remain in the Treasury Department as a basis for circulation. They will be left with the national bank note circulation. It is only the bonds

the national-bank note circulation. It is only the bonds deposited in the Treasury that are a basis of circulation. If

the Senator will read the first four lines here, he will see the

Mr. BRADY. What I was trying to have clearly understood is that it is within the discretion of the Federal reserve board to compel the Federal reserve bank to buy the bonds.

Mr. NELSON. They can order the Federal reserve bank

Mr. BRADY. And they can refrain from ordering the bank

to buy the bonds under this proposal. Mr. NELSON. Yes; but if they do not buy them the notes are outstanding; the bonds are in the Treasury, and the bank

notes that are issued on them are outstanding.

Mr. BRADY. That is the point I wanted to have made clear. Mr. NELSON. So, you see, the system really amounts to this, to make it plain to the Senator: A national bank in the Senator's home town has \$50.000 of national-bank notes outstanding based on Government bonds filed in the Treasury. It comes to the reserve board or comes to the Treasury of the United States and says, "I want to retire these notes that I have outstanding; I want to sell the bonds on which I have obtained this circu-As your bank desires to sell these bonds for the purpose of redeeming or withdrawing its national-bank note circulation, the reserve board may order the reserve bank to purchase those bonds; but if it purchases the bonds it must issue circulation notes upon those bonds, just the same kind of notes as the notes that were based on the bonds when the national bank offered to sell them.

Mr. BRADY. That is my understanding.
Mr. NELSON. I do not know how I can make it any plainer.
Mr. BRADY. The only question is as to the authority of the Federal reserve board to say to my home bank, when it makes application to sell these bonds—
Mr. NELSON. Those bonds on which there is outstanding

circulation.

Mr. BRADY. On which there is outstanding circulation. The Federal reserve board, as I understand it, simply makes a list of the bonds to be sold. The Federal reserve board does not purchase the bonds.

Mr. NELSON. Oh, no. Mr. BRADY. My bank would simply make an application to it to sell the bonds.

Mr. NELSON. And to redeem its circulation.
Mr. BRADY. That application is filed with the Federal reserve board. Then the Federal reserve board may in its discretion require the Federal reserve bank to purchase the bonds.

Mr. NELSON. Yes.
Mr. BRADY. What I want to find out is what would be the position of my home bank in case the Federal reserve board said we will not require the Federal reserve bank to buy those

Mr. NELSON. If it made no application to sell the bonds or redeem the currency, there would be nothing for the reserve board or the bank to act upon.

Mr. BRADY. But that is not the point. My bank would want to sell its circulating notes. It would make an application to the Federal reserve board to sell its bonds. It may desire to do it. There is nothing in this proposed law to compel the Federal reserve board to relieve the situation by buying those bonds. It may do it or it may not do it. It is entirely discretionary with the board.

Mr. NELSON. I see what the Senator means. cretionary. But the point the Senator has referred to has no bearing on the main question in the case, and that is the

question relating to our circulating medium.

Mr. BRADY. I understand that. Mr. NELSON. The Senator can see that it is only swapping the national-bank notes for these new notes based upon the same kind of bonds.

Mr. BRADY. There is no question about that. oint I was discussing was the actual transfer. If I understand the Senator's explanation, and I think it is very plain, if any national bank desires to sell its bonds, it files its application, and in case the Federal reserve board desires to buy the bonds they can require the Federal reserve bank to buy those bonds; but if the Federal reserve board says, "We will not require the Federal reserve bank to buy your bonds," the bank offering the bonds could not compel the Federal reserve board to take

Mr. NELSON. Then your bank would have to hold its bonds, and its national-bank notes would be outstanding.

Mr. BRADY. That is the point I desired to have made clear. Mr. NELSON. It would be just where it was before it made the application.

Mr. BRADY. And this proposed law would be of no benefit to that bank.

Mr. NELSON. Not for the purpose of selling its bonds. Mr. BRANDEGEE. Could not the bank which desired to

retire its circulating notes which were secured by bonds sell

the bonds in any other market?

Mr. NELSON. Certainly, they could sell them in the open market; and they could go with their legal-tender money to the Treasury and say, "We want to redeem our circulating notes," and if they were redeemed the national bank would get back its notes

Mr. BRANDEGEE. And the national bank could hold its bonds, having taken up the notes.

Mr. NELSON. It could hold them.

Mr. BRANDEGEE. It could hold them if it wanted to do so?

Mr. NELSON. Certainly.
Mr. SIMMONS. If the Senator will pardon me, he is discussing the question whether the system proposed in the Owen bill, with reference to bank notes based on Government bonds, will be more or less elastic than under the present system?

Mr. NELSON. I will say that it is simply a perpetuation of the same system.

Mr. SIMMONS. That is what I understand the Senator to

claim. Mr. NELSON. It is neither worse nor better. All the vices

and virtues and imperfections of the present system are perpetuated.

Mr. SIMMONS I understand that to be the contention of the Senator. The Senator is contending that under the Owen bill, with reference to bank circulation based on bonds, the system will be in effect the same as at present, so far as elasticity is concerned.

Mr. NELSON. Certainly.
Mr. SIMMONS. Now let me ask the Senator—
Mr. NELSON. It will be just like this, to make the state-

Mr. SIMMONS. I understand the Senator; but he does not understand me, I fear, and I am trying to have him get my viewpoint. I am a little bit confused about it and I am trying to get light and information from the honorable Senator who is a member on the committee and has evidently given close study to the subject. As I understand it, if a national bank desires to sell its 2 per cent Government bonds it notifies the Treasury Department of that purpose.

Mr. NELSON. They must desire to sell them for the pur-

pose of taking up circulation.

Mr. SIMMONS. Yes. The bank notifies the Treasury Department of its desire to sell its bonds and retire its notes. Treasury Department in that case requires the reserve banks to purchase those bonds and with the proceeds take up the outstandings, and requires the purchasing bank to redeposit the bonds and issues to them a like amount of reserve notes.

Mr. NELSON. The Federal reserve board is the authority that must require the banks to buy those bonds, but there the power of the reserve board ends. They can require the banks to purchase the bonds, and after the bonds are purchased the issuing of the same kind of currency upon them is mandatory.

Mr. SIMMONS. If under that authority the reserve bank does purchase these bonds it is compelled to take out notes

against those bonds again, is it not?

Mr. NELSON. Yes, sir; exactly the same kind of currency. Mr. SIMMONS. If a national bank should sell its bonds to private citizen, he would not be required to take out circula-

a private citizen, he would not be required to take out circulation against those bonds, would he?

Mr. NELSON. Not an outsider.

Mr. SIMMONS. Then we have this condition—

Mr. NELSON. Allow me just a word here. You could not sell those bonds that were in the Treasury. They are there until the notes for which they are security are redeemed.

Mr. SIMMONS. But if I purchased those bonds from the bank. I could go to the Treasury Department and I could reclaim.

bank, I could go to the Treasury Department and I could reclaim them by paying off the notes issued on them. Mr. NELSON. No; you could not.

Mr. SIMMONS. Could not the bank do it? I am putting myself in the place of the bank.

Mr. NELSON. You would have to redeem those circulation notes.

Mr. SIMMONS. Exactly. I would have to redeem those notes and I would own the bonds.

Mr. NELSON. That is, the bank that deposited them would have them. The Treasury would deal with the bank.

Mr. SIMMONS. Then the notes would be canceled and pass out of circulation. But if these bonds are purchased by a central reserve bank, under the section of the bill read by the Senator the circulation based upon them would be retired, but in their place other notes of like amount would be issued to the purchasing bank, and currency would be, in effect, neither reduced nor

Mr. NELSON. Exactly the same kind of notes.

Mr. SIMMONS. So the Government in this way prevents the currency covered by these bonds from being withdrawn from circulation. If it was left to individual initiative and control, the holder of those bonds would, by paying off these notes, retire that much circulation without being required to substitute anything in their place.

Mr. NELSON. That can be done now. Any national bank

can retire its notes.

We SIMMONS. That can be done now by holders of the \$50,000,000 of bonds, which you provide may be retired every

Mr. NELSON. That is entirely different. The Senator is traveling outside of the line. I say that can be done by the national banks now. If a national bank has \$50,000 in circulation, based on Government bonds, the national bank can go there and redeem that circulation.

Mr. SIMMONS. Exactly.

Mr. NELSON. It can take currency there and redeem the notes and get back the bonds.

Mr. SIMMONS. Exactly. Mr. NELSON. It is at the option of every national bank to withdraw its circulation. If you go through the country you will find that the smaller banks, the country banks, as a rule, have circulation up to the amount of their capital. The national banks can not have more than the amount of their capital. The large city banks in New York and other places have only a limited amount, only a part of their national-bank notes outstanding in proportion.

Mr. SIMMONS. That is exactly as I understand it. At present the national banks can at will retire the circulation against their bonds now deposited in the United States Treasury.

Mr. NELSON. They can redeem those bonds at any time. Mr. SIMMONS. But if those bonds are purchased by a re-

serve bank under the authority the Senator just read in the Owen bill, then that reserve bank can not retire that circulation.

Mr. NELSON. It must take out bonds. Mr. SIMMONS. Therefore, this provision does provide for the mandatory issue of notes against that amount of Govern-

Mr. NELSON. That is what we have to-day. We have exactly the same system in the currency we have now that we are

supposed to be trying to get away from.

Mr. WEEKS. Mr. President—

The VICE PRESIDENT. Does the Senator from Minnesota yield to the Senator from Massachusetts?

Mr. NELSON. I will yield, but I do not mean to take the Senator from North Carolina off the floor.

Mr. SIMMONS. I will yield to the Senator.
Mr. WEEKS. I wanted to call the attention of the Senator from North Carolina to a qualified error that he made in the statement which he has just submitted, relating to national banks retiring circulation. He said, if I understood him, that they could retire it at will. When the national-bank act was passed, and for 40 years of its existence, the law limited the retirement to \$3,000.000 a month, the purpose being

Mr. SIMMONS. The Senator will understand that I meant

within the limitation of the law.

Mr. WEEKS. I will just complete my statement by saying that five or six years ago that limitation was increased from \$3,000,000 a month to \$9,000,000 a month, so that if no circulation were taken out and the national banks retired all they could every month for a year they would retire only \$108,000,000 a year, or about one-seventh of the outstanding national-bank note circulation.

Mr. BRANDEGEE. That national-bank circulation is the

bond-secured circulation?

Mr. WEEKS. The bond-secured circulation.

Mr. SIMMONS. Mr. President, the thought that I had in my mind was that at the present time the national banks holding these bonds can take out circulation upon them or not at their discretion.

Up to the amount of their capital.

Mr. SIMMONS. Yes; up to the amount of their capital. But if the national banks desire to dispose of their bonds, as provided in the clause which the Senator has read, and they become the property of the reserve banks under the provision last read by the Senator from Minnesota, then those banks are compelled to issue circulating notes against those bonds.

Mr. NELSON. The same kind of notes and on the same con-

dition.

Mr. SIMMONS. I think that is a very important differentiation between the present system and the system proposed in

the Owen bill, so far as elasticity is concerned, because in the one care the amount of notes issued and in circulation based upon these bonds is largely within the discretion of the na-tional banks, but when these bonds go into the hands of the reserve banks they have no discretion as to the amount of circulation that shall be issued against the bonds; they are required and commanded by the law to issue the amount. I speak of the 2 per cent bonds these banks are required to buy when offered for sale in the way provided.

Mr. NELSON. Does not the Senator see on reflection that

that makes them still more inelastic? The national banks can redeem those notes and get back the bonds, they can retire the circulation, but this provision makes it mandatory, so that whenever bonds are bought by these reserve banks under the provisions of the bill, they must take out circulation under

it, making it still more rigid.

Mr. SIMMONS. No; the Senator—
Mr. NELSON. It is not mandatory on national banks now. They can increase their circulation up to the amount of their capital or they can decrease it. But this makes it absolutely

mandatory to issue on the bonds they purchase.

Mr. SIMMONS. The Senator is entirely right with respect to one class of Federal bonds that may come into the hands of the Federal reserve banks; that is, that class of bonds that they purchase indirectly from the national banks through the instrumentality of the Treasury. The Senator read two provisions with respect to the powers and duties of the reserve banks with reference to circulation based upon Government bonds. first clause which the Senator read authorizes these reserve banks to acquire Government bonds, just as national banks are permitted to acquire them. They go into their vaults and become a part of the assets of the bank.

Mr. NELSON. No; they do not take the bonds. They must deposit them in the Treasury with the Comptroller of the

Currency

Mr. SIMMONS. I am talking about the first section which

the Senator read.

Mr. NELSON. I am referring to that.

Mr. SIMMONS. The first section authorizes them, when they become the owner of Government bonds, to take those bonds to the Treasury and secure circulation upon them just as other banks are permitted to do. Is not that true?

Mr. NELSON. Is not that a continuance of the present

system?

Mr. SIMMONS. Exactly.

Mr. NELSON. Do you want the present system of nationalbank circulation that is claimed to be inelastic to be continued?

Mr. SIMMONS. Will the Senator permit me to finish the statement that I started to make?

Mr. NELSON. Go on.
Mr. SIMMONS. I say there are two sections of the bill with reference to the purchase of bonds by these reserve banks. One section permits them to purchase them just like any national bank can to-day purchase them, and after they have purchased them they can take out circulation upon them or not just as they please. Is not that true?
Mr. NELSON. Yes.
Mr. SIMMONS. So far as the

So far as that part of the bonds which may be acquired by the reserve banks is concerned, there will be the same method as exists now and the same elasticity that exists now, no more and no less.

Mr. NELSON. Exactly, but-

Mr. SIMMONS. Except, if the Senator will let me finish, that in present conditions the national banks owning the bonds can take out circulation upon them at will.

Mr. NELSON. Up to the amount of the capital.

Mr. SIMMONS. Yes; up to the amount of the capital. if the reserve banks which acquire these bonds buy them in the open market, if you please, with the same privileges that the national banks now have of obtaining issue upon them, the power of determining whether they will take out circulation upon those bonds or not, so as to respond to the business needs and requirements of the country, is not lodged absolutely in the breast of private ownership, as it is now, but by virtue of the fact that the Federal reserve board has general supervisory power over the banks, by virtue of the fact that the Government has three directors upon the board of the reserve banks, and that three other directors upon the board of the reserve banks are not stockholders in the bank, but they represent the business interests of the country, does not the Senator believe that with this representation of the Government and of the business interests upon the directory of those banks the power will be indirectly lodged in the Government of requiring these Federal reserve banks holding the bonds to take out such circulation upon those bonds as the business interests of the country

may from time to time require, and thus bring about a more responsive elasticity?

Mr. NELSON. I do not believe anything of the kind. Mr. SIMMONS. Does not the Senator believe—

Mr. NELSON. I do not believe anything of the kind, for-

Mr. SIMMONS. Just a moment. Does not the Senator be-lieve that this control over the banks would result in regulating the amount of circulation more in accordance with the business needs and requirements of the country than when that power rests solely and exclusively in the breast of men who have no interest except to advance their personal interests?

Mr. NELSON. Let us apply the proposed law. I will again read this paragraph of the section:

Upon deposit with the Treasurer of the United States of any bonds of the United States in the manner provided by existing law relating to national banks, to receive from the Comptroller of the Currency circulating notes in blank, registered and countersigned as provided by law, equal in amount to the par value of the bonds so deposited, such notes to be issued under the same conditions and provisions of law which relate to the issue of circulating notes of national banks secured by bonds of the United States bearing the circulating privilege.

Now, I want to say, and the Senator ought to know it, that no bank would undertake to buy and pay par for the 2 per cent bonds as an investment. If a reserve bank buys these 2 per cent bonds, in the nature of the case, under this paragraph, they will want to issue circulation. While in one sense there may be a technical discretion, as I have said, no reserve bank would go into the market and buy these 2 per cent bonds as a pure investment without intending to issue circulation; for as an investment those bonds are not worth over 75 or 80 per cent of their face value. So if the reserve banks went into the bond market under this paragraph to buy those 2 per cent bonds they could only buy them, to save themselves from a great loss, for the purpose of taking out circulation. To buy them as an investment would be utter folly. The Senator himself would not buy a 2 per cent bond as an investment and pay par for it, and no reserve bank would do so. Therefore, as a practical question, the proposition that the Senator has submitted is of no earthly value when applied to those 2 per cent bonds.

Mr. WEEKS. Mr. President

The PRESIDING OFFICER (Mr. THORNTON in the chair). Does the Senator from Minnesota yield to the Senator from

Mr. NELSON.

Mr. WEEKS. I should like to add a word to what the Senator from Minnesota has said on the subject. One of the most important things for us to get rid of gradually, so gradually that it will not affect the business of the country, is the bondsecured circulation, because while it has the only elastic property which our circulation has, as a matter of practical effect, its elasticity is pretty nearly nil.

I understood the Senator from North Carolina to say that he understood the issuing of this circulation depended upon the will of the private owners of the bonds; that is, of the banks.

Now, that is not strictly true.

Mr. SIMMONS. I meant within the terms of the law.

WEEKS. Because it is required by the national-bank act that 25 per cent of their capital shall be kept outstanding in circulation at all times; and not only that, but in order that the banks may take advantage of the Aldrich-Vreeland Act, which is our anchor to windward in case of trouble, they must have 40 per cent of their capital in bond-secured circulation, the purpose of that being to prevent banks from avoiding the carrying of these 2 per cent bonds in ordinary times, and then when we get into extraordinary times enabling them to take advan-

tage of the Aldrich-Vreeland Act. There is no retirement, as a matter of fact, of this circulation, or at least that is practically true, for the reason that the banks can, not find a market for their 2 per cent bonds when they would be glad to sell them and retire the circulation; in other words, when they do not need the circulation. For that reason they send it in for redemption, it goes to the Treasury, is then sent to the bank which originally issued it, then goes to the reserve city bank with which the country bank is doing business, and finally it comes back to the Treasury, very frequently in exactly the same condition in which it was when it was issued a month or more before. It is the country banks that issue circulation so largely. The city banks do not do so on account of this rapidity of redemption and the difficulty of retiring circulation on account of the impossibility of finding a ready market for the 2 per cent bonds, which, as the Senator from Minnesota [Mr. Nelson] has said, would not be worth par, or anything like par, on their merits if it were not for the circulation privilege which goes with them; they probably would sell for about 75 cents on the dollar on their merits as an investment pure and simple.

Mr. BRADY. Mr. President—
The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Idaho?

Mr. NELSON. I do. Mr. BRADY. The statement which the Senator from Massachusetts [Mr. Weeks] has just made causes me to ask a question relative to the purchase of these bonds by the Federal reserve banks. I hope that the Senator from Minnesota [Mr. Nelson] will understand that I am not discussing the merits of the bill, but that I am discussing a pure and simple business transaction as I see it as a business man. If I am mistaken, I want to be advised of that fact.

We will assume that there is a local national bank at this time doing business in some specific locality. After this bill is passed, if the board of directors of that bank decide that the bank does not want to go into this system, that it desires to surrender its charter, to either quit business or to take out a charter under some State law, section 18 of the bill provides

that-

Any member bank desiring to retire the whole or any part of its circulating notes may file with the Treasurer of the United States an application to sell for its account, at par and interest, United States bonds securing circulation to be retired.

If I understand the statement of the Senator, the bonds used for circulation are not worth more than from 75 to 80 per cent of par; they are certainly not selling on the market to-day at to exceed 97 and some odd fractions of a cent of par. If the banks filed their application with the Federal reserve board, and the Federal reserve board should say, "You are a large and strong banking institution; we think you ought to go into this new association; if you will not do it we will refuse to take your bonds and we will not sell them to a Federal reserve Now, this provision says:

The Treasurer shall, at the end of each quarterly period, furnish the Federal reserve board with a list of such applications, and the Federal reserve board may, in its discretion, require the Federal reserve banks to purchase such bonds from the banks whose applications have been filed with the Treasurer at least 10 days before the end of any quarterly period at which the Federal reserve board may direct the purchase to be made.

What condition would that bank be in if the Federal reserve board should make that statement to them? The law says that they may do it. What is going to happen to the bank in case they do not require the purchase of those bonds? In order to retire from the national banking business or to change to a State bank, will they have to sell all those bonds at the present discount of 4 per cent, or will they have to lose the 20 or 25 per cent, which, as has been stated here, is the probable amount of depreciation of the bonds, or will there be some way which will compel the Federal reserve board to require the Federal reserve bank to purchase the bonds? It is a simple business proposition, and I am interested to learn just what would be the condition of the bank which had those bonds and refused to come in if section 18 becomes a part of this banking

Mr. WEEKS. Mr. President, the Senator from Idaho [Mr. Brady] has put his finger on one of the one hundred or more propositions in which the Hitchcock proposal excels the Owen proposal. In the case of the Hitchcock amendment-I will refer to it as an amendment-it is provided that the Federal reserve banks shall buy \$50,000,000 worth of 2 per cent bonds held now presumably by the national banks, and presumably that would retire \$50,000,000 of the bond-secured circulation. If that took place in the spring months or in the summer months, in my judgment we never would know that the circulation had been retired, because I believe that there is a redundancy of currency most of the time; but if it took place in the fall months, we might feel at once the need of additional currency. Then we would have to take it out under the provisions of this Let us suppose that the Federal reserve banks buy this \$50,000,000 of bonds, and we provide that they shall be purchased at par and interest, and that one year after the Federal reserve banks shall buy \$50,000,000 more bonds at par and interest. That at once establishes the price of the 2 per cent bonds; so that the banks or other holders may know that every year there is going to be a market for some portion of their bonds at the price the Government should pay for those bonds, and that is par and interest. When the Federal reserve banks have bought these \$50,000,000 of bonds, under the Hitchcock proposition they have the privilege of going to the Treasury and taking 3 per cent one-year bonds in their place.

Our reason for providing for refunding in that way not only was that we would gradually retire the 2 per cent bonds which are now outstanding and the bond-secured circulation, but at the same time we would furnish the reserve banks with an investment which would enable them to use without delay their accumulations of loanable funds deposited with them. In addition to that, however, it would give them a security which they could sell at home or abroad whenever they needed to replenish their gold supply. There is nothing better as a marketable security than a public bond of a nation like the United States which has less than one year to run, and these bonds at the longest would not have over one year to run; in other words, the reserve banks would have a security which they could sell not only to American investors-because there are always large funds which must be used at some time lying in the banks ready for investment-they could not only sell these short-time bonds to American investors, but they could sell them abroad as well and obtain gold in either case, and in that way control the gold supply of the country.

The purpose of the Hitchcock plan is that, first, it does take care of the 2 per cent bonds at par and interest. It relieves the banks of the possibility of a serious loss in case that is not done. It does provide the reserve banks with a profitable investment at once, which comes within the provisions of the bill, and it will enable the reserve banks in case of need to replenish their gold supply by selling these bonds either at

home or abroad.

Now, take the other alternative which the Senator-and I beg his pardon for taking so much of his time-has brought to the attention of the Senate; which is, that in case a bank does not desire to go in under any of these plans, does not believe in any of them, and wants to get out of the system and take out a State charter, in what position is that bank? It must indicate within a stipulated time what its purpose is to be. If it does not within that time announce that it is going to remain in the system, it forfeits its charter. We will say it has on hand so le 2 per cent Government bonds. If there were any considerable number of such banks and they tried to market their bonds at one and the same time, we can easily see that, notwithstanding the fact that possibly something is going to be done with those bonds eventually, they would sell down to 90 and perhaps to 85 per cent of their par value. Just suppose for a minute that the holders of \$200,000,000 of 2 per cent bonds wished to market their holdings within 30 or even within 60 days, what would be the result? We would see the 2 per cent bonds selling at 90 and, as I say, at possibly 85 per cent of par, and the only buyers would be speculators, who would think that sooner or later they would be taken care of at a relatively high price. These bonds have been selling above par ever since they were issued until within a few months, and yet on the sales of less than \$20,-000,000 they depreciated from above par to 94. That was in the ordinary course of the market.

I took occasion to investigate the selling of those bonds when the Secretary of the Treasury charged that the New York banks or somebody else were maliciously depressing them for malign and ulterior purposes. My judgment is that there was nothing whatever in the charge, and yet, as I have said, on the sale of less than \$20,000,000 of bonds they were depressed from above par to 94. Suppose the holders of \$200,000,000 of those bonds wished to dispose of them, what would be the result? An enormous depression of Government bonds and the creating of a condition which would affect business throughout this country. Therefore I say that the provision which has been made in the Owen bill is a decidedly bad one and it is not only going to perpetuate a bond-secured circulation, but it does not make

proper provision for the bonds, even if they were to be retired.

Mr. WILLIAMS. Mr. President—

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Mississippi?

Mr. NELSON. Yes; I yield.

Mr. WILLIAMS. With the permission of the Senator from Minnesota [Mr. Nelson], I will say that the Senator from Mas-WEEKS] and the Senator from Idaho [Mr. sachusetts [Mr. BRADY] have alike forgotten that there are two alternatives in this proposition, or, at any rate, they failed to mention them in this connection.

In order to maintain these 2 per cent bonds at par and not to violate the contract between the Government and the present holders of the bonds-the implied contract-which was, that they were the basis of circulation, section 18 of the Owen bill provides, first, that the banks shall have the option. The banks can, if they will, come up and pay in and get the bonds, and those bonds can be converted into Federal reserve notes, or the banks can elect to take 3 per cent exchequer bills-one-year notes-which everybody admits will be above par. Then there is an option also-

Mr. NELSON. Mr. President-

Mr. WILLIAMS. One moment. The bank has that double option to start with. Now, the Senator from Idaho [Mr. Brady] has instanced a case where a bank might want to have

should refuse to do so. The bill provides that in that case, for all of those 2 per cent bonds outstanding against which there is no outstanding circulation, they shall be converted into 3 per cent certificates. So that there is an option with the banks, and there is also-as there ought to be-substantially an option with the Government, for the reserve board in this respect represents the Government.

The object of section 18 was to prevent the 2 per cent bonds from going below par by virtue of the fact that they are to be deprived of a privilege which they have enjoyed all the time, to wit, the privilege of being the basis of circulation.

If the Senator will read the provision still further he will find that in the original Owen bill it was provided that not over \$36.000,000, I believe, per annum-

Mr. NELSON. That is right.

Mr. WILLIAMS. Should be so converted; but the Democratic conference struck out that limitation for fear that even that limitation might act psychologically so as to bring the bonds below par. There is no possibility of these bonds going below par.

Now, as to inflating and perpetuating the present national bank-note system. There is something in the argument which has been made on that question. This does work a substitution of Federal reserve bank notes for the present national-bank notes upon the same basis, to the extent that it is within the discretion of the Federal reserve board if it is thought wise to do so; but it also leaves it in the discretion of the Federal reserve board to force them virtually to take 3 per cent certificates or exchequer bills in lieu of the 2 per cent bonds.

Mr. WEEKS. Mr. President, I think the Senator from Mis-

sissippi has correctly stated what may happen, provided the banks remain in the system, but what the Senator from Idaho asked was what is a bank to do that wants to go out of the system? What is it going to do then with its bonds? Where

is it going to find a market for its bonds?

Mr. WILLIAMS. That is just what this provides for. Suppose a bank wants to go out of the system, then that bank gives notice and makes application to the Treasury Department for the sale of its bonds and for interest. When that takes place, that bank may pursue that course or it may pursue the other course of carrying those 2 per cent bonds to the Treasury and getting, in lieu of them. 3 per cent certificates; or, if it demands circulation and wants to redeem it in that way and does not want the 3 per cent certificates, it goes through the process described in section 18; and in that way it gets out. It can get out in either one of the two ways.

Mr. NELSON. Will the Senator from Mississippi allow me

to interrupt him, for I know he wants to be correct? Mr. WILLIAMS. Oh, yes; of course I do.

Mr. NELSON. I want to read this part of the bill, and the Senator will then see that he is in error. It is only the bonds on which there is no outstanding circulation that can be con-

Mr. WILLIAMS. I thought I said that.

Mr. NELSON. Commencing with line 15, it is provided:

United States bonds bought by a Federal reserve bank against which there are no outstanding national-bank notes may be exchanged at the Treasury for one-year gold notes bearing 3 per cent interest.

It is only bonds of that kind that can be exchanged for the 3 per cent gold notes, not those that are the basis of outstanding circulation.

Mr. WILLIAMS. The Senator is right about that.

Mr. BRANDEGEE. And it is only the reserve banks that can do it. The member banks have not that option. Under the bill a member bank can not go to the Treasury and get gold notes in exchange for its bonds, as the Senator from Mississippi has said. It is the reserve bank which has bought the bonds from a member bank which may go to the Treasury and get the

Mr. NELSON. With the permission of the Senator from Mississippi, I should like to proceed, but I do not want to take him off his feet.

Mr. WILLIAMS. I am through. I was merely trying to get

this matter cleared up.

Mr. NELSON. I want to call the attention of the Senator from Idaho to a very brief answer to his question, which is found in the first three words of this section. If a bank does not want to go into this system, it does not have to enter it at all. The section begins with the words "Any member bank." A member bank is a bank that takes stock and becomes a part of the institution. If the bank in Idaho does not go into the system, it is left in the air; it can not come in under this provision.

Mr. BRADY. That is just the point that I was going to them converted into reserve bank notes and the reserve board make. I wanted to ascertain what would happen to a bank if it decided it did not want to enter the system. Such a bank would

not receive any of the benefits of this legislation.

None of the provisions of this section would inure to the benefit of that bank. If that bank would not come into the system, it would have to be extinguished as a national bank; it would have to forfeit its charter; its assets would be liquidated in the hands of a receiver, and its bonds would have to be disposed of like the other assets of the bank.

Mr. BRANDEGEE. Mr. President, I will not interrupt the

Senator if he wants to proceed.

Mr. NELSON. Oh, no; I am quite willing to be interrupted.
Mr. BRANDEGEE. Well, I wanted to call the Senator's attention to page 61 of the print of December 1, from which we have been reading. Beginning in line 15, it is provided:

United States bonds bought by a Federal reserve bank against which there are no outstanding national-bank notes may be exchanged at the Treasury for one-year gold notes bearing 3 per cent interest. In case of such exchange for one-year notes the reserve bank shall be bound to pay such notes and to receive in payment thereof new 3 per cent one-year Treasury gold notes year by year for the period of 20 years.

Not being a member of the committee and not having heard the evidence upon which this provision is based, it is somewhat blind to me, as I read it, as I have done, in this respect. It

In case of such exchange for one-year notes the reserve bank shall be bound to pay such notes and to receive in payment thereof new 3 per cent one-year Treasury gold notes year by year for the period of 20

What does it mean when it provides that the bank "shall be bound to pay such notes and to receive in payment thereof"?

Mr. NELSON. I will explain that to the Senator.

Mr. BRANDEGEE. Does it mean that they are to receive in

lieu thereof-

Mr. NELSON. I think, with all due respect to my friend from Mississippi, or whoever had a hand in framing the provision-

Mr. WILLIAMS. I did not draw it. Mr. NELSON. What I want to say to the Senator is that in principle it is the same as the Hitchcock bill, only it is not so clearly expressed, to my mind, as it is in the Hitchcock bill. Let me read the provision of the Hitchcock bill on this point:

The bonds so purchased may be held by such reserve bank and used for deposit with its reserve agent as security for the Federal reserve notes issued—

This is the language to which I call especial attention-

or they may be exchanged at the Treasury for one-year Treasury gold notes bearing 3 per cent interest. In case of such exchange the reserve bank shall be bound at the option of the United States to renew year by year for 20 years the 3 per cent gold notes so issued.

That is the provision of the Hitchcock bill. The meaning of the language which the Senator from Connecticut has read is practically the same, only I do not think it is expressed so clearly.

The provision in section 18 of the Owen bill reads:

In case of such exchange for one-year notes the reserve bank shall be bound to pay such notes and to receive in payment thereof new 3 per cent one-year Treasury gold notes year by year for the period of 20 years.

It is in legal effect the same as the provision of the Hitchcock bill.

Mr. WILLIAMS. It is just the difference between the renewal of an old note and the issuance of a new note in its stead.

Mr. NELSON. Yes; in its legal effect it is the same, but I can only say that I prefer the language of the Hitchcock bill.

Mr. WILLIAMS. They do not accomplish the same purpose. One is the renewal of an old note, carrying it over, and the other

is the substitution of a new one in payment of the old one.

Mr. NELSON. In the case of Government notes they would
not indorse on the one-year note, "This note is a renewal."

The Government would probably issue a new note.

Mr. WILLIAMS. It would just continue in existence; but in this case they are bound to accept in payment of this year's note a new note of next year.

Mr. NELSON. Yes; in effect the burden upon the banks is the same.

Mr. WILLIAMS. It is the same.

Mr. NELSON. There is no distinction in that respect.

Mr. BRANDEGEE. Now, just one more word—
Mr. NELSON. But here is the distinction: This provision of the Hitchcock bill applies to all bonds, both bonds that are the basis of circulation and those that are not; while in the Owen bill it is limited to the bonds on which there is no cir-That is the distinction.

Mr. BRANDEGEE. And such bonds as have been bought by a Federal reserve bank.

Mr. NELSON. Yes; but you must consider the sentence above, which reads:

United States bonds bought by a Federal reserve board against which there are no outstanding national-bank notes.

Mr. BRANDEGEE. I agree with the Senator entirely. Now, Mr. President

Mr. NELSON. There is a radical difference between the two bills. The Owen bill limits the convertibility into one-year notes to bonds of the United States for which there is no outstanding circulation, while the Hitchcock bill makes it apply to all bonds each year to the extent of 50 per cent of the capital of the reserve banks.

I do not intend to take the Senator off his feet, but I want to say in this connection that there are \$730,000,000 of 2 per cent bonds outstanding. I believe that there are bonds deposited for circulation amounting to \$760,000,000 in round numbers; in other words, there are bonds to the extent of \$30,000,000 outside the amount of the 2 per cent bonds that are a basis of circulation; so that in round numbers out of the bonded debt of the United States \$760,000,000, or somewhere near that figure-I can not be exact to a few thousand dollars-are now in the Treasury as the basis of national-bank note circulation, and of that amount \$730,000,000 are 2 per cent bonds. Now I yield to the Senator from Connecticut.

Mr. BRANDEGEE. Mr. President, I read the following pro-

vision from the bill:

In case of such exchange for one-year notes the reserve bank shall be bound to pay such notes and to receive in payment thereof new 3 per cent one-year Treasury gold notes year by year for the period of 20 years.

At the end of the 20 years, then, these Treasury notes will all have become due—that is, year by year, they being one-year notes—and will be redeemed by the Treasury in gold.

Mr. NELSON. They are redeemed by the Government. Mr. WILLIAMS. They are finally payable. Mr. BRANDEGEE. Finally payable, and that ends that situation.

Mr. NELSON. The time is the same as in the Hitchcock bill.

Mr. BRANDEGEE. Yes; the time is the same.
Mr. NELSON. I will read the provision of the Hitchcock bill: In case of such exchange the reserve bank shall be bound, at the option of the United States, to renew year by year for 20 years the 3 per cent gold notes so issued.

Mr. WILLIAMS. And the hope is that a great many of them will finally be liquidated and will cease to be the basis of circu-

Mr. NELSON. I ask the attention of my friend from Massachusetts [Mr. Weeks] to what I am about to state, for I am not entirely sure that I am correct about it. I suppose the 20-year period was put in the bill on the theory that the 2 per

cent bonds are due in 20 years. Is not that correct?

Mr. WEEKS. It is on the theory that they are due in 20

years; yes

Mr. NELSON. That is, the Government can pay them at the end of 20 years. Then the 20-year limitation is put in in both cases. I want to say, incidentally, that this discussion here is to me most interesting. It shows the great difference between a man who has had experience as a banker and a man who is a farmer and country lawyer like myself. I have to grope my way as best I can, while the Senator from Massachusetts [Mr. Weeks], with his great experience and ability as a banker, can clear up these details much better than I could possibly do, so I am very glad to have him interpose and give us the benefit of his views.

Mr. WEEKS. Mr. President, I want to say that the Senator from Minnesota greatly depreciates his own capacity as a clear

expounder of any question which he is discussing.

Mr. GALLINGER. Mr. President, I will venture to suggest that I have listened to this debate from the beginning to the present time, and I think the Senator from Minnesota [Mr. Nelson] has not "groped" in vain. He certainly has given me a great deal of valuable information. However, I am constantly reminded of the old maxim, "When doctors disagree, who shall decide?" And I find a great deal of difficulty in my mind, even up to the present time, in determining which side is right in this controversy.

Mr. NELSON. Mr. President, I am afraid that in all I have said here I am like the prophet of old calling in the wilder-

ness—the Democratic wilderness

Mr. WILLIAMS. There is no Democratic wilderness; there is a Democratic highway.

Mr. NELSON. I do not mean this in any disrespectful sense,

as the Senator from Mississippi will understand.

I will not take up the time of the Senate further on the questions I have been discussing. I now invite your attention to the question of bank reserves. I shall go into it in detail, and it may not be very interesting, but it may give you informa-tion if you will take the trouble to read it in cold type.

I have already explained the present reserve system of the national banks. All the pending bills propose to change this

system and to substitute therefor a system fundamentally safer and better. The Hitchcock bill, section 20, provides for a reserve of 12 per cent on deposits of country banks and 15 per cent for banks in reserve and central reserve cities. Under the new system there is no occasion for maintaining in the future, when the plan is consummated, a distinction between banks in reserve and central reserve cities, for the banks in central res\_rve cities will no longer act as reserve agents for banks in reserve cities. Taking the statement of the Comptroller of the Currency for September 10, 1913, as a basis, it appears that the amount of the net deposits of all country banks was at that time \$3.595,707,487: that the required reserve of 15 per cent arrounted to \$539,356,423. Two-fifths of this amount, or \$215,-742,449, is retained in the vaults of the country banks, and three-fifths, or \$323,613,613, may be and usuall, is retained in the banks of the central reserve or reserve cities.

The deposits in banks in reserve cities amounted at the date aforesaid to \$1,881.647.300. Twenty-five per cent of this amount is \$470,411.825, and one-half of this, which may be deposited in banks in central reserve cities, amounts to \$235,205.912. deposits in banks in central reserve cities at the same time were \$1.619.335,280. Twenty-five per cent of this amounts to \$404,-The aggregate amount of reserves required of banks in central reserve and reserve cities under existing law is \$875,-Under the Hitchcock bill the aggregate amount required will be \$525,147,389. It thus appears that banks in reserve and central reserve cities will under the new system be relieved of \$350,098,256 of reserve requirement. serve requirement of country banks under the existing system is \$539,356,123, and the total amount of reserve requirement under the Hitchcock bill will be \$431,484,898, thus relieving the country banks of the reserve requirement of \$107,871,225. the Hitchcock bill country banks will be required to maintain in their own vaults 4 per cent of their deposits instead of 6 per cent under the old system, and with the reserve banks 4 per cent of their deposits instead of 9 per cent under the old and of this 4 per cent they may deposit 1 per cent within the first 6 months, 1 per cent within the next 6 months, 1 per cent within the next 6 months, and 1 per cent within the next 6 months, thus allowing the transfer to be made in installments every 6 months until the whole 4 per cent has been deposited, making 24 months in all; and 4 per cent is optional with the country banks. They may keep that part either in their own vaults or with the reserve bank. Banks in reserve cities under the new system will be required to keep in their own vaults 5 per cent of their deposits instead of 121 per cent under the old system, and they will be required to deposit with the reserve banks 6 per cent under the new system instead of 121 under

the old system. This 6 per cent may be paid in as follows: One per cent within the first 6 months, 1 per cent within the next 6 months, and 1 per cent within the next 6 months, thus allowing the transfer to be made in installments every 6 months until the whole 6 per cent has been deposited, making 36 months in all; and the other 4 per cent of the required reserve may be, at their option, kept in their own vaults or with the reserve bank. Banks in central reserve cities are required to keep in their own vaults under the new system 5 per cent of their deposits, instead of 25 per cent under the old system, and they are required to keep with the reserve bank a reserve of 6 per cent, payable in instaliments, as in the case of banks in reserve cities; and the residue of the required reserve, namely, 4 ner cent, they may, at their option, keep in their own vaults or with the reserve bank. By giving such time to the member banks to make their deposits in the reserve bank it makes the transfer of funds comparatively easy and will lead to little or no friction or financial disturbance. The system of reserves proposed in the Hitchcock bill removes in the aggregate \$457.961,476 of the reserves under the existing system from the embargo of that system and makes the same available to the member banks for banking and discount purposes, while of the \$353,887,253 of the reserves required to be deposited with the reserve banks about two-thirds of it, or \$235.918.168, is available for discount purposes. It thus appears that in the aggregate \$693,879,644 of the reserves required under the existing system will be available for discount purposes to member banks and reserve banks under the new

These figures that I am using are obtained by applying the rules under the old system and under the Hitchcock bill to the figures given by the Comptroller of the Currency in his report of September 10, 1913. The Glass bill requires a country bank to maintain a reserve of 12 per cent, 5 per cent to be kept in its own vault and and 5 per cent ultimately in the reserve bank and 2 per cent optional with the member bank. The bill further requires banks in the reserve cities to maintain a permanent reserve equal to 18 per cent, one-half of it to be kept in their own vaults, 5 per cent in the reserve bank, and 4 per cent optional. As to banks in central reserve cities the bill requires practically the same reserve as for banks in reserve cities, with the same option. Under the last edition of the Owen bill country banks are required to maintain a reserve of 12 per cent upon their demand liabilities and 5 per cent upon their time deposits, and of these reserves four-twelfths are to be kept in their own vaults and five-twelfths, payable in installments of one-twelfth every six months, in the reserve banks, and the residue of the required reserve is optional with the member bank. The bill further requires that banks in reserve cities shall maintain a reserve equal to 15 per cent of the amount of their demand liabilities and 5 per cent of their time deposits, and of these reserves six-fifteenths are to be kept in their own vaults, and sixfifteenths, payable in installments, in the reserve bank, and the balance of the required reserve optional with the banks. I think I am stating it correctly. In respect to banks in central reserve cities the bill requires that such banks maintain a reserve equal to 18 per cent of their demand liabilities and 5 per cent of their time deposits, of which six-eighteenths are to be kept in their own vaults and six-eighteenths, payable in installments, with the reserve bank, and the residue of the required reserves, at the option of the member banks, to be kept in their own vaults or with the reserve banks.

I call your attention to this:

The bill further provides that in lieu of cash the Federal reserve bank may accept from the member banks one-half of the required reserves in commercial paper eligible for discount.

This I regard as a very dangerous innovation. Instead of depositing the required reserve in cash with the reserve banks, these different banks are allowed to deposit half of the reserves

required in commercial paper.

Mr. POMERENE. Mr. President—

The PRESIDING OFFICER. Does the Senator from Minnesota yield to the Senator from Ohio?

Mr. NELSON. Certainly.

Mr. POMERENE. This provision grew out of the feeling that in making this change it should be as gradual and with as little disturbance of business as possible. The branch of the committee of which I have the honor to be a member felt that if all of the reserves were to be transferred in cash necessarily the member banks making the deposits would have to make some arrangement to get cash, and it might be that they would have to call some of their loans in order to meet the cash requirements.

In order to avoid the necessity of calling their loans to any greater degree than we thought advisable, it was provided that 50 per cent of the reserves might be transferred in the form of eligible commercial paper which could be indorsed and redis-From the standpoint of the regional banks, we could counted. see no difference between taking on the one hand 50 per cent of prime commercial paper, indorsed and passed upon by the reserve banks, and the other 50 per cent in cash; and taking, on the other hand, 100 per cent in cash and perhaps on the next day rediscounting the paper and turning the cash back to the banks.

We believed this would avoid any undue disturbance which might be incident to the collection of the cash by the member bank in the first instance, taking it to the reserve bank, then rediscounting the paper, and giving it back into the marts of

Mr. NELSON. The reply I have to make to that is, in the first place, that we have allowed such a length of time to elapse before the reserves are required to be transferred that it really will be no burden. In the case of country banks we give 24 months, and in the case of other banks 36 months. mobilization of these reserves will not, as the Senator thinks, lead to a contraction of loans. In my opinion, it will lead to this: The banks will withdraw the reserves from the places where they now are, but they will withdraw them very gradu-Therefore, if you allow that length of time, it seems to me it will be no burden. Some of the banks may put in com-mercial paper; most of them, I think, will not in this instance; so instead of loading up the reserve banks-instead of furnishing them an ample reserve of cash with which to operate-you tie them up with a certain amount of reserve paper.

You must bear in mind in this connection that under the bills here—under both your bill and the bill we have reported the reserve banks must keep a reserve of these reserves of 33; per cent, and they must keep that reserve in cash. Now,

assuming that the banks could put in 50 per cent in commercial paper, the only cash reserve they would have would be a limited amount. If you should apply the 33 per cent to the commercial paper and the 33 per cent to the cash, it would be equivalent to applying 66 per cent to the cash. It would be cutting down the cash ability of the reserve banks to the amount of 66 per cent, and to that extent it would cripple them.

Mr. POMERENE. Mr. President—
The PRESIDING OFFICER. Does the Senator from Min-

nesota further yield to the Senator from Ohio?

Mr. NELSON, I do.

Mr. POMERENE, It must be borne in mind that it is the purpose of these banks to pay some dividends, to have some earnings, and this is simply a privilege which is granted to the member banks to furnish 50 per cent in commercial paper. They are not obliged to do it, and this applies only to the payments during the transition period. For the life of me I am not able to see how it is going to be dangerous to say to a member bank, "You can bring \$100,000 in cash and deposit it in the reserve banks to-day and to-morrow rediscount your paper in the amount of, say, \$50,000, or you can bring, in the first instance \$50,000 in rediscounted paper and \$50,000 in cash."

If you should require all of it to be in cash, it might be that the member bank which is seeking to comply with this law would be compelled to call leans to the extent of \$50,000 in

order to meet the cash requirement.

Mr. NELSON. In the nature of the case I do not think that would be so, but just imagine this case: Suppose all the member banks availed themselves of this privilege. You would have the reserve bank starting out with half of its reserves that are supposed to be for the protection of all the banks, represented by commercial paper instead of by cash. If our present reserve system were in that condition-that half of the reserves were in commercial paper instead of cash-you may imagine what would be the result.

The bank is required if it issues reserve notes, to keep under your bill a reserve of 331 per cent; under our bill a reserve of 45 per cent. In this way you cripple it; you load it up with commercial paper, which will not enable it to maintain its

The bank can not loan out more than two-thirds of its reserves. It has to keep one-third of its reserves. If half of its reserves were loaned out, there would be little more to loan of the reserves; it would be equivalent to 66 per cent of the balance of the reserves; in other words, two-thirds of the cash reserves.

Suppose one-half of the cash reserves deposited in the regional banks consisted of commercial paper; the other half of the reserves, 66 per cent of it—two-thirds of the other half in cash would have to remain; and the result would be that you would have only one-third of 50 per cent that would be available.

In that way you would seriously cripple a bank.

Mr. POMERENE. Mr. President, it does seem to me, with all due respect, that the Senator from Minnesota overlooks this fact: If there is a need for a given amount of currency in the country, we must get it either from the member banks or from the regional banks. If all of the banks should avail themselves of this privilege, and furnish 50 per cent in rediscounted paper, there would be very little necessity for these banks to go to the regional banks in order to get accommodation.

Mr. NELSON. But suppose they wanted more money? Mr. POMERENE. Pardon me just a moment. If, however, But suppose they wanted more money? there is a need for the cash at the time, and they bring in all of the reserve requirements in cash, it must be immediately loaned out by the reserve bank. It seems to me it makes no difference, except that the member banks in the first instance must take their money out of the commerce of the country in order to place it in the regional reserve banks, and when they do that to that extent they are disturbing trade conditions,

unless there is a plethora of money in the country.

Mr. NELSON. The Senator is mistaken in one thing. They are not taking the money out of the commerce and trade of the country; they are taking it out of the reserves of the country which are tied up, and they are simply transferring the reserves

from one set of banks to these reserve banks.

More than that, the Senator assumes in his statement that every time application is made to a reserve bank by a member bank for accommodation the reserve bank must issue currency That is not the theory at all. The theory of this bill is that when applications are made by a member bank to have its paper discounted it is the duty of the reserve bank, if it has the cash on hand, to discount it: and it is only when the member bank is short of cash and needs currency that it must apply for leave to issue reserve notes.

What would the reserve banks have to loan out if you should eripple them in the first instance? May not the banks want a great deal more accommodation? May not some banks want immediately to apply to the reserve bank for accommodation? May they not bring up paper and say, "We want to discount this paper; we want to secure so much cash or so much bank credit"? You cripple the reserve banks for the time being; you cut them off from loanable funds.

Mr. POMERENE. There will be less demand for the cash that is in the vaults of the regional reserve banks if they can bring the rediscounted paper. In the statement I made I did not mean to indicate that currency would be issued every time a member bank might make an application for money. Of course, the new currency, Federal reserve notes, would be issued only in the event that the reserve bank did not have the

necessary cash on hand.

Mr. NELSON. Here you have in one case 24 months and in the other case 36 months in which to put in these reserves. If during all that period half of these reserves can consist of commercial paper of one kind or another-I mean eligible paper, of course-during all that period you will have the bank crippled to that extent in doing the business for which it was

Mr. POMERENE. If half the reserves are received by the Federal reserve bank, it will not be compelled to furnish so

much cash to the member banks.

Mr. NELSON. The Senator is assuming that all the applications for loans and all the applications for help during that period would be limited to supplying these reserves. If that were the case, what he has stated m'ght occur; but, as a matter of fact, applications undoubtedly will be made during the seasonal demands for currency. In the fall of every year applica-tions will be made, or every time the crop-moving serson comes around, varying with the condition of the country. You cripple the bank to that extent, and drive it to seeking the issue of currency when it ought not to be driven to it.

The Hitchcock bill provides-and I call the attention of the Senator from Vermont [Mr. Page] to this-that if a State bank or trust company is required by the laws of its State to keep its reserves either in its own vaults or with another State bank or trust company such reserve deposits so kept in such State bank or trust company shall be construed as though they were reserve deposits in a national bank. The new Owen bill is substantially the same with some slight modifications, but it contains an additional provision which seems to me to be of a very questionable character, namely, in permitting a member bank to reduce its reserves in the reserve bank by checking against the same under certain circumstances. That is, it can cut down its reserves by drawing checks against them.

This may lead to undue expansion on the part of a member bank and unduly diminish the resources of the reserve bank. Section 22 of the Hitchcock bill requires a Federal reserve bank to have at all times in its vaults, in gold certificates or lawful money, a sum equal to not less than 35 per cent of its net deposits in addition to the reserves required for Federal reserve notes. This reserve, however, may be, in cases of emergency, reduced to 25 per cent, but no lower; but in case of a reduction from 35 per cent to 25 per cent, a graduated tax as a deterrent is provided for. In these respects there is a difference between

this bill and the Glass and Owen bills.

The Glass bill authorizes loans on improved farms, but not for a longer term than one year, which is of no practical value, as farm loans are not made for such a short period. In the West and Northwest, all through the farming country, I know of no cases of farm loans, mortgages on farms, that are made for less than five years. If a farmer is obliged to borrow a small sum of money for a short time, he goes to the bank and gives his note. If they are not satisfied with his signature they have him get a signer, as they call it; or, if not that, they require him to give a chattel mortgage. Loans on farms are invariably

for five years or over.

Both the Hitchcock and Owen bills authorize loans on improved farms to the extent of 50 per cent of their value, and for a term of five years. Under the Hitchcock bill the aggregate of such loans on the part of any bank must not exceed one-third of its time deposits, while under the Owen bill they must not exceed 25 per cent of the capital and surplus of a bank.

It seems to me that the provision of the Hitchcock bill in this respect is much more elastic and favorable than the Owen bill. The capital of the small country banks is not usually very large and their surplus is as a rule quite small, while their time deposits are always considerable, and inasmuch as they usually draw interest they are of a permanent and reliable character and make them a safe basis for the limit prescribed for farm loans.

In this connection I call attention to one provision in this section relating to farm loans. That was inserted at my instance. We all know out West that national banks have been for years accustomed to receive time deposits, practically doing a savings-bank business. They receive deposits from farmers and pay interest on them, usually in the form of certificates. Some are in the form of bank books, but generally they are time cer-tificates. I know in the little town in which I live where we have three banks, which are comparatively small compared with the big city banks, while the deposits of those three banks run from \$1,000,000 up to \$1,200,000, on an average, more than two-thirds of them—I might almost say three-fourths of them—are the deposits of farmers, and they are time deposits. The banks issue certificates. Usually they do not pay any interest unless the money is left for six months. It is customary if it is left for six months to pay 3 per cent, and if left for one year 4 per cent. The great portion of their deposits are of that permanent character.

Some question has arisen from time to time, but it has never been directly ruled upon so far as I know, or in a mandatory way, as to whether the national banks have the right to accept time loans or pay interest on deposits. To cover that question and make it safe, I had this language inserted in this provision, and I call the attention of the Senator from Ohio [Mr. Pom-ERENE] to it, who does me the honor of listening to me.

That deposits in national banks, payable more than 30 days after bey are made, shall be known as time deposits, and—

I call the Senator's attention to this language-

such banks may continue hereafter, as heretofore, to receive time deposits and to pay interest on the same.

I think that it is very important to save all questions that might be raised, and inasmuch as gentlemen on the side of the Senator from Ohio are in control of the situation, I would suggest to him that he incorporate that provision in the paragraph.

Mr. POMERENE. It is practically placing in a mandatory form what has been the practice.

Mr. NELSON. Exactly; it is legalizing it. I trust the Sena-

tor will see to it that the change is made.

The Hitchcock and new Owen bill both provide that national banks may establish foreign branches. The Hitchcock bill requires that the capital of a foreign branch shall be \$5,000,000, while the Owen bill requires only \$1,000,000. In the opinion of our section of the committee, a branch bank in a foreign country, where most of their banks have large capitals and surpluses, would cut a sorry figure and accomplish little with so small a capital as \$1,000,000; that in order that such a branch bank may be of any service to our banks in this country it ought to be of sufficient size and capitalization to be able to compete, at least for our own business, with the big banks of the foreign countries on equal terms.

Now, Mr. President, I have gone over in detail the very important paragraphs of the bill for the purpose of showing what the Glass bill is, what the Owen bill is, and what the Hitchcock bill is, and I have pointed out what I consider to be the virtue and good qualities of the Hitchcock bill over and above the

Owen bill and the Glass bill.

To summarize briefly what I have thus described in some detail, it will appear that in the following particulars the Hitchcock bill is more efficient and more effective in accomplishing what ought to be the ultimate purpose and object of such legislation, namely:

First. In the number of reserve banks and the capital re-

quired for such banks.

Second. In the matter of stock subscription and its payment, Third. In the matter of the appointment of the board of directors of the reserve banks and the Government control through the same.

Fourth. In regard to the distribution of the earnings of the

Fifth. In regard to the make-up, number, term of office, salary, and powers of the reserve board.

Sixth. In regard to the deposit of Government funds.

Seventh. In regard to the system of bank reserves; and Eighth. Finally, in the most important matter of all, the

issue, the circulation, and the prompt redemption of the re-

serve notes to be issued under the new system.

One of the chief ends sought is to gather up, to concentrate, and to utilize where most needed the mandatory and other reserves of the member banks. As these banks gather up, concentrate, and utilize the funds and credits of their depositors, so the reserve banks must build up a volume of available credits from the resources—the reserves—of the member banks. And the greater the concentration of such reserves, the less they are dissipated and scattered, the more valuable and effective the system will prove to be, especially in great emergencies. | roll.

We are in effect establishing a central bank here at Washington under the domination of the reserve board, with 4, 8, or 12 branches, with the capital and reserves in these branches, to be ultimately handled and marshaled by the central authority that has no funds under its keeping or direct disposal, but must in case of emergency order one branch to help another branch. It is like a general fighting a big battle with 8 or 12 corps on the fighting line without a single central reserve to draw from in case of undue and dangerous pressure on any part of his line of battle. In such a case he must constantly feed the most threatened part of his line from those parts of the line that he deems for the time being to be less threatened, thus weakening one part of his line for the purpose of strengthening another part of his line.

A general relying on such a system of reserves is not a firstclass general and runs a great risk in the hour of combat.

so while in normal times one reserve bank may well rely for help on another bank, through the order of the reserve board. yet in the midst of acute money stringency, or in the face of an impending panic or run, when the conflagration is likely to break out and spread with the force and speed of a great prairie fire, the hasty transfer of funds from one reserve bank to another will be most difficult and hazardous in the extreme, for the bank drawn upon may at any moment be exposed to the conflagration and need all of its resources at home. It is moreover to be noted that each reserve bank will naturally be governed as to the volume of credits it grants by the volume of its own resources, and that it will not, except remotely, be governed in its operations by the operations of the other reserve banks. The presumption is that each reserve bank will ordinarily grant all the credit it can, all that its own resources can well carry. It is also to be further noted that there is lurking in the system a temptation to the negligent management of a reserve bank to unduly expand its own credits for the reason that in case of stress it can look for help to other banks of the system. But I will not dwell any further on these and other drawbacks of the system. It is sufficient for me to say at this moment that all these drawbacks and all other risks incident to a scattered system of reserve banks can be obviated and eliminated only by the establishment of a strong Government-controlled central bank, which because of party platforms and purely political considerations is not to be vouchsafed to us at this time.

I hope the Senator from Mississippi [Mr. WILLIAMS] will

take this to heart.

No less important than husbanding and utilizing the reserves is the securing of a paper currency responsive to the commercial and industrial needs of our country and as good as gold in the hands of the holder. A currency based upon and measured by first-class short-time commercial paper, growing out of the daily transactions of trade and commerce, and not out of speculative and promoting ventures, is the determining factor of the desired elasticity. The volume of such currency will in the nature of the case be governed by the ebb and flow of trade and commerce, the only self-regulating factor; and the requirement of a gold reserve of 45 per cent, as proposed by the Hitchcock bill, will not only make such currency safe, but it will also act as a deterrent to undue expansion, for the gold reserve must be secured as well as the commercial paper before the reserve notes can issue. A reserve bank can give book credit and note credit. I refer to our bill. Its book credit is backed by a reserve of 35 per cent, while its note credit is backed by a gold reserve of 45 per cent. And this ample gold reserve, as the experience of the other great countries of the world teaches us, will at all times check undue expansion of note credit. And this lesson comes to us not only from abroad, but our own experience, under the obsolete State bank systems, affords us ample evidence of the danger that flows from the issue of paper currency without ample gold reserve. to be observed that a strong central bank is much better equipped for securing and maintaining an ample gold reserve by its control of discounts than a system of scattered reserve banks; but while this is so, we can, however, congratulate ourselves that the reserve notes that are to be issued under the proposed system will undoubtedly be as safe in the hands of the holders as our existing national-bank notes, so that while we have sought for and, in a measure, secured elasticity we have not sacrificed soundness and safety.

The PRESIDING OFFICER (Mr. THORNTON in the chair). The question is on the amendment of the Senator from Okla-

homa [Mr. OWEN]. Mr. BRISTOW. Mr. President, I suggest the absence of a

The PRESIDING OFFICER. The Senator from Kansas suggests the absence of a quorum, and the Secretary will call the

Works Gallinger

The PRESIDING OFFICER. Sixty-four Senators have answered to their names. A quorum of the Senate is present.

Mr. OWEN. I observe that, although I was in the Senate Chamber, I neglected to answer to my name on the call.

The PRESIDING OFFICER. Does the Senator from Okla-

homa ask permission that his name be added?

Mr. OWEN. No: I do not.

Mr. BURTON. Mr. President, I desire to give notice that to-

morrow at the close of the routine morning business I shall seek to address the Senate on the question of regional banks versus a central institution.

Mr. CRAWFORD. Mr. President, last night at the close of the evening session I was making some observations on the pending bill. I wish to occupy the attention of the Senate a short time only in continuing the line of discussion in which I

was engaged when the Senate adjourned.

I was discussing the question of the ownership of the stock in these reserve banks and the provision in the bill which coerces national banks into taking the stock or suffering the penalty of giving up their charter and going out of business. I challenged Senators to point to a single provision anywhere in the existing banking systems of the world as a parallel for this coercive feature of the pending bill, and I insist that no such precedent can be cited.

Mr. President, if it appeared that the principal and essential purpose for which this law is to be enacted would fail in the absence of this drastic coercive feature, there might be some justification for it; but it does not seem to me that there is anything in the situation which sustains the contention that the purposes sought to be attained by this legislation would fail if the matter of subscribing and owning the shares in these banks was made optional so far as the national banks of the country are concerned, just as it is optional so far as State banks and trust companies are concerned, and if the public were to have the privilege of subscribing for this stock as well

I have here a statement by one of the experts who came before the committee, a very competent gentleman, disinterested, as I understand it, not himself engaged in the banking business, and therefore not speaking from the standpoint of self-interest at all. Mr. Conant came before the committee several times and placed his valuable services at the disposal of each of the factions of the committee which have made reports here, and his opinions were highly respected. In his testimony, discussing the particular feature to which I am addressing myself, he said:

self, he said:

I am opposed to the present draft of the bill in compelling national banks to enter the system or dissolving their charters within one year. I think it is not in accordance with the conservatism of Anglo-Saxon laws. I understand it is legal—that the Government has reserved the right to modify or revoke charters. But in Massachusetts, of which State I am a native and of which State I am proader at the moment than that in which I now live, the law which authorizes the legislature to modify or annul charters is supposed to be invoked only in case of gross laches on the part of a corporation, or to make some trifling ameadment. The proposition that a corporation which has a charter for 20 years, and in which shareholders have invested their capital, believing it would be a good investment, within one year should be compelled to accept provisions which it appears are objectionabe to many of them, or be dissolved. I think is drastic and un-American. That does not necessarily imply that the bill can not be carried out with some modifications.

Mr. Conant expresses confidence that this enforced subscription of stock is not necessary to the successful operation of the law, and that it can be put into operation just as well through subscription extended to the public as by confining that subscription and ownership to the banks themselves. He says:

This whole bill is largely an experiment. There is nobody who can predict how it is going to work. We can not predict whether the present banks are going to tumble over each other to get into the system or stay out. It would be a very unfortunate experience if three-fourths of them should stay out. Perhaps you can do it, provided that your big institutions in the reserve cities and the central reserve cities shall be brought in by persuasion or perhaps by a certain amount of compulsion, although I do not believe much in compulsion in financial matters. If you have

a means of providing banking capital in your reserve centers, the system will so along just as well without the smaller banks. If you can sell your capital to private shareholders, with a 5 per cent interest, with a reasonable expectation of making 5 per cent on the investment. I think you would have no difficulty in selling it. Then you would be able to start the system on a sound going footing, and the question whether other banks should come in would be left to subsequent developments. ments.

Now, Mr. President, just look at this proposition squarely for a moment and see if the statement of Mr. Conant does not meet your own view of fairness and justice in harmonizing this legislation with the common rights of the average citizen of these United States and with the rights of stockholders who hold stock in a small national bank of only \$25,000 capital or \$50,000 capital; and, as I recall it, over one-half of the seven thousand and odd national banks in the United States are banks with a capital of \$50,000 and \$25,000.

Those are the small banks, serving country constituencies, not engaged in the large financial operations of the country, but serving effectively and well small communities in small towns and in country villages. The stockholders of those banks as individuals have nothing to say about whether or not they shall take this stock. They have the same standing and no more as other individuals in those communities who have no stock in those banks.

My friend from Missouri [Mr. Reed] last night intimated, when he interrupted me, that because these banks are scattered all over the country and their stockholders are men engaged in the ordinary vocations in those various communities, to require the banks in which they have shares to come into this system and to take this stock is, in effect, requiring the public to take this

ock. That is far-fetched. It is not a correct statement at all. This bill is not dealing with those stockholders, it is not recognizing those stockholders, it is not recognizing any right on their part to ownership of the banks we are creating, but it is dealing with the corporate entity which we call a national bank or national banking association; it is dealing with it in its essence as an incorporated bank. It is not recognizing in any sense the stockholders who may have a share in it. It is saying to that corporate entity called a national banking association, "You, and you alone, are required to subscribe for this stock, and you refuse to subscribe to it at the risk of giving up your existence." In principle it is the same as if this law, instead of saying it to this corporate entity which you are recognizing here as a national bank, were to say to the stock-holder engaged in his ordinary pursuits, "We require you to subscribe stock to this enterprise, or we prohibit you from continuing to carry on your business." That is not literally a correct statement of the situation, I admit, because this is a bank with a charter received from the Government, granted to it by an act of Congress, while the individual stockholder, as an individual, is engaged in the prosecution of his individual and private pursuits. I do not mean that it is parallel and identical, but I say that the consequences, the penalty visited upon this bank because it refuses to take this stock, is a penalty which, in effect, puts that bank out of business, just as the Government might put the individual out of business.

Mr. REED. Mr President——
The PRESIDING OFFICER. Does the Senator from South Dakota yield to the Senator from Missouri?

Mr. CRAWFORD. I do.

Mr. REED. I undertook to interrogate the Senator from South Dakota last evening, but he was too busy to permit me to conclude what I wanted to ask him.

Mr. CRAWFORD. But the Senator will remember that it

was pretty late.

Mr. REED. Yes; I recall that it was late, and, of course, the Senator is not obliged to break in on his discourse. like, if the Senator now has a disposition to yield to me for that purpose, to ask him one or two questions in order to elicit his views.

The Senator speaks of a distinction between requiring the stockholder of a national bank or permitting the stockholder of a national bank to take the stock in the regional bank and requiring the bank as a corporate entity to make such subscription. Does the Senator think that that is a substantial difference as a practical question?

I mean that if a thousand men own the stock of a bank, they own the bank; they own the corporation. If it would be fair and proper to require the stockholders, as such, to subscribe for an additional share of stock each, would there be any difference in the practical effect worked out under that kind of requirement and requiring the corporate entity itself to subscribe for an equal amount of stock?

Mr. CRAWFORD. I do not see that there would, and I should be opposed to a law which would undertake to coerce the individual stockholder against his will into subscribing for an additional share of stock, holding before him the penalty that unless he did so he could no longer transact business, as un-American and against the spirit of Anglo-Saxon civilization, just as strenuously; and more so, indeed, than I would urge it against the entity you call the national banking corporation.

Mr. REED. I may have misunderstood the Senator, but I

understood him to be making that very distinction.

Mr. CRAWFORD. Not in that way; far from it.

Mr. REED. And if he was making that distinction, I wanted to ascertain whether he thought there was any real difference between the two plans. That brings us to this—
Mr. CRAWFORD. Let me make myself clear there.

Mr. REED. Certainly.

Mr. CRAWFORD. It would add to the repugnance and the revulsion I have for the enforcement of such a principle if it were applied to the individual stockholders beyond what I now hold against it as applied to a banking corporation.

Mr. REED. Now, may I not be permitted to ask one or two further questions? Does the Senator think that a bank should so manage its business affairs that it can not pay to its depositors on demand the money they have turned over to it?

Mr. CRAWFORD. I entirely justify the purposes of the bill, which are to make the banks more efficient and more able to meet such demands as the Senator refers to; and my contention is that those features of the bill can remain operative and in full force and effect and be executed with free ownership and the right of public subscription to the stock as well as if it is confined, as proposed here, to coercive subscription by the banks.

Mr. REED. Of course, Mr. President, I am trespassing on the Senator's time, and-

Mr. CRAWFORD. I am perfectly willing to yield. Mr. REED. And I have no right to indicate to him the character of answer he ought to make, but the question I asked

was merely preliminary.

Mr. CRAWFORD. My answer is affirmative, if the Senator prefers to have it that way for the purpose of asking another

Mr. REED. If it be true that it is the duty of a bank to always hold itself in a position to respond to the legal demands of its depositors, then I ask the Senator if it is not the duty of the lawmaking power to prescribe regulations which will, so far as possible, compel a bank to maintain itself in a position to respond to the demands which the Senator says it ought to respond to?

Mr. CRAWFORD. I cordially agree with that statement.

Mr. REED. The Senator, then, will agree with me that Congress has the right to require the banks to keep in their vaults enough reserves to be able to respond to every demand, will he

Mr. CRAWFORD. That is making it pretty broad, because that might be construed as requiring them to keep in their

vaults practically all the money they have.

I am talking about the right of Congress as a legal proposition, not as a question of accommodating the banks. The Senator has already said that the banks ought to maintain themselves in a position where they can respond to every demand. If they ought to so maintain themselves, then Congress ought to command them to so maintain themselves, should it

Mr. CRAWFORD. Well, I do not want to make a statement so broad that it would imply that the Government could create a bank, induce and encourage men to subscribe to its stock and to invest their capital in the stock for the purpose of carrying on business, and then turn around and practically paralyze it; for instance, with the declared purpose of making it safe, going so far in that direction that it would prevent it from doing business at all. I think the exercise of power to so great an extent would be an abuse. I do not know how far the Senator from Missouri means to go.

Mr. REED. I am not talking about the Government going to the extent of doing anything which would be merely destructive; I am talking about the duty of the Government to compel banks to maintain themselves in a position where they can respond to just demands, which the Senator has already said

they should always be prepared to respond to.

Mr. CRAWFORD. All reasonable regulations of the law with that object in view are certainly within the scope of con-

gressional authority and are sound in principle.

Mr. REED. Now, Mr. President, if that is true, the Govern-

ment clearly has the right to require the banks to maintain larger reserves than they now maintain. That is true, is it not?

Mr. CRAWFORD. To maintain larger reserves, or they can change the method of managing and holding the reserves so

that they will be more efficient; for instance, by mobilizing them, by having a common reservoir for them, and perhaps by reducing the amounts required, because rendering the reserves more effective, more mobile, would make it possible to reduce the aggregate amount held by each bank.

Mr. REED. But the Senator is doing more than answering by question. He does concede that the Government has the my question. right, in the interest of the safety of depositors and in order that the banks may be compelled to always stand able to meet just demands, to increase the amount of reserves or to require the reserves to be held in a certain place other than they are now held, which, of course, concedes that feature of the bill which requires the reserves to be placed in regional banks.

Mr. CRAWFORD. Very well; I am not finding fault with

Very well. Then the complaint of the Senator is reduced down to the question of a contribution to the capital stock of the institution which is created for the benefit of the banks in order to enable the banks to mobilize their reserves and to use their reserves for their own benefit; in other words, the Senator's complaint is that, in endeavoring to relieve the banks, in endeavoring to create a greater efficiency for the banks, in endeavoring to furnish them facilities by which they can utilize reserves which now must lie dead or dormant, the Government proposes to be guilty of the heinous offense of asking the banks to contribute 6 per cent of their capital and their surplus to the creation of a reservoir that is built for their benefit and the benefit of nobody else. Does the Senator think there is any outrage or wrong in that?

Mr. CRAWFORD. Mr. President, the Senator with his usual strength and power and, I must confess, with the ingenuity with which he is gifted, makes a statement from his viewpoint, but I decline to adopt it-I am addressing myself now to his last sentences—as a correct statement of this particular propo-

sition.

Mr. President, the question of requiring banks to keep reserves and hold them, either in their own vaults at all times as a protection to their own groups of depositors or giving them the option either to hold reserves in their own banks or carry a portion of them in certain other banks in reserve cities or in central reserve cities or in reserve banks, is not a question in which the banks alone have an interest.

Mr. REED. No.

Mr. CRAWFORD. It is a question in which the entire country has an interest; it is a question in which every person who may have business in any of the banks has a very lively interest; it is a question in which the entire fabric of business throughout the United States stands in a relation of very great dependence; and it is upon the broadest grounds of public policy, and to promote public welfare, that legislation of this sort is proposed. It is not a question of simply levying a tax or an assessment upon a particular line of business in order to capitalize the reserve banks, and it is not fair to undertake to confine it to a limit of that kind. The bill which I am criticizing in that respect does not propose to do that, because it undertakes to guarantee that, if the business will justify, it will pay to the banks subscribing to the stock of the reserve banks dividends at 5 per cent.

Mr. REED. Mr. President, the public is interested in the banks not going down. Nobody said they were not. Of course, all business depends upon the banks remaining stable, because we do business through them. Nobody has denied that. What I have said is that the primary obligation is upon the banks, and that this bill is primarily intended to make the banking system more capable of performing its functions, to protect it from disasters that now threaten it, to enable the bankers to use reserves they can not now properly use; and that, therefore, the direct benefit, the immediate benefit, comes to the banks. Now, Mr. President, if the Senator will pardon me, does he

think that the banks are taking any chances of losing the capi-

tal they put into the regional banks?

Mr. CRAWFORD. I am not discussing the question from that standpoint at all. The Senator is anticipating. He is asking questions along a certain line before I have developed my I refuse to place the proposed organization of the reserve banks and the mobilization of reserves, the establishment of these reservoirs, upon the narrow ground that we are simply providing for the creation of a bank for banks. We have heard it over and over again here that the new system is simply to provide a bank for banks. It ought to be something more than a bank for banks, and that is why I am criticizing it.

Mr. REED. That hardly answers my question, which was, whether the Senator thought that the bankers and the banks were taking any great chance of losing the amount of money which they may contribute to the stock of the reserve banks?

Mr. CRAWFORD. I have made no such statement and I make no such contention. I do not contend that this is an unsafe investment for the banks. I think it is very probable that it will be a good investment; that it will earn money; and, therefore, I maintain that it should not be an exclusive privilege enjoyed only by the banks.

Mr. REED. Mr. President, if it is almost certain to make money, if it is so fine an investment that the banks ought not to be permitted to have it exclusively, then what becomes of the Senator's argument that we are perpetrating an outrage upon the banks when we compel them to make an investment which is so good that it is an outrage to refuse to the general public

a chance to participate in it?

Mr. CRAWFORD. Mr. President, my objection to the principle underlying this feature of the bill is not weakened one particle, whether you take the view that it is going to be a losing investment or whether you take the view that it is going to be a profitable investment. The principle is just the same in each case. If the Government of the United States comes to me and undertakes to say that I must invest my money in the stock of the Chicago & North Western Railway Co., and that if I do not do so within a period of one year the strong arm of the Government will compel me to abandon the prosecution of the business in which I am engaged, it does not change the dangerous character of that principle, whether they can convince me that upon my investment in the stock of the Chicago & North Western Railway Co. I would receive a dividend of 50 per cent per annum or whether I could convince them that I should lose every dollar that I put into it. The principle is the same in either

Mr. REED. But, Mr. President, the Senator entirely misses the point. Nobody proposes to say to a private citizen, "You shall make an investment"; nobody proposes to say to a bank, "You shall make an investment." What it is proposed to do is to say to the banks, "You shall make yourselves safe; this is the means provided; and if you do not take it and thus place yourselves in a position to respond to your legal liabilities, then you must go out of business." I now want to apply the Senator's own illustration-

Mr. CRAWFORD. Mr. President, if the Senator will permit

If the Milwaukee road-Mr. CRAWFORD. Mr. President-

Mr. REED. Let me finish.

Mr. CRAWFORD. I want to

Mr. REED. Let me finish this statement.

Mr. CRAWFORD. The Senator knows that I have the kindliest feelings toward him, and all that, but does the Senator think it is quite fair to my argument, before I have fairly started, to put in all this time, going from one question to another and from that to another, until I have practically been carried far afield and broken the continuity of my argument? I say that now, so that the Senator will have some consideration for my desire to present my thoughts in a somewhat connected manner.

Mr. REED. I want merely to finish this statement, and I will not further interrupt the Senator, because I think he has

been very patient and very gracious.

I want to apply his Milwaukee railroad illustration as it ought to be applied. The Government has no right to say to the Senator, or to any other citizen, "You must buy the stock of the Chicago, Milwaukee & St. Paul Railroad. If it were to undertake to do so, it would violate the fundamentals of our Constitution; but the Government has the right to say to the Chicago, Milwaukee & St. Paul Railroad, "It is your duty to provide reasonably safe appliances and reasonably safe tracks over which to carry the citizens of the country; if you have a bridge over a stream in a dangerous condition, you shall repair that bridge or you shall quit business.'

That is a parallel to this thing. The Government has no right to say to the private citizen: "You shall subscribe to the stock of a bank." The Government has no right to say to a bank: "You shall subscribe to the stock of another bank." The Government has, however, the right to say to a bank: "You are in a dangerous position, and here is a remedy we propose. You must accept that remedy and put yourself in a safe position, or we will no longer permit you to exist, because you are not capable of fulfilling the functions you undertook to fulfill and for which

we chartered you."

That is all there is of this cry of "outrage" and "wrong." Instead of the banks complaining because they are required to contribute to this system, they ought rather to regard it as a legislative beneficence which is proposed; for we intend, under this bill, to make their reserves liquid, to permit them to re-

borrow those reserves, and thus have the benefit of them. On top of that, we propose

Mr. CRAWFORD. Mr. President-

Mr. REED. We propose under this system to issue the money of the Government, and give it to these banks Mr. CRAWFORD, Mr. President—

Mr. REED. Just a moment.

Mr. CRAWFORD. I yielded to the Senator to ask me a

question, not to make a long argument.

Mr. REED. When banks, under that sort of proposition, complain because they are required to put up 3 per cent of their capital and surplus, upon which they get practically 71 per cent return, it is a poor position for banks to take, and it is a poor position for their special pleaders to occupy.

Mr. CRAWFORD. Is the Senator asking me a question? I failed to get it, if he was asking a question in that speech.

Mr. REED. I said I would not say anything more, so I shall have to sit down.

Mr. CRAWFORD. Mr. President, it becomes a habit, in undertaking to meet arguments upon the floor of the Senate, by some sort of innuendo to attempt to put the person presenting the argument into the attitude of being a special pleader, interested in a special way, for the purpose of weakening in advance the things he desires to say.

My opposition to the coercive feature of the bill does not rest upon any concern for the banks. They probably will take care It is a protest against the application of a principle which I believe to be unjust; unjust if it related to stockholder, unjust if it related to an individual citizen anywhere, and in the same way, no more and no less, unjust to this

entity you call a banking corporation.

I maintain that the capital it is sought to create in these reserve banks to enable them to hold reserves, to receive deposits, and to issue reserve notes, can be secured, and that this system can be erected and made successful without this coercive feature in the law. It is equally vicious whether the invest-ment in the stock by these banks results in great gain and profit to them or whether the investment results in material loss to them, and to their disadvantage. It makes no difference which result follows. If the investment is a profitable one, if it is one upon which they are to reap great advantage and the ownership of the stock is confined to them, then you are conferring upon them a special privilege, and you are denying that privilege to all the rest of the universal society under this Government. Is that right?

Suppose I have \$5,000 which I am anxious to invest, and I think this stock in a Federal reserve bank is a good investment; that I am perfectly willing to take 5 per cent dividends on my investment; that I am anxious to take that stock. Is it fair or just to say to me, "You are not recognized; you have no rights; we refuse to take your money; we refuse to permit you to invest in it; this privilege is to be conferred only upon

banks"

Why should it be confined to and conferred only upon banks, if it is a profitable investment? The people of the United States who have their funds husbanded are anxious to invest They are glad to get securities that are backed by the Government of the United States. They want municipal bonds or State bonds or Government bonds-securities of that kindbecause they believe in them, because they think they are safe, because they are good investments.

I believe this stock will be a good investment for those who are satisfied with 5 per cent dividends. Why should the law be so framed as to exclude Smith, Brown, Jones, and Robinson from subscribing to the stock, and confer that right only upon

banks?

If you take the other view of the matter, if it is to be a losing investment, it is just as vicious and just as bad. Suppose we assume that it will not pay the 5 per cent dividends; that the dividends may be passed one year after another; that the reserve banks will be a disappointment. Suppose we assume that they have not found avenues in which to invest the vast deposits they are holding. They are confined to dealing with banks, and can not deal with the public. They have not been able to earn the dividends; the investment has lain idle, and brought back nothing, and the certificates issued for the stock have depreciated until they can not be sold at par. Suppose we assume that they have gone down to 75 per cent or 50 per cent. Then you have coerced the little bank out in the country, with \$25,000 capital, into making an investment against its will, against its judgment, and you have put upon it that loss.

The rule is just as vicious in one case as it is in the other. am insisting that whether the Government, as a matter of law, has the arbitrary power to compel this thing or not, it ought not to do it; that it is un-American to do it; that it is against the spirit of freedom in investing one's own means and is not called for here. That is not necessary. There is no precedent

found for it anywhere.

I desire now to call attention to the situation with reference to the matter of ownership of the great European banks. I call attention to a statement made by the very able and competent gentleman who was employed by the committee of the House of Representatives when it made its investigation of the Money Trust-a gentleman who enjoyed the complete confidence of the committee, so that its members never asked witnesses a question. This gentleman asked all of the questions. He assumed control of the entire course of the examination from beginning 'to the end, and it was extended over many months. His wide experience in the city of New York, his familiar acquaintance with all of these abuses in banking circles and in the great combinations of the country, especially fitted him for the service he was employed to render and did render. I am speaking of

I wish to call attention to what he says in an article contributed to a magazine after these hearings were all concluded and the report made, which I have no doubt in a large measure was prepared by him. It is an article which he contributed to the public for the information of the American people after the Glass bill had been introduced in the House, after the distinguished chairman of the Committee on Banking and Currency of the Senate had offered his bill here, and when the merits of the two bills were being discussed in the other branch of Con-

gress and by the public generally.

Mr. Untermyer, in this article in the North American Review, published in October last, says:

As I read the bill, the reserve banks are not allowed to take private deposits nor to buy, sell, discount, or rediscount domestic bills or notes in the open market or by any means except for or through the member banks. In that way all healthy competition in the discount market is strangled, and the only effective way of keeping down the rate is prevented. If we ever hope to establish a discount market, the bill must be amended in the latter particular.

He goes on and discusses these foreign banks and the ownership of their stock. He says:

ship of their stock. He says:

In England, France, Germany, and other countries the central or Government banks take private deposits and buy paper directly in the open market in competition with the private banks, bankers, and individuals who are their customers and for whom they rediscount. In this way the private discount rate is regulated.

In 1906 the Reichsbank had 70,000 depositors, of which only 2,500 were banks. There were 25,000 merchants, 9,500 farmers, 22,000 industrial companies. The first deposit must amount to not less than 150 marks (\$312,25), but the smallest deposit entry allowed is 2½ cents.

That is the kind of bank this great German Imperial Bank is. He goes on and says:

In the same way the banks of France, England, and other countries have vast numbers of depositors, of which only a small proportion are banks. All the European Government and quasi-Government banks compete with the private institutions both in the taking of deposits and in the purchase and discount of commercial paper, except that they allow no interest on deposits.

He goes on further in regard to the ownership of these banks:

He goes on further in regard to the ownership of these banks:
The Bank of England has 145,530 shares scattered among 11,986 individual shareholders, or an average holding of less than 124 shares each. Each owner of 500 shares or over has but one vote regardless of the amount hold.
The Bank of France has 182,500 shares held by 32,867 holders, averaging 54 shares each tholder—11,592 holders have 1 share each; (8,88) have 2 shares each; 1,742 have 10 to 20 shares each; 1,088 have 21 to 50 shares each; 246 have 51 to 100 shares each. Only 108 holders have 100 shares or over.
The Reichsbank has a capital of 100,000 shares. There are two classes of stock—40,000 shares of 3,000 marks (\$750) each and 60,000 shares of 1,000 marks (\$250) each. On January 1, 1912, there were 18,757 holders, with an average of 54 shares each; 16,537 domestic owners held 29,810 shares of the first class and 58,540 shares of the second class.

These are the great imperial banks of France and of Germany that we have had pointed out to us over and over again during the years we have been investigating the question of improving our banking and currency system. Those great banks, which are held up to us as the guiding lights for us to imitate and follow, are banks whose stock belongs to the people, individual owners extending throughout the Empire, running up into thousands of holders, and are open to business transactions with them and with the public.

What have you here? While, as I said last night, I expect to vote for the Hitchcock bill, and if it is defeated to vote for the Owen bill, because I heartily and fully believe in the provisions for an elastic currency and the mobilization of bank reserves, and I think the provisions in each of the bills with regard to those two points are excellent, I am bound to say that in other respects—and this question of ownership is one of them—the bill as it came to us from the House, and as it is presented by the Senator from Oklahoma, has some very vicious things in it.

In the first place, you are interlocking all the national banks together. You are practically, by operation of law, making a joint ownership and trust combination among them and excluding the public from any ownership or any interest in them. You are compelling the little banks to come in, and it is done with the knowledge that they will be overshadowed, dominated. and controlled and overwhelmed by the big banks.

Who felt the keenest need for the relief this bill is to furnish? The big banks. It was the big banks that failed in discharging their duty to the country banks, namely, to give them their money when they were entitled to it in 1907. The big banks wanted this relief, asked for it, organized, and pushed a propaganda all over the country for a number of years to secure it. Of course they wanted a privately owned central bank, for which the American people would not stand, but they took the initiative. They gathered together the literature. They went out and made the speeches. They built up the sentiment because they felt the need of having these provisions for mobilization of reserves and for additional currency in times of distress.

In that respect their desire was sound. I have no criticism of that. They wanted, however, to throw out a net and compel all the little banks everywhere throughout the country to come in. They sought to shape the first bill so that they would have to come in, while apparently making it optional. In this bill you cut across lots, upon the theory that the shortest distance between two points is a straight line, and say to these little banks: "You shall come in or quit business." When they ask: "What are we to receive as justification for our coming in?" you point out to them the provisions for redis-count. You say to them: "You can bring your portfolio to a reserve bank, and you can get a book credit there, or you can put in your prime bills of exchange and notes and get currency. and go back home and loan out the currency to your people."
"Yes; but what kind of prime commercial paper do you require?" "Well, it is commercial paper maturing in 30 days, 60 days, or not to exceed 90 days." The little banker out in a village of 1,500 people says: "We have no such paper. We loan to the live-stock grower and dealer. We loan to the country merchant. We loan to the farmer. These borrowers come in and pay their interest and get a renewal from year to year, or from one six-months' period to another six-months' period. We have no 90-day maturing paper, except so small an amount that we could not get any particular benefit from your bank. Besides that we have our correspondents in St. Paul and in Sioux City and in Minneapolis and in Omaha with whom we are carrying accounts. They accommodate us, and we have no We feel no need for anything of this kind. We feel no necessity to take stock in this bank. You have so hedged about your provisions for rediscounting paper and your classification of the kind of paper that will be received that they are of no benefit to us. We would like to get our money from the big banks down in New York when they owe it to us and we need it, and they refuse to pay it. We would like to have you build up a new system by which we shall not have a repetition of the experience of 1907, but so far as this reserve bank being of direct benefit to us in the way of rediscounting paper, it is of no benefit at all." Your answer to this small country Your answer to this small country bank is, "You have got to come in or give up your business. You say to John Smith, who would be glad to take 100 shares of this stock and get his 5 per cent dividend and who stands ready to subscribe for it, "No; this goes to the banks. You can not have it."

I protest against that as an unsound principle. believe tying up the banks through coercion into this kind of a close corporation, excluding the public, is a good thing. So far as that feature of the bill is concerned. I believe it is a bad thing. I do not believe you will find, as I said last night, a parallel for it anywhere on earth.

The private bank, the State bank, is not required to come in. There are, as I recall, about 17,000 of them in the country. They will continue to send their reserves down to New York and get 2 per cent on daily balances. The 2 per cent which they will get will go into their coffers, and the reserves which they keep there will continue to be invested in call loans as heretofore, because they are not in this system. not reaching these 17.000 State banks and trust companies. You are leaving it optional with them whether they shall come in or not. They may continue doing business in the old way, getting interest on daily balances as they did before, keeping accounts in New York and elsewhere as they did before, and they are competing in the various communities with the small national banks, which you are compelling to come in.

How are you going to get in all the banks? There is no way on earth to get the State banks in except as they come in voluntarily. You will not have one-third of the banks in when you force the national banks in. You will have more than two-thirds of the banks of the country still outside of the reserve

Why is it not better to have the capital stock of this bank furnished voluntarily by investors from the rank and file of the citizenship of the country? Why is it not better to open the books and let them come forward and take it, giving preference to small subscribers, and protecting the holding of this stock so that it will be impossible for it to be gobbled up and monopolized by a few? Why will not that be better? By doing so you will increase the banking capital of this country, from individual investments, \$105,000,000.

We were told by Mr. Forgan and other bankers when they appeared before the committee that it is legitimate banking to lean out \$12 to the public for every dollar held by the bank as capital, and under pressure the banks go farther than that.

It is admitted that there is not sufficient banking capital when compared with the expansion of credits throughout the

Now, if you can bring \$105,000,000 additional banking capital to the service of the American people from the pockets of individuals by opening the subscription books and letting them take this stock, why is that not better than by force of law to coerce every country bank into a great organization, which when created is a banking trust greater than any we have yet

I believe it is better to get the money from the pockets of individuals for the capital of these reserve banks and require national banks to place their reserves in them, as this bill provides. The Senator from Missouri [Mr. Reed] was correct in stating that it is a function which the Government has a right to exercise, for the purpose of protecting the public business and depositors, to require these banks created under Federal law to keep reserves and prescribe the manner in which they shall carry them and where they shall be kept. There is no doubtful exercise of authority in that. When this capital is offered to private citizens of the country they will come forward and take it, and they will take it because it is a good investment, because they have faith in the Government, and for the 5 per cent divi-Make the national banks carry their reserves in these new Government banks and you will have accomplished the purposes of mobilizing reserves that you seek without compelling the country banks to take money out of their loanable assets and deprive the patrons of their communities of the use of that

By such public ownership you would, in addition to this increase in banking capital, secure an extended, diversified ownership among the people of the country in these new banks. would create a reservoir in which the reserves will be kept for the purpose of relieving any weak spot in time of stress and danger, just the same as you have it under the House bill and in the bill presented by the distinguished Senator from Oklahoma. I contend that such a provision for public ownership is better and that it relieves this bill from that coercive feature which is repugnant and repulsive to the average American

As to the attempt to create an impression that those who hold this view of the ownership urge it because they are in some way not in sympathy with proposed legislation, and have a special interest in the banking community, let us look at that for a moment. You have created in this bill, if it becomes a law, eight great banks. You have required those banks to do business for banks and the Government and nobody else. You have denied the privilege of investing a penny in the ownership in the stock of these banks to the individual citizen and you have provided for a board of directors to manage them, in which you allow the banks to have the selection of six and the Government to have the selection of three. The banks select three who are directly interested in the proprietary banks and three others—of course, from their customers—engaged in agricultural, commercial, and manufacturing pursuits; but the member banks select them, and you need not doubt that they will know who those three other men are when they select them; they select these three, and the other three who are directly interested in the stock-holding banks; that makes six; while then the Government selects but three.

You have formed a great banking trust when you create these banks and exclude private individuals from any ownership in them or any voice in their management. You have confined the ownership to banks, and you have given them power to elect the number of banks which then took place, and would this have

controlling members on their boards of directors; but because we suggest something better the insinuation is made that we are special pleaders, in some way interested in behalf of these banks.

Our proposition is that the Government, having created these banks, shall, through the Federal reserve board, appoint five of their managing directors and let the banks select four, thereby placing the absolute control of the board under an agency ap-

pointed by the Government itself.

You limit the ownership to banks. You limit the direct control, through the boards of directors, to banks. You exclude the individual citizens of this country from owning a dollar of the capital stock. The board of directors of each reserve bank will be the immediate, potent, controlling power in the conduct and management of its business. All must admit that. board of directors managing and directing a reserve bank in Chicago, or San Francisco, or Denver, or New Orleans, or Boston, or New York will be in close touch with the rapidly moving commercial current every day and every hour, and theirs will be the potential control. The actual control will be vested in the board of directors and not in a supervisory tribunal here at Washington. You have given this supervisory tribunal of seven or nine the power of review and recall, and I am glad that has been done. I am glad they are removed from direct interest in I heartily approve of all that. But, having created the banks. that long-distance tribunal to sit in power here as a supervising tribunal, a board of review, you allow these banks to choose the actual and immediate agencies which will direct, guide, and control the business of each bank as its board of directors, giving a secondary and more remote supervisory power to a long-distance tribunal.

Mr. HITCHCOCK. Mr. President—
The VICE PRESIDENT. Does the Senator from South Da-

kota yield to the Senator from Nebraska?

Mr. CRAWFORD. Yet, because we suggest changes of this kind, the attempt is made to put us in the attitude of being special leaders representing special interests, with a sinister desire to defeat this legislation. I yield to the Senator from Nebraska.

Mr. HITCHCOCK. Mr. President, along the line of the argument now being made by the Senator, I want to ask him to go back a little in history, to 1907, and to direct his attention particularly to the city of New York as the processes of that panic gradually came on. I wish to ask him what, in his judgment, would have been the situation if at that time there had been in the city of New York a reserve bank to which the banks and trust companies of the city could have gone with their paper and procured discounts for the purpose of meeting the demands of their depositors in cash or the needs of their borrowers? Suppose that reserve bank in New York City was controlled by nine directors, and suppose the great banking interests of New York had elected six of those directors and the Government only three of those directors, and then suppose the great Knickerbocker Trust Co. had come to that reserve bank and asked it for cash with which to meet the demands of its depositors, and had offered commercial paper of borrowers interested in the Tennessee Coal & Iron Co.; I ask the Senator whether it is his opinion that a reserve bank in New York City, controlled by the great banking interests which crushed a number of those trust companies, would have discounted the paper of men interested in the Tennessee Coal & Iron Co.?

Is it not a fact that if there had been a reserve bank in New York City at that time controlled by the great banking interests which dominated the situation there and then, and which dominate it now, they would simply have refused to discount the Tennessee Coal & Iron Co. paper, just as the big banks refused to do it, because they desired the Tennessee Coal & Iron Co. to get into such straits that it would be forced to sell out to the Steel Trust? Would not the situation have been exactly the same in New York with the reserve bank controlled by the banking interests that it was without a reserve bank?

Mr. CRAWFORD. Mr. President, I do not know. depend on the character of men and what sort of patriotic spirit prompted them and whether their motives were high or low, but there certainly would be serious danger that in that atmosphere men selected by the banks themselves and placed in control of this board would fail to measure up to the standard of unselfish patriotism that a situation like that requires.

Mr. HITCHCOCK. But, on the other hand, if the reserve board in New York had been then in existence and had had upon its board five directors chosen by the Federal reserve board here in Washington, is it not likely that that reserve bank in New York City would have come to the relief of any bank having eligible and legitimate paper and prevented the ruin of a prevented the absorption of the Tennessee Coal & Iron Co. by the Steel Trust?

Mr. CRAWFORD. I think that is probable.

Mr. HITCHCOCK. Is not that a fair example of what may result in a reserve under the control of banking interests, and is it not a strong argument in favor of having a reserve bank. which is a public utility, under the control of directors, a majority of whom are selected by the Federal reserve board?

Mr. CRAWFORD. That is why I favor the proposition to

have the Government appoint a majority of the board of directors.

Mr. President, I am not in sympathy and would not be in sympathy with the creation of Government banks, and giving them a tremendous advantage through Government deposits and Government patronage, and so favoring them that they could overshadow privately owned banks, and then turn them loose to compete with private bankers. But in committee I reserved the right to express my view here that both these bills come short of what they ought to provide in allowing the banks created under this law to exercise the power that is necessary to make them potent and effective in regulating discounts and preventing abuses in that the banks we are creating here are confined entirely in their transactions to accommodations extended to member banks and transactions with the Government itself, with the sole exception, under this open-market provision, of dealing in foreign bills and bank acceptances indorsed by the banks themselves.

Instead of being a special pleader for these banks, I believe that in order to make this system complete and potent, the banks created under this law should have the power under regulations of the Federal reserve board to deal with individuals, not for the purpose of going into general competition with the banks of the country, but for the purpose of making effective a control over discount rates which we seek in the bill, to give to the Federal reserve banks.

In the House they apparently thought that they had given such power in the Glass bill, but I fail to find it there, and I fail to find it in either draft that is reported here. In the report made by Mr. Glass, chairman, on page 52, the following observation appears in regard to section 15 of the bill:

It will have been observed that the transactions authorized in section

It will have been observed that the transactions authorized in section 14 were entirely of a nature originating with member banks and involving a rediscount operation. It is clearly necessary to extend the permitted transactions of the Federal reserve banks beyond this very narrow scope for two reasons:

1. The desirability of enabling Federal reserve banks to make their rate of discount effective in the general market at those times and under those conditions when rediscounts were slack and when therefore there might have been accumulation of funds in the reserve banks without any motive on the part of member banks to apply for rediscounts or perhaps with a strong motive on their part not to do so.

2. The desirability of opening an outlet through which the funds of Federal reserve banks might be profitably used at times when it was sought to facilitate transactions in foreign exchange or to regulate gold movements.

movements.

Then he goes on to say:

In order to attain these ends it is deemed wise to allow a reserve bank, first of all, to buy and sell from anyone whom it chooses the classes of bills which it is authorized to rediscount. The reserve bank evidently would not do this unless it should be in a position which, as already stated, furnished a strong motive for so doing. Outright purchases in the open market would, of course, require the payment of the face of the paper less discount, whereas rediscount operations would require simply the holding of a reserve of 33½ per cent behind the notes issued or deposit accounts created in the course of the rediscount operation. Apart from this fundamental permission, it was deemed wise to allow the banks to buy coin and bullion and borrow or loan thereon and to deal in Government bonds.

Section 15, under "open market," does not give the power, in my judgment, that will make this law effective in enabling those reserve banks to exercise that effective control over the rate of discount to which he refers, because it provides

Sec. 15. That any Federal reserve bank may, under rules and regulations prescribed by the Federal reserve board, purchase and sell in the open market, at home or abroad, either from or to domestic or foreign banks, firms, corporations, or individuals—

What?

cable transfers and bankers' acceptances and bills of exchange of the kinds and maturities by this act made eligible for rediscount with or without the indorsement of a member bank,

In the United States, so far as acceptances are concerned, they are all in the future; we have none. We do not use acceptances. We may use them sometime in the future; possibly they may come in vogue under this bill; but these are bank acceptances, and the buying and selling of them in dealing with individuals is dealing in the paper of banks. These reserve banks can not buy and sell bills of exchange and promissory notes, which make up the great volume of credit transactions in this country, except as they get them from other banks.

What did your guide and counsel of the committee in the Pujo hearings, Mr. Untermyer, say about this? He criticized the bill in this respect more severely than do I. He says:

As I read the bill, the reserve banks are not allowed to take private deposits nor to buy, sell, discount, or rediscount domestic bills or notes in the open market, or by any means except for or through the member banks. In that way all healthy competition in the discount market is strangled, and the only effective way of keeping down the rate is prevented. If we ever hope to establish a discount market the bill must be amended in the latter particular.

What have we, then? Along with the most excellent provisions here for the mobilization of the reserves and the elasticity of the currency we have a close corporation in which the banks, and the banks alone, are to share. We have the transactions conducted by the banks we are creating confined to member banks, and to member banks alone. We withhold from these new instrumentalities the power to prevent abuses in the way of extortion in discount rates; we withhold from them the power to reach over the head of this trust which we are creating, when it is guilty of abuse, when it has abused the power that is given to it by the chaining of these banks together into one and confining the capitalization of the banks created to their contributions, and placing the boards of directors under their control; we prevent the Federal reserve board which we are creating here from going over the head of this organization, in a great emergency, and dealing with individuals. Mr. Untermeyer says that healthy competition in the discount market is strangled by these limitations and restrictions.

It seems to me that his accusation is justified. In that spect I think both these drafts are incomplete. Some say respect I think both these drafts are incomplete. the giving of power to these banks to deal with individuals is going too far. As I said, I would not give this power to the reserve banks, except under the rules and regulations prescribed by the Federal reserve board, this tribunal created as a supreme court of finance, governed only by the highest and most unselfish and patriotic motives, and in the mind of which the uppermost purpose is to promote the public welfare. I would give the reserve banks this power, to be exercised only under rules and regulations prescribed by the reserve board. anyone fear that they would launch these banks into the general business of competing with all the other banks of the country in ordinary banking business? Not for a moment would they do it; but to withhold from them the power to prevent extortion and abuse by the vast combination that you create here in chaining these banks together, by withholding from them the power to pass over the head of these member banks when emergency requires it, and to deal with individuals, is to deprive this plan of a power which makes the Bank of England so dominant in the financial world, and enables it to draw gold to London from the four corners of the globe, and to check dangerous speculation and ward off danger. The great banks in Germany and in France control the discount rate effectively, because they can deal in the open market and establish the discount rate; but we withhold that power here. I think the bill is seriously weak in that respect.

Mr. President, I have failed to hear any argument that justifies the exclusion of the common public from ownership in the stock of the regional reserve banks. I have failed to hear any satisfactory justification of the invocation of a governmental power to coerce existing banking associations against their will to invest money in the stock of new banks organized by the Government; and, from the standpoint of having full and effective governmental control, I think the bill fails in that it does not come up to what the public has a right to expect of it in placing the great reserve banks under the control of the banks themselves.

One other feature and I am through. I confess that I was not only startled but amazed at some of the situations which were uncovered as a result of the revelations of the Pujo investigating committee. One of the fundamental recommendations made by that committee after the investigation was a declaration against interlocking directorates. I am not so radical that I think it is wrong for a bank to have control of little feeding banks, smaller in size and located in a country that is tributary, and which are not competing banks. I think they are avenues for the convenience of the public, and connected with them there is no abuse; but the combination of the great banks of the country for the purpose of controlling credit is recognized everywhere as a positive menace. Yet, although this bill is dealing with banking and currency, and although three or four lines added to one of its sections would remove from the management of the banks that come into the new system the vices of interlocking directorates, not one line is found in the bill to remedy that evil. When we are dealing with a subject relating to banks and can deal effectively with

the evil to which I have referred by attaching a few sentences to one of the sections of the bill, I do not see why it is necessary to delay on the ground that it is to be hereafter mixed into some general legislation for the country. I am disappointed because it is not in here, and I think it can and should be put into this bill.

Mr. BRISTOW. Mr. President-

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Kansas?

Mr. CRAWFORD. Certainly.

Mr. BRISTOW I wish to inquire of the Senator from South Dakota if the evils developed in the Pujo committee report have not been assigned as among the great reasons making legislation necessary

Mr. CRAWFORD. Certainly.
Mr. BRISTOW. Then we have the spectacle of having the causes which make the legislation necessary, and the legisla-

tion itself not providing a remedy.

Mr. CRAWFORD. I have a slip here that was sent around over the country very extensively after the conclusion of the Pujo hearings. I do not know who is the author of it, but it apparently was circulated as a direct result of the revelations of that committee. One of the recommendations is to prevent anyone being a director in more than one bank in the same city. I am not satisfied with simply saying "in the same city"; I think the same person ought to be prohibited from being a director of a competing bank, whether it be in the same city

I think both bills which have been presented to the Senate have improved very greatly many of the features of the House bill. In this connection I am reminded somewhat of an incident that happened in one of the counties in my State, where they wanted to build a new courthouse. In order to do so, the law required the commissioners to submit the matter of issuing bonds to a vote of the electors of the county. The county seat happened to be located down in one corner of the county, and it was feared that, if they submitted the proposal to issue bonds to build a new courthouse, it would be voted down. The courthouse was an old ramshackle building, and it seemed necessary to erect a new one.

So the commissioners conceived the plan of repairing the old courthouse, which they could do under the law without issuing They passed a resolution under which they built onehalf of a new courthouse on the back part of the old one. finished it up, and installed the county officers in the new rooms in that half When they had done that they passed another resolution authorizing the making of further repairs, and under that they built the other half. I think the chairman of this committee and his associates have made a new bill out of the House bill, and that the Senator from Nebraska and those associated with him have greatly improved the Owen bill. The bills reported by the Senate committee are, in my opinion, much better than the bill as it passed the House.

I am very glad that the provision for the protection of depositors in the bank is in both bills.

Mr. BRISTOW. Mr. President, if the Senator will yield-

Mr. CRAWFORD. Certainly.
Mr. BRISTOW. I should like to invite his attention to the fact that the provision for the insurance of deposits in the Owen draft was incorporated in the Democratic caucus after the number of regional banks had been increased and the rate of interest on the stock of the regional banks had been fixed at 6 per cent. In the case of a number of the proposed regional banks there may not be any profit, and in others there may be profit; so that we may have the insurance of depositors in New York and New England, and in the West none whatever.

Mr. CRAWFORD. I discovered that, and was going to com ment on the fact that, while I am glad a step has been taken in the Democratic conference recognizing that principle, it falls far short of furnishing the relief which I think is provided for in

the Hitchcock draft.

When I visited my State, after this bill had been introduced in the House and was under discussion. I took copies of it with me and talked to all classes of business people—bankers and others—about it. They were not satisfied with the provision relating to the loaning of money by the banks upon farm mortgages nor with the classification of commercial paper which could be rediscounted by the reserve banks, because they did not deal in their business with that class of commercial paper sufficiently to get any benefit under this law. The provision of the Hitchcock draft which allows national banks to make loans upon farm mortgages out of their time deposits-50 per cent upon farm mortgages for periods of five years-is an improvement, and provides for making such loans and fixes the percentage upon time deposits. This is much more effective and will give a relief not found in the limitation to an amount equal to one-half of the capital stock of the bank, as provided in the Owen bill.

A bank in an agricultural community is usually a bank of about \$25,000 or \$50,000 capital. If its loans upon farm morr-gages are limited to half its capital stock, they will amount only to \$12,500 or \$25,000, which is practically of no consequence. So in that respect the provisions of the Hitchcock bill will afford a relief to country banks and their patrons that can act come from the Owen bill.

In the draft reported by the Senator from Nebraska [Mr. HITCHCOCK | and his colleagues here is a provision that will permit the rediscount of commercial paper maturing in 180 days, provided that no one bank shall be accommodated to the extent of more than \$200,000. That provision will make the bill of some substantial benefit to the na ional banks in agricultural communities, because if they can get accommodation on sixmonths paper they can make use of the rediscount provisions of the bill in times of stress. The universal verdict of banks such as we have in the Sta e that I in part represent is that if the maturity of this paper is limited to 90 days it will be of little or no benefit to them.

I do not think it is fair to limit the maturity of this paper to 90 days. In case of foreign acceptances, the House bill allows a maturity of six months, but when it comes to paper held by one of the small country banks-and no paper is of better quality (al hough it extends over a longer period of time) than the paper that is in the portfolios of these country banks-it is limited to 90 days, while foreign acceptances and bills of exchange of that kind are made eligible which mature in six

months or four months.

I think that is an unjust, unfair discrimination, all the more grievous in its character when you compel the country banks to come in here and subscribe to the stock against their judgment and against their will and then so specify and define the class of paper that can be recognized in the banks crea ed by this bill that they are barred from the benefit of its use.

Mr. BRISTOW. Mr. President—
The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Kansas?

Mr. CRAWFORD. I do.
Mr. BRISTOW. I should like to invite the Senator's attention to what seems to me to be a fact, and that is that the sixmonths paper which we include in the Hitchcock amendment is just as good and just as liquid as the mercantile paper in the cities that runs for 30 days.

Mr. CRAWFORD. It is just as good. There is no doubt

about that.

Mr. BRISTOW. It is based upon wheat and cattle paper, as we call it, which is a food product that ultimately will bring money in the market.

Mr. CRAWFORD. In that respect it is absolutely of the

same quality as the commercial paper which we have been told over and over again is paid out of consumption. This is paid out of consumption, but the processes consume a little longer time than the short-time paper of commercial cities.

Mr. BRISTOW. I should like to ask the Senator if he has heard any reason assigned why the paper of the farmer, which runs for six months, and which is just as good as any paper that can be made, should not be treated with as favorable consideration as the paper of the merchants or the business men?

Mr. CRAWFORD. I certainly have not.

Mr. BRISTOW. Has there been any effort to explain why this discrimination is made against the notes of the farmers of

Mr. CRAWFORD. The only explanation I have ever heard was a complaint that the paper is not liquid; but paper that matures in 120 days or 180 days, and which is attached to a bill of lading, and expresses a transaction between an importer and some foreign merchant, may run for four months or six months,

and is no more liquid than this class of paper.

Mr. BRISTOW. Let me direct the Senator's attention to another fact. If this six-month paper relates to the agricultural products of a foreign country the banks can handle it.

Mr. CRAWFORD. Oh. yes. Mr. BRISTOW. If it relates to the agricultural products of our own country they can not. Is not that one of the most palpable and unjustifiable discriminations against the paper of the American farmer that ever was incorporated into any law?

Mr. CRAWFORD. I have protested against it ever since I

rend the bill the first time.

I wish to say, in closing, that I believe I am expressing the feeling of the constituency I represent with relation to this bill when I say that they do not want any unnecessary delay in its consideration and in final action upon it. I believe it is the sentiment of the people in my home State, and I believe in the country generally, that as soon as it can be done, after giving the bill the serious, careful consideration and discussion that a bill of this gravity and importance ought to have, it should be enacted into law in some form or other. I shall be pleased if, within a brief time, without sacrificing the serious discussion the bill should have, the Senate can come to a vote upon it.

It has been no desire of mine in the part I have taken in the

discussion and as a member of the committee to delay the consideration of the bill, and it is not out of any spirit of partisan hostility that I have expressed these views. As I said frankly at the start, I believe the good features of the bill outweigh its faults, serious as some of them are. I have simply given voice to my opinion upon these particular propositions.

I have not undertaken to go into a scientific discussion of the bill in any exhaustive way. Upon the question of stock ownership, upon the question of control by the boards of directors, upon the question of interlocking directorates, and upon the power to go over the heads of member banks and deal with individuals for the purpose of controlling the discount rate my convictions are clear, and I have attempted to give expression to them here.

I believe the bill would be stronger, and I do not believe it would be unjust, if it contained a provision, under rules and regulations prescribed by the Federal reserve board, authorizing the reserve banks in serious emergencies to deal with individu-I believe such a provision would make it more powerful and effective in reaching a sore spot than it will be in its present form. We come to the place where powerful organizations of banks are entrenched, we build up a system very good, as far as it goes, but when we reach the point where we may, if we will, give these Government banks the power to leap over oppressive organizations and deal directly with people, and thus compel them to relax their grip where it is a menace, we stop short and withhold the power necessary to protect the people of the country from oppression.

Mr. HITCHCOCK. Mr. President-

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Nebraska?

Mr. CRAWFORD. I do. Mr. HITCHCOCK. The Senator's views on that point are quite well known; but I wish to follow out for a moment a line of questioning on that subject, and see if he will not admit that a necessity or propriety of having the reserve banks of Europe deal with the people which does not apply to the United States.

For example, take the Senator's own State. Can he conceive the possibility, in any town of South Dakota, of a borrower who has a legitimate right to credit being compelled to go to a reserve bank to get his loans?

Mr. CRAWFORD. No.

Mr. HITCHCOCK. I can not in Nebraska. I do not believe I could conceive of such a thing in Iowa, nor in Illinois, nor, in fact, in any State of the Union, for the reason that in all of these States, and in every city and in every town of each State, there exists a real, active competition among the thousands of banks to do the business of the community in which they exist,

Mr. CRAWFORD. I agree with the Senator upon that point so far as nine-tenths of the banks are concerned, or even more. The statement was made here last night that there is free competition among them; but while that is true when you apply it geographically to the greater part of the United States, is it true universally? If it is, why do we have complaints here against the "Money Trust" and great combinations of banks that absorb the funds of the insurance companies and use the money of the people in stock gambling, and all that, discriminating against those whom they wish to crush and building up those whom they wish to favor? Is this outcry a sham or is there not semething to it?

Mr. HITCHCOCK. Wherever such a condition exists-and we will take, for instance, New York, without intending to cast any aspersions on that town above any others-can not the Senator from South Dakota clearly see how a reserve bank, owned by the people and under Government control, would naturally rectify such a condition?

Mr. CRAWFORD. I ask the Senator, How can it do it if its transactions are all confined to the very banks that are guilty, and if you have not provided against interlocking directorates, and have simply bound all the banks in the country together in one legal combination?

Mr. HITCHCOCK. I think I can explain that. The banks are not all guilty. Take the case of the city of New York: The testimony before the Pujo committee did not show that all the banks were interlocked by this interlocking-director sys-

tem. It did not show that all of the banks were in a conspiracy. It did show, however, that a large number of the banks were practically in fear of their big neighbors. They were afraid to make loans to certain interests for fear the more powerful banks in the community, controlling the clearing house, would punish them. If, however, under this new system we establish a reserve bank under the control of the Government, having the authority at any time to come to the relief of any bank. the power of the banking interests heretofore exerted in the form of a conspiracy will be necessarily done away with and any man or any institution having a legitimate demand for credit will find some bank not only willing to lend him money, but not afraid to do so, because the bank will know that it can go to the reserve bank in case the others start a war upon it.

So it seems to me that if you provide a reserve bank controlled by the Government and owned by the people, you do away with any argument in favor of having the reserve bank go into the active banking business itself. It will not be compelled to go into the competitive business of banking, because by its uniform treatment of all banks it will put all banks in a position where they can compete. None of them need be afraid of any dominating control or any conspiracy to force it to do

as a dominating influence may dictate.

Mr. CRAWFORD. I do not want to be misunderstood there. I have no desire to put, and I doubt entirely the wisdom and fairness of putting, these banks, with the great advantages we are giving them, into competition in the sense that they would become active competitors in ordinary banking transactions with the banks of the country. I would not advocate that; but I say that if we give them the reserve power, under the rules and regulations prescribed by the Federal reserve board, in cases of emergency to go over the heads of banks and deal with individuals, while it is a latent power which they might never use, I think it would be a wholesome check. I think it would be a very valuable asset to the people of the United States to have that reserve power, under rules and regulations prescribed by the Federal reserve board, given to these banks. So far, and no farther, would I go.

Mr. HITCHCOCK. Of course, there is an objection to that, as the Senator will recognize, in that if you confine the business of a reserve bank strictly to the function of buying paper from its member banks it not only gets commercial paper which is supposedly good, but it has upon all that commercial paper the indorsement of a solvent bank; so that it is dealing with something absolutely a good investment, and practically without any possibility of failure. If, on the other hand, you permit a bank organized for the purpose of caring for the reserves of the American banks to go directly into the market and lend money to the individual borrower, it will be subject to the same losses to which individual banks are subject, because it will not have the protection of the indorsement of its member banks upon the paper which represents its direct loans to the people.

Mr. CRAWFORD. I say to the Senator that the Bank of England has had that power and has exercised it repeatedly for a good, long period of time, extending for a hundred years. Of course, for a shorter time, but in a very effective way, the Imperial Bank of Germany and the Bank of France have exercised and do exercise that power. They have not met with disaster and shipwreck by doing it. As I said before, I should want to give that power with a view to its being exercised only when necessary to control discount rates when the public wel-

fare requires it.

Mr. TOWNSEND. Mr. President, in view of the fact that for something like an hour now there have been fewer than 20 Senators in the Chamber, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Jackson James Kenyon Kern La Follette Lane Lea Lewis Ashurst Bacon Borah Page Poindexter Pomerene Ransdell Smith, S. C. Smoot Sterling Stone Bradley Sutherland Brandegee Bristow Reed Robinson Sutherland Swanson Thompson Thornton Tillman Townsend Vardaman Walsh Warren Weeks Robinson
Saulsbury
Shafroth
Sheppard
Sherman
Shively
Simmons
Smith, Ga.
Smith, Md.
Smith, Mich. Bryan Chilton Clapp Crawford Dillingham Lea Lewis Lippitt Martin, Va. Martine, N. J. Nelson O'Gorman Overman Gore Hitchcock Hollis Overman Weeks Williams Owen Hughes

Mr. SHAFROTH. I wish to announce that my colleage [Mr. THOMAS] is confined to his room this afternoon on account of a severe sore throat.

Mr. TOWNSEND. The senior Senator from Washington [Mr. Jones] has been called from the Chamber on official

The VICE PRESIDENT. Sixty Senators have answered to the roll call. There is a quorum present.

TENTH INTERNATIONAL VETERINARY CONGRESS (H. DOC. NO. 462).

The VICE PRESIDENT !aid before the Senate the following message from the President of the United States, which was read and, with the accompanying papers, referred to the Committee on Agriculture and Forestry and ordered to be printed: To the Senate and House of Representatives:

In view of the provision contained in the deficiency act ap-

proved March 4, 1913, that-

Hereafter the Executive shall not extend or accept any invitation to participate in any international congress, conference, or like event without first having specific authority of law to

I transmit herewith, for the consideration of the Congress. and for its determination whether it will authorize the acceptance of the invitation, a report from the Secretary of State. with accompanying papers, being an invitation from the Government of Great Britain to that of the United States to send delegates to the Tenth International Veterinary Congress, to be held at London from the 3d to the 8th of August, 1914, and letters from the Department of Agriculture showing the favor with which that department views the proposed gathering.

It will be observed that the acceptance of the invitation will involve no special appropriation of money by this Government.

WOODROW WILSON.

THE WHITE HOUSE, December 10, 1913.

COMMISSION OF FINE ARTS (H. DOC. NO. 461).

The VICE PRESIDENT laid before the Senate the following message from the President of the United States, which was

To the Senate and House of Representativs:

I transmit herewith for the information of the Congress the report of the Commission of Fine Arts for the fiscal year ended June 30, 1913, with accompanying illustrations. WOODROW WILSON

THE WHITE HOUSE, December 10, 1913.

The VICE PRESIDENT. Accompanying the communication are illustrations. The whole matter will be referred to the Committee on Printing.

# PROHIBITION OF LIQUOR TRAFFIC.

Mr. SHEPPARD. Mr. President, in my recent campaign for election to this body I announced from more than 150 platforms before the people of Texas that I favored state-wide, nation-wide, world-wide prohibition. I was, therefore, especially gratified when a few hours ago committees numbering more than 2000 men and women from every section of the Union, representing the Anti-Saloon League of America, the Woman's Christian Temperance Union, other temperance bodies, and the principal churches of the country, summoned Representative Horson, of Alabama, and myself to the steps of the Capitol and requested us to introduce in the House and Senate, respectively, an amendment to the Federal Constitution prohibiting the sale. the manufacture for sale, the importation for sale, the transportation for sale, and the exportation for sale of intoxicating liquors for beverage purposes. I intend during my service in the Senate to exert every effort at my command to establish every principle and every measure to which I gave allegiance in my addresses to the people during my candidacy for the Senate.

I now introduce a joint resolution proposing an amendment to the Constitution, and ask to have it read at length.

The joint resolution (S. J. Res. 88) proposing an amendment to the Constitution of the United States was read the first time by its title, and the second time at length, as follows:

Joint resolution (S. J. Res. 88) proposing an amendment to the Constitution of the United States.

Whereas exact scientific research has demonstrated that alcohol is a narcotic poison, destructive and degenerating to the human organism, and that its distribution as a heverage or contained in foods lays a staggering economic burden upon the shoulders of the people, lowers to an appalling degree the average standard of character of our citizenship, thereby undermining the public morals and the foundation of free institutions, produces widespread crime, pauperism, and insanity, inflicts disease and untimely death upon hundreds of thousands of citizens, and blights with degeneracy their children unborn, threatening the future integrity and the very life of the Nation: Therefore he it

Recoiled by the Sonate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein). That the following amendment of the Constitution be, and hereby is, proposed to the States, to become valid as a part

of the Constitution when ratified by the legislatures of the several States as provided by the Constitution:

"ARTICLE -

"Section 1 The sale, manufacture for sale, transportation for sale, importation for sale, and exportation for sale of intoxicating liquors for beverage purposes in the United States and all territory subject to the jurisdiction thereof are forever prohibited.

"Sec. 2. Congress shall have power to provide for the manufacture, sale, importation, and transportation of intoxicating liquors for sacramental, medicinal, mechanical, pharmaceutical, or scientific purposes, or for use in the arts, and shall have power to enforce this article by all needful legislation."

Mr. SHEPPARD. Mr. President, one of the fundamental duties of the American people is the extermination of the traffic in intoxicating liquors for beverage purposes. Experience has demonstrated that the only safe way to handle this traffic is to destroy it. In the United States it has reached such proportions that the Nation must join in the struggle against it. is a menace to the integrity and the progress of this Republic. The fact that alcohol undermines the brain and paralyzes the will of man, planting in him and his posterity the seeds of physical and moral degeneracy, the seeds of disease, the seeds of poverty, the seeds of crime, makes it a peril to the very existence of free government. Let the people of this Nation insert in the National Constitution, the source of the Nation's life, a clause prohibiting an evil that will prove to be the source of the Nation's death.

National prohibition conflicts in no way with the spirit of the Federal Constitution. The organic structure of this Republic rests on a logical division of functions between the Union and the States. The States have retained control of all matters of local concern, while the Federal authority embraces every purpose of general or national scope. The liquor traffic imperils both the Nation and the State, and every unit of sovereignty must cooperate against it. It must be fought by the county; it must be fought by the State; it must be fought by

the Nation.

Already the Federal Government has entered the fight by decreeing that liquors shipped from one State to another for the purpose of violating the laws of the State of destination shall be deprived of the character and the protection of interstate commerce. This is but the first step in the battle for the Na-tion's life. It is a valuable step, but so powerful is the liquor traffic that every weapon must be brought into use. Indeed, it is not sufficient that we should have this Nation enter the con-We must unite with all the other peoples of the earth in attacking an evil that menaces society everywhere.

Let us never forget the pioneers in the world movement against alcohol. Let us here pay tribute to the courage and the devotion of the men and women who nearly 70 years ago organized at London in 1846 perhaps the first international temperance congress. In the many international congresses that have met since then this world movement has found an enthusiastic development, culminating for the present in the fourteenth International Congress on Alcoholism which assembled at Milan in September of this year. Nor should we forget the various societies of international membership that have been founded for the purpose of resisting this enemy of the human race.

It is gratifying beyond estimation to note the fact that the world is waking as never before to an acute sense of the danger of alcohol. In every country the same terrible inderment stands against it. From every land ascend the cries of the multitudes it has damned. Among almost every people it is the ch'ef source of the murders, the suicides, the thefts, the debancheries of body and of mind. Before the popular judgment of almost every country the dealers in this frightful drug must answer the following arraignment: Your traffic crushes every moment some home, some heart. The poison you distribute is an ever-spreading pestilence. It impedes the physical and mental growth of children, distorting the moral sense, promoting disobedience of parents and disregard for law. It curves the future generations of its victims—the crazed, the maimed, the palsied, and the blind—into whose blood the fittal taint is in-evitably transmitted. It wrecks domestic happiness and betrays the most cacred vows. It contains no nourishment; it gives no strength. It impairs the vital processes, the vital tissues of the human organism. It destroys moderation and selfcontrol, releasing every low and savage impulse. Instead of satisfying thirst, it leaves a greater thirst, suggesting the agon'es of hell. It is the cause of practically half the accidents in industrial occupations. It lowers the efficiency of labor and weakens the foundations of industrial progress. It increases the liability to disease, particularly to infectious maladies like tuberculosis. It diverts the earnings of mankind into channels of economic waste, causing a loss that far exceeds the revenue it provides for governmental use. It is an obstacle to human advancement that should be no longer tolerated.

As the facts become impressed on all mankind, the conviction grows that temporizing policies must be discontinued. The world is coming to understand that humanity must destroy the liquor traffic or welcome moral degradation and economic ruin. The overwhelming issue is whether men shall conquer the liquor traffic or the liquor traffic conquer men.

Let us examine some of the more important phases of the world struggle with alcohol. Great Britain has been wrestling with the liquor traffic for nearly 600 years. The English Parliament passed a law in 1327 limiting the number of liquor shops, and in 1495 gave the justices power to prohibit them in certain On various occasions Parliament actually prohibited the distillation of spirits throughout the Kingdom for a given period, and it is the observation of a high authority that the totally prohibitive acts against the liquor trade have been the most successful. Parliament has adopted altogether about 400 acts in relation to the liquor traffic without any permanently satisfactory result. It is apparent that the one solution of this problem in Great Britain, as in all other countries, lies in the prohibition of the manufacture, sale, or importation of intoxicating liquors for beverage uses. Well may we here recall the statement in 1834 of Charles Buxton, the noted English brewer, to the effect that the struggle of the school, the library, and the church, all united against the beer house and the gin palace, was but the development of the war between heaven and hell.

In Denmark prohibition is making rapid advancement. The King of that country is reported to have said in 1909 on signing an act for State-wide prohibition in Iceland, a dependency of Denmark, that few, if any, of his actions since he became King had given him more satisfaction than that of signing this law, and that if the Parliament of Denmark would pass a similar law for Denmark he would be still more willing to approve. Faroe Islands, another dependency of Denmark, prohibition is

in unrestricted and satisfactory operation.

In Norway and Sweden public opinion is rapidly moving toward national prohibition. Never was there sounder or more prophetic utterance than that of the Crown Prince of Sweden in 1911 at Hessleholm:

I do not hesitate to say that the people which first frees itself from the influence of alcohol will in this way acquire a distinct advantage over other nations in the peaceful, yet intense, struggle. I hope it will be our own people who will be first to win this start over the others

In Russia the sale of intoxicating liquors is monopolized by the Government and the establishment of state vodka shops throughout the country, causing a general increase in drunkenness, has resulted in a distinct movement against the use of alcohol. A commission was appointed by the Duma in 1912 to investigate the liquor question, and one of its recommendations was that the following sentence should be labeled on every bottle of vodka:

Man! Although thou hast bought this spirit, yet know that thou drinkest poison which destroys thee. Before it is too late never buy another bottle. (Signed) Minister of Finance.

The Duma, composed of men elected by the people of Russia, adopted this recommendation and sent it to a body of higher power for approval. The higher body rejected this recommendation, but approved another requiring instruction in abstinence from alcoholic liquors to be given in all the public schools of Russia. Let me quote here the words of an eminent Russian scholar, at St. Petersburg, in 1910:

The struggle against the liquor traffic is not simply a national question, it is a world's question. All social problems group round the question of alcoholism, while the evils of drunkenness, on such an authority as Gladstone, outweigh the evils of war, pestilence, and familie put together.

famine put together.

Twice within the last six years the Parliament of Finland has voted overwhelmingly for total prohibition, but the veto of the Czar of Russia has prevented these measures from becoming laws. The sentiment in Finland is almost universal for com-

plete, country-wide prohibition.

In Germany the present Emperor said in 1910, in a speech before the naval cadets at Muerwick, that the renunciation of alcoholic drinks would raise the people morally, and that in the next naval war victory would belong to that nation which would show the smallest consumption of alcohol. The National Industrial Congress at Hamburg in 1909 declared that it was one of the most important objects of the industrial movement to oppose the devastation of alcoholism, and that it was to the interest of German industry to restrict the sale of alcoholic liquors either entirely or as much as possible. The members of this congress assessed themselves 1 mark a year each to carry on the war against alcohol among the workers of Germany. The report of the Prussian Government trades inspector for 1911 contains this statement:

The effort of the labor organizations to limit the use of alcoholic liquors among their number is even more noticeable. The Woodworkers'

Union, of Bielefeld, seems especially successful in this respect. The use of spirits among them has practically ceased; beer drinking, especially during pauses in work, is growing less and less. Milk is taking the place of beer.

The building trades, the railway systems, the chemical industry, the national insurance societies, and certain departments of the Government have begun an active campaign against alcohol in Germany. There is no braver and no more earnest body of men and women in the world than the German prohibitionists.

The various temperance organizations in Germany are enjoying a steady and a large increase in membership. In March of this year was held, in Berlin, the first German congress for the rearing of children as total abstainers. A resolution was adopted expressing the hope that "the mothers of Germany would recognize the fact that the first step German women must take toward combating drunkenness was to bring up their own children in complete abstinence from the use of alcoholic liquors," and the belief that this would form the best means for insuring the acceptance of laws against alcohol by the coming generation.

In Austria the various temperance societies have united in a national antialcoholic congress, which is making notable progress in exposing the terrors of drink. In Hungary temperance organizations and temperance principles are steadily spreading. In 1912 a small but distinguished group of Hungarian women issued an appeal to their sisters throughout Hungary to join in the fight against alcoholism, an appeal that should be published in every language and in every country on the globe; an appeal that constitutes one of the most effective indictments of the liquor traffic that has yet been uttered. As an additional evidence of the world feeling on this subject I want to quote a few sentences from this appeal. They are as follows:

Come to our help, Hungarian women. Come from all parts of the land—poor and rich, happy and unhappy, women of station and of humble position, you whom alcohol has made to weep, you who know and feel your obligations to religion, to God, to your country, and to humanity yet unborn. We wish to uplift the coming generations which, not knowing alcohol, will belong to a morally purer and more warmhearted world. We seek the aid of all for this task. We trust that there may not be a single Hungarian woman who will not hearken to us. None shall be so humble in our eyes that we will not be grateful to see them join us; none too high to have a right to look down on the work to which we invite you. We affectionately beg you to suggest everywhere the idea of fighting alcohol. Make sentiment for it in high and low circles, for the odor of alcohol is found in both—in drawing room and in cottage. Our social organism is sick. Our physical, moral, and economic forces are on the way to destruction.

Oh, may this cry from the women of Hungary reach the women of every other land, and may the mothers of the world unite to destroy a traffic that has become the chief enemy of woman's happiness, the chief cause of woman's tears.

In the Netherlands the sentiment against alcohol is constantly growing, and an unofficial test poll of 75,000 voters has shown 62 per cent for entire prohibition. The annual meetings of the Netherlands Association for the Abolition of Alcoholic Liquors are helping wonderfully to advance this sentiment. In Belgium, where there is said to be one drinking place for every eight men, where probably more alcohol is consumed per capita than in any other European country, there are signs at last of a revolt. The great strike in April of this year, in which 500,000 men and women quit their employment for more than a week and, on account of abstinence from drink during that time, preserved perfect order, although great disturbances had been expected and the troops were under orders, gave a distinct impetus to the prohibitive movement not only in Belgium but throughout Europe and the world.

In France, where the Government is in the clutches of the liquor traffic on account of the electoral power of the distillers. wine growers, and saloon keepers, where the number of suicides has nearly trebled in 50 years, where lunacy has nearly doubled in 30 years, where the resisting capacity of the citizen has become so weakened that tuberculosis takes off 150,000 victims. every year, where statistics prepared by the ministry of justice show an enormous increase in crime on account of drink, the French Academy of Medicine has demanded the suppression of alcoholic liquors and a national league against alcoholism has been formed whose membership now exceeds 100,000.

In Spain an antialcoholic league has been recently founded and is already obtaining good results. Switzerland abolished all traffic in absinthe by popular vote in 1909, and the prohibitive idea is gaining large headway among the people as to all other forms of alcohol.

In Italy, where, until four or five years ago, wine drinking was practically a universal custom, representatives of the Government have been collecting statistics as to the effect of alcoholism in that country, and it is now generally recognized as a national menace. In 1908 an Italian temperance federation was organized at Milan. It embraces all the temperance societies

of Italy, and it is giving unity and effectiveness to the work against alcoholism in Italy.

In the Balkan States and in Greece the temperance spirit has found permanent lodgment among large and increasing

numbers of the people.

In Arabia, Palestine, Persia, Syria, and Turkey the ancient habit of total abstinence is still observed by most of the inhabit-Commercial intercourse with Europe and America has led to the importation of intoxicating liquors, and these countries are beginning to suffer from the evils that follow in the path of alcohol. Already movements have been started within these lands to prohibit the importation of alcoholic liquors. No sadder commentary on certain phases of European and American civilization may be found than the effort of these Asian peoples to prevent their degradation by the foul products distilleries and the breweries of Europe and America. I can think of nothing more humiliating than the fact that in many foreign trade centers American commerce often finds its sole embodiment in the liquor traffic. What must these foreign peoples think of our sincerity or our consistency when they see on the same ship that brings the missionaries of Christ the missionaries of the devil in the shape of barrels of whisky and kegs of beer?

In China the long struggle of Government and people against the production, the importation, and the use of opium is soon to succeed. At present alcohol is almost unknown to the more than 400,000,000 in China, and there could be no sounder argument for the destruction of the liquor industry where it now flourishes than the preservation from its terrible influence of our brethren in the distant East, who are but beginning to

enjoy the blessings of liberty.

In India the feeling of the native population against the liquor traffic has become so strong that recently one of India's foremost statesmen, Hon. G. K. Gokhale, asserted in an appeal to the British secretary of state for India, Lord Crewe, that total prohibition was the sentiment of the Indian people.

In Japan, where the traffic in intoxicating liquors received an impetus from the admission of foreigners in 1868, numerous temperance societies are developing and a national temperance league has been formed. At a recent meeting of this league the president, Taro Ando, declared the curse of alcohol would have to be suppressed by law. The Japanese soldiers were prohibited from using any kind of alcoholic liquor in the field during the great war with Russia in 1904 and 1905, and the result is an eloquent tribute to the army that abstained.

In 1911 the question of national prohibition was submitted to the people of New Zealand and resulted in 259,945 votes in the affirmative, 205,661 in the negative, or a majority of 54,282 against the liquor industry. As the law required a three-fifths vote for the abolition of the traffic, the poll had no other practical effect than to show the feeling of the people. In Australia the temperance forces are becoming stronger and more deter-

mined every year.

In Africa the liquor traffic has been prohibited in large sec tions and restricted in others by an agreement among 18 of the leading nations, including the United States, known as the Brussels general act of 1890. The importation of alcoholic liquors into the territory under this agreement is also prohibited. An international federation has been formed for the protection of the native races of Africa from the liquor traffic, one of its main objects being the enforcement of the agreement embodied in the act of 1890. It should be stated here that Menelik, ruler of Abyssinia, has issued an edict prohibiting the importation of intoxicating liquors into that country. He is using every measure at his command to prevent the introduction into his kingdom of wine, beer, whisky, and other intoxicants, all of which he calls European poison.

When Khama, King of Bechuanaland, issued an order some 20 years ago prohibiting the manufacture or sale of intoxicating beverages within his domain, the order was disregarded by the white traders. Khama and other native chiefs who were following his example appealed to Queen Victoria for assistance,

and she replied:

I approve the provision excluding strong drink from your country. I feel strongly in the matter, and am glad to see the chiefs have determined to keep so great a curse from their people.

It was this native ruler, Khama, who said on another occasion:

To fight against drink is to fight against demons and not against men. I dread the white man's drink more than the Assegais of the Matabele, which kill men's bodies and it is quickly over; but drink puts devils into men and destroys both their souls and their bodies forever. Its wounds never heal.

And thus it comes to pass that this native African chief has uttered a truth that the highest civilizations of the world may well take seriously to heart.

In various parts of Latin America movements are under way against alcohol. Laws against it have been introduced or are pending before the National Legislature of Argentina and other Latin-American countries.

Especially notable is the progress of prohibition in Canada. In the Province of Prince Edward Island complete prohibition has been adopted and crime has practically disappeared. The entire Province of Nova Scotia, with the exception of the city of Halifax, has been placed under prohibition. The liquor traffic has been outlawed in 700 of the 1,000 municipalities in Quebec. A majority of 5,000 in favor of prohibition has been registered in British Columbia. In over half the municipalities of Ontario the traffic has been discontinued. In nearly all of Newfoundland and Labrador prohibition has been established.

Turning to our own country, the United States, what pride may be felt in the fact that an area equal to nearly three-fourths of our territory containing half our population has been voted dry. Complete State-wide prohibition has been adopted in Georgia, Kansas, Maine, Mississippi, North Carolina, North Dakota, Oklahoma, Tennessee, and West Virginia. The States having pro-hibitory law for half or more than half of their populations are Alabama, Arkansas, Colorado, Florida, Idaho, Indiana, Iowa, Kentucky, Louisiana, Minnesota, Nebraska, New Hampshire, South Carolina, South Dakota, Texas, Utah, Vermont, and Virginia. Those having prohibition for one-fourth or more but less than half of their populations are California, Delaware, Illinois, Maryland, Massachusetts, Michigan, Missouri, Ohio, Oregon, Washington, Wisconsin, and Wyoming. The remaining nine States—Arizona, Connecticut, Montana, Nevada, New Jersey, New Mexico, New York, Pennsylvania, and Rhode Islandhave prohibitory law for less than one-fourth of their respective populations.

The movement against the liquor traffic has obtained such headway in the United States that nothing can prevent its ultimate nation-wide success. [Applause in the galleries.] people of the United States understand that the National Government must be summoned to the contest, and at a great prohibition gathering at Columbus, Ohio, last month the campaign for nation-wide prohibition was definitely and enthusiastically begun. It is a crusade that deserves to rank with the outpourings in the Middle Ages from Christendom toward Jeru-

This is no new question in the United States. The agitation against the liquor traffic dates from Revolutionary and Colonial times. The sale of slaves to American colonists found a permanent basis in the fact that African negroes could be exchanged for American rum. The liquor traffic gave great impetus to African slavery in the United States. Slavery has been destroyed, and now its partner-the liquor traffic-must follow it

to a common grave. [Applause in the galleries.]

The resolutions that have been introduced in the American Congress for a prohibition amendment to the Federal Constitution mark a distinct stage in the war against alcohol, but they are by no means the first suggestion of general prohibition. In 1777, 12 years before the present Constitution came into being, the Continental Congress at Philadelphia passed the following

resolution:

Resolved, That it be recommended to the several legislatures in the United States immediately to pass laws the most effectual for putting an immediate stop to the pernicious practice of distilling grain, by which the most extensive evils are likely to be derived if not quickly prevented.

Mr. President, responsibility for the miseries and the crimes of men rests far more largely with society than may be generally supposed. People who keep their own lives blameless have by no means entirely met their duty to humanity or to God. We who permit a traffic to continue that fills the penitentiaries, the jails, the asylums, the hospitals, the poorhouses, and the potter's fields are guilty of serious dereliction. We who permit a traffic to continue that will make chaos of governments and beasts of men are culprits before the bar of truth. And until we begin an affirmative movement against evils that threaten to engulf mankind, until we terminate the terrible partnership between the Government of this country and the liquor trade, a partnership whereby the revenues that sustain the Republic-yea; our very salaries as Senators of the United States represent men's broken bodies, men's wasted lives, the widow's and the orphan's cry, the white slave's bartered shame—we shall invite and we shall deserve any disaster that may overwhelm the Nation or the race. [Applause in the galleries.]

Mr. THOMPSON. Mr. President, as this is a question in which Kansas has had longer and better experience than any other State in the Union, I desire to say a few words in support of the resolution.

We have had State-wide prohibition as a part of the Kansas State constitution longer than has existed in any other State in the Union. The Kansas Legislature in 1879 voted by joint resolution to submit to a vote of the people an amendment to the State constitution forever prohibiting the manufacture and sale of intoxicating liquors, except for medicinal and scientific pur-This amendment was adopted by the people at the genposes. eral election in 1880. During the 33 years since that time the law has not been repealed, nor has the constitutional amendment on which it is based been resubmitted to the people for their affirmation or rejection. If there is any one question which is permanently settled in the minds of the people of Kansas, it is the prohibition question. In my judgment, the question will never again be submitted to the people or seriously attempted to be resubmitted by any organization, political or otherwise. If it should be resubmitted, prohibition would carry by a larger vote than any other proposition that could be presented to the people of Kansas. It has been entirely eliminated from politics, and the people are practically a unit on the question of retaining it as the fundamental law of the State. After this long trial and experience with the law fully 90 per cent of the people would vote for its continuance and are favorable to its extension throughout the Nation. Our firm stand for the law is proof of the strength of character of our citizens and a constant example in practical reform to all the States of the Nation.

The closing of the saloons and joints in the State has had a most excellent effect upon the morals as well as the material interests of the people of the State, so much so that no one with the best interests of the people and the State at heart desires to go back to the old order of things under the saloon. Among the most beneficial results of the operation of the law are better homes, happier and wealthier families, higher standards of education and intelligence, and a large reduction in crime. These are the natural and inevitable results of prohibition wherever effectively enforced. But the best result of all is in the fact that of the half million boys and girls in Kansas only a very small proportion have ever seen an open saloon. Children are growing to manhood and womanhood without the temptation or evil influence of the saloon.

During the 33 years of prohibition the illiteracy of our people has been reduced from 49 per cent to 2 per cent, and this trifling amount is almost entirely among the foreign element in the mining section of the southeast. With 105 counties in the State 87 of them have no insane, 54 have no feeble-minded, 96 have no inebriates, and what few there are come from the cities which defied the law until recent years. There is only 1 pauper to every 3,000 population, and there are 38 county poor farms which have no immates. In July, 1911, 53 county jails were empty and 65 counties had no prisoners serving Since the establishment of prohibition the population of Kansas has increased more than any of the surrounding States, and her wealth has increased until it has become the richest State in the Union per capita. Although we suffered one of the worst droughts in the history of the State last summer, recent statements from the banks show that in the 930 State banks there is on deposit belonging to the people of Kansas about \$120,000,000, and on deposit in the 213 national banks about \$90,000,000, making a total of \$210,000,000, or about \$123 for every man, woman, and child in the State.

Until 1909 Kansas permitted drug stores to sell whisky and other intoxicating liquors for medicinal purposes. This privilege was grossly abused, and the State legislature, in 1909, passed a law prohibiting the sale of intoxicating liquor for any purpose The State bank deposits of the State which had theretofore been gaining gradually only about a million dollars a year made a sudden increase of \$14,000,000, or from \$83,000,000 to \$97.000.000 at that time. In addition to this the increase in wealth within the past 10 years has been at the rate of \$120,000,000 per year. The assessed valuation of property for taxation is sufficient to give every man, woman, and child in the State \$1.700, while the average wealth in the Nation is only about \$1,200. Is it not reasonable to believe and fair to say that 33 years of prohibition has had something to do with this grand result?

About three years ago when I was judge of the thirty-second judicial district of Kansas, I was asked to give my opinion of the effects of the law in that particular locality, and I wrote a letter setting forth my views at that time, which have not materially changed, and I desire to read it now as a part of my remarks on this occasion.

It is a pleasure to say that convictions are less difficult in my district for violations of the prohibitory law than for the violation of any other criminal laws of the State. By a rigid enforcement of the law for many years, the former prejudice of the people against the law has completely changed to an extreme bias in its favor. When a jury is now impanded to try one charged with the violation of this

law, instead of a juror disqualifying, as he formerly did, because of his prejudice against the law, he now often disqualifies on account of his frank admission of extreme bias in its favor; and frequently care has to be taken on the part of the court in protecting the rights of a defendant to prevent a conviction without sufficient evidence to sustain it. A man could no more start a joint in Garden City, or any other southwestern Kansas town, than he could wilifully apply a torch to one of our best buildings. No good citizen would stand for it, no matter what his views on the liquor question.

The result is, instead of being what was formerly considered the most lawless section of the State, we have become the most law-abiding people on the face of the earth. This judicial district, consisting of the nine southwestern counties, embraces a territory equal in size to the entire State of Connecticut with little old Rhode Island thrown In, yet in most of the counties there has not been a civil difficulty of sufficient importance to justify the calling of a jury for the same length of time. One or two days is sufficient time to transact the entire court business of a regular term in each of the dive southwestern counties. The old argument that no one will settle in a prohibition community is answered by the fact that our population has more than doubled in the last four years, and instead of property decreasing in value it has enhanced in value from 100 to 1,000 per cent. I know of no one in the poorhouse or in full in any of these nine counties, and our people are as healthy, happy, and prosperous as can be found anywhere in the world, and may rightfully challenge comparison with any other similar territory with joints or open saloons.

What I said at that time as to conditions in my judicial district could have been said of most of the other judicial districts of the State, and remain about the same to-day

Kansas welcomes this resolution, and I shall gladly render every service possible to secure its passage, and thereby aid in securing for the Nation the beneficent effects which have already been realized in Kansas.

Mr. OWEN. Mr. President, I feel it my duty as a Member of this body to express my profound satisfaction and my cordial acquiescence in the proposal offered to this body by the splendid young Senator from Texas [Mr. Sheppard]. I approve of this constitutional amendment. I am glad to see it introduced.

The eastern part of my own State, consisting of the Five

Civilized Tribes of Indians, has had prohibition under the Indian treaties for a long period of time, due to the recognition by the Indian people of the baneful effects of this traffic. admitting Oklahoma into the Union, the Senate of the United States imposed upon Oklahoma a condition which the best people of Oklahoma sought and desired-that the State should be introduced into the Union with prohibition at least for the eastern part of Oklahoma, where the treaty obligations of the United States were transferred from the United States to the proposed Commonwealth about to enter the Union, and then I campaigned Oklahoma in favor of State-wide prohibition, which was adopted after a fight with the l'quor interests.

I should feel derelict in my duty to human beings if I did not now, at the first opportunity, express myself emphatically in favor of this proposal.

The only value a seat upon the floor of the Senate has that is worthy of a man is the opportunity it affords to serve other men. I hope the Senate may honor itself by passing this proposal as promptly as it can be done under the order of business in this body. [Applause in the galleries.]

The VICE PRESIDENT. The Chair is compelled to state to the occupants of the galleries, who are evidently strangers in the city, that it must be perfectly apparent that business can not be conducted on the floor of the Senate if the galleries are to control the business. There is a great deal of objection by Senators to manifestations, either of pleasure or of displeasure, on the part of the galleries. There is now pending a rule, not yet adopted, to prohibit it absolutely. It is a source of regret to a presiding officer to be compelled to call attention to what manifestly might lead to a very serious breach of decorum if long continued.

## BANKING AND CURRENCY.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 7837) to provide for the establishment of Federal reserve banks, to furnish an elastic currency, to afford means of rediscounting commercial paper, to establish a more effective supervision of banking in the United States, and for other purposes

Mr. WEEKS. Mr. President— Mr. OWEN. I do not wish to interrupt the Senator from Massachusetts. I thought if there was no one prepared to speak upon the measure we might read those sections which are unobjected to and dispose of them. But if there is desire for delay until a further time, I will not press it.

Mr. WEEKS. There are two or three Senators on this side waiting to speak, and I think we ought to defer the commence-

ment of the reading of the bill for the present.

Mr BRISTOW. May I inquire the plan that is to be followed? My understanding has been that the bill would be taken up section by section, and that the amendments which

have been suggested would be voted upon as the sections were

Mr. OWEN. Mr. President, as I understand the parliamentary rules, there are two ways in which this may be done. can either take up the bill as it passed the House and propose amendments to the House text, which finally, when that process has been concluded, would then be before the Senate as competitive measure, with the amendment moved as a substitute by the chairman of the committee; or, on the other hand, as the substitute proposed, section by section, comes up, an amendment may be proposed to it section by section.

I understand the Senator from Oklahoma Mr. BRISTOW. has moved the bill which he has reported to the Senate as a substitute for the House bill, which was reported back by the com-Section 1 of the substitute proposed by the Senator from Oklahoma is practically the same as section 1 of the amendments proposed by the Senator from Nebraska [Mr.

HITCHCOCK

Mr. OWEN. Yes; that is true.

Mr. BRISTOW. So there will be no controversy in regard to section 1, I understand.

Mr. OWEN.

Mr. BRISTOW. Then when we come to section 2, as I understand-I may be mistaken in this-the Senator from Nebraska proposes to offer a substitute for section 2 as an amendment to the House bill. That would be perfecting the text of the House bill before the substitute of the Senator from Oklahoma is voted upon; or, if the Senator from Nebraska desired, he could offer section 2 as a substitute for that section of the substitute, which would be an amendment to the amendment.

Mr. OWEN. Yes; that can be done. Mr. BRISTOW. In either event, the vote will come first on the amendment to the amendment or upon the perfection of the House text before the amendment of the Senator from Oklahoma is voted upon. Mr. OWEN.

Mr. BRISTOW. Would it not be better for us to proceed in that way than to take up the sections of the bill where there is no controversy and pass over those where there is contro-

Mr. OWEN. That is what I propose. I thought that would be the most orderly way and the most convenient way.

Mr. BRISTOW. Then, when there is no one to speak, sec-

tion 1 will be taken up and disposed of.

Mr. OWEN. Yes.

Mr. BRISTOW. And then section 2 will be taken up and the amendment offered.

The amendment offered. Mr. OWEN.

Mr. BRISTOW. That is entirely satisfactory to me. Mr. OWEN. As an amendment to the amendment.

Mr. BRISTOW. Yes.

Mr. SMOOT. Did I understand the Senator to say that there were two ways of proceeding to the consideration of this

Mr. OWEN. That is what I understand.

Mr. SMOOT. First to take the House bill and amend that or, secondly, to take the substitute and amend the substitute?

Mr. OWEN. Yes.

Mr. SMOOT. I know of no rule of this body that would allow the substitute to be taken up and voted upon in the way of an amendment to a substitute. The only bill that is before the amendment to a substitute. Senate is the House bill. The only way we can proceed with it is to amend the bill either by an amendment offered by the Senator from Oklahoma or an amendment offered by any other Senator, but we can not amend a substitute

Mr. OWEN. It is an amendment. Mr. SMOOT. Then it will have Mr. SMOOT. Then it will have to be offered as an amendment to the House bill. The Senator from Nebraska can not offer an amendment to your substitute or any section of your substitute. All he can do is to offer an amendment to any of the paragraphs of the House bill. The Senator from Oklahoma has a perfect right to offer his substitute, but it can be offered only as a whole in place of the House bill. That can be done, of

Mr. OWEN. The Senator makes the observation that it is a substitute. It is offered in the form of an amendment, and being an amendment proposed, an amendment to the amendment can be offered under the parliamentary rule.

Mr. SMOOT. Yes; but in order that an amendment can be offered to an amendment, it must first be offered to the bill

itself, and that is the House bill.

Mr. CLARKE of Arkansas. Mr. President, the situation presented ought not to cause any difficulty. Whilst the report presented to the Senate by the chairman of the Committee on Banking and Currency is popularly referred to as a substitute,

it is simply an amendment in the form of a proposition to strike out all of the House bill after the enacting clause and to insert new matter. Our rules provide for that situation very definitely and very satisfactorily:

Pending a motion to strike out and insert, the part to be stricken out and the part to be inserted shall each be regarded for the purpose of amendment as a question; and motions to amend the part to be stricken out shall have precedence.

It will be entirely competent for the Senator from Oklahoma to move to strike out all of the House bill after the enacting clause and insert the matter he presented. Then it would be open to other Senators who desired to perfect the House bill by offering amendments to that; and when the Senate has disposed of such proposed amendments the question will come in competition between the substitute offered by the Senator from Oklahoma and the original House bill. But until the House bill has been perfected, as we might say, the vote on the substitute could not take place. Under our rule there does not seem to be any way by which that result can be obviated. Calling it a substitute does not give it any additional rights or deprive it of the lawful character of an amendment, but it is a comprehensive amendment, in its legal effect, to strike out the House bill and insert the new matter proposed by the chairman of the committee.
